(1) The portions of the administrative record of the proceeding developed under part 178 of this chapter, and under part 180 of this chapter, that are relevant to the issues in the hearing.

(2) All documents in the files of OCSPP containing factual information or expert opinion, whether favorable or unfavorable to the position of OCSPP, which relate to the issues involved in the hearing. For purposes of this paragraph, "files" means the principal files in OCSPP in which documents relating to each of the issues in the hearing are ordinarily kept. Documents that are internal memoranda reflecting the deliberative process, or are attorney work product, or were prepared specifically for use in connection with the hearing, are not required to be submitted.

(3) All other documentary data and information upon which OCSPP plans to rely upon in the hearing.

(4) A narrative position statement on the factual issues in the Notice of Hearing and the nature of the supporting evidence that OCSPP intends to introduce.

(5) A signed statement that, to the best knowledge and belief of the Assistant Administrator, the submission complies with this section.

(b) Within 70 days of the publication of the Notice of Hearing or, if no party will be prejudiced, within another period of time set by the presiding officer, each party other than OCSPP shall submit to the hearing clerk in accordance with § 179.80 the following documents, numbered and organized in the manner prescribed by the presiding officer:

(1) Any objections that the administrative record filed under paragraph (a)(1) of this section is incomplete.

## Environmental Protection Agency

## § 179.87

(2) All documents (other than those filed under paragraph (a) of this section) in the party's files containing factual information or expert opinion, whether favorable or unfavorable to the party's position, that relates to the issues involved in the hearing. For purposes of this paragraph, "files" means the party's principal files in which documents relating to each of the issues in the hearing are ordinarily kept. Documents that are attorney work product, or were prepared specifically for use in connection with the hearing, are not required to be submitted.

(3) All other documentary data and information the party plans to rely upon in the hearing.

(4) A narrative position statement on the factual issues in the Notice of Hearing and the nature of the supporting evidence the party intends to introduce.

(5) A signed statement that, to the best knowledge and belief of the party, the submission complies with this section.

(c) Submissions required by paragraphs (a) and (b) of this section may be supplemented later in the proceeding, with the approval of the presiding officer, upon a showing that the material contained in the supplement was not reasonably known by or available to the party when the submission was made or that the relevance of the material contained in the supplement could not reasonably have been foreseen.

(d) If a party fails to comply substantially and in good faith with this section, the presiding officer may infer that such failure was for the purpose of withholding information that is unfavorable to the party's position, and may make such further adverse inferences and findings with respect to such failure as are warranted.

(e) Parties may reference each other's submissions. To reduce duplicative submissions, parties are encouraged to exchange and consolidate lists of documentary evidence. If a particular document is bulky or in limited supply and cannot reasonably be reproduced, and it constitutes relevant evidence, the presiding officer may authorize submission of a reduced number of copies.

(f) The presiding officer will rule on questions relating to this section.

[55 FR 50293, Dec. 5, 1990, as amended at 57 FR 28087, June 24, 1992; 70 FR 33359, June 8, 2005; 77 FR 46292, Aug. 3, 2012]

### § 179.85 Purpose of preliminary conference.

The presiding officer will conduct one or more preliminary conferences for the following purposes:

(a) To determine the areas of factual disagreement to be considered at the hearing.

(b) To establish any necessary procedural rules to control the course of the hearing and the schedule for the hearing.

(c) To group parties with substantially similar interests, for purposes of presenting evidence, making objections, cross-examination, and presenting oral argument.

(d) To obtain stipulations and admissions of facts.

(e) To take other action that may expedite the hearing.

### § 179.86 Time and place of preliminary conference.

A preliminary conference will commence at the date, time, and place announced in the Notice of Hearing, or as otherwise specified by the Administrator or presiding officer in a subsequent notice. The preliminary conference may not commence until after expiration of the time for filing notices of participation under § 179.42. The presiding officer may specify that two or more such conferences shall be held.

### § 179.87 Procedures for preliminary conference.

Parties in a hearing must appear at the preliminary conference(s) prepared to present a position on the matters specified in § 179.85. A preliminary conference may be held by telephone, or other electronic means, if appropriate.

(a) To expedite the hearing, parties are encouraged to prepare in advance for the conference. Parties should cooperate with each other and should request information and begin preparation of testimony at the earliest possible time. Failure of a party to appear at the preliminary conference or to raise matters that could reasonably be

anticipated and resolved at that time will not delay the progress of the hearing, and constitutes a waiver of the rights of the party regarding such matters as objections to the agreements reached, actions taken, or rulings issued. Such failure to appear may also be grounds for striking the party's participation under § 179.42(f).

(b) Each party shall bring to the preliminary conference the following specific information, which will be filed with the hearing clerk under § 179.80:

(1) Any additional information to supplement the submission which may have been filed under § 179.83, and/or which may be filed if approved under § 179.83(c).

(2) A list setting forth each person who has been identified as a witness whose oral or written testimony will be offered by the party at the hearing, with a full curriculum vitae for each and a summary of the expected testimony (including a list of the principal exhibits on which the witness will rely) or a statement as to when such a summary will be furnished. A party may amend its witness and document list to add, delete, or substitute witnesses or documents.

(c) The presiding officer may hold preliminary conferences off the record in an effort to reach agreement on disputed factual or procedural questions.

(d) The presiding officer shall issue and file under § 179.80 a written order reciting the actions taken at each preliminary conference and setting forth the schedule for the hearing. The order will control the subsequent course of the hearing unless modified by the presiding officer for good cause.

**§ 179.89 Motions.**

A motion, unless made in the course of a preliminary conference or a transcribed oral hearing before the presiding officer, must be filed in the manner prescribed by § 179.80 and include a draft order. A response may be filed within 10 days of service of a motion. The moving party has no right to reply, except as permitted by the presiding officer. The presiding officer shall rule upon the motion.

**§ 179.90 Summary decisions.**

(a) After the hearing commences, a party may file a written motion, with or without supporting affidavits or brief, for a summary decision on any issue in the hearing. Any other party may, within 10 days after service of the motion, which time may be extended for an additional 10 days for good cause shown, serve opposing affidavits or brief or countermove for summary decision. The presiding officer may set the matter for argument and call for the submission of briefs if not submitted by the parties.

(b) The presiding officer will grant the motion if the objections, requests for hearing, other pleadings, affidavits, and other material filed in connection with the hearing, or matters officially noticed, show that there is no genuine disagreement as to any material fact bearing on the issue and that a party is entitled to summary decision.

(c) Affidavits should set forth facts that would be admissible in evidence and show affirmatively that the affiant is competent to testify to the matters stated. When a properly supported motion for summary decision is made, a party opposing the motion may not rest upon mere allegations or denials or general descriptions of positions and contentions; affidavits or other responses must demonstrate specifically that there is a genuine issue of material fact for the hearing.

(d) Should it appear from the affidavits of a party opposing the motion that for sound reasons stated, facts essential to justify the opposition cannot be presented by affidavit, the presiding officer may deny the motion for summary decision, order a continuance to permit affidavits or additional evidence to be obtained, or issue other just order.

(e) If a summary decision is not rendered upon all issues or for all the relief asked, and evidentiary facts need to be developed, the presiding officer will issue an order specifying the facts that appear without substantial controversy and directing further evidentiary proceedings. The facts so specified will be deemed established.

(f) A party may obtain interlocutory review by the Administrator of a summary decision of the presiding officer.

## Environmental Protection Agency

## § 179.95

### § 179.91 Burden of going forward; burden of persuasion.

(a) The party whose request for an evidentiary hearing was granted has the burden of going forward in the hearing with evidence as to the issues relevant to that request for a hearing.

(b) The party or parties who contend that a regulation satisfies the criteria of section 408 of the FFDCA has the burden of persuasion in the hearing on that issue, whether the proceeding concerns the establishment, modification, or revocation of a tolerance or exemption from the requirement for a tolerance.

[55 FR 50293, Dec. 5, 1990, as amended at 70 FR 33359, June 8, 2005]

### § 179.93 Testimony.

(a) The presiding officer will conduct such proceedings as are necessary for the taking of oral direct testimony and for the conduct of oral examination of witnesses by the parties. The presiding officer shall limit oral examination to prevent irrelevant, immaterial or unduly repetitious examination.

(b) Direct testimony shall be submitted in writing, except that the presiding officer may order direct testimony to be presented orally in those unusual cases where the memory or demeanor of the witness is of importance. Written direct testimony shall be in the form of a verified statement of fact or opinion prepared by the witness, in narrative form or in question-and-answer form. Written direct testimony may incorporate exhibits. Such a verified statement or exhibit may not be admitted into evidence sooner than 14 days (or such other reasonable period as the presiding officer may order) after the witness has delivered to the presiding officer and each party a copy of the statement or exhibit. The admissibility of the evidence contained in such a statement is subject to the same rules as if such testimony had been given orally.

(c) Oral cross-examination of witnesses will be permitted. Each exhibit that a party intends to rely upon in cross-examining a witness shall be furnished to the other parties not later than 3 days (or such other reasonable period as the presiding officer may

order) before such exhibit is used in the cross-examination.

(d) Witnesses shall give testimony under oath or affirmation.

### § 179.94 Transcripts.

(a) The hearing clerk shall make arrangements to have all oral testimony stenographically reported or recorded and transcribed, with evidence that is admitted in the form of written testimony or exhibits attached or incorporated as appropriate.

(b) Unless the presiding officer orders otherwise, parties shall have 15 days from the date that the transcript of particular oral testimony first becomes available to propose corrections in the transcript of that testimony. Corrections are permitted only for transcription errors. The presiding officer shall promptly order justified corrections.

(c) As soon as practicable after the taking of the last evidence, the presiding officer shall certify:

(1) That the original transcript is a true transcript of the oral testimony offered or received at the hearing, except in such particulars as the presiding officer specifies.

(2) That the written testimony and exhibits accompanying the transcript are all the written testimony and exhibits introduced at the hearing, with such exceptions as the presiding officer specifies.

(3) The transcript with attached or incorporated material, as so certified by the presiding officer, shall be submitted to and filed by the hearing clerk under § 179.80.

(d) Copies of the transcript shall be available to the public in accordance with § 179.81; parties may make special arrangements through the hearing clerk to obtain copies on an ongoing, expedited basis.

### § 179.95 Admission or exclusion of evidence; objections; offers of proof.

(a) Written material identified as direct testimony or as an evidentiary exhibit and offered by a party in a hearing, and oral testimony, whether on direct or on cross-examination, is admissible as evidence unless the presiding officer excludes it (on objection of a party or on the presiding officer's own

initiative) because it is irrelevant, immaterial, or unduly repetitive, or because its exclusion is necessary to enforce a specific requirement of this part relating to the admissibility of evidence.

(b) If a party objects to the admission or rejection of any evidence or to the limitation of the scope of any examination or cross-examination, the party shall state briefly the grounds for such objection. The transcript shall include any argument or debate thereon, unless the presiding officer, with the consent of all the parties, orders that such argument not be transcribed. The ruling and the reasons given therefor by the presiding officer on any objection shall be a part of the transcript. An automatic exception to that ruling will follow.

(c) Whenever evidence is deemed inadmissible, the party offering such evidence may make an offer of proof, which shall be included in the transcript. The offer of proof for excluded oral testimony shall consist of a brief statement describing the nature of the evidence excluded. If the evidence consists of a document or exhibit, it shall be inserted in the record in total. If the Administrator in reviewing the record under § 179.112 decides that the presiding officer's ruling in excluding the evidence was erroneous and prejudicial, the hearing may be reopened to permit the taking of such evidence, or, where appropriate, the Administrator may evaluate the evidence and proceed to a final decision.

(d) Official notice may be taken of Agency proceedings, any matter that might be judicially noticed by the courts of the United States, or any other fact within the knowledge and experience of the Agency as an expert agency. Any party shall be given adequate opportunity to show that such facts are erroneously noticed by presenting evidence to the contrary.

**§ 179.97 Conferences during hearing.**

The presiding officer may schedule and hold conferences as needed to monitor the progress of the hearing, narrow and simplify the issues, and consider and rule on motions, requests, or other matters concerning the development of the evidence.

**§ 179.98 Briefs and arguments.**

(a) Promptly after the taking of evidence is completed, the presiding officer will announce a schedule for the filing of briefs. Briefs must include a statement of position on each issue, with specific and complete citations to the evidence and points of law relied on. Briefs must contain proposed findings of fact and conclusions of law.

(b) The presiding officer may, as a matter of discretion, permit oral argument after the briefs are filed.

**Subpart F—Decisions and Appeals**

**§ 179.101 Interlocutory appeal from ruling of presiding officer.**

(a) Except as provided in paragraph (b) of this section and in §§ 179.20(b), 179.42(f), 179.75(b), and 179.90(f), rulings of the presiding officer may not be appealed to the Administrator before the Administrator's consideration of the entire record of the hearing.

(b) A ruling of the presiding officer is subject to interlocutory appeal to the Administrator if the presiding officer certifies on the record or by document submitted under § 179.80 that immediate review is necessary to prevent exceptional delay, expense, or prejudice to any party or substantial harm to the public interest. When an order or ruling is not certified by the presiding officer, it shall be reviewed by the Administrator only upon appeal from the initial decision except when the Administrator determines upon the request of a party and in exceptional circumstances, that delaying review would be deleterious to vital public or private interests. Except in extraordinary circumstances, proceedings will not be stayed pending an interlocutory appeal. Where a stay is granted, a stay of more than 30 days must be approved by the Administrator.

(c) Ordinarily, the interlocutory appeal will be decided on the basis of the submission made to the presiding officer, but the Administrator may allow further briefs and oral arguments. Any oral argument will be transcribed and the transcript will be prepared and certified in the same manner as provided in § 179.94.

**§ 179.105 Initial decision.**

(a) After the filing of briefs and any oral argument, the presiding officer shall prepare and file an initial decision on the issues of fact in the hearing and the objections relating to those issues.

(b) The initial decision must be based on a fair evaluation of the entire record, and must contain:

(1)(i) A conclusion that no change is warranted in the order or regulation to which objection was taken; or

(ii) A conclusion that changes in the order or regulation are warranted, the language of the order or regulation as changed, and an effective date for the order or regulation as changed.

(2) Findings of fact supported by reliable, probative and substantial evidence that has been found admissible by the presiding officer, and adequate citations to the record supporting those findings.

(3) Conclusions on legal and policy issues, if such conclusions are necessary to resolve the objections.

(4) A discussion of the reasons for the findings and conclusions, including a discussion of the significant contentions made by any party.

(c) Except as otherwise provided by order of the Administrator filed in accordance with § 179.80, after the initial decision is filed, the presiding officer has no further jurisdiction over the matter and any motions or requests filed with the hearing clerk will be decided by the Administrator.

(d) The initial decision becomes the final decision of the Administrator by operation of law unless a party files exceptions with the hearing clerk under § 179.107 or the Administrator files a notice of review under § 179.110.

[55 FR 50293, Dec. 5, 1990, as amended at 70 FR 33360, June 8, 2005]

**§ 179.107 Appeal from or review of initial decision.**

(a) A party may appeal an initial decision to the Administrator by filing exceptions with the hearing clerk, and serving them on the other parties, within the period specified in the initial decision. The period may not exceed 30 days, unless extended by the

Administrator under paragraph (d) of this section.

(b) Exceptions must specifically identify alleged errors in the findings of fact or conclusions of law or policy in the initial decision and, if errors in the findings of fact are alleged, must provide supporting citations to evidence of record. Oral argument before the Administrator may be requested in the exceptions.

(c) Any reply to the exceptions is to be filed and served within the timeperiod specified in the initial decision. The timeperiod may not exceed 30 days after the end of the period (including any extensions) for filing exceptions, unless extended by the Administrator under paragraph (d) of this section.

(d) The Administrator may extend the time for filing exceptions or replies to exceptions for good cause shown.

(e) If the Administrator decides to hear oral argument, the parties will be informed of the date, time, and place; the amount of time allotted to each party, and the issues to be addressed.

**§ 179.110 Determination by Administrator to review initial decision.**

Within 10 days following the expiration of the time for filing exceptions (including any extensions), the Administrator may file with the hearing clerk, and serve on the parties, a notice of the Administrator's determination to review the initial decision. The Administrator may invite the parties to file briefs or present oral argument on the matter. The time for filing briefs or presenting oral argument will be specified in that or a later notice.

**§ 179.112 Decision by Administrator on appeal or review of initial decision.**

(a) On appeal from or review of the initial decision, the Administrator shall have the same powers as did the presiding officer in making the initial decision. On the Administrator's own initiative or on motion, the Administrator may remand the matter to the presiding officer for any further action necessary for a proper decision.

(b) The scope of the issues on appeal to, or on review by the Administrator is the same as the scope of the issues

## § 179.115

before the presiding officer, unless the Administrator specifies otherwise.

(c) After the filing of briefs and any oral argument, the Administrator will issue a final decision on the issues of fact in the hearing and the objections related to those issues. A final decision must contain the elements required for an initial decision by § 179.105(b).

(d) The Administrator may adopt the initial decision as the final decision.

(e) The Administrator's decision, or a summary of the decision and a notice of its availability, will be published in the FEDERAL REGISTER.

### § 179.115 Motion to reconsider a final order.

A party may file a motion requesting the Administrator to reconsider a final decision under this part. Any such motion must be filed within 10 days after service of the final decision, and must set forth the matters claimed to have been erroneously decided and the nature of the alleged errors. Such a motion shall not stay the effective date of the final decision unless specifically so ordered by the Administrator.

### § 179.117 Designation and powers of judicial officer.

(a) One or more judicial officers may be designated by the Administrator. A judicial officer shall be an attorney who is a permanent or temporary employee of the Agency or of another Federal agency. A judicial officer may perform other duties. A judicial officer who performs any duty under this part may not be employed by OCSPP, by the Pesticides and Toxic Substances Division of the Office of General Counsel, or by any other person who is a representative of OCSPP in the hearing. A person may not be designated as a judicial officer in a hearing if he or she performed any prosecutorial or investigative functions in connection with that hearing or any other factually related hearing.

(b) The Administrator may delegate to the judicial officer all or part of the Administrator's authority to act in a given proceeding under this part. Such a delegation does not prevent the judicial officer from referring any motion

## 40 CFR Ch. I (7–1–25 Edition)

or case to the Administrator when appropriate.

[55 FR 50293, Dec. 5, 1990, as amended at 57 FR 28087, June 24, 1992; 77 FR 46292, Aug. 3, 2012]

## Subpart G—Judicial Review

### § 179.125 Judicial review.

(a) The Administrator's final decision is final agency action reviewable in the courts as provided by FFDCA section 408(h), as of the date of publication of the order in the FEDERAL REGISTER. The failure of a person to file a petition for judicial review within the period ending on the 60th day after the date of the publication of the order constitutes a waiver under FFDCA section 408(h) of the right to judicial review of the order and of any regulation promulgated by the order.

(b) The record for judicial review of a final decision under this part consists of the record described in § 179.130.

[55 FR 50293, Dec. 5, 1990, as amended at 70 FR 33360, June 8, 2005]

### § 179.130 Administrative record.

(a) For purposes of judicial review, the record of a hearing that culminates in a final decision of the Administrator under § 179.105(d) or § 179.112(c) ruling on an objection shall consist of:

(1) The objection ruled on (and any request for hearing that was included with the objection).

(2) Any order issued under § 180.7(g) of this chapter to which the objection related, and:

(i) The regulation or petition denial that was the subject of that order.

(ii) The petition to which such order responded.

(iii) Any amendment or supplement of the petition.

(iv) The data and information submitted in support of the petition.

(v) The notice of filing of the petition.

(3) Any order issued under § 180.29(f) of this chapter to which the objection related, the regulation that was the subject of that order, and each related Notice of Proposed Rulemaking.

(4) The comments submitted by members of the public in response to the Notice of Filing or Notice of Proposed

## Environmental Protection Agency

## Pt. 180

Rulemaking, and the information submitted as part of the comments, the Administrator's response to comments and the documents or information relied on by the Administrator in issuing the regulation or order.

(5) All other documents or information submitted to the docket for the rulemaking in question under parts 177 or part 180 of this chapter.

(6) The Notice of Hearing published under § 179.20.

(7) All notices of participation filed under § 179.42.

(8) Any FEDERAL REGISTER notice issued under this part that pertains to the proceeding.

(9) All submissions filed under § 179.80.

(10) Any document of which official notice was taken under § 179.95.

(b) The record of the administrative proceeding is closed:

(1) With respect to the taking of evidence, when specified by the presiding officer.

(2) With respect to pleadings, at the time specified in § 179.98(a) for the filing of briefs.

(c) The presiding officer may reopen the record to receive further evidence at any time before the filing of the initial decision.

[55 FR 50293, Dec. 5, 1990, as amended at 70 FR 33360, June 8, 2005]

## PART 180—TOLERANCES AND EXEMPTIONS FOR PESTICIDE CHEMICAL RESIDUES IN FOOD

### Subpart A—Definitions and Interpretative Regulations

Sec.

180.1 Definitions and interpretations.

180.3 Tolerances for related pesticide chemicals.

180.4 Exceptions.

180.5 Zero tolerances.

180.6 Pesticide tolerances regarding milk, eggs, meat, and/or poultry; statement of policy.

### Subpart B—Procedural Regulations

180.7 Petitions proposing tolerances or exemptions for pesticide residues in or on raw agricultural commodities or processed foods.

180.8 Withdrawal of petitions without prejudice.

180.9 Substantive amendments to petitions.

180.29 Establishment, modification, and revocation of tolerance on initiative of Administrator.

180.30 Judicial review.

180.31 Temporary tolerances.

180.32 Procedure for modifying and revoking tolerances or exemptions from tolerances.

180.33 Fees.

180.34 Tests on the amount of residue remaining.

180.35 Tests for potentiation.

180.40 Tolerances for crop groups.

180.41 Crop group tables.

### Subpart C—Specific Tolerances

180.101 Specific tolerances; general provisions.

180.103 Captan; tolerances for residues.

180.106 Diuron; tolerances for residues.

180.107 Triflumezopyrim; tolerance for residues.

180.108 Acephate; tolerances for residues.

180.109 Fenpicoxamid; Tolerances for residues.

180.111 Malathion; tolerances for residues.

180.114 Ferbam; tolerances for residues.

180.116 Ziram; tolerances for residues.

180.117 S-Ethyl dipropylthiocarbamate; tolerances for residues.

180.123 Inorganic bromide residues resulting from fumigation with methyl bromide; tolerances for residues.

180.123a Inorganic bromide residues in peanut hay and peanut hulls; statement of policy.

180.124 Methyl bromide; tolerances for residues.

180.127 Piperonyl butoxide; tolerances for residues.

180.128 Pyrethrins; tolerances for residues.

180.129 o-Phenylphenol and its sodium salt; tolerances for residues.

180.130 Hydrogen Cyanide; tolerances for residues.

180.132 Thiram; tolerances for residues.

180.142 2,4-D; tolerances for residues.

180.145 Fluorine compounds; tolerances for residues.

180.151 Ethylene oxide; tolerances for residues.

180.153 Diazinon; tolerances for residues.

180.155 1-Naphthaleneacetic acid; tolerances for residues.

180.163 Dicofol; tolerances for residues.

180.169 Carbaryl; tolerances for residues.

180.172 Dodine; tolerances for residues.

180.175 Maleic hydrazide; tolerances for residues.

180.176 Mancozeb; tolerances for residues.

180.178 Ethoxyquin; tolerances for residues.

180.181 Chlorpropham; tolerances for residues.

180.182 Endosulfan; tolerances for residues.

180.184 Linuron; tolerances for residues.

## Pt. 180

## 40 CFR Ch. I (7-1-25 Edition)

- 180.185 DCPA; tolerances for residues.
- 180.189 Coumaphos; tolerances for residues.
- 180.190 Diphenylamine; tolerances for residues.
- 180.191 Folpet; tolerances for residues.
- 180.198 Trichlorfon; tolerances for residues.
- 180.200 Dicloran; tolerances for residues.
- 180.202 *p*-Chlorophenoxyacetic acid; tolerances for residues.
- 180.204 Dimethoate; tolerances for residues.
- 180.205 Paraquat; tolerances for residues.
- 180.206 Phorate; tolerances for residues.
- 180.207 Trifluralin; tolerances for residues.
- 180.208 Benfluralin; tolerances for residues.
- 180.209 Terbacil; tolerances for residues.
- 180.210 Bromacil; tolerances for residues.
- 180.211 Propachlor; tolerances for residues.
- 180.212 *S*-Ethyl cyclohexylethylthiocarbamate; tolerances for residues.
- 180.213 Simazine; tolerances for residues.
- 180.215 Naled; tolerances for residues.
- 180.217 Metiram; tolerances for residues.
- 180.220 Atrazine; tolerances for residues.
- 180.222 Prometryn; tolerances for residues.
- 180.225 Phosphine; tolerances for residues.
- 180.226 Diquat; tolerances for residues.
- 180.227 Dicamba; tolerances for residues.
- 180.229 Fluometuron; tolerances for residues.
- 180.231 Dichlobenil; tolerances for residues.
- 180.235 Dichlorvos; tolerances for residues.
- 180.236 Triphenyltin hydroxide; tolerances for residues.
- 180.241 Bensulide; tolerances for residues.
- 180.242 Thiabendazole; tolerances for residues.
- 180.243 Propazine; tolerances for residues.
- 180.245 Streptomycin; tolerances for residues.
- 180.249 Alachlor; tolerances for residues.
- 180.252 Tetrachlorvinphos; tolerances for residues.
- 180.253 Methomyl; tolerances for residues.

- 180.269 Aldicarb; tolerances for residues.
- 180.272 Tribuphos; tolerances for residues.
- 180.274 Propanil; tolerances for residues.
- 180.275 Chlorothalonil; tolerances for residues.
- 180.276 Formetanate hydrochloride; tolerances for residues.
- 180.278 Phenmedipham; tolerances for residues.
- 180.284 Zinc phosphide; tolerances for residues.
- 180.287 Amitraz; tolerances for residues.
- 180.288 2-(Thiocyanomethylthio) benzothiazole; tolerances for residues.
- 180.289 Methanearsonic acid; tolerances for residues.
- 180.291 Pentachloronitrobenzene; tolerance for residues.
- 180.292 Picloram; tolerances for residues.
- 180.293 Endothall; tolerances for residues.
- 180.297 *N*-1-Naphthyl phthalamic acid; tolerances for residues.
- 180.298 Methidathion; tolerances for residues.
- 180.299 Dicrotophos; tolerances for residues.
- 180.300 Ethephon; tolerances for residues.
- 180.301 Carboxin; tolerances for residues.
- 180.303 Oxamyl; tolerances for residues.
- 180.304 Oryzalin; tolerances for residues.
- 180.314 Triallate; tolerances for residues.
- 180.316 Pyrazon; tolerances for residues.
- 180.317 Propyzamide; tolerances for residues.
- 180.318 4-(2-Methyl-4-chlorophenoxy) butyric acid; tolerance for residues.
- 180.319 Interim tolerances.
- 180.324 Bromoxynil; tolerances for residues.
- 180.328 Napropamide; tolerances for residues.
- 180.330 *S*-(2-(Ethylsulfinyl)ethyl) *O,O*-dimethyl phosphorothioate; tolerances for residues.
- 180.331 4-(2,4-Dichlorophenoxy) butyric acid; tolerances for residues.
- 180.332 Metribuzin; tolerances for residues.
- 180.337 Oxytetracycline; tolerances for residues.
- 180.339 MCPA; tolerances for residues.
- 180.341 2,4-Dinitro-6-octylphenyl crotonate and 2,6-dinitro-4-octylphenyl crotonate; tolerances for residues.
- 180.342 Chlorpyrifos; tolerances for residues.
- 180.345 Ethofumesate; tolerances for residues.
- 180.349 Fenamiphos; tolerances for residues.
- 180.350 Nitrapyrin; tolerances for residues.
- 180.352 Terbufos; tolerances for residues.
- 180.353 Desmedipham; tolerances for residues.
- 180.355 Bentazon; tolerances for residues.
- 180.356 Norflurazon; tolerances for residues.
- 180.360 Asulam; tolerance for residues.
- 180.361 Pendimethalin; tolerances for residues.
- 180.362 Fenbutatin-oxide; tolerances for residues.
- 180.364 Glyphosate; tolerances for residues.
- 180.367 *n*-Octyl bicycloheptenedicarboximide; tolerances for residues.
- 180.368 Metolachlor; tolerances for residues.
- 180.370 5-Ethoxy-3-(trichloromethyl)-1, 2, 4-thiadiazole; tolerances for residues.
- 180.371 Thiophanate-methyl; tolerances for residues.
- 180.372 2,6-Dimethyl-4-tridecylmorpholine; tolerances for residues.
- 180.373 [Reserved]
- 180.377 Diflubenzuron; tolerances for residues.
- 180.378 Permethrin; tolerances for residues.
- 180.380 Vinclozolin; tolerances for residues.
- 180.381 Oxyfluorfen; tolerances for residues.
- 180.383 Sodium salt of acifluorfen; tolerances for residues.
- 180.384 Mepiquat (*N,N*-dimethylpiperidinium); tolerances for residues.

## Environmental Protection Agency

## Pt. 180

- 180.385 Diclofop-methyl; tolerances for residues.
- 180.388-180.389 [Reserved]
- 180.390 Tebuthiuron; tolerances for residues.
- 180.395 Hydramethylnon; tolerances for residues.
- 180.396 Hexazinone; tolerances for residues.
- 180.399 Iprodione; tolerances for residues.
- 180.401 Thiobencarb; tolerances for residues.
- 180.403 Thidiazuron; tolerances for residues.
- 180.404 Profenofos; tolerances for residues.
- 180.405 Chlorsulfuron; tolerances for residues.
- 180.407 Thiodicarb; tolerances for residues.
- 180.408 Metalaxyl; tolerances for residues.
- 180.409 Pirmiphos-methyl; tolerances for residues.
- 180.410 Triadimefon; tolerances for residues.
- 180.411 Fluazifop-P-butyl; tolerances for residues.
- 180.412 Sethoxydim; tolerances for residues.
- 180.413 Imazalil; tolerances for residues.
- 180.414 Cyromazine; tolerances for residues.
- 180.415 Aluminum tris (*O*-ethylphosphonate); tolerances for residues.
- 180.416 Ethalfluralin; tolerances for residues.
- 180.417 Triclopyr; tolerances for residues.
- 180.418 Cypermethrin and isomers alpha-cypermethrin and zeta-cypermethrin; tolerances for residues.
- 180.419 Chlorpyrifos-methyl; tolerances for residues.
- 180.420 Fluridone; tolerances for residues.
- 180.421 Fenarimol; tolerances for residues.
- 180.425 Clomazone; tolerances for residues.
- 180.426 2-[4,5-Dihydro-4-methyl-4-(1-methylethyl)-5-oxo-1*H*-imidazol-2-yl]-3-quinoline carboxylic acid; tolerance for residues.
- 180.427 Tau-Fluvalinate; tolerances for residues.
- 180.428 Metsulfuron methyl; tolerances for residues.
- 180.429 Chlorimuron ethyl; tolerances for residues.
- 180.430 Fenoxaprop-ethyl; tolerances for residues.
- 180.431 Clopyralid; tolerances for residues.
- 180.432 Lactofen; tolerances for residues.
- 180.433 Fomesafen; tolerances for residues.
- 180.434 Propiconazole; tolerances for residues.
- 180.435 Deltamethrin; tolerances for residues.
- 180.436 Cyfluthrin and the isomer beta-cyfluthrin; tolerances for residues.
- 180.437 Imazamethabenz-methyl; tolerances for residues.
- 180.438 Lambda-cyhalothrin and an isomer gamma-cyhalothrin; tolerances for residues.
- 180.439 Thifensulfuron methyl; tolerances for residues.
- 180.440 Tefluthrin; tolerances for residues.
- 180.441 Quizalofop ethyl; tolerances for residues.
- 180.442 Bifenthrin; tolerances for residues.
- 180.443 Myclobutanil; tolerances for residues.
- 180.444 Sulfur dioxide; tolerances for residues.
- 180.445 Bensulfuron methyl; tolerances for residues.
- 180.446 Clofentezine; tolerances for residues.
- 180.447 Imazethapyr; tolerances for residues.
- 180.448 Hexythiazox; tolerance for residues.
- 180.449 Avermectin B<sub>1</sub> and its delta-8,9-isomer; tolerances for residues.
- 180.450 Beta-(4-Chlorophenoxy)-alpha-(1,1-dimethylethyl)-1*H*-1,2,4-triazole-1-ethanol; tolerances for residues.
- 180.451 Tribenuron methyl; tolerances for residues.
- 180.452 Primisulfuron-methyl; tolerances for residues.
- 180.454 Nicosulfuron; tolerances for residues.
- 180.455 Procymidone; tolerances for residues.
- 180.457 Bitertanol; tolerances for residues.
- 180.458 Clethodim; tolerances for residues.
- 180.459 Triasulfuron; tolerances for residues.
- 180.460 Benoxacor; tolerances for residues.
- 180.461 Cadusafos; tolerances for residues.
- 180.462 Pyridate; tolerances for residues.
- 180.463 Quinclorac; tolerances for residues.
- 180.464 Dimethenamid; tolerances for residues.
- 180.465 4-(Dichloroacetyl)-1-oxa-4-azaspiro[4.5]decane.
- 180.466 Fenpropathrin; tolerances for residues.
- 180.467 Carbon disulfide; tolerances for residues.
- 180.468 Flumetsulam; tolerances for residues.
- 180.469 Dichlormid; tolerances for residues.
- 180.470 Acetochlor; tolerances for residues.
- 180.471 Furlazole; tolerances for residues.
- 180.472 Imidacloprid; tolerances for residues.
- 180.473 Glufosinate; tolerances for residues.
- 180.474 Tebuconazole; tolerances for residues.
- 180.475 Difenoconazole; tolerances for residues.
- 180.476 Triflumizole; tolerances for residues.
- 180.477 Flumiclorac pentyl; tolerances for residues.
- 180.478 Rimsulfuron; tolerances for residues.
- 180.479 Halosulfuron-methyl; tolerances for residues.
- 180.480 Fenbuconazole; tolerances for residues.
- 180.481 Prosulfuron; tolerances for residues.
- 180.482 Tebufenozide; tolerances for residues.
- 180.484 Flutolanil; tolerances for residues.
- 180.485 Cyproconazole; tolerances for residues.
- 180.486 Chlorethoxyfos; tolerances for residues.

**Pt. 180****40 CFR Ch. I (7–1–25 Edition)**

- 180.487 Pyrethrin; tolerances for residues.
- 180.490 Imazapic; tolerances for residues.
- 180.491 Propylene oxide; tolerances for residues.
- 180.492 Trifluralin-methyl; tolerances for residues.
- 180.493 Dimethomorph; tolerances for residues.
- 180.494 Pyridaben; tolerance for residues.
- 180.495 Spinosad; tolerances for residues.
- 180.498 Sulfentrazone; tolerances for residues.
- 180.499 Propamocarb; tolerances for residues.
- 180.500 Imazapyr; tolerances for residues.
- 180.501 Hydroperoxide; tolerances for residues.
- 180.502 Aminoethoxyvinylglycine hydrochloride (aviglycine HCl); tolerances for residues.
- 180.503 Cymoxanil; tolerance for residues.
- 180.504 [Reserved]
- 180.505 Emamectin; tolerances for residues.
- 180.506 Cyclanilide; tolerances for residues.
- 180.507 Azoxystrobin; tolerances for residues.
- 180.509 Mefenpyr-diethyl; tolerance for residues.
- 180.510 Pyriproxyfen; tolerances for residues.
- 180.511 Buprofezin; tolerances for residues.
- 180.512 [Reserved]
- 180.513 Chlorfenapyr; tolerances for residues.
- 180.514 Cloransulam-methyl; tolerances for residues.
- 180.515 Carfentrazone-ethyl; tolerances for residues.
- 180.516 Fludioxonil; tolerances for residues.
- 180.517 Fipronil; tolerances for residues.
- 180.518 Pyrimethanil; tolerances for residues.
- 180.519 Bromide ion and residual bromine; tolerances for residues.
- 180.521 Fumigants for grain-mill machinery; tolerances for residues.
- 180.522 Fumigants for processed grains used in production of fermented malt beverage; tolerances for residues.
- 180.523 Metaldehyde; tolerances for residues.
- 180.525 Resmethrin; tolerances for residues.
- 180.526 Synthetic isoparaffinic petroleum hydrocarbons; tolerances for residues.
- 180.527 Flufenacet, N-(4-fluorophenyl)-N-(1-methylethyl)-2-[[5-(trifluoromethyl)-1,3,4-thiadiazol-2-yl]oxy]acetamide and its metabolites containing the 4-fluoro-N-methylethyl benzenamine tolerances for residues.
- 180.532 Cyprodinil; tolerances for residues.
- 180.533 Esfenvalerate; tolerances for residues.
- 180.535 Fluroxypyr 1-methylheptyl ester; tolerances for residues.
- 180.537 Isoxaflutole; tolerances for residues.
- 180.540 Fenitrothion; tolerances for residues.
- 180.543 Diclosulam; tolerances for residues.
- 180.544 Methoxyfenozide; tolerances for residues.
- 180.545 Prallethrin; tolerances for residues.
- 180.546 Mefenoxam; tolerances for residues.
- 180.547 Prohexadione calcium; tolerances for residues.
- 180.549 Diflufenzopyr; tolerances for residues.
- 180.551 Fluthiacet-methyl; tolerances for residues.
- 180.552 Sulfosulfuron; tolerances for residues.
- 180.553 Fenhexamid; tolerances for residues.
- 180.554 Kresoxim-methyl; tolerances for residues.
- 180.555 Trifloxystrobin; tolerances for residues.
- 180.556 Pymetrozine; tolerances for residues.
- 180.557 Tetraconazole; tolerances for residues.
- 180.559 Clodinafop-propargyl; tolerances for residues.
- 180.560 Cloquintocet-mexyl; tolerances for residues.
- 180.561 Acibenzolar-S-methyl; tolerances for residues.
- 180.562 Flucarbazone-sodium; tolerances for residues.
- 180.563 Ethametsulfuron-methyl; tolerances for residues.
- 180.564 Indoxacarb; tolerances for residues.
- 180.565 Thiamethoxam; tolerances for residues.
- 180.566 Fenpyroximate; tolerances for residues.
- 180.567 Zoxamide; tolerances for residues.
- 180.568 Flumioxazin; tolerances for residues.
- 180.569 Forchlorfenuron; tolerances for residues.
- 180.570 Isoxadifen-ethyl; tolerances for residues.
- 180.571 Mesotrione; tolerances for residues.
- 180.572 Bifenazate; tolerance for residues.
- 180.573 Tepraloxydim; tolerances for residues.
- 180.574 Fluazinam; tolerances for residues.
- 180.575 Sulfuryl fluoride; tolerances for residues.
- 180.576 Cyhalofop-butyl; tolerances for residues.
- 180.577 Bispyribac-sodium; tolerances for residues.
- 180.578 Acetamiprid; tolerances for residues.
- 180.579 Fenamidone; tolerances for residues.
- 180.580 Iodosulfuron-Methyl-Sodium; tolerances for residues.
- 180.581 Iprovalicarb; tolerances for residues.
- 180.582 Pyraclostrobin; tolerances for residues.
- 180.583 Triticonazole; tolerances for residues.
- 180.584 Tolyfluanid; tolerances for residues.

## Environmental Protection Agency

## Pt. 180

- 180.585 Pyraflufen-ethyl; tolerances for residues.
- 180.586 Clothianidin; tolerances for residues.
- 180.587 Famoxadone; tolerance for residues.
- 180.588 Quinoxifen; tolerances for residues.
- 180.589 Boscalid; tolerances for residues.
- 180.590 2, 6-Diisopropyl naphthalene (2, 6-DIPN); tolerances for residues.
- 180.591 Trifloxysulfuron; tolerances for residues.
- 180.592 Butafenacil; tolerances for residues.
- 180.593 Etoxazole; tolerances for residues.
- 180.594 Thiacloprid; tolerances for residues.
- 180.595 Flufenpyr-ethyl; tolerances for residues.
- 180.596 Fosthiazate; tolerances for residues.
- 180.597 Mesosulfuron-methyl; tolerances for residues.
- 180.598 Novaluron; tolerances for residues.
- 180.599 Acequinocyl; tolerances for residues.
- 180.600 Propoxycarbazone; tolerances for residues.
- 180.601 Cyazofamid; tolerances for residues.
- 180.602 Spiroxamine; tolerances for residues.
- 180.603 Dinotefuran; tolerances for residues.
- 180.604 Mepanipyrim; tolerances for residues.
- 180.605 Penoxsulam; tolerances for residues.
- 180.607 Spiromesifen; tolerances for residues.
- 180.608 Spirodiclofen; tolerances for residues.
- 180.609 Fluoxastrobin; tolerances for residues.
- 180.610 Aminopyralid; tolerances for residues.
- 180.611 Pinoxaden; tolerances for residues.
- 180.612 Topramezone; tolerances for residues.
- 180.613 Flonicamid; tolerances for residues.
- 180.614 Kasugamycin; tolerances for residues.
- 180.615 Amicarbazone; tolerances for residues.
- 180.616 Fenpropimorph; tolerances for residues.
- 180.617 Metconazole; tolerances for residues.
- 180.618 Benthialavalicarb-isopropyl; tolerance for residues.
- 180.619 Epoxiconazole; tolerances for residues.
- 180.620 Etofenprox; tolerances for residues.
- 180.621 Dithianon; tolerances for residues.
- 180.622 Ethaboxam; tolerances for residues.
- 180.623 Flufenoxuron; tolerances for residues.
- 180.624 Metrafenone; tolerances for residues.
- 180.625 Orthosulfamuron; tolerances for residues.
- 180.626 Prothioconazole; tolerances for residues.
- 180.627 Fluopicolide; tolerances for residues.
- 180.628 Chlorantraniliprole; tolerances for residues.
- 180.629 Flutriafol; tolerances for residues.
- 180.631 Pyrasulfotole; tolerances for residues.
- 180.632 Fenazaquin; tolerances for residues.
- 180.633 Florasulam; tolerances for residues.
- 180.634 Tembotrione; tolerances for residues.
- 180.635 Spinetoram; tolerances for residues.
- 180.636 1,3-dichloropropene; tolerances for residues.
- 180.637 Mandipropamid; tolerances for residues.
- 180.638 Pyroxsulam; tolerances for residues.
- 180.639 Flubendiamide; tolerances for residues.
- 180.640 Pyridalyl; tolerances for residues.
- 180.641 Spirotetramat; tolerances for residues.
- 180.643 Uniconazole; tolerances for residues.
- 180.644 Cyprosulfamide; tolerances for residues.
- 180.645 Thienicarbazone-methyl; tolerances for residues.
- 180.646 Ipconazole; tolerances for residues.
- 180.647 d-Phenothrin; tolerances for residues.
- 180.648 Meptyldinocap; tolerances for residues.
- 180.649 Saflufenacil; tolerances for residues.
- 180.650 Isoxaben; tolerances for residues.
- 180.651 Imazosulfuron; tolerances for residues.
- 180.652 Ethiprole; tolerances for residues.
- 180.653 Indaziflam; tolerances for residues.
- 180.654 Isopyrazam; tolerances for residues.
- 180.655 Flazasulfuron; tolerances for residues.
- 180.656 Amisulbrom; tolerances for residues.
- 180.657 Metaflumizone; tolerances for residues.
- 180.658 Penthiopyrad; tolerances for residues.
- 180.659 Pyroxasulfone; tolerances for residues.
- 180.660 Pyriofenone; tolerances for residues.
- 180.661 Fluopyram; tolerances for residues.
- 180.662 Trinexapac-ethyl; tolerances for residues.
- 180.663 Ametoctradin; tolerances for residues.
- 180.664 Penflufen; tolerances for residues.
- 180.665 Sedaxane; tolerances for residues.
- 180.666 Fluxapyroxad; tolerances for residues.
- 180.667 Cyflufenamid; tolerance for residues.
- 180.668 Sulfoxaflor; tolerances for residues.
- 180.669 Picoxystrobin; tolerances for residues.
- 180.671 Fenpyrazamine; tolerances for residues.
- 180.672 Cyantraniliprole; tolerances for residues.
- 180.673 Triforine; tolerances for residues.
- 180.674 Proquinazid; tolerances for residues.
- 180.675 Tolfenpyrad; tolerances for residues.
- 180.676 Fenpropidin; tolerances for residues.
- 180.677 Cyflumetofen; tolerances for residues.
- 180.678 Tricyclazole; tolerances for residues.

**Pt. 180****40 CFR Ch. I (7–1–25 Edition)**

180.679 Flupyradifurone; tolerances for residues.  
180.680 Fluensulfone; tolerances for residues.  
180.681 Isofetamid; tolerances for residues.  
180.682 Bicycloprrone; tolerances for residues.  
180.684 Benalaxyl-M; tolerances for residues.  
180.685 Oxathiapiprolin; tolerances for residues.  
180.686 Benzovindiflupyr; tolerances for residues.  
180.687 Teflubenzuron; tolerances for residues.  
180.688 Diethofencarb; tolerance for residue.  
180.689 Aminocyclopyrachlor; tolerances for residues.  
180.690 Mandestrobin; tolerances for residues.  
180.691 Halauxifen-methyl; tolerances for residues.  
180.692 Tioxazafen; tolerances for residues.  
180.693 Benzobicyclon; tolerances for residues.  
180.694 Cyclaniliprole; tolerances for residues.  
180.696 Tolpyralate; tolerances for residues.  
180.697 Flutianil; tolerances for residues.  
180.698 Chlormequat chloride; tolerances for residues.  
180.699 Pydiflumetofen; tolerances for residues.  
180.700 Afidopyropen; tolerances for residues.  
180.701 Pyrifluquinazon; tolerances for residues.  
180.702 Bixafen; tolerances for residues.  
180.703 6-benzyladenine; tolerances for residues.  
180.704 Sulfometuron-methyl; tolerances for residues.  
180.705 Mefentrifluconazole; tolerances for residues.  
180.706 Valifenalate; tolerances for residues.  
180.708 Isotianil; tolerances for residues.  
180.709 Tetraniliprole; tolerances for residues.  
180.710 Pethoxamid; tolerances for residues.  
180.711 1-Aminocyclopropane-1-carboxylic acid (1-ACC); exemption from the requirement of a tolerance.  
180.712 Inpyrfluxam; tolerances for residues.  
180.713 Tiafenacil; tolerances for residues.  
180.714 Broflanilide; tolerances for residues.  
180.715 Fluxametamide; tolerances for residues.  
180.716 Fluindapyr; tolerances for residues.  
180.717 Trifludimoxazin; tolerances for residues.  
180.718 Picarbutrazox; tolerances for residues.  
180.719 Ipflufenquin; tolerances for residues.  
180.720 Fluazaindolizine; tolerances for residues.  
180.721 Isoprothiolane; tolerances for residues.

180.722 Pyflubumide; tolerances for residues.  
180.723 Spiropidion; tolerances for residues.  
180.724 Benzpyrimoxan; tolerances for residues.  
180.725 Pyraclostrobin; tolerances for residues.  
180.726 Metamitron; tolerances for residues.  
180.727 Florylpicoxamid; tolerances for residues.

**Subpart D—Exemptions From Tolerances**

180.900 Exemptions from the requirement of a tolerance.  
180.905 Pesticide chemicals; exemptions from the requirement of a tolerance.  
180.910 Inert ingredients used pre- and post-harvest; exemptions from the requirement of a tolerance.  
180.920 Inert ingredients used pre-harvest; exemptions from the requirement of a tolerance.  
180.930 Inert ingredients applied to animals; exemptions from the requirement of a tolerance.  
180.940 Tolerance exemptions for active and inert ingredients for use in antimicrobial formulations (Food-contact surface sanitizing solutions).  
180.950 Tolerance exemptions for minimal risk active and inert ingredients.  
180.960 Polymers; exemptions from the requirement of a tolerance.  
180.1011 Viable spores of the microorganism *Bacillus thuringiensis* Berliner; exemption from the requirement of a tolerance.  
180.1016 Ethylene; exemption from the requirement of a tolerance.  
180.1017 Diatomaceous earth; exemption from the requirement of a tolerance.  
180.1019 Sulfuric acid; exemption from the requirement of a tolerance.  
180.1020 Sodium chlorate; exemption from the requirement of a tolerance.  
180.1021 Copper; exemption from the requirement of a tolerance.  
180.1022 Iodine-detergent complex; exemption from the requirement of a tolerance.  
180.1023 Propanoic acid; exemptions from the requirement of a tolerance.  
180.1025 Xylene; exemption from the requirement of a tolerance.  
180.1027 Nuclear polyhedrosis virus of *Heliothis zea*; exemption from the requirement of a tolerance.  
180.1033 Methoprene; exemption from the requirement of a tolerance.  
180.1037 Polybutenes; exemption from the requirement of a tolerance.  
180.1040 Ethylene glycol; exemption from the requirement of a tolerance.  
180.1041 *Nosema locustae*; exemption from the requirement of a tolerance.  
180.1043 Gossypol; exemption from the requirement of a tolerance.  
180.1049 Carbon dioxide; exemption from the requirement of a tolerance.

- 180.1050 Nitrogen; exemption from the requirements of a tolerance.
- 180.1052 2,2,5-trimethyl-3-dichloroacetyl-1,3-oxazolidine; exemption from the requirement of a tolerance.
- 180.1054 Calcium hypochlorite; exemptions from the requirement of a tolerance.
- 180.1056 Boiled linseed oil; exemption from requirement of tolerance.
- 180.1057 Phytophthora palmivora; exemption from requirement of tolerance.
- 180.1058 Sodium diacetate; exemption from the requirement of a tolerance.
- 180.1064 Tomato pinworm insect pheromone; exemption from the requirement of a tolerance.
- 180.1065 2-Amino-4,5-dihydro-6-methyl-4-propyl-s-triazolo(1,5- $\alpha$ )pyrimidin-5-one; exemption from the requirement of a tolerance.
- 180.1067 Methyl eugenol and malathion combination; exemption from the requirement of a tolerance.
- 180.1068 C<sub>12</sub>-C<sub>18</sub> fatty acid potassium salts; exemption from the requirement of a tolerance.
- 180.1069 (Z)-11-Hexadecenal; exemption from the requirement of a tolerance.
- 180.1070 Sodium chlorite; exemption from the requirement of a tolerance.
- 180.1071 Peanuts, Tree Nuts, Milk, Soybeans, Eggs, Fish, Crustacea, and Wheat; exemption from the requirement of a tolerance.
- 180.1072 Poly-D-glucosamine (chitosan); exemption from the requirement of a tolerance.
- 180.1073 Isomate-M; exemption from the requirement of a tolerance.
- 180.1074 F.D.&C. Blue No. 1; exemption from the requirement of a tolerance.
- 180.1075 *Colletotrichum gloeosporioides* f. sp. *aeschynomene*; exemption from the requirement of a tolerance.
- 180.1076 Viable spores of the microorganism *Bacillus popilliae*; exemption from the requirement of a tolerance.
- 180.1080 Plant volatiles and pheromone; exemptions from the requirement of a tolerance.
- 180.1083 Dimethyl sulfoxide; exemption from the requirement of a tolerance.
- 180.1084 Monocarbamide dihydrogen sulfate; exemption from the requirement of a tolerance.
- 180.1086 3,7,11-Trimethyl-1,6,10-dodecatriene-1-ol and 3,7,11-trimethyl-2,6,10-dodecatriene-3-ol; exemption from the requirement of a tolerance.
- 180.1087 Sesame stalks; exemption from the requirement of a tolerance.
- 180.1089 Poly-N-acetyl-D-glucosamine; exemption from the requirement of a tolerance.
- 180.1090 Lactic acid, including l-lactic acid; exemption from the requirement of a tolerance.
- 180.1091 Aluminum isopropoxide and aluminum secondary butoxide; exemption from the requirement of a tolerance.
- 180.1092 Menthol; exemption from the requirement of a tolerance.
- 180.1095 Chlorine gas; exemptions from the requirement of a tolerance.
- 180.1097 GBM-ROPE; exemption from the requirement of a tolerance.
- 180.1098 Gibberellins [Gibberellic Acids (GA3 and GA4 + GA7), and Sodium or Potassium Gibberellate]; exemption from the requirement of a tolerance.
- 180.1100 *Gliocladium virens* isolate GL-21; exemption from the requirement of a tolerance.
- 180.1101 Parasitic (parasitoid) and predatory insects; exemption from the requirement of a tolerance.
- 180.1102 *Trichoderma harzianum* KRL-AG2 (ATCC #20847) strain T-22; exemption from requirement of a tolerance.
- 180.1103 Isomate-C; exemption from the requirement of a tolerance.
- 180.1110 3-Carbamyl-2,4,5-trichlorobenzoic acid; exemption from the requirement of a tolerance.
- 180.1111 *Bacillus subtilis* GB03; exemption from the requirement of a tolerance.
- 180.1114 *Pseudomonas fluorescens* A506, *Pseudomonas fluorescens* 1629RS, and *Pseudomonas syringae* 742RS; exemptions from the requirement of a tolerance.
- 180.1118 *Spodoptera exigua* nuclear polyhedrosis virus; exemption from the requirement of a tolerance.
- 180.1119 Azadirachtin; exemption from the requirement of a tolerance.
- 180.1120 *Streptomyces* sp. strain K61; exemption from the requirement of a tolerance.
- 180.1121 Boric acid and its salts, borax (sodium borate decahydrate), disodium octaborate tetrahydrate, boric oxide (boric anhydride), sodium borate and sodium metaborate; exemptions from the requirement of a tolerance.
- 180.1122 Inert ingredients of semiochemical dispensers; exemptions from the requirement of a tolerance.
- 180.1124 Arthropod pheromones; exemption from the requirement of a tolerance.
- 180.1126 Codlure, (E,E)-8,10-Dodecadien-1-ol; exemption from the requirement of a tolerance.
- 180.1127 Biochemical pesticide plant floral volatile attractant compounds: cinnamaldehyde, cinnamyl alcohol, 4-methoxy cinnamaldehyde, 3-phenyl propanol, 4-methoxy phenethyl alcohol, indole, and 1,2,4-trimethoxybenzene; exemptions from the requirement of a tolerance.
- 180.1128 *Bacillus amyloliquefaciens* MBI600; exemption from the requirement of a tolerance.
- 180.1130 N-(n-octyl)-2-pyrrolidone and N-(n-dodecyl)-2-pyrrolidone; exemptions from the requirement of a tolerance.

- 180.1135 *Pasteuria penitans*; exemption from the requirement of a tolerance.
- 180.1139 Sodium 5-nitroguaiacolate; exemption from the requirement of a tolerance.
- 180.1140 Sodium *o*-nitrophenolate; exemption from the requirement of a tolerance.
- 180.1141 Sodium *p*-nitrophenolate; exemption from the requirement of a tolerance.
- 180.1142 1,4-Dimethylnaphthalene; exemption from the requirement of a tolerance.
- 180.1143 Methyl anthranilate; exemption from the requirement of a tolerance.
- 180.1145 *Pseudomonas syringae*; exemption from the requirement of a tolerance.
- 180.1146 *Beauveria bassiana* Strain GHA; exemption from the requirement of a tolerance.
- 180.1148 Occlusion Bodies of the Granulosis Virus of *Cydia pomonella*; tolerance exemption.
- 180.1149 Inclusion bodies of the multi-nuclear polyhedrosis virus of *Anagrapha falcifera*; exemption from the requirement of a tolerance.
- 180.1150 6-Benzyladenine; exemption from the requirement of a tolerance.
- 180.1153 Lepidopteran pheromones; exemption from the requirement of a tolerance.
- 180.1156 Cinnamaldehyde; exemption from the requirement of a tolerance.
- 180.1157 Cytokinins; exemption from the requirement of a tolerance.
- 180.1158 Auxins; exemption from the requirement of a tolerance.
- 180.1159 Pelargonic (nonanoic) acid; exemption from the requirement of a tolerance.
- 180.1160 Jojoba oil; exemption from the requirement of a tolerance.
- 180.1161 Clarified hydrophobic extract of neem oil; exemption from the requirement of a tolerance.
- 180.1162 Acrylate polymers and copolymers; exemption from the requirement of a tolerance.
- 180.1163 Killed *Myrothecium verrucaria*; exemption from the requirement of a tolerance.
- 180.1165 Capsaicin; exemption from the requirement of a tolerance.
- 180.1167 Allyl isothiocyanate as a component of food grade oil of mustard; exemption from the requirement of a tolerance.
- 180.1176 Sodium bicarbonate; exemption from the requirement of a tolerance.
- 180.1177 Potassium bicarbonate; exemption from the requirement of a tolerance.
- 180.1178 Formic acid; exemption from the requirement of a tolerance.
- 180.1179 Plant extract derived from *Opuntia lindheimeri*, *Quercus falcata*, *Rhus aromatica*, and *Rhizophora mangle*; exemption from the requirement of a tolerance.
- 180.1180 Kaolin; exemption from the requirement of a tolerance.
- 180.1181 *Bacillus cereus* strain BPO1; exemption from the requirement of a tolerance.
- 180.1187 L-glutamic acid; exemption from the requirement of a tolerance.
- 180.1188 Gamma aminobutyric acid; exemption from the requirement of a tolerance.
- 180.1189 Methyl salicylate; exemption from the requirement of a tolerance.
- 180.1191 Ferric phosphate; exemption from the requirement of a tolerance.
- 180.1193 Potassium dihydrogen phosphate; exemption from the requirement of a tolerance.
- 180.1195 Titanium dioxide.
- 180.1196 Peroxyacetic acid; exemption from the requirement of a tolerance.
- 180.1197 Hydrogen peroxide; exemption from the requirement of a tolerance.
- 180.1198 *Gliocladium catenulatum* strain J1446; exemption from the requirement of a tolerance.
- 180.1199 Lysophosphatidylethanolamine (LPE); exemption from the requirement of a tolerance.
- 180.1202 *Bacillus sphaericus*; exemption from the requirement of a tolerance.
- 180.1204 Harpin protein; exemption from the requirement of a tolerance.
- 180.1205 *Beauveria bassiana* ATCC #74040; exemption from the requirements of a tolerance.
- 180.1206 *Aspergillus flavus* strain AF36; exemption from the requirement of a tolerance.
- 180.1207 N-acyl sarcosines and sodium N-acyl sarcosinates; exemption from the requirement of a tolerance.
- 180.1209 *Bacillus subtilis* strain QST 713 and strain QST 713 variant soil; exemption from the requirement of a tolerance.
- 180.1210 Phosphorous acid; exemption from the requirement of a tolerance.
- 180.1212 *Pseudomonas chlororaphis* Strain 63-28; exemption from the requirement of a tolerance.
- 180.1213 *Coniothyrium minitans* strain CON/M/91-08; exemption from the requirement of a tolerance.
- 180.1218 Indian Meal Moth Granulosis Virus; exemption from the requirement of a tolerance.
- 180.1219 Foramsulfuron; exemption from the requirement of a tolerance.
- 180.1220 1-Methylcyclopropene; exemption from the requirement of a tolerance.
- 180.1222 Sucrose octanoate esters; exemption from the requirement of a tolerance.
- 180.1223 Imazamox; exemption from the requirement of a tolerance.
- 180.1224 *Bacillus pumilus* GB34; exemption from the requirement of a tolerance.
- 180.1225 Capric (decanoic) acid; exemption from the requirement of a tolerance.
- 180.1226 *Bacillus pumilus* strain QST2808; temporary exemption from the requirement of a tolerance.
- 180.1228 Diallyl sulfides; exemption from the requirement of a tolerance.

- 180.1230 Ferrous sulfate; exemption from the requirement of a tolerance.
- 180.1231 Lime; exemption from the requirement of a tolerance.
- 180.1232 Lime-sulfur; exemption from the requirement of a tolerance.
- 180.1233 Potassium sorbate; exemption from the requirement of a tolerance.
- 180.1234 Sodium carbonate; exemption from the requirement of a tolerance.
- 180.1235 Sodium hypochlorite; exemption from the requirement of a tolerance.
- 180.1236 Sulfur; exemption from the requirement of a tolerance.
- 180.1237 Sodium metasilicate; exemption from the requirement of a tolerance.
- 180.1240 Thymol; exemption from the requirement of a tolerance.
- 180.1243 *Bacillus subtilis* var. *amyloliquefaciens* strain FZB24; exemption from the requirement of a tolerance.
- 180.1244 Ammonium bicarbonate; exemption from the requirement of a tolerance.
- 180.1245 Rhamnolipid biosurfactant; exemption from the requirement of a tolerance.
- 180.1246 Yeast Extract Hydrolysate from *Saccharomyces cerevisiae*; exemption from the requirement of a tolerance.
- 180.1248 Exemption of citronellol from the requirement of a tolerance.
- 180.1250 C8, C10, and C12 fatty acid monoesters of glycerol and propylene glycol; exemption from the requirement of a tolerance.
- 180.1251 Geraniol; exemption from the requirement of a tolerance.
- 180.1253 *Streptomyces lydicus* WYEC 108; exemption from the requirement of a tolerance.
- 180.1254 *Aspergillus flavus* NRRL 21882; exemption from the requirement of a tolerance.
- 180.1255 *Bacillus pumilus* strain QST 2808; exemption from the requirement of a tolerance.
- 180.1257 *Purpureocillium lilacinum* strain 251; exemption from the requirement of a tolerance.
- 180.1258 Acetic acid; exemption from the requirement of a tolerance.
- 180.1259 *Reynoutria sachalinensis* extract; exemption from the requirement of a tolerance.
- 180.1260 *Muscodor albus* QST 20799 and the volatiles produced on rehydration; exemption from the requirement of a tolerance.
- 180.1261 *Xanthomonas campestris* pv. *vesicatoria* and *Pseudomonas syringae* pv. *tomato* specific Bacteriophages.
- 180.1262 Sorbitol octanoate; exemption from the requirement of a tolerance.
- 180.1263 Tetrahydrofurfuryl alcohol; exemption from the requirement of a tolerance.
- 180.1267 *Pantoea agglomerans* strain C9-1; exemption from the requirement of a tolerance.
- 180.1268 Potassium silicate; exemption from the requirement of a tolerance.
- 180.1269 *Bacillus mycoides* isolate J; exemption from the requirement of a tolerance.
- 180.1270 Isophorone; exemption from the requirement of a tolerance.
- 180.1271 Eucalyptus oil; exemption from the requirement of a tolerance.
- 180.1272 *Pantoea agglomerans* strain E325; exemption from the requirement of a tolerance.
- 180.1273 *Beauveria bassiana* HF23; exemption from the requirement of a tolerance.
- 180.1274 Tris (2-ethylhexyl) phosphate; exemption from the requirement of a tolerance.
- 180.1275 *Pythium oligandrum* DV 74; exemption from the requirement of a tolerance.
- 180.1276 Tobacco mild green mosaic tobamovirus strain U2; exemption from the requirement of a tolerance.
- 180.1277 Dibasic esters; exemption from the requirement of a tolerance.
- 180.1278 *Quillaja saponaria* extract (saponins); exemption from the requirement of a tolerance.
- 180.1280 Poly(hexamethylenebiguanide) hydrochloride (PHMB); exemption from the requirement of a tolerance.
- 180.1281 S-Abciscic Acid, (S)-5-(1-hydroxy-2,6,6-trimethyl-4-oxo-1-cyclohex-2-enyl)-3-methyl-penta-(2Z,4E)-dienoic Acid; exemption from the requirement of a tolerance.
- 180.1282 *Bacillus firmus* I-1582; exemption from the requirement of a tolerance.
- 180.1283 (Z)-7,8-epoxy-2-methyloctadecane (Disparlure); exemption from the requirement of a tolerance.
- 180.1284 Ammonium salts of higher fatty acids (C<sub>8</sub>-C<sub>18</sub> saturated; C<sub>8</sub>-C<sub>12</sub> unsaturated); exemption from the requirement of a tolerance.
- 180.1285 Polyoxin D zinc salt; exemption from the requirement of a tolerance.
- 180.1287 Extract of *Chenopodium ambrosioides* near *ambrosioides*; exemption from the requirement of a tolerance.
- 180.1288 Tristyrylphenol ethoxylates; exemption from the requirement of a tolerance.
- 180.1289 *Candida oleophila* Strain O; exemption from the requirement of a tolerance.
- 180.1290 *Pasteuria usgae*; exemption from the requirement of a tolerance.
- 180.1291 Cold pressed neem oil; exemption from the requirement of a tolerance.
- 180.1292 *Ulocladium oudemansii* (U3 Strain); exemption from the requirement of a tolerance.
- 180.1293 *Trichoderma gamsii* strain ICC 080; exemption from the requirement of a tolerance.
- 180.1294 *Trichoderma asperellum* strain ICC 012; exemption from the requirement of a tolerance.

- 180.1295 Laminarin; exemption from the requirement of a tolerance.
- 180.1296 Terpene Constituents  $\alpha$ -terpinene, d-limonene and p-cymene, of the Extract of *Chenopodium ambrosioides* near *ambrosioides* as Synthetically Manufactured; exemption from the requirement of a tolerance.
- 180.1297 Homobrassinolide; exemption from the requirement of a tolerance.
- 180.1298 *Trichoderma hamatum* isolate 382; exemption from the requirement of a tolerance.
- 180.1299 Prohydrojasmon; exemption from the requirement of a tolerance.
- 180.1300 Potassium hypochlorite; exemption from the requirement of a tolerance.
- 180.1301 *Escherichia coli* O157:H7 specific bacteriophages; temporary exemption from the requirement of a tolerance.
- 180.1302 Sodium Ferric Ethylenediamine-tetraacetate (EDTA); exemption from the requirement of a tolerance.
- 180.1303 *Metarhizium anisopliae* strain F52; exemption from the requirement of a tolerance.
- 180.1304 *Pseudomonas fluorescens* strain CL145A; exemption from the requirement of a tolerance.
- 180.1305 *Chromobacterium subtsugae* strain PRAA4-1<sup>T</sup>; exemption from the requirement of a tolerance.
- 180.1306 *Isaria fumosorosea* (formerly *Paecilomyces fumosoroseus*) Apopka strain 97; exemption from the requirement of a tolerance.
- 180.1307 Bacteriophage of *Clavibacter michiganensis* subspecies *michiganensis*; exemption from the requirement of a tolerance.
- 180.1308 *Bacillus amyloliquefaciens* strain D747; exemption from the requirement of a tolerance.
- 180.1309 *Bacillus subtilis* strain CX-9060; exemption from the requirement of a tolerance.
- 180.1310 *Trichoderma virens* strain G-41; exemption from the requirement of a tolerance.
- 180.1311 *Pasteuria nishizawae*—Pn1; exemption from the requirement of a tolerance.
- 180.1312 *Aureobasidium pullulans* strains DSM 14940 and DSM 14941; exemption from the requirement of a tolerance.
- 180.1313 *Bacillus pumilus* strain GHA 180; exemption from the requirement of a tolerance.
- 180.1314 Killed, nonviable *Streptomyces acidiscabies* strain RL-110<sup>T</sup>; exemption from the requirement of a tolerance.
- 180.1315 Natamycin; exemption from the requirement of a tolerance.
- 180.1316 *Pasteuria* spp. (Rotylenchulus reniformis nematode)—Pr3; exemption from the requirement of a tolerance.
- 180.1317 Pesticide chemicals; exemption from the requirements of a tolerance.
- 180.1318 3-decen-2-one; exemption from the requirement of a tolerance.
- 180.1319 Banda de *Lupinus albus* doce (BLAD); exemption from the requirement of a tolerance.
- 180.1320 Methyl jasmonate; exemption from the requirement of a tolerance.
- 180.1321 Complex Polymeric Polyhydroxy Acids (CPPA); exemption from the requirement of a tolerance.
- 180.1322 *Bacillus pumilus* strain BU F-33; exemption from the requirement of a tolerance.
- 180.1323 Ethyl-2E,4Z-decadienoate (Pear Ester); exemption from the requirement of a tolerance.
- 180.1324 GS-omega/kappa-Hxtx-Hv1a; exemption from the requirement of a tolerance.
- 180.1325 Heat-killed *Burkholderia* spp. strain A396 cells and spent fermentation media exemption from the requirement of a tolerance.
- 180.1326 *Pseudomonas fluorescens* strain D7; exemption from the requirement of a tolerance.
- 180.1327 Tetraacetythylenediamine (TAED) and its metabolite Diacetythylenediamine (DAED); exemption from the requirement of a tolerance.
- 180.1328 *Beauveria bassiana* strain ANT-03; exemption from the requirement of a tolerance.
- 180.1329 *Bacillus subtilis* strain IAB/BS03; exemption from the requirement of a tolerance.
- 180.1330 1-Octanol; exemption from the requirement of a tolerance.
- 180.1331 *Trichoderma asperelloides* strain JM41R; exemption from the requirement of a tolerance.
- 180.1332 Lavandulyl senecioate; exemption from the requirement of a tolerance.
- 180.1333 Potassium Salts of Hops Beta acids; exemption from the requirement of a tolerance.
- 180.1334 Choline Chloride; exemption from the requirement of a tolerance.
- 180.1335 *Isaria fumosorosea* strain FE 9901; exemption from the requirement of a tolerance.
- 180.1336 *Bacillus amyloliquefaciens* strain PTA-4838; exemption from the requirement of a tolerance.
- 180.1337 Citrus tristeza virus expressing spinach defensin proteins 2, 7, and 8; exemption from the requirement of a tolerance.
- 180.1338 *Aspergillus flavus* strains TC16F, TC35C, TC38B, and TC46G; exemptions from the requirement of a tolerance.
- 180.1339 *Spodoptera frugiperda* multiple nucleopolyhedrovirus strain 3AP2; exemption from the requirement of a tolerance.

- 180.1340 *Muscodor albus* strain SA-13 and the volatiles produced on rehydration; exemption from the requirement of a tolerance.
- 180.1341 *Pseudomonas chlororaphis* strain AFS009; exemption from the requirement of a tolerance.
- 180.1342 *d*-Limonene; exemption from the requirement of a tolerance.
- 180.1343 Tartrazine; exemption from the requirement of a tolerance.
- 180.1344 Cyclanilprole; exemption from the requirement of a tolerance.
- 180.1345 1-Triacontanol; exemption from the requirement of a tolerance.
- 180.1346 1,3-Dibromo-5,5-Dimethylhydantoin; exemption from the requirement of a tolerance.
- 180.1347 *Bacillus amyloliquefaciens* strain F727; exemption from the requirement of a tolerance.
- 180.1348 *Bacillus subtilis* strain BU1814; exemption from the requirement of a tolerance.
- 180.1350 *Bacillus licheniformis* strain FMCH001; exemption from the requirement of a tolerance.
- 180.1351 *Bacillus subtilis* strain FMCH002; exemption from the requirement of a tolerance.
- 180.1352 Methyl- $\alpha$ -D-mannopyranoside (Alpha methyl mannoside); exemption from the requirement of a tolerance.
- 180.1353 Lipochitooligosaccharide (LCO) SP104; exemption from the requirement of a tolerance.
- 180.1354 Flutianil; exemption from the requirement of a tolerance.
- 180.1355 Duddingtonia flagrans strain IAH 1297; exemption from the requirement of a tolerance.
- 180.1356 Extract of *Swinglea glutinosa*; exemption from the requirement of a tolerance.
- 180.1357 Cerevisane (cell walls of *Saccharomyces cerevisiae* strain LAS117); exemption from the requirement of a tolerance.
- 180.1358 *Metschnikowia fructicola* strain NRRL Y-27328; exemption from the requirement of a tolerance.
- 180.1359 Bacteriophage active against *Erwinia amylovora*; exemption from the requirement of a tolerance.
- 180.1360 Bacteriophage active against *Xanthomonas citri* subsp. *citri*; exemption from the requirement of a tolerance.
- 180.1361 Pepino mosaic virus, strain CH2, isolate 1906; exemption from the requirement of a tolerance.
- 180.1362 *Beauveria bassiana* strain PPRI 5339; exemption from the requirement of a tolerance.
- 180.1363 *Bacillus amyloliquefaciens* strain ENV503; exemption from the requirement of a tolerance.
- 180.1364 Chlorate; exemption from the requirement of a tolerance.
- 180.1365 Bacteriophage active against *Xylella fastidiosa*; exemption from the requirement of a tolerance.
- 180.1366 24-Epibrassinolide; exemption from the requirement of a tolerance.
- 180.1367 *Bacillus amyloliquefaciens* subspecies plantarum strain FZB42; exemption from the requirement of a tolerance.
- 180.1368 *Clonostachys rosea* strain CR-7; exemption from the requirement of a tolerance.
- 180.1369 *Autographa californica* multiple nucleopolyhedrovirus strain FV#11; exemption from the requirement of a tolerance.
- 180.1370 Lipochitooligosaccharide (LCO) MOR116; exemption from the requirement of a tolerance.
- 180.1371 Florpyrauxifen-benzyl; exemption from the requirement of a tolerance.
- 180.1372 Sodium lauryl sulfate; exemption from the requirement of a tolerance.
- 180.1373 *Chrysodeixis includens* nucleopolyhedrovirus isolate #460; exemption from the requirement of a tolerance.
- 180.1374 *Autographa californica* multiple nucleopolyhedrovirus strain R3; exemption from the requirement of a tolerance.
- 180.1375 Methyl mercaptan; exemption from the requirement of a tolerance.
- 180.1376 Ea peptide 91398; exemption from the requirement of a tolerance.
- 180.1378 *Trichoderma atroviride* strain SC1; exemption from the requirement of a tolerance.
- 180.1379 *Trichoderma asperellum*, strain T34; exemption from the requirement of a tolerance.
- 180.1380 *Pseudomonas fluorescens* strain ACK55; exemption from the requirement of a tolerance.
- 180.1381 Oxalic acid; exemption from the requirement of a tolerance.
- 180.1382 *Purpureocillium lilacinum* strain PL11; exemption from the requirement of a tolerance.
- 180.1383 *Bacillus velezensis* strain RTI301; exemption from the requirement of a tolerance.
- 180.1384 *Bacillus subtilis* strain RTI477; exemption from the requirement of a tolerance.
- 180.1385 *Methylobacterium populi* strain NLS0089; exemption from the requirement of a tolerance.
- 180.1386 *Bacillus subtilis* strain AFS032321; exemption from the requirement of a tolerance.
- 180.1387 *Kosakonia cowanii* strain SYM00028; exemption from the requirement of a tolerance.
- 180.1388 *Bacillus subtilis* strain CH3000; exemption from the requirement of a tolerance.

**Pt. 180**

**40 CFR Ch. I (7–1–25 Edition)**

- 180.1389 *Bacillus paralicheniformis* strain CH2970; exemption from the requirement of a tolerance.
- 180.1390 *Trichoderma harzianum* strain T-78; exemption from the requirement of a tolerance.
- 180.1391 *Saccharomyces cerevisiae* strain LAS02; exemption from the requirement of a tolerance.
- 180.1392 *Streptomyces* sp. strain SYM00257; exemption from the requirement of a tolerance.
- 180.1393 *Methylobacterium extorquens* strain NLS0042; exemption from the requirement of a tolerance.
- 180.1394 Lysate of *Willaertia magna* C2c Maky; exemption from the requirement of a tolerance.
- 180.1395 Eugenol; exemption from the requirement of a tolerance.
- 180.1396 Extract of *Caesalpinia spinosa*; exemption from the requirement of a tolerance.
- 180.1397 *Trichoderma atroviride* strain K5 NRRL B-50520; exemption from the requirement of a tolerance.
- 180.1398 Peptide Derived from Harpin Protein (PDHP) 25279; exemption from the requirement of a tolerance.
- 180.1399 Bacteriophage active against *Pseudomonas syringae* pv. *syringae*; exemption from the requirement of a tolerance.
- 180.1400 Bacteriophage active against *Xanthomonas arboricola* pv. *corylina*; exemption from the requirement of a tolerance.
- 180.1401 Bacteriophage active against *Xanthomonas arboricola* pv. *juglandis*; exemption from the requirement of a tolerance.
- 180.1402 Bacteriophage active against *Xanthomonas arboricola* pv. *pruni*; exemption from the requirement of a tolerance.
- 180.1403 Ledprona double-stranded RNA (CAS# 2433753-68-3); exemption from the requirement of a tolerance.
- 180.1404 (2S)-5-Oxopyrrolidine-2-carboxylic Acid (L-PCA); exemption from the requirement of a tolerance.
- 180.1405 Flg22-Bt Peptide; exemption from the requirement of a tolerance.
- 180.1406 U1-AGTX-Ta1b-QA protein; exemption from the requirement of a tolerance.
- 180.1407 *Gluconobacter cerinus* strain BC18B and *Hanseniaspora uvarum* strain BC18Y; exemptions from the requirement of a tolerance.
- 180.1408 *Bacillus velezensis* strain 11604; exemption from the requirement of a tolerance.
- 180.1409 *Trichoderma atroviride* strain AT10; exemption from the requirement of a tolerance.
- 180.1412 *Bacillus licheniformis* strain 414-01; exemption from the requirement of a tolerance.

- 180.1413 Potassium Carbonate; exemption from the requirement of a tolerance.
- 180.1414 *Beauveria bassiana* BW149; exemption from the requirement of a tolerance.
- 180.1415 Inactivated *Burkholderia rinojensis* strain A396 cells and spent fermentation media; exemption from the requirement of a tolerance.
- 180.1416 *Pseudomonas oryzae* strain SYM23945; exemption from the requirement of a tolerance.
- 180.1417 Vadesca double-stranded RNA (CAS Reg. No. 2643947-26-4); exemption from the requirement of a tolerance.
- 180.1418 Pepino mosaic virus; exemptions from the requirement of a tolerance.

**Subpart E—Pesticide Chemicals Not Requiring a Tolerance or an Exemption From a Tolerance**

EDITORIAL NOTE: Nomenclature changes to part 180 appear at 62 FR 66023, Dec. 17, 1997.

**GLOSSARY**

NOTE: The items in this glossary were compiled as an aid to the users of the Code of Federal Regulations. Inclusion or exclusion from this glossary has no legal significance.

APPLI = APPLICATION

C-I MET = CHOLINESTERASE-INHIBITING METABOLITES

CARB = CARBAMATES

EPWRR = EDIBLE PORTION WITH RIND REMOVED

EXC = EXCEPT

I (IN PPM COLUMN) = INTERIM TOLERANCE

INC = INCLUDING

K = CWHR = KERNEL PLUS COB WITH HUSK REMOVED

MBYP = MEAT BYPRODUCTS

MIN = MINIMUM

N (IN PPM COLUMN) = NEGLIGIBLE RESIDUES

NMT = NOT MORE THAN

NON-PER BAG/PKGD RAC = NON-PERISHABLE PACKAGED OR BAGGED RAW AGRICULTURAL COMMODITY

PPM = PART(S) PER MILLION

POST-H = POSTHARVEST APPLICATION

PRE-H = PREHARVEST APPLICATION

PRE-S = PRESLAUGHTER APPLICATION

PRODS = PRODUCTS rollert

T (IN PPM COLUMN) = TEMPORARY TOLERANCE

## Environmental Protection Agency

## § 180.1

### Subpart A—Definitions and Interpretative Regulations

#### § 180.1 Definitions and interpretations.

(a) *Administrator*, without qualification, means the Administrator of the Environmental Protection Agency.

(b) *Agency*, without qualification, means the Environmental Protection Agency.

(c) *FFDCA* means the Federal Food, Drug, and Cosmetic Act, as amended, 21 U.S.C. 301–392.

(d) Raw agricultural commodities include, among other things, fresh fruits, whether or not they have been washed and colored or otherwise treated in their unpeeled natural form; vegetables in their raw or natural state, whether or not they have been stripped of their outer leaves, waxed, prepared into fresh green salads, etc.; grains, nuts, eggs, raw milk, meats, and similar agricultural produce. It does not include foods that have been processed, fabricated, or manufactured by cooking, freezing, dehydrating, or milling.

(e) Where a raw agricultural commodity bearing a pesticide chemical residue that has been exempted from the requirement of a tolerance, or which is within a tolerance permitted under FFDCA section 408, is used in preparing a processed food, the processed food will not be considered unsafe within the meaning of FFDCA sections

402 and 408(a), despite the lack of a tolerance or exemption for the pesticide chemical residue in the processed food, if:

(1) The pesticide chemical has been used in or on the raw agricultural commodity in conformity with a tolerance under this section;

(2) The pesticide chemical residue has been removed to the extent possible in good manufacturing practice; and

(3) The concentration of the pesticide chemical residue in the processed food is not greater than the tolerance prescribed for the pesticide chemical residue on the raw agricultural commodity.

(f) For the purpose of computing fees as required by § 180.33, each group of related crops listed in § 180.34(e) and each crop group or subgroup listed in § 180.41 is counted as a single raw agricultural commodity in a petition or request for tolerances or exemption from the requirement of a tolerance.

(g) Tolerances and exemptions established for pesticide chemicals in or on the general category of raw agricultural commodities listed in column A apply to the corresponding specific raw agricultural commodities listed in column B. However, a tolerance or exemption for a specific commodity in column B does not apply to the general category in column A.

| A                           | B                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

| Bean                        | <i>Cicer arietinum</i> (chickpea, garbanzo bean); <i>Lupinus</i> spp. (including, but not limited to, Andean lupin, blue lupin, grain lupin, sweet lupin, white sweet lupin, white lupin, and yellow lupin). <i>Phaseolus</i> spp. (including, but not limited to, black bean, cranberry bean, dry bean, field bean, French bean, garden bean, great northern bean, green bean, kidney bean, lima bean, navy bean, pink bean, pinto bean, red bean, scarlet runner bean, snap bean, tepary bean, yellow bean, and wax bean); Broad bean (fava bean, faba bean); Goa bean (asparagus pea and winged bean); <i>Vigna</i> spp. (including adzuki bean, asparagus bean, blackeyed pea, catjang bean, Chinese longbean, cowpea, crowder pea, moth bean, mung bean, rice bean, southern pea, urd bean, and yardlong bean); Guar bean; Horse gram; Jackbean; Lablab bean (hyacinth bean); Morama bean; African yam bean; American potato bean; Vegetable soybean (edamame); Sword bean; Velvetbean; Winged pea; cultivars, varieties and/or hybrids of these commodities. [Note: A variety of pesticide tolerances have been previously established for pea and/or bean. Chickpea/garbanzo bean is also listed in the definition for "pea". For garbanzo bean/chickpea only, the highest established pea or bean tolerance will apply to pesticide residues found in this commodity]. |

| Fruit, citrus                      | Grapefruit, lemon, lime, orange, tangelo, tangerine, citrus citron, kumquat, and hybrids of these.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Garlic                             | Garlic, great headed; garlic, and serpent garlic. | Sugar apple                  | <i>Annona squamosa</i> L. and its hybrid atemoya ( <i>Annona cherimola</i> Mill X <i>A. squamosa</i> L.) Also includes true custard apple ( <i>Annona reticulata</i> L.).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Squash, summer               | Fruits of the gourd ( <i>Cucurbitaceae</i> ) family that are consumed when immature, 100% of the fruit is edible either cooked or raw, once picked it cannot be stored, has a soft rind which is easily penetrated, and if seeds were harvested they would not germinate; e.g., <i>Cucurbita pepo</i> (i.e., crookneck squash, straightneck squash, scallop squash, and vegetable marrow); <i>Lagenaria</i> spp. (i.e., spaghetti squash, hyotan, cucuzza); <i>Luffa</i> spp. (i.e., hechima, Chinese okra); <i>Momordica</i> spp. (i.e., bitter melon, balsam pear, balsam apple, Chinese cucumber); <i>Sechium edule</i> (chayote); and other cultivars and/or hybrids of these. |
| Sweet potato                 | Sweet potato, yam.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Tangerine                    | Tangerine (mandarin or mandarin orange); clementine; Mediterranean mandarin; satsuma mandarin; tangelo; tangor; cultivars, varieties, and/or hybrids of these.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Tomato                       | Tomato, tomatillo.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Turnip tops or turnip greens | Broccoli raab (raab, raab salad), hanover salad, turnip tops (turnip greens).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Wheat                        | Wheat, triticale.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

(h) Unless otherwise specified in this paragraph or in tolerance regulations prescribed in this part for specific pesticide chemicals, the raw agricultural commodity or processed food to be examined for pesticide residues, shall consist of the whole raw agricultural commodity or processed food.

(1) The raw agricultural commodity bananas, when examined for pesticide residues, shall not include any crown tissue or stalk.

(2) Shell shall be removed and discarded from nuts before examination for pesticide residues.

(3) Caps (hulls) shall be removed and discarded from strawberries before examination for pesticide residues.

(4) Stems shall be removed and discarded from melons before examination for pesticide residues.

(5) Roots, stems, and outer sheaths (or husks) shall be removed and discarded from garlic bulbs and dry bulb onions, and only the garlic cloves and onion bulbs shall be examined for pesticide residues.

(6) Where a tolerance is established on a root vegetable including tops and/or with tops, and the tops and the roots are marketed together, they shall be analyzed separately and neither the pesticide residue on the roots nor the pesticide residue on the tops shall exceed the tolerance level, except that in the case of carrots, parsnips, and rutabagas, the tops shall be removed and

discarded before analyzing roots for pesticide residues.

(7) The crowns (leaves at the top of the fruit) shall be removed and discarded from pineapples before examination for pesticide residues.

(8) The term *lima beans* means the beans and the pod.

(9) The term *peanuts* means the peanut meat after removal of the hulls.

(10) For processed foods consisting primarily of one ingredient and sold in a form requiring further preparation prior to consumption (e.g., fruit juice concentrates, dehydrated vegetables, and powdered potatoes), the processed food to be examined for residues shall be the whole processed commodity after compensating for or reconstituting to the commodity's normal moisture content, unless a tolerance for the concentrated or dehydrated food form is included in this part. If there exists a tolerance for a specific pesticide on the processed food in its concentrated or dehydrated food form, for the purpose of determining whether the food is in compliance with that tolerance, the processed food to be examined for residues shall be the whole processed commodity on an "as is" basis.

(i) The term *pesticide chemical* shall have the meaning specified in FFDCA section 201(q)(1), as amended, except as provided in §180.4.

(j) The term *negligible residue* means any amount of a pesticide chemical remaining in or on a raw agricultural commodity or group of raw agricultural commodities that would result in a daily intake regarded as toxicologically insignificant on the basis of scientific judgment of adequate safety data. Ordinarily this will add to the diet an amount which will be less than 1/2,000th of the amount that has been demonstrated to have no effect from feeding studies on the most sensitive animal species tested. Such toxicity studies shall usually include at least 90-day feeding studies in two species of mammals.

(k) The term *nonperishable raw agricultural commodity* means any raw agricultural commodity not subject to rapid decay or deterioration that would render it unfit for consumption. Examples are cocoa beans, coffee beans, field-dried beans, field-dried peas, grains, and nuts. Not included are eggs, milk, meat, poultry, fresh fruits, and vegetables such as onions, parsnips, potatoes, and carrots.

(l) The term *tolerance with regional registration* means any tolerance which is established for pesticide residues resulting from the use of the pesticide pursuant to a regional registration. Such a tolerance is supported by residue data from specific growing regions for a raw agricultural commodity. Individual tolerances with regional registration are designated in separate subsections in 40 CFR 180.101 through 180.999, as appropriate. Additional residue data which are representative of the proposed use area are required to expand the geographical area of usage of a pesticide on a raw agricultural commodity having an established "tolerance with regional registration." Persons seeking geographically broader registration of a crop having a "tolerance with regional registration" should contact the appropriate EPA product manager concerning additional residue data required to expand the use area.

(m) The term *pesticide chemical residue* shall have the meaning specified in FFDCA section 201(q)(2), as amended, except as provided in § 180.4.

(n) The term *food commodity* means:

(1) Any raw agricultural commodity (food or feed) as defined in section 201(r) of the Federal Food, Drug, and Cosmetic Act (FFDCA); and

(2) Any processed food or feed as defined in section 201(gg) of the FFDCA.

[36 FR 22540, Nov. 25, 1971]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 180.1, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at [www.govinfo.gov](http://www.govinfo.gov).

### § 180.3 Tolerances for related pesticide chemicals.

(a) Pesticide chemicals that cause related pharmacological effects will be regarded, in the absence of evidence to the contrary, as having an additive deleterious action. (For example, many pesticide chemicals within each of the following groups have related pharmacological effects: Chlorinated organic pesticides, arsenic-containing chemicals, metallic dithiocarbamates, cholinesterase-inhibiting pesticides.)

(b) Tolerances established for such related pesticide chemicals may limit the amount of a common component (such as  $\text{As}_2\text{O}_3$ ) that may be present, or may limit the amount of biological activity (such as cholinesterase inhibition) that may be present, or may limit the total amount of related pesticide chemicals (such as chlorinated organic pesticides) that may be present.

(c)(1) Where tolerances for inorganic bromide in or on the same raw agricultural commodity are set in two or more sections in this part (example: §§ 180.123 and 180.199), the overall quantity of inorganic bromide to be tolerated from use of the same pesticide in different modes of application or from two or more pesticide chemicals for which tolerances are established is the highest of the separate applicable tolerances. For example, where the bromide tolerance on asparagus from methyl bromide commodity fumigation is 100 parts per million (40 CFR 180.123) and on asparagus from methyl bromide soil treatment is 300 parts per million (40 CFR 180.199), the overall inorganic bromide tolerance for asparagus grown on methyl bromide-treated soil and also fumigated with methyl bromide after harvest is 300 parts per million.

(2) Where tolerances are established in terms of inorganic bromide residues only from use of organic bromide fumigants on raw agricultural commodities, such tolerances are sufficient to protect the public health, and no additional concurrent tolerances for the organic pesticide chemicals from such use are necessary. This conclusion is based on evidence of the dissipation of the organic pesticide or its conversion to inorganic bromide residues in the food when ready to eat.

(d)(1) Where tolerances are established for both calcium cyanide and hydrogen cyanide on the same raw agricultural commodity, the total amount of such pesticides shall not yield more residue than that permitted by the larger of the two tolerances, calculated as hydrogen cyanide.

(2) Where tolerances are established for residues of both *O,O*-diethyl *S*-[2-(ethylthio)ethyl] phosphorodithioate and demeton (a mixture of *O,O*-diethyl *O*-(and *S*-) [2-(ethylthio)ethyl] phosphorothioates) on the same raw agricultural commodity, the total amount of such pesticides shall not yield more residue than that permitted by the larger of the two tolerances, calculated as demeton.

(3) Where tolerances are established for both terpene polychlorinates (chlorinated mixture of camphene, pinene, and related terpenes, containing 65-66 percent chlorine) and toxaphene (chlorinated camphene containing 67-69 percent chlorine) on the same raw agricultural commodities, the total amount of such pesticides shall not yield more residue than that permitted by the larger of the two tolerances, calculated as a chlorinated terpene of molecular weight 396.6 containing 67 percent chlorine.

(4) Where a tolerance is established for more than one pesticide containing arsenic found in, or on a raw agricultural commodity, the total amount of such pesticide shall not exceed the highest established tolerance calculated as  $As_2O_3$ .

(5) Where tolerances are established for more than one member of the class of dithiocarbamates listed in paragraph (e)(3) of this section on the same raw agricultural commodity, the total residue of such pesticides shall not ex-

ceed that permitted by the highest tolerance established for any one member of the class, calculated both as zinc ethylenebisdithiocarbamate and carbon disulfide. The tolerance based on zinc ethylenebisdithiocarbamate shall first be multiplied by 0.6 to convert it to the equivalent carbon disulfide tolerance, and then the carbon disulfide tolerance levels will be compared to determine the highest tolerance level per raw agricultural commodity.

(6) Where tolerances are established for residues of both *S,S,S*-tributyl phosphorotrithioate and tributyl phosphorotrithioate in or on the same raw agricultural commodity, the total amount of such pesticides shall not yield more residue than that permitted by the higher of the two tolerances, calculated as *S,S,S*-tributyl phosphorotrithioate.

(7) Where tolerances are established for residues of *O,S*-dimethyl phosphoramidothioate, resulting from the use of acephate (*O,S*-dimethyl acetylphosphoramidothioate) and/or *O,S* - dimethylphosphoramidothioate on the same agricultural commodity, the total amount of *O,S*-dimethylphosphoramidothioate shall not yield more residue than that permitted by the higher of the two tolerances.

(8) Where a tolerance is established for more than one pesticide having the metabolites 1-(3,4-dichlorophenyl)-3-methylurea (DCPMU) and 3,4-dichlorophenylurea (DCPU) found in or on a raw agricultural commodity, the total amount of such residues shall not exceed the highest established tolerance for a pesticide having these metabolites.

(9) Where a tolerance is established for more than one pesticide having as metabolites compounds containing the benzimidazole moiety found in or on a raw agricultural commodity, the total amount of such residues shall not exceed the highest established tolerance for a pesticide having these metabolites.

(10) Where a tolerance is established for triclopyr, chloropyrifos, and chlorpyrifos-methyl having the common metabolite 3,5,6-trichloro-2-pyridinol on the same raw agricultural commodity, the total amount of such residues shall not exceed the highest

## Environmental Protection Agency

## § 180.3

established tolerance for any of the pesticides having the metabolites.

(11) Where tolerances are established for more than one pesticide having the metabolite 3,5,6-trichloro-2-pyridinol found in or on the raw agricultural commodity, the total amount of such residues shall not exceed the highest established tolerance for a pesticide having this metabolite.

(12) Where tolerances are established for residues of methomyl, resulting from the use of thiodicarb and/or methomyl on the same raw agricultural commodity, the total amount of methomyl shall not yield more residue than that permitted by the higher of the two tolerances.

(e) Except as noted in paragraphs (e)(1) and (2) of this section, where residues from two or more chemicals in the same class are present in or on a raw agricultural commodity the tolerance for the total of such residues shall be the same as that for the chemical having the lowest numerical tolerance in this class, unless a higher tolerance level is specifically provided for the combined residues by a regulation in this part.

(1) Where residues from two or more chemicals in the same class are present in or on a raw agricultural commodity and there are available methods that permit quantitative determination of each residue, the quantity of combined residues that are within the tolerance may be determined as follows:

(i) Determine the quantity of each residue present.

(ii) Divide the quantity of each residue by the tolerance that would apply if it occurred alone, and multiply by 100 to determine the percentage of the permitted amount of residue present.

(iii) Add the percentages so obtained for all residues present.

(iv) The sum of the percentages shall not exceed 100 percent.

(2) Where residues from two or more chemicals in the same class are present in or on a raw agricultural commodity and there are available methods that permit quantitative determinations of one or more, but not all, of the residues, the amounts of such residues as may be determinable shall be deducted from the total amount of residues present and the remainder shall have

the same tolerance as that for the chemical having the lowest numerical tolerance in that class. The quantity of combined residues that are within the tolerance may be determined as follows:

(i) Determine the quantity of each determinable residue present.

(ii) Deduct the amounts of such residues from the total amount of residues present and consider the remainder to have the same tolerance as that for the chemical having the lowest numerical tolerance in that class.

(iii) Divide the quantity of each determinable residue by the tolerance that would apply if it occurred alone and the quantity of the remaining residue by the tolerance for the chemical having the lowest numerical tolerance in that class and multiply by 100 to determine the percentage of the permitted amount of residue present.

(iv) Add the percentages so obtained for all residues present.

(v) The sum of the percentages shall not exceed 100 percent.

(3) The following pesticides are members of the class of dithiocarbamates:

A mixture of 5.2 parts by weight of ammoniates of [ethylenebis (dithiocarbamate)] zinc with 1 part by weight ethylenebis [dithiocarbamic acid] bimolecular and trimolecular cyclic anhydrosulfides and disulfides.

2-Chloroallyl diethyldithiocarbamate.

Coordination product of zinc ion and maneb containing 20 percent manganese, 2.5 percent zinc, and 77.5 percent ethylenebisdithiocarbamate.

Ferbam.

Maneb.

Manganous dimethyldithiocarbamate.

Sodium dimethyldithiocarbamate.

Thiram.

Zineb.

Ziram.

(4) The following are members of the class of chlorinated organic pesticides:

Aldrin.

BHC (benzene hexachloride).

1,1-Bis(*p*-chlorophenyl)-2,2,2-trichloroethanol.

Chlorbenside (*p*-chlorobenzyl *p*-chlorophenyl sulfide).

Chlordane.

Chlorobenzilate (ethyl 4,4'-dichlorobenzilate).

*p*-Chlorophenoxyacetic acid.

*p*-Chlorophenyl-2,4,5-trichlorophenyl sulfide.

2,4-D (2,4-dichlorophenoxyacetic acid).

DDD (TDE).  
 DDT.  
 1,1-Dichloro-2,2-bis(*p*-ethylphenyl) ethane.  
 2,6-Dichloro-4-nitroaniline.  
 2,4-Dichlorophenyl *p*-nitrophenyl ether.  
 Dieldrin.  
 Dodecachlorooctahydro-1,3,4-metheno-2*H*-cyclobuta[*cd*]pentalene.  
 Endosulfan (6,7,8,9,10,10-hexachloro-1,5,5a,6,9,9a-hexahydro-6,9-methano-2,4,3-benzodioxathiepin-3-oxide).  
 Endosulfan sulfate (6,7,8,9,10,10-hexachloro-1,5,5a,6,9,9a-hexahydro-6,9-methano-2,4,3-benzodioxathiepin-3,3-dioxide).  
 Heptachlor (1,4,5,6,7,8,8-heptachlor-3a,4,7,7a-tetrahydro-4,7-methanoindene).  
 Heptachlor epoxide (1,4,5,6,7,8,8-heptachloro-2,3-epoxy-2,3,3a,4,7,7a-hexahydro-4,7-methanoindene).  
 Hexachlorophene (2,2'-methylenebis(3,4,6-trichlorophenol) and its monosodium salt).  
 Isopropyl 4,4'-dichlorobenzilate.  
 Lindane.  
 Methoxychlor.  
 Ovex (*p*-chlorophenyl *p*-chlorobenzenesulfonate).  
 Sesone (sodium 2,4-dichlorophenoxyethyl sulfate, SES).  
 Sodium 2,4-dichlorophenoxyacetate.  
 Sodium trichloroacetate.  
 Sulphenone (*p*-chlorophenyl phenyl sulfone).  
 Terpene polychlorinates (chlorinated mixture of camphene, pinene, and related terpenes 65-66 percent chlorine).  
 2,3,5,6-Tetrachloronitrobenzene.  
 Tetradifon (2,4,5,4'-tetrachlorodiphenyl sulfone).  
 Toxaphene (chlorinated camphene).  
 Trichlorobenzoic acid.  
 Trichlorobenzyl chloride.

(5) The following are members of the class of cholinesterase-inhibiting pesticides:

Acephate (*O,S*-dimethyl acetylphosphoramidothioate) and its cholinesterase-inhibiting metabolite *O,S*-dimethyl phosphoramidothioate.  
 Aldicarb (2-methyl-2-(methylthio)propionaldehyde *O*-(methylcarbamoyl)oxime) and its cholinesterase-inhibiting metabolites 2-methyl-2-(methylsulfinyl)propionaldehyde *O*-(methycarbamoyl) oxime and 2-methyl-2-(methylsulfonyl)propionaldehyde *O*-(methylcarbamoyl)oxime.  
 4-*tert*-Butyl-2-chlorophenyl methyl methyl phosphoramidate.  
*S*-[(*tert*-Butylthio)methyl] *O,O*-diethyl phosphorodithioate and its cholinesterase-inhibiting metabolites.  
 Carbaryl (1-naphthyl *N*-methylcarbamate).  
 Carbofuran (2,3-dihydro-2,2-dimethyl-7-benzofuranyl-*N*-methylcarbamate).  
 Carbofuran metabolite (2,3-dihydro-2,2-dimethyl-3-hydroxy-7-benzofuranyl *N*-methylcarbamate).

Carbophenothion (*S*-[(*p*-chlorophenyl)thiolmethyl] *O,O*-diethyl phosphorodithioate) and its cholinesterase-inhibiting metabolites.  
 Chlorpyrifos (*O,O*-diethyl *O*-(3,5,6-trichloro-2-pyridyl)phosphorothioate).  
 Chlorpyrifos-methyl (*O,O*-dimethyl-*O*-(3,5,6-trichloro-2-pyridyl) phosphorothioate).  
 2-Chloro-1-(2,4,5-trichlorophenyl)vinyl dimethyl phosphate.  
 2-Chloro-1-(2,4-dichlorophenyl) vinyl diethyl phosphate.  
 Coumaphos (*O,O*-diethyl *O*-3-chloro-4-methyl-2-oxo-2*H*-1-benzopyran-7-yl phosran-7-yl phosphate).  
 Coumaphos oxygen analog (*O,O*-diethyl *O*-3-chloro-4-methyl-2-oxo-2*H*-1-benzopyrophorothioate).  
 Dialifor (*S*-(2-chloro-1-phthalimidoethyl) *O,O*-diethyl phosphorodithioate).  
 Dialifor oxygen analog (*S*-(2-chloro-1-phthalimidoethyl) *O,O*-diethyl phosphorothioate).  
 Demeton (a mixture of *O,O*-diethyl *O*-(and *S*) [2-ethylthio]ethyl] phosphorothioates).  
 Ethiolate (*S*-ethyl diethylthiocarbamate).  
 2,2-Dichlorovinyl dimethyl phosphate.  
*O,O*-Diethyl *S*-[2-(ethylthio)ethyl] phosphorodithioate and its cholinesterase-inhibiting metabolites.  
*O,O*-Diethyl *O*-(2-diethylamino-6-methyl-4-pyrimidinyl) phosphorothioate and its oxygen analog diethyl 2-diethylamino-6-methyl-4-pyrimidinyl phosphate.  
*O,O*-Diethyl *O*-(2-isopropyl-4-methyl-6-pyrimidinyl) phosphorothioate.  
*O,O*-Diethyl *O*-[*p*-(methylsulfinyl)phenyl] phosphorothioate and its cholinesterase-inhibiting metabolites.  
 Diethyl 2-pyrazinyl phosphate.  
*O,O*-Diethyl *O*-2-pyrazinyl phosphorothioate.  
*S*-(*O,O*-Diisopropyl phosphorodithioate) of *N*-(2-mercaptoethyl) benzenesulfonamide.  
*S*-(*O,O*-Diisopropyl phosphorodithioate) of *N*-(2-mercaptoethyl) benzenesulfonamide.  
 2-(Dimethylamino)-5,6-dimethyl-4-pyrimidinyl dimethylcarbamate and its metabolites 5,6-dimethyl-2-(formylmethylamino)-4-pyrimidinyl dimethylcarbamate and 5,6-dimethyl-2-(methylamino)-4-pyrimidinyl dimethylcarbamate (both calculated as parent).  
 Dimethoate (*O,O*-dimethyl *S*-(*N*-methylcarbamoylmethyl) phosphorodithioate).  
 Dimethoate oxygen analog (*O,O*-dimethyl *S*-(*N*-methylcarbamoylmethyl) phosphorothioate).  
*O,O*-Dimethyl *O-p*-(dimethylsulfamoyl) phenyl phosphate.  
*O,O*-Dimethyl *O-p*-(dimethylsulfamoyl) phenyl phosphorothioate.  
 3,5-Dimethyl-4-(methylthio) phenyl methylcarbamate.  
*O,O*-Dimethyl *S*-[4-oxo-1,2,3-benzotriazin-3-(4*H*)-ylmethyl] phosphorodithioate.

## Environmental Protection Agency

## § 180.5

Dimethyl phosphate of 3-hydroxy-*N,N*-dimethyl-*cis*-crotonamide.  
 Dimethyl phosphate of 3-hydroxy-*N*-methyl-*cis*-crotonamide.  
 Dimethyl phosphate of  $\alpha$ -methylbenzyl 3-hydroxy-*cis*-crotonate.  
*O,O*-Dimethyl 2,2,2-trichloro-1-hydroxyethyl phosphonate.  
*O,O*-Dimethyl phosphorodithioate, *S*-ester with 4-(mercaptomethyl)-2-methoxy- $\Delta$ 2-1,3,4-thiadiazolin-5-one.  
 Dioxathion (2,3-*p*-dioxanedithiol *S,S*-bis (*O,O*-diethylphosphorodithioate)) containing approximately 70 percent *cis* and *trans* isomers and approximately 30 percent related compounds.  
 EPN.  
 Ethephon ((2- - chloroethyl) phosphonic acid).  
 Ethion.  
 Ethion oxygen analog (*S*-[[[(diethoxyphosphinothioyl)thio] methyl] *O,O*-diethyl phosphorothioate).  
*O*- Ethyl *O*-[4-(methylthio) phenyl] *S*-propyl phosphorodithioate and its cholinesterase-inhibiting metabolites.  
*O*-Ethyl *S,S*-dipropylphosphorodithioate.  
 Ethyl 3-methyl-4-(methylthio)phenyl (1-methylethyl) phosphoramidate and its cholinesterase-inhibiting metabolites.  
*O*-Ethyl *S*-phenyl ethylphosphonodithioate.  
*O*-Ethyl *S*-phenyl ethylphosphonothiolate.  
*m*-(1-Ethylpropyl)phenyl methylcarbamate.  
*S*-[2-Ethylsulfinyl]ethyl] *O,O*-dimethyl phosphorothioate and its cholinesterase-inhibiting metabolites, (primarily *S*-[2-(ethyl-sulfonyl)ethyl] *O,O*-dimethyl phosphorothioate).  
 Fenthion (*O,O*-dimethyl *O*-[3-methyl-4-(methylthio)phenyl]phosphorothioate and its cholinesterase-inhibiting metabolites.  
 Malathion.  
*N*-(Mercaptomethyl)phthalimide *S*-(*O,O*-dimethyl phosphorodithioate).  
*N*-(Mercaptomethyl)phthalimide *S*-(*O,O*-dimethyl phosphorothioate).  
 Methomyl (*S*-methyl *N*-[(methylcarbamoyl)oxy]thioacetimidate).  
 1-Methoxycarbonyl-1-propen-2-yl dimethyl phosphate and its beta isomer.  
*m*-(1-Methylbutyl)phenyl methylcarbamate.  
 Methyl parathion.  
 Naled (1,2-dibromo-2,2-dichloroethyl dimethyl phosphate).  
 Oxamyl (methyl *N,N'*-dimethyl-*N*-[(methylcarbamoyl)oxy]-1-thioxamimidate).  
 Parathion.  
 Phorate (*O,O*-diethyl *S*-(ethylthio)methyl phosphorodithioate) and its cholinesterase-inhibiting metabolites.  
 Phosalone (*S*-(6-chloro-3-mercaptomethyl)-2-benzoxazolinone) *O,O*-diethyl phosphorodithioate).  
 Phosphamidon (2-chloro-2-diethylcarbamoyl-1-methylvinyl dimethyl phosphate) includ-

ing all of its related cholinesterase-inhibiting compounds.  
 Pirimiphos-methyl *O*-[2-diethylamino-6-methyl-pyrimidinyl] *O,O*-dimethyl phosphorothioate.  
 Ronnel.  
 Schradan (octamethylpyrophosphoramidate).  
 Tetraethyl pyrophosphate.  
*O,O,O',O'*-Tetramethyl *O,O'*-sulfinyl-di-*p*-phenylene phosphorothioate.  
*O,O,O',O'*-Tetramethyl *O,O'*-thiodi-*p*-phenylene phosphorothioate.  
 Tributyl phosphorotritioite.  
*S,S,S*-Tributyl phosphorothrithioate.  
 3,4,5-Trimethylphenyl methylcarbamate and its isomer 2,3,5-trimethylphenyl methylcarbamate.

(6) The following pesticides are members of the class of dinitrophenols:

2,4-Dinitro-6-octylphenyl crotonate and 2,6-dinitro-4-octylphenyl crotonate, mixture of.  
 4,6-Dinitro-*o*-cresol and its sodium salt.  
 Dinoseb (2-*sec*-butyl-4,6-dinitrophenol) and its alkanolamine, ammonium, and sodium salts.

[41 FR 8969, Mar. 2, 1976]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 180.3, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at [www.govinfo.gov](http://www.govinfo.gov).

### § 180.4 Exceptions.

The substances listed in this section are excepted from the definitions of "pesticide chemical" and "pesticide chemical residue" under FFDCA section 201(q)(3) and are therefore exempt from regulation under FFDCA section 402(a)(2)(B) and 408. These substances are subject to regulation by the Food and Drug Administration as food additives under FFDCA section 409.

(a) Inert ingredients in food packaging treated with a pesticide, when such inert ingredients are the components of the food packaging material (e.g. paper and paperboard, coatings, adhesives, and polymers).

(b) [Reserved]

[63 FR 10720, Mar. 4, 1998, as amended at 73 FR 54976, Sept. 24, 2008]

### § 180.5 Zero tolerances.

A zero tolerance means that no amount of the pesticide chemical may remain on the raw agricultural commodity when it is offered for shipment.

A zero tolerance for a pesticide chemical in or on a raw agricultural commodity may be established because, among other reasons:

(a) A safe level of the pesticide chemical in the diet of two different species of warm-blooded animals has not been reliably determined.

(b) The chemical is carcinogenic to or has other alarming physiological effects upon one or more of the species of the test animals used, when fed in the diet of such animals.

(c) The pesticide chemical is toxic, but is normally used at times when, or in such manner that, fruit, vegetables, or other raw agricultural commodities will not bear or contain it.

(d) All residue of the pesticide chemical is normally removed through good agricultural practice such as washing or brushing or through weathering or other changes in the chemical itself, prior to introduction of the raw agricultural commodity into interstate commerce.

**§ 180.6 Pesticide tolerances regarding milk, eggs, meat, and/or poultry; statement of policy.**

(a) When establishing tolerances for pesticide residues in or on raw agricultural commodities, consideration is always given to possible residues of those pesticide chemicals or their conversion products entering the diet of man through the ingestion of milk, eggs, meat, and/or poultry produced by animals fed agricultural products bearing such pesticide residues. In each instance an evaluation of all available data will result in a conclusion either:

(1) That finite residues will actually be incurred in these foods from feed use of the raw agricultural commodity including its byproducts; or

(2) That it is not possible to establish with certainty whether finite residues will be incurred, but there is a reasonable expectation of finite residues; or

(3) That it is not possible to establish with certainty whether finite residues will be incurred, but there is no reasonable expectation of finite residues.

(b) When the data show that finite residues will actually be incurred in milk, eggs, meat, and/or poultry, a tolerance will be established on the raw agricultural commodity used as feed

provided that tolerances can be established at the same time, on the basis of the toxicological and other data available, for the finite residues incurred in milk, eggs, meat, and/or poultry. When it is not possible to determine with certainty whether finite residues will be incurred in milk, eggs, meat, and/or poultry but there is a reasonable expectation of finite residues in light of data reflecting exaggerated pesticides levels in feeding studies, a tolerance will be established on the raw agricultural commodity provided that appropriate tolerances can be established at the same time, on the basis of the toxicological and other data available, for the finite residues likely to be incurred in these foods through the feed use of the raw agricultural commodity or its byproducts. When it is not possible to determine with certainty whether finite residues will be incurred in milk, eggs, meat, and/or poultry but there is no reasonable expectation of finite residues in light of data such as those reflecting exaggerated pesticide levels in feeding studies and those elucidating the biochemistry of the pesticide chemical in the animal, a tolerance may be established on the raw agricultural commodity without the necessity of a tolerance on food products derived from the animal.

(c) The principles outlined in paragraphs (a) and (b) of this section will also be followed with respect to tolerances for residues which will actually be incurred or are reasonably to be expected in milk, eggs, meat, and/or poultry by the use of pesticides directly on the animal or administered purposely in the feed or drinking water.

(d) Tolerances contemplated by paragraphs (a) and (b) of this section will in addition to toxicological considerations be conditioned on the availability of a practicable analytical method to determine the pesticide residue; that is, the method must be sensitive and reliable at the tolerance level or in special cases at a higher level where such level is deemed satisfactory and safe in light of the toxicity of the pesticide residue and of the unlikelihood of such residue exceeding the tolerance. The analytical methods to be used for enforcement purposes will be those set forth in the "Pesticide

Analytical Manual” (see § 180.101(c)). The sensitivities of these methods are expressed in that manual.

### Subpart B—Procedural Regulations

#### § 180.7 Petitions proposing tolerances or exemptions for pesticide residues in or on raw agricultural commodities or processed foods.

(a) Petitions to be filed with the Agency under the provisions of FFDCA section 408(d) shall be submitted in duplicate. If any part of the material submitted is in a foreign language, it shall be accompanied by an accurate and complete English translation. The petition shall be accompanied by an advance deposit for fees described in § 180.33. The petition shall state the petitioner's mail address to which notice of objection under FFDCA section 408(g)(2) may be sent. The petition must be signed by the petitioner or by his attorney or agent, or (if a corporation) by an authorized official.

(b) Petitions shall include the following information:

(1) An informative summary of the petition and of the data, information, and arguments submitted or cited in support of the petition. Both a paper and electronic copy of the summary should be submitted. The electronic copy should be formatted according to the Office of Pesticide Programs' current standard for electronic data submission as specified at <http://www.epa.gov/pesticides/regulating/registering/submissions/index.htm>.

(2) A statement that the petitioner agrees that such summary or any information it contains may be published as a part of the notice of filing of the petition to be published under FFDCA section 408(d)(3) and as a part of a proposed or final regulation issued under FFDCA section 408.

(3) The name, chemical identity, and composition of the pesticide chemical residue and of the pesticide chemical that produces the residue.

(4) Data showing the recommended amount, frequency, method, and time of application of the pesticide chemical.

(5) Full reports of tests and investigations made with respect to the

safety of the pesticide chemical, including full information as to the methods and controls used in conducting those tests and investigations.

(6) Full reports of tests and investigations made with respect to the nature and amount of the pesticide chemical residue that is likely to remain in or on the food, including a description of the analytical methods used. (See § 180.34 for further information about residue tests.)

(7) Proposed tolerances for the pesticide chemical residue if tolerances are proposed.

(8) Practicable methods for removing any amount of the residue that would exceed any proposed tolerance.

(9) A practical method for detecting and measuring the levels of the pesticide chemical residue in or on the food, or for exemptions, a statement why such a method is not needed.

(10) If the petition relates to a tolerance for a processed food, reports of investigations conducted using the processing method(s) used to produce that food.

(11) Such information as the Administrator may require to make the determination under FFDCA section 408(b)(2)(C).

(12) Such information as the Administrator may require on whether the pesticide chemical may have an effect in humans that is similar to an effect produced by a naturally occurring estrogen or other endocrine effects.

(13) Information regarding exposure to the pesticide chemical residue due to any tolerance or exemption already granted for such residue.

(14) Information concerning any maximum residue level established by the Codex Alimentarius Commission for the pesticide chemical residue addressed in the petition. If a Codex maximum residue level has been established for the pesticide chemical residue and the petitioner does not propose that this level be adopted, a statement explaining the reasons for this departure from the Codex level.

(15) Such other data and information as the Administrator requires by regulation to support the petition.

(16) Reasonable grounds in support of the petition.

(c) The data specified under paragraphs (b)(1) through (b)(16) of this section should be on separate sheets or sets of sheets, suitably identified. If such data have already been submitted with an earlier application, the present petition may incorporate it by reference to the earlier one.

(d) Except as noted in paragraph (e) of this section, a petition shall not be accepted for filing if any of the data prescribed by FFDCA section 408(d) are lacking or are not set forth so as to be readily understood. The availability to the public of information provided to, or otherwise obtained by, the Agency under this part shall be governed by part 2 of this chapter. The Administrator shall make the full text of the summary referenced in paragraph (b)(1) of this section available to the public in the public docket at <http://www.regulations.gov> no later than publication in the FEDERAL REGISTER of the notice of the petition filing.

(e) The Administrator shall notify the petitioner within 15 days after its receipt of acceptance or nonacceptance of a petition, and if not accepted the reasons therefor. If petitioner desires, the petitioner may supplement a deficient petition after notification as to deficiencies. If the petitioner does not wish to supplement or explain the petition and requests in writing that it be filed as submitted, the petition shall be filed and the petitioner so notified.

(f) A notice of the filing of a petition for a pesticide chemical residue tolerance that the Administrator determines has met the requirements of paragraph (b) of this section shall be published in the FEDERAL REGISTER by the Administrator within 30 days after such determination. The notice shall state the name of the pesticide chemical residue and the commodities for which a tolerance is sought and announce the availability of a description of the analytical methods available to the Administrator for the detection and measurement of the pesticide chemical residue with respect to which the petition is filed or shall set forth the petitioner's statement of why such a method is not needed. The notice shall explicitly reference the specific docket identification number in the public docket at [http://](http://www.regulations.gov)

[www.regulations.gov](http://www.regulations.gov) where the full text of the summary required in paragraph (b) of this section is located, and refer interested parties to this document for further information on the petition. The full text of the summary may be omitted from the notice.

(g) The Administrator may request a sample of the pesticide chemical at any time while a petition is under consideration. The Administrator shall specify in its request for a sample of the pesticide chemical, a quantity which it deems adequate to permit tests of analytical methods used to determine residues of the pesticide chemical and of methods proposed by the petitioner for removing any residues of the chemical that exceed the tolerance proposed.

(h) The Administrator shall determine, in accordance with the Act, whether to issue an order that establishes, modifies, or revokes a tolerance regulation (whether or not in accord with the action proposed by the petitioner), whether to publish a proposed tolerance regulation and request public comment thereon under § 180.29, or whether to deny the petition. The Administrator shall publish in the FEDERAL REGISTER such order or proposed regulation. After receiving comments on any proposed regulation, the Administrator may issue an order that establishes, modifies, or revokes a tolerance regulation. An order published under this section shall describe briefly how to submit objections and requests for a hearing under part 178 of this chapter. A regulation issued under this section shall be effective on the date of publication in the FEDERAL REGISTER unless otherwise provided in the regulation.

[70 FR 33360, June 8, 2005, as amended at 73 FR 75600, Dec. 12, 2008]

#### **§ 180.8 Withdrawal of petitions without prejudice.**

In some cases the Administrator will notify the petitioner that the petition, while technically complete, is inadequate to justify the establishment of a tolerance or the tolerance requested by petitioner. This may be due to the fact that the data are not sufficiently clear or complete. In such cases, the petitioner may withdraw the petition pending its clarification or the obtaining of

## Environmental Protection Agency

## § 180.30

additional data. This withdrawal may be without prejudice to a future filing. A deposit for fees as specified in §180.33 shall accompany the resubmission of the petition.

[70 FR 33361, June 8, 2005]

### § 180.9 Substantive amendments to petitions.

After a petition has been filed, the petitioner may submit additional information or data in support thereof, but in such cases the petition will be given a new filing date.

[70 FR 33361, June 8, 2005]

### § 180.29 Establishment, modification, and revocation of tolerance on initiative of Administrator.

(a) Upon the Administrator's own initiative, the Administrator may propose, under FFDCA section 408(e), the issuance of a regulation establishing a tolerance for a pesticide chemical or exempting it from the necessity of a tolerance, or a regulation modifying or revoking an existing tolerance or exemption.

(b) The Administrator shall provide a period of not less than 60 days for persons to comment on the proposed regulation, except that a shorter period for comment may be provided if the Administrator for good cause finds that it would be in the public interest to do so and states the reasons for the finding in the notice of proposed rulemaking.

(c) After reviewing any timely comments received, the Administrator may by order establish, modify, or revoke a tolerance regulation, which order and regulation shall be published in the FEDERAL REGISTER. An order published under this section shall state that persons may submit objections and requests for a hearing in the manner described in part 178 of this chapter.

(d) Any final regulation issued under this section shall be effective on the date of publication in the FEDERAL REGISTER unless otherwise provided in the regulation.

[70 FR 33361, June 8, 2005]

### § 180.30 Judicial review.

(a) Under FFDCA section 408(h), judicial review is available in the United

States Courts of Appeal as to the following actions:

(1) Regulations establishing general procedures and requirements under FFDCA section 408(e)(1)(C).

(2) Orders issued under FFDCA section 408(f)(1)(C) requiring the submission of data.

(3) Orders issued under FFDCA section 408(g)(2)(C) ruling on objections to establishment, modification, or revocation of a tolerance or exemption under FFDCA section 408(d)(4), or any regulation that is the subject of such an order. The underlying action here is Agency disposition of a petition seeking the establishment, modification, or revocation of a tolerance or exemption.

(4) Orders issued under FFDCA section 408(g)(2)(C) ruling on objections to the denial of a petition under FFDCA section 408(d)(4).

(5) Orders issued under FFDCA section 408(g)(2)(C) ruling on objections to the establishment, modification, suspension, or revocation of a tolerance or exemption under FFDCA section 408(e)(1)(A) or (e)(1)(B). The underlying action here is the establishment, modification, suspension, or revocation of a tolerance or exemption upon the initiative of EPA including EPA actions pursuant to FFDCA sections 408(b)(2)(B)(v), 408(b)(2)(E)(ii), 408(d)(4)(C)(ii), 408(l)(4), and 408(q)(1).

(6) Orders issued under FFDCA section 408(g)(2)(C) ruling on objections to the revocation or modification of a tolerance or exemption under FFDCA section 408(f)(2) for noncompliance with requirements for the submission of data.

(7) Orders issued under FFDCA section 408(g)(2)(C) ruling on objections to rules issued under FFDCA sections 408(n)(3) and 408(d) or (e) regarding determinations pertaining to State authority to establish regulatory limits on pesticide chemical residues.

(8) Orders issued under FFDCA section 408(g)(2)(C) ruling on objections to orders issued under FFDCA section 408(n)(5)(C) authorizing States to establish regulatory limits not identical to certain tolerances or exemptions.

(b) Any issue as to which review is or was obtainable under paragraph (a) of this section shall not be the subject of

## § 180.31

## 40 CFR Ch. I (7–1–25 Edition)

judicial review under any other provision of law. In part, this means that, for the Agency actions subject to the objection procedure in FFDCA section 408(g)(2), judicial review is not available unless an adversely affected party exhausts these objection procedures, and any petition procedures preliminary thereto.

[70 FR 33362, June 8, 2005]

### § 180.31 Temporary tolerances.

(a) A temporary tolerance (or exemption from a tolerance) established under the authority of FFDCA section 408(r) shall be deemed to be a tolerance (or exemption from the requirement of a tolerance) for the purposes of FFDCA section 408(a)(1) or (a)(2) and for the purposes of § 180.30.

(b) A request for a temporary tolerance or a temporary exemption from a tolerance by a person who has obtained or is seeking an experimental permit for a pesticide chemical under the Federal Insecticide, Fungicide, and Rodenticide Act shall be accompanied by such data as are available on subjects outlined in § 180.7(b) and an advance deposit to cover fees as provided in § 180.33.

(c) To obtain a temporary tolerance, a requestor must comply with the petition procedures specified in FFDCA section 408(d) and § 180.7 except as provided in this section.

(d) A temporary tolerance or exemption from a tolerance may be issued for a period designed to allow the orderly marketing of the raw agricultural commodities produced while testing a pesticide chemical under an experimental permit issued under authority of the Federal Insecticide, Fungicide, and Rodenticide Act if the Administrator concludes that the safety standard in FFDCA section 408(b)(2) or (c), as applicable, is met. Subject to the requirements of FFDCA section 408(e), a temporary tolerance or exemption from a tolerance may be revoked if the experimental permit is revoked, or may be revoked at any time if it develops that the application for a temporary tolerance contains a misstatement of a material fact or that new scientific data or experience with the pesticide chemical indicates that it does not meet the

safety standard in FFDCA section 408(b)(2) or (c), as applicable.

(e) Conditions under which a temporary tolerance is established shall include:

(1) A limitation on the amount of the chemical to be used on the designated crops permitted under the experimental permit.

(2) A limitation for the use of the chemical on the designated crops to bona fide experimental use by qualified persons as indicated in the experimental permit.

(3) A requirement that the person or firm which obtains the experimental permit for which the temporary tolerance is established will immediately inform the Environmental Protection Agency of any reports on findings from the experimental use that have a bearing on safety.

(4) A requirement that the person or firm which obtained the experimental permit for which the temporary tolerance is established will keep records of production, distribution, and performance for a period of 2 years and, on request, at any reasonable time, make these records available to any authorized officer or employee of the Environmental Protection Agency.

[70 FR 33362, June 8, 2005]

### § 180.32 Procedure for modifying and revoking tolerances or exemptions from tolerances.

(a) The Administrator on his/her own initiative may propose the issuance of a regulation modifying or revoking a tolerance for a pesticide chemical residue on raw agricultural commodities or processed foods or modifying or revoking an exemption from tolerance for such residue.

(b) Any person may file with the Administrator a petition proposing the issuance of a regulation modifying or revoking a tolerance or exemption from a tolerance for a pesticide chemical residue. The petition shall furnish reasonable grounds for the action sought. Reasonable grounds shall include an explanation showing wherein the person has a substantial interest in such tolerance or exemption from tolerance and an assertion of facts (supported by data if available) showing

## Environmental Protection Agency

## § 180.33

that new uses for the pesticide chemical have been developed or old uses abandoned, that new data are available as to toxicity of the chemical, or that experience with the application of the tolerance or exemption from tolerance may justify its modification or revocation. Evidence that a person has registered or has submitted an application for the registration of a pesticide under the Federal Insecticide, Fungicide, and Rodenticide Act will be regarded as evidence that the person has a substantial interest in a tolerance or exemption from the requirement of a tolerance for a pesticide chemical that consists in whole or in part of the pesticide. New data should be furnished in the form specified in § 180.7(b) for submitting petitions, as applicable.

(c) The procedures for completing action on an Administrator initiated proposal or a petition shall be those specified in §§ 180.29 and 180.7, as applicable.

[70 FR 33362, June 8, 2005]

### § 180.33 Fees.

(a) Each petition for the establishment of a new tolerance or a tolerance higher than already established, shall be accompanied by a fee of \$80,950, plus \$2,025 for each raw agricultural commodity more than nine on which the establishment of a tolerance is requested, except as provided in paragraphs (b), (d), and (h) of this section.

(b) Each petition for the establishment of a tolerance at a lower numerical level or levels than a tolerance already established for the same pesticide chemical, or for the establishment of a tolerance on additional raw agricultural commodities at the same numerical level as a tolerance already established for the same pesticide chemical, shall be accompanied by a fee of \$18,500 plus \$1,225 for each raw agricultural commodity on which a tolerance is requested.

(c) Each petition for an exemption from the requirement of a tolerance or repeal of an exemption shall be accompanied by a fee of \$14,925.

(d) Each petition or request for a temporary tolerance or a temporary exemption from the requirement of a tolerance shall be accompanied by a fee of \$32,325 except as provided in paragraph (e) of this section. A petition or

request to renew or extend such temporary tolerance or temporary exemption shall be accompanied by a fee of \$4,600.

(e) A petition or request for a temporary tolerance for a pesticide chemical which has a tolerance for other uses at the same numerical level or a higher numerical level shall be accompanied by a fee of \$16,075, plus \$1,225 for each raw agricultural commodity on which the temporary tolerance is sought.

(f) Each petition for revocation of a tolerance shall be accompanied by a fee of \$10,125. Such fee is not required when, in connection with the change sought under this paragraph, a petition is filed for the establishment of new tolerances to take the place of those sought to be revoked and a fee is paid as required by paragraph (a) of this section.

(g) If a petition or a request is not accepted for processing because it is technically incomplete, the fee, less \$2,025 for handling and initial review, shall be returned. If a petition is withdrawn by the petitioner after initial processing, but before significant Agency scientific review has begun, the fee, less \$2,025 for handling and initial review, shall be returned. If an unacceptable or withdrawn petition is resubmitted, it shall be accompanied by the fee that would be required if it were being submitted for the first time.

(h) Each petition for a crop group tolerance, regardless of the number of raw agricultural commodities involved, shall be accompanied by a fee equal to the fee required by the analogous category for a single tolerance that is not a crop group tolerance, *i.e.*, paragraphs (a) through (f) of this section, without a charge for each commodity where that would otherwise apply.

(i) Objections under section 408(d)(5) of the Act shall be accompanied by a filing fee of \$4,050.

(j) The person who files a petition for judicial review of an order under section 408(h) of the Act shall pay the costs of preparing the record on which the order is based unless the person has no financial interest in the petition for judicial review.

## § 180.34

## 40 CFR Ch. I (7–1–25 Edition)

(k) No fee under this section will be imposed on the Interregional Research Project Number 4 (IR-4 Program).

(l) The Administrator may waive or refund part or all of any fee imposed by this section if the Administrator determines in his or her sole discretion that such a waiver or refund will promote the public interest or that payment of the fee would work an unreasonable hardship on the person on whom the fee is imposed. A request for waiver or refund of a fee shall be submitted to the Office of Pesticide Programs' Document Processing Desk at the appropriate address as set forth in 40 CFR 150.17(a) or (b). A fee of \$2,025 shall accompany every request for a waiver or refund, as specified in paragraph (m) of this section, except that the fee under this paragraph shall not be imposed on any person who has no financial interest in any action requested by such person under paragraphs (a) through (j) of this section. The fee for requesting a waiver or refund shall be refunded if the request is granted.

(m) All deposits and fees required by the regulations in this part shall be paid by money order, bank draft, or certified check drawn to the order of the Environmental Protection Agency. All deposits and fees shall be forwarded to the Environmental Protection Agency, Headquarters Accounting Operations Branch, Office of Pesticide Programs (Tolerance Fees), P.O. Box 360277M, Pittsburgh, PA 15251. The payments should be specifically labeled "Tolerance Petition Fees" and should be accompanied only by a copy of the letter or petition requesting the tolerance. The actual letter or petition, along with supporting data, shall be forwarded within 30 days of payment to the Office of Pesticide Programs' Document Processing Desk at the appropriate address as set forth in 40 CFR 150.17(a) or (b). A petition will not be accepted for processing until the required fees have been submitted. A petition for which a waiver of fees has been requested will not be accepted for processing until the fee has been waived or, if the waiver has been denied, the proper fee is submitted after notice of denial. A request for waiver or refund will not be accepted after scientific review has begun on a petition.

(n) This fee schedule will be changed annually by the same percentage as the percent change in the Federal General Schedule (GS) pay scale. In addition, processing costs and fees will periodically be reviewed and changes will be made to the schedule as necessary. When automatic adjustments are made based on the GS pay scale, the new fee schedule will be published in the FEDERAL REGISTER as a final rule to become effective 30 days or more after publication, as specified in the rule. When changes are made based on periodic reviews, the changes will be subject to public comment.

(o) No fee required by this section shall be levied during the period beginning on October 1, 2003, and ending September 30, 2008.

[68 FR 24371, May 7, 2003, as amended at 69 FR 12544, Mar. 17, 2004; 70 FR 33363, June 8, 2005; 71 FR 35547, June 21, 2006]

### § 180.34 Tests on the amount of residue remaining.

(a) Data in a petition on the amount of residue remaining in or on a raw agricultural commodity should establish the residue that may remain when the pesticide chemical is applied according to directions registered under the Federal Insecticide, Fungicide, and Rodenticide Act, or according to directions contained in an application for registration. These data should establish the residues that may remain under conditions most likely to result in high residues on the commodity.

(b) The petition should establish the reliability of the residue data reported in it. Sufficient information should be submitted about the analytical method to permit competent analysts to apply it successfully.

(c) If the pesticide chemical is absorbed into a living plant or animal when applied (is systemic), residue data may be needed on each plant or animal on which a tolerance or exemption is requested.

(d) If the pesticide chemical is not absorbed into the living plant or animal when applied (is not systemic), it may be possible to make a reliable estimate of the residues to be expected on each commodity in a group of related commodities on the basis of less data than would be required for each

## Environmental Protection Agency

## § 180.40

commodity in the group, considered separately.

(e) Each of the following groups of crops lists raw agricultural commodities that are considered to be related for the purpose of paragraph (d) of this section. Commodities not listed in this paragraph are not considered to be related for the purpose of paragraph (d) of this section.

- (1) Apples, crabapples, pears, quinces.
- (2) Avocados, papayas.
- (3) Blackberries, boysenberries, dewberries, loganberries, raspberries.
- (4) Blueberries, currants, gooseberries, huckleberries.
- (5) Cherries, plums, prunes.
- (6) Oranges, citrus citron, grapefruit, kumquats, lemons, limes, tangelos, tangerines.
- (7) Mangoes, persimmons.
- (8) Peaches, apricots, nectarines.
- (9) Beans, peas, soybeans (each in dry form).
- (10) Beans, peas, soybeans (each in succulent form).
- (11) Broccoli, brussels sprouts, cauliflower, kohlrabi.
- (12) Cantaloups, honeydew melons, muskmelons, pumpkins, watermelons, winter squash.
- (13) Carrots, garden beets, sugar beets, horseradish, parsnips, radishes, rutabagas, salsify roots, turnips.
- (14) Celery, fennel.
- (15) Cucumbers, summer squash.
- (16) Lettuce, endive (escarole), Chinese cabbage, salsify tops.
- (17) Onions, garlic, leeks, shallots (green, or in dry bulb form).
- (18) Potatoes, Jerusalem-artichokes, sweetpotatoes, yams.
- (19) Spinach, beet tops, collards, dandelion, kale, mustard greens, parsley, Swiss chard, turnip tops, watercress.
- (20) Tomatoes, eggplants, peppers, pimentos.
- (21) Pecans, almonds, brazil nuts, bush nuts, butternuts, chestnuts, filberts, hazelnuts, hickory nuts, walnuts.
- (22) Field corn, popcorn, sweet corn (each in grain form).
- (23) Milo, sorghum (each in grain form).
- (24) Wheat, barley, oats, rice, rye (each in grain form).
- (25) Alfalfa, Bermuda grass, bluegrass, brome grass, clovers, cowpea

hay, fescue, lespedeza, lupines, orchard grass, peanut hay, peavine hay, rye grass, soybean hay, sudan grass, timothy, and vetch.

(26) Corn forage, sorghum forage.

(27) Sugarcane, cane sorghum.

### § 180.35 Tests for potentiation.

Experiments have shown that certain cholinesterase-inhibiting pesticides when fed together to test animals are more toxic than the sum of their individual toxicities when fed separately. One substance potentiates the toxicity of the other. Important toxicological interactions also have been observed between pesticides and other substances. Wherever there is reason to believe that a pesticide chemical for which a tolerance is proposed may interact with other pesticide chemicals or other substances to which man is exposed, it may be necessary to require special experimental data regarding potentiation capacities to evaluate the safety of the proposed tolerance. This necessarily will be determined on a case-by-case basis.

### § 180.40 Tolerances for crop groups.

(a) Group or subgroup tolerances may be established as a result of:

(1) A petition from a person who has submitted an application for the registration of a pesticide under the Federal Insecticide, Fungicide, and Rodenticide Act.

(2) On the initiative of the Administrator.

(3) A petition by an interested person.

(b) The tables in §180.41 are to be used in conjunction with this section for the establishment of crop group tolerances. Each table in §180.41 lists a group of raw agricultural commodities that are considered to be related for the purposes of this section. Refer also to §180.1(g) for a listing of commodities for which established tolerances may be applied to certain other related and similar commodities.

(c) When there is an established or proposed tolerance for all of the representative commodities for a specific group or subgroup of related commodities, a tolerance may be established for all commodities in the associated group or subgroup. Tolerances may be established for a crop group or, alternatively, tolerances may be established for one or more of the subgroups of a crop group.

(d) The representative crops are given as an indication of the minimum residue chemistry data base acceptable to the Agency for the purposes of establishing a group tolerance. The Agency may, at its discretion, allow group tolerances when data on suitable substitutes for the representative crops are available (e.g., limes instead of lemons).

(e) Since a group tolerance reflects maximum residues likely to occur on all individual crops within a group, the proposed or registered patterns of use for all crops in the group or subgroup must be similar before a group tolerance is established. The pattern of use consists of the amount of pesticide applied, the number of times applied, the timing of the first application, the interval between applications, and the interval between the last application and harvest. The pattern of use will also include the type of application; for example, soil or foliar application, or application by ground or aerial equipment. Additionally, since a group tolerance reflects maximum residues likely to occur on all individual foods within a group, food processing practices must be similar for all crops in the group or subgroup if the processing practice has the potential to result in residues in a processed commodity at a higher concentration than the raw agricultural commodity.

(f)(1) *General.* EPA will not establish a crop group for a pesticide unless all tolerances made necessary by the presence of pesticide residues in the crop group commodities have been issued or are being issued simultaneously with the crop group tolerance. For purposes of paragraph (f)(1):

(i) Necessary tolerances for residues resulting from crop group tolerances include:

(A) Tolerances for processed food, including processed animal feed, to the extent needed under FFDCA section 408(a)(2).

(B) Tolerances for raw commodities not covered by the crop group tolerance that are derivative of commodities in the group.

(C) Tolerances for meat, milk, or egg products that may contain residues as a result of livestock's consumption of animal feed containing pesticide residues to the extent needed under § 180.6(b).

(ii) Notwithstanding the foregoing, a tolerance is not considered necessary for processed food, derivative raw commodities, or meat, milk, and eggs if the precursor raw commodities are grown solely for sale as raw commodities and are completely segregated from commodities grown for the purpose of producing processed foods, derivative raw commodities, and commodities, or fractions thereof, that are used as animal feed.

(2) *Processed commodity and related raw commodity crop group tolerances.* EPA may establish crop group tolerances for processed commodities or fractions of commodities (e.g., bran and flour from the Cereal Grains Group), including processed fractions used as animal feed (e.g., pomace from the Pome Fruit Group), produced from crops in the crop groups in § 180.41. EPA may establish crop group tolerances for raw commodities or fractions of commodities, including fractions used as animal feed, derived from commodities covered by the crop groups in § 180.41 (e.g., aspirated grain dust associated with the Cereal Grains Group). Crop group tolerances on processed foods and derivative raw commodities may be based on data on representative commodities for associated crop group. Paragraphs (c), (d), (e), (g), and (h) of § 180.40 apply to group tolerances authorized by paragraph (f)(2).

(3) *Representative crops.* Unless indicated otherwise in §§ 180.40 and 180.41, the processed food and feed forms of the representative crops for a crop group are considered to be representative of the processed food and feed forms and any derivative raw commodities not covered by the crop group, that are produced from any of the raw

agricultural commodities covered by the crop group tolerance. Additionally, unless indicated otherwise in §§180.40 and 180.41, representative commodities for such crop groups are selected taking into consideration whether their use as animal feed will result in residues in or on meat, milk, and/or eggs at a level representative of the residues that would result from use of the other commodities or byproducts in the crop group as an animal feed.

(4) *Data.* Processing data on representative crops are required prior to establishment of a group tolerance if the processing of the representative commodity has the potential to result in residues in a processed commodity at a higher concentration than in the representative commodity. Residue data are required on raw commodities derived from the crops in the crop group tolerance but not directly covered by the tolerance. Animal feeding studies with a representative crop are required if the representative crop is used as a significant animal feed.

(g) If maximum residues (tolerances) for the representative crops vary by more than a factor of 5 from the maximum value observed for any crop in the group, a group or subgroup tolerance will ordinarily not be established. In this case individual crop tolerances, rather than group tolerances, will normally be established.

(h) Alternatively, a commodity with a residue level significantly higher or lower than the other commodities in a group may be excluded from the group tolerance (e.g., cereal grains, except corn). In this case an individual tolerance at the appropriate level for the unique commodity would be established, if necessary. The alternative approach of excluding a commodity with a significantly higher or lower residue level will not be used to establish a tolerance for a commodity subgroup. Most subgroups have only two representative commodities; to exclude one such commodity and its related residue data would likely provide insufficient residue information to support the remainder of the subgroup. Residue data from crops additional to those representative crops in a grouping may be required for systemic pesticides.

(i) The commodities included in the groups will be updated periodically either at the initiative of the Agency or at the request of an interested party. Persons interested in updating this section should contact the Registration Division of the Office of Pesticide Programs.

(j)(1) When EPA amends a crop group in a manner that expands or contracts the commodities that are covered by the group, EPA will initially retain the pre-existing as well as the revised crop group in the CFR.

(2) Where the revised crop group has the same number as the pre-existing crop group, the revised crop group number will be followed by a hyphen and the final two digits of the year in which it was established (e.g., if Crop Group 1 is amended in 2007, the revised group will be designated as Crop Group 1-07). If the pre-existing crop group had crop subgroups, these subgroups will be numbered in a similar fashion in the revised crop group. The name of the revised crop group will not be changed from the pre-existing crop group unless the revision so changes the composition of the crop group that the pre-existing name is no longer accurate.

(3) Where EPA amends a crop group by creating one or more different crop groups, the revised crop groups will have different numbers and names (e.g., the amendment of Crop Group 19 through the creation of Crop Groups 25 and 26). The pre-existing crop group will be amended to identify the revised crop group(s).

(4) Once a revised crop group is established, EPA will no longer establish tolerances under the pre-existing crop group. At appropriate times, EPA will amend tolerances for crop groups that have been superseded by revised crop groups to conform the pre-existing crop group to the revised crop group. Once all of the tolerances for the pre-existing crop group have been updated, the pre-existing crop group will be removed from the CFR.

(k) Establishment of a tolerance does not substitute for the additional need to register the pesticide under a companion law, the Federal Insecticide, Fungicide, and Rodenticide Act. The Registration Division of the Office of

## § 180.41

## 40 CFR Ch. I (7–1–25 Edition)

Pesticide Programs should be contacted concerning procedures for registration of new uses of a pesticide.

### § 180.41 Crop group tables.

(a) The tables in this section are to be used in conjunction with §180.40 to establish crop group tolerances.

(b) Commodities not listed are not considered as included in the groups for the purposes of paragraph (b), and individual tolerances must be established. Miscellaneous commodities intentionally not included in any group include globe artichoke, hops, peanut, and water chestnut.

(c) Each group is identified by a group name and consists of a list of representative commodities followed by a list of all commodity members for the group. If the group includes subgroups, each subgroup lists the subgroup name, the representative commodity or commodities, and the member commodities for the subgroup. Subgroups, which are a subset of their associated crop group, are established for some but not all crops groups.

(1) *Crop Group 1: Root and Tuber Vegetables Group.*

(i) *Representative commodities.* Carrot, potato, radish, and sugar beet.

(ii) *Table.* The following table 1 lists all the commodities included in Crop Group 1 and identifies the related crop subgroups.

TABLE 1—CROP GROUP 1: ROOT AND TUBER VEGETABLES

| Commodities                                                                        | Related crop subgroups |
|------------------------------------------------------------------------------------|------------------------|
| Arracacha ( <i>Arracacia xanthorrhiza</i> )                                        | 1C, 1D                 |
| Arrowroot ( <i>Maranta arundinacea</i> )                                           | 1C, 1D                 |
| Artichoke, Chinese ( <i>Stachys affinis</i> )                                      | 1C, 1D                 |
| Artichoke, Jerusalem ( <i>Helianthus tuberosus</i> )                               | 1C, 1D                 |
| Beet, garden ( <i>Beta vulgaris</i> )                                              | 1A, 1B                 |
| Beet, sugar ( <i>Beta vulgaris</i> )                                               | 1A                     |
| Burdock, edible ( <i>Arctium lappa</i> )                                           | 1A, 1B                 |
| Canna, edible (Queensland arrowroot) ( <i>Canna indica</i> )                       | 1C, 1D                 |
| Carrot ( <i>Daucus carota</i> )                                                    | 1A, 1B                 |
| Cassava, bitter and sweet ( <i>Manihot esculenta</i> )                             | 1C, 1D                 |
| Celeriac (celery root) ( <i>Apium graveolens</i> var. <i>rapaceum</i> )            | 1A, 1B                 |
| Chayote (root) ( <i>Sechium edule</i> )                                            | 1C, 1D                 |
| Chervil, turnip-rooted ( <i>Chaerophyllum bulbosum</i> )                           | 1A, 1B                 |
| Chicory ( <i>Cichorium intybus</i> )                                               | 1A, 1B                 |
| Chufa ( <i>Cyperus esculentus</i> )                                                | 1C, 1D                 |
| Dasheen (taro) ( <i>Colocasia esculenta</i> )                                      | 1C, 1D                 |
| Ginger ( <i>Zingiber officinale</i> )                                              | 1C, 1D                 |
| Ginseng ( <i>Panax quinquefolius</i> )                                             | 1A, 1B                 |
| Horseradish ( <i>Armoracia rusticana</i> )                                         | 1A, 1B                 |
| Leren ( <i>Calathea allouia</i> )                                                  | 1C, 1D                 |
| Parsley, turnip-rooted ( <i>Petroselinum crispum</i> var. <i>tuberosum</i> )       | 1A, 1B                 |
| Parsnip ( <i>Pastinaca sativa</i> )                                                | 1A, 1B                 |
| Potato ( <i>Solanum tuberosum</i> )                                                | 1C                     |
| Radish ( <i>Raphanus sativus</i> )                                                 | 1A, 1B                 |
| Radish, oriental (daikon) ( <i>Raphanus sativus</i> subvar. <i>longipinnatus</i> ) | 1A, 1B                 |
| Rutabaga ( <i>Brassica campestris</i> var. <i>napobrassica</i> )                   | 1A, 1B                 |
| Salsify (oyster plant) ( <i>Tragopogon porrifolius</i> )                           | 1A, 1B                 |
| Salsify, black ( <i>Scorzonera hispanica</i> )                                     | 1A, 1B                 |
| Salsify, Spanish ( <i>Scolymus hispanicus</i> )                                    | 1A, 1B                 |
| Skirret ( <i>Sium sisarum</i> )                                                    | 1A, 1B                 |
| Sweet potato ( <i>Ipomoea batatas</i> )                                            | 1C, 1D                 |
| Tanier (cocoyam) ( <i>Xanthosoma sagittifolium</i> )                               | 1C, 1D                 |
| Turmeric ( <i>Curcuma longa</i> )                                                  | 1C, 1D                 |
| Turnip ( <i>Brassica rapa</i> var. <i>rapa</i> )                                   | 1A, 1B                 |
| Yam bean (jicama, manioc pea) ( <i>Pachyrhizus</i> spp.)                           | 1C, 1D                 |
| Yam, true ( <i>Dioscorea</i> spp.)                                                 | 1C, 1D                 |

(iii) *Table.* The following table 2 identifies the crop subgroups for Crop Group 1, specifies the representative

commodity(ies) for each subgroup, and lists all the commodities included in each subgroup.

TABLE 2—CROP GROUP 1 SUBGROUP LISTING

| Representative commodities                                                      | Commodities                                                                                                                                                                                                                                           |
|---------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Crop Subgroup 1A.</b> Root vegetables subgroup.                              |                                                                                                                                                                                                                                                       |
| Carrot, radish, and sugar beet. ....                                            | Beet, garden; beet, sugar; burdock, edible; carrot; celeriac; chervil, turnip-rooted; chicory; ginseng; horseradish; parsley, turnip-rooted; parsnip; radish; radish, oriental; rutabaga; salsify; salsify, black; salsify, Spanish; skirret; turnip. |

| Potato. ....                                                                    | Arracacha; arrowroot; artichoke, Chinese; artichoke, Jerusalem; canna, edible; cassava, bitter and sweet; chayote (root); chufa; dasheen; ginger; leren; potato; sweet potato; taniar; turmeric; yam bean; yam, true.                                 |
| <b>Crop Subgroup 1D.</b> Tuberous and corn vegetables (except potato) subgroup. |                                                                                                                                                                                                                                                       |
| Sweet potato. ....                                                              | Arracacha; arrowroot; artichoke, Chinese; artichoke, Jerusalem; canna, edible; cassava, bitter and sweet; chayote (root); chufa; dasheen; ginger; leren; sweet potato; taniar; turmeric; yam bean; yam, true.                                         |

(2) *Crop Group 2.* Leaves of Root and Tuber Vegetables (Human Food or Animal Feed) Group (Human Food or Animal Feed) Group.

(i) *Representative commodities.* Turnip and garden beet or sugar beet.

(ii) *Commodities.* The following is a list of all the commodities included in Crop Group 2:

CROP GROUP 2: LEAVES OF ROOT AND TUBER VEGETABLES (HUMAN FOOD OR ANIMAL FEED) GROUP—COMMODITIES

Beet, garden (*Beta vulgaris*)  
 Beet, sugar (*Beta vulgaris*)  
 Burdock, edible (*Arctium lappa*)  
 Carrot (*Daucus carota*)  
 Cassava, bitter and sweet (*Manihot esculenta*)  
 Celeriac (celery root) (*Apium graveolens* var. *rapaceum*)  
 Chervil, turnip-rooted (*Chaerophyllum bulbosum*)  
 Chicory (*Cichorium intybus*)  
 Dasheen (taro) (*Colocasia esculenta*)  
 Parsnip (*Pastinaca sativa*)  
 Radish (*Raphanus sativus*)  
 Radish, oriental (daikon) (*Raphanus sativus* subvar. *longipinnatus*)  
 Rutabaga (*Brassica campestris* var. *napobrassica*)  
 Salsify, black (*Scorzonera hispanica*)

Sweet potato (*Ipomoea batatas*)

Tanier (cocoyam) (*Xanthosoma sagittifolium*)

Turnip (*Brassica rapa* var. *rapa*)

Yam, true (*Dioscorea* spp.)

(3) *Crop Group 3.* Bulb Vegetables (*Allium* spp.) Group.

(i) *Representative commodities.* Onion, green; and onion, dry bulb.

(ii) *Commodities.* The following is a list of all the commodities in Crop Group 3.

CROP GROUP 3: BULB VEGETABLE (*Allium* spp.) GROUP—COMMODITIES

Garlic, bulb (*Allium sativum*)  
 Garlic, great headed, (elephant) (*Allium ampeloprasum* var. *ampeloprasum*)  
 Leek (*Allium ampeloprasum*, *A. porrum*, *A. tricoccum*)  
 Onion, dry bulb and green (*Allium cepa*, *A. fistulosum*)  
 Onion, Welsh, (*Allium fistulosum*)  
 Shallot (*Allium cepa* var. *cepa*)

(4) *Crop Group 3-07.* Bulb Vegetable Group.

(i) *Representative Commodities.* Onion, bulb and onion, green.

(ii) *Table.* The following Table 1 lists all the commodities listed in Crop Group 3-07 and identifies the related crop subgroups.

TABLE 1—CROP GROUP 3-07: BULB VEGETABLE GROUP

| Commodities                                                                                                  | Related crop subgroups |
|--------------------------------------------------------------------------------------------------------------|------------------------|
| Chive, fresh leaves ( <i>Allium schoenoprasum</i> L.) .....                                                  | 3-07B                  |
| Chive, Chinese, fresh leaves ( <i>Allium tuberosum</i> Rottler ex Spreng) .....                              | 3-07B                  |
| Daylily, bulb ( <i>Hemerocallis fulva</i> (L.) L. var. <i>fulva</i> ) .....                                  | 3-07A                  |
| Elegans hosta ( <i>Hosta Sieboldiana</i> (Hook.) Engl) .....                                                 | 3-07B                  |
| Fritillaria, bulb ( <i>Fritillaria L. fritillaria</i> ) .....                                                | 3-07A                  |
| Fritillaria, leaves ( <i>Fritillaria L. fritillaria</i> ) .....                                              | 3-07B                  |
| Garlic, bulb ( <i>Allium sativum</i> L. var. <i>sativum</i> ) ( <i>A. sativum</i> Common Garlic Group) ..... | 3-07A                  |

TABLE 1—CROP GROUP 3-07: BULB VEGETABLE GROUP—Continued

| Commodities                                                                                                                                                                                                                                               | Related crop subgroups |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|
| Garlic, great headed, bulb ( <i>Allium ampeloprasum</i> L. var. <i>ampeloprasum</i> ) ( <i>A. ampeloprasum</i> Great Headed Garlic Group) .....                                                                                                           | 3-07A                  |
| Garlic, Serpent, bulb ( <i>Allium sativum</i> var. <i>ophioscorodon</i> or <i>A. sativum</i> Ophioscorodon Group) .....                                                                                                                                   | 3-07A                  |
| Kurrrat ( <i>Allium kurrrat</i> Schweinf. Ex. K. Krause or <i>A. ampeloprasum</i> Kurrrat Group) .....                                                                                                                                                    | 3-07B                  |
| Lady's leek ( <i>Allium cernuum</i> Roth) .....                                                                                                                                                                                                           | 3-07B                  |
| Leek <i>Allium porrum</i> L. (syn: <i>A. ampeloprasum</i> L. var. <i>porrum</i> (L.) J. Gay) ( <i>A. ampeloprasum</i> Leek Group) .....                                                                                                                   | 3-07B                  |
| Leek, wild ( <i>Allium tricoccum</i> Aiton) .....                                                                                                                                                                                                         | 3-07B                  |
| Lily, bulb ( <i>Lilium</i> spp. ( <i>Lilium Leichtlinii</i> var. <i>maximowiczii</i> , <i>Lilium lancifolium</i> )) .....                                                                                                                                 | 3-07A                  |
| Onion, Beltsville bunching ( <i>Allium x proliferum</i> (Moench) Schrad.) (syn: <i>Allium fistulosum</i> L. x <i>A. cepa</i> L.) .....                                                                                                                    | 3-07B                  |
| Onion, bulb ( <i>Allium cepa</i> L. var. <i>cepa</i> ) ( <i>A. cepa</i> Common Onion Group) .....                                                                                                                                                         | 3-07A                  |
| Onion, Chinese, bulb ( <i>Allium chinense</i> G. Don.) (syn: <i>A. bakeri</i> Regel) .....                                                                                                                                                                | 3-07A                  |
| Onion, fresh ( <i>Allium fistulosum</i> L. var. <i>caespitosum</i> Makino) .....                                                                                                                                                                          | 3-07B                  |
| Onion, green ( <i>Allium cepa</i> L. var. <i>cepa</i> ) ( <i>A. cepa</i> Common Onion Group) .....                                                                                                                                                        | 3-07B                  |
| Onion, macrostem ( <i>Allium macrostemom</i> Bunge) .....                                                                                                                                                                                                 | 3-07B                  |
| Onion, pearl ( <i>Allium porrum</i> var. <i>sectivum</i> or <i>A. ampeloprasum</i> Pearl Onion Group) .....                                                                                                                                               | 3-07A                  |
| Onion, potato, bulb ( <i>Allium cepa</i> L. var. <i>aggregatum</i> G. Don.) ( <i>A. cepa</i> Aggregatum Group) .....                                                                                                                                      | 3-07A                  |
| Onion, tree, tops ( <i>Allium x proliferum</i> (Moench) Schrad. ex Willd.) (syn: <i>A. cepa</i> var. <i>proliferum</i> (Moench) Regel; <i>A. cepa</i> L. var. <i>bulbiferum</i> L.H. Bailey; <i>A. cepa</i> L. var. <i>viviparum</i> (Metz.) Alef.) ..... | 3-07B                  |
| Onion, Welsh, tops ( <i>Allium fistulosum</i> L.) .....                                                                                                                                                                                                   | 3-07B                  |
| Shallot, bulb ( <i>Allium cepa</i> var. <i>aggregatum</i> G. Don.) .....                                                                                                                                                                                  | 3-07A                  |
| Shallot, fresh leaves ( <i>Allium cepa</i> var. <i>aggregatum</i> G. Don.) .....                                                                                                                                                                          | 3-07B                  |
| Cultivars, varieties, and/or hybrids of these .....                                                                                                                                                                                                       |                        |

(iii) *Table.* The following Table 2 commodities for each subgroup and identifies the crop subgroups for Crop lists all the commodities included in Group 3-07, specifies the representative each subgroup.

TABLE 2—CROP GROUP 3-07: SUBGROUP LISTING

| Representative commodities                           | Commodities                                                                                                                                                                                                                                                                                                           |
|------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Crop subgroup 3-07A.</b> Onion, bulb, sub-group.  | Daylily, bulb; fritillaria, bulb; garlic, bulb; garlic, great-headed, bulb; garlic, serpent, bulb; lily, bulb; onion, bulb; onion, Chinese, bulb; onion, pearl; onion, potato, bulb; shallot, bulb; cultivars, varieties, and/or hybrids of these.                                                                    |
| <b>Crop subgroup 3-07B.</b> Onion, green, sub-group. | Chive, fresh leaves; chive, Chinese, fresh leaves; elegans hosta; fritillaria, leaves; kurrrat; lady's leek; leek; leek, wild; Onion, Beltsville bunching; onion, fresh; onion, green; onion, macrostem; onion, tree, tops; onion, Welsh, tops; shallot, fresh leaves; cultivars, varieties, and/or hybrids of these. |
| Onion, green. ....                                   |                                                                                                                                                                                                                                                                                                                       |

(5) *Crop Group 4.* Leafy Vegetables (Except *Brassica* Vegetables) Group.

(i) *Representative commodities.* Celery, head lettuce, leaf lettuce, and spinach (*Spinacia oleracea*).

(ii) *Table.* The following table 1 lists all the commodities included in Crop Group 4 and identifies the related crop subgroups.

TABLE 1—CROP GROUP 4: LEAFY VEGETABLES (EXCEPT BRASSICA VEGETABLES) GROUP

| Commodities                                                                                   | Related crop subgroups |
|-----------------------------------------------------------------------------------------------|------------------------|
| Amaranth (leafy amaranth, Chinese spinach, tampala) ( <i>Amaranthus</i> spp.) .....           | 4A                     |
| Arugula (Rocket) ( <i>Eruca sativa</i> ) .....                                                | 4A                     |
| Cardoon ( <i>Cynara cardunculus</i> ) .....                                                   | 4B                     |
| Celery ( <i>Apium graveolens</i> var. <i>dulce</i> ) .....                                    | 4B                     |
| Celery, Chinese ( <i>Apium graveolens</i> var. <i>secalinum</i> ) .....                       | 4B                     |
| Celtuce ( <i>Lactuca sativa</i> var. <i>angustana</i> ) .....                                 | 4B                     |
| Chervil ( <i>Anthriscus cerefolium</i> ) .....                                                | 4A                     |
| Chrysanthemum, edible-leaved ( <i>Chrysanthemum coronarium</i> var. <i>coronarium</i> ) ..... | 4A                     |
| Chrysanthemum, garland ( <i>Chrysanthemum coronarium</i> var. <i>spatiosum</i> ) .....        | 4A                     |
| Corn salad ( <i>Valerianella locusta</i> ) .....                                              | 4A                     |
| Cress, garden ( <i>Lepidium sativum</i> ) .....                                               | 4A                     |
| Cress, upland (yellow rocket, winter cress) ( <i>Barbarea vulgaris</i> ) .....                | 4A                     |
| Dandelion ( <i>Taraxacum officinale</i> ) .....                                               | 4A                     |

TABLE 1—CROP GROUP 4: LEAFY VEGETABLES (EXCEPT BRASSICA VEGETABLES) GROUP—Continued

| Commodities                                                                         | Related crop subgroups |
|-------------------------------------------------------------------------------------|------------------------|
| Dock (sorrel) ( <i>Rumex</i> spp.) .....                                            | 4A                     |
| Endive (escarole) ( <i>Cichorium endivia</i> ) .....                                | 4A                     |
| Fennel, Florence (finocchio) ( <i>Foeniculum vulgare</i> Azoricum Group) .....      | 4B                     |
| Lettuce, head and leaf ( <i>Lactuca sativa</i> ) .....                              | 4A                     |
| Orach ( <i>Atriplex hortensis</i> ) .....                                           | 4A                     |
| Parsley ( <i>Petroselinum crispum</i> ) .....                                       | 4A                     |
| Purslane, garden ( <i>Portulaca oleracea</i> ) .....                                | 4A                     |
| Purslane, winter ( <i>Montia perfoliata</i> ) .....                                 | 4A                     |
| Radicchio (red chicory) ( <i>Cichorium intybus</i> ) .....                          | 4A                     |
| Rhubarb ( <i>Rheum rhabarbarum</i> ) .....                                          | 4B                     |
| Spinach ( <i>Spinacia oleracea</i> ) .....                                          | 4A                     |
| Spinach, New Zealand ( <i>Tetragonia tetragonioides</i> , <i>T. expansa</i> ) ..... | 4A                     |
| Spinach, vine (Malabar spinach, Indian spinach) ( <i>Basella alba</i> ) .....       | 4A                     |
| Swiss chard ( <i>Beta vulgaris</i> var. <i>cicla</i> ) .....                        | 4B                     |

(iii) *Table*. The following table 2 identifies the crop subgroups for Crop Group 4, specifies the representative commodities for each subgroup, and lists all the commodities included in each subgroup.

TABLE 2—CROP GROUP 4 SUBGROUP LISTING

| Representative commodities                                                                                                  | Commodities                                                                                                                                                                                                                                                                              |
|-----------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Crop Subgroup 4A.</b> Leafy greens subgroup.<br>Head lettuce and leaf lettuce, and spinach ( <i>Spinacia oleracea</i> ). | Amaranth; arugula; chervil; chrysanthemum, edible-leaved; chrysanthemum, garland; corn salad; cress, garden; cress, upland; dandelion; dock; endive; lettuce; orach; parsley; purslane, garden; purslane, winter; radicchio (red chicory); spinach; spinach, New Zealand; spinach, vine. |
| <b>Crop Subgroup 4B.</b> Leaf petioles subgroup.<br>Celery. ....                                                            | Cardoon; celery; celery, Chinese; celtuce; fennel, Florence; rhubarb; Swiss chard.                                                                                                                                                                                                       |

(6) *Crop Group 4–16.* Leafy Vegetable Group. (ii) *Commodities*. The following Table 1 lists all commodities included in Crop Group 4–16.

(i) *Representative commodities*. Head lettuce, leaf lettuce, mustard greens, and spinach.

TABLE 1—CROP GROUP 4–16: LEAFY VEGETABLE GROUP

| Commodities                                                                                           | Related crop subgroups |
|-------------------------------------------------------------------------------------------------------|------------------------|
| Amaranth, Chinese ( <i>Amaranthus tricolor</i> L.) .....                                              | 4–16A                  |
| Amaranth, leafy ( <i>Amaranthus</i> spp.) .....                                                       | 4–16A                  |
| Arugula ( <i>Eruca sativa</i> Mill.) .....                                                            | 4–16B                  |
| Aster, Indian ( <i>Kalimeris indica</i> (L.) Sch. Bip.) .....                                         | 4–16A                  |
| Blackjack ( <i>Bidens pilosa</i> L.) .....                                                            | 4–16A                  |
| Broccoli, Chinese ( <i>Brassica oleracea</i> var. <i>alboglabra</i> (L.H. Bailey) Musil) .....        | 4–16B                  |
| Broccoli raab ( <i>Brassica ruvo</i> L.H. Bailey) .....                                               | 4–16B                  |
| Cabbage, abyssinian ( <i>Brassica carinata</i> A. Braun) .....                                        | 4–16B                  |
| Cabbage, Chinese, bok choy ( <i>Brassica rapa</i> subsp. <i>chinensis</i> (L.) Hanelt) .....          | 4–16B                  |
| Cabbage, seakale ( <i>Brassica oleracea</i> L. var. <i>costata</i> DC.) .....                         | 4–16B                  |
| Cat's whiskers ( <i>Cleome gynandra</i> L.) .....                                                     | 4–16A                  |
| Cham-chwi ( <i>Doellingeria scabra</i> (Thunb.) Nees) .....                                           | 4–16A                  |
| Cham-na-mul ( <i>Pimpinella calycina</i> Maxim) .....                                                 | 4–16A                  |
| Chervil, fresh leaves ( <i>Anthriscus cerefolium</i> (L.) Hoffm.) .....                               | 4–16A                  |
| Chipilin ( <i>Crotalaria longirostrata</i> Hook & Arn) .....                                          | 4–16A                  |
| Chrysanthemum, garland ( <i>Glebionis coronaria</i> (L.) Cass. ex Spach. <i>Glebionis</i> spp.) ..... | 4–16A                  |
| Cilantro, fresh leaves ( <i>Coriandrum sativum</i> L.) .....                                          | 4–16A                  |
| Collards ( <i>Brassica oleracea</i> L. var. <i>viridis</i> L.) .....                                  | 4–16B                  |
| Corn salad ( <i>Valerianella</i> spp.) .....                                                          | 4–16A                  |
| Cosmos ( <i>Cosmos caudatus</i> Kunth) .....                                                          | 4–16A                  |

TABLE 1—CROP GROUP 4–16: LEAFY VEGETABLE GROUP—Continued

| Commodities                                                                                                                                                                                                                                              | Related crop subgroups |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|
| Cress, garden ( <i>Lepidium sativum</i> L.) .....                                                                                                                                                                                                        | 4–16B                  |
| Cress, upland ( <i>Barbarea vulgaris</i> W.T. Aiton) .....                                                                                                                                                                                               | 4–16B                  |
| Dandelion, leaves ( <i>Taraxacum officinale</i> F.H. Wigg. Aggr.) .....                                                                                                                                                                                  | 4–16A                  |
| Dang-gwi, leaves ( <i>Angelica gigas</i> Nakai) .....                                                                                                                                                                                                    | 4–16A                  |
| Dillweed ( <i>Anethum graveolens</i> L.) .....                                                                                                                                                                                                           | 4–16A                  |
| Dock ( <i>Rumex patientia</i> L.) .....                                                                                                                                                                                                                  | 4–16A                  |
| Dol-nam-mul ( <i>Sedum sarmentosum</i> Bunge) .....                                                                                                                                                                                                      | 4–16A                  |
| Ebolo ( <i>Crassocephalum crepidioides</i> (Benth.) S. Moore) .....                                                                                                                                                                                      | 4–16A                  |
| Endive ( <i>Cichorium endivia</i> L.) .....                                                                                                                                                                                                              | 4–16A                  |
| Escarole ( <i>Cichorium endivia</i> L.) .....                                                                                                                                                                                                            | 4–16A                  |
| Fameflower ( <i>Talinum fruticosum</i> (L.) Juss.) .....                                                                                                                                                                                                 | 4–16A                  |
| Feather cockscomb ( <i>Glinus oppositifolius</i> (L.) Aug. DC.) .....                                                                                                                                                                                    | 4–16A                  |
| Good King Henry ( <i>Chenopodium bonus-henricus</i> L.) .....                                                                                                                                                                                            | 4–16A                  |
| Hanover salad ( <i>Brassica napus</i> var. <i>pabularia</i> (DC.) Rchb.) .....                                                                                                                                                                           | 4–16B                  |
| Huauzontle ( <i>Chenopodium berlandieri</i> Moq.) .....                                                                                                                                                                                                  | 4–16A                  |
| Jute, leaves ( <i>Corchorus</i> spp.) .....                                                                                                                                                                                                              | 4–16A                  |
| Kale ( <i>Brassica oleracea</i> L. var. <i>Sabellica</i> L.) .....                                                                                                                                                                                       | 4–16B                  |
| Lettuce, bitter ( <i>Launaea cornuta</i> (Hochst. ex Oliv. & Hiern) C. Jeffrey) .....                                                                                                                                                                    | 4–16A                  |
| Lettuce, head ( <i>Lactuca sativa</i> L.; including <i>Lactuca sativa</i> var. <i>capitata</i> L.) .....                                                                                                                                                 | 4–16A                  |
| Lettuce, leaf ( <i>Lactuca sativa</i> L.; including <i>Lactuca sativa</i> var. <i>longifolia</i> Lam.; <i>Lactuca sativa</i> var. <i>crispa</i> L.) ..                                                                                                   | 4–16A                  |
| Maca, leaves ( <i>Lepidium meyenii</i> Walp.) .....                                                                                                                                                                                                      | 4–16B                  |
| Mizuna ( <i>Brassica rapa</i> L. subsp. <i>nipposinica</i> (L.H. Bailey) Hanelt) .....                                                                                                                                                                   | 4–16B                  |

Brassica leafy greens subgroup</b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Mustard greens .....                                       | Arugula; broccoli, Chinese; broccoli raab; cabbage, abyssinian; cabbage, Chinese, bok choy; cabbage, seakale; collards; cress, garden; cress, upland; hanover salad; kale; maca, leaves; mizuna; mustard greens; radish, leaves; rape greens; rocket, wild; shepherd's purse; turnip greens; watercress; cultivars, varieties, and hybrids of these commodities.                                                                                                                                                                                                                                                                                                                                                   |

(7) *Crop Group 5. Brassica (Cole) Leafy Vegetables Group.*

(i) *Representative commodities.* Broccoli or cauliflower; cabbage; and mustard greens.

(ii) *Table.* The following table 1 lists all the commodities included in Crop Group 5 and identifies the related crop subgroups.

TABLE 1—CROP GROUP 5: *Brassica* (COLE) LEAFY VEGETABLES

| Commodities                                                               | Related crop subgroups |
|---------------------------------------------------------------------------|------------------------|
| Broccoli ( <i>Brassica oleracea</i> var. <i>botrytis</i> ) .....          | 5A                     |
| Broccoli, Chinese (gai lon) ( <i>Brassica alboglabra</i> ) .....          | 5A                     |
| Broccoli raab (rapini) ( <i>Brassica campestris</i> ) .....               | 5B                     |
| Brussels sprouts ( <i>Brassica oleracea</i> var. <i>gemmifera</i> ) ..... | 5A                     |
| Cabbage ( <i>Brassica oleracea</i> ) .....                                | 5A                     |
| Cabbage, Chinese (bok choy) ( <i>Brassica chinensis</i> ) .....           | 5B                     |
| Cabbage, Chinese (napa) ( <i>Brassica pekinensis</i> ) .....              | 5A                     |
| Cabbage, Chinese mustard (gai choy) ( <i>Brassica campestris</i> ) .....  | 5A                     |
| Cauliflower ( <i>Brassica oleracea</i> var. <i>botrytis</i> ) .....       | 5A                     |
| Cavalo broccolo ( <i>Brassica oleracea</i> var. <i>botrytis</i> ) .....   | 5A                     |
| Collards ( <i>Brassica oleracea</i> var. <i>acephala</i> ) .....          | 5B                     |
| Kale ( <i>Brassica oleracea</i> var. <i>acephala</i> ) .....              | 5B                     |
| Kohlrabi ( <i>Brassica oleracea</i> var. <i>gongylodes</i> ) .....        | 5A                     |
| Mizuna ( <i>Brassica rapa</i> Japonica Group) .....                       | 5B                     |
| Mustard greens ( <i>Brassica juncea</i> ) .....                           | 5B                     |
| Mustard spinach ( <i>Brassica rapa</i> Perviridis Group) .....            | 5B                     |
| Rape greens ( <i>Brassica napus</i> ) .....                               | 5B                     |

(iii) *Table.* The following table 2 identifies the crop subgroups for Crop Group 5, specifies the representative

commodity(ies) for each subgroup, and lists all the commodities included in each subgroup.

TABLE 2—CROP GROUP 5 SUBGROUP LISTING

| Representative commodities                                      | Commodities                                                                                                                                       |
|-----------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Crop Subgroup 5A. Head and stem <i>Brassica</i> subgroup</b> |                                                                                                                                                   |
| Broccoli or cauliflower; and cabbage .....                      | Broccoli; broccoli, Chinese; brussels sprouts; cabbage; cabbage, Chinese (napa); cabbage, Chinese mustard; cauliflower; cavalo broccolo; kohlrabi |

TABLE 2—CROP GROUP 5 SUBGROUP LISTING—Continued

| Representative commodities                                      | Commodities                                                                                                      |
|-----------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------|
| <b>Crop Subgroup 5B.</b> Leafy <i>Brassica</i> greens subgroup. |                                                                                                                  |
| Mustard greens .....                                            | Broccoli raab; cabbage, Chinese (bok choy); collards; kale; mizuna; mustard greens; mustard spinach; rape greens |

(8) *Crop Group 5–16. Brassica Head and Stem Vegetable Group.*

(i) *Representative commodities.* Broccoli or cauliflower and cabbage.

(ii) *Commodities.* The following List 1 contains all commodities included in Crop Group 5–16.

LIST 1—CROP GROUP 5–16: BRASSICA HEAD AND STEM VEGETABLE GROUP

| Commodities                                                                               |
|-------------------------------------------------------------------------------------------|
| Broccoli ( <i>Brassica oleracea</i> L. var. <i>italica</i> Plenck)                        |
| Brussels sprouts ( <i>Brassica oleracea</i> L. var. <i>gemmifera</i> (DC.) Zenker)        |
| Cabbage ( <i>Brassica oleracea</i> L. var. <i>capitata</i> L.)                            |
| Cabbage, Chinese, napa ( <i>Brassica rapa</i> L. subsp. <i>pekinensis</i> (Lour.) Hanelt) |

LIST 1—CROP GROUP 5–16: BRASSICA HEAD AND STEM VEGETABLE GROUP—Continued

| Commodities                                                        |
|--------------------------------------------------------------------|
| Cauliflower ( <i>Brassica oleracea</i> L. var. <i>capitata</i> L.) |
| Cultivars, varieties, and hybrids of these commodities             |

(9) *Crop Group 6. Legume Vegetables (Succulent or Dried) Group.*

(i) *Representative commodities.* Bean (*Phaseolus* spp.; one succulent cultivar and one dried cultivar); pea (*Pisum* spp.; one succulent cultivar and one dried cultivar); and soybean.

(ii) *Table.* The following table 1 lists all the commodities included in Crop Group 6 and identifies the related crop subgroups.

TABLE 1—CROP GROUP 6: LEGUME VEGETABLES (SUCCULENT OR DRIED)

| Commodities                                                                                                                                                                                                   | Related crop subgroups |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|
| Bean ( <i>Lupinus</i> spp.) (includes grain lupin, sweet lupin, white lupin, and white sweet lupin) .....                                                                                                     | 6C                     |
| Bean ( <i>Phaseolus</i> spp.) (includes field bean, kidney bean, lima bean, navy bean, pinto bean, runner bean, snap bean, tepary bean, wax bean) .....                                                       | 6A, 6B, 6C             |
| Bean ( <i>Vigna</i> spp.) (includes adzuki bean, asparagus bean, blackeyed pea, catjang, Chinese longbean, cowpea, Crowder pea, moth bean, mung bean, rice bean, southern pea, urd bean, yardlong bean) ..... | 6A, 6B, 6C             |
| Broad bean (fava bean) ( <i>Vicia faba</i> ) .....                                                                                                                                                            | 6B, 6C                 |
| Chickpea (garbanzo bean) ( <i>Cicer arietinum</i> ) .....                                                                                                                                                     | 6C                     |
| Guar ( <i>Cyamopsis tetragonoloba</i> ) .....                                                                                                                                                                 | 6C                     |
| Jackbean ( <i>Canavalia ensiformis</i> ) .....                                                                                                                                                                | 6A                     |
| Lablab bean (hyacinth bean) ( <i>Lablab purpureus</i> ) .....                                                                                                                                                 | 6C                     |
| Lentil ( <i>Lens esculenta</i> ) .....                                                                                                                                                                        | 6C                     |
| Pea ( <i>Pisum</i> spp.) (includes dwarf pea, edible-pod pea, En glish pea, field pea, garden pea, green pea, snow pea, sugar snap pea) .....                                                                 | 6A, 6B, 6C             |
| Pigeon pea ( <i>Cajanus cajan</i> ) .....                                                                                                                                                                     | 6A, 6B, 6C             |
| Soybean ( <i>Glycine max</i> ) .....                                                                                                                                                                          | N/A                    |
| Soybean (immature seed) ( <i>Glycine max</i> ) .....                                                                                                                                                          | 6A                     |
| Sword bean ( <i>Canavalia gladiata</i> ) .....                                                                                                                                                                | 6A                     |

(iii) *Table.* The following table 2 identifies the crop subgroups for Crop Group 6, specifies the representative

commodities for each subgroup, and lists all the commodities included in each subgroup.

TABLE 2—CROP GROUP 6 SUBGROUP LISTING

| <b>Crop Subgroup 6C.</b> Dried shelled pea and bean (except soybean) subgroup<br>Any one dried cultivar of bean ( <i>Phaseolus</i> spp.); and any one dried cultivar of pea ( <i>Pisum</i> spp.). | Dried cultivars of bean ( <i>Lupinus</i> spp.) (includes grain lupin, sweet lupin, white lupin, and white sweet lupin); ( <i>Phaseolus</i> spp.) (includes field bean, kidney bean, lima bean (dry), navy bean, pinto bean; tepary bean; bean ( <i>Vigna</i> spp.) (includes adzuki bean, blackeyed pea, catjang, cowpea, Crowder pea, moth bean, mung bean, rice bean, southern pea, urd bean); broad bean (dry); chickpea; guar; lablab bean; lentil; pea ( <i>Pisum</i> spp.) (includes field pea); pigeon pea. |

(10) *Crop Group 6–22.* Legume Vegetable Group.

(i) *Representative commodities.* Bean (*Phaseolus* spp. or *Vigna* spp.; one edible podded cultivar, one succulent shelled cultivar, and one dried seed); Pea (*Pisum* spp.; one edible podded cultivar, one succulent shelled

cultivar, and one dried seed); and Soybean, seed.

(ii) *Commodities.* The following table is a list of all commodities included in Crop Group 6–22 and includes cultivars, varieties and/or hybrids of these commodities.

TABLE 1 TO PARAGRAPH (c)(10)—CROP GROUP 6–22: LEGUME VEGETABLE GROUP:

| Commodities                                                                                                                                                                                                                                                                                                      | Related crop subgroups |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|
| African yam bean, dry seed, <i>Sphenostylis stenocarpa</i> (Hochst. ex A. Rich.) Harms .....                                                                                                                                                                                                                     | 6–22E                  |
| American potato bean, dry seed, <i>Apios americana</i> Medik .....                                                                                                                                                                                                                                               | 6–22E                  |
| Bean ( <i>Lupinus</i> spp.), succulent shelled (including, but not limited to Andean lupin, blue lupin, grain lupin, sweet lupin, white lupin, white sweet lupin, and yellow lupin) .....                                                                                                                        | 6–22C                  |
| Bean ( <i>Lupinus</i> spp.), dry seed (including, but not limited to Andean lupin, blue lupin, grain lupin, sweet lupin, white lupin, white sweet lupin, and yellow lupin) .....                                                                                                                                 | 6–22E                  |
| Bean ( <i>Phaseolus</i> spp.), edible podded (including, but not limited to French bean, garden bean, green bean, kidney bean, navy bean, scarlet runner bean, snap bean, and wax bean) .....                                                                                                                    | 6–22A                  |
| Bean ( <i>Phaseolus</i> spp.), succulent shelled (including, but not limited to lima bean, scarlet runner bean, and wax bean) .....                                                                                                                                                                              | 6–22C                  |
| Bean ( <i>Phaseolus</i> spp.), dry seed (including, but not limited to black bean, cranberry bean, dry bean, field bean, French bean, garden bean, great northern bean, green bean, kidney bean, lima bean, navy bean, pink bean, pinto bean, red bean, scarlet runner bean, tepary bean, and yellow bean) ..... | 6–22E                  |
| Bean ( <i>Vigna</i> spp.), edible podded (including, but not limited to asparagus bean, catjang bean, Chinese longbean, cowpea, moth bean, mung bean, rice bean, urd bean, and yardlong bean) .....                                                                                                              | 6–22A                  |
| Bean ( <i>Vigna</i> spp.), succulent shelled (including, but not limited to blackeyed pea, catjang bean, cowpea, crowder pea, moth bean, and southern pea) .....                                                                                                                                                 | 6–22C                  |
| Bean ( <i>Vigna</i> spp.), dry seed (including, but not limited to adzuki bean, asparagus bean, blackeyed pea, catjang bean, Chinese longbean, cowpea, crowder pea, moth bean, mung bean, rice bean, southern pea, urd bean, and yardlong bean) .....                                                            | 6–22E                  |
| Broad bean (fava bean), succulent shelled, <i>Vicia faba</i> L. subsp. <i>faba</i> var. <i>faba</i> .....                                                                                                                                                                                                        | 6–22C                  |
| Broad bean (fava bean), dry seed, <i>Vicia faba</i> L. subsp. <i>faba</i> var. <i>faba</i> .....                                                                                                                                                                                                                 | 6–22E                  |
| Chickpea (garbanzo), edible podded, <i>Cicer arietinum</i> L .....                                                                                                                                                                                                                                               | 6–22B                  |
| Chickpea (garbanzo), succulent shelled, <i>Cicer arietinum</i> L .....                                                                                                                                                                                                                                           | 6–22D                  |
| Chickpea (garbanzo), dry seed, <i>Cicer arietinum</i> L .....                                                                                                                                                                                                                                                    | 6–22F                  |
| Goa bean, edible podded (asparagus pea and winged bean), <i>Psophocarpus tetragonolobus</i> (L.) DC .....                                                                                                                                                                                                        | 6–22A                  |
| Goa bean, succulent shelled (asparagus pea and winged bean), <i>Psophocarpus tetragonolobus</i> (L.) DC .....                                                                                                                                                                                                    | 6–22C                  |
| Goa bean, dry seed (asparagus pea and winged bean), <i>Psophocarpus tetragonolobus</i> (L.) DC .....                                                                                                                                                                                                             | 6–22E                  |
| Grass pea, edible podded, <i>Lathyrus sativus</i> L .....                                                                                                                                                                                                                                                        | 6–22B                  |
| Grass pea, dry seed, <i>Lathyrus sativus</i> L .....                                                                                                                                                                                                                                                             | 6–22F                  |
| Guar bean, edible podded, <i>Cyamopsis tetragonoloba</i> (L.) Taub .....                                                                                                                                                                                                                                         | 6–22A                  |
| Guar bean, dry seed, <i>Cyamopsis tetragonoloba</i> (L.) Taub .....                                                                                                                                                                                                                                              | 6–22E                  |
| Horse gram, dry seed, <i>Macrotyloma uniflorum</i> (Lam.) Verdc .....                                                                                                                                                                                                                                            | 6–22E                  |
| Jackbean, edible podded, <i>Canavalia ensiformis</i> (L.) DC .....                                                                                                                                                                                                                                               | 6–22A                  |
| Jackbean, succulent shelled, <i>Canavalia ensiformis</i> (L.) DC .....                                                                                                                                                                                                                                           | 6–22C                  |
| Jackbean, dry seed, <i>Canavalia ensiformis</i> (L.) DC .....                                                                                                                                                                                                                                                    | 6–22E                  |
| Lablab bean (hyacinth bean), edible podded, Lablab <i>purpureus</i> (L.) Sweet subsp. <i>purpureus</i> .....                                                                                                                                                                                                     | 6–22A                  |
| Lablab bean (hyacinth bean), succulent shelled, Lablab <i>purpureus</i> (L.) Sweet subsp. <i>purpureus</i> .....                                                                                                                                                                                                 | 6–22C                  |

TABLE 1 TO PARAGRAPH (c)(10)—CROP GROUP 6–22: LEGUME VEGETABLE GROUP:—Continued

| Commodities                                                                                                                                                     | Related crop subgroups |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|
| Lablab bean (hyacinth bean), dry seed, <i>Lablab purpureus</i> (L.) Sweet subsp. <i>Purpureus</i> .....                                                         | 6–22E                  |
| Lentil, edible podded, <i>Lens culinaris</i> Medik. subsp. <i>culinaris</i> .....                                                                               | 6–22B                  |
| Lentil, succulent shelled, <i>Lens culinaris</i> Medik. subsp. <i>culinaris</i> .....                                                                           | 6–22D                  |
| Lentil, dry seed, <i>Lens culinaris</i> Medik. subsp. <i>culinaris</i> .....                                                                                    | 6–22F                  |
| Moramba bean, dry seed, <i>Tylosema esculentum</i> (Burch.) A. Schreib .....                                                                                    | 6–22E                  |
| Pea ( <i>Pisum</i> spp.), edible podded (including, but not limited to dwarf pea, green pea, snap pea, snow pea, and sugar snap pea) .....                      | 6–22B                  |
| Pea ( <i>Pisum</i> spp.), succulent shelled (including, but not limited to, English pea, garden pea, and green pea) .....                                       | 6–22D                  |
| Pea ( <i>Pisum</i> spp.), dry seed (including, but not limited to dry pea, field pea, garden pea, yellow pea, wrinkled pea, marrowfat pea, and green pea) ..... | 6–22F                  |
| Pigeon pea, edible podded, <i>Cajanus cajan</i> (L.) Huth .....                                                                                                 | 6–22B                  |
| Pigeon pea, succulent shelled, <i>Cajanus cajan</i> (L.) Huth .....                                                                                             | 6–22D                  |
| Pigeon pea, dry seed, <i>Cajanus cajan</i> (L.) Huth .....                                                                                                      | 6–22F                  |
| Soybean, seed, <i>Glycine max</i> (L.) Merr .....                                                                                                               | N/A                    |
| Sword bean, edible podded, <i>Canavalia gladiata</i> (Jacq.) DC .....                                                                                           | 6–22A                  |
| Sword bean, dry seed, <i>Canavalia gladiata</i> (Jacq.) DC .....                                                                                                | 6–22E                  |
| Vegetable soybean, edible podded (edamame), <i>Glycine max</i> (L.) Merr .....                                                                                  | 6–22A                  |
| Vegetable soybean, succulent shelled (edamame), <i>Glycine max</i> (L.) Merr .....                                                                              | 6–22C                  |
| Velvetbean, edible podded, <i>Mucuna pruriens</i> (L.) DC .....                                                                                                 | 6–22A                  |
| Velvetbean, succulent shelled, <i>Mucuna pruriens</i> (L.) DC .....                                                                                             | 6–22C                  |
| Velvetbean, dry seed, <i>Mucuna pruriens</i> (L.) DC .....                                                                                                      | 6–22E                  |
| Winged pea, edible podded, <i>Lotus tetragonolobus</i> L .....                                                                                                  | 6–22A                  |
| Winged pea, dry seed, <i>Lotus tetragonolobus</i> L .....                                                                                                       | 6–22E                  |
| Cultivars, varieties, and/or hybrids of these commodities                                                                                                       |                        |

(iii) *Crop subgroups.* The following table identifies the crop subgroups for Crop Group 6–22, specifies the representative commodities for each subgroup and lists all the commodities included in each subgroup.

TABLE 2 TO PARAGRAPH (c)(10)—CROP GROUP 6–22: SUBGROUP LISTING

| Representative commodities                                                          | Commodities                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|-------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Crop Subgroup 6–22A: Edible podded bean subgroup</b>                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Any cultivar of edible podded bean <i>Phaseolus</i> spp. or <i>Vigna</i> spp.       | Bean ( <i>Phaseolus</i> spp.; including, but not limited to French bean, garden bean, green bean, kidney bean, navy bean, scarlet runner bean, snap bean, and wax bean); Bean ( <i>Vigna</i> spp.; including, but not limited to asparagus bean, catjang bean; Chinese longbean, cowpea, moth bean, mung bean, rice bean, urd bean, and yardlong bean); goa bean; guar bean; jackbean; lablab bean; vegetable soybean (edamame); sword bean; winged pea; velvetbean; cultivars, varieties, and/or hybrids of these commodities.                                                  |

| Any cultivar of bean ( <i>Phaseolus</i> spp. or cowpea ( <i>Vigna unguiculata</i> (L.) Walp)); field pea ( <i>Pisum sativum</i> L. subsp. <i>sativum</i> var. <i>arvense</i> (L.) Poir.); and soybean ( <i>Glycine max</i> (L.) Merr.). | Plant parts of any legume vegetable listed in crop group 6–22 that will be used as animal feed. |

(iii) *Crop subgroup.* The following table identifies the crop subgroup for Crop Group 7–22 and specifies the representative commodities for the subgroup, and lists all the commodities included in the subgroup.

TABLE 2 TO PARAGRAPH (c)(12)—CROP GROUP 7–22 SUBGROUP LISTING

| Representative commodities                                                                                                                                                                | Commodities                                                                                                       |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------|
| <b>Crop Subgroup 7–22A. Forage and hay of legume vegetables (except soybeans) subgroup</b>                                                                                                |                                                                                                                   |
| Any cultivar of bean ( <i>Phaseolus</i> spp. or cowpea ( <i>Vigna unguiculata</i> (L.) Walp)); field pea ( <i>Pisum sativum</i> L. subsp. <i>sativum</i> var. <i>arvense</i> (L.) Poir.). | Plant parts of any legume vegetable listed in crop group 6–22 (except soybeans) that will be used as animal feed. |

(13) *Crop Group 8. Fruiting Vegetables Group.*

(i) *Representative commodities.* Tomato, bell pepper, and one cultivar of non-bell pepper.

(ii) *Commodities.* The following is a list of all the commodities included in Crop Group 8:

CROP GROUP 8: FRUITING VEGETABLES  
(EXCEPT CUCURBITS)—COMMODITIES

Eggplant (*Solanum melongena*)  
Groundcherry (*Physalis* spp.)  
Pepino (*Solanum muricatum*)

Pepper (*Capsicum* spp.) (includes bell pepper, chili pepper, cooking pepper, pimento, sweet pepper)

Tomatillo (*Physalis ixocarpa*)  
Tomato (*Lycopersicon esculentum*)

(14) *Crop Group 8–10. Fruiting Vegetable Group.*

(i) *Representative commodities.* Tomato, standard size, and one cultivar of small tomato; bell pepper and one cultivar of small nonbell pepper.

(ii) *Commodities.* The following is a list of all commodities included in the Crop group 8–10.

TABLE 1—CROP GROUP 8–10: FRUITING VEGETABLE GROUP

| Commodities                                                                                                                                                                                         | Related crop subgroups |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|
| African eggplant, <i>Solanum macrocarpon</i> L .....                                                                                                                                                | 8–10B, 8–10C           |
| Bush tomato, <i>Solanum centrale</i> J.M. Black .....                                                                                                                                               | 8–10A                  |
| Cocona, <i>Solanum sessiliflorum</i> Dunal .....                                                                                                                                                    | 8–10A                  |
| Currant tomato, <i>Lycopersicon pimpinellifolium</i> L .....                                                                                                                                        | 8–10A                  |
| Eggplant, <i>Solanum melongena</i> L .....                                                                                                                                                          | 8–10B, 8–10C           |
| Garden huckleberry, <i>Solanum scabrum</i> Mill .....                                                                                                                                               | 8–10A                  |
| Goji berry, <i>Lycium barbarum</i> L .....                                                                                                                                                          | 8–10A                  |
| Groundcherry, <i>Physalis alkekengi</i> L., <i>P. grisea</i> (Waterf.) M. Martinez, <i>P. peruviana</i> L., <i>P. pubescens</i> L. ..                                                               | 8–10A                  |
| Martynia, <i>Proboscidea louisianica</i> (Mill.) Thell .....                                                                                                                                        | 8–10B, 8–10C           |
| Naranjilla, <i>Solanum quitoense</i> Lam .....                                                                                                                                                      | 8–10A                  |
| Okra, <i>Abelmoschus esculentus</i> (L.) Moench .....                                                                                                                                               | 8–10B, 8–10C           |
| Pea eggplant, <i>Solanum torvum</i> Sw. ....                                                                                                                                                        | 8–10B, 8–10C           |
| Pepino, <i>Solanum muricatum</i> Aiton .....                                                                                                                                                        | 8–10B, 8–10C           |
| Pepper, bell, <i>Capsicum annuum</i> L. var. <i>annuum</i> , <i>Capsicum</i> spp .....                                                                                                              | 8–10B                  |
| Pepper, nonbell, <i>Capsicum chinese</i> Jacq., <i>C. annuum</i> L. var. <i>annuum</i> , <i>C. frutescens</i> L., <i>C. baccatum</i> L., <i>C. pubescens</i> Ruiz & Pav., <i>Capsicum</i> spp. .... | 8–10B, 8–10C           |
| Roselle, <i>Hibiscus sabdariffa</i> L .....                                                                                                                                                         | 8–10B, 8–10C           |
| Scarlet eggplant, <i>Solanum aethiopicum</i> L .....                                                                                                                                                | 8–10B, 8–10C           |
| Sunberry, <i>Solanum retroflexum</i> Dunal .....                                                                                                                                                    | 8–10A                  |
| Tomatillo, <i>Physalis philadelphica</i> Lam .....                                                                                                                                                  | 8–10A                  |
| Tomato, <i>Solanum lycopersicum</i> L., <i>Solanum lycopersicum</i> L. var. <i>lycopersicum</i> .....                                                                                               | 8–10A                  |

Environmental Protection Agency

TABLE 1—CROP GROUP 8–10: FRUITING VEGETABLE GROUP—Continued

| Commodities                                                                                    | Related crop subgroups |
|------------------------------------------------------------------------------------------------|------------------------|
| Tree tomato, <i>Solanum betaceum</i> Cav .....<br>Cultivars, varieties and/or hybrids of these | 8–10A                  |

(iii) *Table.* The following Table 2 identifies the crop subgroups for Crop Group 8–10, specifies the representative commodities for each subgroup and lists all the commodities included in each subgroup.

TABLE 2—CROP GROUP 8–10. SUBGROUP LISTING

| Representative commodities                                                                                                       | Commodities                                                                                                                                                                             |
|----------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Crop subgroup 8–10A. Tomato subgroup<br>Tomato, standard size, and one cultivar of small tomato .....                            | Bush tomato; cocona; currant tomato; garden huckleberry; goji berry; groundcherry; naranjilla; sunberry; tomatillo; tomato; tree tomato; cultivars, varieties, and/or hybrids of these. |
| Crop subgroup 8–10B. Pepper/Eggplant subgroup<br>Bell pepper and one cultivar of small nonbell pepper .....                      | African eggplant; bell pepper; eggplant; Martynia; nonbell pepper; okra; pea eggplant; pepino; roselle; scarlet eggplant; cultivars, varieties, and/or hybrids of these.                |
| Crop subgroup 8–10C. Nonbell pepper/Eggplant subgroup<br>One cultivar of small nonbell pepper or one cultivar of small eggplant. | African eggplant; eggplant; martynia; nonbell pepper; okra; pea eggplant; pepino; roselle; scarlet eggplant; cultivars, varieties, and/or hybrids of these.                             |

(15) *Crop Group 9. Cucurbit Vegetables Group.*

(i) *Representative commodities.* Cucum-ber, muskmelon, and summer squash.

(ii) *Table.* The following table 1 lists all the commodities included in Crop Group 9 and identifies the related subgroups.

TABLE 1—CROP GROUP 9: CUCURBIT VEGETABLES

| Commodities                                                                                                                                                                                                                                                            | Related crop subgroups |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|
| Chayote (fruit) ( <i>Sechium edule</i> ) .....                                                                                                                                                                                                                         | 9B                     |
| Chinese waxgourd (Chinese preserving melon) ( <i>Benincasa hispida</i> ) .....                                                                                                                                                                                         | 9B                     |
| Citron melon ( <i>Citrullus lanatus</i> var. <i>citroides</i> ) .....                                                                                                                                                                                                  | 9A                     |
| Cucumber ( <i>Cucumis sativus</i> ) .....                                                                                                                                                                                                                              | 9B                     |
| Gherkin ( <i>Cucumis anguria</i> ) .....                                                                                                                                                                                                                               | 9B                     |
| Gourd, edible ( <i>Lagenaria</i> spp.) (includes hyotan, cucuzza); ( <i>Luffa acutangula</i> , <i>L. cylindrica</i> ) (includes hechima, Chinese okra) .....                                                                                                           | 9B                     |
| <i>Momordica</i> spp. (includes balsam apple, balsam pear, bitter melon, Chinese cucumber) .....                                                                                                                                                                       | 9B                     |
| Muskmelon (hybrids and/or cultivars of <i>Cucumis melo</i> ) (includes true cantaloupe, cantaloupe, casaba, crenshaw melon, golden pershaw melon, honeydew melon, honey balls, mango melon, Persian melon, pine-apple melon, Santa Claus melon, and snake melon) ..... | 9A                     |
| Pumpkin ( <i>Cucurbita</i> spp.) .....                                                                                                                                                                                                                                 | 9B                     |
| Squash, summer ( <i>Cucurbita pepo</i> var. <i>melopepo</i> ) (includes crookneck squash, scallop squash, straightneck squash, vegetable marrow, zucchini) .....                                                                                                       | 9B                     |
| Squash, winter ( <i>Cucurbita maxima</i> ; <i>C. moschata</i> ) (includes butternut squash, calabaza, hubbard squash); ( <i>C. mixta</i> ; <i>C. pepo</i> ) (includes acorn squash, spaghetti squash) .....                                                            | 9B                     |
| Watermelon (includes hybrids and/or varieties of <i>Citrullus lanatus</i> ) .....                                                                                                                                                                                      | 9A                     |

(iii) *Table.* The following table 2 identifies the crop subgroups for Crop Group 9, specifies the representative commodities for each subgroup, and lists all the commodities included in each subgroup.

TABLE 2—CROP GROUP 9 SUBGROUP LISTING

| Representative commodities                                                                       | Commodities                                                                                                                          |
|--------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------|
| <b>Crop Subgroup 9A.</b> Melon subgroup<br>Cantaloupes .....                                     | Citron melon; muskmelon; watermelon.                                                                                                 |
| <b>Crop Subgroup 9B.</b> Squash/cucumber subgroup<br>One cultivar of summer squash and cucumber. |                                                                                                                                      |
|                                                                                                  | Chayote (fruit); Chinese waxgourd; cucumber; gherkin; gourd, edible; <i>Momordica</i> spp.; pumpkin; squash, summer; squash, winter. |

(16) *Crop Group 10.* Citrus Fruit Group.

(i) *Representative commodities.* Sweet orange; lemon and grapefruit.

(ii) *Commodities.* The following is a list of all the commodities in Crop Group 10:

CROP GROUP 10: CITRUS FRUITS (CITRUS SPP.,  
FORTUNELLA SPP.) GROUP—COMMODITIES

Calamondin (*Citrus mitis* × *Citrofortunella mitis*)

Citrus citron (*Citrus medica*)

Citrus hybrids (*Citrus* spp.) (includes

chironja, tangelo, tangor)

Grapefruit (*Citrus paradisi*)

Kumquat (*Fortunella* spp.)

Lemon (*Citrus jambhiri*, *Citrus limon*)

Lime (*Citrus aurantiifolia*)

Mandarin (tangerine) (*Citrus reticulata*)

Orange, sour (*Citrus aurantium*)

Orange, sweet (*Citrus sinensis*)

Pummelo (*Citrus grandis*, *Citrus maxima*)

Satsuma mandarin (*Citrus unshiu*)

(17) *Crop Group 10–10.* Citrus Fruit Group.

(i) *Representative commodities.* Orange or Tangerine/Mandarin, Lemon or Lime, and Grapefruit.

(ii) *Commodities.* The following is a list of all the commodities in Crop Group 10–10.

TABLE 1—CROP GROUP 10–10: CITRUS FRUIT GROUP

| Commodities                                                                                                                                | Related crop sub-groups |
|--------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|
| Australian desert lime, <i>Eremocitrus glauca</i> (Lindl.) Swingle .....                                                                   | 10–10B                  |
| Australian finger lime, <i>Microcitrus australasica</i> (F. Muell.) Swingle .....                                                          | 10–10B                  |
| Australian round lime, <i>Microcitrus australis</i> (A. Cunn. Ex Mudie) Swingle .....                                                      | 10–10B                  |
| Brown River finger lime, <i>Microcitrus papuana</i> Winters .....                                                                          | 10–10B                  |
| Calamondin, <i>Citrofortunella microcarpa</i> (Bunge) Wijnands .....                                                                       | 10–10A                  |
| Citron, <i>Citrus medica</i> L .....                                                                                                       | 10–10A                  |
| Citrus hybrids, <i>Citrus</i> spp. <i>Eremocitrus</i> spp., <i>Fortunella</i> spp., <i>Microcitrus</i> spp., and <i>Poncirus</i> spp ..... | 10–10A                  |
| Grapefruit, <i>Citrus paradisi</i> Macfad .....                                                                                            | 10–10C                  |
| Japanese summer grapefruit, <i>Citrus natsudaidai</i> Hayata .....                                                                         | 10–10C                  |
| Kumquat, <i>Fortunella</i> spp .....                                                                                                       | 10–10B                  |
| Lemon, <i>Citrus limon</i> (L.) Burm. f .....                                                                                              | 10–10B                  |
| Lime, <i>Citrus aurantiifolia</i> (Christm.) Swingle .....                                                                                 | 10–10B                  |
| Mediterranean mandarin, <i>Citrus deliciosa</i> Ten .....                                                                                  | 10–10A                  |
| Mount White lime, <i>Microcitrus garrowayae</i> (F.M. Bailey) Swingle .....                                                                | 10–10B                  |
| New Guinea wild lime, <i>Microcitrus warburgiana</i> (F.M. Bailey) Tanaka .....                                                            | 10–10B                  |
| Orange, sour, <i>Citrus aurantium</i> L .....                                                                                              | 10–10A                  |
| Orange, sweet, <i>Citrus sinensis</i> (L.) Osbeck .....                                                                                    | 10–10A                  |
| Pummelo, <i>Citrus maxima</i> (Burm.) Merr .....                                                                                           | 10–10C                  |
| Russell River lime, <i>Microcitrus inodora</i> (F.M. Bailey) Swingle .....                                                                 | 10–10B                  |
| Satsuma mandarin, <i>Citrus unshiu</i> Marcow .....                                                                                        | 10–10A                  |
| Sweet lime, <i>Citrus limetta</i> Risso .....                                                                                              | 10–10B                  |
| Tachibana orange, <i>Citrus tachibana</i> (Makino) Tanaka .....                                                                            | 10–10A                  |
| Tahiti lime, <i>Citrus latifolia</i> (Yu. Tanaka) Tanaka .....                                                                             | 10–10B                  |
| Tangelo, <i>Citrus xtangelo</i> J.W. Ingram & H.E. Moore .....                                                                             | 10–10A, 10–10C          |
| Tangerine (Mandarin), <i>Citrus reticulata</i> Blanco .....                                                                                | 10–10A                  |
| Tangor, <i>Citrus nobilis</i> Lour .....                                                                                                   | 10–10A                  |
| Trifoliate orange, <i>Poncirus trifoliata</i> (L.) Raf .....                                                                               | 10–10A                  |
| Uniq fruit, <i>Citrus aurantium</i> Tangelo group .....                                                                                    | 10–10C                  |
| Cultivars, varieties and/or hybrids of these                                                                                               |                         |

(iii) *Table.* The following Table 2 identifies the crop subgroups for Crop Group 10–10, specifies the representa-

tive commodities for each subgroup and lists all the commodities included in each subgroup.

TABLE 2—CROP GROUP 10–10: SUBGROUP LISTING

| Representative commodities                | Commodities                                                                                                                                                                                                                                               |
|-------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Crop Subgroup 10–10A. Orange subgroup     |                                                                                                                                                                                                                                                           |
| Orange or tangerine/mandarin .....        | Calamondin; citron; citrus hybrids; mediterranean mandarin; orange; sour; orange, sweet; satsuma mandarin; tachibana orange; tangerine (mandarin); tangelo; tangor; trifoliate orange; cultivars, varieties, and/or hybrids of these.                     |
| Crop Subgroup 10–10B. Lemon/Lime subgroup |                                                                                                                                                                                                                                                           |
| Lemon or lime .....                       | Australian desert lime; Australian finger lime; Australian round lime; brown river finger lime; kumquat; lemon; lime; mount white lime; New Guinea wild lime; Russell River lime; sweet lime; Tahiti lime; cultivars, varieties, and/or hybrids of these. |
| Crop Subgroup 10–10C. Grapefruit subgroup |                                                                                                                                                                                                                                                           |
| Grapefruit .....                          | Grapefruit; Japanese summer grapefruit; pummelo; tangelo; unqi fruit; cultivars, varieties, and/or hybrids of these.                                                                                                                                      |

(18) *Crop Group 11: Pome Fruits Group.*(i) *Representative commodities.* Apple and pear.(ii) *Commodities.* The following is a list of all the commodities included in Crop Group 11:CROP GROUP 11: POME FRUITS GROUP—  
COMMODITIES

Apple (*Malus domestica*)  
 Crabapple (*Malus* spp.)  
 Loquat (*Eriobotrya japonica*)  
 Mayhaw (*Crataegus aestivalis*, *C. opaca*, and *C. rufula*)  
 Pear (*Pyrus communis*)  
 Pear, oriental (*Pyrus pyrifolia*)  
 Quince (*Cydonia oblonga*)

(19) *Crop group 11–10. Pome Fruit Group.*(i) *Representative commodities.* Apple and Pear(ii) *Commodities.* The following is a list of all the commodities in Crop Group 11–10.CROP GROUP 11–10: POME FRUIT GROUP—  
COMMODITIES

Apple, *Malus domestica* Borkh.  
 Azarole, *Crataegus azarolus* L.  
 Crabapple, *Malus sylvestris* (L.) Mill., *M. prunifolia* (Willd.) Borkh.  
 Loquat, *Eriobotrya japonica* (Thunb.) Lindl.  
 Mayhaw, *Crataegus aestivalis* (Walter) Torr. & A. Gray, *C. opaca*  
 Hook. & Arn., and *C. rufula* Sarg.  
 Medlar, *Mespilus germanica* L.  
 Pear, *Pyrus communis* L.  
 Pear, Asian, *Pyrus pyrifolia* (Burm. f.) Nakai var. *culta* (Makino) Nakai  
*Pseudocydonia sinensis* (Thouin) C.K. Schneid.  
 Quince, *Cydonia oblonga* Mill.

Quince, Chinese, *Chaenomeles speciosa* (Sweet) Nakai,Quince, Japanese, *Chaenomeles japonica* (Thunb.) Lindl. ex SpachTejocote, *Crataegus mexicana* DC.

Cultivars, varieties and/or hybrids of these.

(20) *Crop Group 12. Stone Fruits Group.*(i) *Representative commodities.* Sweet cherry or tart cherry; peach; and plum or fresh prune (*Prunus domestica*, *Prunus* spp.)(ii) *Commodities.* The following is a list of all the commodities included in Crop Group 12:CROP GROUP 12: STONE FRUITS GROUP—  
COMMODITIES

Apricot (*Prunus armeniaca*)  
 Cherry, sweet (*Prunus avium*),  
 Cherry, tart (*Prunus cerasus*)  
 Nectarine (*Prunus persica*)  
 Peach (*Prunus persica*)  
 Plum (*Prunus domestica*, *Prunus* spp.)  
 Plum, Chickasaw (*Prunus angustifolia*)  
 Plum, Damson (*Prunus domestica* spp. *insititia*)  
 Plum, Japanese (*Prunus salicina*)  
 Plumcot (*Prunus. armeniaca* × *P. domestica*)  
 Prune (fresh) (*Prunus domestica*, *Prunus* spp.)

(21) *Crop Group 12–12: Stone Fruit Group.*(i) *Representative commodities.* Sweet cherry or Tart cherry; Peach; and Plum or Prune plum.(ii) *Commodities.* The following Table 1 is a list of all commodities included in Crop Group 12–12.

TABLE 1—CROP GROUP 12–12: STONE FRUIT GROUP

| Commodities                                                                                            | Related crop subgroup |
|--------------------------------------------------------------------------------------------------------|-----------------------|
| Apricot ( <i>Prunus armeniaca</i> L.) .....                                                            | 12–12C                |
| Apricot, Japanese ( <i>Prunus mume</i> Siebold & Zucc.) .....                                          | 12–12C                |
| Capulin ( <i>Prunus serotina</i> Ehrh. var. <i>salicifolia</i> (Kunth) Koehne) .....                   | 12–12A                |
| Cherry, black ( <i>Prunus serotina</i> Ehrh.) .....                                                    | 12–12A                |
| Cherry, Nanking ( <i>Prunus tomentosa</i> Thunb.) .....                                                | 12–12A                |
| Cherry, sweet ( <i>Prunus avium</i> (L.) L.) .....                                                     | 12–12A                |
| Cherry, tart ( <i>Prunus cerasus</i> L.) .....                                                         | 12–12A                |
| Jujube, Chinese ( <i>Ziziphus jujuba</i> Mill.) .....                                                  | 12–12C                |
| Nectarine ( <i>Prunuspersica</i> (L.) Batsch var. <i>nucipersica</i> (Suckow) C.K. Schneid) .....      | 12–12B                |
| Peach ( <i>Prunus persica</i> (L.) Batsch var. <i>persica</i> ) .....                                  | 12–12B                |
| Plum ( <i>Prunus domestica</i> L. subsp. <i>domestica</i> ) .....                                      | 12–12C                |
| Plum, American ( <i>Prunus americana</i> Marshall) .....                                               | 12–12C                |
| Plum, beach ( <i>Prunus maritima</i> Marshall) .....                                                   | 12–12C                |
| Plum, Canada ( <i>Prunus nigra</i> Aiton) .....                                                        | 12–12C                |
| Plum, cherry ( <i>Prunus cerasifera</i> Ehrh.) .....                                                   | 12–12C                |
| Plum, Chickasaw ( <i>Prunus angustifolia</i> Marshall) .....                                           | 12–12C                |
| Plum, Damson ( <i>Prunus domestica</i> L. subsp. <i>insititia</i> (L.) C.K. Schneid.) .....            | 12–12C                |
| Plum, Japanese ( <i>Prunus salicina</i> Lindl.; <i>P. salicina</i> Lindl. var. <i>salicina</i> ) ..... | 12–12C                |
| Plum, Klamath ( <i>Prunus subcordata</i> Benth.) .....                                                 | 12–12C                |
| Plum, prune ( <i>Prunus domestica</i> L. subsp. <i>domestica</i> ) .....                               | 12–12C                |
| Plumcot ( <i>Prunus</i> hybr.) .....                                                                   | 12–12C                |
| Sloe ( <i>Prunus spinosa</i> L.) .....                                                                 | 12–12C                |
| Cultivars, varieties, and/or hybrids of these                                                          |                       |

(iii) *Crop subgroups.* The following Table 2 identifies the crop subgroups for Crop Group 12–12, specifies the representative commodities for each subgroup, and lists all the commodities included in each subgroup.

TABLE 2—CROP GROUP 12–12: SUBGROUP LISTING

| Representative commodities                   | Commodities                                                                                                                                                                                                                                          |
|----------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Crop subgroup 12–12A. Cherry subgroup</b> |                                                                                                                                                                                                                                                      |
| Cherry, sweet or Cherry, tart ....           | Capulin; Cherry, black; Cherry, Nanking; Cherry, sweet; Cherry, tart; cultivars, varieties, and/or hybrids of these.                                                                                                                                 |
| <b>Crop subgroup 12–12B. Peach subgroup</b>  |                                                                                                                                                                                                                                                      |
| Peach .....                                  | Peach; Nectarine; cultivars, varieties, and/or hybrids of these.                                                                                                                                                                                     |
| <b>Crop subgroup 12–12C. Plum subgroup</b>   |                                                                                                                                                                                                                                                      |
| Plum or Prune plum .....                     | Apricot; Apricot, Japanese; Jujube, Chinese; Plum; Plum, American; Plum, beach; Plum, Canada; Plum, cherry; Plum, Chickasaw; Plum, Damson; Plum, Japanese; Plum, Klamath; Plumcot; Plum, prune; Sloe; cultivars, varieties, and/or hybrids of these. |

(22) *Crop Group 13. Berries Group.*  
 (i) *Representative commodities.* Any one blackberry or any one raspberry; and blueberry.  
 (ii) *Table.* The following table 1 lists all the commodities included in Crop Group 13 and identifies the related subgroups.

TABLE 1—CROP GROUP 13: BERRIES GROUP

| Commodities                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | Related crop subgroups |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|
| Blackberry ( <i>Rubus eubatus</i> ) (including bingleberry, black satin berry, boysenberry, Cherokee blackberry, Chesterberry, Cheyenne blackberry, coryberry, darrowberry, dewberry, Dirksen thornless berry, Himalayaberry, hullberry, Lavacaberry, lowberry, Lucretiaberry, mammoth blackberry, marionberry, nectarberry, olallieberry, Oregon evergreen berry, phenomenalberry, rangeberry, ravenberry, rossberry, Shawnee blackberry, youngberry, and varieties and/or hybrids of these) ..... | 13A                    |
| Blueberry ( <i>Vaccinium</i> spp.) .....                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 13B                    |
| Currant ( <i>Ribes</i> spp.) .....                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | 13B                    |
| Elderberry ( <i>Sambucus</i> spp.) .....                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 13B                    |

TABLE 1—CROP GROUP 13: BERRIES GROUP—Continued

| Commodities                                                                                                 | Related crop subgroups |
|-------------------------------------------------------------------------------------------------------------|------------------------|
| Gooseberry ( <i>Ribes</i> spp.) .....                                                                       | 13B                    |
| Huckleberry ( <i>Gaylussacia</i> spp.) .....                                                                | 13B                    |
| Loganberry ( <i>Rubus loganobaccus</i> ) .....                                                              | 13A                    |
| Raspberry, black and red ( <i>Rubus occidentalis</i> , <i>Rubus strigosus</i> , <i>Rubus idaeus</i> ) ..... | 13A                    |

(iii) *Table*. The following table 2 identifies the crop subgroups for Crop Group 13, specifies the representative commodities for each subgroup, and lists all the commodities included in each subgroup.

TABLE 2—CROP GROUP 13 SUBGROUPS LISTING

| Representative commodities                                                                                                | Commodities                                                                         |
|---------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|
| <b>Crop Subgroup 13A.</b> Caneberry (blackberry and raspberry) subgroup.<br>Any one blackberry or any one raspberry ..... | Blackberry; loganberry; red and black raspberry; cultivars and/or hybrids of these. |
| <b>Crop Subgroup 13B.</b> Bushberry subgroup.<br>Blueberry, highbush .....                                                | Blueberry, highbush and lowbush; currant; elderberry; gooseberry; huckleberry.      |

(23) *Crop Group 13-07*. Berry and Small Fruit Crop Group

(i) *Representative commodities*. Any one blackberry or any one raspberry; highbush blueberry; elderberry or mul-

berry; grape; fuzzy kiwifruit, and strawberry.

(ii) *Table*. The following Table 1 lists all the commodities listed in Crop Group 13-07 and identifies the related crop subgroups.

\$ 180.41

### (24) Crop Group 14. Tree Nuts Group.

(i) *Representative commodities.* Almond and pecan.

(ii) *Commodities.* The following is a list of all the commodities included in Crop Group 14:

#### CROP GROUP 14: TREE NUTS—COMMODITIES

Almond (*Prunus dulcis*)  
Beech nut (*Fagus* spp.)  
Brazil nut (*Bertholletia excelsa*)  
Butternut (*Juglans cinerea*)  
Cashew (*Anacardium occidentale*)  
Chestnut (*Castanea* spp.)  
Chinquapin (*Castanea pumila*)  
Filbert (hazelnut) (*Corylus* spp.)  
Hickory nut (*Carya* spp.)  
Macadamia nut (bush nut) (*Macadamia* spp.)  
Pecan (*Carya illinoensis*)  
Walnut, black and English (Persian) (*Juglans* spp.)

### (25) Crop Group 14–12. Tree Nut Group.

(i) *Representative commodities.* Almond and Pecan.

(ii) *Commodities.* The following is a list of all commodities included in Crop Group 14–12.

#### CROP GROUP 14–12: TREE NUT GROUP

African nut-tree (*Ricinodendron heudelotii* (Baill.) Heckel)  
Almond (*Prunus dulcis* (Mill.) D.A. Webb)  
Beechnut (*Fagus grandifolia* Ehrh.; *F. sylvatica* L.)  
Brazil nut (*Bertholletia excelsa* Humb. & Bonpl.)  
Brazilian pine (*Araucaria angustifolia* (Bertol.) Kuntze)  
Bunya (*Araucaria bidwillii* Hook.)  
Bur oak (*Quercus macrocarpa* Michx.)  
Butternut (*Juglans cinerea* L.)  
Cajou nut (*Anacardium giganteum* Hance ex Engl.)  
Candlenut (*Aleurites moluccanus* (L.) Willd.)  
Cashew (*Anacardium occidentale* L.)  
Chestnut (*Castanea crenata* Siebold & Zucc.; *C. dentata* (Marshall) Borkh.; *C. mollissima* Blume; *C. sativa* Mill.)  
Chinquapin (*Castaneapumila* (L.) Mill.)  
Coconut (*Cocos nucifera* L.)  
Coquito nut (*Jubaea chilensis* (Molina) Baill.)  
Dika nut (*Irvingia gabonensis* (Aubry-Lecomte ex O'Rorke) Baill.)  
Ginkgo (*Ginkgo biloba* L.)  
Guiana chestnut (*Pachira aquatica* Aubl.)  
Hazelnut (Filbert) (*Corylus americana* Marshall; *C. avellana* L.; *C. californica* (A. DC.) Rose; *C. chinensis* Franch.)  
Heartnut (*Juglans ailantifolia* Carrière var. *cordiformis* (Makino) Rehder)  
Hickory nut (*Carya cathayensis* Sarg.; *C. glabra* (Mill.) Sweet; *C. laciniata* (F. Michx.) W. P. C. Barton; *C. myristiciformis* (F. Michx.) Elliott; *C. ovata* (Mill.) K. Koch; *C. tomentosa* (Lam.) Nutt.)

Japanese horse-chestnut (*Aesculus turbinata* Blume)

Macadamia nut (*Macadamia integrifolia* Maiden & Betche; *M. tetraphylla* L.A.S. Johnson)

Mongongo nut (*Schinziophyton rautanenii* (Schinz) Radcl.-Sm.)

Monkey-pot (*Lecythis pisonis* Cambess.)

Monkey puzzle nut (*Araucaria araucana* (Molina) K. Koch)

Okari nut (*Terminalia kaernbachii* Warb.)

Pachira nut (*Pachira insignis* (Sw.) Savigny)

Peach palm nut (*Bactris gasipaes* Kunth var. *gasipaes*)

Pecan (*Carya illinoensis* (Wangenh.) K. Koch)

Pequi (*Caryocar brasiliense* Cambess.; *C. villosum* (Aubl.) Pers.; *C. nuciferum* L.)

Pili nut (*Canarium ovatum* Engl.; *C. vulgare* Leenh.)

Pine nut (*Pinus edulis* Engelm.; *P. koraiensis* Siebold & Zucc.; *P. sibirica* Du Tour; *P. pumila* (Pall.) Regel; *P. gerardiana* Wall. ex D. Don; *P. monophylla* Torr. & Frém.; *P. quadrifolia* Parl. ex Sudw.; *P. pinea* L.)

Pistachio (*Pistacia vera* L.)

Sapucaia nut (*Lecythis zabucaja* Aubl.)

Tropical almond (*Terminalia catappa* L.)

Walnut, black (*Juglans nigra* L.; *J. hindsii* Jeps. ex R. E. Sm.; *J. microcarpa* Berland.)

Walnut, English (*Juglans regia* L.)

Yellowhorn (*Xanthoceras sorbifolium* Bunge)

Cultivars, varieties, and/or hybrids of these

### (26) Crop Group 15. Cereal Grains Group.

(i) *Representative commodities.* Corn (fresh sweet corn and dried field corn), rice, sorghum, and wheat.

(ii) *Commodities.* The following is a list of all the commodities included in Crop Group 15:

#### CROP GROUP 15: CEREAL GRAINS—COMMODITIES

Barley (*Hordeum* spp.)  
Buckwheat (*Fagopyrum esculentum*)  
Corn (*Zea mays*)  
Millet, pearl (*Pennisetum glaucum*)  
Millet, proso (*Panicum milliaceum*)  
Oats (*Avena* spp.)  
Popcorn (*Zea mays* var. *evarta*)  
Rice (*Oryza sativa*)  
Rye (*Secale cereale*)  
Sorghum (milo) (*Sorghum* spp.)  
Teosinte (*Euchlaena mexicana*)  
Triticale (*Triticum-Secale* hybrids)  
Wheat (*Triticum* spp.)  
Wild rice (*Zizania aquatica*)

### (27) Crop Group 15–22. Cereal Grain Group.

(i) *Representative commodities.* Wheat, barley, field corn, sweet corn, rice and either grain sorghum or proso millet.

(ii) *Commodities.* The following table is a list of all commodities included in

Crop Group 15–22 and includes cultivars, varieties and/or hybrids of these commodities.

TABLE 1 TO PARAGRAPH (c)(27)—CROP GROUP 15–22: CEREAL GRAIN GROUP

| Commodities                                                                                                                                               | Related crop subgroups |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|
| Amaranth, grain, <i>Amaranthus</i> spp .....                                                                                                              | 15–22A                 |
| Amaranth, purple, <i>Amaranthus cruentus</i> L .....                                                                                                      | 15–22A                 |
| Baby corn, <i>Zea mays</i> L. subsp. <i>mays</i> .....                                                                                                    | 15–22D                 |
| Barley, <i>Hordeum vulgare</i> L. subsp. <i>vulgare</i> .....                                                                                             | 15–22B                 |
| Buckwheat, <i>Fagopyrum esculentum</i> Moench .....                                                                                                       | 15–22B                 |
| Buckwheat, tartary, <i>Fagopyrum tataricum</i> (L.) Gaertn .....                                                                                          | 15–22B                 |
| Canarygrass, annual, <i>Phalaris canariensis</i> L .....                                                                                                  | 15–22B                 |
| Cañihua, <i>Chenopodium pallidicaule</i> Aellen .....                                                                                                     | 15–22A                 |
| Chia, <i>Salvia hispanica</i> L .....                                                                                                                     | 15–22A                 |
| Corn, field, <i>Zea mays</i> L. subsp. <i>mays</i> .....                                                                                                  | 15–22C                 |
| Corn, sweet, <i>Zea mays</i> L. subsp. <i>mays</i> .....                                                                                                  | 15–22D                 |
| Cram cram, <i>Cenchrus biflorus</i> Roxb .....                                                                                                            | 15–22A                 |
| Fonio, black, <i>Digitaria iburua</i> Stapf .....                                                                                                         | 15–22E                 |
| Fonio, white, <i>Digitaria exilis</i> (Kippist) Stapf .....                                                                                               | 15–22E                 |
| Grain sorghum, <i>Sorghum bicolor</i> (L.) Moench .....                                                                                                   | 15–22E                 |
| Huauzontle grain, <i>Chenopodium berlandieri</i> Moq. subsp. <i>nuttalliae</i> (Saff.) H. D. Wilson & Heiser and <i>Chenopodium berlandieri</i> Moq ..... | 15–22A                 |
| Inca wheat, <i>Amaranthus caudatus</i> L .....                                                                                                            | 15–22A                 |
| Job's tears, <i>Coix lacryma-jobi</i> L., <i>Coix lacryma-jobi</i> L. var. <i>ma-yun</i> (Rom. Caill.) Stapf .....                                        | 15–22E                 |
| Millet, barnyard, <i>Echinochloa frumentacea</i> Link .....                                                                                               | 15–22E                 |
| Millet, finger, <i>Eleusine coracana</i> (L.) Gaertn. subsp. <i>coracana</i> .....                                                                        | 15–22E                 |
| Millet, foxtail, <i>Setaria italica</i> (L.) P. Beauv. subsp. <i>italica</i> .....                                                                        | 15–22E                 |
| Millet, little, <i>Panicum sumatrense</i> Roth .....                                                                                                      | 15–22E                 |
| Millet, pearl, <i>Pennisetum glaucum</i> (L.) R. B. r .....                                                                                               | 15–22E                 |
| Millet, proso, <i>Panicum miliaceum</i> L. subsp. <i>miliaceum</i> .....                                                                                  | 15–22E                 |
| Oat, <i>Avena</i> spp .....                                                                                                                               | 15–22B                 |
| Oat, Abyssinian, <i>Avena abyssinica</i> Hochst. ex A. Rich .....                                                                                         | 15–22B                 |
| Oat, common, <i>Avena sativa</i> L .....                                                                                                                  | 15–22B                 |
| Oat, naked, <i>Avena nuda</i> L .....                                                                                                                     | 15–22B                 |
| Oat, sand, <i>Avena strigosa</i> Schreb .....                                                                                                             | 15–22B                 |
| Popcorn, <i>Zea mays</i> L. subsp. <i>mays</i> .....                                                                                                      | 15–22C                 |
| Prince's feather, <i>Amaranthus hypochondriacus</i> L .....                                                                                               | 15–22A                 |
| Psyllium, <i>Plantago arenaria</i> Waldst. & Kit .....                                                                                                    | 15–22A                 |
| Psyllium, blond, <i>Plantago ovata</i> Forssk .....                                                                                                       | 15–22A                 |
| Quinoa, <i>Chenopodium quinoa</i> Willd. subsp. <i>quinoa</i> .....                                                                                       | 15–22A                 |
| Rice, <i>Oryza sativa</i> L .....                                                                                                                         | 15–22F                 |
| Rice, African, <i>Oryza glaberrima</i> Steud .....                                                                                                        | 15–22F                 |
| Rye, <i>Secale cereale</i> L. subsp. <i>cereale</i> .....                                                                                                 | 15–22A                 |
| Teff, <i>Eragrostis tef</i> (Zuccagni) Trotter .....                                                                                                      | 15–22E                 |

| Wheat, macha, <i>Triticum aestivum</i> L. subsp. <i>macha</i> (Dekapr. & Menabde) Mackey .....                                                            | 15–22A                 |
| Wheat, oriental, <i>Triticum turgidum</i> L. subsp. <i>turanicum</i> (Jakubz.) A. Löve & D. Löve .....                                                    | 15–22A                 |
| Wheat, Persian, <i>Triticum turgidum</i> L. subsp. <i>carthlicum</i> (Nevski) A. Löve & D. Löve .....                                                     | 15–22A                 |
| Wheat, Polish, <i>Triticum turgidum</i> L. subsp. <i>polonicum</i> (L.) Thell .....                                                                       | 15–22A                 |
| Wheat, poulard, <i>Triticum turgidum</i> L. subsp. <i>turgidum</i> .....                                                                                  | 15–22A                 |
| Wheat, shot, <i>Triticum aestivum</i> L. subsp. <i>sphaerococcum</i> (Percival) Mackey .....                                                              | 15–22A                 |
| Wheat, spelt, <i>Triticum aestivum</i> L. subsp. <i>spelta</i> (L.) Thell .....                                                                           | 15–22A                 |
| Wheat, timopheevi, <i>Triticum timopheevii</i> (Zhuk.) Zhuk. subsp. <i>timopheevii</i> .....                                                              | 15–22A                 |
| Wheat, vavilovi, <i>Triticum vavilovii</i> Jakubz .....                                                                                                   | 15–22A                 |
| Wheat, wild einkorn, <i>Triticum monococcum</i> L. subsp. <i>aegilopoides</i> (Link) Thell .....                                                          | 15–22A                 |
| Wheat, wild emmer, <i>Triticum turgidum</i> L. subsp. <i>dicoccoides</i> (Körn. ex Asch. & Graebn.) Thell .....                                           | 15–22A                 |
| Wheatgrass, intermediate, <i>Isilema prostratum</i> (L.) Andersson .....                                                                                  | 15–22A                 |
| Wild rice, <i>Zizania palustris</i> L .....                                                                                                               | 15–22F                 |
| Wild rice, eastern, <i>Zizania aquatica</i> L .....                                                                                                       | 15–22F                 |
| Cultivars, varieties, and hybrids of these commodities.                                                                                                   |                        |

## Environmental Protection Agency

§ 180.41

(iii) *Crop subgroups.* The following table identifies the crop subgroups for Crop Group 15–22, specifies the representative commodities for each subgroup and lists all the commodities included in each subgroup.

TABLE 2 TO PARAGRAPH (c)(27)—CROP GROUP 15–22: SUBGROUP LISTING

| Representative commodities                                     | Commodities                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|----------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Crop Subgroup 15–22A: Wheat subgroup</b>                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Wheat .....                                                    | Amaranth, grain; Amaranth, purple; Cañihua; Chia; Cram cram; Huauzontle grain; Inca wheat; Prince's feather; Psyllium; Psyllium, blond; Quinoa; Rye; Triticale; Wheat; Wheat, club; Wheat, common; Wheat, durum; Wheat, einkorn; Wheat, emmer; Wheat, macha; Wheat, oriental; Wheat, Persian; Wheat, Polish; Wheat, poulard; Wheat, shot; Wheat, spelt; Wheat, timopheev; Wheat, vavilov; Wheat, wild einkorn; Wheat, wild emmer; Wheatgrass, intermediate; cultivars, varieties, and hybrids of these commodities. |

| Rice .....                                                     | Rice; Rice, African; Wild rice; Wild rice, eastern; cultivars, varieties, and hybrids of these commodities.                                                                                                                                                                                                                                                                                                                                                                                                         |

(28) *Crop Group 16.* Forage, Fodder and Straw of Cereal Grains Group.

(i) *Representative commodities.* Corn, wheat, and any other cereal grain crop.

(ii) *Commodities.* The commodities included in Crop Group 16 are: Forage, fodder, stover, and straw of all commodities included in the group cereal grains group. EPA may establish separate group tolerances on forage, fodder, hay, stover, or straw, if data on the representative commodities indicate differences in the levels of residues on forage, fodder, stover, or straw.

(29) *Crop Group 16–22.* Forage, Hay, Stover, and Straw of Cereal Grain Group.

(i) *Representative commodities.* Corn, wheat, and any other cereal grain crop.

(ii) *Commodities.* Crop Group 16–22 includes the forage, hay, stover and

straw of the commodities in Crop Group 15–22, including cultivars, varieties and/or hybrids of these commodities.

(30) *Crop Group 17.* Grass Forage, Fodder, and Hay Group.

(i) *Representative commodities.* Bermuda grass; bluegrass; and brome grass or fescue.

(ii) *Commodities.* The commodities included in Crop Group 17 are: Forage, fodder, stover, and hay of any grass, *Gramineae/Poaceae* family (either green or cured) except sugarcane and those included in the cereal grains group, that will be fed to or grazed by livestock, all pasture and range grasses and grasses grown for hay or silage. EPA may establish separate group tolerances on forage, fodder, stover, or

## § 180.41

hay, if data on the representative commodities indicate differences in the levels of residues on forage, fodder, stover, or hay.

(31) *Crop Group 18*. Nongrass Animal Feeds (Forage, Fodder, Straw, and Hay) Group.

(i) *Representative commodities*. Alfalfa and clover (*Trifolium* spp.)

(ii) *Commodities*. EPA may establish separate group tolerances on forage, fodder, straw, or hay, if data on the representative commodities indicate differences in the levels of residues on forage, fodder, straw, or hay. The following is a list of all the commodities included in Crop Group 18:

### CROP GROUP 18: NONGRASS ANIMAL FEEDS (FORAGE, FODDER, STRAW, AND HAY) GROUP—COMMODITIES

Alfalfa (*Medicago sativa* subsp. *sativa*)  
Bean, velvet (*Mucuna pruriens* var. *utilis*)  
Clover (*Trifolium* spp., *Melilotus* spp.)  
Kudzu (*Pueraria lobata*)  
Lespedeza (*Lespedeza* spp.)  
Lupin (*Lupinus* spp.)  
Sainfoin (*Onobrychis viciifolia*);  
Trefoil (*Lotus* spp.)  
Vetch (*Vicia* spp.)  
Vetch, crown (*Coronilla varia*)  
Vetch, milk (*Astragalus* spp.)

(32) *Crop Group 19*. Herbs and Spices Group.

(i) *Representative commodities*. Basil (fresh and dried); black pepper; chive; and celery seed or dill seed.

(ii) *Table*. The following table 1 lists all the commodities included in Crop Group 19 and identifies the related subgroups.

TABLE 1—CROP GROUP 19: HERBS AND SPICES GROUP

| Commodities                                      | Related crop sub-groups |
|--------------------------------------------------|-------------------------|
| Allspice ( <i>Pimenta dioica</i> )               | 19B                     |
| Angelica ( <i>Angelica archangelica</i> )        | 19A                     |
| Anise (anise seed) ( <i>Pimpinella anisum</i> )  | 19B                     |
| Anise, star ( <i>Illicium verum</i> )            | 19B                     |
| Annatto (seed)                                   | 19B                     |
| Balm (lemon balm) ( <i>Melissa officinalis</i> ) | 19A                     |
| Basil ( <i>Ocimum basilicum</i> )                | 19A                     |
| Borage ( <i>Borago officinalis</i> )             | 19A                     |
| Burnet ( <i>Sanguisorba minor</i> )              | 19A                     |
| Camomile ( <i>Anthemis nobilis</i> )             | 19A                     |
| Caper buds ( <i>Capparis spinosa</i> )           | 19B                     |
| Caraway ( <i>Carum carvi</i> )                   | 19B                     |
| Caraway, black ( <i>Nigella sativa</i> )         | 19B                     |
| Cardamom ( <i>Elettaria cardamomum</i> )         | 19B                     |
| Cassia bark ( <i>Cinnamomum aromaticum</i> )     | 19B                     |
| Cassia buds ( <i>Cinnamomum aromaticum</i> )     | 19B                     |

## 40 CFR Ch. I (7–1–25 Edition)

TABLE 1—CROP GROUP 19: HERBS AND SPICES GROUP—Continued

| Commodities                                                                                                      | Related crop sub-groups |
|------------------------------------------------------------------------------------------------------------------|-------------------------|
| Catnip ( <i>Nepeta cataria</i> )                                                                                 | 19A                     |
| Celery seed ( <i>Apicum graveolens</i> )                                                                         | 19B                     |
| Chervil (dried) ( <i>Anthriscus cerefolium</i> )                                                                 | 19A                     |
| Chive ( <i>Allium schoenoprasum</i> )                                                                            | 19A                     |
| Chive, Chinese ( <i>Allium tuberosum</i> )                                                                       | 19A                     |
| Cinnamon ( <i>Cinnamomum verum</i> )                                                                             | 19B                     |
| Clary ( <i>Salvia sclarea</i> )                                                                                  | 19A                     |
| Clove buds ( <i>Eugenia caryophyllata</i> )                                                                      | 19B                     |
| Coriander (cilantro or Chinese parsley) (leaf) ( <i>Coriandrum sativum</i> )                                     | 19A                     |
| Coriander (cilantro) (seed) ( <i>Coriandrum sativum</i> )                                                        | 19B                     |
| Costmary ( <i>Chrysanthemum balsamita</i> )                                                                      | 19A                     |
| Culantro (leaf) ( <i>Eryngium foetidum</i> )                                                                     | 19A                     |
| Culantro (seed) ( <i>Eryngium foetidum</i> )                                                                     | 19B                     |
| Cumin ( <i>Cuminum cyminum</i> )                                                                                 | 19B                     |
| Curry (leaf) ( <i>Murraya koenigii</i> )                                                                         | 19A                     |
| Dill (dillweed) ( <i>Anethum graveolens</i> )                                                                    | 19A                     |
| Dill (seed) ( <i>Anethum graveolens</i> )                                                                        | 19B                     |
| Fennel (common) ( <i>Foeniculum vulgare</i> )                                                                    | 19B                     |
| Fennel, Florence (seed) ( <i>Foeniculum vulgare</i> Azoricum Group)                                              | 19B                     |
| Fenugreek ( <i>Trigonella foenumgraecum</i> )                                                                    | 19B                     |
| Grains of paradise ( <i>Aframomum melegueta</i> )                                                                | 19B                     |
| Horehound ( <i>Marrubium vulgare</i> )                                                                           | 19A                     |
| Hyssop ( <i>Hyssopus officinalis</i> )                                                                           | 19A                     |
| Juniper berry ( <i>Juniperus communis</i> )                                                                      | 19B                     |
| Lavender ( <i>Lavandula officinalis</i> )                                                                        | 19A                     |
| Lemongrass ( <i>Cymbopogon citratus</i> )                                                                        | 19A                     |
| Lovage (leaf) ( <i>Levisticum officinale</i> )                                                                   | 19A                     |
| Lovage (seed) ( <i>Levisticum officinale</i> )                                                                   | 19B                     |
| Mace ( <i>Myristica fragrans</i> )                                                                               | 19B                     |
| Marigold ( <i>Calendula officinalis</i> )                                                                        | 19A                     |
| Marjoram ( <i>Origanum</i> spp.) (includes sweet or annual marjoram, wild marjoram or oregano, and pot marjoram) | 19A                     |
| Mustard (seed) ( <i>Brassica juncea</i> , <i>B. hirta</i> , <i>B. nigra</i> )                                    | 19B                     |
| Nasturtium ( <i>Trapaecolum majus</i> )                                                                          | 19A                     |
| Nutmeg ( <i>Myristica fragrans</i> )                                                                             | 19B                     |
| Parsley (dried) ( <i>Petroselinum crispum</i> )                                                                  | 19A                     |
| Pennyroyal ( <i>Mentha pulegium</i> )                                                                            | 19A                     |
| Pepper, black ( <i>Piper nigrum</i> )                                                                            | 19B                     |
| Pepper, white                                                                                                    | 19B                     |
| Poppy (seed) ( <i>Papaver somniferum</i> )                                                                       | 19B                     |
| Rosemary ( <i>Rosemarinus officinalis</i> )                                                                      | 19A                     |
| Rue ( <i>Ruta graveolens</i> )                                                                                   | 19A                     |
| Saffron ( <i>Crocus sativus</i> )                                                                                | 19B                     |
| Sage ( <i>Salvia officinalis</i> )                                                                               | 19A                     |
| Savory, summer and winter ( <i>Satureja</i> spp.)                                                                | 19A                     |
| Sweet bay (bay leaf) ( <i>Laurus nobilis</i> )                                                                   | 19A                     |
| Tansy ( <i>Tanacetum vulgare</i> )                                                                               | 19A                     |
| Tarragon ( <i>Artemisia dracunculus</i> )                                                                        | 19A                     |
| Thyme ( <i>Thymus</i> spp.)                                                                                      | 19A                     |
| Vanilla ( <i>Vanilla planifolia</i> )                                                                            | 19B                     |
| Wintergreen ( <i>Gaultheria procumbens</i> )                                                                     | 19A                     |
| Woodruff ( <i>Galium odorata</i> )                                                                               | 19A                     |
| Wormwood ( <i>Artemisia absinthium</i> )                                                                         | 19A                     |

(iii) *Table*. The following table 2 identifies the crop subgroups for Crop Group 19, specifies the representative commodities for each subgroup, and lists all the commodities included in each subgroup.

TABLE 2—CROP GROUP 19 SUBGROUPS

| Representative commodities                                                                    | Commodities                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|-----------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Crop Subgroup 19A.</b> Herb subgroup.<br>Basil (fresh and dried) and chive .....           | Angelica; balm; basil; borage; burnet; camomile; catnip; chervil (dried); chive; chive, Chinese, clary; coriander (leaf); costmary; culantro (leaf); curry (leaf); dillweed; horehound; hyssop; lavender; lemongrass; lovage (leaf); marigold; marjoram ( <i>Origanum</i> spp.); nasturtium; parsley (dried); pennyroyal; rosemary; rue; sage; savory, summer and winter; sweet bay; tansy; tarragon; thyme; wintergreen; woodruff; and wormwood. |
| <b>Crop Subgroup 19B.</b> Spice subgroup.<br>Black pepper; and celery seed or dill seed ..... | Allspice; anise (seed); anise, star; annatto (seed); caper (buds); caraway; caraway, black; cardamom; cassia (buds); celery (seed); cinnamon; clove (buds); coriander (seed); culantro (seed); cumin; dill (seed); fennel, common; fennel, Florence (seed); fenugreek; grains of paradise; juniper (berry); lovage (seed); mace; mustard (seed); nutmeg; pepper, black; pepper, white; poppy (seed); saffron; and vanilla.                        |

(iv) *Tolerances established after November 6, 2020.* After November 6, 2020, new herb crop group and subgroup tolerances will be established as Crop Group 25 or subgroups 25A and 25B, and new spice crop group tolerances will be established as Crop Group 26.

(33) *Crop Group 20.* Oilseed Group.

(i) *Representative commodities.* Rapeseed (canola varieties only); sunflower, seed and cottonseed.

(ii) *Table.* The following Table 1 lists all the commodities listed in Crop Group 20 and identifies the related crop subgroups and includes cultivars and/or varieties of these commodities.

TABLE 1—CROP GROUP 20: OILSEED GROUP

| Commodities                                                                                 | Related crop subgroups |
|---------------------------------------------------------------------------------------------|------------------------|
| Borage, <i>Borago officinalis</i> L .....                                                   | 20A                    |
| Calendula, <i>Calendula officinalis</i> L .....                                             | 20B                    |
| Castor oil plant, <i>Ricinus communis</i> L .....                                           | 20B                    |
| Chinese tallowtree, <i>Triadica sebifera</i> (L.) Small .....                               | 20B                    |
| Cottonseed, <i>Gossypium hirsutum</i> L. <i>Gossypium</i> spp .....                         | 20C                    |
| Crambe, <i>Crambe hispanica</i> L.; <i>C. abyssinica</i> Hochst. ex R.E. Fr .....           | 20A                    |
| Cuphea, <i>Cuphea hyssopifolia</i> Kunth .....                                              | 20A                    |
| Echium, <i>Echium plantagineum</i> L .....                                                  | 20A                    |
| Euphorbia, <i>Euphorbia esula</i> L .....                                                   | 20B                    |
| Evening primrose, <i>Oenothera biennis</i> L .....                                          | 20B                    |
| Flax seed, <i>Linum usitatissimum</i> L .....                                               | 20A                    |
| Gold of pleasure, <i>Camelina sativa</i> (L.) Crantz .....                                  | 20A                    |
| Hare's ear mustard, <i>Conringia orientalis</i> (L.) Dumort .....                           | 20A                    |
| Jobba, <i>Simmondsia chinensis</i> (Link) C.K. Schneid .....                                | 20B                    |
| Lesquerella, <i>Lesquerella recurvata</i> (Engelm. ex A. Gray) S. Watson .....              | 20A                    |
| Lunaria, <i>Lunaria annua</i> L .....                                                       | 20A                    |
| Meadowfoam, <i>Limnanthes alba</i> Hartw. ex Benth .....                                    | 20A                    |
| Milkweed, <i>Asclepias</i> spp .....                                                        | 20A                    |
| Mustard seed, <i>Brassica hirta</i> Moench, <i>Sinapis alba</i> L. subsp. <i>Alba</i> ..... | 20A                    |
| Niger seed, <i>Guizotia abyssinica</i> (L.f.) Cass .....                                    | 20B                    |
| Oil radish, <i>Raphanus sativus</i> L. var. <i>oleiformis</i> Pers .....                    | 20A                    |
| Poppy seed, <i>Papaver somniferum</i> L. subsp. <i>Somniferum</i> .....                     | 20A                    |
| Rapeseed, <i>Brassica</i> spp.; <i>B. napus</i> L .....                                     | 20A                    |
| Rose hip, <i>Rosa rubiginosa</i> L .....                                                    | 20B                    |
| Safflower, <i>Carthamus tinctorius</i> L .....                                              | 20B                    |
| Sesame, <i>Sesamum indicum</i> L., <i>S. radiatum</i> Schumach. & honn .....                | 20A                    |
| Stokes aster, <i>Stokesia laevis</i> (Hill) Greene .....                                    | 20B                    |
| Sunflower, <i>Helianthus annuus</i> L .....                                                 | 20B                    |
| Sweet rocket, <i>Hesperis matronalis</i> L .....                                            | 20A                    |
| Tallowwood, <i>Ximenia americana</i> L .....                                                | 20B                    |
| Tea oil plant, <i>Camellia oleifera</i> C. Abel .....                                       | 20B                    |
| Vernonia, <i>Vernonia galamensis</i> (Cass.) Less .....                                     | 20B                    |
| Cultivars, varieties, and/or hybrids of these.                                              |                        |

(iii) *Table.* The following Table 2 identifies the crop subgroups for Crop Group 20, specifies the representative commodities for each subgroup and lists all the commodities included in each subgroup.

TABLE 2—CROP GROUP 20: SUBGROUP LISTING

| Representative commodities                                                    | Commodities                                                                                                                                                                                                                                      |
|-------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Crop subgroup 20A. Rapeseed subgroup<br>Rapeseed, canola varieties only ..... | Borage; crambe; cuphea; echium; flax seed; gold of pleasure; hare's ear mustard; lesquerella; lunaria; meadowfoam; milkweed; mustard seed; oil radish; poppy seed; rapeseed; sesame; sweet rocket cultivars, varieties, and/or hybrids of these. |
| Crop subgroup 20B. Sunflower subgroup<br>Sunflower, seed .....                | Calendula; castor oil plant; chinese tallowtree; euphorbia; evening primrose; jojoba; niger seed; rose hip; safflower; stokes aster; sunflower; tallowwood; tea oil plant; vernonia; cultivars, varieties, and/or hybrids of these.              |
| Crop subgroup 20C. Cottonseed subgroup<br>Cottonseed .....                    | Cottonseed; cultivars, varieties, and/or hybrids of these.                                                                                                                                                                                       |

(34) *Crop Group 21.* Edible fungi Group.

(i) *Representative commodities.* White button mushroom and any one oyster mushroom or any Shiitake mushroom.

(ii) *Table.* The following is a list of all the commodities in Crop Group 21. There are no related subgroups.

CROP GROUP 21—EDIBLE FUNGI GROUP—COMMODITIES

Blewitt (*Lepista nuda*)  
 Bunashimeji (*Hypsizygus marmoreus*)  
 Chinese mushroom (*Volvariella volvacea*) (Bull.) Singer  
 Enoki (*Flammulina velutipes*) (Curt.) Singer  
 Hime-Matsutake (*Agaricus blazei*) Murill  
 Hirneola (*Auricularia auricular*)  
 Maitake (*Grifola frondosa*)  
 Morel (*Morchella* spp.)  
 Nameko (*Pholiota nameko*)  
 Net Bearing (*Dictyophora*)  
 Oyster mushroom (*Pleurotus* spp.)  
 Pom Pom (*Hericium erinaceus*)  
 Reishi mushroom (*Ganoderma lucidum* (Leyss. Fr.) Karst.)  
 Rodman's agaricus (*Agaricus bitorquis*) (Quel.) Saccardo  
 Shiitake mushroom (*Lentinula edodes* (Berk.) Pegl.)  
 Shimeji (*Tricholoma conglobatum*)  
 Stropharia (*Stropharia* spp.)  
 Truffle (*Tuber* spp.)  
 White button mushroom (*Agaricus bisporus* (Lange) Imbach)  
 White Jelly Fungi (*Tremella fuciformis*)

(35) *Crop Group 22.* Stalk, Stem and Leaf Petiole Vegetable Group.

(i) *Representative commodities.* Asparagus and celery.

(ii) *Commodities.* The following Table 1 lists all commodities included in Crop Group 22.

TABLE 1—CROP GROUP 22: STALK, STEM AND LEAF PETIOLE VEGETABLE GROUP

| Commodities                                                                                                                                                                                                                                              | Related crop subgroups |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|
| Agave ( <i>Agave</i> spp.) .....                                                                                                                                                                                                                         | 22A                    |
| Aloe vera ( <i>Aloe vera</i> (L.) Burm.f.) .....                                                                                                                                                                                                         | 22A                    |
| Asparagus ( <i>Asparagus officinalis</i> L.) .....                                                                                                                                                                                                       | 22A                    |
| Bamboo, shoots ( <i>Arundinaria</i> spp.; <i>Bambusa</i> spp.; <i>Chimonobambusa</i> spp.; <i>Dendrocalamus</i> spp.; <i>Fargesia</i> spp.; <i>Gigantochloa</i> spp.; <i>Nastus elatus</i> ; <i>Phyllostachys</i> spp.; <i>Thyrsostachys</i> spp.) ..... | 22A                    |
| Cardoon ( <i>Cynara cardunculus</i> L.) .....                                                                                                                                                                                                            | 22B                    |
| Celery ( <i>Apium graveolens</i> var. <i>dulce</i> (Mill.) Pers.) .....                                                                                                                                                                                  | 22B                    |
| Celery, Chinese ( <i>Apium graveolens</i> L. var. <i>secalinum</i> (Alef.) Mansf.) .....                                                                                                                                                                 | 22B                    |
| Celtuce ( <i>Lactuca sativa</i> var. <i>angustana</i> L.H. Bailey) .....                                                                                                                                                                                 | 22A                    |
| Fennel, Florence, fresh leaves and stalk ( <i>Foeniculum vulgare</i> subsp. <i>vulgare</i> var. <i>azoricum</i> (Mill.) Thell.) .....                                                                                                                    | 22A                    |
| Fern, edible, fiddlehead .....                                                                                                                                                                                                                           | 22A                    |

TABLE 1—CROP GROUP 22: STALK, STEM AND LEAF PETIOLE VEGETABLE GROUP—Continued

| Commodities                                                                                                                                | Related crop subgroups |
|--------------------------------------------------------------------------------------------------------------------------------------------|------------------------|
| Fuki ( <i>Petasites japonicus</i> (Siebold & Zucc.) Maxim.) .....                                                                          | 22B                    |
| Kale, sea ( <i>Crambe maritima</i> L.) .....                                                                                               | 22A                    |
| Kohlrabi ( <i>Brassica oleracea</i> L. var <i>gongylodes</i> L.) .....                                                                     | 22A                    |
| Palm hearts (various species) .....                                                                                                        | 22A                    |
| Prickly pear, pads ( <i>Opuntia ficus-indica</i> (L.) Mill., <i>Opuntia</i> spp.) .....                                                    | 22A                    |
| Prickly pear, Texas, pads ( <i>Opuntia engelmannii</i> Salm-Dyck ex Engelm. var. <i>lindheimeri</i> (Engelm.) B.D. Parfitt & Pinkav) ..... | 22A                    |
| Rhubarb ( <i>Rheum x rhabarbarum</i> L.) .....                                                                                             | 22B                    |
| Udo ( <i>Aralia cordata</i> Thunb. ) .....                                                                                                 | 22B                    |
| Zuiki ( <i>Colocasia gigantea</i> (Blume) Hook. f.) .....                                                                                  | 22B                    |
| Cultivars, varieties, and hybrids of these commodities.                                                                                    |                        |

(iii) *Crop subgroups.* The following Table 2 identifies the crop subgroups for Crop Group 22, specifies the representative commodities for each subgroup, and lists all the commodities included in each subgroup.

TABLE 2—CROP GROUP 22: SUBGROUP LISTING

| Representative commodities                                  | Commodities                                                                                                                                                                                                                                                        |
|-------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Crop Subgroup 22A. Stalk and stem vegetable subgroup</b> |                                                                                                                                                                                                                                                                    |
| Asparagus .....                                             | Agave; aloe vera; asparagus; bamboo, shoots; celtuce; fennel, Florence, fresh leaves and stalk; fern, edible, fiddlehead; kale, sea; kohlrabi; palm hearts; prickly pear, pads; prickly pear, Texas, pads; cultivars, varieties, and hybrids of these commodities. |
| <b>Crop Subgroup 22B. Leaf petiole vegetable subgroup</b>   |                                                                                                                                                                                                                                                                    |
| Celery .....                                                | Cardoon; celery; celery, Chinese; fuki; rhubarb; udo; zuiki; cultivars, varieties, and hybrids of these commodities.                                                                                                                                               |

(36) *Crop Group 23.* Tropical and Subtropical Fruit, Edible Peel Group.

(i) *Representative commodities.* Date, fig, guava, and olive.

(ii) *Commodities.* The following Table 1 lists all commodities included in Crop Group 23.

TABLE 1—CROP GROUP 23: TROPICAL AND SUBTROPICAL FRUIT, EDIBLE PEEL GROUP

| Commodities                                                                  | Related crop subgroups |
|------------------------------------------------------------------------------|------------------------|
| Açaí ( <i>Euterpe oleracea</i> Mart.) .....                                  | 23C                    |
| Acerola ( <i>Malpighia emarginata</i> DC.) .....                             | 23A                    |
| Achachairú ( <i>Garcinia gardneriana</i> (Planch. & Triana) Zappi) .....     | 23B                    |
| African plum ( <i>Vitex doniana</i> Sweet) .....                             | 23A                    |
| Agritos ( <i>Berberis trifoliolata</i> Moric.) .....                         | 23A                    |
| Almondette ( <i>Buchanania lanzan</i> Spreng.) .....                         | 23A                    |
| Ambarella ( <i>Spondias dulcis</i> Sol. ex Parkinson) .....                  | 23B                    |
| Apak palm ( <i>Brahea dulcis</i> (Kunth) Mart.) .....                        | 23C                    |
| Appleberry ( <i>Billardiera scandens</i> Sm.) .....                          | 23A                    |
| Arazá ( <i>Eugenia stipitata</i> McVaugh) .....                              | 23B                    |
| Arbutus berry ( <i>Arbutus unedo</i> L.) .....                               | 23A                    |
| Babaco ( <i>Vasconcellea x heilbornii</i> (V.M. Badillo) V.M. Badillo) ..... | 23B                    |
| Bacaba palm ( <i>Oenocarpus bacaba</i> Mart.) .....                          | 23C                    |
| Bacaba-de-leque ( <i>Oenocarpus distichus</i> Mart.) .....                   | 23C                    |
| Bayberry, red ( <i>Morella rubra</i> Lour.) .....                            | 23A                    |
| Bignay ( <i>Antidesma bunius</i> (L.) Spreng.) .....                         | 23A                    |
| Bilimbi ( <i>Averrhoa bilimbi</i> L.) .....                                  | 23B                    |
| Borojó ( <i>Borjoa patinoi</i> Cuatrec.) .....                               | 23B                    |
| Breadnut ( <i>Brosimum alicastrum</i> Sw.) .....                             | 23A                    |
| Cabeluda ( <i>Plinia glomerata</i> (O. Berg) Amshoff) .....                  | 23A                    |
| Cajou, fruit ( <i>Anacardium giganteum</i> Hance ex Engl.) .....             | 23B                    |
| Cambucá ( <i>Marlierea edulis</i> Nied.) .....                               | 23B                    |
| Carandas-plum ( <i>Carissa edulis</i> Vahl) .....                            | 23A                    |

TABLE 1—CROP GROUP 23: TROPICAL AND SUBTROPICAL FRUIT, EDIBLE PEEL GROUP—Continued

| Commodities                                                                                                              | Related crop subgroups |
|--------------------------------------------------------------------------------------------------------------------------|------------------------|
| Carob ( <i>Ceratonia siliqua</i> L.) .....                                                                               | 23B                    |
| Cashew apple ( <i>Anacardium occidentale</i> L.) .....                                                                   | 23B                    |
| Ceylon iron wood ( <i>Manilkara hexandra</i> (Roxb.) Dubard) .....                                                       | 23A                    |
| Ceylon olive ( <i>Elaeocarpus serratus</i> L.) .....                                                                     | 23A                    |
| Cherry-of-the-Rio-Grande ( <i>Eugenia aggregata</i> (Vell.) Kiaersk.) .....                                              | 23A                    |
| Chinese olive, black ( <i>Canarium trandenum</i> C.D. Dai & Yakovlev) .....                                              | 23A                    |
| Chinese olive, white ( <i>Canarium album</i> (Lour.) Raeusch.) .....                                                     | 23A                    |
| Chirauli-nut ( <i>Buchanania latifolia</i> Roxb.) .....                                                                  | 23A                    |
| Ciruela verde ( <i>Bunchosia armeniaca</i> (Cav.) DC.) .....                                                             | 23B                    |
| Cocoplum ( <i>Chrysobalanus icaco</i> L.) .....                                                                          | 23A                    |
| Date ( <i>Phoenix dactylifera</i> L.) .....                                                                              | 23C                    |
| Davidson's plum ( <i>Davidsonia pruriens</i> F. Muell.) .....                                                            | 23B                    |
| Desert-date ( <i>Balanites aegyptiacus</i> (L.) Delile) .....                                                            | 23A                    |
| Doum palm coconut ( <i>Hyphaene thebaica</i> (L.) Mart.) .....                                                           | 23C                    |
| False sandalwood ( <i>Ximenia americana</i> L.) .....                                                                    | 23A                    |
| Feijoa ( <i>Acca sellowiana</i> (O. Berg) Burret) .....                                                                  | 23B                    |
| Fig ( <i>Ficus carica</i> L.) .....                                                                                      | 23B                    |
| Fragrant manjack ( <i>Cordia dichotoma</i> G. Forst.) .....                                                              | 23A                    |
| Gooseberry, abyssinian ( <i>Dovyalis abyssinica</i> (A. Rich.) Warb.) .....                                              | 23A                    |
| Gooseberry, Ceylon ( <i>Dovyalis hebecarpa</i> (Gardner) Warb.) .....                                                    | 23A                    |
| Gooseberry, Indian ( <i>Phyllanthus emblica</i> L.) .....                                                                | 23B                    |
| Gooseberry, otaheite ( <i>Phyllanthus acidus</i> (L.) Skeels) .....                                                      | 23A                    |
| Governor's plum ( <i>Flacourtia indica</i> (Burm. F.) Merr.) .....                                                       | 23A                    |
| Grumichama ( <i>Eugenia brasiliensis</i> Lam) .....                                                                      | 23A                    |
| Guabiroba ( <i>Campomanesia xanthocarpa</i> O. Berg) .....                                                               | 23A                    |
| Guava ( <i>Psidium guajava</i> L.) .....                                                                                 | 23B                    |
| Guava berry ( <i>Myrciaria floribunda</i> (H. West ex Willd.) O. Berg) .....                                             | 23A                    |
| Guava, Brazilian ( <i>Psidium guineense</i> Sw.) .....                                                                   | 23A                    |
| Guava, cattley ( <i>Psidium cattleyanum</i> Sabine) .....                                                                | 23B                    |
| Guava, Costa Rican ( <i>Psidium friedrichsthalianum</i> (O. Berg) Nied.) .....                                           | 23A                    |
| Guava, Para ( <i>Psidium acutangulum</i> DC.) .....                                                                      | 23B                    |
| Guava, purple strawberry ( <i>Psidium cattleyanum</i> Sabine var. <i>cattleyanum</i> ) .....                             | 23B                    |
| Guava, strawberry ( <i>Psidium cattleyanum</i> Sabine var. <i>littorale</i> (Raddi) Fosberg) .....                       | 23B                    |
| Guava, yellow strawberry ( <i>Psidium cattleyanum</i> Sabine var. <i>cattleyanum</i> forma <i>lucidum</i> O. Deg.) ..... | 23B                    |
| Guayabillo ( <i>Psidium sartorianum</i> (O. Berg) Nied.) .....                                                           | 23A                    |
| Illawarra plum ( <i>Podocarpus elatus</i> R. Br. Ex Endl.) .....                                                         | 23A                    |
| Imbé ( <i>Garcinia livingstonei</i> T. Anderson) .....                                                                   | 23B                    |
| Imbu ( <i>Spondias tuberosa</i> Arruda ex Kost.) .....                                                                   | 23B                    |
| Indian-plum ( <i>Flacourtia jangomas</i> (Lour.) basionym) .....                                                         | 23A                    |
| Jaboticaba ( <i>Myrciaria cauliflora</i> (Mart.) O. Berg) .....                                                          | 23B                    |
| Jamaica-cherry ( <i>Muntingia calabura</i> L.) .....                                                                     | 23A                    |
| Jambolan ( <i>Syzygium cumini</i> (L.) Skeels) .....                                                                     | 23A                    |
| Jelly palm ( <i>Butia capitata</i> (Mart.) Becc.) .....                                                                  | 23C                    |
| Jujube, Indian ( <i>Ziziphus mauritiana</i> Lam.) .....                                                                  | 23B                    |
| Kaffir-plum ( <i>Harpephyllum caffrum</i> Bernh. Ex C. Krauss) .....                                                     | 23A                    |
| Kakadu plum ( <i>Terminalia latipes</i> Benth. subsp. <i>psilocarpa</i> Pedley) .....                                    | 23A                    |
| Kapundung ( <i>Baccaurea racemosa</i> (Reinw.) Mull. Arg.) .....                                                         | 23A                    |
| Karanda ( <i>Carissa carandas</i> L.) .....                                                                              | 23A                    |
| Kwai muk ( <i>Artocarpus hypargyreus</i> Hance ex Benth.) .....                                                          | 23B                    |
| Lemon aspen ( <i>Acronychia acidula</i> F. Muell) .....                                                                  | 23A                    |
| Mangaba ( <i>Hancornia speciosa</i> Gomes) .....                                                                         | 23B                    |
| Marian plum ( <i>Bouea macrophylla</i> Griff.) .....                                                                     | 23B                    |
| Mombin, malayan ( <i>Spondias pinnata</i> (J. Koenig ex L. f.) Kurz) .....                                               | 23B                    |
| Mombin, purple ( <i>Spondias purpurea</i> L.) .....                                                                      | 23B                    |
| Mombin, yellow ( <i>Spondias mombin</i> L.) .....                                                                        | 23A                    |
| Monkeyfruit ( <i>Artocarpus lacucha</i> Buch. Ham.) .....                                                                | 23B                    |
| Monos plum ( <i>Pseudanannomom umbellulifera</i> (Kunth) Kausel) .....                                                   | 23A                    |
| Mountain cherry ( <i>Bunchosia cornifolia</i> Kunth) .....                                                               | 23A                    |
| Nance ( <i>Byrsonima crassifolia</i> (L.) Kunth) .....                                                                   | 23B                    |
| Natal plum ( <i>Carissa macrocarpa</i> (Eckl.) A. DC.) .....                                                             | 23B                    |
| Noni ( <i>Morinda citrifolia</i> L.) .....                                                                               | 23B                    |
| Olive ( <i>Olea europaea</i> L. subsp. <i>europaea</i> ) .....                                                           | 23A                    |
| Papaya, mountain ( <i>Vasconcellea pubescens</i> A. DC.) .....                                                           | 23B                    |
| Pataua ( <i>Oenocarpus bataua</i> Mart.) .....                                                                           | 23C                    |
| Peach palm, fruit ( <i>Bactris gasipaes</i> Kunth var. <i>gasipaes</i> ) .....                                           | 23C                    |
| Persimmon, black ( <i>Diospyros texana</i> Scheele) .....                                                                | 23A                    |
| Persimmon, Japanese ( <i>Diospyros kaki</i> Thunb.) .....                                                                | 23B                    |
| Pitomba ( <i>Eugenia luschnathiana</i> Klotzsch ex O. Berg) .....                                                        | 23A                    |
| Plum-of-Martinique ( <i>Flacourtia inermis</i> Roxb.) .....                                                              | 23A                    |
| Pomerac ( <i>Syzygium malaccense</i> (L.) Merr. & L.M. Perry) .....                                                      | 23B                    |
| Rambai ( <i>Baccaurea motleyana</i> (Mull. Arg.) Mull. Arg.) .....                                                       | 23B                    |

TABLE 1—CROP GROUP 23: TROPICAL AND SUBTROPICAL FRUIT, EDIBLE PEEL GROUP—Continued

| Commodities                                                                | Related crop subgroups |
|----------------------------------------------------------------------------|------------------------|
| Rose apple ( <i>Syzygium jambos</i> (L.) Alston) .....                     | 23B                    |
| Rukam ( <i>Flacourtia rukam</i> Zoll. & Moritzi) .....                     | 23A                    |
| Rumberry ( <i>Myrciaria dubia</i> (Kunth) McVaugh <i>Myrtaceae</i> ) ..... | 23A                    |
| Sea grape ( <i>Coccoloba uvifera</i> (L.) L.) .....                        | 23A                    |
| Sentul ( <i>Sandoricum koetjape</i> (Burm. F.) Merr.) .....                | 23B                    |
| Sete-capotes ( <i>Campomanesia guazumifolia</i> (Cambess.) O. Berg) .....  | 23A                    |
| Silver aspen ( <i>Acronychia wilcoxian</i> (F. Muell.) T.G. Hartley) ..... | 23A                    |
| Starfruit ( <i>Averrhoa carambola</i> L.) .....                            | 23B                    |
| Surinam cherry ( <i>Eugenia uniflora</i> L.) .....                         | 23B                    |
| Tamarind ( <i>Tamarindus indica</i> L.) .....                              | 23B                    |
| Uvalha ( <i>Eugenia pyriformis</i> Cambess.) .....                         | 23B                    |
| Water apple ( <i>Syzygium aqueum</i> (Burm. F.) Alston) .....              | 23A                    |
| Water pear ( <i>Syzygium guineense</i> (Willd.) DC) .....                  | 23A                    |
| Water berry ( <i>Syzygium cordatum</i> Hochst. Ex C. Krauss) .....         | 23A                    |
| Wax jambu ( <i>Syzygium samarangense</i> (Blume) Merr. & L.M. Perry) ..... | 23A                    |
| Cultivars, varieties, and hybrids of these commodities.                    |                        |

(iii) *Table.* The following Table 2 identifies the crop subgroups for Crop Group 23, specifies the representative commodities for each subgroup, and lists all the commodities included in each subgroup.

TABLE 2—CROP GROUP 23: SUBGROUP LISTING

| Representative commodities                                                                      | Commodities                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|-------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Crop Subgroup 23A. Tropical and Subtropical, Small fruit, edible peel subgroup</b>           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Olive .....                                                                                     | Acerola; African plum; agritos; almondette; appleberry; arbutus berry; bayberry, red; bignay; breadnut; cabeluda; carandas-plum; Ceylon iron wood; Ceylon olive; cherry-of-the-Rio-Grande; Chinese olive, black; Chinese olive, white; chirauli-nut; cocoplum; desert-date; false sandalwood; fragrant manjack; gooseberry, abyssinian; gooseberry, Ceylon; gooseberry, otaheite; governor's plum; grumichama; guabiroba; guava berry; guava, Brazilian; guava, Costa Rican; guayabillo; illawarra plum; Indian-plum; Jamaica-cherry; jambolan; kaffir-plum; kakadu plum; kapundung; karanda; lemon aspen; mombin, yellow; monos plum; mountain cherry; olive; persimmon, black; pitomba; plum-of-Martinique; rukam; rumberry; sea grape; sete-capotes; silver aspen; water apple; water pear; water berry; wax jambu; cultivars, varieties, and hybrids of these commodities. |
| <b>Crop Subgroup 23B. Tropical and Subtropical, Medium to large fruit, edible peel subgroup</b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Fig and guava .....                                                                             | Achachairú; ambarella; arazá; babaco; bilimbi; borojó; cajou, fruit; cambucá; carob; cashew apple; ciruela verde; davidson's plum; feijoa; fig; gooseberry, Indian; guava; guava, cattley; guava, Para; guava, purple strawberry; guava, strawberry; guava, yellow strawberry; imbe; imbu; jaboticaba; jujube, Indian; kwai muk; mangaba; Marian plum; mombin, Malayan; mombin, purple; monkeyfruit; nance; natal plum; noni; papaya, mountain; persimmon, Japanese; pomerac; rambai; rose apple; sentul; starfruit; Surinam cherry; tamarind; uvalha; cultivars, varieties, and hybrids of these commodities.                                                                                                                                                                                                                                                                 |
| <b>Crop Subgroup 23C. Tropical and Subtropical, Palm fruit, edible peel subgroup</b>            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Date .....                                                                                      | Açaí; apak palm; bacaba palm; bacaba-de-leque; date; doum palm coconut; jelly palm; pataúá; peach palm, fruit; cultivars, varieties, and hybrids of these commodities.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

(37) *Crop Group 24.* Tropical and Subtropical Fruit, Inedible Peel Group.

(i) *Representative commodities.* Atemoya or sugar apple, avocado, banana or pomegranate, dragon fruit,

lychee, passionfruit, pineapple, and prickly pear, fruit.

(ii) *Commodities.* The following Table 1 lists all commodities included in Crop Group 24.

TABLE 1—CROP GROUP 24: TROPICAL AND SUBTROPICAL FRUIT, INEDIBLE PEEL GROUP

| Commodities                                                                                                      | Related crop subgroups |
|------------------------------------------------------------------------------------------------------------------|------------------------|
| Abiu ( <i>Pouteria caimito</i> (Ruiz & Pav.) Radlk.) .....                                                       | 24B                    |
| Aisen ( <i>Boscia senegalensis</i> (Pers.) Lam.) .....                                                           | 24A                    |
| Akee apple ( <i>Blighia sapida</i> K.D. Koenig) .....                                                            | 24B                    |
| Atemoya ( <i>Annona cherimola</i> Mill. X <i>A. squamosa</i> L.) .....                                           | 24C                    |
| Avocado ( <i>Persea americana</i> Mill.) .....                                                                   | 24B                    |
| Avocado, Guatemalan ( <i>Persea americana</i> Mill. var. <i>guatemalensis</i> ) .....                            | 24B                    |
| Avocado, Mexican ( <i>Persea americana</i> Mill. var. <i>drymifolia</i> (Schltdl. & Cham.) S.F. Blak) .....      | 24B                    |
| Avocado, West Indian ( <i>Persea americana</i> var. <i>americana</i> ) .....                                     | 24B                    |
| Bacury ( <i>Platonia insignis</i> Mart.) .....                                                                   | 24B                    |
| Bael fruit ( <i>Aegle marmelos</i> (L.) Corrêa) .....                                                            | 24A                    |
| Banana ( <i>Musa</i> spp.) .....                                                                                 | 24B                    |
| Banana, dwarf ( <i>Musa</i> hybrids; <i>Musa acuminata</i> Colla) .....                                          | 24B                    |
| Binjai ( <i>Mangifera caesia</i> Jack) .....                                                                     | 24B                    |
| Biriba ( <i>Annona mucosa</i> Jacq.) .....                                                                       | 24C                    |
| Breadfruit ( <i>Artocarpus altissimus</i> (Parkinson) Fosberg) .....                                             | 24C                    |
| Burmese grape ( <i>Baccaurea ramiflora</i> Lour.) .....                                                          | 24A                    |
| Canistel ( <i>Pouteria campechiana</i> (Kunth) Baehni) .....                                                     | 24B                    |
| Cat's-eyes ( <i>Dimocarpus longan</i> Lour. subsp. <i>malesianus</i> Leenh.) .....                               | 24A                    |
| Champedak ( <i>Artocarpus integer</i> (Thunb.) Merr.) .....                                                      | 24C                    |
| Cherimoya ( <i>Annona cherimola</i> Mill.) .....                                                                 | 24C                    |
| Cupuacú ( <i>Theobroma grandiflorum</i> (Willd. Ex Spreng.) K. Schum.) .....                                     | 24B                    |
| Custard apple ( <i>Annona reticulata</i> L.) .....                                                               | 24C                    |
| Dragon fruit ( <i>Hylocereus undatus</i> (Haw.) Britton & Rose) .....                                            | 24D                    |
| Durian ( <i>Durio zibethinus</i> L.) .....                                                                       | 24C                    |
| Elephant-apple ( <i>Limonia acidissima</i> L.) .....                                                             | 24C                    |
| Etambe ( <i>Mangifera zeylanica</i> (Blume) Hook. F.) .....                                                      | 24B                    |
| Granadilla ( <i>Passiflora ligularis</i> Juss.) .....                                                            | 24E                    |
| Granadilla, giant ( <i>Passiflora quadrangularis</i> L.) .....                                                   | 24E                    |
| Ilama ( <i>Annona macrophyllata</i> Donn. Sm.) .....                                                             | 24C                    |
| Ingá ( <i>Inga vera</i> Willd. subsp. <i>affinis</i> (DC.) T.D. Penn.) .....                                     | 24A                    |
| Jackfruit ( <i>Artocarpus heterophyllus</i> Lam.) .....                                                          | 24C                    |
| Jatobá ( <i>Hymenaea courbaril</i> L.) .....                                                                     | 24B                    |
| Karuka ( <i>Pandanus julianettii</i> Martelli) .....                                                             | 24C                    |
| Kei apple ( <i>Dovyalis caffra</i> (Hook. F. & Harv.) Warb.) .....                                               | 24B                    |
| Langsat ( <i>Lansium domesticum</i> Corrêa) .....                                                                | 24B                    |
| Lanjut ( <i>Mangifera lagenifera</i> Griff.) .....                                                               | 24B                    |
| Longan ( <i>Dimocarpus longan</i> Lour.) .....                                                                   | 24A                    |
| Lucuma ( <i>Pouteria lucuma</i> (Ruiz & Pav.) Kuntze) .....                                                      | 24B                    |
| Lychee ( <i>Litchi chinensis</i> Sonn.) .....                                                                    | 24A                    |
| Mabolo ( <i>Diospyros blancoi</i> A. DC.) .....                                                                  | 24B                    |
| Madras-thorn ( <i>Pithecellobium dulce</i> (Roxb.) Benth.) .....                                                 | 24A                    |
| Mammy-apple ( <i>Mammea americana</i> L.) .....                                                                  | 24C                    |
| Manduro ( <i>Balanites maughamii</i> Sprague) .....                                                              | 24A                    |
| Mango ( <i>Mangifera indica</i> L.) .....                                                                        | 24B                    |
| Mango, horse ( <i>Mangifera foetida</i> Lour.) .....                                                             | 24B                    |
| Mango, Saipan ( <i>Mangifera odorata</i> Griff.) .....                                                           | 24B                    |
| Mangosteen ( <i>Garcinia mangostana</i> L.) .....                                                                | 24B                    |
| Marang ( <i>Artocarpus odoratissimus</i> Blanco) .....                                                           | 24C                    |
| Marmaladebox ( <i>Genipa americana</i> L.) .....                                                                 | 24C                    |
| Matisia ( <i>Matisia cordata</i> Humb. & Bonpl.) .....                                                           | 24A                    |
| Mesquite ( <i>Prosopis juliflora</i> (Sw.) DC.) .....                                                            | 24A                    |
| Mongongo, fruit ( <i>Schinziophyton rautanenii</i> (Schinz) Radcl.-Sm) .....                                     | 24A                    |
| Monkey-bread-tree ( <i>Adansonia digitata</i> L.) .....                                                          | 24C                    |
| Monstera ( <i>Monstera deliciosa</i> Liebm.) .....                                                               | 24E                    |
| Nicobar-breadfruit ( <i>Pandanus lerram</i> Jones ex Fontana) .....                                              | 24C                    |
| Paho ( <i>Mangifera altissima</i> Blanco) .....                                                                  | 24B                    |
| Pandanus ( <i>Pandanus utilis</i> Bory) .....                                                                    | 24C                    |
| Papaya ( <i>Carica papaya</i> L.) .....                                                                          | 24B                    |
| Passionflower, winged-stem ( <i>Passiflora alata</i> Curtis) .....                                               | 24E                    |
| Passionfruit ( <i>Passiflora edulis</i> Sims) .....                                                              | 24E                    |
| Passionfruit, banana ( <i>Passiflora tripartita</i> var. <i>mollissima</i> (Kunth) Holm-Niels. & P. Jorg.) ..... | 24E                    |
| Passionfruit, purple ( <i>Passiflora edulis</i> Sims forma <i>edulis</i> ) .....                                 | 24E                    |
| Passionfruit, yellow ( <i>Passiflora edulis</i> Sims forma <i>flavicarpa</i> O. Deg.) .....                      | 24E                    |
| Pawpaw, common ( <i>Asimina triloba</i> (L.) Dunal) .....                                                        | 24B                    |
| Pawpaw, small-flower ( <i>Asimina parviflora</i> (Michx.) Dunal) .....                                           | 24A                    |
| Pelipisan ( <i>Mangifera casturi</i> Kosterm.) .....                                                             | 24B                    |
| Pequi ( <i>Caryocar brasiliense</i> Cambess.) .....                                                              | 24B                    |
| Pequia ( <i>Caryocar villosum</i> (Aubl.) Pers.) .....                                                           | 24B                    |
| Persimmon, American ( <i>Diospyros virginiana</i> L.) .....                                                      | 24B                    |
| Pineapple ( <i>Ananas comosus</i> (L.) Merr.) .....                                                              | 24C                    |
| Pitahaya ( <i>Hylocereus polyrhizus</i> (F.A.C. Weber) Britton & Rose) .....                                     | 24D                    |

TABLE 1—CROP GROUP 24: TROPICAL AND SUBTROPICAL FRUIT, INEDIBLE PEEL GROUP—Continued

| Commodities                                                                                                                           | Related crop subgroups |
|---------------------------------------------------------------------------------------------------------------------------------------|------------------------|
| Pitaya ( <i>Hylocereus</i> sp. including <i>H. megalanthus</i> ( <i>H. ocamponis</i> and <i>H. polychizus</i> )                       | 24D                    |
| Pitaya, amarilla ( <i>Hylocereus triangularis</i> Britton & Rose)                                                                     | 24D                    |
| Pitaya, roja ( <i>Hylocereus ocamponis</i> (Salm-Dyck) Britton & Rose)                                                                | 24D                    |
| Pitaya, yellow ( <i>Hylocereus megalanthus</i> (K. Schum. ex Vaupel) Ralf Bauer)                                                      | 24D                    |
| Plantain ( <i>Musa paradisiaca</i> L.)                                                                                                | 24B                    |
| Pomegranate ( <i>Punica granatum</i> L.)                                                                                              | 24B                    |
| Poshte ( <i>Annona liebmannaiana</i> Baill.)                                                                                          | 24B                    |
| Prickly pear, fruit ( <i>Opuntia ficus-indica</i> (L.) Mill.)                                                                         | 24D                    |
| Prickly pear, Texas, fruit ( <i>Opuntia engelmannii</i> Salm-Dyck ex Engelm. var. <i>lindheimeri</i> (Engelm.) B.D. Parfitt & Pinkav) | 24D                    |
| Pulasan ( <i>Nephelium ramboutan-ake</i> (Labill.) Leenh.)                                                                            | 24C                    |
| Quandong ( <i>Santalum acuminatum</i> (R. Br.) DC.)                                                                                   | 24B                    |
| Rambutan ( <i>Nephelium lappaceum</i> L.)                                                                                             | 24C                    |
| Saguaro ( <i>Carnegiea gigantea</i> (Engelm.) Britton & Rose)                                                                         | 24D                    |
| Sapodilla ( <i>Manilkara zapota</i> (L.) P. Royen)                                                                                    | 24C                    |
| Sapote, black ( <i>Diospyros digyna</i> Jacq.)                                                                                        | 24B                    |
| Sapote, green ( <i>Pouteria viridis</i> (Pittier) Cronquist)                                                                          | 24B                    |
| Sapote, mamey ( <i>Pouteria sapota</i> (Jacq.) H.E. Moore & Stearn)                                                                   | 24C                    |
| Sapote, white ( <i>Casimiroa edulis</i> La Llave & Lex)                                                                               | 24B                    |
| Sataw ( <i>Parkia speciosa</i> Hassk.)                                                                                                | 24B                    |
| Satinleaf ( <i>Chrysophyllum oliviforme</i> L.)                                                                                       | 24A                    |
| Screw-pine ( <i>Pandanus tectorius</i> Parkinson)                                                                                     | 24B                    |
| Sierra Leone-tamarind ( <i>Dialium guineense</i> Willd.)                                                                              | 24A                    |
| Soncoya ( <i>Annona purpurea</i> Moc. & Sessé ex Dunal)                                                                               | 24C                    |
| Soursop ( <i>Annona muricata</i> L.)                                                                                                  | 24C                    |
| Spanish lime ( <i>Melicoccus bijugatus</i> Jacq.)                                                                                     | 24A                    |
| Star apple ( <i>Chrysophyllum cainito</i> L.)                                                                                         | 24B                    |
| Sugar apple ( <i>Annona squamosa</i> L.)                                                                                              | 24C                    |
| Sun sapote ( <i>Licania platypus</i> (Hemsl.) Fritsch)                                                                                | 24C                    |
| Tamarind-of-the-Indies ( <i>Vangueria madagascariensis</i> J.F. Gmel.)                                                                | 24B                    |

| Small flower willow head, dried leaves, <i>Epilobium parviflorum</i> Schreb ..... | 25B                   |
| Sorrel, fresh leaves, <i>Rumex</i> spp .....                                      | 25A                   |
| Sorrel, dried leaves, <i>Rumex</i> spp .....                                      | 25B                   |
| Sorrel, French, fresh leaves, <i>Rumex scutatus</i> L .....                       | 25A                   |
| Sorrel, French, dried leaves, <i>Rumex scutatus</i> L .....                       | 25B                   |
| Sorrel, garden, fresh leaves, <i>Rumex acetosa</i> L .....                        | 25A                   |
| Sorrel, garden, dried leaves, <i>Rumex acetosa</i> L .....                        | 25B                   |
| Southernwood, fresh leaves, <i>Artemisia abrotanum</i> L .....                    | 25A                   |
| Southernwood, dried leaves, <i>Artemisia abrotanum</i> L .....                    | 25B                   |
| Spearmint, fresh leaves, <i>Mentha spicata</i> L .....                            | 25A                   |
| Spearmint, dried leaves, <i>Mentha spicata</i> L .....                            | 25B                   |
| Spearmint, Scotch, fresh leaves, <i>Mentha x gracilis</i> Sole .....              | 25A                   |
| Spearmint, Scotch, dried leaves, <i>Mentha x gracilis</i> Sole .....              | 25B                   |
| Spilanthes, fresh leaves, <i>Blainvillea acmella</i> (L.) Philipson .....         | 25A                   |
| Spilanthes, dried leaves, <i>Blainvillea acmella</i> (L.) Philipson .....         | 25B                   |
| Spotted beebalm, fresh leaves, <i>Monarda punctata</i> L .....                    | 25A                   |
| Spotted beebalm, dried leaves, <i>Monarda punctata</i> L .....                    | 25B                   |
| St John's Wort, fresh leaves, <i>Hypericum perforatum</i> L .....                 | 25A                   |
| St John's Wort, dried leaves, <i>Hypericum perforatum</i> L .....                 | 25B                   |
| Stevia, fresh leaves, <i>Stevia rebaudiana</i> (Bertoni) Bertoni .....            | 25A                   |
| Stevia, dried leaves, <i>Stevia rebaudiana</i> (Bertoni) Bertoni .....            | 25B                   |
| Stoneroot, fresh leaves, <i>Collinsonia canadensis</i> L .....                    | 25A                   |
| Stoneroot, dried leaves, <i>Collinsonia canadensis</i> L .....                    | 25B                   |
| Swamp leaf, fresh leaves, <i>Limnophila chinensis</i> (Osbeck) Merr .....         | 25A                   |
| Swamp leaf, dried leaves, <i>Limnophila chinensis</i> (Osbeck) Merr .....         | 25B                   |
| Tansy, fresh leaves, <i>Tanacetum vulgare</i> L .....                             | 25A                   |
| Tansy, dried leaves, <i>Tanacetum vulgare</i> L .....                             | 25B                   |
| Tarragon, fresh leaves, <i>Artemisia dracunculus</i> L .....                      | 25A                   |
| Tarragon, dried leaves, <i>Artemisia dracunculus</i> L .....                      | 25B                   |
| Thuja, fresh leaves, <i>Thuja occidentalis</i> L .....                            | 25A                   |
| Thuja, dried leaves, <i>Thuja occidentalis</i> L .....                            | 25B                   |
| Thyme, fresh leaves, <i>Thymus</i> spp .....                                      | 25A                   |
| Thyme, dried leaves, <i>Thymus</i> spp .....                                      | 25B                   |
| Thyme, creeping, fresh leaves, <i>Thymus serpyllum</i> L .....                    | 25A                   |
| Thyme, creeping, dried leaves, <i>Thymus serpyllum</i> L .....                    | 25B                   |
| Thyme, lemon, fresh leaves, <i>Thymus x citriodorus</i> (Pers.) Schreb .....      | 25A                   |
| Thyme, lemon, dried leaves, <i>Thymus x citriodorus</i> (Pers.) Schreb .....      | 25B                   |
| Thyme, mastic, fresh leaves, <i>Thymus mastichina</i> (L.) L .....                | 25A                   |
| Thyme, mastic, dried leaves, <i>Thymus mastichina</i> (L.) L .....                | 25B                   |
| Toon, Chinese, fresh leaves, <i>Toona sinensis</i> (A. Juss.) M. Roem .....       | 25A                   |
| Toon, Chinese, dried leaves, <i>Toona sinensis</i> (A. Juss.) M. Roem .....       | 25B                   |
| Toothed clubmoss, fresh leaves, <i>Huperzia serrata</i> (Thunb.) Trevis .....     | 25A                   |
| Toothed clubmoss, dried leaves, <i>Huperzia serrata</i> (Thunb.) Trevis .....     | 25B                   |
| Trailing arbutus, fresh leaves, <i>Epigaea repens</i> L .....                     | 25A                   |
| Trailing arbutus, dried leaves, <i>Epigaea repens</i> L .....                     | 25B                   |
| Vasaka, fresh leaves, <i>Justicia adhatoda</i> L .....                            | 25A                   |
| Vasaka, dried leaves, <i>Justicia adhatoda</i> L .....                            | 25B                   |
| Verbena, blue, fresh leaves, <i>Verbena hastata</i> L .....                       | 25A                   |
| Verbena, blue, dried leaves, <i>Verbena hastata</i> L .....                       | 25B                   |
| Veronica, fresh leaves, <i>Veronica officinalis</i> L .....                       | 25A                   |

TABLE 1—CROP GROUP 25: HERB GROUP—Continued

| Commodities                                                                          | Related crop subgroup |
|--------------------------------------------------------------------------------------|-----------------------|
| Veronica, dried leaves, <i>Veronica officinalis</i> L .....                          | 25B                   |
| Violet, fresh leaves, <i>Viola odorata</i> L .....                                   | 25A                   |
| Violet, dried leaves, <i>Viola odorata</i> L .....                                   | 25B                   |
| Watermint, fresh leaves, <i>Mentha aquatica</i> L .....                              | 25A                   |
| Watermint, dried leaves, <i>Mentha aquatica</i> L .....                              | 25B                   |
| Waterpepper, fresh leaves, <i>Persicaria hydropiper</i> (L.) Delarbre .....          | 25A                   |
| Waterpepper, dried leaves, <i>Persicaria hydropiper</i> (L.) Delarbre .....          | 25B                   |
| Wild bergamot, fresh leaves, <i>Monarda fistulosa</i> L .....                        | 25A                   |
| Wild bergamot, dried leaves, <i>Monarda fistulosa</i> L .....                        | 25B                   |
| Wintergreen, fresh leaves, <i>Gaultheria procumbens</i> L .....                      | 25A                   |
| Wintergreen, dried leaves, <i>Gaultheria procumbens</i> L .....                      | 25B                   |
| Wood betony, fresh leaves, <i>Stachys officinalis</i> (L.) Trevis .....              | 25A                   |
| Wood betony, dried leaves, <i>Stachys officinalis</i> (L.) Trevis .....              | 25B                   |
| Woodruff, fresh leaves, <i>Galium odoratum</i> (L.) Scop .....                       | 25A                   |
| Woodruff, dried leaves, <i>Galium odoratum</i> (L.) Scop .....                       | 25B                   |
| Wormwood, fresh leaves, <i>Artemisia absinthium</i> L .....                          | 25A                   |
| Wormwood, dried leaves, <i>Artemisia absinthium</i> L .....                          | 25B                   |
| Wormwood, Roman, fresh leaves, <i>Artemisia pontica</i> L .....                      | 25A                   |
| Wormwood, Roman, dried leaves, <i>Artemisia pontica</i> L .....                      | 25B                   |
| Yarrow, fresh leaves, <i>Achillea millefolium</i> L .....                            | 25A                   |
| Yarrow, dried leaves, <i>Achillea millefolium</i> L .....                            | 25B                   |
| Yellow gentian, fresh leaves, <i>Gentiana lutea</i> L .....                          | 25A                   |
| Yellow gentian, dried leaves, <i>Gentiana lutea</i> L .....                          | 25B                   |
| Yerba santa, fresh leaves, <i>Eriodictyon californicum</i> (Hook. & Arn.) Torr ..... | 25A                   |
| Yerba santa, dried leaves, <i>Eriodictyon californicum</i> (Hook. & Arn.) Torr ..... | 25B                   |
| Yomogi, fresh leaves, <i>Artemisia princeps</i> L .....                              | 25A                   |
| Yomogi, dried leaves, <i>Artemisia princeps</i> L .....                              | 25B                   |
| Cultivars, varieties, and hybrids of these commodities .....                         |                       |

(iii) *Crop subgroups.* The following Table 2 identifies the crop subgroups

for Crop Group 25, specifies the representative commodities for each subgroup, and lists all the commodities included in each subgroup.

TABLE 2—CROP GROUP 25: SUBGROUP LISTING

| Representative commodities                           | Commodities ### Subpart C—Specific Tolerances

EDITORIAL NOTE: Nomenclature changes to subpart C of part 180 appear at 67 FR 41803,

## § 180.101

June 19, 2002; 67 FR 42393, June 21, 2002; 68 FR 39430, July 1, 2003; 71 FR 74804, Dec. 13, 2006; 72 FR 53137, Sept. 18, 2007; 72 FR 61536, Oct. 31, 2007; 73 FR 60155, Oct. 10, 2008; 75 FR 56014, Sept. 15, 2010; and 76 FR 34885, June 15, 2011.

### § 180.101 Specific tolerances; general provisions.

(a) The tolerances established for pesticide chemicals in this subpart C apply to residues resulting from their application prior to harvest or slaughter, unless otherwise stated. Tolerances are expressed in terms of parts by weight of the pesticide chemical per one million parts by weight of the raw agricultural commodity.

(b) The poisonous and deleterious substances for which tolerances are established by the regulations in this subpart C are named by their common names wherever practicable, otherwise by their chemical names.

(c) The analytical methods to be used for determining whether pesticide residues, including negligible residues, in or on raw agricultural commodities are in compliance with the tolerances established in this part 180 are identified among the methods contained or referenced in the Food and Drug Administration's "Pesticide Analytical Manual" which is available from the Food and Drug Administration, Department of Health, Education, and Welfare, 200 C Street SW., Washington, DC 20204.

### § 180.103 Captan; tolerances for residues.

(a)(1) *General.* Tolerances are established for residues of the fungicide, captan (N-trichloromethylthio-4-cyclohexene-1,2-dicarboximide) in or on the following commodities:

| Commodity                                               | Parts per million |
|---------------------------------------------------------|-------------------|
| Almond .....                                            | 0.25              |
| Almond, hulls .....                                     | 75.0              |
| Animal feed, nongrass, group 18 .....                   | 0.05              |
| Apple .....                                             | 25.0              |
| Apricot .....                                           | 10.0              |
| Blueberry .....                                         | 20.0              |
| Caneberry, subgroup 13A .....                           | 25.0              |
| Cherry, sweet .....                                     | 50.0              |
| Cherry, tart .....                                      | 50.0              |
| Cotton, undelinted seed .....                           | 0.05              |
| Dill, seed .....                                        | 0.05              |
| Flax, seed .....                                        | 0.05              |
| Grape .....                                             | 25.0              |
| Grain, cereal, forage, fodder and straw, group 16 ..... | 0.05              |
| Grain, cereal, group 15 .....                           | 0.05              |
| Grass, forage .....                                     | 0.05              |

## 40 CFR Ch. I (7–1–25 Edition)

| Commodity                                          | Parts per million |
|----------------------------------------------------|-------------------|
| Grass, hay .....                                   | 0.05              |
| Nectarine .....                                    | 25.0              |
| Okra .....                                         | 0.05              |
| Peach .....                                        | 15.0              |
| Peanut .....                                       | 0.05              |
| Peanut, hay .....                                  | 0.05              |
| Pear .....                                         | 25.0              |
| Plum, prune, fresh .....                           | 10.0              |
| Rapeseed, forage .....                             | 0.05              |
| Rapeseed, seed .....                               | 0.05              |
| Safflower, seed .....                              | 0.05              |
| Sesame, seed .....                                 | 0.05              |

| Sunflower, seed .....                              | 0.05              |
| Vegetable, brassica leafy, group 5 .....           | 0.05              |
| Vegetable, bulb, group 3 .....                     | 0.05              |
| Vegetable, cucurbit, group 9 .....                 | 0.05              |
| Vegetable, foliage of legume, group 7 .....        | 0.05              |
| Vegetable, fruiting, group 8 .....                 | 0.05              |
| Vegetable, leafy, except brassica, group 4 .....   | 0.05              |
| Vegetable, leaves of root and tuber, group 2 ..... | 0.05              |
| Vegetable, legume, group 6 .....                   | 0.05              |
| Vegetable, root and tuber, group 1 .....           | 0.05              |

(2) Tolerances are established for the combined residues of the fungicide, captan (N-trichloromethylthio-4-cyclohexene-1,2-dicarboximide) and its metabolite 1,2,3,6-tetrahydrophthalimide (THPI), measured at THPI, in or on the following commodities:

| Commodity                     | Parts per million |
|-------------------------------|-------------------|
| Cattle, fat .....             | 0.15              |
| Cattle, meat .....            | 0.20              |
| Cattle, meat byproducts ..... | 0.30              |
| Goat, fat .....               | 0.15              |
| Goat, meat .....              | 0.20              |
| Goat, meat byproducts .....   | 0.30              |
| Hog, fat .....                | 0.15              |
| Hog, meat .....               | 0.20              |
| Hog, meat byproducts .....    | 0.30              |
| Horse, fat .....              | 0.15              |
| Horse, meat .....             | 0.20              |
| Horse, meat byproducts .....  | 0.30              |
| Milk .....                    | 0.10              |
| Sheep, fat .....              | 0.15              |
| Sheep, meat .....             | 0.20              |
| Sheep, meat byproducts .....  | 0.30              |

| Sorghum, grain, grain                  | 0.5               |
| Sorghum, grain, stover                 | 2                 |
| Spearmint, tops                        | 1.5               |
| Sugarcane, cane                        | 0.2               |
| Sugarcane, molasses                    | 0.7               |
| Walnut                                 | 0.05              |
| Wheat, bran                            | 0.7               |
| Wheat, forage                          | 2                 |
| Wheat, grain                           | 0.5               |
| Wheat, hay                             | 2                 |
| Wheat, straw                           | 1.5               |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* Tolerances with a regional registration as defined in §180.1(l) are established for the combined residues of

the herbicide diuron (3-(3,4-dichlorophenyl)-1,1-dimethylurea and its metabolites convertible to 3,4-dichloroaniline) in or on the raw agricultural commodities:

| Commodity       | Parts per million |
|-----------------|-------------------|
| Barley, bran    | 0.7               |
| Barley, grain   | 0.2               |
| Barley, hay     | 2                 |
| Barley, straw   | 1.5               |
| Cactus          | 0.05              |
| Clover, forage  | 0.1               |
| Clover, hay     | 1.0               |
| Oat, forage     | 2                 |
| Oat, grain      | 0.1               |
| Oat, hay        | 2                 |
| Oat, straw      | 1.5               |
| Trefoil, forage | 0.1               |
| Trefoil, hay    | 1.5               |
| Vetch, forage   | 0.1               |
| Vetch, hay      | 1.5               |

(d) *Indirect or inadvertent residues.*

### § 180.107 Triflumezopyrim; tolerance for residues.

(a) *General.* Tolerances are established for residues of the insecticide triflumezopyrim, including its metabolites and degradates, in or on the following food commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only triflumezopyrim (2,4-dioxo-1-(5-pyrimidinylmethyl)-3-[3-(trifluoromethyl)phenyl]-2H-pyrido[1,2-a] pyrimidinium inner salt) in or on the commodity.

| Commodity     | Parts per million |
|---------------|-------------------|
| Rice, grain * | 0.40              |
| Rice, hulls * | 1.0               |

\*There are no U.S. registrations for the use of triflumezopyrim on these commodities.

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.*  
[Reserved]

[82 FR 48005, Oct. 16, 2017]

**§ 180.108 Acephate; tolerances for residues.**

(a) *General.* (1) Tolerances are established for residues of acephate, *O,S*-dimethyl acetyl phosphoramidothioate, including its metabolites and degradates other than methamidophos, in or on the commodities in the following table. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only acephate, *O,S*-dimethyl acetyl phosphoramidothioate, in or on the commodity.

| Commodity <sup>1</sup>         | Parts per million |
|--------------------------------|-------------------|
| Bean, dry, seed .....          | 3.0               |
| Brussels sprouts .....         | 3.0               |
| Cattle, fat .....              | 0.1               |
| Cattle, meat .....             | 0.1               |
| Cattle, meat byproducts .....  | 0.1               |
| Cauliflower .....              | 2.0               |
| Celery .....                   | 10                |
| Cotton, hulls .....            | 1.0               |
| Cotton, meal .....             | 1.0               |
| Cotton, undelinted seed .....  | 0.5               |
| Cranberry .....                | 0.5               |
| Egg .....                      | 0.1               |
| Goat, fat .....                | 0.1               |
| Goat, meat .....               | 0.1               |
| Goat, meat byproducts .....    | 0.1               |
| Hog, fat .....                 | 0.1               |
| Hog, meat .....                | 0.1               |
| Hog, meat byproducts .....     | 0.1               |
| Horse, fat .....               | 0.1               |
| Horse, meat .....              | 0.1               |
| Horse, meat byproducts .....   | 0.1               |
| Lettuce, head .....            | 10                |
| Milk .....                     | 0.1               |
| Peanut .....                   | 0.2               |
| Pepper .....                   | 4.0               |
| Peppermint, tops .....         | 27                |
| Poultry, fat .....             | 0.1               |
| Poultry, meat .....            | 0.1               |
| Poultry, meat byproducts ..... | 0.1               |
| Sheep, fat .....               | 0.1               |
| Sheep, meat .....              | 0.1               |
| Sheep, meat byproducts .....   | 0.1               |
| Spearmint, tops .....          | 27                |
| Soybean, seed .....            | 1.0               |

<sup>1</sup> Where there is a direct use of methamidophos on the commodity, residues of methamidophos resulting from methamidophos application are regulated under 40 CFR 180.315.

(2) A tolerance of 0.02 ppm is established for residues of acephate, *O,S*-dimethyl acetyl phosphoramidothioate, including its metabolites and degradates other than methamidophos, in or on all food items (other than those already covered by a higher tolerance as a result of use on growing crops) in food handling establishments where food and food products are held, processed, prepared and served, including food service, manufacturing and

processing establishments, such as restaurants, cafeterias, supermarkets, bakeries, breweries, dairies, meat slaughtering and packing plants, and canneries, where application of acephate shall be limited solely to spot and/or crack and crevice treatment (a coarse, low-pressure spray shall be used to avoid atomization or splashing of the spray for spot treatments; equipment capable of delivering a pin-stream of insecticide shall be used for crack and crevice treatments). Spray concentration shall be limited to a maximum of 1.0 percent active ingredient. Contamination of food or food-contact surfaces shall be avoided. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only acephate, *O,S*-dimethyl acetyl phosphoramidothioate, in or on the commodity.

(3) Tolerances are established for residues of methamidophos, *O,S*-dimethyl phosphoramidothioate, including its metabolites and degradates, in or on the commodities in the following table as a result of the application of acephate. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only methamidophos, *O,S*-dimethyl phosphoramidothioate, in or on the commodity.

| Commodity              | Parts per million |
|------------------------|-------------------|
| Bean, dry, seed .....  | 1                 |
| Brussels sprouts ..... | 0.5               |
| Cauliflower .....      | 0.5               |
| Celery .....           | 1                 |
| Cranberry .....        | 0.1               |
| Lettuce, head .....    | 1                 |
| Pepper .....           | 1                 |
| Peppermint, tops ..... | 1                 |
| Spearmint, tops .....  | 1                 |

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* A tolerance with a regional registration is established for residues of acephate, *O,S*-dimethyl acetyl phosphoramidothioate, including its metabolites and degradates other than methamidophos, in or on the commodity in the following table. Compliance with the tolerance level specified in this paragraph is to be determined

## Environmental Protection Agency

### § 180.109 Fenpicoxamid; Tolerances for residues.

(a) *General.* Tolerances are established for residues of fenpicoxamid including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels for fenpicoxamid is to be determined by measuring only fenpicoxamid ([4-methoxy-2-[[[(3*S*,7*R*,8*R*,9*S*)-9-methyl-8-(2-methyl-1-oxopropoxy)-2,6-dioxo-7-(phenylmethyl)-1,5-dioxonan-3-yl]amino]carbonyl]-3-pyridinyl]oxy)methyl 2-methylpropanoate) in or on the commodity.

| Commodity           | Parts per million |
|---------------------|-------------------|
| Banana* .....       | 0.15              |
| Wheat, grain* ..... | 0.60              |
| Rye, grain* .....   | 0.60              |

\*There are no U.S. registrations for use of fenpicoxamid on this commodity.

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.*  
[Reserved]

[82 FR 48000, Oct. 16, 2017]

### § 180.111 Malathion; tolerances for residues.

(a) *General.* (1) Tolerances are established for residues of the insecticide malathion (*O,O*-dimethyl dithiophosphate of diethyl mercaptosuccinate) in or on the following food commodities:

| Commodity                                             | Parts per million |
|-------------------------------------------------------|-------------------|
| Alfalfa, forage .....                                 | 135               |

| Cucumber .....                                        | 8                 |
| Currant .....                                         | 8                 |
| Date, dried fruit .....                               | 8                 |
| Dewberry .....                                        | 8                 |
| Eggplant .....                                        | 8                 |
| Fig .....                                             | 8                 |
| Flax, seed .....                                      | 0.1               |
| Garlic, bulb .....                                    | 8                 |
| Gooseberry .....                                      | 8                 |
| Grape .....                                           | 8                 |
| Grapefruit .....                                      | 8                 |
| Guava .....                                           | 8                 |
| Hazelnut .....                                        | 1                 |
| Hop, dried cones .....                                | 1                 |
| Horseradish .....                                     | 8                 |
| Kumquat .....                                         | 8                 |
| Leek .....                                            | 8                 |
| Lemon .....                                           | 8                 |
| Lentil, seed .....                                    | 8                 |
| Lespedeza, hay .....                                  | 135               |
| Lime .....                                            | 8                 |
| Loganberry .....                                      | 8                 |
| Lupin, seed .....                                     | 8                 |
| Mango .....                                           | 8                 |
| Melon .....                                           | 8                 |
| Mushroom .....                                        | 8                 |
| Nectarine .....                                       | 8                 |
| Nut, macadamia .....                                  | 1                 |
| Oat, grain, postharvest .....                         | 8                 |
| Okra .....                                            | 8                 |
| Onion, bulb .....                                     | 8                 |
| Onion, green .....                                    | 8                 |
| Orange .....                                          | 8                 |
| Papaya .....                                          | 1                 |
| Parsnip .....                                         | 8                 |
| Passionfruit .....                                    | 8                 |
| Pea .....                                             | 8                 |
| Pea, field, hay .....                                 | 8                 |
| Pea, field, vines .....                               | 8                 |

§ 180.111

40 CFR Ch. I (7–1–25 Edition)

| Commodity                                        | Parts per million |
|--------------------------------------------------|-------------------|
| Peach .....                                      | 8                 |
| Peanut, hay .....                                | 135               |
| Peanut, postharvest .....                        | 8                 |
| Pear .....                                       | 8                 |
| Pecan .....                                      | 8                 |
| Pepper .....                                     | 8                 |
| Peppermint, tops .....                           | 8                 |
| Pineapple .....                                  | 8                 |
| Plum .....                                       | 8                 |
| Plum, prune .....                                | 8                 |
| Potato .....                                     | 8                 |
| Pumpkin .....                                    | 8                 |
| Quince .....                                     | 8                 |
| Radish .....                                     | 8                 |
| Raspberry .....                                  | 8                 |
| Rice, grain, postharvest .....                   | 8                 |
| Rice, wild .....                                 | 8                 |
| Rutabaga .....                                   | 8                 |
| Rye, grain, postharvest .....                    | 8                 |
| Safflower, seed .....                            | 0.2               |
| Salsify, roots .....                             | 8                 |
| Salsify, tops .....                              | 8                 |
| Shallot, bulb .....                              | 8                 |
| Sorghum, grain, forage .....                     | 8                 |
| Sorghum, grain, grain, postharvest .....         | 8                 |
| Soybean, forage .....                            | 135               |
| Soybean, hay .....                               | 135               |
| Soybean, seed .....                              | 8                 |
| Soybean, vegetable, succulent .....              | 8                 |
| Spearmint, tops .....                            | 8                 |

| Squash, winter .....                             | 8                 |
| Strawberry .....                                 | 8                 |
| Sunflower, seed, postharvest .....               | 8                 |
| Sweet potato, roots .....                        | 1                 |
| Tangerine .....                                  | 8                 |
| Tomato .....                                     | 8                 |
| Trefoil, forage .....                            | 135               |
| Trefoil, hay .....                               | 135               |
| Turnip, greens .....                             | 8                 |
| Turnip, roots .....                              | 8                 |
| Vegetable, brassica, leafy, group 5 .....        | 8                 |
| Vegetable, leafy, except brassica, group 4 ..... | 8                 |
| Vetch, hay .....                                 | 135               |
| Walnut .....                                     | 8                 |
| Wheat, grain, postharvest .....                  | 8                 |

(2) Tolerances are established for the combined residues of the insecticide malathion (*O,O*-dimethyl dithiophosphate of diethyl mercaptosuccinate) and its metabolite, malaaxon (*O,O*-dimethyl thiophosphate of diethyl mercaptosuccinate), in or on the following food commodities:

| Commodity                     | Parts per million |
|-------------------------------|-------------------|
| Barley, straw .....           | 50                |
| Corn, field, stover .....     | 30.0              |
| Cotton, undelinted seed ..... | 20.0              |
| Grass, forage .....           | 200               |
| Grass, hay .....              | 270               |
| Oat, forage .....             | 4.0               |
| Oat, straw .....              | 50                |
| Rye, forage .....             | 4.0               |
| Rye, straw .....              | 50                |
| Watercress .....              | 0.2               |
| Wheat, forage .....           | 4.0               |
| Wheat, straw .....            | 50                |

(3) Tolerances are established for residues of the insecticide malathion (*O,O*-dimethyl dithiophosphate of diethyl mercaptosuccinate), in or on the following food commodities:

| Commodity                                   | Parts per million |
|---------------------------------------------|-------------------|
| Cattle, fat .....                           | 4                 |
| Cattle, meat <sup>1</sup> .....             | 4                 |
| Cattle, meat byproducts <sup>1</sup> .....  | 4                 |
| Egg .....                                   | 0.1               |
| Goat, fat .....                             | 4                 |
| Goat, meat <sup>1</sup> .....               | 4                 |
| Goat, meat byproducts <sup>1</sup> .....    | 4                 |
| Hog, fat .....                              | 4                 |
| Hog, meat <sup>1</sup> .....                | 4                 |
| Hog, meat byproducts <sup>1</sup> .....     | 4                 |
| Horse, fat .....                            | 4                 |
| Horse, meat <sup>1</sup> .....              | 4                 |
| Horse, meat byproducts <sup>1</sup> .....   | 4                 |
| Milk, fat .....                             | 0.5               |
| Poultry, fat .....                          | 4                 |
| Poultry, meat <sup>1</sup> .....            | 4                 |
| Poultry, meat byproducts <sup>1</sup> ..... | 4                 |
| Sheep, fat .....                            | 4                 |
| Sheep, meat <sup>1</sup> .....              | 4                 |
| Sheep, meat byproducts <sup>1</sup> .....   | 4                 |

<sup>1</sup>The tolerance level shall not be exceeded in any cut of meat or in any meat byproducts from cattle, goat, hog, horse, poultry, or sheep.

(4) Malathion may be safely used in accordance with the following conditions:

(i) It is incorporated into paper trays in amounts not exceeding 100 milligrams per square foot.

(ii) Treated paper trays are intended for use only in the drying of grape (raisins).

(iii) Total residues of malathion resulting from drying of grape on treated trays and from application to grape before harvest shall not exceed 12 parts per million on processed ready-to-eat raisins.

(5) Residues of malathion in safflower, refined oil from application to the growing safflower plant shall not exceed 0.6 parts per million.

(6) Malathion may be safely used for the control of insects during the drying of grape (raisins) in compliance with paragraph (a)(4) of this section by incorporation into paper trays in amounts not exceeding 100 milligrams per square foot.

(7) Malathion (*O,O*-dimethyl dithiophosphate of diethyl mercaptosuccinate) may be safely used in feed in accordance with the following conditions.

(i) A tolerance of 50 parts per million is established for residues of malathion

## Environmental Protection Agency

## § 180.116

in citrus, dried pulp for cattle feed, when present as the result of the application of the pesticide to bagged citrus pulp during storage. Whether or not tolerances for residues of malathion on the fresh fruit have been established under section 408 of the Act, the total residue of malathion in the citrus, dried pulp shall not exceed 50 parts per million.

(ii) A tolerance of 10 parts per million is established for malathion in non-medicated cattle feed concentrate blocks resulting from its application as a pesticide to paper used in packaging the nonmedicated cattle feed concentrate blocks.

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[43 FR 22974, May 30, 1978, as amended at 43 FR 45584, Oct. 3, 1978; 44 FR 38844, July 3, 1979; 45 FR 76145, Nov. 18, 1980; 47 FR 42738, Sept. 29, 1982; 47 FR 55226, Dec. 8, 1982; 52 FR 45183, Nov. 25, 1987; 62 FR 66023, 66025, Dec. 17, 1997; 65 FR 33694, May 24, 2000; 72 FR 35665, June 29, 2007; 73 FR 54959, Sept. 24, 2008; 74 FR 47455, Sept. 16, 2009; 75 FR 60238, Sept. 29, 2010]

### § 180.114 Ferbam; tolerances for residues.

(a) *General.* Tolerances are established for residues of the fungicide ferbam (ferric dimethyldithiocarbamate), calculated as carbon disulfide, in or on the following food commodities:

| Commodity                     | Parts per million | Expiration/Revocation Date |
|-------------------------------|-------------------|----------------------------|
| Apple .....                   | 4.0 <sup>1</sup>  | None                       |
| Bean .....                    | 7.0 <sup>1</sup>  | 10/27/07                   |
| Cabbage .....                 | 7.0 <sup>1</sup>  | 10/27/07                   |
| Cherry .....                  | 4.0 <sup>1</sup>  | None                       |
| Cranberry .....               | 4.0 <sup>1</sup>  | None                       |
| Fruit, citrus, group 10 ..... | 4.0 <sup>1</sup>  | None                       |
| Grape .....                   | 4.0 <sup>1</sup>  | None                       |
| Lettuce .....                 | 7.0 <sup>1</sup>  | 10/27/07                   |
| Nectarine .....               | 4.0 <sup>1</sup>  | None                       |
| Peach .....                   | 4.0 <sup>1</sup>  | None                       |
| Pear .....                    | 4.0 <sup>1</sup>  | None                       |
| Raspberry .....               | 7.0 <sup>1</sup>  | 10/27/07                   |

<sup>1</sup>Some of these tolerances were established on the basis of data acquired at the public hearings held in 1950 (formerly § 180.101) and the remainder were established on the basis of pesticide petitions presented under the procedure specified in the amendment to the Federal Food, Drug, and Cosmetic Act by Pub. L. 518, 83d Congress (68 Stat. 511).

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* Tolerances with regional registrations, as defined in § 180.1(l), are established for residues of the fungicide ferbam (ferric dimethyldithiocarbamate), calculated as carbon disulfide, in or on the following food commodities:

| Commodity   | Parts per million |
|-------------|-------------------|
| Mango ..... | 4.0 <sup>1</sup>  |

<sup>1</sup>This tolerance was established on the basis of data acquired at the public hearings held in 1950 (formerly § 180.101) and the remainder was established on the basis of pesticide petitions presented under the procedure specified in the amendment to the Federal Food, Drug, and Cosmetic Act by Pub. L. 518, 83d Congress (68 Stat. 511).

(d) *Indirect or inadvertent residues.* [Reserved]

[63 FR 57072, Oct. 26, 1998, as amended at 72 FR 53453, Sept. 19, 2007]

### § 180.116 Ziram; tolerances for residues.

(a) *General.* Tolerances are established for residues of the fungicide ziram (zinc dimethyldithiocarbamate), including its metabolites and degradates, in or on the commodities in the table below as a result of the application of ziram. Compliance with the tolerance levels specified below is to be determined by measuring total dithiocarbamates, determined as CS<sub>2</sub>, evolved during acid digestion and expressed as zinc ethylenebisdithiocarbamate.

| Commodity           | Parts per million |
|---------------------|-------------------|
| Almond .....        | <sup>1</sup> 0.10 |
| Apple .....         | <sup>1</sup> 7.0  |
| Apricot .....       | <sup>1</sup> 7.0  |
| Blueberry .....     | <sup>1</sup> 7.0  |
| Cherry, sweet ..... | <sup>1</sup> 7.0  |
| Cherry, tart .....  | <sup>1</sup> 7.0  |
| Grape .....         | 7.0               |
| Hazelnut .....      | 0.10              |
| Huckleberry .....   | 7.0               |
| Peach .....         | 7.0               |
| Pear .....          | <sup>1</sup> 7.0  |
| Pecan .....         | 0.10              |
| Quince .....        | <sup>1</sup> 7.0  |
| Strawberry .....    | 7.0               |
| Tomato .....        | <sup>1</sup> 7.0  |

<sup>1</sup>Some of these tolerances were established on the basis of data acquired at the public hearings held in 1950 (formerly § 180.101) and the remainder were established on the basis of pesticide petitions presented under the procedure specified in the amendment to the Federal Food, Drug, and Cosmetic Act by Public Law 518, 83d Congress (68 Stat. 511).

§ 180.117

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.*  
[Reserved]

[68 FR 39437, July 1, 2003, as amended at 71 FR 54432, Sept. 15, 2006; 73 FR 54959, Sept. 24, 2008; 77 FR 59123, Sept. 26, 2012; 82 FR 57860, Dec. 8, 2017]

**§ 180.117 S-Ethyl dipropylthiocarbamate; tolerances for residues.**

(a) *General.* Tolerances are established for residues of the herbicide S-ethyl dipropylthiocarbamate, including its metabolites and degradates, in or on the commodities in the following table. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only the sum of S-ethyl dipropylthiocarbamate, S-ethyl (2-hydroxypropyl)propylcarbamothioate, S-(2-hydroxyethyl)dipropylcarbamothioate, and S-ethyl (3-hydroxypropyl)propylcarbamothioate, calculated as the stoichiometric equivalent of S-ethyl dipropylthiocarbamate, in or on the commodity.

| Commodity                                             | Parts per million |
|-------------------------------------------------------|-------------------|
| Alfalfa, forage .....                                 | 0.2               |
| Alfalfa, hay .....                                    | 0.6               |
| Almond .....                                          | 0.08              |
| Almond, hulls .....                                   | 0.08              |
| Bean, dry, seed .....                                 | 0.08              |
| Bean, succulent .....                                 | 0.08              |
| Beet, garden, tops .....                              | 0.5               |
| Beet, sugar, molasses .....                           | 0.4               |
| Beet, sugar, tops .....                               | 0.5               |
| Clover, forage .....                                  | 0.1               |
| Clover, hay .....                                     | 0.1               |
| Corn, field, forage .....                             | 0.08              |
| Corn, field, grain .....                              | 0.08              |
| Corn, field, stover .....                             | 0.08              |

[75 FR 60239, Sept. 29, 2010, as amended at 82 FR 42952, Sept. 13, 2017]

**§ 180.123 Inorganic bromide residues resulting from fumigation with methyl bromide; tolerances for residues.**

(a) *General.* (1) Tolerances are established for residues of inorganic bromides (calculated as Br) in or on the following food commodities which have been fumigated with the antimicrobial agent and insecticide methyl bromide after harvest (with the exception of strawberry):

| Commodity                                                          | Parts per million | Expiration/Revocation Date |
|--------------------------------------------------------------------|-------------------|----------------------------|
| Alfalfa, hay, postharvest .....                                    | 50.0              | 10/31/11                   |
| Almond, postharvest .....                                          | 200.0             | None                       |
| Apple, postharvest .....                                           | 5.0               | None                       |
| Apricot, postharvest .....                                         | 20.0              | None                       |
| Artichoke, Jerusalem, postharvest ...                              | 30.0              | None                       |
| Asparagus, postharvest .....                                       | 100.0             | None                       |
| Avocado, postharvest .....                                         | 75.0              | None                       |
| Barley, grain, postharvest .....                                   | 50.0              | None                       |
| Bean, lima, postharvest .....                                      | 50.0              | None                       |
| Bean, postharvest .....                                            | 50.0              | None                       |
| Bean, snap, succulent, postharvest .....                           | 50.0              | None                       |
| Bean, succulent, postharvest .....                                 | 50.0              | None                       |
| Beet, garden, roots, postharvest .....                             | 30.0              | None                       |
| Beet, sugar, roots, postharvest .....                              | 30.0              | None                       |
| Blueberry, postharvest .....                                       | 20.0              | None                       |
| Butternut, postharvest .....                                       | 200.0             | None                       |
| Cabbage, postharvest .....                                         | 50.0              | None                       |
| Cacao bean, roasted bean, postharvest .....                        | 50.0              | None                       |
| Cantaloupe, postharvest .....                                      | 20.0              | None                       |
| Carrot, roots, postharvest .....                                   | 30.0              | None                       |
| Cashew, postharvest .....                                          | 200.0             | None                       |
| Cherry, sweet, postharvest .....                                   | 20.0              | None                       |
| Cherry, tart, postharvest .....                                    | 20                | None                       |
| Chestnut, postharvest .....                                        | 200.0             | None                       |
| Cippolini, bulb, postharvest .....                                 | 50.0              | None                       |
| Citron, citrus, postharvest .....                                  | 30.0              | None                       |
| Coconut, copra, postharvest .....                                  | 100.0             | None                       |
| Coffee, bean, green, postharvest ...                               | 75.0              | None                       |

| Pear, postharvest .....                  | 5.0               | None                       |
| Pea, blackeyed, postharvest .....        | 50.0              | None                       |
| Pea, postharvest .....                   | 50.0              | None                       |
| Pecan, postharvest .....                 | 200.0             | None                       |
| Pepper, postharvest .....                | 30.0              | None                       |
| Pimento, postharvest .....               | 30.0              | None                       |
| Pineapple, postharvest .....             | 20.0              | None                       |
| Pistachio, postharvest .....             | 200.0             | None                       |
| Plum, postharvest .....                  | 20.0              | None                       |
| Pomegranate, postharvest .....           | 100.0             | None                       |
| Potato, postharvest .....                | 75.0              | None                       |
| Pumpkin, postharvest .....               | 20.0              | None                       |
| Quince, postharvest .....                | 5.0               | None                       |
| Radish, postharvest .....                | 30.0              | None                       |
| Rice, grain, postharvest .....           | 50.0              | None                       |
| Rutabaga, roots, postharvest .....       | 30.0              | None                       |
| Rutabaga, tops, postharvest .....        | 30.0              | None                       |
| Rye, grain, postharvest .....            | 50.0              | None                       |
| Salsify, roots, postharvest .....        | 30.0              | None                       |
| Sorghum, grain, grain, postharvest ..... | 50.0              | None                       |
| Soybean, postharvest .....               | 200.0             | None                       |
| Squash, summer, postharvest .....        | 30.0              | None                       |
| Squash, winter, postharvest .....        | 20.0              | None                       |
| Squash, zucchini, postharvest .....      | 20.0              | None                       |
| Strawberry, postharvest .....            | 60.0              | None                       |
| Sweet potato, postharvest .....          | 75.0              | None                       |
| Tangerine, postharvest .....             | 30.0              | None                       |
| Timothy, hay, postharvest .....          | 50.0              | 10/19/10                   |
| Tomato, postharvest .....                | 20.0              | None                       |
| Turnip, roots, postharvest .....         | 30.0              | None                       |
| Walnut, postharvest .....                | 200.0             | None                       |
| Watermelon, postharvest .....            | 20.0              | None                       |
| Wheat .....                              | 50.0              | None                       |

(2) Inorganic bromide may be present as a residue in certain processed food in accordance with the following conditions:

(i) When inorganic bromide residues are present as a result of fumigation of the processed food with methyl bromide or from such fumigation in addition to the authorized use of methyl bromide on the source raw agricultural

commodity, as provided for in this part, the total residues of inorganic bromides (calculated as Br) shall not exceed the following levels:

(A) 400 parts per million in or on egg, dried and herb, processed and spice.

(B) 325 parts per million in or on cheese, parmesan and cheese, roquefort cheese.

(C) 250 parts per million in or on tomato, concentrated products and fig, dried fruit.

(D) 125 parts per million in or on processed food other than those listed above.

(ii) When inorganic bromide residues are present in malt beverage, fermented in accordance with 21 CFR 172.730(a)(2), the amount shall not exceed 25 parts per million (calculated as Br).

(iii) Where tolerances are established on both the raw agricultural commodities and processed food made therefrom, the total residues of inorganic bromides in or on the processed food shall not be greater than those designated in paragraph (a)(2) of this section, unless a higher level is established elsewhere in this part.

(3) Tolerances are established for residues of inorganic bromides (calculated as Br) as follows:

(i) 400 parts per million for residues in or on dog food, resulting from fumigation with methyl bromide.

(ii) 125 parts per million for residues in or on processed commodities for animal feedstuffs from barley, corn, grain sorghum, oat, rice, rye and wheat, resulting directly from fumigation with methyl bromide or from carryover and concentration of residues of inorganic bromides from fumigation of the grains with methyl bromide.

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* A tolerance with regional registration, as defined in §180.1(l), is established for residues of inorganic bromides (calculated as Br) in or on the following food commodity grown in soil fumigated with methyl bromide.

| Commodity                 | Parts per million |
|---------------------------|-------------------|
| Ginger, postharvest ..... | 100               |

**§ 180.123a**

(d) *Indirect or inadvertent residues.*  
[Reserved]

[71 FR 74812, Dec. 13, 2006, as amended at 75 FR 60239, Sept. 29, 2010]

**§ 180.123a Inorganic bromide residues in peanut hay and peanut hulls; statement of policy.**

(a) Investigations by the Food and Drug Administration show that peanut hay and peanut shells have been used as feed for meat and dairy animals. While many growers now harvest peanuts with combines and leave the hay on the ground to be incorporated into the soil, some growers follow the practice of curing peanuts on the vines in a stack and save the hay for animal feed. Peanut shells or hulls have been used to a minor extent as roughage for cattle feed. It has been established that the feeding to cattle of peanut hay and peanut hulls containing residues of inorganic bromides will contribute considerable residues of inorganic bromides to the meat and milk.

(b) There are no tolerances for inorganic bromides in meat and milk to cover residues from use of such peanut hulls as animal feed. Peanut hulls containing residues of inorganic bromides from the use of methyl bromide are unsuitable as an ingredient in the feed of meat and dairy animals and should not

**40 CFR Ch. I (7–1–25 Edition)**

be represented, sold, or used for that purpose.

[58 FR 65555, Dec. 15, 1993]

**§ 180.124 Methyl bromide; tolerances for residues.**

(a) *General.* A tolerance is established for residues of the fumigant methyl bromide, including metabolites and degradates, in or on the commodity in the table below. Compliance with the tolerance level specified below is to be determined by measuring only methyl bromide.

| Commodity                     | Parts per million |
|-------------------------------|-------------------|
| Cotton, undelinted seed ..... | 150               |

(b) *Section 18 emergency exemptions.* Time-limited tolerances are established for residues of the fumigant methyl bromide, including its metabolites and degradates, in or on the specified agricultural commodities in Table 2 to this paragraph (b). Compliance with the tolerance levels specified in Table 2 to this paragraph (b) is to be determined by measuring only methyl bromide, in or on the commodities, resulting from use of the pesticide pursuant to Federal Insecticide, Fungicide, Rodenticide Act (FIFRA) section 18 emergency exemptions. The tolerances expire and are revoked on the dates specified in Table 2 to this paragraph (b).

TABLE 2 TO PARAGRAPH (b)

| Commodity                                                      | Parts per million | Expiration/revocation date |
|----------------------------------------------------------------|-------------------|----------------------------|
| Berry and small fruit, group 13–07 .....                       | 5.0               | 12/31/26                   |
| Cactus .....                                                   | 3.0               | 12/31/26                   |

| Vegetable, cucurbit, group 9 .....                             | 5.0               | 12/31/26                   |
| Vegetable, foliage of legume, group 7 .....                    | 0.50              | 12/31/26                   |

TABLE 2 TO PARAGRAPH (b)—Continued

| Commodity                                                   | Parts per million | Expiration/revocation date |
|-------------------------------------------------------------|-------------------|----------------------------|
| Vegetable, fruiting, group 8–10 .....                       | 7.0               | 12/31/26                   |
| Vegetable, head and stem <i>Brassica</i> , group 5–16 ..... | 1.0               | 12/31/26                   |
| Vegetable, leafy, group 4–16 .....                          | 0.50              | 12/31/26                   |
| Vegetable, leaves of root and tuber, group 2 .....          | 0.50              | 12/31/26                   |
| Vegetable, legume, group 6 .....                            | 3.0               | 12/31/26                   |
| Vegetable, root and tuber, group 1 .....                    | 3.0               | 12/31/26                   |
| Vegetable, stalk, stem and leaf petiole, group 22 .....     | 0.50              | 12/31/26                   |

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[77 FR 35298, June 13, 2012, as amended at 83 FR 8763, Mar. 1, 2018; 85 FR 65734, Oct. 16, 2020; 86 FR 8703, Feb. 9, 2021; 88 FR 75505, Nov. 3, 2023]

**§ 180.127 Piperonyl butoxide; tolerances for residues.**

(a) *General.* (1) Tolerances for residues of the insecticide piperonyl butoxide [(butyl carbityl)(6-propyl piperonyl)ether] are established in or on the following food commodities:

| Commodity                                   | Parts per million |
|---------------------------------------------|-------------------|
| Almond, postharvest .....                   | 8                 |
| Apple, postharvest .....                    | 8                 |
| Barley, postharvest .....                   | 20                |
| Bean, postharvest .....                     | 8                 |
| Birdseed, mixtures, postharvest .....       | 20                |
| Blackberry, postharvest .....               | 8                 |
| Blueberry, postharvest .....                | 8                 |
| Boysenberry, postharvest .....              | 8                 |
| Buckwheat, grain, postharvest .....         | 20                |
| Cattle, fat .....                           | 0.1               |
| Cattle, meat .....                          | 0.1               |
| Cattle, meat byproducts .....               | 0.1               |
| Cherry, sweet, postharvest .....            | 8                 |
| Cherry, tart, postharvest .....             | 8                 |
| Cocoa bean, roasted bean, postharvest ..... | 8                 |
| Coconut, copra, postharvest .....           | 8                 |
| Corn, field, grain, postharvest .....       | 20                |
| Corn, pop, postharvest .....                | 20                |
| Cotton, undelinted seed, postharvest .....  | 8                 |
| Crabapple, postharvest .....                | 8                 |
| Currant, postharvest .....                  | 8                 |
| Dewberry, postharvest .....                 | 8                 |
| Egg .....                                   | 1                 |
| Fig, postharvest .....                      | 8                 |
| Flax, seed, postharvest .....               | 8                 |
| Goat, fat .....                             | 0.1               |
| Goat, meat .....                            | 0.1               |
| Goat, meat byproducts .....                 | 0.1               |
| Gooseberry, postharvest .....               | 8                 |
| Grape, postharvest .....                    | 8                 |
| Guava, postharvest .....                    | 8                 |
| Hog, fat .....                              | 0.1               |
| Hog, meat .....                             | 0.1               |
| Hog, meat byproducts .....                  | 0.1               |
| Horse, fat .....                            | 0.1               |
| Horse, meat .....                           | 0.1               |
| Horse, meat byproducts .....                | 0.1               |

| Commodity                             | Parts per million |
|---------------------------------------|-------------------|
| Loganberry, postharvest .....         | 8                 |
| Mango, postharvest .....              | 8                 |
| Milk, fat .....                       | 0.25              |
| Muskmelon, postharvest .....          | 8                 |
| Oat, postharvest .....                | 8                 |
| Orange, postharvest .....             | 8                 |
| Peach, postharvest .....              | 8                 |
| Peanut, postharvest .....             | 8                 |
| Pea, postharvest .....                | 8                 |
| Pear, postharvest .....               | 8                 |
| Pineapple, postharvest .....          | 8                 |
| Plum, prune, fresh, postharvest ..... | 8                 |
| Potato, postharvest .....             | 0.25              |
| Poultry, fat .....                    | 3                 |
| Poultry, meat .....                   | 3                 |
| Poultry, meat byproducts .....        | 3                 |
| Raspberry, postharvest .....          | 8                 |
| Rice, postharvest .....               | 20                |
| Rye, postharvest .....                | 20                |
| Sheep, fat .....                      | 0.1               |
| Sheep, meat .....                     | 0.1               |
| Sheep, meat byproducts .....          | 0.1               |
| Sorghum, grain, postharvest .....     | 8                 |
| Sweet potato, postharvest .....       | 0.25              |
| Tomato, postharvest .....             | 8                 |
| Walnut, postharvest .....             | 8                 |
| Wheat, postharvest .....              | 20                |

(2) Piperonyl butoxide may be safely used in accordance with the following prescribed conditions:

(i) It is used or intended for use in combination with pyrethrins for control of insects:

(A) In cereal grain mills and in storage areas for milled cereal grain products, whereby the amount of piperonyl butoxide is at least equal to but not more than 10 times the amount of pyrethrins in the formulation.

(B) On the outer ply of multiwall paper bags of 50 pounds or more capacity in amounts not exceeding 60 milligrams per square foot, whereby the amount of piperonyl butoxide is equal to 10 times the amount of pyrethrins in the formulation. Such treated bags are to be used only for food, dried.

(C) On cotton bags of 50 pounds or more capacity in amounts not exceeding 55 milligrams per square foot of

cloth, whereby the amount of piperonyl butoxide is equal to 10 times the amount of pyrethrins in the formulation. Such treated bags are constructed with waxed paper liners and are to be used only for food, dried that contain 4 percent fat or less.

(D) In two-ply bags consisting of cellophane/polyolefin sheets bound together by an adhesive layer when it is incorporated in the adhesive. The treated sheets shall contain not more than 50 milligrams of piperonyl butoxide per square foot (538 milligrams per square meter). Such treated bags are to be used only for packaging plum, prune, dried; grape, raisin; and other fruit, dried and are to have a maximum ratio of 3.12 milligrams of piperonyl butoxide per ounce of fruit (0.10 milligram of piperonyl butoxide per gram of product).

(E) In food processing and food storage areas: Provided, That the food is removed or covered prior to such use.

(ii) It is used or intended for use in combination with pyrethrins and N-octylbicycloheptene dicarboximide for insect control in accordance with 21 CFR 178.3730.

(iii) A tolerance of 10 parts per million is established for residues of piperonyl butoxide in or on:

(A) Grain, cereal, milled fractions when present therein as a result of its use in cereal grain mills and in storage areas for milled cereal grain products.

(B) Food, dried when present as a result of migration from its use on the outer ply of multiwall paper bags of 50 pounds or more capacity.

(C) Food treated in accordance with 21 CFR 178.3730.

(D) Food, dried that contain 4 percent fat, or less, when present as a result of migration from its use on the cloth of cotton bags of 50 pounds or more capacity constructed with waxed paper liners.

(E) Food treated in accordance with paragraph (a)(2)(i)(D) and (E) of this section.

(iv) To assure safe use of the pesticide, its label and labeling shall conform to that registered with the U.S. Environmental Protection Agency, and it shall be used in accordance with such label and labeling.

(v) Where tolerances are established on both raw agricultural commodities and processed food made therefrom, the total residues of piperonyl butoxide in or on the processed food shall not be greater than that permitted by the larger of the two tolerances.

(3) Piperonyl butoxide may be safely used in accordance with the following prescribed conditions:

(i) It is used or intended for use in combination with pyrethrins for control of insects:

(A) On the outer ply of multiwall paper bags of 50 pounds or more capacity in amounts not exceeding 60 milligrams per square foot.

(B) On cotton bags of 50 pounds or more capacity in amounts not exceeding 55 milligrams per square foot of cloth. Such treated bags are constructed with waxed paper liners and are to be used only for feed, dried that contain 4 percent fat or less.

(ii) It is used in combination with pyrethrins, whereby the amount of piperonyl butoxide is equal to 10 times the amount of pyrethrins in the formulation. Such treated bags are to be used only for feed, dried.

(iii) A tolerance of 10 parts per million is established for residues of piperonyl butoxide when present as the result of migration:

(A) In or on feed, dried from its use on the outer ply of multiwall paper bags of 50 pounds or more capacity.

(B) In or on feed, dried that contain 4 percent fat, or less, from its use on cotton bags of 50 pounds or more capacity constructed with waxed paper liners.

(iv) To assure safe use of the pesticide, its label and labeling shall conform to that registered with the U.S. Environmental Protection Agency.

(v) Where tolerances are established on both the raw agricultural commodities and food, processed made therefrom, the total residues of piperonyl butoxide in or on the processed food shall not be greater than that permitted by the larger of the two tolerances.

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

## Environmental Protection Agency

§ 180.128

(d) *Indirect or inadvertent residues.*  
[Reserved]

[71 FR 74813, Dec. 13, 2006]

### § 180.128 Pyrethrins; tolerances for residues.

(a) *General.* (1) Tolerances for residues of the insecticide pyrethrins ((1S)-2-methyl-4-oxo-3-(2Z)-2,4-pentadienylcyclopenten-1-yl (1R,3R)-2,2-dimethyl-3-(2-methyl-1-propenyl)cyclopropanecarboxylate (pyrethrin 1), (1S)-2-methyl-4-oxo-3-(2Z)-2,4-pentadienyl-2-cyclopenten-1-yl (1R,3R)-3-[(1E)-3-methoxy-2-methyl-3-oxo-1-propenyl]-2,2-dimethylcyclopropanecarboxylate (pyrethrin 2), (1S)-3-(2Z)-2-butenyl-2-methyl-4-oxo-2-cyclopenten-1-yl (1R,3R)-2,2-dimethyl-3-(2-methyl-1-propenyl)cyclopropanecarboxylate (cinerin 1), (1S)-3-(2Z)-2-butenyl-2-methyl-4-oxo-2-cyclopenten-1-yl (1R,3R)-3-[(1E)-3-methoxy-2-methyl-3-oxo-1-propenyl]-2,2-dimethylcyclopropanecarboxylate (cinerin 2), (1S)-2-methyl-4-oxo-3-(2Z)-2-pentenyl-2-cyclopenten-1-yl (1R, 3R)-2,2-dimethyl-3-(2-methyl-1-propenyl)cyclopropanecarboxylate (jasmolin 1), and (1S)-2-methyl-4-oxo-3-(2Z)-pentenyl-2-cyclopenten-1-yl (1R,3R)-3-[(1E)-3-methoxy-2-methyl-3-oxo-1-propenyl]-2,2-dimethylcyclopropanecarboxylate (jasmolin 2)), the insecticidally active principles of *Chrysanthemum cinerariaefolium*, which are measured as cumulative residues of pyrethrin 1, cinerin 1, and jasmolin 1 are not to exceed the following:

| Commodity                                   | Parts per million |
|---------------------------------------------|-------------------|
| Almond, postharvest .....                   | 1.0               |
| Apple, postharvest .....                    | 1.0               |
| Barley, grain, postharvest .....            | 3.0               |
| Bean, succulent, postharvest .....          | 1.0               |
| Birdseed, mixtures, postharvest .....       | 3.0               |
| Blackberry, postharvest .....               | 1.0               |
| Blueberry, postharvest .....                | 1.0               |
| Boysenberry, postharvest .....              | 1.0               |
| Buckwheat, grain, postharvest .....         | 3.0               |
| Cacao bean, roasted bean, postharvest ..... | 1.0               |
| Cattle, fat .....                           | 1.0               |
| Cattle, meat .....                          | 0.05              |
| Cattle, meat byproducts .....               | 0.05              |
| Cherry, sweet, postharvest .....            | 1.0               |
| Cherry, tart, postharvest .....             | 1.0               |
| Coconut, copra, postharvest .....           | 1.0               |
| Corn, field, grain, postharvest .....       | 3.0               |
| Corn, pop, grain, postharvest .....         | 3.0               |
| Cotton, undelinted seed, postharvest .....  | 1.0               |
| Crabapple, postharvest .....                | 1.0               |
| Currant, postharvest .....                  | 1.0               |

| Commodity                                              | Parts per million |
|--------------------------------------------------------|-------------------|
| Dewberry, postharvest .....                            | 1.0               |
| Fig, postharvest .....                                 | 1.0               |
| Flax, seed, postharvest .....                          | 1.0               |
| Goat, fat .....                                        | 1.0               |
| Goat, meat .....                                       | 0.05              |
| Goat, meat byproducts .....                            | 0.05              |
| Gooseberry, postharvest .....                          | 1.0               |
| Grape, postharvest .....                               | 1.0               |
| Guava, postharvest .....                               | 1.0               |
| Hog, fat .....                                         | 1.0               |
| Hog, meat .....                                        | 0.05              |
| Hog, meat byproducts .....                             | 0.05              |
| Horse, fat .....                                       | 1.0               |
| Horse, meat .....                                      | 0.05              |
| Horse, meat byproducts .....                           | 0.05              |

| Wheat, grain, postharvest .....                        | 3.0               |

(2) A tolerance of 1.0 ppm is established for residues of the insecticide pyrethrins in or on milled fractions derived from grain, cereal when present as a result of its use in cereal grain mills and in storage areas for milled cereal grain products.

(3) A tolerance of 1.0 ppm is established for residues of the insecticide pyrethrins in or on all food items in food handling establishments where food and food products are held, processed, prepared and/or served. Food must be removed or covered prior to use.

(4) Where tolerances are established on both the raw agricultural commodities and processed foods made therefrom, the total residues of pyrethrins in or on the processed food shall not be greater than that permitted by the larger of the two tolerances.

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

## § 180.129

(d) *Indirect or inadvertent residues.*  
[Reserved]

[71 FR 74814, Dec. 13, 2006, as amended at 73 FR 5108, Jan. 29, 2008]

### § 180.129 o-Phenylphenol and its sodium salt; tolerances for residues.

(a) *General.* Tolerances are established for combined residues of the fungicide o-phenylphenol and sodium o-phenylphenate, each expressed as o-phenylphenol, from postharvest application of either in or on the following food commodities:

| Commodity                                       | Parts per million |
|-------------------------------------------------|-------------------|
| Apple .....                                     | 25                |
| Cantaloupe (NMT 10 ppm in edible portion) ..... | 125               |
| Carrot, roots .....                             | 20                |
| Cherry .....                                    | 5                 |
| Citrus fruits .....                             | 10                |
| Cucumber .....                                  | 10                |
| Lemon .....                                     | 10                |
| Nectarine .....                                 | 5                 |
| Orange .....                                    | 10                |
| Pepper, bell .....                              | 10                |
| Peach .....                                     | 20                |
| Pear .....                                      | 25.0              |
| Pineapple .....                                 | 10                |
| Plum, prune, fresh .....                        | 20                |
| Sweet potato, roots .....                       | 15                |
| Tomato .....                                    | 10                |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.*  
[Reserved]

[73 FR 54960, Sept. 24, 2008]

### § 180.130 Hydrogen Cyanide; tolerances for residues.

(a) *General.* A tolerance for residues of the insecticide hydrogen cyanide from postharvest fumigation as a result of application of sodium cyanide is established as follows: 50 parts per million in or on Fruit, citrus.

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.*  
[Reserved]

[64 FR 39077, July 21, 1999]

### § 180.132 Thiram; tolerances for residues.

(a) *General.* (1) A tolerances for residues of the fungicide thiram

## 40 CFR Ch. I (7–1–25 Edition)

(tetramethyl thiuram disulfide), including its metabolites and degradates, in or on the commodities in the table in this paragraph. Compliance with the tolerance level specified in this paragraph is to be determined by measuring only thiram.

| Commodity                  | Parts per million |
|----------------------------|-------------------|
| Avocado <sup>1</sup> ..... | 15                |

<sup>1</sup> No U.S. registrations as of September 23, 2009.

(2) Tolerances are established for residues of the fungicide thiram, tetramethyl thiuram disulfide, including its metabolites and degradates, in or on the commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only those thiram residues convertible to and expressed in terms of the degradate carbon disulfide, in or on the commodity.

| Commodity                 | Parts per million |
|---------------------------|-------------------|
| Apple .....               | 5                 |
| Banana <sup>1</sup> ..... | 2.0               |
| Peach .....               | 7.0               |
| Strawberry .....          | 13                |

<sup>1</sup> There are no U.S. registrations as of September 23, 2009.

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.*

### § 180.142 2,4-D; tolerances for residues.

(a) *General.* Tolerances are established for residues of the herbicide, plant regulator, and fungicide 2,4-D, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels is to be determined by measuring residues of 2,4-D (2,4-dichlorophenoxyacetic acid), both free and conjugated, determined as the acid, in or on the following commodities:

TABLE 1 TO PARAGRAPH (a)

| Commodity                                             | Parts per million |
|-------------------------------------------------------|-------------------|
| Almond hulls .....                                    | 0.1               |
| Asparagus .....                                       | 5.0               |
| Barley, bran .....                                    | 4.0               |
| Barley, grain .....                                   | 2.0               |
| Barley, straw .....                                   | 50                |

| Wheat, straw .....                                      | 50                |
| Wheatgrass, intermediate, bran .....                    | 4                 |
| Wheatgrass, intermediate, forage .....                  | 30                |
| Wheatgrass, intermediate, grain .....                   | 2                 |
| Wheatgrass, intermediate, straw .....                   | 50                |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* Tolerances with regional registration, as defined in §180.1(l), are established for residues of the herbicide, plant regulator, and fungicide 2,4-D, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels is to be determined by measuring residues of 2,4-D (2,4-dichlorophenoxyacetic acid), both free and conjugated, determined as the acid, in or on the follow commodities:

| Commodity               | Parts per million |
|-------------------------|-------------------|
| Rice, wild, grain ..... | 0.05              |

(d) *Indirect or inadvertent residues.* Tolerances are established for indirect or inadvertent residues of the herbicide, plant regulator, and fungicide 2,4-D, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerances levels is to be determined by measuring residues of 2,4-D (2,4-dichlorophenoxyacetic acid), both free and conjugated, determined as the acid, in or on the following commodities:

| Commodity                                        | Parts per million |
|--------------------------------------------------|-------------------|
| Animal feed, nongrass, group 18 .....            | 0.2               |
| Avocado .....                                    | 0.05              |
| Dill, seed .....                                 | 0.05              |
| Okra .....                                       | 0.05              |
| Vegetable, brassica leafy, group 5 .....         | 0.4               |
| Vegetable, bulb, group 3 .....                   | 0.05              |
| Vegetable, cucurbit, group 9 .....               | 0.05              |
| Vegetable, foliage of legume, group 7 .....      | 0.2               |
| Vegetable, fruiting, group 8 .....               | 0.05              |
| Vegetable, leafy, except brassica, group 4 ..... | 0.4               |

§ 180.145

| Commodity                        | Parts per million |
|----------------------------------|-------------------|
| Vegetable, legume, group 6 ..... | 0.05              |

[72 FR 52017, Sept. 12, 2007, as amended at 73 FR 53737, Sept. 17, 2008; 74 FR 48411, Sept. 23, 2009; 76 FR 55817, Sept. 9, 2011; 80 FR 72597, Nov. 20, 2015; 82 FR 9529, Feb. 7, 2017; 85 FR 82943, Dec. 21, 2020]

**§ 180.145 Fluorine compounds; tolerances for residues.**

(a) *General.* (1) Tolerances are established for combined residues of the insecticidal fluorine compounds cryolite and synthetic cryolite (sodium aluminum fluoride) in or on the following agricultural commodities:

| Commodity                | Parts per million |
|--------------------------|-------------------|
| Apricot .....            | 7                 |
| Blackberry .....         | 7                 |
| Blueberry .....          | 7                 |
| Boysenberry .....        | 7                 |
| Broccoli .....           | 7                 |
| Brussels sprouts .....   | 7                 |
| Cabbage .....            | 7                 |
| Cauliflower .....        | 7                 |
| Collards .....           | 7                 |
| Cranberry .....          | 7                 |
| Cucumber .....           | 7                 |
| Dewberry .....           | 7                 |
| Eggplant .....           | 7                 |
| Fruit, citrus .....      | 7                 |
| Grape .....              | 7                 |
| Kale .....               | 7                 |
| Kohlrabi .....           | 7                 |
| Lettuce, head .....      | 7                 |
| Lettuce, leaf .....      | 7                 |
| Loganberry .....         | 7                 |
| Melon .....              | 7                 |
| Nectarine .....          | 7                 |
| Peach .....              | 7                 |
| Pepper .....             | 7                 |
| Plum, prune, fresh ..... | 7                 |
| Pumpkin .....            | 7                 |
| Raspberry .....          | 7                 |
| Squash, summer .....     | 7                 |
| Squash, winter .....     | 7                 |
| Strawberry .....         | 7                 |
| Tomato .....             | 7                 |
| Youngberry .....         | 7                 |

(2) Tolerances are established for residues of fluoride in or on the following commodities from the postharvest fumigation with sulfuryl fluoride for the control of insects:

| Commodity                                                 | Parts per million |
|-----------------------------------------------------------|-------------------|
| All processed food commodities not otherwise listed ..... | 70                |
| Barley, bran, postharvest .....                           | 45.0              |
| Barley, flour, postharvest .....                          | 45.0              |
| Barley, grain, postharvest .....                          | 15.0              |
| Barley, pearled barley, postharvest .....                 | 45.0              |

**40 CFR Ch. I (7–1–25 Edition)**

| Commodity                                           | Parts per million |
|-----------------------------------------------------|-------------------|
| Cattle, meat, dried .....                           | 40                |
| Cheese .....                                        | 5.0               |
| Cacao bean, roasted bean, postharvest .....         | 20                |
| Coconut, postharvest .....                          | 40                |
| Coffee, bean, green, postharvest .....              | 15                |
| Corn, field, flour, postharvest .....               | 35.0              |
| Corn, field, grain, postharvest .....               | 10.0              |
| Corn, field, grits, postharvest .....               | 10.0              |
| Corn, field, meal, postharvest .....                | 30.0              |
| Corn, pop, grain, postharvest .....                 | 10.0              |
| Cotton, undelinted seed, postharvest .....          | 70                |
| Egg, dried .....                                    | 900               |
| Fruit, dried, except grape, raisin, postharvest ... | 3.0               |
| Ginger, postharvest .....                           | 70                |
| Grain, aspirated fractions, postharvest .....       | 55.0              |
| Grape, raisin, postharvest .....                    | 7.0               |
| Hog, meat .....                                     | 20                |
| Herbs and spices group 19, postharvest .....        | 70                |
| Milk, powdered .....                                | 5.0               |
| Millet, grain, postharvest .....                    | 40.0              |
| Nut, pine, postharvest .....                        | 20                |
| Nut, tree, Group 14, postharvest .....              | 10.0              |
| Oat, flour, postharvest .....                       | 75.0              |
| Oat, grain, postharvest .....                       | 25.0              |
| Oat, groats/rolled oats .....                       | 75.0              |
| Peanut, postharvest .....                           | 15                |
| Pistachio, postharvest .....                        | 10.0              |
| Rice, bran, postharvest .....                       | 31.0              |
| Rice, flour, postharvest .....                      | 45                |
| Rice, grain, postharvest .....                      | 12.0              |
| Rice, hulls, postharvest .....                      | 35.0              |
| Rice, polished rice, postharvest .....              | 25.0              |
| Rice, wild, grain, postharvest .....                | 25.0              |
| Sorghum, grain, postharvest .....                   | 40.0              |
| Triticale, grain, postharvest .....                 | 40.0              |
| Vegetable, legume, group 6, postharvest .....       | 70                |
| Wheat, bran, postharvest .....                      | 40.0              |
| Wheat, flour, postharvest .....                     | 125.0             |
| Wheat, germ, postharvest .....                      | 130.0             |
| Wheat, grain, postharvest .....                     | 40.0              |
| Wheat, milled byproducts, postharvest .....         | 130.0             |
| Wheat, shorts, postharvest .....                    | 40.0              |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* Tolerances with regional registration, as defined by § 180.1(l), are established for the combined residues of the insecticidal fluorine compounds, cryolite and synthetic cryolite (sodium aluminum fluoride), in or on the following raw agricultural commodities:

| Commodity       | Parts per million |
|-----------------|-------------------|
| Kiwifruit ..... | 15                |

(d) *Indirect or inadvertent residues.*  
[Reserved]

[71 FR 74815, Dec. 13, 2006, as amended at 76 FR 34885, June 15, 2011]

**§ 180.151 Ethylene oxide; tolerances for residues.**

(a) *General.* (1) Tolerances are established for residues of the antimicrobial

## Environmental Protection Agency

§ 180.153

agent and insecticide ethylene oxide, when used as a postharvest fumigant in or on the following food commodities:

| Commodity                                        | Parts per million |
|--------------------------------------------------|-------------------|
| Herb and spice, group 19, dried, except basil .. | 7                 |
| Licorice, roots .....                            | 7                 |
| Peppermint, tops, dried .....                    | 7                 |
| Sesame, seed .....                               | 7                 |
| Spearmint, tops, dried .....                     | 7                 |
| Vegetable, dried .....                           | 7                 |
| Walnut .....                                     | 50                |

(2) Tolerances are established for residues of the ethylene oxide reaction product, 2-chloroethanol, commonly referred to as ethylene chlorohydrin, when ethylene oxide is used as a postharvest fumigant in or on food commodities as follows:

| Commodity                                        | Parts per million |
|--------------------------------------------------|-------------------|
| Herb and spice, group 19, dried, except basil .. | 940               |
| Licorice, roots .....                            | 940               |
| Peppermint, tops, dried .....                    | 940               |
| Sesame, seed .....                               | 940               |
| Spearmint, tops, dried .....                     | 940               |
| Vegetable, dried .....                           | 940               |

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

### § 180.153 Diazinon; tolerances for residues.

(a) *General.* Tolerances are established for residues of the insecticide diazinon, *O,O*-diethyl *O*-[6-methyl-2-(1-methylethyl)-4-pyrimidinyl]phosphorothioate (CAS No. 333-41-5), in or on the following food commodities:

| Commodity                       | Parts per million |
|---------------------------------|-------------------|
| Almond, hulls .....             | 3.0               |
| Apple .....                     | 0.50              |
| Apricot .....                   | 0.20              |
| Bean, lima .....                | 0.50              |
| Bean, snap, succulent .....     | 0.50              |
| Beet, garden, roots .....       | 0.75              |
| Beet, garden, tops .....        | 0.70              |
| Blueberry .....                 | 0.50              |
| Caneberry subgroup 13-07A ..... | 0.75              |
| Carrot, roots .....             | 0.75              |
| Cattle, fat .....               | 0.50              |
| Cherry, sweet .....             | 0.20              |
| Cherry, tart .....              | 0.20              |

| Commodity                                 | Parts per million |
|-------------------------------------------|-------------------|
| Cranberry .....                           | 0.50              |
| Endive .....                              | 0.70              |
| Fig .....                                 | 0.50              |
| Ginseng .....                             | 0.75              |
| Grape .....                               | 0.75 <sup>2</sup> |
| Hazelnut .....                            | 0.50              |
| Kiwifruit <sup>1</sup> .....              | 0.75              |
| Lettuce .....                             | 0.70              |
| Melon .....                               | 0.75              |
| Mushroom .....                            | 0.75 <sup>2</sup> |
| Nectarine .....                           | 0.20              |
| Onion, bulb .....                         | 0.75              |
| Onion, green .....                        | 0.75              |
| Pea, succulent .....                      | 0.50              |
| Peach .....                               | 0.20              |
| Pear .....                                | 0.50              |
| Pineapple .....                           | 0.50              |
| Plum, prune, fresh .....                  | 0.20              |
| Radish .....                              | 0.50              |
| Rutabaga .....                            | 0.75              |
| Spinach .....                             | 0.70              |
| Strawberry .....                          | 0.50              |
| Tomato .....                              | 0.75              |
| Vegetable, brassica, leafy, group 5 ..... | 0.70              |
| Watercress .....                          | 0.05              |

<sup>1</sup>There are no domestic registrations for kiwifruit as of March 6, 2002.

<sup>2</sup>The expiration/revocation date for this tolerance is 9/10/2010.

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* Tolerances with regional registration, as defined in § 180.1(1), are established for residues of the insecticide diazinon, *O,O*-diethyl *O*-[6-methyl-2-(1-methylethyl)-4-pyrimidinyl]phosphorothioate (CAS No. 333-41-5), in or on the following food commodities:

| Commodity                 | Parts per million |
|---------------------------|-------------------|
| Almond .....              | 0.50              |
| Banana .....              | 0.20              |
| Celery .....              | 0.70              |
| Cucumber .....            | 0.75              |
| Parsley, leaves .....     | 0.75              |
| Parsnip .....             | 0.50              |
| Pepper .....              | 0.5               |
| Potato .....              | 0.10              |
| Squash, summer .....      | 0.50              |
| Squash, winter .....      | 0.75              |
| Sweet potato, roots ..... | 0.10              |
| Swiss chard .....         | 0.70              |
| Turnip, roots .....       | 0.50              |
| Turnip, tops .....        | 0.75              |

(d) *Indirect or inadvertent residues.* [Reserved]

[47 FR 42738, Sept. 29, 1982]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 180.153, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at [www.govinfo.gov](http://www.govinfo.gov).

§ 180.155

40 CFR Ch. I (7–1–25 Edition)

§ 180.155 1-Naphthaleneacetic acid; tolerances for residues.

(a) *General.* Tolerances are established for the residues of 1-naphthaleneacetic acid, including its metabolites and degradates in or on the commodities in the following table. Compliance with the tolerance levels specified is to be determined by measuring only 1-naphthaleneacetic acid and its conjugates, calculated as the Stoichiometric equivalent of 1-naphthaleneacetic acid, in or on the commodity.

| Commodity                      | Parts per million |
|--------------------------------|-------------------|
| Avocado .....                  | 0.05              |
| Cherry, sweet .....            | 0.1               |
| Fruit, pome, group 11–10 ..... | 0.15              |
| Mango .....                    | 0.05              |
| Olive .....                    | 0.7               |
| Orange .....                   | 0.1               |
| Pineapple <sup>1</sup> .....   | 0.05              |
| Pomegranate .....              | 0.05              |
| Potato .....                   | 0.01              |
| Rambutan .....                 | 2.0               |
| Sapote, mamey .....            | 0.05              |
| Tangerine .....                | 0.1               |

<sup>1</sup> There are no U.S. registrations since 1988.

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[78 FR 30218, May 22, 2013, as amended at 80 FR 77260, Dec. 14, 2015]

§ 180.163 Dicofol; tolerances for residues.

(a) *General.* (1) Tolerances are established for residues of the insecticide dicofol, including its metabolites and degradates, in or on the commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only dicofol as the sum of its p,p-dicofol and o,p-dicofol isomers: 4-chloro- $\alpha$ -(4-chlorophenyl)- $\alpha$ -(trichloromethyl)benzenemethanol and 2-chloro- $\alpha$ -(4-chlorophenyl)- $\alpha$ -(trichloromethyl)benzenemethanol, in or on the commodity.

| Commodity               | Parts per million | Expiration/revocation date |
|-------------------------|-------------------|----------------------------|
| Apple, wet pomace ..... | 38.0              | 10/31/16                   |
| Bean, dry, seed .....   | 0.5               | 10/31/16                   |
| Bean, succulent .....   | 3.0               | 10/31/16                   |

| Commodity                          | Parts per million | Expiration/revocation date |
|------------------------------------|-------------------|----------------------------|
| Butternut .....                    | 0.1               | 10/31/16                   |
| Caneberry subgroup 13A .....       | 5.0               | 10/31/16                   |
| Chestnut .....                     | 0.1               | 10/31/16                   |
| Citrus, dried pulp .....           | 12.0              | 10/31/16                   |
| Citrus oil .....                   | 200.0             | 10/31/16                   |
| Cotton, refined oil .....          | 0.5               | 10/31/16                   |
| Cotton, undelinted seed .....      | 0.1               | 10/31/16                   |
| Fruit, citrus, group 10 .....      | 6.0               | 10/31/16                   |
| Fruit, pome, group 11 .....        | 10.0              | 10/31/16                   |
| Fruit, stone, group 12 .....       | 5.0               | 10/31/16                   |
| Grape .....                        | 5.0               | 10/31/16                   |
| Grape, raisin .....                | 20.0              | 10/31/16                   |
| Hazelnut .....                     | 0.1               | 10/31/16                   |
| Hop, dried cones .....             | 65.0              | 10/31/16                   |
| Nut, hickory .....                 | 0.1               | 10/31/16                   |
| Nut, macadamia .....               | 0.1               | 10/31/16                   |
| Pecan .....                        | 0.1               | 10/31/16                   |
| Peppermint, oil .....              | 30.0              | 10/31/16                   |
| Peppermint, tops .....             | 25.0              | 10/31/16                   |
| Spearmint, oil .....               | 30.0              | 10/31/16                   |
| Spearmint, tops .....              | 25.0              | 10/31/16                   |
| Strawberry .....                   | 10.0              | 10/31/16                   |
| Tea, dried .....                   | 50.0              | None                       |
| Tea, plucked leaves .....          | 30.0              | None                       |
| Vegetable, cucurbit, group 9 ..... | 2.0               | 10/31/16                   |
| Vegetable, fruiting, group 8 ..... | 2.0               | 10/31/16                   |
| Walnut .....                       | 0.1               | 10/31/16                   |

(2) Tolerances are established for residues of the insecticide dicofol, including its metabolites and degradates, in or on the commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only the sum of p,p-dicofol, 4-chloro- $\alpha$ -(4-chlorophenyl)- $\alpha$ -(trichloromethyl)benzenemethanol, its isomer o,p-dicofol, 2-chloro- $\alpha$ -(4-chlorophenyl)- $\alpha$ -(trichloromethyl)benzenemethanol, and its metabolites 4-chloro- $\alpha$ -(4-chlorophenyl)- $\alpha$ -(dichloromethyl)benzenemethanol and 2-chloro- $\alpha$ -(4-chlorophenyl)- $\alpha$ -(dichloromethyl)benzenemethanol, calculated as the stoichiometric equivalent of p,p-dicofol, 4-chloro- $\alpha$ -(4-chlorophenyl)- $\alpha$ -(trichloromethyl)benzenemethanol, in or on the commodity.

| Commodity                                   | Parts per million | Expiration/Revocation Date |
|---------------------------------------------|-------------------|----------------------------|
| Cattle, fat .....                           | 50.0              | 10/31/16                   |
| Cattle, liver .....                         | 5.0               | 10/31/16                   |
| Cattle, meat .....                          | 3.0               | 10/31/16                   |
| Cattle, meat byproducts, except liver ..... | 3.0               | 10/31/16                   |
| Egg .....                                   | 0.05              | 10/31/16                   |
| Goat, fat .....                             | 50.0              | 10/31/16                   |
| Goat, liver .....                           | 5.0               | 10/31/16                   |
| Goat, meat .....                            | 3.0               | 10/31/16                   |
| Goat, meat byproducts, except liver .....   | 3.0               | 10/31/16                   |

# Environmental Protection Agency

§ 180.169

| Commodity                                           | Parts per million | Expiration/Revocation Date |

## § 180.169 Carbaryl; tolerances for residues.

(a) *General.* (1) Tolerances are established for residues of the insecticide carbaryl, 1-naphthyl *N*-methylcarbamate *per se*, in or on the following food commodities:

| Commodity                                             | Parts per million | Expiration/revocation date |
|-------------------------------------------------------|-------------------|----------------------------|
| Alfalfa, forage .....                                 | 50                | None                       |
| Alfalfa, hay .....                                    | 75                | None                       |
| Almond, hulls .....                                   | 50                | None                       |
| Apple, wet pomace .....                               | 15                | None                       |
| Asparagus .....                                       | 15                | None                       |
| Banana .....                                          | 5.0               | None                       |
| Beet, sugar, roots .....                              | 0.5               | None                       |
| Beet, sugar, tops .....                               | 25                | None                       |
| Bushberry subgroup 13-07B .....                       | 3.0               | None                       |
| Cabbage .....                                         | 21                | None                       |
| Cactus, fruit .....                                   | 5.0               | None                       |
| Cactus, pads .....                                    | 12                | None                       |
| Caneberry subgroup 13-07A .....                       | 12.0              | None                       |
| Citrus, oil .....                                     | 20                | None                       |
| Clover, forage .....                                  | 50                | None                       |
| Clover, hay .....                                     | 70                | None                       |
| Corn, field, forage .....                             | 30                | None                       |

| Hog, meat byproducts .....    | 3.0               | None                       |
| Horse, fat .....              | 0.5               | None                       |
| Horse, meat .....             | 1.0               | None                       |
| Horse, meat byproducts .....  | 3.0               | None                       |
| Milk .....                    | 1.0               | None                       |
| Poultry, fat .....            | 5.0               | 10/31/09                   |
| Poultry, meat .....           | 5.0               | 10/31/09                   |
| Sheep, fat .....              | 0.5               | None                       |
| Sheep, meat .....             | 1.0               | None                       |
| Sheep, meat byproducts .....  | 3.0               | None                       |

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* Tolerances with regional registrations, as defined in §180.1(l), are established for residues of the insecticide carbaryl, 1-naphthyl N-methylcarbamate *per se*, in or on the following food commodities:

| Commodity                    | Parts per million |
|------------------------------|-------------------|
| Dillweed, fresh leaves ..... | 0.2               |

(d) *Indirect or inadvertent residues.* [Reserved]

[65 FR 33695, May 24, 2000, as amended at 66 FR 38955, July 26, 2001; 67 FR 49615, July 31, 2002; 70 FR 44492, Aug. 3, 2005; 73 FR 52611, Sept. 10, 2008; 74 FR 10490, Mar. 11, 2009; 80 FR 72597, Nov. 20, 2015]

## § 180.172 Dodine; tolerances for residues.

(a) *General.* Tolerances are established for residues of the fungicide dodine, including its metabolites and degradates, in or on the commodities in table 1 to this paragraph (a). Compliance with the tolerance levels specified in table 1 is to be determined by measuring only dodine, N-dodecylguanidine acetate; in or on the following commodities.

## 40 CFR Ch. I (7–1–25 Edition)

TABLE 1 TO PARAGRAPH (a)

| Commodity                       | Parts per million |
|---------------------------------|-------------------|
| Almond, hull .....              | 30.0              |
| Apple, wet pomace .....         | 15.0              |
| Banana .....                    | 0.50              |
| Fruit, pome, group 11–10 .....  | 5                 |
| Fruit, stone, group 12–12 ..... | 5                 |
| Nut, tree, group 14–12 .....    | 0.3               |
| Olive, with pit .....           | 0.4               |
| Peanut .....                    | 0.013             |
| Strawberry .....                | 5.0               |

(b)–(d) [Reserved]

[88 FR 86273, Dec. 13, 2023]

## § 180.175 Maleic hydrazide; tolerances for residues.

(a) *General.* (1) Tolerances for residues of the herbicide and plant regulator maleic hydrazide (1,2-dihydro-3,6-pyridazinedione) are established in or on the following raw agricultural commodities:

| Commodity         | Parts per million |
|-------------------|-------------------|
| Onion, bulb ..... | 15.0              |
| Potato .....      | 50.0              |

(2) A food additive known as maleic hydrazide (1,2-dihydro-3,6-pyridazinedione) may be present in potato, chips when used in accordance with the following conditions:

(i) The food additive is present as a result of the application of a pesticide formulation containing maleic hydrazide to the growing potato plant in accordance with directions registered by the U.S. Environmental Protection Agency.

(ii) The label of the pesticide formulation containing the food additive conforms to labeling registered by the U.S. Environmental Protection Agency.

(iii) The food additive is present in an amount not to exceed 160 parts per million by weight of the finished food.

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[62 FR 64293, Dec. 5, 1997, as amended at 64 FR 11792, Mar. 10, 1999; 67 FR 35048, May 17, 2002]

# Environmental Protection Agency

§ 180.176

## § 180.176 Mancozeb; tolerances for residues.

(a) *General.* Tolerances are established for residues of mancozeb (a coordination product of zinc ion and maneb (manganese ethylenebisdithiocarbamate)), including its metabolites and degradates, in or on the commodities in the following table. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only those mancozeb residues convertible to and expressed in terms of the degradate carbon disulfide.

| Commodity                                             | Parts per million |
|-------------------------------------------------------|-------------------|
| Almond .....                                          | 0.1               |
| Almond, hulls .....                                   | 4                 |
| Apple .....                                           | 0.6               |
| Asparagus .....                                       | 0.1               |
| Atemoya .....                                         | 3.0               |
| Banana .....                                          | 2                 |
| Barley, bran .....                                    | 2                 |
| Barley, flour .....                                   | 1.2               |
| Barley, grain .....                                   | 1                 |
| Barley, hay .....                                     | 30                |
| Barley, pearled barley .....                          | 20                |
| Barley, straw .....                                   | 25                |
| Beet, sugar, dried pulp .....                         | 3.0               |
| Beet, sugar, roots .....                              | 1.2               |
| Beet, sugar, tops .....                               | 60                |
| Broccoli .....                                        | 7                 |
| Cabbage .....                                         | 9                 |
| Canistel .....                                        | 15.0              |
| Cattle, kidney .....                                  | 0.5               |
| Cattle, liver .....                                   | 0.5               |
| Cherimoya .....                                       | 3.0               |
| Corn, field, forage .....                             | 40                |
| Corn, field, grain .....                              | 0.06              |
| Corn, field, stover .....                             | 15                |
| Corn, pop, grain .....                                | 0.1               |
| Corn, pop, stover .....                               | 40                |
| Corn, sweet, forage .....                             | 70                |
| Corn, sweet, kernel plus cob with husks removed ..... | 0.1               |
| Corn, sweet, stover .....                             | 40                |
| Cotton, undelinted seed .....                         | 0.5               |
| Crabapple .....                                       | 0.6               |
| Cranberry .....                                       | 5                 |
| Custard apple .....                                   | 3.0               |
| Fennel .....                                          | 2.5               |
| Flax, seed .....                                      | 0.15              |
| Ginseng .....                                         | 1.2               |
| Goat, kidney .....                                    | 0.5               |
| Goat, liver .....                                     | 0.5               |
| Grape .....                                           | 1.5               |
| Hog, kidney .....                                     | 0.5               |
| Hog, liver .....                                      | 0.5               |
| Horse, kidney .....                                   | 0.5               |
| Horse, liver .....                                    | 0.5               |
| Lettuce, head .....                                   | 3.5               |
| Lettuce, leaf .....                                   | 18                |
| Mango .....                                           | 15.0              |
| Oat, flour .....                                      | 1.2               |
| Oat, grain .....                                      | 1                 |
| Oat, groats/rolled oats .....                         | 20                |
| Oat, hay .....                                        | 30                |
| Oat, straw .....                                      | 25                |
| Onion, bulb .....                                     | 1.5               |

| Commodity                          | Parts per million |

| Wheat, germ .....                  | 20                |
| Wheat, grain .....                 | 1                 |
| Wheat, hay .....                   | 30                |
| Wheat, middlings .....             | 20                |
| Wheat, shorts .....                | 2                 |
| Wheat, straw .....                 | 25                |

<sup>1</sup> There are no U.S. registrations for use of mancozeb on tangerine.

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* A tolerance with regional registrations, as defined in §180.1(l), is established for residues of the fungicide mancozeb, (a coordination product of zinc ion and maneb (manganese ethylenebisdithiocarbamate)), including its metabolites and degradates, in or on the commodity in the following table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only those mancozeb residues convertible to and expressed in terms of the degradate carbon disulfide.

| Commodity           | Parts per million |
|---------------------|-------------------|
| Carrot, roots ..... | 1                 |

**§ 180.178**

(d) *Indirect or inadvertent residues.*  
[Reserved]

**§ 180.178 Ethoxyquin; tolerances for residues.**

(a) *General.* A tolerance is established for residues of the plant regulator ethoxyquin (1,2-dihydro-6-ethoxy-2,2,4-trimethylquinoline) from preharvest or postharvest use in or on the following commodity:

| Commodity  | Parts per million |
|------------|-------------------|
| Pear ..... | 3                 |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.*  
[Reserved]

[63 FR 57073, Oct. 26, 1998]

**§ 180.181 Chlorpropham; tolerances for residues.**

(a) *General.* (1) Tolerances are established for residues of the plant regulator and herbicide chlorpropham (isopropyl m-chlorocarbanilate (CIPC) in or on the following food commodities:

| Commodity              | Parts per million |
|------------------------|-------------------|
| Potato .....           | 30                |
| Potato, wet peel ..... | 40                |

(2) Tolerances are established for the combined residues of the plant regulator and herbicide chlorpropham (isopropyl m-chlorocarbanilate (CIPC) and its metabolite 4-hydroxychlorpropham-O-sulfonic acid (4-HSA) in or on the following food commodities:

| Commodity                                   | Parts per million |
|---------------------------------------------|-------------------|
| Cattle, fat .....                           | 0.20              |
| Cattle, kidney .....                        | 0.30              |
| Cattle, meat .....                          | 0.06              |
| Cattle, meat byproducts except kidney ..... | 0.06              |
| Goat, fat .....                             | 0.20              |
| Goat, kidney .....                          | 0.30              |
| Goat, meat .....                            | 0.06              |

**40 CFR Ch. I (7–1–25 Edition)**

| Commodity                                  | Parts per million |
|--------------------------------------------|-------------------|
| Goat, meat byproducts except kidney .....  | 0.06              |

**§ 180.182 Endosulfan; tolerances for residues.**

(a)(1) *General.* Tolerances are established for residues of the insecticide endosulfan, including its metabolites and degradates, in or on the commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only the sum of endosulfan, 6,7,8,9,10,10-hexachloro-1,5,5a,6,9,9a-hexahydro-6,9-methano-2,4,3-benzodioxathiepin 3-oxide (alpha and beta isomers), and its metabolite endosulfan sulfate, 6,7,8,9,10,10-hexachloro-1,5,5a,6,9,9a-hexahydro-6,9-methano-2,4,3-benzodioxathiepin-3,3-dioxide, calculated as the stoichiometric equivalent of endosulfan, in or on the commodity.

| Commodity                                   | Parts per million | Expiration/revocation date |
|---------------------------------------------|-------------------|----------------------------|
| Almond .....                                | 0.3               | 7/31/12                    |
| Almond, hulls .....                         | 1.0               | 7/31/12                    |
| Apricot .....                               | 2.0               | 7/31/12                    |
| Bean .....                                  | 2.0               | 7/31/12                    |
| Broccoli .....                              | 3.0               | 7/31/12                    |
| Brussels sprouts .....                      | 2.0               | 7/31/12                    |
| Cabbage .....                               | 4.0               | 7/31/12                    |
| Cantaloupe .....                            | 1.0               | 7/31/12                    |
| Carrot, roots .....                         | 0.2               | 7/31/12                    |
| Cattle, fat .....                           | 13.0              | 7/31/16                    |
| Cattle, liver .....                         | 5.0               | 7/31/16                    |
| Cattle, meat .....                          | 2.0               | 7/31/16                    |
| Cattle, meat byproducts, except liver ..... | 1.0               | 7/31/16                    |
| Cauliflower .....                           | 2.0               | 7/31/12                    |

| Sweet potato, roots .....                  | 0.15              | 7/31/12                    |
| Walnut .....                               | 0.2               | 7/31/12                    |
| Watermelon .....                           | 1.0               | 7/31/12                    |

(2) A tolerance is established for the combined residues of the insecticide endosulfan, 6,7,8,9,10,10-hexachloro-1,5,5a,6,9,9a-hexahydro-6,9-methano-2,4,3-benzodioxathiepin-3-oxide (alpha and beta isomers), and its metabolite endosulfan sulfate, 6,7,8,9,10,10-hexachloro-1,5,5a,6,9,9a-hexahydro-6,9-methano-2,4,3-benzodioxathiepin-3,3-dioxide in or on the commodity in the following table:

| Commodity  | Parts per million                                                                                              | Expiration/revocation date |
|------------|----------------------------------------------------------------------------------------------------------------|----------------------------|
| Tea, dried | 24 (reflecting less than 0.1 ppm in beverage tea) resulting from application of the insecticide to growing tea | 7/31/16                    |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) Tolerances with regional registrations. (1) Tolerances with regional registration, as defined in §180.1(l), are established for residues of the insecticide endosulfan, including its metabolites and degradates, in or on the commodities in the table in this paragraph, when endosulfan is used in the state of Florida. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only the sum of endosulfan, 6,7,8,9,10,10-hexachloro-1,5,5a,6,9,9a-hexahydro-6,9-methano-2,4,3-benzodioxathiepin 3-oxide (alpha and beta isomers), and its metabolite endosulfan sulfate, 6,7,8,9,10,10-hexachloro-1,5,5a,6,9,9a-hexahydro-6,9-methano-2,4,3-benzodioxathiepin-3,3-dioxide, calculated as the stoichiometric equivalent of endosulfan, in or on the commodity.

| Commodity                                             | Parts per million | Expiration/revocation date |
|-------------------------------------------------------|-------------------|----------------------------|
| Apple .....                                           | 1.0               | 12/31/14                   |
| Apple, wet pomace .....                               | 5.0               | 12/31/14                   |
| Blueberry .....                                       | 0.3               | 12/31/14                   |
| Corn, sweet, forage .....                             | 12.0              | 12/31/14                   |
| Corn, sweet, kernel plus cob with husks removed ..... | 0.2               | 12/31/14                   |
| Corn, sweet, stover .....                             | 14.0              | 12/31/14                   |
| Pepper .....                                          | 2.0               | 12/31/14                   |
| Potato .....                                          | 0.2               | 12/31/14                   |
| Pumpkin .....                                         | 1.0               | 12/31/14                   |
| Squash, winter .....                                  | 1.0               | 12/31/14                   |
| Tomato .....                                          | 1.0               | 12/31/14                   |

(2) Tolerances with regional registrations. Tolerances with regional registration, as defined in §180.1(l), are established for residues of the insecticide endosulfan, including its metabolites and degradates, in or on the commodities in the table in this paragraph, when endosulfan is used in the United States (except Florida). Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only the sum of endosulfan, 6,7,8,9,10,10-hexachloro-1,5,5a,6,9,9a-hexahydro-6,9-methano-2,4,3-benzodioxathiepin 3-oxide (alpha and beta isomers), and its metabolite endosulfan sulfate, 6,7,8,9,10,10-hexachloro-1,5,5a,6,9,9a-hexahydro-6,9-methano-2,4,3-benzodioxathiepin-3,3-dioxide, calculated as the stoichiometric

§ 180.184

equivalent of endosulfan, in or on the commodity.

| Commodity                                             | Parts per million | Expiration/revocation date |
|-------------------------------------------------------|-------------------|----------------------------|

(d) *Indirect or inadvertent residues.*  
[Reserved]

[65 FR 33696, May 24, 2000, as amended at 71 FR 54433, Sept. 15, 2006; 76 FR 56653, Sept. 14, 2011; 78 FR 8409, Feb. 6, 2013]

§ 180.184 Linuron; tolerances for residues.

(a) *General.* Tolerances are established for residues of the herbicide linuron (3-(3,4-dichlorophenyl)-1-methoxy-1-methylurea), including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only those linuron residues convertible to 3,4-dichloroaniline, calculated as the stoichiometric equivalent of linuron, in or on the commodity:

TABLE 1 TO PARAGRAPH (a)

| Commodity                                             | Parts per million |
|-------------------------------------------------------|-------------------|
| Alfalfa, forage .....                                 | 1                 |
| Alfalfa, hay .....                                    | 3                 |
| Asparagus .....                                       | 7.0               |
| Carrot, roots .....                                   | 1.0               |
| Cattle, fat .....                                     | 0.2               |
| Cattle, kidney .....                                  | 2.0               |
| Cattle, liver .....                                   | 2.0               |
| Cattle, meat .....                                    | 0.1               |
| Cattle, meat byproducts except kidney and liver ..... | 0.1               |
| Celeriac .....                                        | 1.0               |
| Cilantro, dried leaves .....                          | 10                |
| Cilantro, fresh leaves .....                          | 3.0               |
| Coriander, seed .....                                 | 0.01              |
| Corn, field, forage .....                             | 1.0               |
| Corn, field, grain .....                              | 0.1               |
| Corn, field, stover .....                             | 6.0               |
| Corn, sweet, forage .....                             | 1.0               |
| Corn, sweet, kernel plus cob with husks removed ..... | 0.25              |
| Corn, sweet, stover .....                             | 6.0               |
| Cotton, gin byproducts .....                          | 5.0               |
| Cotton, undelinted seed .....                         | 0.25              |

40 CFR Ch. I (7–1–25 Edition)

TABLE 1 TO PARAGRAPH (a)—Continued

| Commodity                                            | Parts per million |
|------------------------------------------------------|-------------------|
| Dill, oil .....                                      | 2.0               |
| Dill, seed .....                                     | 0.5               |
| Dillweed, dried leaves .....                         | 5.0               |

| Milk .....                                           | 0.05              |
| Parsley, dried leaves .....                          | 9.0               |
| Parsley, leaves .....                                | 4.0               |
| Parsnip, roots .....                                 | 0.05              |
| Parsnip, tops .....                                  | 0.05              |
| Pea, dry, seed .....                                 | 0.09              |
| Rhubarb .....                                        | 0.5               |
| Sheep, fat .....                                     | 0.2               |
| Sheep, kidney .....                                  | 2.0               |
| Sheep, liver .....                                   | 2.0               |
| Sheep, meat .....                                    | 0.1               |
| Sheep, meat byproducts except kidney and liver ..... | 0.1               |
| Sorghum, grain, forage .....                         | 1.0               |
| Sorghum, grain, grain .....                          | 0.25              |
| Sorghum, grain, stover .....                         | 1.0               |
| Soybean, seed .....                                  | 1.0               |
| Soybean, vegetable .....                             | 1.0               |

(b) *Section 18 emergency exemptions.* Time-limited tolerances are established for residues of the herbicide linuron [3-(3,4-dichlorophenyl)-1-methoxy-1-methylurea], including its metabolites and degradates, in or on the commodities in the table below, resulting from use of the pesticide pursuant to FIFRA section 18 emergency exemptions. Compliance with the tolerance levels specified below is to be determined by measuring only those linuron residues convertible to 3,4-dichloroaniline, calculated as the stoichiometric equivalent of linuron, in or on the commodity. The tolerance expires and is revoked on the date specified in the table.

| Commodity    | Parts per million | Expiration/revocation date |
|--------------|-------------------|----------------------------|
| Lentil ..... | 0.1               | 12/31/14                   |

(c) *Tolerances with regional registrations.* Tolerances with regional registrations, as defined in §180.1(l), are

## Environmental Protection Agency

## § 180.185

established for residues of the herbicide linuron (3-(3,4-dichlorophenyl)-1-methoxy-1-methylurea), including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only those linuron residues convertible to 3,4-dichloroaniline, calculated as the stoichiometric equivalent of linuron, in or on the commodity.

| Commodity           | Parts per million |
|---------------------|-------------------|
| Celery .....        | 0.5               |
| Potato .....        | 0.2               |
| Wheat, forage ..... | 0.5               |
| Wheat, grain .....  | 0.05              |
| Wheat, hay .....    | 0.5               |
| Wheat, straw .....  | 2.0               |

(d) *Indirect or inadvertent residues.*  
[Reserved]

[64 FR 41822, Aug. 2, 1999, as amended at 72 FR 37653, July 11, 2007; 73 FR 51727, Sept. 5, 2008; 76 FR 81396, Dec. 28, 2011; 79 FR 8307, Feb. 12, 2014; 89 FR 4200, Jan. 23, 2024]

### § 180.185 DCPA; tolerances for residues.

(a) *General.* Tolerances for the combined residues of the herbicide dimethyl tetrachloroterephthalate (DCPA) and its metabolites monomethyltetrachloroterephthalate (MTP) and tetrachloroterephthalic acid (TCP) (calculated as dimethyl tetrachloroterephthalate) are established in or on the following food commodities:

| Commodity                                 | Parts per million |
|-------------------------------------------|-------------------|
| Cantaloupe .....                          | 1.0               |
| Garlic .....                              | 1.0               |
| Ginseng .....                             | 2.0               |
| Horseradish .....                         | 2.0               |
| Muskmelon .....                           | 1.0               |
| Onion, bulb .....                         | 1.0               |
| Onion, green .....                        | 1.0               |
| Strawberry .....                          | 2.0               |
| Tomato .....                              | 1.0               |
| Vegetable, brassica, leafy, group 5 ..... | 5.0               |
| Watermelon .....                          | 1.0               |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* Tolerances with regional registration, as defined in § 180.1(l), are established for the combined inadvertent residues of the herbicide dimethyl

tetrachloroterephthalate (DCPA) and its metabolites monomethyl tetrachloroterephthalate acid (MTP) and tetrachlorophthalic acid (TCP) (calculated as DCPA) in or on the following food commodities:

| Commodity           | Parts per million |
|---------------------|-------------------|
| Radish, roots ..... | 2.0               |
| Radish, tops .....  | 15.0              |

(d) *Indirect or inadvertent residues.* Tolerances are established for the combined indirect or inadvertent residues of the herbicide dimethyl tetrachloroterephthalate (DCPA) and its metabolites monomethyl tetrachloroterephthalate acid (MTP) and tetrachlorophthalic acid (TCP) (calculated as DCPA) in or on the following food commodities:

| Commodity                                             | Parts per million |
|-------------------------------------------------------|-------------------|
| Basil, dried leaves .....                             | 20.0              |
| Basil, fresh leaves .....                             | 5.0               |
| Bean, dry .....                                       | 2.0               |
| Bean, mung, seed .....                                | 2.0               |
| Bean, snap, succulent .....                           | 2.0               |
| Celeriac .....                                        | 2.0               |
| Chicory, roots .....                                  | 2.0               |
| Chicory, tops .....                                   | 5.0               |
| Chive .....                                           | 5.0               |
| Coriander, leaves .....                               | 5.0               |
| Corn, field, forage .....                             | 0.4               |
| Corn, field, grain .....                              | 0.05              |
| Corn, field, stover .....                             | 0.4               |
| Corn, pop, forage .....                               | 0.4               |
| Corn, pop, grain .....                                | 0.05              |
| Corn, pop, stover .....                               | 0.4               |
| Corn, sweet, forage .....                             | 0.4               |
| Corn, sweet, kernel plus cob with husks removed ..... | 0.05              |
| Corn, sweet, stover .....                             | 0.4               |
| Cotton, undelinted seed .....                         | 0.2               |
| Cucumber .....                                        | 1.0               |
| Dill .....                                            | 5.0               |
| Eggplant .....                                        | 1.0               |
| Lettuce .....                                         | 2.0               |
| Marjoram .....                                        | 5.0               |
| Parsley, dried leaves .....                           | 20.0              |
| Parsley, leaves .....                                 | 5.0               |
| Pea, blackeyed, seed .....                            | 2.0               |
| Pepper .....                                          | 2.0               |
| Pimento .....                                         | 2.0               |
| Potato .....                                          | 2.0               |
| Radicchio .....                                       | 5.0               |
| Radish, oriental, roots .....                         | 2.0               |
| Radish, oriental, tops .....                          | 2.0               |
| Rutabaga .....                                        | 2.0               |
| Soybean .....                                         | 2.0               |
| Squash, summer .....                                  | 1.0               |
| Squash, winter .....                                  | 1.0               |
| Sweet potato .....                                    | 2.0               |
| Turnip, roots .....                                   | 2.0               |
| Turnip, tops .....                                    | 5.0               |
| Yam, true, tuber .....                                | 2.0               |

## § 180.189

[72 FR 52018, Sept. 12, 2007, as amended at 73 FR 53737, Sept. 17, 2008; 73 FR 80302, Dec. 31, 2008; 74 FR 14744, Apr. 1, 2009]

### § 180.189 Coumaphos; tolerances for residues.

(a) *General.* Tolerances for residues of the insecticide coumaphos (*O,O*-diethyl *O*-3-chloro-4-methyl-2-oxo-2H-1-benzopyran-7-yl phosphorothioate and its oxygen analog (*O,O*-diethyl *O*-3-chloro-4-methyl-2-oxo-2H-1-benzopyran-7-yl phosphate) in or on food commodities as follows:

| Commodity                            | Parts per million |
|--------------------------------------|-------------------|
| Cattle, fat .....                    | 1.0               |
| Cattle, meat .....                   | 1.0               |
| Cattle, meat byproducts .....        | 1.0               |
| Goat, fat .....                      | 1.0               |
| Goat, meat .....                     | 1.0               |
| Goat, meat byproducts .....          | 1.0               |
| Hog, fat .....                       | 1.0               |
| Hog, meat .....                      | 1.0               |
| Hog, meat byproducts .....           | 1.0               |
| Honey .....                          | 0.15              |
| Honeycomb .....                      | 45.0              |
| Horse, fat .....                     | 1.0               |
| Horse, meat .....                    | 1.0               |
| Horse, meat byproducts .....         | 1.0               |
| Milk, fat ( = n in whole milk) ..... | 0.5               |
| Sheep, fat .....                     | 1.0               |
| Sheep, meat .....                    | 1.0               |
| Sheep, meat byproducts .....         | 1.0               |

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[64 FR 39077, July 21, 1999, as amended at 65 FR 49936, Aug. 16, 2000; 67 FR 46883, July 17, 2002; 69 FR 29458, May 24, 2004; 72 FR 28876, May 23, 2007]

### § 180.190 Diphenylamine; tolerances for residues.

(a) *General.* Tolerances for residues of the plant regulator diphenylamine are established in or on the following commodities:

| Commodity                                                                          | Parts per million |
|------------------------------------------------------------------------------------|-------------------|
| Apple, wet pomace .....                                                            | 30.0              |
| Apple from preharvest or postharvest use, including use of impregnated wraps ..... | 10.0              |
| Cattle, fat .....                                                                  | 0.01              |
| Cattle, liver .....                                                                | 0.1               |
| Cattle, meat byproducts, except liver .....                                        | 0.01              |
| Cattle, meat .....                                                                 | 0.01              |
| Goat, fat .....                                                                    | 0.01              |
| Goat, liver .....                                                                  | 0.1               |
| Goat, meat byproducts, except liver .....                                          | 0.01              |

## 40 CFR Ch. I (7–1–25 Edition)

| Commodity                                  | Parts per million |
|--------------------------------------------|-------------------|
| Goat, meat .....                           | 0.01              |
| Horse, fat .....                           | 0.01              |
| Horse, liver .....                         | 0.1               |
| Horse, meat byproducts, except liver ..... | 0.01              |
| Horse, meat .....                          | 0.01              |
| Milk .....                                 | 0.01              |
| Pear (post harvest) .....                  | 5.0               |
| Sheep, fat .....                           | 0.01              |
| Sheep, liver .....                         | 0.1               |
| Sheep, meat byproducts, except liver ..... | 0.01              |
| Sheep, meat .....                          | 0.01              |

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[64 FR 25848, May 13, 1999, as amended at 66 FR 63198, Dec. 5, 2001; 72 FR 16283, Apr. 4, 2007; 76 FR 34885, June 15, 2011]

### § 180.191 Folpet; tolerances for residues.

(a) *General.* Tolerances are established for the fungicide folpet (*N*-(trichloromethylthio)phthalimide) in or on raw agricultural commodities as follows:

| Commodity                        | Parts per million |
|----------------------------------|-------------------|
| Apple <sup>1</sup> .....         | 5.0               |
| Cranberry <sup>1</sup> .....     | 15.0              |
| Cucumber <sup>1</sup> .....      | 2.0               |
| Grape <sup>1</sup> .....         | 50.0              |
| Grape, raisin <sup>1</sup> ..... | 80.0              |
| Hop, dried cones .....           | 120.0             |
| Lettuce <sup>1</sup> .....       | 50.0              |
| Melon <sup>1</sup> .....         | 3.0               |
| Onion, bulb <sup>1</sup> .....   | 2.0               |
| Strawberry <sup>1</sup> .....    | 5.0               |
| Tomato <sup>1</sup> .....        | 25.0              |

<sup>1</sup> No U.S. registrations.

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* Tolerances with regional registrations as defined in § 180.1(l) are established for the fungicide folpet (*N*-(trichloromethylthio)phthalimide) in or on the following raw agricultural commodity:

| Commodity     | Parts per million |
|---------------|-------------------|
| Avocado ..... | 25.0              |

## Environmental Protection Agency

## § 180.204

(d) *Indirect or inadvertent residues.*  
[Reserved]

[61 FR 37222, July 17, 1996, as amended at 68 FR 10388, Mar. 5, 2003; 69 FR 52192, Aug. 25, 2004; 72 FR 41928, Aug. 1, 2007]

### § 180.198 Trichlorfon; tolerances for residues.

(a) *General.* Tolerances are established for residues of the insecticide trichlorfon (dimethyl (2,2,2-trichloro-1-hydroxyethyl) phosphonate) in or on the following food commodities:

| Commodity                                  | Parts per million |
|--------------------------------------------|-------------------|
| Cattle, fat <sup>1</sup> .....             | 0.5               |
| Cattle, meat <sup>1</sup> .....            | 0.2               |
| Cattle, meat byproducts <sup>1</sup> ..... | 0.1               |

<sup>1</sup> There are no U.S. registrations for cattle commodities as of June 24, 1999.

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.*  
[Reserved]

[72 FR 54578, Sept. 26, 2007]

### § 180.200 Dicloran; tolerances for residues.

(a) *General.* Tolerances are established for residues of the fungicide dicloran, including its metabolites and degradates, in or on the commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only dicloran, 2,6-dichloro-4-nitroaniline, in or on the commodity.

| Commodity                   | Parts per million | Expiration/revocation date |
|-----------------------------|-------------------|----------------------------|
| Apricot .....               | 20                | None                       |
| Bean, snap, succulent ..... | 20                | None                       |
| Carrot, roots .....         | 10                | 11/2/11                    |
| Celery .....                | 15                | None                       |
| Cherry, sweet .....         | 20                | None                       |
| Cucumber .....              | 5                 | None                       |
| Endive .....                | 10                | None                       |
| Garlic .....                | 5                 | None                       |
| Grape .....                 | 10                | None                       |
| Lettuce .....               | 10                | None                       |
| Nectarine .....             | 20                | None                       |
| Onion .....                 | 10                | None                       |
| Peach .....                 | 20                | None                       |
| Plum, prune, fresh .....    | 15                | None                       |
| Potato .....                | 0.25              | 12/31/14                   |
| Rhubarb .....               | 10                | None                       |
| Sweet potato, roots .....   | 10                | None                       |
| Tomato .....                | 5                 | None                       |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.*  
[Reserved]

[77 FR 40815, July 11, 2012]

### § 180.202 *p*-Chlorophenoxyacetic acid; tolerances for residues.

(a) *General.* A tolerance is established for residues of the plant regulator *p*-chlorophenoxyacetic acid, including its metabolites and degradates, in or on the commodity in the table in this paragraph (a). Compliance with the tolerance level specified in this paragraph (a) is to be determined by measuring only *p*-chlorophenoxyacetic acid, in or on the commodity.

TABLE 1 TO PARAGRAPH (a)

| Commodity                 | Parts per million |
|---------------------------|-------------------|
| Bean, mung, sprouts ..... | 0.2               |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.*  
[Reserved]

[68 FR 39439, July 1, 2003, as amended at 71 FR 56398, Sept. 27, 2006; 88 FR 46083, July 19, 2023]

### § 180.204 Dimethoate; tolerances for residues.

(a) *General.* Tolerances are established for total residues of the insecticide dimethoate (*O,O*-dimethyl *S*-(*N*-methylcarbamoylmethyl) phosphorodithioate) including its oxygen analog (*O,O*-dimethyl *S*-(*N*-methylcarbamoylmethyl) phosphorothioate) in or on the following food commodities:

| Commodity                     | Parts per million |
|-------------------------------|-------------------|
| Alfalfa, forage .....         | 2.0               |
| Alfalfa, hay .....            | 2.0               |
| Bean, dry, seed .....         | 2.0               |
| Bean, lima .....              | 2.0               |
| Bean, snap, succulent .....   | 2.0               |
| Blueberry <sup>1</sup> .....  | 1.0               |
| Broccoli .....                | 2.0               |
| Cattle, meat byproducts ..... | 0.02              |
| Cauliflower .....             | 2.0               |
| Celery .....                  | 2.0               |
| Citrus, dried pulp .....      | 5.0               |

§ 180.205

| Commodity                      | Parts per million |
|--------------------------------|-------------------|
| Corn, field, forage .....      | 1.0               |
| Corn, field, grain .....       | 0.1               |
| Corn, field, stover .....      | 1.0               |
| Corn, pop, grain .....         | 0.1               |
| Corn, pop, stover .....        | 1.0               |
| Corn, sweet, forage .....      | 1.0               |
| Cotton, undelinted seed .....  | 0.1               |
| Egg .....                      | 0.02              |
| Endive .....                   | 2.0               |
| Goat, meat byproducts .....    | 0.02              |
| Grapefruit .....               | 2.0               |
| Hog, meat byproducts .....     | 0.02              |
| Horse, meat byproducts .....   | 0.02              |
| Kale .....                     | 2.0               |
| Lemon .....                    | 2.0               |
| Lettuce, leaf .....            | 2.0               |
| Melon .....                    | 1.0               |
| Milk .....                     | 0.002             |
| Mustard greens .....           | 2.0               |
| Orange .....                   | 2.0               |
| Pea .....                      | 2.0               |
| Pear .....                     | 2.0               |
| Pecan .....                    | 0.1               |
| Pepper .....                   | 2.0               |
| Potato .....                   | 0.2               |
| Poultry, meat byproducts ..... | 0.02              |
| Safflower, seed .....          | 0.1               |
| Sheep, meat byproducts .....   | 0.02              |
| Sorghum, grain, forage .....   | 0.1               |
| Sorghum, grain, grain .....    | 0.1               |
| Sorghum, grain, stover .....   | 0.1               |
| Soybean, forage .....          | 2.0               |
| Soybean, hay .....             | 2.0               |
| Soybean, seed .....            | 0.05              |
| Swiss chard .....              | 2.0               |
| Tangerine .....                | 2.0               |
| Tomato .....                   | 2.0               |
| Turnip, roots .....            | 0.2               |
| Turnip, tops .....             | 2.0               |
| Wheat, forage .....            | 2.0               |
| Wheat, grain .....             | 0.04              |
| Wheat, hay .....               | 2.0               |
| Wheat, straw .....             | 2.0               |

<sup>1</sup> There are U.S. registrations as of August 16, 1996.

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* Tolerances with regional registration, as defined in §180.1(1), are established for total residues of dimethoate including its oxygen analog in or on the following food commodities:

| Commodity              | Parts per million |
|------------------------|-------------------|
| Asparagus .....        | 0.15              |
| Brussels sprouts ..... | 5.0               |
| Cherry, sweet .....    | 2.0               |
| Cherry, tart .....     | 2.0               |

(d) *Indirect or inadvertent residues.*  
[Reserved]

[65 FR 33697, May 24, 2000, as amended at 69 FR 6567, Feb. 11, 2004; 73 FR 53737, Sept. 17, 2008]

40 CFR Ch. I (7–1–25 Edition)

§ 180.205 Paraquat; tolerances for residues.

(a) *General.* Tolerances are established for residues of the desiccant, defoliant, and herbicide paraquat (1,1'-dimethyl-4,4'-bipyridinium-ion) derived from application of either the bis(methyl sulfate) or the dichloride salt (both calculated as the cation) in or on the following food commodities:

| Commodity                                             | Parts per million |
|-------------------------------------------------------|-------------------|

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* Tolerances with regional registration as defined in §180.1(l), are established for residues of the pesticide paraquat (1,1'-dimethyl-4,4'-bipyridinium ion) derived from application of either the bis(methyl sulfate) or the dichloride salt (both calculated as the cation) in or on the following food commodities:

| Commodity               | Parts per million |
|-------------------------|-------------------|
| Pea, pigeon, seed ..... | 0.05              |
| Taro, corm .....        | 0.1               |
| Tyfon .....             | 0.05              |

(d) *Indirect or inadvertent residues.*  
[Reserved]

[46 FR 51614, Oct. 21, 1981]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 180.205, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at [www.govinfo.gov](http://www.govinfo.gov).

## § 180.206 Phorate; tolerances for residues.

(a) *General.* Tolerances are established for the combined residues of the insecticide phorate (*O,O*-diethyl *S* (ethylthio) methylphosphorodithioate), phorate sulfide, phorate sulfone, phorate oxygen analog, phorate oxygen analog sulfide, and phorate oxygen analog sulfone in or on the following food commodities:

| Commodity                                             | Parts per million |
|-------------------------------------------------------|-------------------|
| Bean, dry, seed .....                                 | 0.05              |
| Bean, succulent .....                                 | 0.05              |
| Beet, sugar, roots .....                              | 0.3               |
| Beet, sugar, tops .....                               | 3.0               |
| Coffee, green bean <sup>1</sup> .....                 | 0.02              |
| Corn, field, forage .....                             | 0.5               |
| Corn, field, grain .....                              | 0.05              |
| Corn, sweet, forage .....                             | 0.5               |
| Corn, sweet, kernel plus cob with husks removed ..... | 0.05              |
| Cotton, undelinted seed .....                         | 0.05              |
| Hop, dried cones .....                                | 2.0               |

§ 180.207

| Commodity                    | Parts per million |
|------------------------------|-------------------|
| Peanut .....                 | 0.1               |

§ 180.207 Trifluralin; tolerances for residues.

(a) *General.* Tolerances are established for residues of trifluralin, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only trifluralin (2,6-dinitro-N,N-dipropyl-4-(trifluoromethyl)benzenamine).

[71 FR 30818, May 31, 2006]

### § 180.210 Bromacil; tolerances for residues.

(a) *General.* Tolerances are established for residues of the herbicide bromacil (5-bromo-3-sec-butyl-6-methyluracil) in or on the following food commodities:

| Commodity           | Parts per million |
|---------------------|-------------------|
| Fruit, citrus ..... | 0.1               |
| Pineapple .....     | 0.1               |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.*  
[Reserved]

[68 FR 39439, July 1, 2003]

### § 180.211 Propachlor; tolerances for residues.

(a) *General.* Tolerances are established for the combined residues of the herbicide propachlor (2-chloro-N-isopropylacetanilide) and its metabolites containing the N-isopropylaniline moiety, calculated as 2-chloro-N-isopropylacetanilide, in or on the raw agricultural commodities found in the table in this paragraph. The tolerances listed in the table will expire on January 19, 2024.

TABLE 1 TO PARAGRAPH (a)

| Commodity                                    | Parts per million |

[68 FR 39439, July 1, 2003]

§ 180.213 Simazine; tolerances for residues.

(a) *General.* Tolerances are established residues of the herbicide simazine, including its metabolites and degradates, in or on the commodities in table 1 to this paragraph (a). Compliance with the tolerance levels specified in table 1 to this paragraph (a) is to be determined by measuring only the sum of simazine, 6-chloro-N,N'-diethyl-1,3,5-triazine-2,4-diamine, and its metabolites 6-chloro-N-ethyl-1,3,5-triazine-2,4-diamine, and 6-chloro-1,3,5-triazine-2,4-diamine, calculated as the stoichiometric equivalent of simazine, in or on the commodity.

TABLE 1 TO PARAGRAPH (a)

| Commodity                                             | Parts per million |
|-------------------------------------------------------|-------------------|
| Almond <sup>1</sup> .....                             | 0.25              |

[87 FR 78567, Dec. 22, 2022]

§ 180.215 Naled; tolerances for residues.

(a) *General.* (1) Tolerances are established for residues of the insecticide naled (1,2-dibromo-2,2-dichloro-ethyl dimethyl phosphate) and its conversion product 2,2-dichlorovinyl dimethyl phosphate, expressed as naled, resulting from the application of the pesticide to growing crops or from direct application to livestock and poultry, in or on the following raw agricultural commodities:

| Commodity                     | Parts per million |
|-------------------------------|-------------------|
| Almond, hulls .....           | 0.5               |
| Almond .....                  | 0.5               |
| Bean, dry, seed .....         | 0.5               |
| Bean, succulent .....         | 0.5               |
| Beet, sugar, roots .....      | 0.5               |
| Beet, sugar, tops .....       | 0.5               |
| Broccoli .....                | 1                 |
| Brussels sprouts .....        | 1                 |
| Cabbage .....                 | 1                 |
| Cauliflower .....             | 1                 |
| Celery .....                  | 3                 |
| Collards .....                | 3                 |
| Cotton, undelinted seed ..... | 0.5               |
| Cucumber .....                | 0.5               |
| Eggplant .....                | 0.5               |
| Grape .....                   | 0.5               |

| Safflower, seed .....  | 0.5               |
| Spinach .....          | 3                 |
| Squash, summer .....   | 0.5               |
| Squash, winter .....   | 0.5               |
| Strawberry .....       | 1                 |
| Swiss chard .....      | 3                 |
| Tangerine .....        | 3                 |
| Tomato .....           | 0.5               |
| Turnip, greens .....   | 3                 |
| Walnut .....           | 0.5               |

(2) A tolerance of 0.5 part per million is established for the pesticide naled in or on all raw agricultural commodities, except those otherwise listed in this section, from use of the pesticide for area pest (mosquito and fly) control.

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[42 FR 46304, Sept. 15, 1977, as amended at 54 FR 20125, May 10, 1989; 63 FR 57074, Oct. 26, 1998; 66 FR 50833, Oct. 5, 2001; 77 FR 59124, Sept. 26, 2012]

## § 180.217 Metiram; tolerances for residues.

(a) *General.* Tolerances are established for residues of a metiram (a mixture of 5.2 parts by weight of ammoniates of [ethylenebis (dithiocarbamate)] zinc with 1 part by weight ethylenebis [dithiocarbamic acid] bimolecular and trimolecular cyclic anhydrosulfides and disulfides), including its metabolites and degradates, in or on the commodities in the following table. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only those metiram residues convertible to and expressed in terms of the degradate carbon disulfide.

| Commodity   | Parts per million |
|-------------|-------------------|
| Apple ..... | 0.5               |

| Commodity                      | Parts per million |
|--------------------------------|-------------------|
| Apple, pomace, wet .....       | 2                 |
| Banana <sup>1</sup> .....      | 3                 |
| Grape, wine <sup>1</sup> ..... | 5                 |
| Potato .....                   | 0.2               |

<sup>1</sup> There are no U.S. registrations on bananas and grape, wine as of April 29, 2011.

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[63 FR 57074, Oct. 26, 1998, as amended at 76 FR 23891, Apr. 29, 2011]

## § 180.220 Atrazine; tolerances for residues.

(a) *General.* Tolerances are established for the combined residues of the herbicide atrazine (2-chloro-4-ethylamino-6-isopropylamino-s-triazine) and its chlorinated metabolites 2-amino-4-chloro-6-isopropylamino-s-triazine, 2-amino-4-chloro-6-ethylamino-s-triazine, and 2,4-diamino-6-chloro-s-triazine, in or on the following food commodities:

| Commodity                                             | Parts per million |
|-------------------------------------------------------|-------------------|
| Cattle, fat .....                                     | 0.02              |
| Cattle, meat .....                                    | 0.02              |
| Cattle, meat byproducts .....                         | 0.02              |
| Corn, field, forage .....                             | 1.5               |
| Corn, field, grain .....                              | 0.20              |
| Corn, field, stover .....                             | 0.5               |
| Corn, pop, forage .....                               | 1.5               |
| Corn, pop, grain .....                                | 0.20              |
| Corn, pop, stover .....                               | 0.5               |
| Corn, sweet, forage .....                             | 15                |

(2) Tolerances are established for residues of the fumigant in or on all RACs resulting from preharvest treatment of pest burrows in agricultural and non-crop land areas.

| Commodity                                                                                  | Parts per million |
|--------------------------------------------------------------------------------------------|-------------------|
| All raw agricultural commodities resulting from preharvest treatment of pest burrows ..... | 0.01              |

(3) Residues resulting from fumigation of processed food:

| Commodity            | Parts per million |
|----------------------|-------------------|
| Processed food ..... | 0.01              |

(4) *Residues resulting from fumigation of animal feed:*

| Commodity         | Parts per million |
|-------------------|-------------------|
| Animal feed ..... | 0.1               |

(5) To assure safe use of this pesticide, it must be used in compliance with the labeling conforming to that registered by the U.S. Environmental Protection Agency (EPA) under FIFRA. Labeling shall bear a restriction to aerate the finished food/feed for 48 hours before it is offered to the consumer, unless EPA specifically determines that a different time period is appropriate. Where appropriate, a warning shall state that under no condition should any formulation containing aluminum or magnesium phosphide be used so that it will come in contact with any processed food, except processed brewer's rice, malt, and corn grits stored in breweries for use in the manufacture of beer.

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertant residues.* [Reserved]

[64 FR 72950, Dec. 29, 1999, as amended at 71 FR 74816, Dec. 13, 2006; 72 FR 41929, Aug. 1, 2007; 74 FR 46372, Sept. 9, 2009]

## § 180.226 Diquat; tolerances for residues.

(a) *General.* (1) Tolerances are established for the residues of the herbicide diquat, including its metabolites and degradates, in or on the commodities in Table 1 to this paragraph (a)(1) resulting from the application of the dibromide salt of diquat. Compliance with the tolerance levels specified in Table 1 to this paragraph (a)(1) is to be determined by measuring only diquat (6,7-dihydrodipyrido[1,2-a:2',1'-c]pyrazinediium):

| Vegetable, seed and pod .....                           | 0.05              |

(ii) Where tolerances are established at higher levels from other uses of

40 CFR Ch. I (7–1–25 Edition)

diquat on the subject crops, the higher tolerances applies also to residues of the aquatic uses cited in this paragraph.

(3) Tolerances are established for the plant growth regulator diquat (6,7 dihydrodipyrido(1,2-a:2'1'-c)pyrazinediium) derived from application of the dibromide salt and calculated as the cation in or on the following food commodities:

| Commodity                              | Parts per million |
|----------------------------------------|-------------------|
| Banana <sup>1</sup> .....              | 0.05              |
| Coffee, bean, green <sup>1</sup> ..... | 0.05              |
| Soybean, hulls .....                   | 0.6               |

<sup>1</sup>There are no U.S. registrations as of May 26, 2010.

(4) A tolerance of 0.5 part per million is established for residues of diquat in potato, granules/flakes and potato, chips.

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[65 FR 33709, May 24, 2000, as amended at 72 FR 41929, Aug. 1, 2007; 75 FR 29441, May 26, 2010; 75 FR 60241, Sept. 29, 2010; 85 FR 67290, Oct. 22, 2020]

§ 180.227 Dicamba; tolerances for residues.

(a) *General.* (1) Tolerances are established for the residues of the herbicide dicamba (3,6-dichloro-o-anisic acid), including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels is to be determined by measuring only the sum of the residues of dicamba (3,6-dichloro-o-anisic acid) and its metabolite, 3,6-dichloro-5-hydroxy-o-anisic acid, calculated as the stoichiometric equivalent of dicamba, in or on the following commodities:

| Commodity                                             | Parts per million |
|-------------------------------------------------------|-------------------|
| Barley, grain .....                                   | 6.0               |
| Barley, hay .....                                     | 2.0               |
| Barley, straw .....                                   | 15.0              |
| Corn, field, forage .....                             | 3.0               |
| Corn, field, grain .....                              | 0.1               |
| Corn, field, stover .....                             | 3.0               |
| Corn, pop, grain .....                                | 0.1               |
| Corn, pop, stover .....                               | 3.0               |
| Corn, sweet, forage .....                             | 0.50              |
| Corn, sweet, kernel plus cob with husks removed ..... | 0.04              |

| Poultry, fat .....             | 0.1               |
| Poultry, meat .....            | 0.1               |
| Poultry, meat byproducts ..... | 0.1               |
| Sheep, meat byproducts .....   | 0.1               |

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* Tolerances are established for the combined residues of the herbicide fluometuron, *N*, *N*-dimethyl-*N'*-[3-(trifluoromethyl)phenyl]urea, and its metabolite, trifluoromethylaniline (TFMA) determined as TFMA, in or on the following food commodities.

| Commodity                                                        | Parts per million |
|------------------------------------------------------------------|-------------------|
| Grain, cereal, forage, fodder, and straw group 16, forage .....  | 3.0               |
| Grain, cereal, forage, fodder, and straw, group 16, stover ..... | 6.0               |
| Grain, cereal, group 15 .....                                    | 0.5               |
| Peanut .....                                                     | 0.1               |
| Peanut, hay .....                                                | 4.0               |
| Peanut, meal .....                                               | 0.2               |
| Soybean, forage .....                                            | 3.0               |
| Soybean, hay .....                                               | 3.0               |
| Soybean, seed .....                                              | 2.0               |
| Rice, hulls .....                                                | 1.0               |
| Wheat, milled byproducts .....                                   | 1.0               |

[73 FR 52613, Sept. 10, 2008]

**§ 180.231 Dichlobenil; tolerances for residues.**

(a) *General.* Tolerances are established for residues of dichlobenil, including its metabolites and degradates, in or on the commodities in the table in this paragraph (a). Compliance with the tolerance levels specified in this paragraph (a) is to be determined by measuring only the sum of dichlobenil (2,6-dichlorobenzonitrile) and its BAM metabolite (2,6-dichlorobenzamide), calculated as the stoichiometric equivalent of dichlobenil, in or on the commodity.

**40 CFR Ch. I (7–1–25 Edition)**

TABLE 1 TO PARAGRAPH (a)

| Commodity                                 | Parts per million |
|-------------------------------------------|-------------------|
| Apple .....                               | 0.5               |
| Bushberry subgroup 13–07B .....           | 0.15              |
| Caneberry subgroup 13–07A .....           | 0.10              |
| Cherry .....                              | 0.15              |
| Cranberry .....                           | 0.1               |
| Fruit, stone, group 12 <sup>1</sup> ..... | 0.15              |
| Grape .....                               | 0.15              |
| Hazelnut .....                            | 0.1               |
| Pear .....                                | 0.5               |
| Rhubarb .....                             | 0.06              |

<sup>1</sup> This tolerance expires on January 19, 2024.

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registration.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

| Horse, meat .....                                                                                                      | 0.02(N)           |
| Horse, meat byproducts .....                                                                                           | 0.02(N)           |
| Milk .....                                                                                                             | 0.02(N)           |
| Mushroom (residues expressed as naled) .....                                                                           | 0.5               |
| Poultry, fat .....                                                                                                     | 0.05(N)           |
| Poultry, meat .....                                                                                                    | 0.05(N)           |
| Poultry, meat byproducts .....                                                                                         | 0.05(N)           |
| Raw agricultural commodities, nonperishable, bulk stored regardless of fat content, postharvest .....                  | 0.5               |
| Raw agricultural commodities nonperishable, packaged or bagged, containing 6 percent fat or less, postharvest .....    | 0.5               |
| Raw agricultural commodities, nonperishable, packaged or bagged, containing more than 6 percent fat, postharvest ..... | 2                 |
| Sheep, fat .....                                                                                                       | 0.02(N)           |
| Sheep, meat .....                                                                                                      | 0.02(N)           |
| Sheep, meat byproducts .....                                                                                           | 0.02(N)           |

(2) The tolerance of 0.1 part per million prescribed by 21 CFR 556.180 for negligible residues of 2,2-dichlorovinyl dimethyl phosphate in hog, fat; hog,

## Environmental Protection Agency

## § 180.242

meat; hog, meat byproducts; and hog, skin covers both its use as an anthelmintic in swine feed and as an insecticide applied directly to swine.

(3) Dichlorvos may be present as a residue from application as an insecticide on packaged or bagged nonperishable processed food (see: 21 CFR 170.3(j)) in an amount in such food not in excess of 0.5 part per million (ppm). To assure safe use of the insecticide, its label and labeling shall conform to the label and labeling registered by the U.S. Environmental Protection Agency, and the usage employed shall conform with such label or labeling.

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

### § 180.236 Triphenyltin hydroxide; tolerances for residues.

(a) *General.* Tolerances are established for the combined residues of the fungicide triphenyltin hydroxide (TPTH) and its monophenyltin (MPTH) and diphenyltin (DPTH) hydroxide and oxide metabolites, expressed in terms of parent TPTH, in or on the following raw agricultural commodities:

| Commodity                  | Parts per million |
|----------------------------|-------------------|
| Beet, sugar, roots .....   | 0.05              |
| Beet, sugar, tops .....    | 10.0              |
| Cattle, fat .....          | 0.2               |
| Cattle, kidney .....       | 2.0               |
| Cattle, liver .....        | 4.0               |
| Cattle, meat .....         | 0.5               |
| Goat, fat .....            | 0.2               |
| Goat, kidney .....         | 2.0               |
| Goat, liver .....          | 4.0               |
| Goat, meat .....           | 0.5               |
| Hog, fat .....             | 0.3               |
| Hog, meat .....            | 0.06              |
| Hog, meat byproducts ..... | 0.3               |
| Horse, fat .....           | 0.2               |
| Horse, kidney .....        | 2.0               |
| Horse, liver .....         | 4.0               |
| Horse, meat .....          | 0.5               |
| Milk .....                 | 0.06              |
| Pecan .....                | 0.05              |
| Potato .....               | 0.05              |
| Sheep, fat .....           | 0.2               |
| Sheep, kidney .....        | 2.0               |
| Sheep, liver .....         | 4.0               |

| Commodity         | Parts per million |

| Sheep, meat ..... | 0.5               |

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[72 FR 41929, Aug. 1, 2007]

### § 180.241 Bensulide; tolerances for residues.

(a) *General.* Tolerances are established for the residues of S-(O,O-diisopropyl phosphorodithioate) of N-(2-mercaptoethyl) benzenesulfonamide including its oxygen analog S-(O,O-diisopropyl phosphorothioate) of N-(2-mercaptoethyl) benzenesulfonamide in or on the following food commodities:

| Commodity                                      | Parts per million |
|------------------------------------------------|-------------------|
| Onion, bulb .....                              | 0.10              |
| Vegetable, brassica, leafy group 5 .....       | 0.15              |
| Vegetable, cucurbits group 9 .....             | 0.15              |
| Vegetable, fruiting group 8 .....              | 0.10              |
| Vegetable, leafy except brassica group 4 ..... | 0.15              |

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* Tolerances with regional registration, as defined in §180.1(l), are established for the residues of S-(O,O-diisopropyl phosphorodithioate) of N-(2-mercaptoethyl) benzenesulfonamide including its oxygen analog S-(O,O-diisopropyl phosphorothioate) of N-(2-mercaptoethyl) benzenesulfonamide in or on the following food commodities:

| Commodity           | Parts per million |
|---------------------|-------------------|
| Carrot, roots ..... | 0.10              |

(d) *Indirect or inadvertent residues.* [Reserved]

### § 180.242 Thiabendazole; tolerances for residues.

(a) *General.* (1) Tolerances are established for residues of thiabendazole, including its metabolites and degradates, in or on the commodities in table 1 to paragraph (a)(1). Compliance with the

§ 180.242

tolerance levels specified to table 1 to paragraph (a)(1) is to be determined by measuring only thiabendazole in or on the commodity.

TABLE 1 TO PARAGRAPH (a)(1)

| Commodity                                                            | Parts per million |
|----------------------------------------------------------------------|-------------------|
| Alfalfa, forage <sup>2</sup> .....                                   | 0.02              |
| Alfalfa, hay <sup>2</sup> .....                                      | 0.02              |
| Animal feed, nongrass, group 18 .....                                | 0.01              |
| Apple, wet pomace .....                                              | 12.0              |
| Avocado <sup>1</sup> .....                                           | 10.0              |
| Banana, postharvest .....                                            | 3.0               |
| Barley, grain .....                                                  | 0.05              |
| Barley, hay .....                                                    | 0.30              |

40 CFR Ch. I (7–1–25 Edition)

TABLE 1 TO PARAGRAPH (a)(1)—Continued

| Commodity          | Parts per million |
|--------------------|-------------------|
| Wheat, hay .....   | 0.30              |
| Wheat, straw ..... | 0.30              |

<sup>1</sup>There are no U.S. registrations on the indicated commodity.

<sup>2</sup>This tolerance expires on July 26, 2022.

(2) Tolerances are established for residues of thiabendazole, including its metabolites and degradates, in or on the commodities in table 2 to paragraph (a)(2). Compliance with the tolerance levels specified to table 2 to paragraph (a)(2) is to be determined by measuring only the sum of thiabendazole (2-(4-thiazolyl)benzimidazole) and its metabolite 5-hydroxythiabendazole (free and conjugated) calculated as the stoichiometric equivalent of thiabendazole, in or on the commodity.

TABLE 2 TO PARAGRAPH (a)(2)

| Commodity                     | Parts per million |
|-------------------------------|-------------------|
| Cattle, meat .....            | 0.1               |
| Cattle, meat byproducts ..... | 0.4               |
| Goat, meat byproducts .....   | 0.4               |
| Hog, meat byproducts .....    | 0.3               |
| Horse, meat byproducts .....  | 0.4               |
| Milk .....                    | 0.1               |
| Sheep, meat byproducts .....  | 0.4               |

(b) *Section 18 emergency exemptions.* Time-limited tolerances specified in table 3 to this paragraph (b) are established for residues of the thiabendazole, including its metabolites and degradates, in or on the specified agricultural commodities, resulting from use of the pesticide pursuant to FIFRA section 18 emergency exemptions. Compliance with the tolerance levels specified in table 3 to this paragraph (b) is to be determined by measuring only the sum of thiabendazole (2-(4-thiazolyl)benzimidazole) and its metabolite benzimidazole (free and conjugated), calculated as the stoichiometric equivalent of thiabendazole. The tolerances expire on the date specified in table 3 to this paragraph (b).

| Commodity          | Parts per million | Expiration/revocation date |
|--------------------|-------------------|----------------------------|
| Sweet potato ..... | 10                | 12/31/22                   |

## Environmental Protection Agency

## § 180.249

(c) *Tolerances with regional exemptions.*  
[Reserved]

(d) *Indirect or inadvertent residues.*  
[Reserved]

[42 FR 32783, June 28, 1977]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 180.242, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at [www.govinfo.gov](http://www.govinfo.gov).

### § 180.243 Propazine; tolerances for residues.

(a) *General.* Tolerances are established for residues of the herbicide propazine, 2-chloro-4,6-bis(isopropylamino)-s-triazine, including its metabolites and degradates, in or on the commodities in the following table. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only the sum of propazine, 2-chloro-4,6-bis(isopropylamino)-s-triazine, and its two chlorinated degradates, 2-amino-4-chloro-6-isopropylamino-s-triazine and 2,4-diamino-6-chloro-s-triazine, calculated as the stoichiometric equivalent of propazine, in or on the commodity.

| Commodity                    | Parts per million |
|------------------------------|-------------------|
| Sorghum, grain, forage ..... | 0.25              |
| Sorghum, grain, grain .....  | 0.25              |
| Sorghum, grain, stover ..... | 0.25              |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.*  
[Reserved]

[75 FR 60242, Sept. 29, 2010]

### § 180.245 Streptomycin; tolerances for residues.

(a) *General.* Tolerances are established for residues of the fungicide streptomycin, including its metabolites and degradates, in or on the commodities in Table 1 to this paragraph (a). Compliance with the tolerance levels specified in Table 1 to this paragraph (a) is to be determined by measuring only streptomycin (O-2-Deoxy-2-(methylamino)-a-L-glucopyranosyl-(1-2)-O-5-deoxy-3-Cformyl-a-L-lyxofuranosyl-(1-4)-N,N'-

bis(aminoiminomethyl)-D-streptamine) in or on the commodity.

TABLE 1 TO PARAGRAPH (a)

| Commodity                                    | Parts per million |
|----------------------------------------------|-------------------|
| Bean, dry, seed .....                        | 0.5               |
| Bean, succulent .....                        | 0.5               |
| Celery .....                                 | 0.25              |
| Fruit, citrus, group 10-10 .....             | 0.8               |
| Fruit, citrus, group 10-10, dried pulp ..... | 3                 |
| Fruit, pome, group 11 .....                  | 0.25              |
| Pepper .....                                 | 0.25              |
| Potato .....                                 | 0.25              |
| Tomato .....                                 | 0.25              |

(b) *Section 18 emergency exemptions.* Time-limited tolerances are established for residues of streptomycin, in or on the agricultural commodities, as specified in Table 2 to this paragraph (b), resulting from use of the pesticide pursuant to FIFRA section 18 emergency exemptions. Compliance with the tolerance levels listed in Table 2 to this paragraph (b) is to be determined by measuring the levels of streptomycin only, in or on the commodities listed in this Table 2 paragraph (b). The tolerances expire on the dates specified in Table 2 to this paragraph (b).

TABLE 2 TO PARAGRAPH (b)

| Commodity                                    | Parts per million | Expiration date |
|----------------------------------------------|-------------------|-----------------|
| Fruit, citrus, group 10-10 .....             | 2.0               | 12/31/22        |
| Fruit, citrus, group 10-10, dried pulp ..... | 6.0               | 12/31/22        |

(c)-(d) [Reserved]

[86 FR 8710, Feb. 9, 2021]

### § 180.249 Alachlor; tolerances for residues.

(a) *General.* Tolerances are established for combined residues of alachlor (2-chloro-2',6"-diethyl-N-(methoxymethyl)acetanilide) and its metabolites which can be converted to 2,6-diethylaniline (DEA) or 2-ethyl-6-(1-hydroxyethyl)aniline (1-HEEA) upon basic hydrolysis, calculated as alachlor in or on the following raw agricultural commodities.

| Commodity                     | Parts per million |
|-------------------------------|-------------------|
| Beans, dry .....              | 0.1               |
| Beans, succulent lima .....   | 0.1               |
| Cattle, fat .....             | 0.02              |
| Cattle, meat byproducts ..... | 0.02              |

§ 180.252

| Commodity                      | Parts per million |
|--------------------------------|-------------------|
| Cattle, meat .....             | 0.02              |
| Corn, field, forage .....      | 2.0               |
| Corn, field, grain .....       | 0.2               |
| Corn, field, pop .....         | 0.2               |
| Corn, field, stover .....      | 2.0               |
| Corn, pop, stover .....        | 2.0               |
| Corn, sweet (K + CWHR) .....   | 0.05              |
| Corn, sweet, stover .....      | 2.0               |
| Cotton, gin byproducts .....   | 0.7               |
| Cotton, undelinted seed .....  | 0.03              |
| Cowpea, forage .....           | 5.0               |
| Cowpea, hay .....              | 5.0               |
| Egg .....                      | 0.02              |
| Goat, fat .....                | 0.02              |
| Goat, meat byproducts .....    | 0.02              |
| Goat, meat .....               | 0.02              |

[72 FR 54584, Sept. 26, 2007]

§ 180.252 **Tetrachlorvinphos; tolerances for residues.**

(a) *General.* Tolerances are established for the combined residues of the insecticide tetrachlorvinphos [(Z)-2-chloro-1-(2,4,5-trichlorophenyl) vinyl dimethyl phosphate], including its metabolites, 1-(2,4,5-trichlorophenyl)-ethanol (free and conjugated forms), 2,4,5-trichloroacetophenone, and 1-(2,4,5-trichlorophenyl)-ethanediol, in or on the following commodities:

| Commodity                                                                                                                             | Parts per million |
|---------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| Cattle, fat (of which no more than 0.1 ppm is tetrachlorvinphos <i>per se</i> ) .....                                                 | 0.2               |
| Cattle, kidney (of which no more than 0.05 ppm is tetrachlorvinphos <i>per se</i> ) .....                                             | 1.0               |
| Cattle, liver (of which no more than 0.05 ppm is tetrachlorvinphos <i>per se</i> ) .....                                              | 0.5               |
| Cattle, meat (of which no more than 2.0 ppm is tetrachlorvinphos <i>per se</i> ) .....                                                | 2.0               |
| Cattle, meat byproducts, except kidney and liver .....                                                                                | 1.0               |
| Egg (of which no more than 0.05 ppm is tetrachlorvinphos <i>per se</i> ) .....                                                        | 0.2               |
| Hog, fat (of which no more than 0.1 ppm is tetrachlorvinphos <i>per se</i> ) .....                                                    | 0.2               |
| Hog, kidney (of which no more than 0.05 ppm is tetrachlorvinphos <i>per se</i> ) .....                                                | 1.0               |
| Hog, liver (of which no more than 0.05 ppm is tetrachlorvinphos <i>per se</i> ) .....                                                 | 0.5               |
| Hog, meat (of which no more than 2.0 ppm is tetrachlorvinphos <i>per se</i> ) .....                                                   | 2.0               |
| Hog, meat byproducts, except kidney and liver .....                                                                                   | 1.0               |
| Milk, fat (reflecting negligible residues in whole milk and of which no more than 0.05 ppm is tetrachlorvinphos <i>per se</i> ) ..... | 0.05              |
| Poultry, fat (of which no more than 7.0 ppm is tetrachlorvinphos <i>per se</i> ) .....                                                | 7.0               |
| Poultry, liver (of which no more than 0.05 ppm is tetrachlorvinphos <i>per se</i> ) .....                                             | 2.0               |
| Poultry, meat (of which no more than 3.0 ppm is tetrachlorvinphos <i>per se</i> ) .....                                               | 3.0               |
| Poultry, meat byproducts, except liver .....                                                                                          | 2.0               |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.*  
[Reserved]

# Environmental Protection Agency

§ 180.253

## § 180.253 Methomyl; tolerances for residues.

(a) *General.* Tolerances are established for residues of the insecticide methomyl, including its metabolites and degradates, in or on the commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only methomyl, methyl N-[[[(methylamino)carbonyl]oxy]ethanimidothioate, in or on the commodity.

| Commodity                                       | Parts per million | Expiration/revocation date |
|-------------------------------------------------|-------------------|----------------------------|
| Alfalfa, forage                                 | 10                | None                       |
| Alfalfa, hay                                    | 10                | None                       |
| Apple                                           | 1                 | None                       |
| Asparagus                                       | 2                 | None                       |
| Avocado                                         | 2                 | None                       |
| Barley, grain                                   | 1                 | None                       |
| Barley, hay                                     | 10                | None                       |
| Barley, straw                                   | 10                | None                       |
| Bean, dry, seed                                 | 0.1               | None                       |
| Bean, forage                                    | 10                | None                       |
| Bean, succulent                                 | 2                 | None                       |
| Beet, garden, tops                              | 6                 | None                       |
| Bermudagrass, forage                            | 10                | None                       |
| Bermudagrass, hay                               | 40                | None                       |
| Blueberry                                       | 6                 | None                       |
| Broccoli                                        | 3                 | None                       |
| Brussels sprouts                                | 2                 | None                       |
| Cabbage                                         | 5                 | None                       |
| Cabbage, Chinese, bok choy                      | 5                 | None                       |
| Cabbage, Chinese, napa                          | 5                 | None                       |
| Cauliflower                                     | 2                 | None                       |
| Celery                                          | 3                 | None                       |
| Collards                                        | 6                 | None                       |
| Corn, field, forage                             | 10                | None                       |
| Corn, field, grain                              | 0.1               | None                       |
| Corn, field, stover                             | 10                | None                       |

| Vegetable, brassica, leafy, group 5 | 6.0               | None                       |
| Vegetable, cucurbit, group 9        | 0.2               | None                       |
| Vegetable, fruiting, group 8        | 0.2               | None                       |
| Vegetables, leafy <sup>2</sup>      | 0.2               | None                       |
| Vegetable, root and tuber, group 1  | 0.2               | None                       |
| Wheat, forage                       | 10                | None                       |
| Wheat, grain                        | 1                 | None                       |
| Wheat, hay                          | 10                | None                       |
| Wheat, straw                        | 10                | None                       |

<sup>1</sup> There are no U.S. registrations for use of methomyl on hop, dried cone, as of February 14, 1990.

<sup>2</sup> Except for Beet (tops), broccoli, Brussels sprouts, cabbage, cabbage, Chinese, cauliflower, celery, collards, dandelions, endive (escarole), kale, lettuce, mustard greens, parsley, spinach, Swiss chard, turnip, greens (tops), and watercress.

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* A tolerance with regional registration, as defined in §180.1(l), is established for residues of the insecticide methomyl, including its metabolites and degradates, in or on the commodity in the table in this paragraph. Compliance with the tolerance level specified in this paragraph is to be determined by measuring only methomyl, methyl N-[[[(methylamino)carbonyl]oxy]ethanimidothioate, in or on the commodity.

| Commodity | Parts per million |
|-----------|-------------------|
| Pear      | 4                 |

## § 180.254

(d) *Indirect or inadvertent residues.*  
[Reserved]

[65 FR 33697, May 24, 2000, as amended at 72 FR 35666, June 29, 2007; 74 FR 46373, Sept. 9, 2009; 75 FR 60242, Sept. 29, 2010; 76 FR 34885, June 15, 2011; 77 FR 59125, Sept. 26, 2012; 80 FR 72598, Nov. 20, 2015]

### § 180.254 Carbofuran; tolerances for residues.

(a) *General.* Tolerances are established for the combined residues of the insecticide carbofuran (2,3-dihydro-2,2-dimethyl-7-benzofuranyl-N-methylcarbamate), its carbamate metabolite 2,3-dihydro-2,2-dimethyl-3-hydroxy-7-benzofuranyl-N-methylcarbamate, and its phenolic metabolites 2,3-dihydro-2,2-dimethyl-7-benzofuranol, 2,3-dihydro-2,2-dimethyl-3-oxo-7-benzofuranol and 2,3-dihydro-2,2-dimethyl-3,7-benzofurandiyl in or on the following raw agricultural commodities:

| Commodity                              | Parts per million |
|----------------------------------------|-------------------|
| Banana <sup>1</sup> .....              | 0.1               |
| Coffee, bean, green <sup>1</sup> ..... | 0.1               |
| Rice, grain <sup>1</sup> .....         | 0.2               |
| Sugarcane, cane <sup>1</sup> .....     | 0.1               |

<sup>1</sup> There are no U.S. registrations for use of carbofuran on these commodities.

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.*  
[Reserved]

[39 FR 20597, June 12, 1974]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 180.254, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at [www.govinfo.gov](http://www.govinfo.gov).

### § 180.258 Ametryn; tolerances for residues.

(a) *General.* Tolerances are established for residues of the desiccant and herbicide (2-ethylamino)-4-(isopropylamino)-6-(methylthio)-s-triazine in or on the following raw agricultural commodities:

| Commodity                 | Parts per million | Expiration/Revocation Date |
|---------------------------|-------------------|----------------------------|
| Banana .....              | 0.25              | 6/16/10                    |
| Corn, field, forage ..... | 0.1               | None                       |
| Corn, field, grain .....  | 0.05              | None                       |

### § 180.259 Propargite; tolerances for residues.

(a) *General.* Tolerances are established for residues of the pesticide propargite (2-(*p*-tert-butylphenoxy) cyclohexyl 2-propynyl sulfite) in or on the following food commodities.

| Commodity                          | Parts per million |
|------------------------------------|-------------------|
| Almond .....                       | 0.1               |
| Almond, hulls .....                | 55.0              |
| Bean, dry, seed .....              | 0.2               |
| Cattle, fat .....                  | 0.1               |
| Cattle, meat .....                 | 0.1               |
| Cattle, meat byproducts .....      | 0.1               |
| Citrus, oil .....                  | 30.0              |
| Corn, field, forage .....          | 10.0              |
| Corn, field, grain .....           | 0.1               |
| Corn, field, stover .....          | 10.0              |
| Corn, pop, grain .....             | 0.1               |
| Corn, pop, stover .....            | 10.0              |
| Corn, sweet, forage .....          | 10.0              |
| Corn, sweet, stover .....          | 10.0              |
| Cotton, undelinted seed .....      | 0.1               |
| Egg .....                          | 0.1               |
| Goat, fat .....                    | 0.1               |
| Goat, meat .....                   | 0.1               |
| Goat, meat byproducts .....        | 0.1               |
| Grain, aspirated fractions .....   | 0.4               |
| Grape .....                        | 10.0              |
| Grapefruit .....                   | 5.0               |
| Hog, fat .....                     | 0.1               |
| Hog, meat .....                    | 0.1               |
| Hog, meat byproducts .....         | 0.1               |
| Hop, dried cones .....             | 100.0             |

| Horse, meat .....                  | 0.1               |
| Horse, meat byproducts .....       | 0.1               |
| Lemon .....                        | 5.0               |
| Milk, fat (0.08 ppm in milk) ..... | 2.0               |
| Nectarine .....                    | 4.0               |
| Orange .....                       | 10.0              |
| Peanut .....                       | 0.1               |

# Environmental Protection Agency

§ 180.261

| Commodity                    | Parts per million |
|------------------------------|-------------------|
| Peppermint, tops .....       | 50.0              |
| Poultry, fat .....           | 0.1               |
| Potato .....                 | 0.1               |
| Sheep, fat .....             | 0.1               |
| Sheep, meat .....            | 0.1               |
| Sheep, meat byproducts ..... | 0.1               |
| Sorghum, grain, forage ..... | 10.0              |
| Sorghum, grain, grain .....  | 5.0               |
| Sorghum, grain, stover ..... | 10.0              |
| Spearmint, tops .....        | 50.0              |
| Tea, dried .....             | 10.0              |
| Walnut .....                 | 0.1               |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* Tolerances with regional registration, as defined in §180.1(1), are established for residues of propargite in or on the following raw agricultural commodities:

| Commodity                                             | Parts per million |
|-------------------------------------------------------|-------------------|
| Corn, sweet, kernel plus cob with husks removed ..... | 0.1               |

(d) *Indirect or inadvertent residues.*  
[Reserved]

[65 FR 33710, May 24, 2000, as amended at 72 FR 41930, Aug. 1, 2007; 73 FR 54961, Sept. 24, 2008; 76 FR 34885, June 15, 2011]

## § 180.261 Phosmet; tolerances for residues.

(a) *General.* Tolerances are established for residues of the insecticide phosmet, *N*-(mercaptomethyl) phthalimide *S*-(*O,O*-dimethyl phosphorodithioate), including its metabolites and degradates, in or on the commodities in the following table. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only the sum of phosmet, *N*-(mercaptomethyl) phthalimide *S*-(*O,O*-dimethyl phosphorodithioate), and its oxygen analog, *N*-(mercaptomethyl) phthalimide *S*-(*O,O*-dimethyl phosphorothioate), calculated as the stoichiometric equivalent of phosmet, in or on the commodity.

| Commodity             | Parts per million |
|-----------------------|-------------------|
| Alfalfa, forage ..... | 20                |
| Alfalfa, hay .....    | 40                |
| Almond, hulls .....   | 10                |
| Apple .....           | 10                |
| Apricot .....         | 5                 |

| Commodity                     | Parts per million |
|-------------------------------|-------------------|
| Blueberry .....               | 10                |
| Cattle, fat .....             | 0.2               |
| Cattle, meat .....            | 0.1               |
| Cattle, meat byproducts ..... | 0.1               |
| Cherry .....                  | 10                |
| Cranberry .....               | 10                |
| Fruit, citrus, group 10 ..... | 5                 |
| Goat, fat .....               | 0.1               |
| Goat, meat .....              | 0.1               |
| Goat, meat byproducts .....   | 0.1               |
| Grape .....                   | 10                |
| Hog, fat .....                | 0.2               |
| Hog, meat .....               | 0.04              |
| Hog, meat byproducts .....    | 0.04              |
| Horse, fat .....              | 0.1               |
| Horse, meat .....             | 0.1               |
| Horse, meat byproducts .....  | 0.1               |
| Kiwifruit .....               | 25                |
| Milk .....                    | 0.1               |
| Nectarine .....               | 5                 |
| Nut, tree, group 14 .....     | 0.1               |
| Pea, dry, seed .....          | 0.5               |
| Pea, field, hay .....         | 20                |
| Pea, field, vines .....       | 10                |
| Pea, succulent .....          | 1                 |
| Peach .....                   | 10                |
| Pear .....                    | 10                |
| Plum, prune, fresh .....      | 5                 |
| Potato .....                  | 0.1               |
| Sheep, fat .....              | 0.1               |
| Sheep, meat .....             | 0.1               |
| Sheep, meat byproducts .....  | 0.1               |
| Sweet potato, roots .....     | 12                |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* Tolerances with regional registration are established for residues of the insecticide phosmet, *N*-(mercaptomethyl) phthalimide *S*-(*O,O*-dimethyl phosphorodithioate), including its metabolites and degradates, in or on the commodities in the following table. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only the sum of phosmet, *N*-(mercaptomethyl) phthalimide *S*-(*O,O*-dimethyl phosphorodithioate), and its oxygen analog, *N*-(mercaptomethyl) phthalimide *S*-(*O,O*-dimethyl phosphorothioate), calculated as the stoichiometric equivalent of phosmet, in or on the commodity.

| Commodity       | Parts per million |
|-----------------|-------------------|
| Crabapple ..... | 20                |
| Pistachio ..... | 0.1               |

## § 180.262

(d) *Indirect or inadvertent residues.*  
[Reserved]

[43 FR 46538, Oct. 10, 1978, as amended at 45 FR 8981, Feb. 11, 1980; 48 FR 37213, Aug. 17, 1983; 52 FR 48539, Dec. 23, 1987; 53 FR 657, Jan. 11, 1988; 53 FR 39090, Oct. 5, 1988; 63 FR 57075, Oct. 26, 1998; 67 FR 49616, July 31, 2002; 74 FR 46698, Sept. 11, 2009; 75 FR 60242, Sept. 29, 2010]

## § 180.262 Ethoprop; tolerances for residues.

(a) *General.* Tolerances are established for residues of the nematocide and insecticide ethoprop, *O*-ethyl *S,S*-dipropyl phosphorodithioate, including its metabolites and degradates, in or on the commodities in the following table. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only ethoprop, *O*-ethyl *S,S*-dipropyl phosphorodithioate, in or on the commodity.

| Commodity                                             | Parts per million |
|-------------------------------------------------------|-------------------|
| Banana .....                                          | 0.02              |
| Bean, lima .....                                      | 0.02              |
| Bean, snap, succulent .....                           | 0.02              |
| Cabbage .....                                         | 0.02              |
| Corn, field, forage .....                             | 0.02              |
| Corn, field, grain .....                              | 0.02              |
| Corn, field, stover .....                             | 0.02              |
| Corn, sweet, forage .....                             | 0.02              |
| Corn, sweet, kernel plus cob with husks removed ..... | 0.02              |
| Corn, sweet, stover .....                             | 0.02              |

| Sweet potato, roots .....                             | 0.02              |

<sup>1</sup> There are no U.S. registrations as of July 23, 2009, except for existing stocks bearing old labeling whose sale, distribution, and use is allowed, provided it is consistent with the terms of the cancellation order of July 9, 2009; *i.e.*, the EPA will allow the technical registrant to continue to sell and distribute existing stocks of the amended registered product bearing old labeling for use on pineapple for 18 months (until January 9, 2011) and persons other than the registrant may continue to sell and/or use existing stocks of product bearing the old labeling until such stocks are exhausted, provided that such use is consistent with the terms of the previously approved labeling on, or that accompanied, the modified product.

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

## 40 CFR Ch. I (7–1–25 Edition)

(d) *Indirect or inadvertent residues.*  
[Reserved]

[47 FR 53004, Nov. 24, 1982, as amended at 48 FR 51485, Nov. 9, 1983; 52 FR 33237, Sept. 2, 1987; 53 FR 30053, Aug. 10, 1988; 63 FR 57075, Oct. 26, 1998; 64 FR 39078, July 21, 1999; 66 FR 38955, July 26, 2001; 67 FR 49616, July 31, 2002; 73 FR 53731, Sept. 17, 2008; 73 FR 54961, Sept. 24, 2008; 74 FR 46373, Sept. 9, 2009; 75 FR 60242, Sept. 29, 2010]

## § 180.269 Aldicarb; tolerances for residues.

(a) *General.* Tolerances are established for combined residues of the insecticide and nematocide aldicarb (2-methyl-2-(methylthio)propionaldehyde *O*-(methylcarbamoyl) oxime and its cholinesterase-inhibiting metabolites 2-methyl 2-(methylsulfinyl) propionaldehyde *O*-(methylcarbamoyl) oxime and 2-methyl-2-(methylsulfonyl) propionaldehyde *O*-(methylcarbamoyl) oxime in or on the following food commodities:

| Commodity                     | Parts per million |
|-------------------------------|-------------------|
| Bean, dry, seed .....         | 0.1               |
| Beet, sugar, roots .....      | 0.05              |
| Beet, sugar, tops .....       | 1                 |
| Citrus, dried pulp .....      | 0.6               |
| Coffee, bean, green .....     | 0.1               |
| Cotton, undelinted seed ..... | 0.1               |

## § 180.274 Propanil; tolerances for residues.

(a) *General.* Tolerances are established for the combined residues of the herbicide propanil (3', 4'-dichloropropionanilide) and its metabolites convertible to 3, 4-dichloroaniline (3, 4-DCA) in or on the following food commodities:

| Commodity                      | Parts per million |
|--------------------------------|-------------------|
| Cattle, fat .....              | 0.10              |
| Cattle, meat .....             | 0.05              |
| Cattle, meat byproducts .....  | 1.0               |
| Crayfish .....                 | 0.05              |
| Egg .....                      | 0.30              |
| Goat, fat .....                | 0.10              |
| Goat, meat .....               | 0.05              |
| Goat, meat byproducts .....    | 1.0               |
| Hog, fat .....                 | 0.10              |
| Hog, meat .....                | 0.05              |
| Hog, meat byproducts .....     | 1.0               |
| Horse, fat .....               | 0.10              |
| Horse, meat .....              | 0.05              |
| Horse, meat byproducts .....   | 1.0               |
| Milk .....                     | 0.05              |
| Poultry, fat .....             | 0.05              |
| Poultry, meat .....            | 0.10              |
| Poultry, meat byproducts ..... | 0.50              |
| Rice, bran .....               | 40                |
| Rice, grain .....              | 10                |
| Rice, hulls .....              | 30                |
| Sheep, fat .....               | 0.10              |
| Sheep, meat .....              | 0.05              |
| Sheep, meat byproducts .....   | 1.0               |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.*  
[Reserved]

[63 FR 34827, June 26, 1998, as amended at 72 FR 28888, May 23, 2007; 80 FR 72598, Nov. 20, 2015]

## § 180.275 Chlorothalonil; tolerances for residues.

(a) *General.* (1) Tolerances are established for the fungicide chlorothalonil (tetrachloroisophthalonitrile) and its metabolite 4-hydroxy-2,5,6-trichloroisophthalonitrile in or on the following food commodities.

| Commodity                                             | Parts per million |
|-------------------------------------------------------|-------------------|
| Almond .....                                          | 0.05              |
| Almond, hulls .....                                   | 1.0               |
| Apricot .....                                         | 0.5               |
| Asparagus .....                                       | 0.1               |
| Banana (NMT 0.05 ppm in edible pulp) .....            | 0.5               |
| Bean, dry, seed .....                                 | 0.1               |
| Bean, snap, succulent .....                           | 5                 |
| Blueberry .....                                       | 1.0               |
| Brassica, head and stem, subgroup 5A .....            | 5.0               |
| Carrot, roots .....                                   | 1                 |
| Celery .....                                          | 15                |
| Cherry, sweet .....                                   | 0.5               |
| Cherry, tart .....                                    | 0.5               |
| Cocoa bean, dried bean .....                          | 0.05              |
| Coffee, bean, green .....                             | 0.20              |
| Corn, sweet, kernel plus cob with husks removed ..... | 1                 |
| Cranberry .....                                       | 5.0               |
| Ginseng .....                                         | 4.0               |
| Horseradish .....                                     | 4.0               |
| Lentil .....                                          | 0.10              |
| Lychee .....                                          | 15                |
| Mango .....                                           | 1.0               |
| Mushroom .....                                        | 1.0               |
| Nectarine .....                                       | 0.5               |
| Okra .....                                            | 6.0               |
| Onion, bulb .....                                     | 0.5               |
| Onion, green .....                                    | 5                 |
| Papaya .....                                          | 15                |
| Parsnip, roots .....                                  | 1                 |
| Passionfruit .....                                    | 3                 |
| Pea, edible podded .....                              | 5                 |
| Peach .....                                           | 0.5               |
| Peanut .....                                          | 0.3               |
| Pistachio .....                                       | 0.2               |
| Plum .....                                            | 0.2               |
| Plum, prune .....                                     | 0.2               |
| Potato .....                                          | 0.1               |
| Rhubarb .....                                         | 4.0               |
| Soybean .....                                         | 0.2               |
| Starfruit .....                                       | 3.0               |
| Tomato .....                                          | 5                 |
| Vegetable, cucurbit, group 9 .....                    | 5.0               |
| Vegetable, fruiting, group 8, except tomato .....     | 6.0               |
| Yam, true .....                                       | 0.10              |

(2) Tolerances are established for the metabolite 4-hydroxy-2,5,6-

**§ 180.276**

trichloroisophthalonitrile in or on the following food commodities.

| Commodity                                    | Parts per million |
|----------------------------------------------|-------------------|
| Cattle, fat .....                            | 0.1               |
| Cattle, kidney .....                         | 0.5               |
| Cattle, meat byproducts, except kidney ..... | 0.05              |
| Cattle, meat .....                           | 0.03              |
| Goat, fat .....                              | 0.1               |
| Goat, kidney .....                           | 0.5               |
| Goat, meat byproducts, except kidney .....   | 0.05              |
| Goat, meat .....                             | 0.03              |
| Hog, fat .....                               | 0.1               |
| Hog, kidney .....                            | 0.5               |
| Hog, meat byproducts, except kidney .....    | 0.05              |
| Hog, meat .....                              | 0.03              |
| Horse, fat .....                             | 0.1               |
| Horse, kidney .....                          | 0.5               |
| Horse, meat byproducts, except kidney .....  | 0.05              |
| Horse, meat .....                            | 0.03              |

| Sheep, kidney .....                          | 0.5               |
| Sheep, meat byproducts, except kidney .....  | 0.05              |
| Sheep, meat .....                            | 0.03              |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* Tolerances with regional registration, as defined in §180.1(1), are established for the combined residues of chlorothalonil and its metabolite in or on the following raw agricultural commodities:

| Commodity              | Parts per million |
|------------------------|-------------------|
| Hazelnut .....         | 0.1               |
| Peppermint, tops ..... | 2                 |
| Persimmon .....        | 1.5               |
| Spearmint, tops .....  | 2                 |

(d) *Indirect or inadvertent residues.*  
[Reserved]

[42 FR 56114, Oct. 21, 1977]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting §180.275, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at [www.govinfo.gov](http://www.govinfo.gov).

**§ 180.276 Formetanate hydrochloride; tolerances for residues.**

(a) *General.* Tolerances are established for residues of the insecticide formetanate hydrochloride, including its metabolites and degradates, in or on the commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only formetanate hydrochloride, N,N-dimethyl-N'-[3-[(methyl

**40 CFR Ch. I (7–1–25 Edition)**

amino)carbonyl]oxy]phenyl] methanimidamide hydrochloride, in or on the commodity.

| Commodity               | Parts per million | Expiration/revocation date |
|-------------------------|-------------------|----------------------------|
| Apple .....             | 0.50              | 12/31/13                   |
| Apple, wet pomace ..... | 1.5               | 12/31/13                   |
| Grapefruit .....        | 1.5               | None                       |
| Lemon .....             | 0.60              | None                       |
| Lime .....              | 0.03              | None                       |
| Nectarine .....         | 0.40              | None                       |

[72 FR 28888, May 23, 2007]

**§ 180.284 Zinc phosphide; tolerances for residues.**

(a) *General.* Tolerances are established for residues of the phosphine resulting from the use of the rodenticide zinc phosphide in or on the raw agricultural commodities as follows:

## Environmental Protection Agency

## § 180.288

| Commodity                      | Parts per million |
|--------------------------------|-------------------|
| Alfalfa, forage .....          | 0.2               |
| Alfalfa, hay .....             | 0.2               |
| Barley, grain .....            | 0.05              |
| Barley, hay .....              | 0.2               |
| Barley, straw .....            | 0.2               |
| Bean, dry, seed .....          | 0.05              |
| Beet, sugar, roots .....       | 0.05              |
| Beet, sugar, tops .....        | 0.2               |
| Grape .....                    | 0.01              |
| Grass, rangeland, forage ..... | 0.1               |
| Grass, rangeland, hay .....    | 0.1               |
| Potato .....                   | 0.05              |
| Sugarcane, cane .....          | 0.01              |
| Timothy, hay .....             | 0.5               |
| Timothy, forage .....          | 0.5               |
| Wheat, forage .....            | 0.05              |
| Wheat, grain .....             | 0.05              |
| Wheat, hay .....               | 0.05              |
| Wheat, straw .....             | 0.05              |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* Tolerances with regional registration, as defined in §180.1(l), are established for residues of phosphine resulting from the use of the rodenticide zinc phosphide in or on the following raw agricultural commodities as follows:

| Commodity                | Parts per million |
|--------------------------|-------------------|
| Artichoke, globe .....   | 0.01              |
| Beet, sugar, roots ..... | 0.04              |
| Beet, sugar, tops .....  | 0.02              |

(d) *Indirect or inadvertent residues.*  
[Reserved]

[63 FR 45182, Aug. 25, 1998, as amended at 63 FR 67799, Dec. 9, 1998; 64 FR 40772, July 28, 1999; 64 FR 61791, Nov. 15, 1999; 65 FR 8874, Feb. 23, 2000; 65 FR 49941, Aug. 16, 2000; 65 FR 62634, Oct. 19, 2000; 66 FR 64773, Dec. 14, 2001; 68 FR 2247, Jan. 16, 2003; 68 FR 56195, Sept. 30, 2003; 70 FR 7046, Feb. 10, 2005; 74 FR 46373, Sept. 9, 2009; 76 FR 34885, June 15, 2011]

### § 180.287 Amitraz; tolerances for residues.

(a) *General.* Tolerances are established for residues of the insecticide amitraz (N'-[2,4-dimethylphenyl]-N-[[[(2,4-dimethylphenyl)imino]methyl]]-N-methylmethanimidamide), including its metabolites and degradates, in or on the commodities in the following table. Compliance with the tolerance levels specified is to be determined by measuring amitraz residues convertible to 2,4-dimethylaniline, expressed as the stoichiometric equivalent of amitraz,

in or on the following raw agricultural commodities:

| Commodity                     | Parts per million |
|-------------------------------|-------------------|
| Cattle, fat .....             | 0.1               |
| Cattle, meat .....            | 0.02              |
| Cattle, meat byproducts ..... | 0.2               |
| Hog, fat .....                | 0.1               |
| Hog, kidney .....             | 0.1               |
| Hog, liver .....              | 0.1               |
| Hog, meat .....               | 0.05              |
| Hog, meat byproducts .....    | 0.3               |
| Honey .....                   | 0.2               |
| Honeycomb .....               | 9                 |
| Milk .....                    | 0.03              |
| Milk, fat .....               | 0.2               |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.*  
[Reserved]

### § 180.288 2-(Thiocyanomethylthio)benzothiazole; tolerances for residues.

(a) *General.* Tolerances are established for residues of the fungicide 2-(thiocyanomethylthio)benzothiazole in or on the following food commodities:

| Commodity                     | Parts per million |
|-------------------------------|-------------------|
| Barley, grain .....           | 0.1(N)            |
| Barley, straw .....           | 0.1(N)            |
| Beet, sugar, roots .....      | 0.1(N)            |
| Beet, sugar, tops .....       | 0.1(N)            |
| Corn, field, forage .....     | 0.1(N)            |
| Corn, field, grain .....      | 0.1               |
| Corn, field, stover .....     | 0.1               |
| Corn, pop, grain .....        | 0.1               |
| Corn, pop, stover .....       | 0.1               |
| Cotton, forage .....          | 0.1(N)            |
| Cotton, undelinted seed ..... | 0.1(N)            |
| Oat, forage .....             | 0.1(N)            |
| Oat, grain .....              | 0.1(N)            |
| Oat, hay .....                | 0.1(N)            |
| Oat, straw .....              | 0.1(N)            |
| Rice, grain .....             | 0.1(N)            |
| Safflower, seed .....         | 0.1(N)            |
| Sorghum, grain, forage .....  | 0.1(N)            |
| Sorghum, grain, grain .....   | 0.1(N)            |
| Sorghum, grain, stover .....  | 0.1(N)            |
| Wheat, forage .....           | 0.1(N)            |
| Wheat, grain .....            | 0.1(N)            |
| Wheat, hay .....              | 0.1(N)            |
| Wheat, straw .....            | 0.1(N)            |

§ 180.289

[Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.*  
[Reserved]

[68 FR 39440, July 1, 2003, as amended at 74 FR 46374, Sept. 9, 2009; 80 FR 72598, Nov. 20, 2015]

**§ 180.289 Methanearsonic acid; tolerances for residues.**

(a) *General.* Tolerances are established for residues of the herbicide methanearsonic acid, including its metabolites and degradates, in or on the commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only methanearsonic acid, from application of the disodium and monosodium salts of methanearsonic acid, calculated as the stoichiometric equivalent of As<sub>2</sub>O<sub>3</sub>, in or on the commodity.

| Commodity                     | Parts per million | Expiration/Revocation Date |
|-------------------------------|-------------------|----------------------------|
| Cotton, undelinted seed ..... | 0.7               | None                       |
| Cotton, hulls .....           | 0.9               | None                       |
| Fruit, citrus .....           | 0.35              | 12/31/12                   |

[63 FR 34828, June 26, 1998, as amended at 77 FR 59126, Sept. 26, 2012]

**§ 180.291 Pentachloronitrobenzene; tolerance for residues.**

(a) *General.* Tolerances are established for the combined residues of the fungicide pentachloronitrobenzene (PCNB) and its metabolites pentachloroaniline (PCA), and pentachlorothioanisole (PCTA), in or on the following food commodities:

| Commodity                                  | Parts per million |
|--------------------------------------------|-------------------|
| Bean .....                                 | 0.1               |
| Brassica, head and stem, subgroup 5A ..... | 0.1               |
| Cotton, undelinted seed .....              | 0.1               |
| Garlic, bulb .....                         | 0.1               |
| Peanut .....                               | 1.0               |
| Potato .....                               | 0.1               |
| Soybean, forage .....                      | 0.02              |
| Soybean, hay .....                         | 0.02              |

40 CFR Ch. I (7–1–25 Edition)

| Commodity                          | Parts per million |
|------------------------------------|-------------------|
| Soybean, seed .....                | 0.02              |
| Vegetable, fruiting, group 8 ..... | 0.1               |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* Tolerances with regional registrations, as defined in §180.1(l), are established for the combined residues of the fungicide pentachloronitrobenzene (PCNB) and its metabolites pentachloroaniline (PCA), and pentachlorothioanisole (PCTA), in or on the following food commodities:

| Commodity             | Parts per million |
|-----------------------|-------------------|
| Collards .....        | 0.2               |
| Kale .....            | 0.2               |
| Mustard, greens ..... | 0.2               |

(d) *Indirect or inadvertent residues.*  
[Reserved]

[74 FR 47456, Sept. 16, 2009]

**§ 180.292 Picloram; tolerances for residues.**

(a) *General.* Tolerances are established for residues of the herbicide picloram, 4-amino-3,5,6-trichloropicolinic acid, including its metabolites and degradates, in or on the commodities in the following table from its application in the acid form or in the form of its salts. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only picloram, 4-amino-3,5,6-trichloropicolinic acid, in or on the commodity.

| Commodity                        | Parts per million |
|----------------------------------|-------------------|
| Barley, grain .....              | 0.5               |
| Barley, pearled barley .....     | 3.0               |
| Barley, straw .....              | 1.0               |
| Cattle, fat .....                | 0.4               |
| Cattle, meat .....               | 0.4               |
| Cattle, meat byproducts .....    | 15                |
| Egg .....                        | 0.05              |
| Goat, fat .....                  | 0.4               |
| Goat, meat .....                 | 0.4               |
| Goat, meat byproducts .....      | 15                |
| Grain, aspirated fractions ..... | 4.0               |
| Grass, forage .....              | 400               |
| Grass, hay .....                 | 225               |
| Hog, fat .....                   | 0.05              |
| Hog, meat .....                  | 0.05              |
| Hog, meat byproducts .....       | 0.05              |
| Horse, fat .....                 | 0.4               |
| Horse, meat .....                | 0.4               |

(d) *Indirect or inadvertent residues.*  
[Reserved]

[41 FR 19221, May 11, 1976, as amended at 47 FR 53005, Nov. 24, 1982; 64 FR 425, Jan. 5, 1999; 64 FR 39082, July 21, 1999; 72 FR 41930, Aug. 1, 2007; 75 FR 60243, Sept. 29, 2010]

## § 180.293 Endothall; tolerances for residues.

(a) *General.* (1) Tolerances are established for the residues of endothall, including its metabolites and degradates, in or on the commodities in the table, below. Compliance with the tolerance levels specified, below, is to be determined by measuring only endothall (7-oxabicyclo [2.2.1] heptane-2,3-dicarboxylic acid) and its mono-methyl ester.

| Commodity                     | Parts per million |
|-------------------------------|-------------------|
| Apple .....                   | 0.05              |
| Apple, wet pomace .....       | 0.15              |
| Cotton, undelinted seed ..... | 0.1               |
| Fish .....                    | 0.1               |
| Hop, dried cones .....        | 0.1               |
| Potato .....                  | 0.1               |
| Rice, grain .....             | 0.05              |

(2) An interim tolerance of 0.2 parts per million is established for residues of the herbicide endothall (7-oxabicyclo[2.2.1] heptane-2,3-dicarboxylic acid) in water, potable from use of its potassium, sodium, di-*N, N*-dimethylalkylamine, and mono-*N, N*-dimethylalkylamine salts as algicides or herbicides to control

aquatic plants in canals, lakes, ponds, and other potential sources of water, potable.

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.*  
Tolerances are established for the indirect or inadvertent combined residues of the herbicide, endothall (7-oxabicyclo[2.2.1] heptane-2,3-dicarboxylic acid) in potable water from use of its potassium, sodium, di-*N, N*-dimethylalkylamine, and mono-*N, N*-dimethylalkylamine salts as algicides or herbicides to control aquatic plants in canals, lakes, ponds, and other potable water sources that may lead to endothall residues in or on the following commodities:

| Commodity                                              | Parts per million |
|--------------------------------------------------------|-------------------|
| Almond, hulls .....                                    | 15.0              |
| Animal feed, nongrass, group 18, forage .....          | 4.0               |
| Animal feed, nongrass, group 18, hay .....             | 10                |
| Apple, wet pomace .....                                | 0.15              |
| Beet, sugar, molasses .....                            | 1.5               |
| Brassica, head and stem subgroup 5A .....              | 0.1               |
| Brassica, leafy, subgroup 5B .....                     | 2.0               |
| Bushberry subgroup 13-07B .....                        | 0.6               |
| Caneberry subgroup 13-07A .....                        | 0.6               |
| Cattle, fat .....                                      | 0.05              |
| Cattle, kidney .....                                   | 0.05              |
| Cattle, kidney <sup>1</sup> .....                      | 0.20              |
| Cattle, liver <sup>1</sup> .....                       | 0.10              |
| Cattle, liver .....                                    | 0.05              |
| Cattle, meat .....                                     | 0.05              |
| Corn, field, grain .....                               | 0.07              |
| Corn, pop, grain .....                                 | 0.07              |
| Corn, sweet, kernel plus cob with husks removed .....  | 0.3               |
| Citrus, dried pulp .....                               | 0.1               |
| Egg .....                                              | 0.05              |
| Feed commodities not otherwise listed .....            | 10.0              |
| Food commodities not otherwise listed .....            | 5.0               |
| Fruit, citrus group 10 .....                           | 0.05              |
| Fruit, pome, group 11 .....                            | 0.05              |
| Fruit, stone, group 12 .....                           | 0.3               |
| Goat, fat .....                                        | 0.05              |
| Goat, kidney <sup>1</sup> .....                        | 0.15              |
| Goat, kidney .....                                     | 0.05              |

§ 180.297 *N*-1-Naphthyl phthalamic acid; tolerances for residues.

(a) *General.* Tolerances are established for residues of the herbicide *N*-1-naphthyl phthalamic acid from application of its sodium salt in or on the following raw agricultural commodities:

| Commodity        | Parts per million |
|------------------|-------------------|
| Cantaloupe ..... | 0.1(N)            |
| Cucumber .....   | 0.1(N)            |
| Muskmelon .....  | 0.1(N)            |
| Watermelon ..... | 0.1(N)            |

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[45 FR 32306, May 16, 1980, as amended at 63 FR 57075, Oct. 26, 1998]

40 CFR Ch. I (7–1–25 Edition)

§ 180.298 Methidathion; tolerances for residues.

(a) *General.* Tolerances are established for residues of the insecticide methidathion, including its metabolites and degradates, in or on the commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only methidathion, *S*-[(5-methoxy-2-oxo-1,3,4-thiadiazol-3(2*H*)-yl)methyl] *O,O*-dimethyl phosphorodithioate, in or on the commodity.

| Commodity                                       | Parts per million | Expiration/revocation date |
|-------------------------------------------------|-------------------|----------------------------|
| Almond, hulls .....                             | 6.0               | 12/31/16                   |

| Tangerine .....                                 | 6.0               | 12/31/16                   |

(b) *Section 18 emergency exemptions.* [Reserved]

(c) Tolerances with regional registrations. Tolerances with regional registration, as defined in §180.1(l), are established for residues of the insecticide methidathion, including its metabolites and degradates, in or on the commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only methidathion, *S*-[(5-methoxy-2-oxo-1,3,4-thiadiazol-3(2*H*)-yl)methyl] *O,O*-dimethyl phosphorodithioate, in or on the commodity.

| Commodity         | Parts per million | Expiration/revocation date |
|-------------------|-------------------|----------------------------|
| Kiwifruit .....   | 0.1               | 12/31/16                   |
| Longan .....      | 0.1               | 12/31/16                   |
| Starfruit .....   | 0.1               | 12/31/16                   |
| Sugar apple ..... | 0.2               | 12/31/16                   |

## Environmental Protection Agency

§ 180.301

(d) *Indirect or inadvertent residues.*  
[Reserved]

[43 FR 44845, Sept. 29, 1978]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 180.298, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at [www.govinfo.gov](http://www.govinfo.gov).

### § 180.299 Dicrotophos; tolerances for residues.

(a) *General.* Tolerances are established for residues of the insecticide dicrotophos, dimethyl phosphate of 3-hydroxy-*N,N*-dimethyl-*cis*-crotonamide, in or on the following food commodities:

| Commodity                     | Parts per million |
|-------------------------------|-------------------|
| Cotton, gin byproducts .....  | 2.0               |
| Cotton, undelinted seed ..... | 0.2               |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.*  
[Reserved]

[73 FR 52613, Sept. 10, 2008]

### § 180.300 Ethephon; tolerances for residues.

(a) *General.* Tolerances are established for residues of the plant regulator ethephon [(2-chloroethyl) phosphonic acid] in or on food commodities as follows:

| Commodity                                    | Parts per million |
|----------------------------------------------|-------------------|
| Apple .....                                  | 5.0               |
| Apple, juice .....                           | 10.0              |
| Barley, bran .....                           | 5.0               |
| Barley, grain .....                          | 2.0               |
| Barley, straw .....                          | 10.0              |
| Blackberry .....                             | 30.0              |
| Blueberry .....                              | 20.0              |
| Cantaloupe .....                             | 2.0               |
| Cattle, fat .....                            | 0.02              |
| Cattle, kidney .....                         | 1.0               |
| Cattle, meat .....                           | 0.02              |
| Cattle, meat byproducts, except kidney ..... | 0.2               |
| Cherry .....                                 | 10.0              |
| Coffee, bean, green .....                    | 0.5               |
| Cotton, gin byproducts .....                 | 180.0             |
| Cotton, undelinted seed .....                | 6.0               |
| Egg .....                                    | 0.002             |
| Goat, fat .....                              | 0.02              |
| Goat, kidney .....                           | 1.0               |
| Goat, meat .....                             | 0.02              |
| Goat, meat byproducts, except kidney .....   | 0.2               |
| Grape .....                                  | 2.0               |
| Grape, raisin .....                          | 12.0              |

| Commodity                                    | Parts per million |
|----------------------------------------------|-------------------|
| Hazelnut .....                               | 0.80              |
| Hog, fat .....                               | 0.02              |
| Hog, kidney .....                            | 1.0               |
| Hog, meat .....                              | 0.02              |
| Hog, meat byproducts, except kidney .....    | 0.2               |
| Horse, fat .....                             | 0.02              |
| Horse, kidney .....                          | 1.0               |
| Horse, meat .....                            | 0.02              |
| Horse, meat byproducts, except kidney .....  | 0.2               |
| Milk .....                                   | 0.01              |
| Nut, macadamia .....                         | 0.5               |
| Pepper .....                                 | 30.0              |
| Pineapple .....                              | 2.0               |
| Poultry, fat .....                           | 0.02              |
| Poultry, liver .....                         | 0.05              |
| Poultry, meat .....                          | 0.01              |
| Poultry, meat byproducts, except liver ..... | 0.01              |
| Sheep, fat .....                             | 0.02              |
| Sheep, kidney .....                          | 1.0               |
| Sheep, meat .....                            | 0.02              |
| Sheep, meat byproducts, except kidney .....  | 0.2               |
| Sugarcane, molasses .....                    | 1.5               |
| Tomato .....                                 | 2.0               |
| Walnut .....                                 | 0.5               |
| Wheat, bran .....                            | 5.0               |
| Wheat, germ .....                            | 5.0               |
| Wheat, grain .....                           | 2.0               |
| Wheat, middlings .....                       | 5.0               |
| Wheat, shorts .....                          | 5.0               |
| Wheat, straw .....                           | 10.0              |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* A tolerance with regional registration, as defined in § 180.1(m), of 0.1 part per million is established for residues of the plant regulator ethephon [(2-chloroethyl)phosphonic acid] in or on the food commodity sugarcane.

(d) *Indirect or inadvertent residues.*  
[Reserved]

[65 FR 33710, May 24, 2000, as amended at 72 FR 53455, Sept. 19, 2007; 75 FR 56015, Sept. 15, 2010; 80 FR 72598, Nov. 20, 2015]

### § 180.301 Carboxin; tolerances for residues.

(a) *General.* Tolerances are established for the combined residues of the fungicide carboxin (5,6-dihydro-2-methyl-1,4-oxathiin-3-carboxanilide) and its metabolites determined as aniline and expressed as parent compound, in or on food commodities as follows:

| Commodity                     | Parts per million |
|-------------------------------|-------------------|
| Barley, grain .....           | 0.2               |
| Barley, straw .....           | 0.2               |
| Bean, dry, seed .....         | 0.2               |
| Bean, succulent .....         | 0.2               |
| Canola, seed .....            | 0.03              |
| Cattle, fat .....             | 0.05              |
| Cattle, meat byproducts ..... | 0.1               |

§ 180.303

| Commodity                                             | Parts per million |
|-------------------------------------------------------|-------------------|
| Cattle, meat .....                                    | 0.05              |
| Corn, field, forage .....                             | 0.2               |
| Corn, field, grain .....                              | 0.2               |
| Corn, field, stover .....                             | 0.2               |
| Corn, pop, grain .....                                | 0.2               |
| Corn, pop, stover .....                               | 0.2               |
| Corn, sweet, forage .....                             | 0.2               |
| Corn, sweet, kernel plus cob with husks removed ..... | 0.2               |
| Corn, sweet, stover .....                             | 0.2               |
| Cotton, undelinted seed .....                         | 0.2               |
| Egg .....                                             | 0.05              |
| Goat, fat .....                                       | 0.05              |
| Goat, meat byproducts .....                           | 0.1               |
| Goat, meat .....                                      | 0.05              |
| Hog, fat .....                                        | 0.05              |
| Hog, meat byproducts .....                            | 0.1               |
| Hog, meat .....                                       | 0.05              |
| Horse, fat .....                                      | 0.05              |
| Horse, meat byproducts .....                          | 0.1               |
| Horse, meat .....                                     | 0.05              |
| Milk .....                                            | 0.05              |
| Oat, forage .....                                     | 0.5               |
| Oat, grain .....                                      | 0.2               |
| Oat, straw .....                                      | 0.2               |
| Onion, bulb .....                                     | 0.2               |
| Peanut .....                                          | 0.2               |
| Peanut, hay .....                                     | 0.2               |
| Poultry, fat .....                                    | 0.1               |
| Poultry, meat byproducts .....                        | 0.1               |
| Poultry, meat .....                                   | 0.1               |
| Rice, grain .....                                     | 0.2               |
| Safflower, seed .....                                 | 0.2               |
| Sheep, fat .....                                      | 0.05              |
| Sheep, meat byproducts .....                          | 0.1               |
| Sheep, meat .....                                     | 0.05              |
| Soybean, seed .....                                   | 0.2               |
| Wheat, forage .....                                   | 0.5               |
| Wheat, grain .....                                    | 0.2               |
| Wheat, straw .....                                    | 0.2               |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.*  
[Reserved]

[47 FR 55222, Dec. 8, 1982, as amended at 50 FR 81, Jan. 2, 1985; 62 FR 4915, Feb. 3, 1997; 63 FR 4586, Jan. 30, 1998; 64 FR 11801, Mar. 10, 1999; 66 FR 9773, Feb. 12, 2001; 66 FR 64773, Dec. 14, 2001; 67 FR 40218, June 12, 2002; 67 FR 72853, Dec. 9, 2002; 71 FR 56383, Sept. 27, 2006; 80 FR 72598, Nov. 20, 2015]

§ 180.303 Oxamyl; tolerances for residues.

(a) *General.* Tolerances are established for the combined residues of the insecticide oxamyl, methyl *N,N*-dimethyl-*N*-[(methylcarbamoyl)-oxy]-1-thiooxamimidate, and its oxime metabolite methyl *N,N*-dimethyl-*N*-hydroxy-1-thiooxamimidate calculated as oxamyl in or on the following food commodities:

40 CFR Ch. I (7–1–25 Edition)

| Commodity                                     | Parts per million |
|-----------------------------------------------|-------------------|
| Apple .....                                   | 2                 |
| Banana .....                                  | 0.3               |
| Cantaloupe .....                              | 2.0               |
| Carrot .....                                  | 0.1               |
| Celery .....                                  | 10.0              |
| Cotton, undelinted seed .....                 | 0.2               |
| Cucumber .....                                | 2.0               |
| Eggplant .....                                | 2.0               |
| Fruit, citrus, group 10 .....                 | 3                 |
| Garlic, bulb .....                            | 0.2               |
| Melon, honeydew .....                         | 2.0               |
| Onion, bulb .....                             | 0.2               |
| Peanut .....                                  | 0.05              |
| Peanut, hay .....                             | 2.0               |
| Pear .....                                    | 2.0               |
| Peppermint, tops .....                        | 10.0              |
| Pepper, bell .....                            | 2.0               |
| Pepper, nonbell .....                         | 5.0               |
| Pineapple .....                               | 1                 |
| Pineapple, process residue .....              | 2.0               |
| Pumpkin .....                                 | 2.0               |
| Spearmint, tops .....                         | 10.0              |
| Squash, summer .....                          | 2.0               |
| Squash, winter .....                          | 2.0               |
| Tomato .....                                  | 2                 |
| Vegetable, tuberous and corm, subgroup 1C ... | 0.1               |
| Watermelon .....                              | 2.0               |

(b) *Section 18 emergency exemptions.*  
[Reserved]

## Environmental Protection Agency

## § 180.316

(c) *Tolerances with regional registrations.* Tolerances with regional registration, as defined in §180.1(l), are established for residues of oryzalin, 3,5-dinitro-*N*<sub>4</sub>,*N*<sub>4</sub>-dipropylsulfanilamide, in or on the following raw agricultural commodities:

| Commodity    | Parts per million |
|--------------|-------------------|
| Guava .....  | 0.05              |
| Papaya ..... | 0.05              |

(d) *Indirect or inadvertent residues.* [Reserved]

[71 FR 54434, Sept. 15, 2006, as amended at 76 FR 34885, June 15, 2011]

### § 180.314 Triallate; tolerances for residues.

(a) *General.* Tolerances are established for residues of triallate, S-2,3,4-trichloroallyl diisopropylthiocarbamate and its metabolite 2,3,3-trichloroprop-2-enesulfonic acid (TCPA) in or on the following food commodity:

| Commodity               | Parts per million |
|-------------------------|-------------------|
| Bermudagrass, hay ..... | 0.3               |

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* Tolerances with a regional registration, as defined in §180.1(l), are established for residues of the herbicide (S-2, 3, 4-trichloroallyl diisopropylthiocarbamate) and its metabolite 2, 3, 3-trichloroprop-2-enesulfonic acid (TCPA) in or on the following food commodities:

| Commodity                     | Parts per million |
|-------------------------------|-------------------|
| Barley, grain .....           | 0.05              |
| Barley, hay .....             | 1.0               |
| Barley, straw .....           | 0.3               |
| Beet, sugar, dried pulp ..... | 0.2               |
| Beet, sugar, roots .....      | 0.1               |
| Beet, sugar, tops .....       | 0.5               |
| Pea, dry .....                | 0.2               |
| Pea, field, hay .....         | 1.0               |
| Pea, field, vines .....       | 0.5               |
| Pea, succulent .....          | 0.2               |
| Wheat, forage .....           | 0.5               |
| Wheat, grain .....            | 0.05              |
| Wheat, hay .....              | 1.0               |
| Wheat, straw .....            | 1.0               |

(d) *Indirect or inadvertent residues.* [Reserved]

[72 FR 28888, May 23, 2007, as amended at 73 FR 5109, Jan. 29, 2008; 73 FR 53738, Sept. 17, 2008; 74 FR 29963, June 24, 2009]

### § 180.316 Pyrazon; tolerances for residues.

(a) *General.* Tolerances are established for combined residues of the herbicide pyrazon (5-amino-4-chloro-2-phenyl-3(2H)-pyridazinone) and its metabolites (calculated as pyrazon) in or on the following food commodities:

| Commodity                                   | Parts per million |
|---------------------------------------------|-------------------|
| Beet, garden, roots .....                   | 0.9               |
| Beet, garden, tops .....                    | 7.0               |
| Beet, sugar, molasses .....                 | 1.5               |
| Beet, sugar, roots .....                    | 0.2               |
| Beet, sugar, tops .....                     | 3.0               |
| Cattle, fat .....                           | 0.10              |
| Cattle, liver .....                         | 0.15              |
| Cattle, meat .....                          | 0.10              |
| Cattle, meat byproducts, except liver ..... | 0.10              |
| Goat, fat .....                             | 0.10              |
| Goat, liver .....                           | 0.15              |
| Goat, meat .....                            | 0.10              |
| Goat, meat byproducts, except liver .....   | 0.10              |
| Horse, fat .....                            | 0.10              |
| Horse, liver .....                          | 0.15              |
| Horse, meat .....                           | 0.10              |
| Horse, meat byproducts, except liver .....  | 0.10              |
| Milk .....                                  | 0.02              |
| Sheep, fat .....                            | 0.10              |
| Sheep, liver .....                          | 0.15              |
| Sheep, meat .....                           | 0.10              |
| Sheep, meat byproducts, except liver .....  | 0.10              |

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* Tolerances are established for combined residues of the herbicide pyrazon, 5-amino-4-chloro-2-phenyl-3(2H)-pyridazinone, and its metabolites (calculated as pyrazon), in or on the following food commodities:

| Commodity                 | Parts per million |
|---------------------------|-------------------|
| Corn, field, forage ..... | 0.5               |
| Corn, field, stover ..... | 0.5               |
| Soybean, forage .....     | 0.5               |
| Soybean, hay .....        | 0.5               |
| Wheat, forage .....       | 0.3               |
| Wheat, hay .....          | 0.2               |
| Wheat, straw .....        | 0.1               |

[68 FR 39441, July 1, 2003, as amended at 73 FR 52614, Sept. 10, 2008]

**§ 180.317 Propyzamide; tolerances for residues.**

(a) *General.* Tolerances are established for residues of the herbicide propyzamide, including its metabolites and degradates, in or on the commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only those propyzamide residues convertible to methyl 3,5-dichlorobenzoate, expressed as the stoichiometric equivalent of propyzamide, 3,5-dichloro-*N*-(1,1-dimethyl-2-propynyl)benzamide, in or on the commodity.

| Commodity                                              | Parts per million |
|--------------------------------------------------------|-------------------|
| Alfalfa, seed .....                                    | 10.0              |
| Animal feed, nongrass, group 18 .....                  | 10.0              |
| Apple .....                                            | 0.1               |
| Artichoke, globe .....                                 | 0.01              |
| Blackberry .....                                       | 0.05              |
| Blueberry .....                                        | 0.05              |
| Boysenberry .....                                      | 0.05              |
| Cattle, fat .....                                      | 0.2               |
| Cattle, kidney .....                                   | 0.4               |
| Cattle, liver .....                                    | 0.4               |
| Cattle, meat .....                                     | 0.02              |
| Cattle, meat byproducts, except kidney and liver ..... | 0.02              |
| Egg .....                                              | 0.02              |
| Endive .....                                           | 1.0               |

| Sheep, meat .....                                      | 0.02              |
| Sheep, meat byproducts, except kidney and liver .....  | 0.02              |

(b) *Section 18 emergency exemptions.* The time-limited tolerance specified in the table in this paragraph (b) is established for residues of the herbicide propyzamide, including its metabolites and degradates, in or on the specified agricultural commodity in the table in this paragraph (b), resulting from use of the pesticide pursuant to FIFRA section 18 emergency exemptions. Compliance with the tolerance level specified in the table in this paragraph (b) is to be determined by measuring only those propyzamide residues convertible to methyl 3,5-dichlorobenzoate, expressed as the stoichiometric equivalent of propyzamide, 3,5-dichloro-*N*-(1,1-dimethyl-2-propynyl)benzamide in or on the commodity. The time-limited tolerance expires on the date specified in the table in this paragraph (b).

TABLE 2 TO PARAGRAPH (b)

| Commodity       | Parts per million | Expiration/revocation date |
|-----------------|-------------------|----------------------------|
| Cranberry ..... | 1                 | 12/31/2025                 |

(c) *Tolerances with regional registrations.* Tolerances with regional registration, as defined in §180.1(l), are established for residues of the herbicide propyzamide, including its metabolites and degradates, in or on the commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only those propyzamide residues convertible to methyl 3,5-dichlorobenzoate, expressed as the stoichiometric equivalent of propyzamide, 3,5-dichloro-*N*-(1,1-dimethyl-2-propynyl)benzamide, in or on the commodity.

| Commodity              | Parts per million |
|------------------------|-------------------|
| Pea, field, seed ..... | 0.05              |
| Rhubarb .....          | 0.1               |

(d) *Indirect or inadvertent residues.* Tolerances are established for indirect or inadvertent residues of the herbicide propyzamide, including its metabolites and degradates, in or on the commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only those propyzamide residues convertible to

### § 180.318 4-(2-Methyl-4-chlorophenoxy) butyric acid; tolerance for residues.

(a) *General.* (1) A tolerance is established for the herbicide 4-(2-methyl-4-chlorophenoxy) butyric acid in or on the following food commodity:

| Commodity | Parts per million |
|-----------|-------------------|
| Pea ..... | 0.1(N)            |

(2) Tolerances are established for the combined residues, free and con-

jugated, of the herbicide MCPB, 4-(4-chloro-2-methylphenoxy)butanoic acid, and its metabolite MCPA, (4-chloro-2-methylphenoxy)acetic acid, in or on the following food commodities:

| Commodity              | Parts per million |
|------------------------|-------------------|
| Peppermint, tops ..... | 0.20              |
| Spearmint, tops .....  | 0.20              |

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[68 FR 39441, July 1, 2003, as amended at 73 FR 66785, Nov. 12, 2008]

### § 180.319 Interim tolerances.

(a) *General.* While petitions for tolerances for negligible residues are pending and until action is completed on these petitions, interim tolerances are established for residues of the listed pesticide chemicals in or on the following raw agricultural commodities:

| Substances                                                    | Uses            | Tolerance in parts per million | Raw agricultural commodity | Expiration/revocation date |
|---------------------------------------------------------------|-----------------|--------------------------------|----------------------------|----------------------------|
| Endothall (7-oxabicyclo (2,2,1)heptane 2,3-dicarboxylic acid. | Herbicide ..... | 0.2 .....                      | Beet, sugar .....          | None                       |
| Methyl parathion .....                                        | Herbicide ..... | 0.5 .....                      | Rye .....                  | 12/31/13                   |

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[77 FR 59126, Sept. 26, 2012, as amended at 79 FR 27502, May 14, 2014]

### § 180.324 Bromoxynil; tolerances for residues.

(a) *General.* (1) Tolerances are established for residues of the herbicide bromoxynil, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels is to be determined by measuring only bromoxynil, 3,5-dibromo-4-hydroxybenzonitrile, resulting from application of its octanoic

and/or heptanoic acid ester, in or on the commodities.

| Commodity                        | Parts per million |
|----------------------------------|-------------------|
| Alfalfa, forage .....            | 0.1               |
| Alfalfa, hay .....               | 0.5               |
| Barley, grain .....              | 0.05              |
| Barley, hay .....                | 9.0               |
| Barley, straw .....              | 4.0               |
| Corn, field, forage .....        | 0.3               |
| Corn, field, grain .....         | 0.05              |
| Corn, field, stover .....        | 0.2               |
| Corn, pop, grain .....           | 0.05              |
| Corn, pop, stover .....          | 0.2               |
| Flax, seed .....                 | 0.1               |
| Garlic .....                     | 0.1               |
| Grain, aspirated fractions ..... | 1.2               |
| Grass, forage .....              | 18                |
| Grass, hay .....                 | 5.0               |
| Oat, forage .....                | 0.3               |
| Oat, grain .....                 | 0.05              |
| Oat, hay .....                   | 9.0               |
| Oat, straw .....                 | 4.0               |
| Onion, bulb .....                | 0.1               |
| Peppermint, hay .....            | 0.1               |

§ 180.328

| Commodity                    | Parts per million |
|------------------------------|-------------------|
| Rye, forage .....            | 1.0               |
| Rye, grain .....             | 0.05              |
| Rye, straw .....             | 2.0               |
| Sorghum, grain, forage ..... | 0.8               |
| Sorghum, grain, grain .....  | 0.2               |
| Sorghum, grain, stover ..... | 0.2               |
| Spearmint, hay .....         | 0.1               |
| Wheat, forage .....          | 1.0               |
| Wheat, grain .....           | 0.05              |
| Wheat, hay .....             | 4.0               |
| Wheat, straw .....           | 2.0               |

(2) Tolerances are established for residues of the herbicide bromoxynil, 3,5-dibromo-4-hydroxybenzonitrile, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels is to be determined by measuring only bromoxynil and its metabolite, 3,5-dibromo-4-hydroxybenzoic acid (DBHA), resulting from application of its octanoic and/or heptanoic acid ester, in or on the commodities.

| Commodity                      | Parts per million |
|--------------------------------|-------------------|
| Cattle, fat .....              | 1                 |
| Cattle, meat byproducts .....  | 3.5               |
| Cattle, meat .....             | 0.5               |
| Cotton, gin byproducts .....   | 7.0               |
| Cotton, hulls .....            | 5.0               |
| Cotton, undelinted seed .....  | 1.5               |
| Egg .....                      | 0.05              |
| Goat, fat .....                | 1                 |
| Goat, meat byproducts .....    | 3.5               |
| Goat, meat .....               | 0.5               |
| Hog, fat .....                 | 1                 |
| Hog, meat byproducts .....     | 3.5               |
| Hog, meat .....                | 0.5               |
| Horse, fat .....               | 1                 |
| Horse, meat byproducts .....   | 3.5               |
| Horse, meat .....              | 0.5               |
| Milk .....                     | 0.4               |
| Poultry, fat .....             | 0.05              |
| Poultry, meat byproducts ..... | 0.3               |
| Poultry, meat .....            | 0.05              |
| Sheep, fat .....               | 1                 |
| Sheep, meat byproducts .....   | 3.5               |
| Sheep, meat .....              | 0.5               |

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

§ 180.328 Napropamide; tolerances for residues.

(a) *General.* Tolerances are established for residues of the herbicide napropamide, *N,N*-diethyl-2-(1-naphthalenyloxy) propionamide, in or on the following food commodities:

| Commodity                                 | Parts per million | Expiration/revocation date |
|-------------------------------------------|-------------------|----------------------------|
| Almond, hulls .....                       | 0.1               | None                       |
| Asparagus .....                           | 0.1               | None                       |
| Basil .....                               | 0.1               | None                       |
| Berry group 13 .....                      | 0.1               | None                       |
| Coffee, green bean .....                  | 0.1               | None                       |
| Cranberry .....                           | 0.1               | None                       |
| Grape .....                               | 0.1               | None                       |
| Kiwifruit .....                           | 0.1               | None                       |
| Marjoram .....                            | 0.1               | None                       |
| Nut, tree, group 14 .....                 | 0.1               | None                       |
| Peppermint, tops .....                    | 0.1               | None                       |
| Persimmon .....                           | 0.1               | None                       |
| Rhubarb .....                             | 0.1               | None                       |
| Rosemary .....                            | 0.1               | None                       |
| Savory, summer .....                      | 0.1               | None                       |
| Savory, winter .....                      | 0.1               | None                       |
| Spearmint, tops .....                     | 0.1               | None                       |
| Strawberry .....                          | 0.1               | None                       |
| Sweet potato, roots .....                 | 0.1               | None                       |
| Vegetable, brassica, leafy, group 5 ..... | 0.1               | None                       |
| Vegetable, fruiting, group 8 .....        | 0.1               | None                       |

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[73 FR 52614, Sept. 10, 2008, as amended at 76 FR 34885, June 15, 2011]

§ 180.330 S-(2-(Ethylsulfinyl)ethyl) O,O-dimethyl phosphorothioate; tolerances for residues.

(a) *General.* The tolerances in this section expire on January 19, 2024. (1) Tolerances are established for the combined residues of the insecticide oxydemeton-methyl (S-(2-(ethylsulfinyl)ethyl) O,O-dimethyl phosphorothioate) and its metabolite oxydemeton-methyl sulfone in or on the following food commodities:

| Commodity                | Parts per million |
|--------------------------|-------------------|
| Alfalfa, forage .....    | 5.0               |
| Alfalfa, hay .....       | 11.0              |
| Bean, lima .....         | 0.2               |
| Beet, sugar, roots ..... | 0.3               |
| Beet, sugar, tops .....  | 0.5               |
| Broccoli .....           | 1.0               |
| Brussels sprouts .....   | 1.0               |
| Cabbage .....            | 2.0               |
| Cauliflower .....        | 1.0               |

| Peppermint, tops .....                                | 12.5              |
| Pumpkin .....                                         | 0.2               |
| Safflower, seed .....                                 | 1.0               |
| Sorghum, forage, forage .....                         | 2.0               |
| Sorghum, grain, forage .....                          | 2.0               |
| Sorghum, grain, grain .....                           | 0.75              |
| Spearmint, tops .....                                 | 12.5              |
| Squash, summer .....                                  | 1.0               |
| Squash, winter .....                                  | 0.3               |
| Strawberry .....                                      | 2.0               |
| Walnut .....                                          | 0.05              |

(2) Tolerances are established for the combined residues of the insecticide oxydemeton-methyl (S-(2-(ethylsulfinyl)ethyl) O,O-dimethyl phosphorothioate) and its cholinesterase-inhibiting metabolites in or on the following food commodities:

| Commodity                      | Parts per million |
|--------------------------------|-------------------|
| Cattle, fat .....              | 0.01              |
| Cattle, meat .....             | 0.01              |
| Cattle, meat byproducts .....  | 0.01              |
| Egg .....                      | 0.01              |
| Goat, fat .....                | 0.01              |
| Goat, meat .....               | 0.01              |
| Goat, meat byproducts .....    | 0.01              |
| Hog, fat .....                 | 0.01              |
| Hog, meat .....                | 0.01              |
| Hog, meat byproducts .....     | 0.01              |
| Horse, fat .....               | 0.01              |
| Horse, meat .....              | 0.01              |
| Horse, meat byproducts .....   | 0.01              |
| Milk .....                     | 0.01              |
| Poultry, fat .....             | 0.01              |
| Poultry, meat .....            | 0.01              |
| Poultry, meat byproducts ..... | 0.01              |
| Sheep, fat .....               | 0.01              |
| Sheep, meat .....              | 0.01              |
| Sheep, meat byproducts .....   | 0.01              |

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* The tolerances in this section expire on January 19, 2024. Tolerances with regional registrations, as defined in §180.1(l), are established for the combined residues of the insecticide

oxydemeton-methyl (S-(2-(ethylsulfinyl)ethyl) O,O-dimethyl phosphorothioate) and its metabolite oxydemeton-methyl sulfone in or on the following food commodities:

| Commodity           | Parts per million |
|---------------------|-------------------|
| Broccoli raab ..... | 2.0               |

(d) *Indirect or inadvertent residues.* [Reserved]

[72 FR 54578, Sept. 26, 2007, as amended at 88 FR 46083, July 19, 2023]

## § 180.331 4-(2,4-Dichlorophenoxy) butyric acid; tolerances for residues.

(a) *General.* Tolerances are established for residues of the herbicide 4-(2,4-dichlorophenoxy) butyric acid (2,4-DB), both free and conjugated, determined as the acid, in or on food commodities, as follows:

| Commodity                     | Parts per million |
|-------------------------------|-------------------|
| Alfalfa, forage .....         | 0.7               |
| Alfalfa, hay .....            | 2.0               |
| Cattle, meat byproducts ..... | 0.05              |
| Clover, forage .....          | 0.2               |
| Clover, hay .....             | 0.2               |
| Goat, meat byproducts .....   | 0.05              |
| Hog, meat byproducts .....    | 0.05              |
| Horse, meat byproducts .....  | 0.05              |
| Peanut .....                  | 0.2               |
| Peppermint, tops .....        | 0.2               |
| Sheep, meat byproducts .....  | 0.05              |

(d) *Indirect or inadvertent residues.* [Reserved]

[73 FR 54961, Sept. 24, 2008, as amended at 74 FR 46374, Sept. 9, 2009]

## § 180.332 Metribuzin; tolerances for residues.

(a) *General.* Tolerances are established for combined residues of the herbicide metribuzin (4-amino-6-(1,1-dimethyl-ethyl)-3-(methylthio)-;1,2,4-triazin-5(4H)-one) and its triazinone metabolites in or on food commodities:

§ 180.337

40 CFR Ch. I (7–1–25 Edition)

| Commodity                                             | Parts per million |
|-------------------------------------------------------|-------------------|
| Alfalfa, forage .....                                 | 2.0               |
| Alfalfa, hay .....                                    | 7.0               |
| Asparagus .....                                       | 0.1               |
| Barley, grain .....                                   | 0.75              |
| Barley, hay .....                                     | 7.0               |
| Barley, pearled barley .....                          | 3.0               |
| Barley, straw .....                                   | 1.0               |

**§ 180.337 Oxytetracycline; tolerances for residues.**

(a) *General.* Tolerances are established for residues of the fungicide/bactericide oxytetracycline, including its metabolites and degradates, in or on the commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only oxytetracycline, (4S,4aR,5S,5aR,6S,12aS)-4-(dimethylamino)-1,4,4a,5,5a,6,11,12a-octahydro-3,5,6,10,12,12a-hexahydroxy-6-methyl-1,11-dioxo-2-naphthacene-carboxamide, in or on the commodity.

| Commodity                        | Parts per million |
|----------------------------------|-------------------|
| Apple .....                      | 0.35              |
| Fruit, citrus, group 10-10 ..... | 0.01              |
| Peach .....                      | 0.35              |
| Pear .....                       | 0.35              |

(b) *Section 18 emergency exemptions.* Time-limited tolerances specified in the following table are established for residues of the fungicide/bactericide oxytetracycline, including its metabolites and degradates, in or on the commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only oxytetracycline, (4S,4aR,5S,5aR,6S,12aS)-4-(dimethylamino)-1,4,4a,5,5a,6,11,12a-octahydro-3,5,6,10,12,12a-hexahydroxy-6-methyl-1,11-dioxo-2-naphthacene-carboxamide, in or on the specified agricultural commodities, resulting from use of the pesticide pursuant to FIFRA section 18 emergency exemptions. The tolerances expire on the dates specified in the table.

| Commodity                        | Parts per million | Expiration/revocation date |
|----------------------------------|-------------------|----------------------------|
| Fruit, citrus, group 10-10 ..... | 0.40              | 12/31/19                   |

**§ 180.339 MCPA; tolerances for residues.**

(a) *General.* Tolerances are established for residues of the herbicide MCPA, including its metabolites and degradates, in or on the commodities in table 1 to this paragraph (a). Compliance with the tolerance levels specified in Table 1 to this paragraph (a) is to be determined by measuring only MCPA, 2-(4-chloro-2-methylphenoxy)acetic acid, in or on the commodity.

TABLE 1 TO PARAGRAPH (a)

| Commodity                        | Parts per million |
|----------------------------------|-------------------|
| Alfalfa, forage .....            | 0.5               |

**§ 180.341 2,4-Dinitro-6-octylphenyl crotonate and 2,6-dinitro-4-octylphenyl crotonate; tolerances for residues.**

(a) *General.* Tolerances are established for combined negligible residues of a fungicide and insecticide that is a mixture of 2,4-dinitro-6-octylphenyl crotonate and 2,6-dinitro-4-octylphenyl crotonate in or on raw agricultural commodities as follows:

| Commodity                | Parts per million |
|--------------------------|-------------------|
| Apple <sup>1</sup> ..... | 0.1               |
| Grape <sup>1</sup> ..... | 0.1               |

<sup>1</sup> There are no U.S. registrations on apple and grape as of October 24, 2002.

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[40 FR 29715, July 15, 1975, as amended at 63 FR 57076, Oct. 26, 1998; 69 FR 43924, July 23, 2004]

**§ 180.342 Chlorpyrifos; tolerances for residues.**

(a) *General.* (1) Tolerances are established for residues of the pesticide chlorpyrifos *per se* (O,O-diethyl-O-(3,5,6-trichloro-2-pyridyl) phosphorothioate) in or on the following food commodities:

| Commodity                     | Parts per million |
|-------------------------------|-------------------|
| Alfalfa, forage .....         | 3.0               |
| Alfalfa, hay .....            | 13                |
| Almond .....                  | 0.2               |
| Almond, hulls .....           | 12                |
| Apple .....                   | 0.01              |
| Apple, wet pomace .....       | 0.02              |
| Banana .....                  | 0.1               |
| Beet, sugar, dried pulp ..... | 5.0               |

| Commodity                                            | Parts per million |
|------------------------------------------------------|-------------------|
| Beet, sugar, molasses .....                          | 15                |
| Beet, sugar, roots .....                             | 1.0               |
| Beet, sugar, tops .....                              | 8.0               |
| Cattle, fat .....                                    | 0.3               |
| Cattle, meat .....                                   | 0.05              |
| Cattle, meat byproducts .....                        | 0.05              |
| Cherry, sweet .....                                  | 1.0               |
| Cherry, tart .....                                   | 1.0               |
| Citrus, dried pulp .....                             | 5.0               |
| Citrus, oil .....                                    | 20                |
| Corn, field, forage .....                            | 8.0               |
| Corn, field, grain .....                             | 0.05              |
| Corn, field, refined oil .....                       | 0.25              |
| Corn, field, stover .....                            | 8.0               |
| Corn, sweet, forage .....                            | 8.0               |
| Corn, sweet, kernel plus cob with husk removed ..... | 0.05              |
| Corn, sweet, stover .....                            | 8.0               |
| Cotton, undelinted seed .....                        | 0.2               |
| Cranberry .....                                      | 1.0               |
| Cucumber .....                                       | 0.05              |
| Egg .....                                            | 0.01              |
| Fig .....                                            | 0.01              |
| Fruit, citrus, group 10 .....                        | 1.0               |
| Goat, fat .....                                      | 0.2               |
| Goat, meat .....                                     | 0.05              |
| Goat, meat byproducts .....                          | 0.05              |
| Hazelnut .....                                       | 0.2               |
| Hog, fat .....                                       | 0.2               |
| Hog, meat .....                                      | 0.05              |
| Hog, meat byproducts .....                           | 0.05              |
| Horse, fat .....                                     | 0.25              |
| Horse, meat .....                                    | 0.25              |
| Horse, meat byproducts .....                         | 0.25              |
| Kiwifruit .....                                      | 2.0               |
| Milk, fat (Reflecting 0.01 ppm in whole milk) ....   | 0.25              |
| Nectarine .....                                      | 0.05              |
| Onion, bulb .....                                    | 0.5               |
| Peach .....                                          | 0.05              |
| Peanut .....                                         | 0.2               |
| Peanut, refined oil .....                            | 0.2               |
| Pear .....                                           | 0.05              |
| Pecan .....                                          | 0.2               |
| Pepper .....                                         | 1.0               |
| Peppermint, tops .....                               | 0.8               |
| Peppermint, oil .....                                | 8.0               |
| Plum, prune, fresh .....                             | 0.05              |
| Poultry, fat .....                                   | 0.1               |
| Poultry, meat .....                                  | 0.1               |
| Poultry, meat byproducts .....                       | 0.1               |
| Pumpkin .....                                        | 0.05              |
| Radish .....                                         | 2.0               |
| Rutabaga .....                                       | 0.5               |
| Sheep, fat .....                                     | 0.2               |
| Sheep, meat .....                                    | 0.05              |
| Sheep, meat byproducts .....                         | 0.05              |
| Spearmint, tops .....                                | 0.8               |
| Spearmint, oil .....                                 | 8.0               |
| Sorghum, grain, forage .....                         | 0.5               |
| Sorghum, grain, grain .....                          | 0.5               |
| Sorghum, grain, stover .....                         | 2.0               |
| Soybean, seed .....                                  | 0.3               |
| Strawberry .....                                     | 0.2               |
| Sunflower, seed .....                                | 0.1               |
| Sweet potato, roots .....                            | 0.05              |
| Turnip, roots .....                                  | 1.0               |
| Turnip, tops .....                                   | 0.3               |
| Vegetable, brassica, leafy, group 5 .....            | 1.0               |
| Vegetable, legume, group 6. except soybean ..        | 0.05              |
| Walnut .....                                         | 0.2               |
| Wheat, forage .....                                  | 3.0               |
| Wheat, grain .....                                   | 0.5               |
| Wheat, straw .....                                   | 6.0               |

(2) Chlorpyrifos [*O,O*-diethyl *O*-(3,5,6-trichloro-2-pyridyl) phosphorothioate] may be safely used in accordance with the following prescribed conditions.

(i) Application shall be limited solely to spot and/or crack and crevice treatment in food handling establishments where food and food products are held, processed, prepared or served. Contamination of food or food contact surfaces shall be avoided. Food must be removed or covered during treatment.

(ii) Spray concentration for spot treatment shall be limited to a maximum of 0.5 percent of the active ingredient by weight. A coarse, low-pressure spray shall be used to avoid atomization or splashing of the spray.

(iii) Paint-on application for spot treatment shall be limited to a maximum of 2 percent of the active ingredient by weight.

(iv) Crack and crevice treatment shall be limited to a maximum of 2 percent of the active ingredient by weight. Equipment capable of delivering a pin-stream of insecticide shall be used.

(v) Application via adhesive strips shall contain a maximum of 10% by weight of the controlled-release product in food-handling establishments where food and food products are held, processed, prepared, or served. A maximum of 36 strips (or 5.15 grams of chlorpyrifos) is to be used per 100 square feet of floor space. The strips are not to be placed in exposed areas where direct contact with food, utensils, and food-contact surfaces would be likely to occur.

(vi) To assure safe use of the insecticide, its label and labeling shall conform to that registered by the U.S. Environmental Protection Agency, and it shall be used in accordance with such label and labeling.

(3) A tolerance of 0.1 part per million is established for residues of chlorpyrifos, per se, in or on food commodities (other than those already covered by a higher tolerance as a result of use on growing crops) in food service establishments where food and food products are prepared and served, as a result of the application of chlorpyrifos in microencapsulated form.

(i) Application of a microencapsulated product shall be limited solely

## Environmental Protection Agency

§ 180.345

to spot and/or crack and crevice treatment in food handling establishments where food and food products are prepared and served. All treatments shall be applied in such a manner as to avoid contamination of food or food contact surfaces.

(ii) Spray concentrations shall be limited to a maximum of 0.5 percent of the active ingredient by weight.

(iii) For crack and crevice treatment, equipment capable of delivering a pin stream of spray directly into cracks and crevices or capable of applying small amounts of insecticide into cracks and crevices shall be used.

(iv) For spot treatment, an individual spot shall not exceed 2 square feet.

(v) To assure safe use of the insecticide, its label and labeling shall conform to that registered by the U.S. Environmental Protection Agency, and it shall be used in accordance with such label and labeling.

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* Tolerances with regional registration, as defined in 180.1(l), are established for residues of the pesticide chlorpyrifos *per se* (O,O-diethyl- O-(3,5,6-trichloro-2-pyridyl) phosphorothioate) in or on the following food commodities:

| Commodity       | Parts per million |
|-----------------|-------------------|
| Asparagus ..... | 5.0               |
| Grape .....     | 0.01              |

(d) *Indirect or inadvertent residues.* [Reserved]

[65 FR 33711, May 24, 2000, as amended at 67 FR 49617, July 31, 2002; 71 FR 74817, Dec. 13, 2006; 73 FR 53739, Sept. 17, 2008; 76 FR 56656, Sept. 14, 2011; 86 FR 48336, Aug. 30, 2021; 89 FR 7627, Feb. 5, 2024]

### § 180.345 Ethofumesate; tolerances for residues.

(a) *General.* Tolerance are established for residues of the herbicide ethofumesate, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only the sum of ethofumesate, 2-ethoxy-2,3-dihydro-3,3-dimethyl-5-benzofuranyl methanesulfonate, and its

metabolites 2-hydroxy-2,3-dihydro-3,3-dimethyl-5-benzofuranyl methanesulfonate, and 2,3-dihydro-3,3-dimethyl-2-oxo-5-benzofuranylmethanesulfonate, calculated as the stoichiometric equivalent of ethofumesate, in or on the following food commodities.

| Commodity                     | Parts per million |
|-------------------------------|-------------------|
| Beet, garden, roots .....     | 0.5               |
| Beet, garden, tops .....      | 5.0               |
| Beet, sugar, molasses .....   | 2.0               |
| Beet, sugar, roots .....      | 1.5               |
| Beet, sugar, tops .....       | 4.0               |
| Cattle, fat .....             | 0.05              |
| Cattle, meat .....            | 0.05              |
| Cattle, meat byproducts ..... | 0.05              |
| Garlic .....                  | 0.25              |
| Goat, fat .....               | 0.05              |
| Goat, meat .....              | 0.05              |
| Goat, meat byproducts .....   | 0.05              |
| Grass, straw .....            | 1.0               |
| Horse, fat .....              | 0.05              |
| Horse, meat .....             | 0.05              |
| Horse, meat byproducts .....  | 0.05              |
| Onion, bulb .....             | 0.25              |
| Shallot, bulb .....           | 0.25              |
| Shallot, fresh leaves .....   | 0.25              |
| Sheep, fat .....              | 0.05              |
| Sheep, meat .....             | 0.05              |
| Sheep, meat byproducts .....  | 0.05              |

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* Tolerances with a regional registration, as defined in § 180.1(l) are established for residues of the herbicide ethofumesate, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified is to be determined by measuring only the sum of ethofumesate, 2-ethoxy-2,3-dihydro-3,3-dimethyl-5-benzofuranyl methanesulfonate, and its metabolites 2-hydroxy-2,3-dihydro-3,3-dimethyl-5-benzofuranyl methanesulfonate, and 2,3-dihydro-3,3-dimethyl-2-oxo-5-benzofuranylmethanesulfonate, calculated as the stoichiometric equivalent of ethofumesate, in or on the raw agricultural commodities.

| Commodity           | Parts per million |
|---------------------|-------------------|
| Carrot, roots ..... | 7.0               |

(d) *Indirect or inadvertent residues.* [Reserved]

[63 FR 34828, June 26, 1998, as amended at 71 FR 51516, Aug. 30, 2006; 72 FR 52019, Sept. 12, 2007; 82 FR 57158, Dec. 4, 2017]

**§ 180.349**

**§ 180.349 Fenamiphos; tolerances for residues.**

(a) *General.* Tolerances are established for residues of the nematicide/insecticide fenamiphos, ethyl 3-methyl-4-(methylthio)phenyl 1-(methylethyl)phosphoramidate, including its metabolites and degradates, in or on the commodities in the following table. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only the sum of fenamiphos, ethyl 3-methyl-4-(methylthio)phenyl 1-(methylethyl)phosphoramidate, and its cholinesterase inhibiting metabolites ethyl 3-methyl-4-(methylsulfinyl)phenyl 1-(methylethyl)phosphoramidate and ethyl 3-methyl-4-(methylsulfonyl)phenyl 1-(methylethyl)phosphoramidate, calculated as the stoichiometric equivalent of fenamiphos, in or on the commodity.

| Commodity                        | Parts per million |
|----------------------------------|-------------------|
| Banana <sup>1</sup> .....        | 0.1               |
| Grape <sup>1</sup> .....         | 0.1               |
| Grape, raisin <sup>1</sup> ..... | 0.3               |
| Pineapple <sup>1</sup> .....     | 0.3               |

<sup>1</sup> There are no U.S. registrations as of May 31, 2007.

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[65 FR 33712, May 24, 2000, as amended at 73 FR 53739, Sept. 17, 2008; 75 FR 60243, Sept. 29, 2010]

**§ 180.350 Nitrpyrin; tolerances for residues.**

(a) *General.* Tolerances are established for residues of the nitrification inhibitor nitrpyrin, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only the sum of nitrpyrin (2-chloro-6-(trichloromethyl) pyridine) and its 6-CPA metabolite (6-chloro-picolinic acid), calculated as the stoichiometric equivalent of nitrpyrin, in or on the commodity:

**40 CFR Ch. I (7–1–25 Edition)**

TABLE 1 TO PARAGRAPH (a)

| Commodity                                                    | Parts per million |
|--------------------------------------------------------------|-------------------|
| Almond, hulls .....                                          | 0.06              |

### § 180.355 Bentazon; tolerances for residues.

(a) *General.* (1) Tolerances are established for residues of bentazon, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring for only the sum of bentazon (3-(1-methylethyl)-1*H*-2,1,3-benzothiadiazin-4(3*H*)-one 2,2-dioxide), 6-hydroxy-3-isopropyl-1*H*-2,1,3-benzothiadiazin-4(3*H*)-one 2,2-dioxide, and 8-hydroxy-3-isopropyl-1*H*-2,1,3-benzothiadiazin-4(3*H*)-one 2,2-dioxide calculated as the stoichiometric equivalent of bentazon.

| Commodity                                             | Parts per million |
|-------------------------------------------------------|-------------------|
| Bean, dry, seed .....                                 | 0.05              |
| Bean, succulent .....                                 | 0.5               |
| Corn, field, forage .....                             | 3.0               |
| Corn, field, grain .....                              | 0.05              |
| Corn, field, stover .....                             | 3.0               |
| Corn, pop, grain .....                                | 0.05              |
| Corn, sweet, kernel plus cob with husks removed ..... | 0.05              |
| Cowpea, forage .....                                  | 10.0              |
| Cowpea, hay .....                                     | 3.0               |
| Flax, seed .....                                      | 1.0               |
| Pea, dry, seed .....                                  | 3                 |
| Pea, field, hay .....                                 | 8.0               |
| Pea, field, vines .....                               | 3.0               |
| Pea, succulent .....                                  | 3.0               |

§ 180.361

## § 180.360 Asulam; tolerance for residues.

(a) *General.* Tolerances are established for the combined residues of asulam (methyl sulfanilylcarbamate) and its sulfanilamide containing metabolites in or on the following food commodities:

| Commodity                     | Parts per million |
|-------------------------------|-------------------|
| Cattle, fat .....             | 0.05              |
| Cattle, meat .....            | 0.05              |
| Cattle, meat byproducts ..... | 0.2               |
| Goat, fat .....               | 0.05              |
| Goat, meat .....              | 0.05              |
| Goat, meat byproducts .....   | 0.2               |
| Hog, fat .....                | 0.05              |
| Hog, meat .....               | 0.05              |
| Hog, meat byproducts .....    | 0.2               |
| Horse, fat .....              | 0.05              |
| Horse, meat .....             | 0.05              |
| Horse, meat byproducts .....  | 0.2               |
| Milk .....                    | 0.05              |
| Sheep, fat .....              | 0.05              |
| Sheep, meat .....             | 0.05              |
| Sheep, meat byproducts .....  | 0.2               |
| Sugarcane, cane .....         | 1.0               |
| Sugarcane, molasses .....     | 30                |

## § 180.361 Pendimethalin; tolerances for residues.

(a)(1) *General.* Tolerances are established for residues of the herbicide pendimethalin, including its metabolites and degradates, in or on the commodities. Compliance with the tolerance levels specified in the following table below is to be determined by measuring only the sum of pendimethalin, [N-(1-ethylpropyl)-3,4-dimethyl-2,6-dinitrobenzenamine] and its metabolite, 4-[(1-ethylpropyl)amino]-2-methyl-3,5-dinitrobenzyl alcohol, calculated as the stoichiometric equivalent of pendimethalin, in or on the commodity.

TABLE 1 TO PARAGRAPH (a)(1)

| Commodity             | Parts per million |
|-----------------------|-------------------|
| Alfalfa, forage ..... | 80                |

TABLE 1 TO PARAGRAPH (a)(1)—Continued

| Commodity                                                       | Parts per million |
|-----------------------------------------------------------------|-------------------|
| Alfalfa, hay .....                                              | 150               |
| Alfalfa, seed .....                                             | 0.10              |
| Almond, hulls .....                                             | 6.0               |
| Apple, wet pomace .....                                         | 0.20              |

TABLE 1 TO PARAGRAPH (a)(1)—Continued

| Commodity                           | Parts per million |
|-------------------------------------|-------------------|
| Vegetable, soybean, succulent ..... | 0.10              |
| Wheat, grain .....                  | 0.10              |
| Wheat, forage .....                 | 3.0               |
| Wheat, hay .....                    | 0.60              |
| Wheat, straw .....                  | 0.30              |

(2) Tolerances are established for residues of the herbicide pendimethalin, including its metabolites and degradates, in or on commodities listed in the following table. Compliance with the tolerance levels is to be determined by measuring only the sum of pendimethalin (*N*-(1-ethylpropyl)-3,4-dimethyl-2,6-dinitrobenzenamine) and its metabolite, 1-(1-ethylpropyl)-5, 6-dimethyl-7-nitro-1*H*-benzimidazole (metabolite 6), calculated as the stoichiometric equivalent of pendimethalin, in or on the commodity.

| Commodity                    | Parts per million |
|------------------------------|-------------------|
| Cattle, fat .....            | 0.30              |
| Cattle, meat .....           | 0.10              |
| Cattle, meat byproduct ..... | 3.0               |
| Goats, fat .....             | 0.30              |
| Goats, meat .....            | 0.10              |
| Goats, meat byproduct .....  | 3.0               |
| Horse, fat .....             | 0.30              |
| Horse, meat .....            | 0.10              |
| Horse, byproduct .....       | 3.0               |
| Milk .....                   | 0.04              |
| Sheep, fat .....             | 0.30              |
| Sheep, meat .....            | 0.10              |
| Sheep, meat byproduct .....  | 3.0               |

(b) *Section 18 emergency exemptions.* Time-limited tolerances specified in the following table are established for combined residues of the herbicide pendimethalin, [*N*-(1-ethylpropyl)-3,4-dimethyl-2,6-dinitrobenzenamine], and its metabolite 4-[(1-ethylpropyl)amino]-2-methyl-3,5-dinitrobenzyl alcohol, in or on the specified agricultural commodities, resulting from use of the pesticide pursuant to FIFRA section 18 emergency exemptions. The tolerances expire and are revoked on the date specified in the table.

| Commodity                   | Parts per million | Expiration/revocation date |
|-----------------------------|-------------------|----------------------------|
| Bermuda grass, forage ..... | 25                | 12/31/10                   |
| Bermuda grass, hay .....    | 60                | 12/31/10                   |

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[49 FR 15293, Apr. 18, 1984]

#### § 180.362 Fenbutatin-oxide; tolerances for residues.

(a) *General.* (1) Tolerances are established for residues of the miticide/acaricide fenbutatin-oxide, including its metabolites and degradates, in or on the plant commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only fenbutatin-oxide, hexakis (2-methyl-2-phenylpropyl) distannoxane, in or on the commodity.

| Commodity                     | Parts per million |
|-------------------------------|-------------------|
| Almond, hulls .....           | 80.0              |
| Apple .....                   | 15.0              |
| Apple, wet pomace .....       | 100.0             |
| Cherry, sweet .....           | 6.0               |
| Cherry, tart .....            | 6.0               |
| Citrus, dried pulp .....      | 100.0             |
| Citrus, oil .....             | 140.0             |
| Cucumber .....                | 4.0               |
| Eggplant .....                | 6.0               |
| Fruit, citrus, group 10 ..... | 20.0              |
| Grape .....                   | 5.0               |
| Grape, raisin .....           | 20.0              |
| Nut, tree, group 14 .....     | 0.5               |
| Papaya .....                  | 2.0               |
| Peach .....                   | 10.0              |
| Pear .....                    | 15.0              |
| Pistachio .....               | 0.5               |
| Plum, prune, fresh .....      | 4.0               |
| Plum, prune, dried .....      | 20.0              |
| Strawberry .....              | 10.0              |

(2) Tolerances are established for residues of the miticide/acaricide fenbutatin-oxide, including its metabolites and degradates, in or on the animal commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only the sum of fenbutatin-oxide, hexakis (2-methyl-2-phenylpropyl) distannoxane, and its organotin metabolites, dihydroxybis(2-methyl-2-phenylpropyl) stannane and 2-methyl-

| Poultry, meat .....            | 0.1               |
| Poultry, meat byproducts ..... | 0.1               |
| Sheep, fat .....               | 0.5               |
| Sheep, meat .....              | 0.5               |
| Sheep, meat byproducts .....   | 0.5               |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* A tolerance with regional registration, as defined in §180.1(1), is established for residues of the miticide/acaricide fenbutatin-oxide, including its metabolites and degradates, in or on the plant commodity in the table in this paragraph. Compliance with the tolerance level specified in this paragraph is to be determined by measuring only fenbutatin-oxide, hexakis (2-methyl-2-phenylpropyl) distannoxane, in or on the commodity.

| Commodity       | Parts per million |
|-----------------|-------------------|
| Raspberry ..... | 10.0              |

(d) *Indirect or inadvertent residues.*  
[Reserved]

[65 FR 33713, May 24, 2000, as amended at 72 FR 41930, Aug. 1, 2007; 73 FR 5109, Jan. 29, 2008; 76 FR 23494, Apr. 27, 2011]

### § 180.364 Glyphosate; tolerances for residues.

(a) *General.* (1) Tolerances are established for residues of glyphosate, including its metabolites and degradates, in or on the commodities listed below resulting from the application of glyphosate, the isopropylamine salt of glyphosate, the ethanolamine salt of glyphosate, the dimethylamine salt of

glyphosate, the ammonium salt of glyphosate, and the potassium salt of glyphosate. Compliance with the following tolerance levels is to be determined by measuring only glyphosate (*N*-(phosphonomethyl)glycine).

| Commodity                                                                                                 | Parts per million |
|-----------------------------------------------------------------------------------------------------------|-------------------|

| Vegetable, leaves of root and tuber, group 2, except sugar beet tops .....             | 0.2               |
| Vegetable, legume, group 6 except soybean and dry pea .....                            | 5.0               |
| Vegetables, root and tuber, group 1, except carrot, sweet potato, and sugar beet ..... | 0.20              |
| Wasabi, roots .....                                                                    | 0.2               |
| Water spinach, tops .....                                                              | 0.2               |
| Watercress, upland .....                                                               | 0.2               |
| Wax jambu .....                                                                        | 0.2               |
| Yacon, tuber .....                                                                     | 0.2               |

(2) Tolerances are established for residues of glyphosate, including its metabolites and degradates, in or on the commodities listed below resulting from the application of glyphosate, the isopropylamine salt of glyphosate, the ethanolamine salt of glyphosate, the dimethylamine salt of glyphosate, the ammonium salt of glyphosate, and the potassium salt of glyphosate. Compliance with the following tolerance levels is to be determined by measuring only glyphosate (*N*-(phosphonomethyl)glycine) and its metabolite *N*-acetyl-glyphosate (*N*-acetyl-*N*-(phosphonomethyl)glycine; calculated as the stoichiometric equivalent of glyphosate).

| Commodity                       | Parts per Million |
|---------------------------------|-------------------|
| Canola, seed .....              | 20                |
| Cattle, meat byproducts .....   | 5.0               |
| Corn, field, forage .....       | 13                |
| Corn, field, grain .....        | 5.0               |
| Corn, field, stover .....       | 100               |
| Egg .....                       | 0.05              |
| Goat, meat byproducts .....     | 5.0               |
| Grain aspirated fractions ..... | 310.0             |
| Hog, meat byproducts .....      | 5.0               |
| Horse, meat byproducts .....    | 5.0               |
| Poultry, meat .....             | 0.10              |
| Poultry, meat byproducts .....  | 1.0               |
| Sheep, meat byproducts .....    | 5.0               |
| Soybean, forage .....           | 100.0             |
| Soybean, hay .....              | 200.0             |
| Soybean, hulls .....            | 120.0             |
| Soybean, seed .....             | 20.0              |

# Environmental Protection Agency

§ 180.368

## § 180.367 *n*-Octyl bicycloheptenedicarboximide; tolerances for residues.

(a) *General.* A tolerance of 5 parts per million is established for residues of the insecticide synergist *N*-octyl bicycloheptene dicarboximide, including its metabolites and degradates, in or on all food items in food handling establishments where food and food products are held, processed, prepared and/or served, provided that the food is removed or covered prior to such use, except for bagged food in warehouse storage which need not be removed or covered prior to applications of formulations containing *N*-octyl bicycloheptene dicarboximide. Compliance with the tolerance level specified in this paragraph is to be determined by measuring only *N*-octyl bicycloheptene dicarboximide, in or on the commodity.

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[65 FR 33713, May 24, 2000, as amended at 75 FR 60243, Sept. 29, 2010]

## § 180.368 Metolachlor; tolerances for residues.

(a) *General.* (1) Tolerances are established for the combined residues (free and bound) of the herbicide metolachlor, 2-chloro-*N*-(2-ethyl-6-methylphenyl)-*N*-(2-methoxy-1-methylethyl)acetamide, and its metabolites, determined as the derivatives, 2-[(2-ethyl-6-methylphenyl)amino]-1-propanol and 4-(2-ethyl-6-methylphenyl)-2-hydroxy-5-methyl-3-morpholinone, each expressed as the parent compound in the following raw agricultural commodities:

| Commodity                                              | Parts per million |
|--------------------------------------------------------|-------------------|
| Almond, hulls .....                                    | 0.30              |
| Animal feed, nongrass, group 18 .....                  | 1.0               |
| Cattle, fat .....                                      | 0.02              |
| Cattle, kidney .....                                   | 0.20              |
| Cattle, liver .....                                    | 0.05              |
| Cattle, meat .....                                     | 0.02              |
| Cattle, meat byproducts, except kidney and liver ..... | 0.04              |
| Corn, field, forage .....                              | 6.0               |
| Corn, field, grain .....                               | 0.10              |
| Corn, field, stover .....                              | 6.0               |

| Commodity                                                       | Parts per million |
|-----------------------------------------------------------------|-------------------|
| Corn, pop, grain .....                                          | 0.10              |
| Corn, pop, stover .....                                         | 6.0               |
| Corn, sweet, forage .....                                       | 6.0               |
| Corn, sweet, kernel plus cob with husks removed .....           | 0.10              |
| Corn, sweet, stover .....                                       | 6.0               |
| Cotton, gin byproducts .....                                    | 4.0               |
| Cotton, undelinted seed .....                                   | 0.10              |

(2) Tolerances are established for residues of S-metolachlor, including its metabolites and degradates, in or on the commodity(s), as defined. Compliance with the tolerance levels specified in the following table below is to be determined by measuring only the sum of free and bound S-metolachlor, S-2-chloro-*N*-(2-ethyl-6-methylphenyl)-*N*-(2-methoxy-1-methylethyl)acetamide, its R-enantiomer, and its metabolites, determined as the derivatives, 2-(2-ethyl-6-methylphenyl)amino-1-propanol and 4-(2-ethyl-6-methylphenyl)-2-

hydroxy-5-methyl-3-morpholinone, calculated as the stoichiometric equivalent of S-metolachlor, in or on the commodity.

TABLE 2 TO PARAGRAPH (a)(2)

| Commodity                                                 | Parts per million |
|-----------------------------------------------------------|-------------------|
| Beet, sugar, molasses .....                               | 2.0               |
| Beet, sugar, roots .....                                  | 0.5               |
| Beet, sugar, tops .....                                   | 15.0              |
| <i>Brassica</i> , leafy greens, subgroup 4–16B .....      | 1.8               |
| Bushberry subgroup 13-07B .....                           | 0.15              |
| Caneberry subgroup 13-07A .....                           | 0.10              |
| Carrot, roots .....                                       | 0.40              |
| Cattle, fat .....                                         | 0.02              |
| Cattle, kidney .....                                      | 0.20              |

| Vegetable, root, except sugar beet, subgroup 1B, except carrot .....  | 0.30              |
| Vegetable, tuberous and corm, subgroup 1C .....                       | 0.20              |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* (1) Tolerances with regional registration as defined in 180.1(l) are established for the combined residues (free and bound) of the herbicide metolachlor [2-chloro-*N*-(2-ethyl-6-methylphenyl)-*N*-(2-methoxy-1-methylethyl)acetamide] and its metabolites, determined as the derivatives, 2-[2-ethyl-6-methylphenyl)amino]-1-propanol and 4-(2-ethyl-6-methylphenyl)-2-hydroxy-5-methyl-3-morpholinone, each expressed as the parent compound, in or on the following raw agricultural commodities:

| Commodity             | Parts per million |
|-----------------------|-------------------|
| Pepper, nonbell ..... | 0.50              |

(2) Tolerances with regional registration are established for residues of S-metolachlor, including its metabolites and degradates, in or on the commodities identified in the following table

## Environmental Protection Agency

§ 180.370

below. Compliance with the tolerance levels specified in the following table below is to be determined by measuring only the sum of free and bound S-metolachlor, S-2-chloro-N-(2-ethyl-6-methylphenyl)-N-(2-methoxy-1-methylethyl)acetamide, its R-enantiomer, and its metabolites, determined as the derivatives, 2-(2-ethyl-6-methylphenyl)amino-1-propanol and 4-(2-ethyl-6-methylphenyl)-2-hydroxy-5-methyl-3-morpholinone, calculated as the stoichiometric equivalent of S-metolachlor, in or on the commodity.

| Commodity             | Parts per million |
|-----------------------|-------------------|
| Pepper, tabasco ..... | 0.50              |

(d) *Indirect or inadvertent residues.* (1) Tolerances are established for the indirect or inadvertent combined residues (free and bound) of the herbicide metolachlor, 2-chloro-N-(2-ethyl-6-methylphenyl)-N-(2-methoxy-1-methylethyl)acetamide, and its metabolites, determined as the derivatives, 2-[(2-ethyl-6-methylphenyl)amino]-1-propanol and 4-(2-ethyl-6-methylphenyl)-2-hydroxy-5-methyl-3-morpholinone, each expressed as the parent compound in the following raw agricultural commodities:

| Commodity                             | Parts per million |
|---------------------------------------|-------------------|
| Animal feed, nongrass, group 18 ..... | 1.0               |
| Barley, grain .....                   | 0.10              |
| Barley, hay .....                     | 0.80              |
| Barley, straw .....                   | 0.80              |
| Buckwheat, grain .....                | 0.10              |
| Millet, forage .....                  | 0.50              |
| Millet, grain .....                   | 0.10              |
| Millet, hay .....                     | 0.80              |
| Millet, straw .....                   | 0.80              |
| Oat, forage .....                     | 0.50              |
| Oat, grain .....                      | 0.10              |
| Oat, hay .....                        | 0.80              |
| Oat, straw .....                      | 0.80              |
| Rice, grain .....                     | 0.10              |
| Rye, forage .....                     | 0.50              |
| Rye, grain .....                      | 0.10              |
| Rye, straw .....                      | 0.80              |
| Wheat, forage .....                   | 0.50              |
| Wheat, grain .....                    | 0.10              |
| Wheat, hay .....                      | 0.80              |
| Wheat, straw .....                    | 0.80              |

(2) Tolerances for are established for the indirect or inadvertent residues of S-metolachlor, including its metabolites and degradates, in or on the commodities identified in the following table below. Compliance with the tolerance levels specified in the following

table below is to be determined by measuring only the sum of free and bound S-metolachlor, S-2-chloro-N-(2-ethyl-6-methylphenyl)-N-(2-methoxy-1-methylethyl)acetamide, its R-enantiomer, and its metabolites, determined as the derivatives, 2-(2-ethyl-6-methylphenyl)amino-1-propanol and 4-(2-ethyl-6-methylphenyl)-2-hydroxy-5-methyl-3-morpholinone, calculated as the stoichiometric equivalent of S-metolachlor, in or on the commodity.

| Commodity                             | Parts per million |
|---------------------------------------|-------------------|
| Animal feed, nongrass, group 18 ..... | 1.0               |
| Barley, grain .....                   | 0.10              |
| Barley, hay .....                     | 0.50              |
| Barley, straw .....                   | 0.50              |
| Buckwheat, grain .....                | 0.10              |
| Millet, forage .....                  | 0.50              |
| Millet, grain .....                   | 0.10              |

### § 180.370 5-Ethoxy-3-(trichloromethyl)-1,2,4-thiadiazole; tolerances for residues.

(a) *General.* Tolerances are established for residues of the fungicide 5-ethoxy-3-(trichloromethyl)-1,2,4-thiadiazole and its monoacid metabolite 3-carboxy-5-ethoxy-1,2,4-thiadiazole in or on the following raw agricultural commodities:

| Commodity                     | Parts per million |
|-------------------------------|-------------------|
| Cotton, gin byproducts .....  | 0.1               |
| Cotton, undelinted seed ..... | 0.1               |
| Tomato .....                  | 0.15              |

(b) *Section 18 emergency exemptions.* [Reserved]

**§ 180.371**

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[47 FR 49845, Nov. 3, 1982, as amended at 48 FR 12088, Mar. 23, 1983; 63 FR 57076, Oct. 26, 1998; 72 FR 41931, Aug. 1, 2007; 73 FR 54961, Sept. 24, 2008; 81 FR 34905, June 1, 2016]

**§ 180.371 Thiophanate-methyl; tolerances for residues.**

(a) *General.* Tolerances are established for residues of thiophanate-methyl, dimethyl ((1,2-phenylene) bis(iminocarbonothioyl)) bis(carbamate), including its metabolites and degradates, in or on the commodities in the following table. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only the sum of thiophanate-methyl, dimethyl ((1,2-phenylene) bis(iminocarbonothioyl)) bis(carbamate), and its metabolite, methyl 2-benzimidazolyl carbamate (MBC), calculated as the stoichiometric equivalent of thiophanate-methyl, in or on the commodity.

(d) *Indirect or inadvertent residues.* [Reserved]

[73 FR 54961, Sept. 24, 2008]

**§ 180.373 [Reserved]**

**§ 180.377 Diflubenzuron; tolerances for residues.**

(a) *General.* (1) Tolerances are established for residues of diflubenzuron, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only diflubenzuron (*N*-[[[4-chlorophenyl]amino]carbonyl]-2,6-difluorobenzamide).

|--------------------|-------------------|
| Wheat, grain ..... | 0.06              |
| Wheat, hay .....   | 6.0               |
| Wheat, straw ..... | 3.5               |

(b) *Section 18 emergency exemptions.* Time-limited tolerances are established for residues of the insecticide diflubenzuron (N-[[[(4-chlorophenyl)amino]carbonyl]-2,6-difluorobenzamide) and its metabolites, in connection with use of the pesticide under section 18 emergency exemptions granted by EPA. Compliance with the tolerance levels specified below is to be determined by measuring only the sum of diflubenzuron (N-[[[(4-chlorophenyl)amino]carbonyl]-2,6-difluorobenzamide), 4-chlorophenylyurea and 4-chloroaniline, calculated as the stoichiometric equivalent of diflubenzuron, in or on the commodity. The tolerances are specified in the following table, and will expire and are revoked on the dates specified.

| Commodity             | Parts per million | Expiration/revocation date |
|-----------------------|-------------------|----------------------------|
| Alfalfa, forage ..... | 6.0               | 12/31/17                   |
| Alfalfa, hay .....    | 6.0               | 12/31/17                   |
| Lemon .....           | 0.8               | 12/31/10                   |

(c) *Tolerances with regional registrations.* Tolerances with regional registration are established for residues of the insecticide diflubenzuron (N-[[[(4-chlorophenyl)amino]carbonyl]-2,6-difluorobenzamide), in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only the sum of diflubenzuron (N-[[[(4-chlorophenyl)amino]carbonyl]-2,6-difluorobenzamide), 4-chlorophenylyurea and 4-chloroaniline, calculated as the stoichiometric equivalent of diflubenzuron, in or on the commodity.

| Commodity             | Parts per million |
|-----------------------|-------------------|
| Alfalfa, forage ..... | 6.0               |
| Alfalfa, hay .....    | 20                |
| Alfalfa, seed .....   | 0.90              |

(d) *Indirect or inadvertent residues.* [Reserved]

## § 180.378

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 180.377, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at [www.govinfo.gov](http://www.govinfo.gov).

### § 180.378 Permethrin; tolerances for residues.

(a) *General.* Tolerances are established for residues of permethrin, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only permethrin [(3-phenoxyphenyl)methyl 3-(2,2-dichloroethenyl)-2,2-dimethylcyclopropanecarboxylate], as the sum of its *cis*- and *trans*- isomers in or on the commodity.

| Commodity                                             | Parts per million |
|-------------------------------------------------------|-------------------|
| Alfalfa, forage .....                                 | 20                |
| Alfalfa, hay .....                                    | 45                |
| Almond .....                                          | 0.05              |

<sup>1</sup>There are no United States registrations for use of permethrin on tea, plucked leaves as of July 28, 2020.

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) Tolerances with regional registrations. Tolerances with regional registrations, as defined in § 180.1(l), are established for residues of permethrin, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only permethrin [(3-phenoxyphenyl)methyl 3-(2,2-dichloroethenyl)-2,2-dimethylcyclopropanecarboxylate], as the sum of its *cis*- and *trans*- isomers in or on the commodity.

| Commodity                                                                  | Parts per million |
|----------------------------------------------------------------------------|-------------------|
| Collards .....                                                             | 15                |
| Fruit, small, vine climbing, except fuzzy kiwifruit, subgroup 13-07F ..... | 2                 |
| Grass, forage .....                                                        | 15                |
| Grass, hay .....                                                           | 15                |
| Papaya .....                                                               | 1.0               |

| Sheep, meat .....              | 0.05              | 11/30/08                   |
| Sheep, meat byproducts .....   | 0.05              | 11/30/08                   |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.*  
[Reserved]

(e) *Revoked tolerances subject to the channel of trade provisions.* The following table lists commodities with residues of vinclozolin resulting from lawful use are subject to the channels of trade provisions of section 408(l)(5) of the FFDCA:

| Commodity                                     | Parts per million |
|-----------------------------------------------|-------------------|
| Cucumber .....                                | 1.0               |
| Fruit, stone, except plum, prune, fresh ..... | 25.0              |
| Pepper, bell .....                            | 3.0               |
| Strawberry .....                              | 10.0              |

[62 FR 38474, July 18, 1997, as amended at 63 FR 7308, Feb. 13, 1998; 65 FR 44468, July 18, 2000; 67 FR 40189, June 12, 2002; 68 FR 56189, Sept. 30, 2003; 68 FR 69323, Dec. 12, 2003; 70 FR 55268, Sept. 21, 2005]

### § 180.381 Oxyfluorfen; tolerances for residues.

(a) *General.* Tolerances are established for residues of the herbicide oxyfluorfen [2-chloro-1-(3-ethoxy-4-nitrophenoxy)-4-

(trifluoromethyl)benzene] in or on the following food commodities:

| Commodity                      | Parts per million |
|--------------------------------|-------------------|
| Almond, hulls .....            | 0.1               |
| Artichoke, globe .....         | 0.05              |
| Avocado .....                  | 0.05              |
| Banana .....                   | 0.05              |
| Broccoli .....                 | 0.05              |
| Cabbage .....                  | 0.05              |
| Cacao bean, dried bean .....   | 0.05              |
| Cattle, fat .....              | 0.01              |
| Cattle, meat .....             | 0.01              |
| Cattle, meat byproducts .....  | 0.01              |
| Cauliflower .....              | 0.05              |
| Coffee, bean, green .....      | 0.05              |
| Corn, field, grain .....       | 0.05              |
| Cotton, undelinted seed .....  | 0.05              |
| Date, dried fruit .....        | 0.05              |
| Egg .....                      | 0.03              |
| Feijoa .....                   | 0.05              |
| Fig .....                      | 0.05              |
| Fruit, pome, group 11 .....    | 0.05              |
| Fruit, stone, group 12 .....   | 0.05              |
| Goat, fat .....                | 0.01              |
| Goat, meat .....               | 0.01              |
| Goat, meat byproducts .....    | 0.01              |
| Grape .....                    | 0.05              |
| Hog, fat .....                 | 0.01              |
| Hog, meat .....                | 0.01              |
| Hog, meat byproducts .....     | 0.01              |
| Horse, fat .....               | 0.01              |
| Horse, meat .....              | 0.01              |
| Horse, meat byproducts .....   | 0.01              |
| Horseradish .....              | 0.05              |
| Kiwifruit .....                | 0.05              |
| Milk .....                     | 0.01              |
| Nut, tree, group 14 .....      | 0.05              |
| Olive .....                    | 0.05              |
| Onion, bulb .....              | 0.05              |
| Peppermint, tops .....         | 0.05              |
| Persimmon .....                | 0.05              |
| Pistachio .....                | 0.05              |
| Pomegranate .....              | 0.05              |
| Poultry, fat .....             | 0.2               |
| Poultry, meat .....            | 0.01              |
| Poultry, meat byproducts ..... | 0.01              |
| Sheep, fat .....               | 0.01              |
| Sheep, meat .....              | 0.01              |
| Sheep, meat byproducts .....   | 0.01              |
| Soybean .....                  | 0.05              |
| Spearmint, tops .....          | 0.05              |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registration.* Tolerances with regional registration are established for residues of the herbicide oxyfluorfen [2-chloro-1-(3-ethoxy-4-nitrophenoxy)-4-(trifluoromethyl)benzene] in or on the following food commodities:

| Commodity                    | Parts per million |
|------------------------------|-------------------|
| Blackberry .....             | 0.05              |
| Chickpea, seed .....         | 0.05              |
| Grass, forage .....          | 0.05              |
| Grass, hay .....             | 0.05              |
| Grass, seed screenings ..... | 0.05              |

**§ 180.383**

| Commodity          | Parts per million |
|--------------------|-------------------|
| Guava .....        | 0.05              |
| Papaya .....       | 0.05              |
| Raspberry .....    | 0.05              |
| Taro, corm .....   | 0.05              |
| Taro, leaves ..... | 0.05              |

(d) *Indirect or inadvertent residues.*  
[Reserved]

[45 FR 85022, Dec. 24, 1980]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 180.381, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at [www.govinfo.gov](http://www.govinfo.gov).

**§ 180.383 Sodium salt of acifluorfen; tolerances for residues.**

(a) *General.* Tolerances are established for combined residues of the herbicide sodium salt of acifluorfen, sodium 5-[2-chloro-4-(trifluoromethyl)phenoxy]-2-nitrobenzoate, and its metabolites (the corresponding acid, methyl ester, and amino analogues) in or on the following raw agricultural commodities:

TABLE 1 TO PARAGRAPH (a)

| Commodity                                   | Parts per million |
|---------------------------------------------|-------------------|
| Berry, low growing, subgroup 13–07G .....   | 0.1               |
| Peanut .....                                | 0.1               |
| Rice, grain .....                           | 0.1               |
| Soybean, seed .....                         | 0.1               |
| Soybean, vegetable, edible podded .....     | 0.09              |
| Soybean, vegetable, succulent shelled ..... | 0.09              |

(b) *Section 18 emergency exemptions.* Time-limited tolerances are established for residues of the herbicide sodium salt of acifluorfen, including its metabolites and degradates, in or on the specified agricultural commodities in the following table, resulting from use of the pesticide pursuant to FIFRA section 18 emergency exemptions. Compliance with the tolerance levels specified in the following table is to be determined by measuring only the sum of acifluorfen acid, (5-[2-chloro-4-(trifluoromethyl)phenoxy]-2-nitrobenzoate), acifluorfen amine methyl ester (methyl 5-[2-chloro-4-(trifluoromethyl)phenoxy]-2-aminobenzoate), calculated as the stoichiometric equivalent of acifluorfen acid in or on the commodities. The tol-

**40 CFR Ch. I (7–1–25 Edition)**

erances expire on the date specified in the table.

TABLE 2 TO PARAGRAPH (b)

| Commodity                 | Parts per million | Expiration date |
|---------------------------|-------------------|-----------------|
| Beet, sugar, roots .....  | 0.1               | 12/31/2027      |
| Beet, sugar, leaves ..... | 0.1               | 12/31/2027      |

(c) *Tolerances with regional restrictions.* [Reserved]

(d) *Indirect or inadvertent residues.*  
[Reserved]

[45 FR 24877, Apr. 11, 1980, as amended at 46 FR 61272, Dec. 16, 1981; 47 FR 39490, Sept. 8, 1982; 61 FR 30165, June 14, 1996; 62 FR 39974, July 25, 1997; 67 FR 35048, May 17, 2002; 69 FR 6567, Feb. 11, 2004; 71 FR 54434, Sept. 15, 2006; 80 FR 72598, Nov. 20, 2015; 87 FR 18722, Mar. 31, 2022; 88 FR 48388, July 27, 2023; 89 FR 85069, Oct. 25, 2024]

**§ 180.384 Mepiquat (N,N-dimethylpiperidinium); tolerances for residues.**

(a) *General.* Tolerances are established for residues of the plant growth regulator mepiquat, including its metabolites and degradates, in or on the commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only mepiquat, N,N-dimethylpiperidinium, in or on the commodity.

| Commodity                     | Parts per million |
|-------------------------------|-------------------|
| Cattle, meat byproducts ..... | 0.1               |
| Cotton, gin byproducts .....  | 6.0               |
| Cotton, undelinted seed ..... | 2.0               |
| Goat, meat byproducts .....   | 0.1               |
| Grape .....                   | 1.0               |

### § 180.390 Tebuthiuron; tolerances for residues.

(a) *General.* (1) Tolerances are established for the combined residues of the herbicide tebuthiuron (N-(5-(1,1-dimethylethyl)-1,3,4-thiadiazol-2-yl)-N,N'-dimethylurea) and its metabolites N-(5-(2-hydroxy-1,1-dimethylethyl)-1,3,4-thiadiazol-2-yl)-N,N'-dimethylurea, N-(5-(1,1-dimethylethyl)-1,3,4-thiadiazol-2-yl)-N-methylurea, and N-(5-(1,1-dimethylethyl)-1,3,4-thiadiazol-2-yl)-N'-hydroxymethyl-N-methylurea in or on the following raw agricultural commodities:

| Commodity           | Parts per million |
|---------------------|-------------------|
| Grass, forage ..... | 10.0              |
| Grass, hay .....    | 10.0              |

(2) Tolerances are established for the combined residues of the herbicide tebuthiuron (N-(5-(1,1-dimethylethyl)-1,3,4-thiadiazol-2-yl)-N,N'-dimethylurea) and its metabolites N-(5-(1,1-dimethylethyl)-1,3,4-thiadiazol-2-yl)-N-methylurea, N-(5-(1,1-dimethylethyl)-1,3,4-thiadiazol-2-yl)urea, 2-(dimethylethyl-5-amino-1,3,4-thiadiazole, and N-(5-(1,1-dimethylethyl)-1,3,4-thiadiazol-2-yl)-N'-

hydroxymethyl-N-methylurea in or on the following raw agricultural commodities:

| Commodity                     | Parts per million |
|-------------------------------|-------------------|
| Cattle, fat .....             | 1.0               |
| Cattle, meat .....            | 1.0               |
| Cattle, meat byproducts ..... | 5.0               |
| Goat, fat .....               | 1.0               |
| Goat, meat .....              | 1.0               |
| Goat, meat byproducts .....   | 5.0               |
| Horse, fat .....              | 1.0               |
| Horse, meat .....             | 1.0               |
| Horse, meat byproducts .....  | 5.0               |
| Sheep, fat .....              | 1.0               |
| Sheep, meat .....             | 1.0               |
| Sheep, meat byproducts .....  | 5.0               |

(3) A tolerance is established for the combined residues of the herbicide tebuthiuron (N-(5-(1,1-dimethylethyl)-1,3,4-thiadiazol-2-yl)-N,N'-dimethylurea) and its metabolites N-(5-(1,1-dimethylethyl)-1,3,4-thiadiazol-2-yl)-N-methylurea, N-(5-(2-hydroxy-1,1-dimethylethyl)-1,3,4-thiadiazol-2-yl)-N-methylurea, N-(5-(1,1-dimethylethyl)-1,3,4-thiadiazol-2-yl)urea, N-(5-(1,1-dimethylethyl)-1,3,4-thiadiazol-2-yl)-N'-hydroxymethyl-N-methylurea, and N-(5-(2-hydroxy-1,1-dimethylethyl)-1,3,4-thiadiazol-2-yl)-N'-hydroxymethyl-N-methylurea in or on the following raw agricultural commodities:

§ 180.396 Hexazinone; tolerances for residues.

(a) *General.* (1) Tolerances are established for residues of the herbicide hexazinone, 3-cyclohexyl-6-(dimethylamino)-1-methyl-1,3,5-triazine-2,4-(1*H*, 3*H*)-dione, including its metabolites and degradates, in or on the commodities in the following table. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only the sum of hexazinone, 3-cyclohexyl-6-(dimethylamino)-1-methyl-1,3,5-triazine-2,4-(1*H*, 3*H*)-dione, and its plant metabolites: metabolite A, 3-(4-hydroxycyclohexyl)-6-(dimethylamino)-1-methyl-1,3,5-triazine-2,4-(1*H*, 3*H*)-dione, metabolite B, 3-cyclohexyl-6-(methylamino)-1-methyl-1,3,5-triazine-2,4-(1*H*, 3*H*)-dione, metabolite C, 3-(4-hydroxycyclohexyl)-6-(methylamino)-1-methyl-1,3,5-triazine-2,4-(1*H*, 3*H*)-dione, metabolite D, 3-cyclohexyl-1-methyl-1,3,5-triazine-2,4,6-(1*H*, 3*H*, 5*H*)-trione, and metabolite E, 3-(4-hydroxycyclohexyl)-1-methyl-1,3,5-triazine-2,4,6-(1*H*, 3*H*, 5*H*)-trione, calculated as the stoichiometric equivalent of hexazinone, in or on the commodity.

| Commodity                 | Parts per million |
|---------------------------|-------------------|
| Alfalfa, forage .....     | 2.0               |

| Blueberry .....           | 0.6               |
| Grass, forage .....       | 250               |
| Grass, hay .....          | 230               |
| Pineapple .....           | 0.6               |
| Sugarcane, cane .....     | 0.6               |
| Sugarcane, molasses ..... | 4.0               |

(2) Tolerances are established for residues of the herbicide hexazinone, 3-cyclohexyl-6-(dimethylamino)-1-methyl-1,3,5-triazine-2,4-(1*H*, 3*H*)-dione, including its metabolites and degradates, in or on the commodities in the following table. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only the sum of hexazinone, 3-cyclohexyl-6-(dimethylamino)-1-methyl-1,3,5-triazine-2,4-(1*H*, 3*H*)-dione, and its animal tissue metabolites: metabolite B, 3-cyclohexyl-6-(methylamino)-1-methyl-1,3,5-triazine-2,4-(1*H*, 3*H*)-dione, and metabolite F, 3-cyclohexyl-6-amino-1-methyl-1,3,5-triazine-2,4-(1*H*, 3*H*)-dione, calculated as the stoichiometric equivalent of hexazinone, in or on the commodity.

| Commodity                     | Parts per million |
|-------------------------------|-------------------|
| Cattle, fat .....             | 0.1               |
| Cattle, meat .....            | 0.5               |
| Cattle, meat byproducts ..... | 4.0               |
| Goat, fat .....               | 0.1               |
| Goat, meat .....              | 0.5               |
| Goat, meat byproducts .....   | 4.0               |
| Hog, fat .....                | 0.1               |
| Hog, meat .....               | 0.5               |
| Hog, meat byproducts .....    | 4.0               |
| Horse, fat .....              | 0.1               |
| Horse, meat .....             | 0.5               |
| Horse, meat byproducts .....  | 4.0               |
| Sheep, fat .....              | 0.1               |
| Sheep, meat .....             | 0.5               |
| Sheep, meat byproducts .....  | 4.0               |

(3) A tolerance is established for residues of the herbicide hexazinone, 3-cyclohexyl-6-(dimethylamino)-1-methyl-1,3,5-triazine-2,4-(1*H*, 3*H*)-dione, including its metabolites and degradates, in or on the commodity in the following table. Compliance with the tolerance level specified in this paragraph is to be determined by measuring only the sum of hexazinone, 3-cyclohexyl-6-(dimethylamino)-1-methyl-1,3,5-triazine-2,4-(1*H*, 3*H*)-dione, and its metabolites: metabolite B, 3-cyclohexyl-6-(methylamino)-1-methyl-1,3,5-triazine-2,4-(1*H*, 3*H*)-dione, metabolite C, 3-(4-hydroxycyclohexyl)-6-(methylamino)-1-methyl-1,3,5-triazine-2,4-(1*H*, 3*H*)-dione, metabolite C-2, 3-(3-hydroxycyclohexyl)-6-(methylamino)-1-methyl-1,3,5-triazine-2,4-(1*H*, 3*H*)-dione, and metabolite F, 3-cyclohexyl-6-amino-1-methyl-1,3,5-triazine-2,4-(1*H*,

| Sheep, fat .....                                       | 0.5               |
| Sheep, kidney .....                                    | 3.0               |
| Sheep, liver .....                                     | 3.0               |
| Sheep, meat .....                                      | 0.5               |
| Sheep, meat byproducts, except kidney and liver .....  | 0.5               |

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* Tolerances with regional registration, as defined in §180.1(1), are established for the combined residues of the fungicide iprodione [3-(3,5-dichlorophenyl)-N-(1-methylethyl)-2,4-dioxo-1-imidazolidinecarboxamide], its

## § 180.401

isomer [3-(1-methylethyl)-N-(3,5-dichlorophenyl)-2,4-dioxo-1-imidazolidinecarboxamide], and its metabolite [3-(3,5-dichlorophenyl)-2,4-dioxo-1-imidazolidinecarboxamide] in or on the following food commodity:

| Commodity            | Parts per million |
|----------------------|-------------------|
| Mustard greens ..... | 15.0              |

(d) *Indirect or inadvertent residues.*  
[Reserved]

[48 FR 40385, Sept. 7, 1983]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 180.399, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at [www.govinfo.gov](http://www.govinfo.gov).

## § 180.401 Thiobencarb; tolerances for residues.

(a) *General.* Tolerances are established for the combined residues of the herbicide thiobencarb (S-[4-chlorophenyl)methyl]diethylcarbamothioate) and its chlorobenzyl and chlorophenyl moiety-containing metabolites in or on the following raw agricultural commodities:

| Commodity                      | Part per million |
|--------------------------------|------------------|
| Cattle, fat .....              | 0.2              |
| Cattle, meat byproducts .....  | 0.2              |
| Cattle, meat .....             | 0.2              |
| Egg .....                      | 0.2              |
| Goat, fat .....                | 0.2              |
| Goat, meat byproducts .....    | 0.2              |
| Goat, meat .....               | 0.2              |
| Hog, fat .....                 | 0.2              |
| Hog, meat byproducts .....     | 0.2              |
| Hog, meat .....                | 0.2              |
| Horse, fat .....               | 0.2              |
| Horse, meat byproducts .....   | 0.2              |
| Horse, meat .....              | 0.2              |
| Milk .....                     | 0.05             |
| Poultry, fat .....             | 0.2              |
| Poultry, meat byproducts ..... | 0.2              |
| Poultry, meat .....            | 0.2              |
| Rice, grain .....              | 0.2              |
| Sheep, fat .....               | 0.2              |
| Sheep, meat byproducts .....   | 0.2              |
| Sheep, meat .....              | 0.2              |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* Tolerances with regional registration, as defined in § 180.1(l), are established for residues of the herbicide thiobencarb (S-[4-chlorophenyl)methyl]diethylcarbamothioate) and its chlorobenzyl and chlorophenyl

### **§ 180.405 Chlorsulfuron; tolerances for residues.**

(a) *General.* (1) Tolerances are established for the combined residues of chlorsulfuron (2-chloro-*N*-[(4-methoxy-6-methyl-1,3,5-triazin-2-yl)aminocarbonyl]benzenesulfonamide) and its metabolite, 2-chloro-5-hydroxy-*N*-[(4-methoxy-6-methyl-1,3,5-triazin-2-yl)aminocarbonyl] benzenesulfonamide in or on the following raw agricultural commodities:

| Commodity           | Parts per million |
|---------------------|-------------------|
| Barley, grain ..... | 0.1               |
| Barley, straw ..... | 0.5               |
| Oat, forage .....   | 20.0              |
| Oat, grain .....    | 0.1               |
| Oat, straw .....    | 0.5               |
| Wheat, forage ..... | 20.0              |
| Wheat, grain .....  | 0.1               |
| Wheat, straw .....  | 0.5               |

(2) Tolerances are established for residues of chlorsulfuron (2-chloro-*N*-[(4-methoxy-6-methyl-1,3,5-triazin-2-yl)aminocarbonyl] benzenesulfonamide) in or on the following raw agricultural commodities.

| Commodity                     | Parts per million |
|-------------------------------|-------------------|
| Cattle, fat .....             | 0.3               |
| Cattle, meat .....            | 0.3               |
| Cattle, meat byproducts ..... | 0.3               |
| Goat, fat .....               | 0.3               |

| Commodity                    | Parts per million |
|------------------------------|-------------------|
| Goat, meat .....             | 0.3               |
| Goat, meat byproducts .....  | 0.3               |
| Grass, forage .....          | 11.0              |
| Grass, hay .....             | 19.0              |
| Hog, fat .....               | 0.3               |
| Hog, meat .....              | 0.3               |
| Hog, meat byproducts .....   | 0.3               |

# Environmental Protection Agency

# § 180.410

TABLE 1 TO PARAGRAPH (a)—Continued

| Commodity    | Parts per million |
|--------------|-------------------|
| Walnut ..... | 0.5               |

<sup>1</sup> There are no U.S. registrations for use of this pesticide on this commodity as of September 24, 2021.

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* Tolerances with regional registration (refer to §180.1(m)) are established for the combined residues of the fungicide metalaxyl [*N*-(2,6-dimethylphenyl)-*N*-(methoxyacetyl) alanine methyl ester] and its metabolites containing the 2,6-dimethylaniline moiety, and *N*-(2-hydroxy methyl-6-methyl)-*N*-(methoxyacetyl)-alanine methylester, each expressed as metalaxyl, in or on the following raw agricultural commodity:

| Commodity    | Parts per million |
|--------------|-------------------|
| Papaya ..... | 0.1               |

(d) *Indirect or inadvertent tolerances.* Tolerances are established for indirect or inadvertent residues of metalaxyl in or on the food commodities when present therein as a result of the application of metalaxyl to growing crops listed in paragraph (a) of this section and other non-food crops to read as follows:

| Commodity                                                                                      | Part per million |
|------------------------------------------------------------------------------------------------|------------------|
| Barley, bran .....                                                                             | 1.0              |
| Barley, flour .....                                                                            | 1.0              |
| Barley, grain .....                                                                            | 0.2              |
| Barley, pearled barley .....                                                                   | 1.0              |
| Barley, straw .....                                                                            | 2.0              |
| Grain, cereal, forage, fodder and straw, group 16, except barley, oat, and wheat; forage ..... | 1.0              |
| Grain, cereal, forage, fodder and straw, group 16, except barley, oat, and wheat; stover ..... | 1.0              |
| Grain, cereal, forage, fodder and straw, group 16, except barley, oat, and wheat; straw .....  | 1.0              |
| Oat, flour .....                                                                               | 1.0              |
| Oat, forage .....                                                                              | 2.0              |
| Oat, grain .....                                                                               | 0.2              |
| Oat, groats, rolled oats .....                                                                 | 1.0              |
| Oat, straw .....                                                                               | 2.0              |
| Wheat, bran .....                                                                              | 1.0              |
| Wheat, flour .....                                                                             | 1.0              |
| Wheat, forage .....                                                                            | 2.0              |
| Wheat, germ .....                                                                              | 1.0              |
| Wheat, grain .....                                                                             | 0.2              |
| Wheat, middlings .....                                                                         | 1.0              |
| Wheat, shorts .....                                                                            | 1.0              |
| Wheat, straw .....                                                                             | 2.0              |

[65 FR 33700, May 24, 2000, as amended at 72 FR 35666, June 29, 2007; 74 FR 46374, Sept. 9, 2009; 75 FR 56015, Sept. 15, 2010; 86 FR 53009, Sept. 24, 2021]

## § 180.409 Pirimiphos-methyl; tolerances for residues.

(a) *General.* Tolerances are established for residues of the insecticide pirimiphos-methyl (O-(2-diethylamino-6-methyl-4-pyrimidinyl) O,O-dimethyl phosphorothioate) in or on the following raw agricultural commodities:

| Commodity                        | Parts per million |
|----------------------------------|-------------------|
| Cattle, fat .....                | 0.02              |
| Cattle, meat byproducts .....    | 0.02              |
| Corn, field, grain .....         | 8.0               |
| Corn, pop, grain .....           | 8.0               |
| Goat, fat .....                  | 0.02              |
| Goat, meat byproducts .....      | 0.02              |
| Grain, aspirated fractions ..... | 20.0              |
| Hog, fat .....                   | 0.02              |
| Hog, meat byproducts .....       | 0.02              |
| Horse, fat .....                 | 0.02              |
| Horse, meat byproducts .....     | 0.02              |
| Poultry, fat .....               | 0.02              |
| Sheep, fat .....                 | 0.02              |
| Sheep, meat byproducts .....     | 0.02              |
| Sorghum, grain, grain .....      | 8.0               |

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[65 FR 33714, May 24, 2000, as amended at 67 FR 41807, June 19, 2002; 67 FR 49617, July 31, 2002; 70 FR 44492, Aug. 3, 2005; 72 FR 53462, Sept. 19, 2007]

## § 180.410 Triadimefon; tolerances for residues.

(a) *General.* Tolerances are established for the combined residues of the fungicide triadimefon, 1-(4-chlorophenoxy)-3,3-dimethyl-1-(1*H*-1,2,4-triazol-1-yl)-2-butanone, and triadimenol, β-(4-chlorophenoxy)-α-(1,1-dimethylethyl)-1*H*-1,2,4-triazole-1-ethanol, expressed as triadimefon, in or on the following food commodities:

| Commodity       | Parts per million | Expiration/Revocation Date |
|-----------------|-------------------|----------------------------|
| Pineapple ..... | 2.0               | None                       |

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

§ 180.411

40 CFR Ch. I (7–1–25 Edition)

(d) *Indirect or inadvertent residues.*  
[Reserved]

[73 FR 54962, Sept. 24, 2008, as amended at 76 FR 34885, June 15, 2011]

§ 180.411 **Fluazifop-P-butyl; tolerances for residues.**

(a) *General.* Tolerances are established for residues of the herbicide fluazifop-P-butyl, butyl (2*R*)-2-[4-[[5-(trifluoromethyl)-2-pyridinyl]oxy]phenoxy]propanoate, including its metabolites and degradates, in or on the commodities in table 1 to this paragraph (a). Compliance with the tolerance levels specified in table 1 is to be determined by measuring only those fluazifop-P-butyl residues convertible to fluazifop, 2-[4-[[5-(trifluoromethyl)-2-pyridinyl]oxy]phenoxy]propanoic acid, expressed as fluazifop, in or on the commodity”.

TABLE 1 TO PARAGRAPH (a)

| Commodity                                                                 | Parts per million |
|---------------------------------------------------------------------------|-------------------|
| Banana .....                                                              | 0.01              |
| Beans, dry, seed .....                                                    | 50                |
| Beet, sugar, dried pulp .....                                             | 1.0               |
| Beet, sugar, molasses .....                                               | 3.5               |
| Beet, sugar, roots .....                                                  | 0.25              |
| Berry, low growing, subgroup 13–07G .....                                 | 3                 |

<sup>1</sup>No U.S. registrations.

<sup>2</sup>This tolerance expires on June 26, 2023.

(b) [Reserved]

(c) *Tolerances with regional registrations.* Tolerances are established for residues of the herbicide fluazifop-P-butyl, butyl (2*R*)-2-[4-[[5-(trifluoromethyl)-2-pyridinyl]oxy]phenoxy]propanoate, including its metabolites and degradates, in or on the commodities in table 2 to this paragraph (c). Compliance with the tolerance levels specified in table 2 is to be determined by measuring only those fluazifop-P-butyl residues convertible to fluazifop, 2-[4-[[5-(trifluoromethyl)-2-pyridinyl]oxy]phenoxy]propanoic acid, expressed as fluazifop, in or on the commodity”.

TABLE 2 TO PARAGRAPH (c)

| Commodity             | Parts per million |
|-----------------------|-------------------|
| Asparagus .....       | 3.0               |

| Fescue, hay .....     | 15                |
| Pepper, tabasco ..... | 1.0               |

(d) *Indirect or inadvertent residues.* Tolerances are established for residues of the herbicide fluazifop-P-butyl, butyl (2*R*)-2-[4-[[5-(trifluoromethyl)-2-pyridinyl]oxy]phenoxy]propanoate, including its metabolites and degradates, in or on the commodities in table 3 to this paragraph (d). Compliance with

# Environmental Protection Agency

§ 180.412

the tolerance levels specified in table 3 is to be determined by measuring only those fluazifop-P-butyl residues convertible to 5-trifluoromethyl-2-pyridinone (TFP), expressed as TFP, in or on the commodity.

[88 FR 25506, Apr. 27, 2023]

## § 180.412 Sethoxydim; tolerances for residues.

(a) Tolerances are established for the herbicide sethoxydim, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only the sum of the herbicide 2-[1-(ethoxymino)butyl]-5-[2-(ethylthio)propyl]-3-hydroxy-2-cyclohexen-1-one (CAS Reg. No. 74051-80-2) and its metabolites containing the 2-cyclohexen-1-one moiety, calculated as the stoichiometric equivalent of sethoxydim, in or on the commodity.

TABLE 1 TO PARAGRAPH (a)

| Commodity                                                    | Parts per million |

§ 180.413

40 CFR Ch. I (7–1–25 Edition)

TABLE 1 TO PARAGRAPH (a)—Continued

| Commodity                                        | Parts per<br>million |
|--------------------------------------------------|----------------------|
| Sheep, fat .....                                 | 0.2                  |
| Sheep, meat .....                                | 0.2                  |
| Sheep, meat byproducts .....                     | 1.0                  |
| Soybean, hay .....                               | 10                   |
| Soybean, seed .....                              | 16                   |
| Spearmint, tops .....                            | 30                   |
| Strawberry .....                                 | 10                   |
| Stokes aster, meal .....                         | 20                   |
| Sunflower, meal .....                            | 20                   |
| Sunflower subgroup 20B, except safflower .....   | 7.0                  |
| Sweet rocket, meal .....                         | 40                   |
| Tallowwood, meal .....                           | 20                   |
| Tea oil plant, meal .....                        | 20                   |
| Turnip, tops .....                               | 5.0                  |
| Vegetable, brassica, leafy, group 5 .....        | 5.0                  |
| Vegetable, bulb, group 3–07 .....                | 1.0                  |
| Vegetable, cucurbit, group 9 .....               | 4.0                  |
| Vegetable, fruiting, group 8–10 .....            | 4.0                  |
| Vegetable, leafy, except brassica, group 4 ..... | 4.0                  |
| Vegetable, root and tuber, group 1 .....         | 4.0                  |
| Vernonia, meal .....                             | 20                   |

<sup>1</sup> The individual tolerances for Juneberry, Lingonberry, and Salal expire on December 15, 2015.

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registration.* Tolerances are established for the herbicide sethoxydim, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only the sum of the herbicide 2-[1-(ethoxymino)butyl]-5-[2-(ethylthio)propyl]-3-hydroxy-2-cyclohexen-1-one) and its metabolites containing the 2-cyclohexen-1-one moiety, calculated as the stoichiometric equivalent of sethoxydim, in or on the commodity.

| Commodity              | Parts per<br>million |
|------------------------|----------------------|
| Artichoke, globe ..... | 5.0                  |
| Fescue, forage .....   | 7.0                  |
| Fescue, hay .....      | 4.0                  |
| Rhubarb .....          | 0.3                  |

(d) *Indirect and inadvertent residues.* [Reserved]

[80 FR 34077, June 15, 2015, as amended at 85 FR 78002, Dec. 3, 2020]

§ 180.413 Imazalil; tolerances for residues.

(a) *General.* (1) Tolerances are established for the combined residues of the fungicide imazalil, 1-[2-(2,4-dichlorophenyl)-2-(2-propenyloxy)ethyl]-1*H*-imidazole, and its metabolite, 1-(2,4-dichlorophenyl)-2-

(1*H*-imidazole-1-yl)-1-ethanol, in or on the following food commodities:

| Commodity                        | Parts per<br>million |
|----------------------------------|----------------------|
| Banana .....                     | 3.0                  |
| Barley, grain .....              | 0.1                  |
| Barley, hay .....                | 0.5                  |
| Barley, straw .....              | 0.5                  |
| Citrus, dried pulp .....         | 25.0                 |
| Citrus, oil .....                | 200.0                |
| Fruit, citrus, postharvest ..... | 10.0                 |
| Wheat, forage .....              | 0.5                  |
| Wheat, grain .....               | 0.1                  |
| Wheat, hay .....                 | 0.5                  |
| Wheat, straw .....               | 0.5                  |

(2) Tolerances are established for the combined residues of the fungicide imazalil, 1-[2-(2,4-dichlorophenyl)-2-(2-propenyloxy)ethyl]-1*H*-imidazole, and its metabolites, 3-[2-(2,4-dichlorophenyl)-2-(2,3-dihydroxypropoxy)ethyl]-2,4-imidazolidinedione (FK772) and 3-[2-(2,4-dichlorophenyl)-2-(hydroxy)]-2,4-imidazolidinedione (FK284), in or on the following food commodities:

| Commodity                     | Parts per<br>million |
|-------------------------------|----------------------|
| Cattle, fat .....             | 0.01                 |
| Cattle, meat .....            | 0.01                 |
| Cattle, meat byproducts ..... | 0.2                  |
| Goat, fat .....               | 0.01                 |
| Goat, meat .....              | 0.01                 |
| Goat, meat byproducts .....   | 0.2                  |
| Horse, fat .....              | 0.01                 |
| Horse, meat .....             | 0.01                 |
| Horse, meat byproducts .....  | 0.2                  |
| Milk .....                    | 0.02                 |
| Sheep, fat .....              | 0.01                 |
| Sheep, meat .....             | 0.01                 |
| Sheep, meat byproducts .....  | 0.2                  |

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[65 FR 33715, May 24, 2000, as amended at 67 FR 46893, July 17, 2002; 71 FR 54434, Sept. 15, 2006]

§ 180.414 Cyromazine; tolerances for residues.

(a) *General.* (1) Tolerances are established for residues of cyromazine, including its metabolites and degradates, in or on the commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring

<sup>1</sup>There are no U.S. registrations on mango as of May 4, 2000.

<sup>2</sup>This tolerance expires on April 7, 2020.

(2) A tolerance of 5.0 parts per million is established for residues of the insecticide cyromazine, including its metabolites and degradates, in or on

poultry feed when used as a feed additive only in feed for chicken layer hens and chicken breeder hens at the rate of not more than 0.01 pound of cyromazine per ton of poultry feed for control of flies in manure of treated chicken layer hens and chicken breeder hens, provided the feeding of cyromazine-treated feed must stop at least 3 days (72 hours) before slaughter. If the feed is formulated by any person other than the end user, the formulator must inform the end user, in writing, of the 3-day (72 hours) pre-slaughter interval. Compliance with the tolerance level specified in this paragraph is to be determined by measuring only cyromazine, *N*-cyclopropyl-1,3,5-triazine-2,4,6-triamine, in or on the commodity.

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* (1) Tolerances are established for indirect or inadvertent residues of the insecticide cyromazine, including its metabolites and degradates, in or on the commodities in table 1 to this paragraph (d)(1) when present therein as a result of the application of cyromazine to growing crops listed in paragraph (a)(1) of this section. Compliance with the tolerance levels specified in this paragraph (d)(1) is to be determined by measuring only cyromazine, *N*-cyclopropyl-1,3,5-triazine-2,4,6-triamine, in or on the commodity.

TABLE 2 TO PARAGRAPH (d)(1)

| Commodity                                             | Parts per million |
|-------------------------------------------------------|-------------------|
| Cotton, undelinted seed .....                         | 0.1               |
| Corn, sweet, kernel plus cob with husks removed ..... | 0.5               |
| Corn, sweet, forage .....                             | 0.5               |
| Corn, sweet, stover .....                             | 0.5               |
| Radish, roots .....                                   | 0.5               |
| Radish, tops .....                                    | 0.5               |

(2) Tolerances are established for indirect or inadvertent residues of the insecticide cyromazine, including its metabolites and degradates, in or on the commodities in the table 3 to this paragraph (d)(2) when present therein as a result of the application of poultry manure-based fertilizer containing cyromazine to soil in which the crops

**§ 180.415**

identified in this section are grown. Compliance with the tolerance levels specified in this paragraph (d)(2) is to be determined by measuring only cyromazine, *N*-cyclopropyl-1,3,5-triazine-2,4,6-triamine, in or on the commodity.

TABLE 3 TO PARAGRAPH (d)(2)

| Commodity                                               | Parts per million |

**§ 180.417 Triclopyr; tolerances for residues.**

(a) *General.* (1) Tolerances are established for residues of the herbicide triclopyr, including its metabolites and degradates, in or on the commodities in the table below resulting from the application of the butoxyethyl ester of triclopyr, triethylamine salt of triclopyr, or choline salt of triclopyr. Compliance with the tolerance levels specified below is to be determined by measuring only triclopyr, 2-[(3,5,6-trichloro-2-pyridinyl)oxy]acetic acid.

TABLE 1 TO PARAGRAPH (a)(1)

| Commodity                                     | Parts per million |
|-----------------------------------------------|-------------------|
| Egg .....                                     | 0.05              |
| Fish .....                                    | 3.0               |

| Poultry, meat byproducts, except kidney ..... | 0.1               |
| Rice, grain .....                             | 0.3               |
| Shellfish .....                               | 3.5               |

TABLE 1 TO PARAGRAPH (a)(1)—Continued

| Commodity             | Parts per million |
|-----------------------|-------------------|
| Sugarcane, cane ..... | 0.04              |

(2) Tolerances are established for residues of the herbicide triclopyr, including its metabolites and degradates, in or on the commodities in the table below resulting from the application of the butoxyethyl ester of triclopyr, triethylamine salt of triclopyr, or choline salt of triclopyr. Compliance with the tolerance levels specified below is to be determined by measuring the combined residues of triclopyr, 2-[(3,5,6-trichloro-2-pyridinyl)oxy]acetic acid, and its metabolite 3,5,6-trichloro-2-pyridinol (TCP), calculated as the stoichiometric equivalent of triclopyr.

| Commodity                     | Parts per million |
|-------------------------------|-------------------|
| Cattle, fat .....             | 0.10              |
| Cattle, meat .....            | 0.10              |
| Cattle, meat byproducts ..... | 0.50              |
| Goat, fat .....               | 0.10              |
| Goat, meat .....              | 0.10              |
| Goat, meat byproducts .....   | 0.50              |
| Hog, fat .....                | 0.10              |
| Hog, meat .....               | 0.10              |
| Hog, meat byproducts .....    | 0.50              |
| Horse, fat .....              | 0.10              |
| Horse, meat .....             | 0.10              |
| Horse, meat byproducts .....  | 0.50              |
| Sheep, fat .....              | 0.10              |
| Sheep, meat .....             | 0.10              |
| Sheep, meat byproducts .....  | 0.50              |

(b) *Section 18 emergency exemptions.* Time-limited tolerances specified in the following table are established for residues of the triclopyr (2-[(3,5,6-trichloro-2-pyridinyl)oxy]acetic acid), including its metabolites and degradates in or on the specified agricultural commodities, resulting from use of the pesticide pursuant to FIFRA section 18 emergency exemptions. The tolerances expire on the date specified in the table.

TABLE 3 TO PARAGRAPH (b)

| Commodity             | Parts per million | Expiration/revocation date |
|-----------------------|-------------------|----------------------------|
| Sugarcane, cane ..... | 40                | 12/31/26                   |

(c) *Tolerances with regional registrations.* [Reserved]

§ 180.418

40 CFR Ch. I (7–1–25 Edition)

(d) *Indirect or inadvertent residues.*

**§ 180.418 Cypermethrin and isomers alpha-cypermethrin and zeta-cypermethrin; tolerances for residues.**

(a) *General.* (1) Tolerances are established for residues of the insecticide cypermethrin (±)alpha cyano-(3-phenoxyphenyl)methyl (±)cis,trans-3-(2,2-dichloroethenyl)-2,2-dimethylcyclopropanecarboxylate in or on the commodities in table 1 to paragraph (a)(1).

TABLE 1 TO PARAGRAPH (a)(1)

| Commodity                                      | Parts per million |
|------------------------------------------------|-------------------|
| Allspice <sup>1</sup> .....                    | 0.5               |
| Angelica, seed <sup>1</sup> .....              | 0.2               |
| Anise pepper <sup>1</sup> .....                | 0.5               |
| Asafoetida <sup>1</sup> .....                  | 0.2               |
| Ashwagandha fruit <sup>1</sup> .....           | 0.5               |
| Batavia-cassia, fruit <sup>1</sup> .....       | 0.5               |

<sup>1</sup> There are no U.S. registrations as of October 4, 2023.

(2) Tolerances are established for residues of zeta-cypermethrin, (*S*-cyano(3-phenoxyphenyl) methyl (±))(cis-trans 3-(2,2-dichloroethenyl)-2,2-dimethylcyclopropanecarboxylate), including its metabolites and degradates, in or on the commodities in the following table. Compliance with the tolerance levels specified in the following table is to be determined by measuring only total cypermethrin, cyano(3-phenoxyphenyl)methyl 3-(2,2-dichloroethenyl)-2,2-dimethylcyclopropane carboxylate, in or on the commodity.

<sup>1</sup> This tolerance expires on February 4, 2022.

(3) Tolerances are established for residues of the insecticide, alpha-cypermethrin, (*R*)-cyano(3-phenoxyphenyl)methyl (1*S*,3*S*)-rel-3-(2,2-dichloroethenyl)-2,2-dimethylcyclopropane carboxylate, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only total cypermethrin, cyano(3-phenoxyphenyl)methyl 3-(2,2-dichloroethenyl)-2,2-dimethylcyclopropane carboxylate, in or on the commodity.

TABLE 3 TO PARAGRAPH (a)(3)

**§ 180.419 Chlorpyrifos-methyl; tolerances for residues.**

(a) *General.* (1) Tolerances are established for the combined residues of the insecticide chlorpyrifos-methyl [*O*,-*O*,-

dimethyl *O*-(3,5,6-trichloro-2-pyridyl)] phosphorothioate and its metabolite (3,5,6-trichloro-2-pyridinol) in or on the following food commodities:

| Commodity                                   | Parts per million |
|---------------------------------------------|-------------------|
| Barley, grain .....                         | 6.0               |
| Cattle, fat .....                           | 0.5               |
| Cattle, meat .....                          | 0.5               |
| Cattle, meat byproducts .....               | 0.5               |
| Egg .....                                   | 0.1               |
| Goat, fat .....                             | 0.5               |
| Goat, meat .....                            | 0.5               |
| Goat, meat byproducts .....                 | 0.5               |
| Hog, fat .....                              | 0.5               |
| Hog, meat .....                             | 0.5               |
| Hog, meat byproducts .....                  | 0.5               |
| Horse, fat .....                            | 0.5               |
| Horse, meat .....                           | 0.5               |
| Horse, meat byproducts .....                | 0.5               |
| Milk, fat (0.05 ppm (N) in whole milk ..... | 1.25              |
| Oat, grain .....                            | 6.0               |
| Poultry, fat .....                          | 0.5               |
| Poultry, meat .....                         | .5                |
| Poultry, meat byproducts .....              | .5                |
| Rice, grain .....                           | 6.0               |
| Sheep, fat .....                            | 0.5               |
| Sheep, meat .....                           | 0.5               |
| Sheep, meat byproducts .....                | 0.5               |
| Sorghum, grain .....                        | 6.0               |
| Wheat, grain .....                          | 6.0               |

(2) Tolerances are established for the combined residues of the insecticide chlorpyrifos-methyl [*O*,-*O*, dimethyl-*O*-(3,5,6-trichloro-2-pyridyl)] phosphorothioate and its metabolite (3,5,6-trichloro-2-pyridinol) in or on the following food commodities when present therein as a result of application to stored grains:

| Commodity                    | Parts per million |
|------------------------------|-------------------|
| Barley, bran .....           | 90                |
| Barley, pearled barley ..... | 90                |
| Rice, bran .....             | 30                |
| Rice, hulls .....            | 30                |
| Rice, polished rice .....    | 30                |
| Sorghum, grain, bran .....   | 90                |
| Wheat, bran .....            | 30                |
| Wheat, germ .....            | 30                |
| Wheat, middlings .....       | 30                |
| Wheat, shorts .....          | 30                |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.*  
[Reserved]

[65 FR 33715, May 24, 2000, as amended at 74 FR 46374, Sept. 9, 2009]

§ 180.420

§ 180.420 Fluridone; tolerances for residues.

(a) *General.* (1) Tolerances are established for residues of the herbicide fluridone, including its metabolites and degradates, in or on the commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only the sum of fluridone, 1-methyl-3-phenyl-5-(3-(trifluoromethyl)phenyl)-4(1H)-pyridinone, and its bound residues, calculated as the stoichiometric equivalent of fluridone, in or on the commodity.

| Commodity      | Parts per million |
|----------------|-------------------|
| Crayfish ..... | 0.5               |
| Fish .....     | 0.5               |

(2) Tolerances are established for residues of the herbicide fluridone, including its metabolites and degradates, in or on the commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only fluridone, 1-methyl-3-phenyl-5-(3-(trifluoromethyl)phenyl)-4(1H)-pyridinone, in or on the commodity.

| Commodity                                     | Parts per million |
|-----------------------------------------------|-------------------|
| Animal feed, nongrass, group 18 .....         | 0.15              |
| Berry and small fruit, group 13-07 .....      | 0.1               |
| Cattle, fat .....                             | 0.05              |
| Cattle, kidney .....                          | 0.1               |
| Cattle, liver .....                           | 0.1               |
| Cattle, meat .....                            | 0.05              |
| Cattle, meat byproducts .....                 | 0.05              |
| Cotton, gin byproducts .....                  | 0.1               |
| Cotton, undelinted seed .....                 | 0.1               |
| Egg .....                                     | 0.05              |
| Fruit, citrus, group 10-10 .....              | 0.1               |

| Tropical and subtropical, medium to large fruit, smooth, inedible peel, subgroup 24B ..... | 0.1               |

(b) [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* Tolerances are established for indirect or inadvertent residues of the herbicide fluridone, including its metabolites and degradates, in or on the irrigated crop commodities and crop groupings in the table in this paragraph, resulting from use of irrigation water containing residues of 0.15 parts per million following applications of fluridone on or around aquatic sites. Where tolerances are established at higher levels from other uses of fluridone on the crops in the table in this paragraph, the higher tolerance also applies to residues in or on the irrigated commodity. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only fluridone, 1-methyl-3-phenyl-5-(3-(trifluoromethyl)phenyl)-4(1H)-pyridinone, in or on the commodity.

| Commodity                                               | Parts per million |

### § 180.421 Fenarimol; tolerances for residues.

(a) *General.* Tolerances are established for residues of fenarimol, including its metabolites and degradates, in or on the commodities in the following table. Compliance with the tolerance levels specified in the following table is to be determined by measuring only fenarimol alpha-(2-chlorophenyl)-alpha-(4-chlorophenyl)-5-pyrimidinemethanol.

| Commodity                                       | Parts per million | Expiration/revocation date |
|-------------------------------------------------|-------------------|----------------------------|
| Apple .....                                     | 0.3               | 7/31/16                    |
| Apple, wet pomace .....                         | 0.3               | 7/31/16                    |
| Banana <sup>1</sup> .....                       | 0.25              | None                       |
| Cattle, fat .....                               | 0.01              | 7/31/16                    |
| Cattle, kidney .....                            | 0.01              | 7/31/16                    |
| Cattle, meat .....                              | 0.01              | 7/31/16                    |
| Cattle, meat byproducts, except kidney .....    | 0.05              | 7/31/16                    |
| Cherry, sweet .....                             | 1.0               | 7/31/16                    |
| Cherry, tart .....                              | 1.0               | 7/31/16                    |
| Goat, fat .....                                 | 0.01              | 7/31/16                    |
| Goat, kidney .....                              | 0.01              | 7/31/16                    |
| Goat, meat .....                                | 0.01              | 7/31/16                    |
| Goat, meat byproducts, except kidney .....      | 0.05              | 7/31/16                    |
| Grape .....                                     | 0.1               | 7/31/16                    |
| Hazelnut .....                                  | 0.02              | 7/31/16                    |
| Hop, dried cones .....                          | 5.0               | 7/31/16                    |
| Horse, fat .....                                | 0.01              | 7/31/16                    |

### § 180.425 Clomazone; tolerances for residues.

(a) *General.* Tolerances are established for residues of the herbicide clomazone, including its metabolites and degradates, in or on the commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only clomazone, 2-[(2-chlorophenyl)methyl]-4,4-dimethyl-3-isoxazolidinone, in or on the commodity.

| Commodity                                                    | Parts per million |
|--------------------------------------------------------------|-------------------|
| Bean, asparagus, dry seed .....                              | 0.05              |
| Bean, broad, dry seed .....                                  | 0.05              |
| Bean, broad, succulent seed .....                            | 0.05              |
| Bean, kidney, dry seed .....                                 | 0.05              |
| Bean, lima, dry seed .....                                   | 0.05              |
| Bean, lima, succulent seed .....                             | 0.05              |
| Bean, mung, dry seed .....                                   | 0.05              |
| Bean, navy, dry seed .....                                   | 0.05              |
| Bean, pinto, dry seed .....                                  | 0.05              |
| Bean, snap, succulent .....                                  | 0.05              |

[51 FR 9446, Mar. 19, 1986]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 180.425, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at [www.govinfo.gov](http://www.govinfo.gov).

## § 180.426 2-[4,5-Dihydro-4-methyl-4-(1-methylethyl)-5-oxo-1*H*-imidazol-2-yl]-3-quinoline carboxylic acid; tolerance for residues.

A tolerance is established for residues of the herbicide 2-[4,5-dihydro-4-methyl-4-(1-methylethyl)-5-oxo-1*H*-imidazol-2-yl]-3-quinoline carboxylic acid, in or on the raw agricultural commodity soybean at 0.05 part per million.

[51 FR 13309, Apr. 2, 1986]

## § 180.427 Tau-Fluvalinate; tolerances for residues.

(a) *General.* Tolerances are established for residues of the insecticide tau-fluvalinate, including its metabolites and degradates, in or on commodities in the table below. Compliance with the specified tolerance level is to be determined by measuring only tau-fluvalinate, (cyano-(3-phenoxyphenyl)methyl*N*-[2-chloro-4-(trifluoromethyl)phenyl]-*D*-valinate), in or on the commodity.

| Commodity                      | Parts per million |
|--------------------------------|-------------------|
| Grape, wine <sup>1</sup> ..... | 1.0               |
| Honey .....                    | 0.02              |

<sup>1</sup>There is no U.S. registration for use of tau-fluvalinate on wine grapes.

### § 180.430 Fenoxaprop-ethyl; tolerances for residues.

(a) *General.* Tolerances are established for residues of the herbicide fenoxaprop-ethyl, including its metabolites and degradates, in or on the commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to

be determined by measuring only the sum of fenoxaprop-ethyl, (±)-ethyl 2-[4-[(6-chloro-2-benzoxazolyl)oxy]phenoxy]propanoate, and its metabolites, 2-[4-[(6-chloro-2-benzoxazolyl)oxy]phenoxy]propanoic acid and 6-chloro-2,3-dihydrobenzoxazol-2-one, calculated as the stoichiometric equivalent of fenoxaprop-ethyl, in or on the commodity.

| Commodity                     | Parts per million |
|-------------------------------|-------------------|
| Barley, grain .....           | 0.05              |
| Barley, straw .....           | 0.1               |
| Cattle, fat .....             | 0.05              |
| Cattle, meat byproducts ..... | 0.05              |
| Cattle, meat .....            | 0.05              |
| Cotton, undelinted seed ..... | 0.05              |
| Goat, fat .....               | 0.05              |
| Goat, meat byproducts .....   | 0.05              |
| Goat, meat .....              | 0.05              |
| Hog, fat .....                | 0.05              |
| Hog, meat byproducts .....    | 0.05              |
| Hog, meat .....               | 0.05              |
| Horse, fat .....              | 0.05              |
| Horse, meat byproducts .....  | 0.05              |
| Horse, meat .....             | 0.05              |
| Milk .....                    | 0.02              |
| Peanut .....                  | 0.05              |
| Peanut, hulls .....           | 0.05              |
| Rice, grain .....             | 0.05              |
| Sheep, fat .....              | 0.05              |
| Sheep, meat byproducts .....  | 0.05              |
| Sheep, meat .....             | 0.05              |
| Soybean .....                 | 0.05              |
| Wheat, grain .....            | 0.05              |
| Wheat, straw .....            | 0.50              |

(b) *Section 18 emergency exemptions.* Time-limited tolerances are established for residues of the herbicide fenoxaprop-ethyl, including its metabolites and degradates, in or on the commodities in the table in this paragraph in connection with use of fenoxaprop-ethyl under section 18 emergency exemptions granted by EPA. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only the sum of fenoxaprop-ethyl, (±)-ethyl 2-[4-[(6-chloro-2-benzoxazolyl)oxy]phenoxy]propanoate, and its metabolites, 2-[4-[(6-chloro-2-benzoxazolyl)oxy]phenoxy]propanoic acid and 6-chloro-2,3-dihydrobenzoxazol-2-one, calculated as the stoichiometric equivalent of fenoxaprop-ethyl, in or on the commodity. The tolerances expire and are revoked on the dates specified in the table in this paragraph.

§ 180.431

40 CFR Ch. I (7–1–25 Edition)

| Commodity           | Parts per million | Expiration/revocation date |
|---------------------|-------------------|----------------------------|
| Grass, forage ..... | 0.05              | 12/31/16                   |
| Grass, hay .....    | 0.05              | 12/31/16                   |

(c) *Tolerances with regional registrations.* Tolerances with regional registration, as defined in §180.1(l), are established for residues of the herbicide fenoxaprop-ethyl, including its metabolites and degradates, in or on the commodities in the table in this paragraph when fenoxaprop-ethyl is used in the states of Oregon, Washington, and Utah. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only the sum of fenoxaprop-ethyl, (±)-ethyl 2-[4-[(6-chloro-2-benzoxazolyl)oxy]phenoxy]propanoate, and its metabolites, 2-[4-[(6-chloro-2-benzoxazolyl)oxy]phenoxy]propanoic acid and 6-chloro-2,3-dihydrobenzoxazol-2-one, calculated as the stoichiometric equivalent of fenoxaprop-ethyl, in or on the commodity

| Commodity        | Parts per million |
|------------------|-------------------|
| Grass, hay ..... | 0.09              |

(d) *Indirect or inadvertent residues.*  
[Reserved]

[63 FR 1377, Jan. 9, 1998, as amended at 63 FR 19837, Apr. 22, 1998; 73 FR 33718, June 13, 2008; 75 FR 80346, Dec. 22, 2010; 76 FR 23495, Apr. 27, 2011; 78 FR 78748, Dec. 27, 2013; 79 FR 26164, May 7, 2014]

**§ 180.431 Clopyralid; tolerances for residues.**

(a) *General.* Tolerances are established for residues of the herbicide clopyralid, including its metabolites and degradates, in or on the commodities in the table below from its application in the acid form or in the form of its salts. Compliance with the tolerance levels specified below is to be determined by measuring only clopyralid, (3,6-dichloro-2-pyridinecarboxylic acid), in or on the following commodities:

TABLE 1 TO PARAGRAPH (a)

| Commodity           | Parts per million |
|---------------------|-------------------|
| Barley, bran .....  | 12                |
| Barley, grain ..... | 3.0               |

TABLE 1 TO PARAGRAPH (a)—Continued

| Commodity                                             | Parts per million |
|-------------------------------------------------------|-------------------|
| Barley, hay .....                                     | 9.0               |
| Barley, pearled barley .....                          | 12                |
| Barley, straw .....                                   | 9.0               |
| Beet, garden, roots .....                             | 4.0               |
| Beet, sugar, molasses .....                           | 10                |
| Beet, sugar, roots .....                              | 2.0               |
| Berry, low growing, subgroup 13–07G .....             | 4.0               |
| Brassica, leafy greens, subgroup 4–16B .....          | 5.0               |
| Broccoli, Chinese .....                               | 2.0               |

## § 180.432 Lactofen; tolerances for residues.

(a) *General.* Tolerances are established for residues of the herbicide lactofen, including its metabolites and degradates, in or on the commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only lactofen, 2-ethoxy-1-methyl-2-oxoethyl 5-[2-chloro-4-(trifluoromethyl)phenoxy]-2-nitrobenzoate, in or on the commodity.

| Commodity                                      | Parts per million |
|------------------------------------------------|-------------------|
| Beans, snap, succulent, except lima bean ..... | 0.01              |
| Cotton, gin byproducts .....                   | 0.02              |
| Cotton, undelinted seed .....                  | 0.01              |
| Peanut .....                                   | 0.01              |
| Soybean, seed .....                            | 0.01              |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* Tolerances with regional registration, as defined in § 180.1(1), are es-

tablished for residues of the herbicide lactofen, including its metabolites and degradates, in or on the commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only lactofen, 2-ethoxy-1-methyl-2-oxoethyl 5-[2-chloro-4-(trifluoromethyl)phenoxy]-2-nitrobenzoate, in or on the commodity.

| Commodity                            | Parts per million |
|--------------------------------------|-------------------|
| Okra .....                           | 0.02              |
| Vegetables, fruiting, group 08 ..... | 0.02              |

(d) *Indirect or inadvertent residues.*  
[Reserved]

[69 FR 57216, Sept. 24, 2004, as amended at 72 FR 33906, June 20, 2007; 76 FR 23496, Apr. 27, 2011]

## § 180.433 Fomesafen; tolerances for residues.

(a) *General.* Tolerances are established for residues of the herbicide fomesafen, including its metabolites and degradates, in or on the following commodities. Compliance with the tolerance levels specified in the following table 1 to this paragraph (a) is to be determined by measuring only fomesafen, 5-[2-chloro-4-(trifluoromethyl)phenoxy]-N-(methylsulfonyl)-2-nitrobenzamide, in or on the commodity.

TABLE 1 TO PARAGRAPH (a)

| Commodity                                                               | Parts per million |
|-------------------------------------------------------------------------|-------------------|
| Berry, low growing, subgroup 13–07G, except cranberry .....             | 0.02              |
| Cotton, gin byproducts .....                                            | 0.025             |
| Cotton, undelinted seed .....                                           | 0.025             |
| Vegetable, bulb, group 3–07 .....                                       | 0.02              |
| Vegetable, cucurbit, group 9 .....                                      | 0.03              |
| Vegetable, fruiting, group 8–10 .....                                   | 0.03              |
| Vegetable, legume, forage and hay, except soybean, subgroup 7–22A ..... | 0.05              |
| Vegetable, legume, group 6 .....                                        | 0.05              |
| Vegetable, tuberous and corm, subgroup 1C ...                           | 0.025             |

(b)–(d) [Reserved]

[88 FR 29839, May 9, 2023]

## § 180.434 Propiconazole; tolerances for residues.

(a) *General.* (1) Tolerances are established for residues of propiconazole, including its metabolites and degradates, in or on the commodities in the table

§ 180.434

40 CFR Ch. I (7–1–25 Edition)

below. Compliance with the tolerance levels specified below is to be determined by measuring only those propiconazole residues convertible to 2,4-dichlorobenzoic acid (2,4-DCBA), expressed as the stoichiometric equivalent of propiconazole, in or on the commodity in the table below:

| Commodity                                                 | Parts per million |
|-----------------------------------------------------------|-------------------|
| Almond, hulls                                             | 7.0               |
| Avocado                                                   | 0.2               |
| Banana                                                    | 0.2               |
| Barley, bran                                              | 6.0               |
| Barley, grain                                             | 3.0               |
| Barley, hay                                               | 30                |
| Barley, straw                                             | 20                |
| Bean, dry seed                                            | 0.40              |
| Bean, snap                                                | 0.70              |
| Bean, succulent shelled                                   | 0.10              |
| Beet, garden, tops                                        | 5.5               |
| Beet, sugar, dried pulp                                   | 1.0               |
| Beet, sugar, molasses                                     | 1.5               |
| Beet, sugar, roots                                        | 0.3               |
| Beet, sugar, tops                                         | 10                |
| Brassica, leafy greens, subgroup 4–16B, except watercress | 20                |
| Bushberry, subgroup 13–07B                                | 1.0               |
| Caneberry, subgroup 13–07A                                | 1.0               |
| Cattle, fat                                               | 0.05              |
| Cattle, kidney                                            | 2.0               |
| Cattle, liver                                             | 2.0               |
| Cattle, meat                                              | 0.05              |
| Cattle, meat byproducts, except liver and kidney          | 0.05              |
| Celtuce                                                   | 5                 |
| Cilantro, leaves                                          | 13                |
| Citrus, oil                                               | 1000              |
| Corn, field, forage                                       | 12                |
| Corn, field, grain                                        | 0.2               |
| Corn, field, stover                                       | 30                |
| Corn, pop, grain                                          | 0.2               |
| Corn, pop, stover                                         | 30                |
| Corn, sweet, forage                                       | 6.0               |
| Corn, sweet, kernel plus cob with husks removed           | 0.1               |
| Corn, sweet, stover                                       | 30                |
| Dill, seed                                                | 15                |

| Wheat, bran                                     | 0.6               |
| Wheat, forage                                   | 15                |
| Wheat, grain                                    | 0.3               |
| Wheat, hay                                      | 30                |
| Wheat, straw                                    | 20                |

(2) Tolerances are established for propiconazole, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only propiconazole, 1-[[2-(2,4-dichlorophenyl)-4-propyl-1,3-dioxolan-2-yl]methyl]-1H-1,2,4-triazole, in or on the commodity.

## Environmental Protection Agency

## § 180.435

| Commodity              | Parts per million |
|------------------------|-------------------|
| Tea <sup>1</sup> ..... | 4.0               |

<sup>1</sup>There are no United States registrations for use of propiconazole on tea as of December 24, 2015.

(b) *Section 18 emergency exemptions.* Time-limited tolerances are established for residues of propiconazole (1-[[2-(2,4-dichlorophenyl)-4-propyl-1,3-dioxolan-2-yl] methyl]-1H-1,2,4-triazole) and its metabolites determined as 2,4-dichlorobenzoic acid and expressed as parent compound, in connection with use of the pesticide under section 18 emergency exemptions granted by EPA. The tolerances will expire and are revoked on the dates specified in the following table:

| Commodity       | Parts per million | Expiration/revocation date |
|-----------------|-------------------|----------------------------|
| Nectarine ..... | 2.0               | 12/31/13                   |
| Peach .....     | 2.0               | 12/31/13                   |

(c) *Tolerances with regional registrations.* A tolerance with regional registration, as defined in §180.1(l), is established for residues of 1-[[2-(2,4-dichlorophenyl)-4-propyl-1,3-dioxolan-2-yl]methyl]-1H-1,2,4-triazole and its metabolites determined as 2,4-dichlorobenzoic acid and expressed as parent compound, in or on the following commodities:

| Commodity               | Parts per million |
|-------------------------|-------------------|
| Cranberry .....         | 1.0               |
| Rice, wild, grain ..... | 0.5               |

(d) *Indirect or inadvertent residues.* Tolerances are established for the combined residues of the fungicide 1-[[2-(2,4-dichlorophenyl)-4-propyl-1,3-dioxolan-2-yl] methyl]-1H-1,2,4-triazole and its metabolites determined as 2,4-dichlorobenzoic acid and expressed as parent compound in or on the following commodities when present therein as a result of application of propiconazole to growing crops in paragraphs (a) and (c) of this section:

| Commodity             | Parts per million |
|-----------------------|-------------------|
| Alfalfa, forage ..... | 0.1               |
| Alfalfa, hay .....    | 0.1               |

[71 FR 55306, Sept. 22, 2006, as amended at 72 FR 20439, Apr. 25, 2007; 74 FR 12613, Mar. 25, 2009; 75 FR 80346, Dec. 22, 2010; 76 FR 27268, May 11, 2011; 77 FR 38204, June 27, 2012; 77 FR 75044, Dec. 19, 2012; 78 FR 23503, Apr. 19, 2013; 78 FR 78748, Dec. 27, 2013; 79 FR 18467, Apr. 2, 2014; 80 FR 72599, Nov. 20, 2015; 80 FR 79718, Dec. 23, 2015; 80 FR 80275, Dec. 24, 2015; 82 FR 1210, Jan. 5, 2017; 84 FR 39774, Aug. 12, 2019]

### § 180.435 Deltamethrin; tolerances for residues.

(a) *General.* (1) Tolerances are established for residues of deltamethrin, including its metabolites and degradates, in or on the commodities listed in the following table. Compliance with the tolerance levels specified is to be determined by measuring only deltamethrin, (1*R*,3*R*)-3-(2,2-dibromovinyl)-2,2-dimethylcyclopropanecarboxylic acid (*S*)-*alpha*-cyano-3-phenoxybenzyl ester, and its major metabolites, *trans*-deltamethrin, (*S*)-*alpha*-cyano-*m*-phenoxybenzyl(1*R*,3*S*)-3-(2,2-dibromovinyl)-2,2-dimethylcyclopropanecarboxylate, and *alpha*-*R*-deltamethrin, (*R*)-*alpha*-cyano-*m*-phenoxybenzyl(1*R*,3*R*)-3-(2,2-dibromovinyl)-2,2-dimethylcyclopropanecarboxylate, in or on the commodity.

TABLE 1 TO PARAGRAPH (a)(1)

| Commodity                                             | Parts per million |
|-------------------------------------------------------|-------------------|
| Almond, hulls .....                                   | 2.5               |
| Apple, wet pomace .....                               | 1.0               |

| Vegetable, root, except sugar beet, Subgroup IB .....                                            | 0.2               |
| Vegetable, tuberous and corm, Subgroup IC .....                                                  | 0.04              |
| Wheat, bran .....                                                                                | 5.0               |

\* There are no U.S. registrations for use of deltamethrin on starfruit and lychee.

\* There are no U.S. registrations.

<sup>1</sup> There are no U.S. registrations as of April 4, 2023.

(2) A tolerance of 0.05 ppm is established for residues of the insecticide deltamethrin, including its metabolites and degradates, in or on all food/feed items (other than those covered by a higher tolerance as a result of use on growing crops) when deltamethrin is used in food/feed handling establishments or as a wide-area mosquito adulticide. Compliance with the tolerance levels specified is to be determined by measuring only deltamethrin, (1*R*,3*R*)-3-(2,2-dibromovinyl)-2,2-dimethylcyclopropanecarboxylic acid (*S*)-*alpha*-cyano-3-phenoxybenzyl ester, and its major metabolites, *trans*-deltamethrin, (*S*)-*alpha*-cyano-*m*-phenoxybenzyl(1*R*,3*S*)-3-(2,2-dibromovinyl)-2,2-dimethylcyclopropanecarboxylate, and

*alpha*-*R*-deltamethrin, (*R*)-*alpha*-cyano-*m*-phenoxybenzyl-(1*R*,3*R*)-3-(2,2-dibromovinyl)-2,2-dimethylcyclopropanecarboxylate, in or on the commodity.

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

(2) A tolerance of 0.05 ppm is established for residues of the insecticide cyfluthrin (cyano(4-fluoro-3-phenoxyphenyl)methyl-3-(2,2-dichloroethenyl)-2,2-dimethylcyclopropanecarboxylate;

CAS Reg. No. 69359-37-5) in food commodities exposed to the insecticide during treatment of food-handling establishments where food and food products are held, processed, prepared, or served. Treatments may be made by general surface, spot, and/or crack and crevice applications.

(i) General surface treatments shall be limited to a maximum of 3.8 grams of active ingredient per 1,000 square feet, applying to walls, floors, and ceilings with a low-pressure system. Cover or remove all food processing and/or handling equipment during application. Do not apply directly to food products. Reapplications may be made at 10-day intervals.

(ii) Crack and crevice or spot treatments shall be limited to a maximum of 0.1 percent of the active ingredient weight, applied with a low-pressure system with a pinpoint or variable-pattern nozzle. Dust formulation shall be limited to a maximum of 0.1 percent of the active ingredient by weight, applied using a hand duster, power duster, or other equipment capable of applying dust insecticide directly into voids and cracks and crevices. Dust applications should be made in a manner to avoid deposits on exposed surfaces or introducing the material into the air. Cover exposed food or remove food from premises. Do not apply directly to food. Reapplications may be made at 10-day intervals.

(iii) To ensure safe use of the insecticide, its label and labeling shall conform to that registered by the Environmental Protection Agency, and it shall be used in accordance with such label and labeling.

(3) A tolerance of 0.05 part per million is established for residues of the insecticide cyfluthrin (cyano(4-fluoro-3-phenoxyphenyl)methyl-3-(2,2-dichloroethenyl)-2,2-dimethylcyclopropanecarboxylate; CAS Reg. No. 68359-37-5) in feed commodities exposed to the insecticide during treatment of feed-handling establishments where feed and feed products are held, processed, prepared, or served. Treatments may be made by general surface, spot, and/or crack and crevice applications.

(i) General surface treatments shall be limited to a maximum of 3.8 grams of

§ 180.436

40 CFR Ch. I (7–1–25 Edition)

active ingredient per 1,000 square feet, applying to walls, floors, and ceilings with a low-pressure system. Cover or remove all feed processing and/or handling equipment during application. Do not apply directly to feed products. Reapplications may be made at 10-day intervals.

(ii) Crack and crevice or spot treatments shall be limited to a maximum of 0.1 percent of the active ingredient by weight, applied with a low-pressure system with a pinpoint or variable-pattern nozzle. Dust formulation shall be limited to a maximum of 0.1 percent of the active ingredient by weight, applied using a hand duster, power duster, or other equipment capable of applying dust insecticide directly into voids and cracks and crevices. Dust applications should be made in a manner to avoid deposits on exposed surfaces or introducing the material into the air. Cover exposed feed or remove feed from premises. Do not apply directly to feed. Reapplications may be made at 10-day intervals.

(iii) To ensure safe use of the insecticide, its label and labeling shall conform to that registered by EPA, and it shall be used in accordance with such label and labeling.

(4) Tolerances are established for residues of the isomer, beta-cyfluthrin, cyano(4-fluoro-3-phenoxyphenyl)methyl-3-(2,2-dichloroethenyl)-2,2-dimethylcyclopropanecarboxylate [mixture comprising the enantiomeric pair (*R*)- $\alpha$ -cyano-4-fluoro-3-phenoxybenzyl (1*S*,3*S*)-3-(2,2-dichlorovinyl)-2,2-dimethylcyclopropanecarboxylate and (*S*)- $\alpha$ -cyano-4-fluoro-3-phenoxybenzyl (1*R*,3*R*)-3-(2,2-dichlorovinyl)-2,2-dimethylcyclopropanecarboxylate with the enantiomeric pair (*R*)- $\alpha$ -cyano-4-fluoro-3-phenoxybenzyl (1*S*,3*R*)-3-(2,2-dichlorovinyl)-2,2-dimethylcyclopropanecarboxylate and (*S*)- $\alpha$ -cyano-4-fluoro-3-phenoxybenzyl (1*R*,3*S*)-3-(2,2-dichlorovinyl)-2,2-dimethylcyclopropanecarboxylate], in or on the following raw agricultural commodities:

| Commodity             | Parts per million |
|-----------------------|-------------------|
| Alfalfa .....         | 5.0               |
| Alfalfa, forage ..... | 5.0               |
| Alfalfa, hay .....    | 13                |

| Commodity                                                                  | Parts per million |
|----------------------------------------------------------------------------|-------------------|
| Almond, hulls .....                                                        | 0.5               |
| Barley, bran .....                                                         | 0.5               |
| Barley, grain .....                                                        | 0.15              |

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 180.436, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at [www.govinfo.gov](http://www.govinfo.gov).

## § 180.437 Imazamethabenz-methyl; tolerances for residues.

(a) *General.* Tolerances are established for residues of the herbicide imazamethabenz-methyl, including its metabolites and degradates, in or on the commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only imazamethabenz-methyl (methyl 2-[4,5-dihydro-4-methyl-4-(1-methylethyl)-5-oxo-1H-imidazol-2-yl]-4-methylbenzoate) or (methyl 2-[4,5-dihydro-4-methyl-4-(1-methylethyl)-5-oxo-1H-imidazol-2-yl]-5-methylbenzoate), as the sum of its para- and meta-isomers in or on the commodity.

| Commodity           | Parts per million | Expiration/revocation date |
|---------------------|-------------------|----------------------------|
| Barley, grain ..... | 0.10              | 12/31/16                   |

| Commodity             | Parts per million | Expiration/revocation date |
|-----------------------|-------------------|----------------------------|
| Barley, straw .....   | 2.00              | 12/31/16                   |
| Sunflower, seed ..... | 0.10              | 12/31/16                   |
| Wheat, grain .....    | 0.10              | 12/31/16                   |
| Wheat, straw .....    | 2.00              | 12/31/16                   |

[81 FR 34906, June 1, 2016]

## § 180.438 Lambda-cyhalothrin and an isomer gamma-cyhalothrin; tolerances for residues.

(a) *General.* (1) Tolerances are established for the combined residues of the pyrethroid lambda-cyhalothrin, 1:1 mixture of (S)- $\alpha$ -cyano-3-phenoxybenzyl-(Z)-(1R,3R)-3-(2-chloro-3,3,3-trifluoroprop-1-enyl)-2,2-dimethylcyclopropanecarboxylate and (R)- $\alpha$ -cyano-3-phenoxybenzyl-(Z)-(1S,3S)-3-(2-chloro-3,3,3-trifluoroprop-1-enyl)-2,2-dimethylcyclopropanecarboxylate and its epimer expressed as epimer of lambda-cyhalothrin, a 1:1 mixture of (S)- $\alpha$ -cyano-3-phenoxybenzyl-(Z)-(1S,3S)-3-(2-chloro-3,3,3-trifluoroprop-1-enyl)-2,2-dimethylcyclopropanecarboxylate and (R)- $\alpha$ -cyano-3-phenoxybenzyl-(Z)-(1R,3R)-3-(2-chloro-3,3,3-trifluoroprop-1-enyl)-2,2-dimethylcyclopropanecarboxylate, on plants and livestock, as indicated in the following table.

| Commodity                                  | Parts per million |
|--------------------------------------------|-------------------|
| Alfalfa, forage .....                      | 5.0               |
| Alfalfa, hay .....                         | 6.0               |
| Almond, hulls .....                        | 1.5               |
| Apple, wet pomace .....                    | 2.50              |
| Avocado, imported .....                    | 0.20              |
| Barley, bran .....                         | 0.2               |
| Barley, grain .....                        | 0.05              |
| Barley, hay .....                          | 2.0               |
| Barley, straw .....                        | 2.0               |
| Brassica, head and stem, subgroup 5A ..... | 0.4               |
| Buckwheat, grain .....                     | 0.05              |
| Canola, refined oil .....                  | 2.0               |
| Canola, seed .....                         | 1.0               |
| Cattle, fat .....                          | 3.0               |
| Cattle, meat .....                         | 0.2               |
| Cattle, meat byproducts .....              | 0.2               |
| Corn, field, flour .....                   | 0.15              |
| Corn, field, forage .....                  | 6.0               |
| Corn, field, grain .....                   | 0.05              |
| Corn, field, stover .....                  | 1.0               |
| Corn, pop, grain .....                     | 0.05              |

| Commodity                                                      | Parts per million |
|----------------------------------------------------------------|-------------------|
| Corn, pop, grain, flour .....                                  | 0.05              |
| Corn, pop, stover .....                                        | 1.0               |
| Corn, sweet, forage .....                                      | 6.0               |
| Corn, sweet, stover .....                                      | 1.0               |
| Corn, sweet, kernel plus cob with husks removed .....          | 0.05              |
| Cotton, undelinted seed .....                                  | 0.05              |
| Egg .....                                                      | 0.01              |
| Fruit, pome, group 11 .....                                    | 0.30              |
| Fruit, stone, group 12 .....                                   | 0.50              |
| Garlic .....                                                   | 0.1               |
| Goat, fat .....                                                | 3.0               |
| Goat, meat .....                                               | 0.2               |
| Goat, meat byproducts .....                                    | 0.2               |
| Grain, aspirated fractions .....                               | 2.0               |
| Grass, forage, fodder and hay, group 17 .....                  | 7.0               |
| Hog, fat .....                                                 | 0.2               |
| Hog, meat .....                                                | 0.01              |
| Hog, meat byproducts .....                                     | 0.02              |
| Hop, dried cones .....                                         | 10.0              |
| Horse, fat .....                                               | 3.0               |
| Horse, meat .....                                              | 0.2               |
| Horse, meat byproducts .....                                   | 0.2               |
| Lettuce, head .....                                            | 2.0               |
| Lettuce, leaf .....                                            | 2.0               |
| Milk, fat (reflecting 0.4 ppm in whole milk) .....             | 10.0              |
| Nut, tree, group 14 .....                                      | 0.05              |
| Oat, grain .....                                               | 0.05              |
| Oat, forage .....                                              | 2.0               |
| Oat, hay .....                                                 | 2.0               |
| Oat, straw .....                                               | 2.0               |
| Onion, bulb .....                                              | 0.1               |
| Pea and bean, dried shelled, except soybean, subgroup 6C ..... | 0.10              |
| Pea and bean, succulent shelled, subgroup 6B .....             | 0.01              |
| Peanut .....                                                   | 0.05              |
| Peanut, hay .....                                              | 3.0               |
| Pistachio .....                                                | 0.05              |
| Poultry, fat .....                                             | 0.03              |
| Poultry, meat .....                                            | 0.01              |
| Poultry, meat byproducts .....                                 | 0.01              |
| Rice, grain .....                                              | 1.0               |
| Rice, hulls .....                                              | 5.0               |
| Rice, wild, grain .....                                        | 1.0               |
| Rye, bran .....                                                | 0.2               |
| Rye, grain .....                                               | 0.05              |

<sup>1</sup> The analytical enforcement methods for lambda-cyhalothrin are applicable for determination of gamma-cyhalothrin residues in plant and animal commodities.

(3) A tolerance of 0.01 part per million is established for residues of the insecticide lambda-cyhalothrin and an isomer gamma-cyhalothrin in or on all food commodities (other than those already covered by a higher tolerance as a result of use on growing crops) in food-handling establishments where food products are held, processed, or prepared.

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[71 FR 74817, Dec. 13, 2006, as amended at 72 FR 45663, Aug. 15, 2007; 73 FR 39264, July 9, 2008; 76 FR 34885, June 15, 2011; 80 FR 72599, Nov. 20, 2015]

### § 180.439 Thifensulfuron methyl; tolerances for residues.

(a) *General.* Tolerances are established for residues of thifensulfuron methyl, including its metabolites and degradates, in or on the commodities listed in the following table [below]. Compliance with the tolerance levels specified in the following table [below] is to be determined by measuring only thifensulfuron methyl (methyl 3-[[[(4-methoxy-6-methyl-1,3,5-triazin-2-yl)amino]carbonyl]amino] sulfonyl]-2-thiophenecarboxylate).

| Commodity           | Parts per million |
|---------------------|-------------------|
| Barley, grain ..... | 0.05              |

| Commodity                     | Parts per million |
|-------------------------------|-------------------|
| Barley, hay .....             | 0.8               |
| Barley, straw .....           | 0.10              |

| Corn, sweet, stover .....                             | 0.06              |

(b) *Section 18 emergency exemptions.*

[Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[62 FR 62961, Nov. 26, 1997, as amended at 74 FR 46375, Sept. 9, 2009]

§ 180.441 Quizalofop ethyl; tolerances for residues.

(a) *General.* (1) Tolerances are established for residues of the herbicide quizalofop ethyl, including its metabolites and degradates, in or on the commodities in the following table. Compliance with the tolerance levels specified in the following table is to be determined by measuring only those quizalofop ethyl residues convertible to 2-methoxy-6-chloroquinoxaline, expressed as the stoichiometric equivalent of quizalofop ethyl, in or on the commodity.

TABLE 1 TO PARAGRAPH (a)(1)

(2) Tolerances are established for residues of the herbicide quizalofop ethyl, including its metabolites and degradates, in or on the commodities in the following table. Compliance with the tolerance levels specified in the following table is to be determined by measuring only those quizalofop ethyl residues convertible to quizalofop (2-[4-(6-chloroquinoxalin-2-yl-oxy)phenoxy]propanoic acid), expressed as quizalofop, in or on the commodity.

| Commodity                      | Parts per million |

## Environmental Protection Agency

§ 180.442

(3) Tolerances are established for residues of the herbicide quizalofop-P-ethyl, including its metabolites and degradates, in or on the commodities in the following table. Compliance with the tolerance levels specified in the following table is to be determined by measuring quizalofop ethyl and quizalofop acid, expressed as the stoichiometric equivalent of quizalofop ethyl, in or on the commodity.

| Commodity                        | Parts per million |
|----------------------------------|-------------------|
| Fish-shellfish, crustacean ..... | 0.04              |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* Tolerances with regional registration are established for residues of the herbicide quizalofop ethyl, including its metabolites and degradates, in or on the commodities in the following table. Compliance with the tolerance levels specified in the following table is to be determined by measuring only those quizalofop ethyl residues convertible to 2-methoxy-6-chloroquinoxaline, expressed as the stoichiometric equivalent of quizalofop ethyl, in or on the commodity.

| Commodity       | Parts per million |
|-----------------|-------------------|
| Pineapple ..... | 0.1               |

(d) *Indirect or inadvertent residues.*  
[Reserved]

### § 180.442 Bifenthrin; tolerances for residues.

(a) *General.* (1) Tolerances are established for residues of the insecticide bifenthrin, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only bifenthrin, (2-methyl [1,1'-biphenyl]-3-yl) methyl-3-(2-chloro-3,3,3-trifluoro-1-propenyl)-2,2-dimethylcyclopropanecarboxylate.

| Commodity                                                                  | Parts per million |
|----------------------------------------------------------------------------|-------------------|
| Almond, hulls .....                                                        | 2.0               |
| Apple, wet pomace .....                                                    | 1.5               |
| Artichoke, globe .....                                                     | 1.0               |
| Avocado .....                                                              | 0.5               |

<sup>1</sup> There are no U.S. registrations.

<sup>2</sup> This tolerance expires on June 1, 2022.

(2) A tolerance of 0.05 ppm is established for residues of the insecticide bifenthrin, (2-methyl[1,1'-biphenyl]-3-yl)methyl-3-(2-chloro-3,3,3-trifluoro-1-propenyl)-2,2-dimethylcyclopropanecarboxylate, as follows:

(i) In or on all food/feed items (other than those covered by a higher tolerance as a result of use on growing crops) in food/feed handling establishments.

(ii) The insecticide may be present as a residue from application of bifenthrin in food handling establishments, including food service, manufacturing and processing establishments, such as restaurants, cafeterias, supermarkets, bakeries, breweries, dairies, meat slaughtering and packing plants, and canneries, feed handling establishments including feed manufacturing and processing establishments, in accordance with the following prescribed conditions:

(A) Application shall be limited to general surface and spot and/or crack and crevice treatment in food/feed handling establishments where food/feed and food/feed products are held, processed, prepared and served. General surface application may be used only when the facility is not in operation provided exposed food/feed has been covered or removed from the area being treated. Spot and/or crack and crevice application may be used while the facility is in operation provided exposed food/feed is covered or removed from the area being treated prior to application. Spray concentration shall be limited to a maximum of 0.06 percent active ingredient. Contamination of food/feed or food/feed contact surfaces shall be avoided.

(B) To assure safe use of the insecticide, its label and labeling shall conform to that registered with the U.S. Environmental Protection Agency and

40 CFR Ch. I (7–1–25 Edition)

shall be used in accordance with such label and labeling.

(b) [Reserved]

(c) *Tolerances with regional registrations.* Tolerances with regional registrations are established for residues of the insecticide bifenthrin, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only bifenthrin, (2-methyl[1,1'-biphenyl]-3-yl) methyl-3-(2-chloro-3,3,3-trifluoro-1-propenyl)-2,2-dimethylcyclopropanecarboxylate.

**§ 180.447 Imazethapyr; tolerances for residues.**

(a) *General.* (1) Tolerances are established for residues of the herbicide imazethapyr, 2-[4,5-dihydro-4-methyl-4-(1-methylethyl)-5-oxo-1H-imidazol-2-yl]-5-ethyl-3-pyridine carboxylic acid, applied as its acid or ammonium salt, in or on the following raw agricultural commodities:

| Commodity                        | Parts per million |
|----------------------------------|-------------------|
| Canola, seed <sup>1</sup> .....  | 0.10              |
| Soybean .....                    | 0.1               |
| Vegetable, legume, group 6 ..... | 0.1               |

<sup>1</sup> There are no U.S. registrations for canola as of March 21, 2003.

(2) Tolerances are established for the sum of the residues of the herbicide imazethapyr, 2-[4,5-dihydro-4-methyl-4-(1-methylethyl)-5-oxo-1H-imidazol-2-yl]-5-ethyl-3-pyridine carboxylic acid; its metabolite CL 288511, 2-[4,5-dihydro-4-methyl-4-(1-methylethyl)-5-oxo-1H-imidazol-2-yl]-5-(1-hydroxyethyl)-3-pyridine carboxylic acid; and its metabolite CL 182704, 5-[1-(beta-D-glucopyranosyloxy)ethyl]-2-[4,5-dihydro-4-methyl-4-(1-methylethyl)-5-oxo-1H-imidazol-2-yl]-3-pyridinecarboxylic acid, applied as its

acid or ammonium salt, in or on the following commodities:

| Commodity                                     | Parts per million |
|-----------------------------------------------|-------------------|
| Alfalfa, seed .....                           | 0.15              |
| Alfalfa, seed screenings .....                | 0.15              |
| Animal feed, nongrass, group 18, forage ..... | 3.0               |
| Animal feed, nongrass, group 18, hay .....    | 5.5               |
| Peanut .....                                  | 0.1               |
| Rice, bran .....                              | 1.2               |
| Rice, grain .....                             | 0.3               |

(3) A tolerance is established for the sum of residues of the herbicide imazethapyr, 2-[4,5-dihydro-4-methyl-4-(1-methylethyl)-5-oxo-1H-imidazol-2-yl]-5-ethyl-3-pyridine carboxylic acid, and its metabolite CL 288511, 2-[4,5-dihydro-4-methyl-4-(1-methylethyl)-5-oxo-1H-imidazol-2-yl]-5-(1-hydroxyethyl)-3-pyridine carboxylic acid, applied as its acid or ammonium salt, in or on the following commodities:

| Commodity                     | Parts per million |
|-------------------------------|-------------------|
| Cattle, meat byproducts ..... | 0.10              |
| Corn, field, forage .....     | 0.1               |
| Corn, field, grain .....      | 0.1               |
| Corn, field, stover .....     | 0.1               |
| Crayfish .....                | 0.15              |
| Goat, meat byproducts .....   | 0.10              |
| Hog, meat byproducts .....    | 0.10              |
| Horse, meat byproducts .....  | 0.10              |
| Sheep, meat byproducts .....  | 0.10              |

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* Tolerances with regional registration, as defined in §180.1(l) of this chapter, are established for the sum of residues of the herbicide imazethapyr, 2-[4,5-dihydro-4-methyl-4-(1-methylethyl)-5-oxo-1H-imidazol-2-yl]-5-ethyl-3-pyridine carboxylic acid, as its ammonium salt, and its metabolite, 2-[4,5-dihydro-4-methyl-4-(1-methylethyl)-5-oxo-1H-imidazol-2-yl]-5-(1-hydroxyethyl)-3-pyridine carboxylic acid, both free and conjugated, applied as its acid or ammonium salt, in or on the following raw agricultural commodities:

| Commodity           | Parts per million |
|---------------------|-------------------|
| Endive .....        | 0.1               |
| Lettuce, head ..... | 0.1               |
| Lettuce, leaf ..... | 0.1               |

(d) *Indirect or inadvertent residues.* [Reserved]

[67 FR 55331, Aug. 29, 2002, as amended at 68 FR 13849, Mar. 21, 2003; 71 FR 6359, Feb. 8, 2006; 76 FR 34885, June 15, 2011; 80 FR 72599, Nov. 20, 2015]

### § 180.448 Hexythiazox; tolerance for residues.

(a) *General.* Tolerances are established for residues of hexythiazox, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only hexythiazox and its metabolites containing the (4-chlorophenyl)-4-methyl-2-oxo-3-thiazolidine moiety, calculated as the stoichiometric equivalent of hexythiazox.

| Commodity                                                                  | Parts per million |
|----------------------------------------------------------------------------|-------------------|

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 180.448, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at [www.govinfo.gov](http://www.govinfo.gov).

**§ 180.449 Avermectin B<sub>1</sub> and its delta-8,9-isomer; tolerances for residues.**

(a) *General.* Tolerances are established for residues of abamectin, including its metabolites and degradates, in or on the commodities in the following table. Compliance with the tolerance levels specified in the following table is to be determined by measuring only avermectin B<sub>1</sub> a mixture of

avermectins containing greater than or equal to 80% avermectin B<sub>1</sub> a (5-*O*-demethyl avermectin A<sub>1</sub>) and less than or equal to 20% avermectin B<sub>1</sub>b (5-*O*-demethyl-25-de(1-methylpropyl)-25-(1-methylethyl) avermectin A<sub>1</sub>) and its delta-8,9-isomer in or on the following commodities:

[73 FR 54962, Sept. 24, 2008, as amended at 74 FR 47457, Sept. 16, 2009; 76 FR 34885, June 15, 2011]

## § 180.451 Tribenuron methyl; tolerances for residues.

(a) *General.* Tolerances are established for residues of the herbicide tribenuron methyl and its metabolites and degradates in or on the commodities in the following table. Compliance with the tolerance levels specified below is to be determined by measuring only tribenuron methyl, methyl-2-[[[N-(4-methoxy-6-methyl-1,3,5-triazin-2-yl) methylamino] carbonyl] amino] sulfonyl] benzoate, in or on the following commodities:

TABLE 1 TO PARAGRAPH (a)

| Commodity                      | Parts per million |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* Tolerances with regional registration, as defined in §180.1(l) are established for residues of the herbicide tribenuron methyl (methyl-2-[[[N-(4-methoxy-6-methyl-1,3,5-triazin-2-yl)methylamino] carbonyl]amino]sulfonyl] benzoate) in or on the following raw agricultural commodities:

| Commodity                                                                  | Parts per million |
|----------------------------------------------------------------------------|-------------------|
| Grass, forage, fodder and hay, group 17, except bermudagrass; forage ..... | 0.10              |
| Grass, forage, fodder and hay, group 17, except bermudagrass; hay .....    | 0.10              |

## § 180.452

(d) *Indirect or inadvertent residues.*  
[Reserved]

[69 FR 56718, Sept. 22, 2004, as amended at 72 FR 11789, Mar. 14, 2007; 73 FR 47065, Aug. 13, 2008; 74 FR 67128, Dec. 18, 2009; 76 FR 34885, June 15, 2011; 80 FR 72599, Nov. 20, 2015; 87 FR 42337, July 15, 2022]

## § 180.452 Primisulfuron-methyl; tolerances for residues.

(a) *General.* Tolerances are established for residues of primisulfuron-methyl (3-[4,6-bis-(difluoromethoxy)-pyrimidin-2-yl]-1-(2-methoxycarbonylphenylsulfonyl) urea) in or on the following raw agricultural commodities.

| Commodity                      | Parts per million |
|--------------------------------|-------------------|
| Cattle, fat .....              | 0.10              |
| Cattle, meat .....             | 0.10              |
| Cattle, meat byproducts .....  | 0.10              |
| Corn, field, forage .....      | 0.10              |

| Corn, field, stover .....      | 0.10              |
| Corn, pop, grain .....         | 0.02              |
| Corn, pop, stover .....        | 0.10              |
| Egg .....                      | 0.10              |
| Goat, fat .....                | 0.10              |
| Goat, meat .....               | 0.10              |
| Goat, meat byproducts .....    | 0.10              |
| Hog, fat .....                 | 0.10              |
| Hog, meat .....                | 0.10              |
| Hog, meat byproducts .....     | 0.10              |
| Horse, fat .....               | 0.10              |
| Horse, meat .....              | 0.10              |
| Horse, meat byproducts .....   | 0.10              |
| Milk .....                     | 0.02              |
| Poultry, fat .....             | 0.10              |
| Poultry, meat .....            | 0.10              |
| Poultry, meat byproducts ..... | 0.10              |
| Sheep, fat .....               | 0.10              |
| Sheep, meat .....              | 0.10              |
| Sheep, meat byproducts .....   | 0.10              |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.*  
[Reserved]

[55 FR 21548, May 25, 1990, as amended at 62 FR 66020, Dec. 17, 1997; 63 FR 66458, Dec. 2, 1998; 67 FR 35049, May 17, 2002; 74 FR 46375, Sept. 9, 2009; 74 FR 46699, Sept. 11, 2009; 77 FR 59128, Sept. 26, 2012]

## § 180.454 Nicosulfuron; tolerances for residues.

(a) *General.* Tolerances are established for residues of the herbicide nicosulfuron, including its metabolites and degradates, in or on the commodities in the following table. Compliance

## 40 CFR Ch. I (7–1–25 Edition)

with the tolerance levels specified in the following table is to be determined by measuring only nicosulfuron, 2-[[[(4,6-dimethoxy-2-pyrimidinyl)amino]carbonyl]amino]sulfonyl]-N,N-dimethyl-3-pyridinecarboxamide.

| Commodity                                             | Parts per million |
|-------------------------------------------------------|-------------------|

## § 180.455 Procymidone; tolerances for residues.

A tolerance is established for the residues of the fungicide procymidone, N-(3,5-dichlorophenyl)-1,2-dimethylcyclopropane-1,2-dicarboximide, in or on the following raw agricultural commodity:

| Commodity         | Parts per million |
|-------------------|-------------------|
| Grape, wine ..... | 5.0               |

[59 FR 42514, Aug. 18, 1994]

# Environmental Protection Agency

§ 180.458

## § 180.457 Bitertanol; tolerances for residues.

(a) *General.* A tolerance is established for the residues of the fungicide bitertanol,  $\beta$ -([1,1'-biphenyl]-4-yloxy)- $\alpha$ -(1,1-dimethylethyl)-1H-1,2,4-triazole-1-ethanol, in or on the following raw agricultural commodity:

| Commodity           | Parts per million |
|---------------------|-------------------|
| Banana <sup>1</sup> | 0.5               |

<sup>1</sup> There are no U.S. registrations as of April 1, 1992.

(b) *Section 18 emergency exemptions.*

[Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[74 FR 47457, Sept. 16, 2009]

## § 180.458 Clethodim; tolerances for residues.

(a) *General.* Tolerances are established for residues of the herbicide clethodim, including its metabolites and degradates, in or on the commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only the sum of clethodim, 2-[(1E)-1-[[[(2E)-3-chloro-2-propenyl]oxy]imino]propyl]-5-[2-(ethylthio)propyl]-3-hydroxy-2-cyclohexen-1-one, and its metabolites containing the 5-(2-ethylthiopropyl)cyclohexene-3-one and 5-(2-ethylthiopropyl)-5-hydroxycyclohexene-3-one moieties and their sulfoxides and sulphones, calculated as the stoichiometric equivalent of clethodim, in or on the commodity.

| Commodity                                             | Parts per million |
|-------------------------------------------------------|-------------------|
| Alfalfa, forage                                       | 6.0               |

[60 FR 36731, July 18, 1995, as amended at 63 FR 44152, Aug. 18, 1998; 63 FR 66449, Dec. 2, 1998]

§ 180.460 Benoxacor; tolerances for residues.

(a) *General.* (1) Tolerances are established for residues of the inert ingredient (safener) benoxacor (4-(dichloroacetyl)-3,4-dihydro-3-methyl-2H-1, 4-benzoxazine) at 0.01 parts per million (ppm) when used in pesticide

formulations containing metolachlor or S-metolachlor in or on raw agricultural commodities for which tolerances have been established for metolachlor or S-metolachlor.

(2) Tolerances are established for residues of benoxacor, including its metabolites and degradates, in or on the commodities in the following table, when used as an inert ingredient (herbicide safener) in pesticide formulations. Compliance with the tolerance levels specified in the following table is to be determined by measuring only benoxacor (4-(dichloroacetyl)-3,4-dihydro-3-methyl-2H-1,4-benzoxazine).

TABLE 1 TO PARAGRAPH (a)

| Commodity                                             | Parts per million |
|-------------------------------------------------------|-------------------|
| Corn, field forage .....                              | 0.01              |
| Corn, field, grain .....                              | 0.01              |
| Corn, field, stover .....                             | 0.01              |
| Corn, pop, grain .....                                | 0.01              |
| Corn, pop, stover .....                               | 0.01              |
| Corn, sweet, forage .....                             | 0.01              |
| Corn, sweet, kernel plus cob with husks removed ..... | 0.01              |
| Corn, sweet, stover .....                             | 0.01              |

[63 FR 7305, Feb. 13, 1998, as amended at 70 FR 21631, Apr. 27, 2005; 87 FR 42331, July 15, 2022]

§ 180.461 Cadusafos; tolerances for residues.

A tolerance is established for the residues of the nematicide/insecticide cadusafos, O-ethyl S,S-di-sec-butyl phosphorodithioate, in or on the following raw agricultural commodity:

| Commodity    | Parts per million |
|--------------|-------------------|
| Banana ..... | 0.01              |

There are no U.S. registrations as of May 10, 1994, for the nematicide/insecticid cadusafos.

[59 FR 39467, Aug. 3, 1994]

## Environmental Protection Agency

§ 180.463

### § 180.462 Pyridate; tolerances for residues.

(a) *General.* Tolerances are established for residues of the herbicide pyridate, including its metabolites and degradates, in or on the commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only the sum of pyridate, *O*-(6-chloro-3-phenyl-4-pyridazinyl)-*S*-octyl-carbonothioate, and its metabolites, 6-chloro-3-phenyl-pyridazine-4-ol and conjugates of 6-chloro-3-phenyl-pyridazine-4-ol, calculated as the stoichiometric equivalent of pyridate, in or on the commodity.

TABLE 1 TO PARAGRAPH (a)

| Commodity                                                    | Parts per million |
|--------------------------------------------------------------|-------------------|

### § 180.463 Quinclorac; tolerances for residues.

(a)(1) *General.* Tolerances are established for residues of the herbicide quinclorac, including its metabolites and degradates, in or on the commod-

ities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only quinclorac, 3,7-dichloro-8-quinolinecarboxylic acid, in or on the commodity.

TABLE 1 TO PARAGRAPH (a)(1)

| Commodity                                              | Parts per million |
|--------------------------------------------------------|-------------------|

### § 180.466 Fenpropathrin; tolerances for residues.

(a) *General.* Tolerances are established for residues of fenpropathrin, including its metabolites and degradates, in or on the commodities in the following table. Compliance with the tolerance levels specified below is to be determined by measuring only fenpropathrin (alpha-cyano-3-phenoxy-benzyl 2,2,3,3-tetramethylcyclopropanecarboxylate).

| Commodity                                  | Parts per million |
|--------------------------------------------|-------------------|
| Acerola .....                              | 3.0               |
| Almond, hulls .....                        | 4.5               |

<sup>1</sup>There are no U.S. registrations as of November 28, 2012, for the use of fenpropathrin on tea, dried.

(b) *Section 18 emergency exemptions.* Time-limited tolerances specified in Table 2 to this paragraph (b) are established for residues of fenpropathrin, (alpha-cyano-3-phenoxy-benzyl 2,2,3,3-tetramethylcyclopropane carboxylate) in or on the specified agricultural commodities, resulting from use of the pesticide pursuant to FIFRA section 18 emergency exemptions. The tolerance expires on the date specified in Table 2.

§ 180.467

TABLE 2 TO PARAGRAPH (b)

| Commodity              | Parts per million | Expiration date |
|------------------------|-------------------|-----------------|
| Kiwifruit, fuzzy ..... | 5                 | 12/31/2022      |

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

§ 180.467 Carbon disulfide; tolerances for residues.

Tolerances are established for the nematocide, insecticide, and fungicide carbon disulfide, from the application of sodium tetrathiocarbonate, in or on the following raw agricultural commodities. These tolerances expire on January 19, 2024.

| Commodity                | Parts per million |
|--------------------------|-------------------|
| Almond .....             | 0.1               |
| Almond, hulls .....      | 0.1               |
| Grape .....              | 0.1               |
| Grapefruit .....         | 0.1               |
| Lemon .....              | 0.1               |
| Orange, sweet .....      | 0.1               |
| Peach .....              | 0.1               |
| Plum, prune, fresh ..... | 0.1               |

[58 FR 33771, June 21, 1993, as amended at 62 FR 26949, May 16, 1997; 88 FR 46086, July 19, 2023]

§ 180.468 Flumetsulam; tolerances for residues.

(a) *General.* Tolerances are established for residues of the herbicide flumetsulam, including its metabolites and degradates, in or on the commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only flumetsulam, *N*-(2,6-difluorophenyl)-5-methyl-(1,2,4)-triazolo-(1,5a)-pyrimidine-2-sulfonamide, in or on the commodity.

40 CFR Ch. I (7–1–25 Edition)

| Commodity                 | Parts per million |
|---------------------------|-------------------|
| Bean, dry, seed .....     | 0.05              |
| Corn, field, forage ..... | 0.05              |
| Corn, field, grain .....  | 0.05              |
| Corn, field, stover ..... | 0.05              |
| Soybean, seed .....       | 0.05              |

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[76 FR 23497, Apr. 27, 2011]

§ 180.469 Dichlormid; tolerances for residues.

(a) *General.* (1) Tolerances are established for residues of dichlormid, including its metabolites and degradates, when used as an inert ingredient (herbicide safener) in pesticide formulations, in or on the commodities in the following table. Compliance with the tolerances is to be determined by measuring only dichlormid (2,2-dichloro-*N,N*-di-2-propenylacetamide).

| Commodity                                             | Parts per million |
|-------------------------------------------------------|-------------------|
| Corn, field, forage .....                             | 0.05              |
| Corn, field, grain .....                              | 0.05              |
| Corn, field, stover .....                             | 0.05              |
| Corn, pop, grain .....                                | 0.05              |
| Corn, pop, stover .....                               | 0.05              |
| Corn, sweet, forage .....                             | 0.05              |
| Corn, sweet, kernel plus cob with husks removed ..... | 0.05              |
| Corn, sweet, stover .....                             | 0.05              |

(2) Tolerances are established for residues of dichlormid, including its metabolites and degradates, at 0.05 parts per million (ppm) when used as an inert ingredient (herbicide safener) in pesticide formulations containing metolachlor or S-metolachlor in or on raw agricultural commodities for which tolerances have been established for metolachlor or S-metolachlor. Compliance with the tolerances is to be determined by measuring only dichlormid (2,2-dichloro-*N,N*-di-2-propenylacetamide).

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

§ 180.470

(d) *Indirect or inadvertent residues.*  
[Reserved]

[65 FR 16149, Mar. 27, 2000, as amended at 67 FR 51105, Aug. 7, 2002; 69 FR 58290, Sept. 30, 2004; 70 FR 76699, Dec. 28, 2005; 74 FR 37623, July 29, 2009; 76 FR 16310, Mar. 23, 2011; 81 FR 69406, Oct. 6, 2016]

### § 180.470 Acetochlor; tolerances for residues.

(a) *General.* Tolerances are established for residues of acetochlor, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only acetochlor, 2-chloro-2'-methyl-6-ethyl-N-ethoxymethylacetanilide, and its metabolites containing the ethyl methyl aniline (EMA) moiety and the hydroxyethyl methyl aniline (HEMA) moiety. Both parent and the named metabolites shall be determined as ethyl methyl aniline (EMA) and hydroxyethyl methyl aniline (HEMA), and calculated as the stoichiometric equivalents of acetochlor, in or on the following commodities:

| Commodity                                              | Parts per million |
|--------------------------------------------------------|-------------------|
| Alfalfa, forage .....                                  | 8.0               |
| Alfalfa, hay .....                                     | 20                |
| Beet, sugar, dried pulp .....                          | 0.50              |
| Beet, sugar, molasses .....                            | 0.80              |
| Beet, sugar, roots .....                               | 0.30              |
| Beet, sugar, tops .....                                | 0.70              |
| Cattle, fat .....                                      | 0.02              |
| Cattle, kidney .....                                   | 0.03              |
| Cattle, meat .....                                     | 0.02              |
| Cattle, meat byproducts, except kidney .....           | 0.02              |
| Corn, field, forage .....                              | 4.5               |
| Corn, field, grain .....                               | 0.05              |
| Corn, field, stover .....                              | 2.5               |
| Corn, pop, grain .....                                 | 0.05              |
| Corn, pop, stover .....                                | 2.5               |
| Corn, sweet, forage .....                              | 1.5               |
| Corn, sweet, kernels plus cob with husks removed ..... | 0.05              |
| Corn, sweet, stover .....                              | 1.0               |
| Cotton, gin byproducts .....                           | 4.0               |
| Cotton, undelinted seed .....                          | 0.6               |
| Goat, fat .....                                        | 0.02              |
| Goat, kidney .....                                     | 0.03              |
| Goat, meat .....                                       | 0.02              |
| Goat, meat byproducts, except kidney .....             | 0.02              |
| Hog, kidney .....                                      | 0.02              |
| Horse, fat .....                                       | 0.02              |
| Horse, kidney .....                                    | 0.03              |
| Horse, meat .....                                      | 0.02              |
| Horse, meat byproducts, except kidney .....            | 0.02              |
| Milk .....                                             | 0.02              |
| Peanut .....                                           | 0.20              |
| Peanut, hay .....                                      | 7.0               |
| Peanut, meal .....                                     | 0.25              |
| Sheep, fat .....                                       | 0.02              |

| Commodity                                   | Parts per million |
|---------------------------------------------|-------------------|
| Sheep, kidney .....                         | 0.03              |

| Sorghum, grain, grain .....                 | 0.05              |
| Sorghum, grain, stover .....                | 1.7               |
| Soybean, meal .....                         | 1.2               |
| Soybean, seed .....                         | 1.0               |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* Tolerances are established for indirect or inadvertent residues of acetochlor, including its metabolites and degradates, in or on the raw agricultural commodities in the table to this paragraph when present therein as a result of application of acetochlor to the growing crops in the table to paragraph (a) of this section. Compliance with the tolerance levels specified below is to be determined by measuring only acetochlor, 2-chloro-2'-methyl-6-ethyl-N-ethoxymethylacetanilide, and its metabolites containing the ethyl methyl aniline (EMA) moiety and the hydroxyethyl methyl aniline (HEMA) moiety. Both parent and the named metabolites shall be determined as ethyl methyl aniline (EMA) and hydroxyethyl methyl aniline (HEMA), and calculated as the stoichiometric equivalents of acetochlor, in or on the following commodities.

| Commodity                                                                                                   | Parts per million |
|-------------------------------------------------------------------------------------------------------------|-------------------|

(b) *Section 18 emergency exemptions.* Time-limited tolerances are established for residues of the insecticide imidacloprid, including its metabolites and degradates in connection with use of the pesticide under a Section 18 emergency exemption granted by EPA. Compliance with the tolerance levels specified below is to be determined by measuring only the sum of imidacloprid (1-[6-chloro-3-pyridinyl)methyl]-N-nitro-2-imidazolidinimine) and its metabolites containing the 6-chloropyridinyl moiety, calculated as the stoichiometric equivalent of imidacloprid. These tolerances will expire and are revoked on the dates specified in the following table:

| Commodity                 | Parts per million | Expiration/revocation date |
|---------------------------|-------------------|----------------------------|
| Sugarcane, cane .....     | 6.0               | 12/31/18                   |
| Sugarcane, molasses ..... | 50                | 12/31/18                   |

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* Tolerances are established for indirect or inadvertent residues of the insecticide imidacloprid, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only the sum of imidacloprid (1-[6-chloro-3-pyridinyl)methyl]-N-nitro-2-imidazolidinimine) and its metabolites containing the 6-chloropyridinyl moiety, calculated as the stoichiometric equivalent of imidacloprid, in or on the following commodities, when present therein as a result of the application of the pesticide to growing crops listed in this section and other non-food crops as follows:

| Commodity                                   | Parts per million |
|---------------------------------------------|-------------------|
| Rice, grain .....                           | 0.05              |
| Vegetable, foliage of legume, group 7 ..... | 2.5               |
| Vegetable, legume, group 6 .....            | 0.3               |

[75 FR 22251, Apr. 28, 2010, as amended at 78 FR 33743, June 5, 2013; 80 FR 78145, Dec. 16, 2015]

§ 180.473

40 CFR Ch. I (7–1–25 Edition)

§ 180.473 Glufosinate; tolerances for residues.

(a) *General.* (1) Tolerances are established for residues of glufosinate, including its metabolites and degradates, in or on the commodities in table 1 to paragraph (a)(1). Compliance with the tolerance levels specified in table 1 to paragraph (a)(1) is to be determined by measuring the sum of glufosinate (2-amino-4-(hydroxymethylphosphinyl)butanoic acid) and its metabolites, 2-(acetylamino)-4-(hydroxymethylphosphinyl) butanoic acid, and 3-(hydroxymethylphosphinyl) propanoic acid, expressed as 2-amino-4-(hydroxymethylphosphinyl)butanoic acid equivalents.

TABLE 1 TO PARAGRAPH (a)(1)

| Commodity                                                                  | Parts per million |
|----------------------------------------------------------------------------|-------------------|
| Almond, hulls .....                                                        | 0.50              |
| Banana <sup>1</sup> .....                                                  | 0.30              |
| Beet, sugar, molasses .....                                                | 5.0               |

(b) [Reserved]

(c) *Tolerances with regional registrations.* Tolerances with regional registrations are established for residues of glufosinate, including its metabolites and degradates, in or on the commodities in table 3 to paragraph (c). Compliance with the tolerance levels specified in table 3 to paragraph (c) is to be determined by measuring the sum of glufosinate, (2-amino-4-(hydroxymethylphosphinyl)butanoic acid) and its metabolites, 2-(acetyl-amino)-4-(hydroxymethylphosphinyl) butanoic acid, and 3-(hydroxymethylphosphinyl) propanoic acid, expressed as 2-amino-4-(hydroxymethylphosphinyl)butanoic acid equivalents.

TABLE 3 TO PARAGRAPH (c)

| Commodity           | Parts per million |
|---------------------|-------------------|
| Grass, forage ..... | 0.15              |
| Grass, hay .....    | 0.2               |

(d) *Indirect or inadvertent residues.* (1) Tolerances are established for indirect or inadvertent residues of glufosinate, including its metabolites and degradates, in or on the commodities in table 4 to paragraph (d)(1), as a result of the application of glufosinate to crops listed in paragraph (a) of this section. Compliance with the tolerance levels specified in table 4 to paragraph (d)(1) is to be determined by measuring the sum of glufosinate (2-amino-4-(hydroxymethylphosphinyl) butanoic acid) and its metabolite, 3-(hydroxymethylphosphinyl) propanoic acid, expressed as 2-amino-4-

(hydroxymethylphosphinyl)butanoic acid equivalents.

TABLE 4 TO PARAGRAPH (d)(1)

| Commodity               | Parts per million |
|-------------------------|-------------------|
| Barley, hay .....       | 0.40              |
| Barley, straw .....     | 0.40              |
| Buckwheat, fodder ..... | 0.40              |
| Buckwheat, forage ..... | 0.40              |
| Oat, forage .....       | 0.40              |
| Oat, hay .....          | 0.40              |
| Oat, straw .....        | 0.40              |
| Rye, forage .....       | 0.40              |
| Rye, straw .....        | 0.40              |
| Teosinte .....          | 0.40              |
| Triticale .....         | 0.40              |
| Wheat, forage .....     | 0.40              |
| Wheat, hay .....        | 0.40              |
| Wheat, straw .....      | 0.40              |

(2) Tolerances are established for indirect or inadvertent residues of glufosinate-P, including its metabolites and degradates, in or on the commodities in table 5 to paragraph (d)(2), as a result of the application of glufosinate-P or glufosinate-P-ammonium to crops listed in paragraph (a)(2) of this section. Compliance with the tolerance levels specified in table 5 to paragraph (d)(2) is to be determined by measuring the sum of glufosinate (2-amino-4-(hydroxymethylphosphinyl) butanoic acid) and its metabolite, 3-(hydroxymethylphosphinyl) propanoic acid, expressed as 2-amino-4-(hydroxymethylphosphinyl)butanoic acid equivalents.”

§ 180.474

§ 180.474 Tebuconazole; tolerances for residues.

(a) *General.* (1) Tolerances are established for residues of tebuconazole, alpha-[2-(4-chlorophenyl)ethyl]-alpha-(1,1-dimethylethyl)-1H-1,2,4-triazole-1-ethanol, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only tebuconazole [alpha-[2-(4-chlorophenyl)ethyl]-alpha-(1,1-dimethylethyl)-1H-1,2,4-triazole-1-ethanol], in or on the commodity.

| Commodity                                                                  | Parts per million |

<sup>1</sup>There are no U.S. registrations.

(2) Tolerances are established for residues of the fungicide tebuconazole, including its metabolites and degradates, in or on the commodities in the following table. Compliance with the tolerance levels specified in the following table is to be determined by measuring only the sum of tebuconazole (alpha-[2-(4-chlorophenyl)ethyl]-alpha-(1,1-dimethylethyl)-1H-1,2,4-triazole-1-ethanol) and its diol metabolite (1-(4-chlorophenyl)-4,4-dimethyl-3-(1H-1,2,4-triazole-1-yl-methyl)-pentane-3,5-diol), calculated as the stoichiometric equivalent of tebuconazole, in or on the commodity.

| Commodity                     | Parts per million |
|-------------------------------|-------------------|
| Cattle, meat byproducts ..... | 0.2               |
| Goat, meat byproducts .....   | 0.2               |
| Horse, meat byproducts .....  | 0.2               |
| Milk .....                    | 0.1               |
| Sheep, meat byproducts .....  | 0.2               |

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* Tolerances are established for residues of the fungicide tebuconazole, including its metabolites and degradates, in or on the commodities in the following table. Compliance with the tolerance levels specified below is to be determined by measuring only tebuconazole, alpha-[2-(4-chlorophenyl)ethyl]-alpha-(1,1-dimethylethyl)-1H-1,2,4-triazole-1-ethanol, in or on the commodity.

| Commodity           | Parts per million |
|---------------------|-------------------|
| Turnip, roots ..... | 0.5               |
| Turnip, tops .....  | 7.0               |

### **§ 180.475 Difenconazole; tolerances for residues.**

(a) *General.* (1) Tolerances are established for residues of difenconazole, including its metabolites and degradates, in or on the commodities in the following table. Compliance with the tolerance levels specified below is to be determined by measuring only difenconazole, 1-[2-[2-chloro-4-(4-chlorophenoxy)phenyl]-4-methyl-1,3-dioxolan-2-ylmethyl]-1H-1,2,4-triazole, in or on the following raw agricultural commodities:

| Commodity                                                                  | Parts per million |
|----------------------------------------------------------------------------|-------------------|
| Almond, hulls .....                                                        | 7.0               |
| Apple, wet pomace .....                                                    | 25                |
| Artichoke, globe .....                                                     | 1.5               |
| Aspirated grain fractions .....                                            | 95                |
| Banana <sup>1</sup> .....                                                  | 0.2               |
| Barley, grain .....                                                        | 0.1               |
| Barley, hay .....                                                          | 0.05              |
| Barley, straw .....                                                        | 0.05              |
| Beet, sugar, dried pulp .....                                              | 1.9               |
| Berry, low growing, subgroup 13-07G, except cranberry .....                | 2.5               |
| Brassica, leafy greens, subgroup 4-16B .....                               | 35                |
| Bushberry subgroup 13-07B .....                                            | 4.0               |
| Citrus, dried pulp .....                                                   | 2.0               |
| Citrus, oil .....                                                          | 25                |
| Corn, sweet, forage .....                                                  | 0.01              |
| Corn, sweet, kernel plus cob with husks removed .....                      | 0.01              |
| Corn, sweet, stover .....                                                  | 0.01              |
| Cotton, gin byproducts .....                                               | 15                |

| Wheat, forage .....                                            | 0.1               |
| Wheat, grain .....                                             | 0.1               |
| Wheat, hay .....                                               | 0.05              |
| Wheat, straw .....                                             | 0.1               |

<sup>1</sup> There are no U.S. registrations for these commodities.

<sup>2</sup> This tolerance expires on August 14, 2020.

(2) Tolerances are established for residues of difenconazole, including its metabolites and degradates, in the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring the sum of difenconazole, 1-[2-[2-chloro-4-(4-chlorophenoxy)phenyl]-4-methyl-1,3-dioxolan-2-ylmethyl]-1H-1,2,4-triazole, and its metabolite, CGA-205375, 1-[2-chloro-4-(4-chlorophenoxy)phenyl]-2-[1,2,4]triazol-1-yl-ethanol, calculated as the stoichiometric equivalent of difenconazole, in the following commodities:

| Commodity                                   | Parts per million |
|---------------------------------------------|-------------------|
| Cattle, fat .....                           | 0.10              |

**§ 180.476 Triflumizole; tolerances for residues.**

(a) *General.* (1) Tolerances are established for residues of the fungicide triflumizole, including its metabolites and degradates, in or on the commodities listed in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only the parent compound triflumizole, 1-(1-((4-chloro-2-(trifluoromethyl)phenyl)imino)-2-propoxyethyl)-1 *H* -imidazole, and its metabolites containing the 4-chloro-2-trifluoromethylaniline moiety, calculated as stoichiometric equivalent of the parent compound.

| Commodity                                                                  | Parts per million |
|----------------------------------------------------------------------------|-------------------|
| Berry, low growing, subgroup 13–07G, except cranberry .....                | 2.0               |
| Brassica, head and stem, subgroup 5A .....                                 | 8.0               |
| Brassica, leafy greens, subgroup 5B .....                                  | 40                |
| Canistel .....                                                             | 2.5               |
| Cherry, sweet .....                                                        | 1.5               |
| Cherry, tart .....                                                         | 1.5               |
| Cilantro, leaves .....                                                     | 35                |
| Fruit, pome, group 11–10 .....                                             | 0.50              |
| Fruit, small, vine climbing, except fuzzy kiwifruit, subgroup 13–07F ..... | 2.5               |
| Hazelnut .....                                                             | 0.05              |
| Hop, dried cones .....                                                     | 50                |
| Leafy greens subgroup 4A, except spinach .....                             | 35                |
| Mango .....                                                                | 2.5               |
| Papaya .....                                                               | 2.5               |
| Pineapple .....                                                            | 4.0               |
| Sapodilla .....                                                            | 2.5               |
| Sapote, black .....                                                        | 2.5               |
| Sapote, mamey .....                                                        | 2.5               |
| Star apple .....                                                           | 2.5               |
| Swiss chard .....                                                          | 18                |
| Tomato .....                                                               | 1.5               |
| Turnip, greens .....                                                       | 40                |
| Vegetable, cucurbit, group 9 .....                                         | 0.5               |

(2) Tolerances are established for residues of the fungicide triflumizole, including its metabolites and degradates, in or on the commodities of animal origin listed in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only the parent compound triflumizole, 1-(1-((4-chloro-2-(trifluoromethyl)phenyl)imino)-2-propoxyethyl)-1 *H* -imidazole, the metabolite 4-chloro-2-hydroxy-6-trifluoromethylaniline sulfate, and other metabolites containing the 4-chloro-2-trifluoromethylaniline moiety, calculated as the parent compound.

| Commodity                     | Parts per million |
|-------------------------------|-------------------|
| Cattle, fat .....             | 0.10              |
| Cattle, meat byproducts ..... | 0.20              |
| Goat, fat .....               | 0.10              |
| Goat, meat byproducts .....   | 0.20              |
| Horse, fat .....              | 0.10              |
| Horse, meat byproducts .....  | 0.20              |
| Sheep, fat .....              | 0.10              |
| Sheep, meat byproducts .....  | 0.20              |

(b) *Section 18 emergency exemptions.*

**§ 180.477 Flumiclorac pentyl; tolerances for residues.**

(a) *General.* Tolerances are established for residues of the herbicide flumiclorac pentyl, including its metabolites and degradates, in or on the commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only flumiclorac pentyl, pentyl(2-chloro-4-fluoro-5-(1,3,4,5,6,7-hexahydro-1,3-dioxo-2*H*-isoindol-2-yl)phenoxy)acetate, in or on the commodity.

## § 180.478 Rimsulfuron; tolerances for residues.

(a) *General.* Tolerances are established for residues of the herbicide rimsulfuron, including its metabolites and degradates, in or on the commodities in the following table. Compliance with the tolerance levels specified in the following table is to be determined by measuring only rimsulfuron, N-[[[(4,6-dimethoxy-2-pyrimidinyl)amino]carbonyl]-3-(ethylsulfonyl)-2-pyridinesulfonamide.

| Commodity                                                                  | Parts per million |

## § 180.479 Halosulfuron-methyl; tolerances for residues.

(a) *General.* (1) Tolerances are established for residues of the herbicide halosulfuron-methyl, methyl 5-[(4,6-dimethoxy-2-pyrimidinyl)amino]carbonylamino-sulfonyl]-3-chloro-1-methyl-1H-pyrazole-4-carboxylate, including its metabolites and degradates, in or on the commodities in the following table. Compliance with the tolerance levels specified in the following table is to be determined by measuring only those halosulfuron-methyl residues containing the 3-chlorosulfonamide (3-CSA) moiety, expressed as the stoichiometric equivalent of halosulfuron-methyl, in or on the commodity.

| Commodity                     | Parts per million |
|-------------------------------|-------------------|
| Cattle, fat .....             | 0.05              |
| Cattle, meat .....            | 0.05              |
| Cattle, meat byproducts ..... | 1.0               |
| Goat, fat .....               | 0.05              |
| Goat, meat .....              | 0.05              |
| Goat, meat byproducts .....   | 1.0               |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* Tolerances with regional registrations are established for residues of the herbicide halosulfuron-methyl, methyl 5-[(4,6-dimethoxy-2-

pyrimidinyl)amino]carbonylamino-sulfonyl]-3-chloro-1-methyl-1H-pyrazole-4-carboxylate, including its metabolites and degradates, in or on the commodities in the following table. Compliance with the tolerance levels specified in the following table is to be determined by measuring only halosulfuron-methyl.

| Commodity                                                                 | Parts per million |
|---------------------------------------------------------------------------|-------------------|
| Fruit, small vine climbing, except fuzzy kiwifruit, subgroup 13-07F ..... | 0.05              |

(d) *Indirect or inadvertent residues.*  
[Reserved]

§ 180.480 Fenbuconazole; tolerances for residues.

(a) Tolerances are established for residues of the fungicide fenbuconazole, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only the sum of fenbuconazole, alpha-[2-(4-chlorophenyl)-ethyl]-alpha-phenyl-3-(1H-1,2,4-triazole)-1-propanenitrile, and its metabolites RH-9129, cis-5-(4-chlorophenyl)-dihydro-3-phenyl-3-(1H-1,2,4-triazole-1-ylmethyl)-2-3 H-furanone, and RH-9130, trans-5-(4-chlorophenyl)-dihydro-3-phenyl-3-(1H-1,2,4-triazole-1-ylmethyl)-2-3 H-furanone, calculated as the stoichiometric equivalent of fenbuconazole, in or on the following agricultural commodities.

## § 180.482 Tebufenozide; tolerances for residues.

(a) *General.* (1) Tolerances are established for residues of the insecticide tebufenozide, including its metabolites and degradates, in or on the commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only tebufenozide, 3,5-dimethylbenzoic acid 1-(1,1-dimethylethyl)-2-(4-ethylbenzoyl)hydrazide, in or on the commodity.

| Commodity                                                      | Parts per million |
|----------------------------------------------------------------|-------------------|
| Almond, hulls .....                                            | 30                |

| Turnip, greens .....                      | 0.1               |
| Vegetable, brassica, leafy, group 5 ..... | 0.1               |

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* Tolerances are established for the indirect or inadvertent residues of flutolanil, *N*-(3-(1-methylethoxy)phenyl)-2-(trifluoromethyl)benzamide, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only flutolanil and its metabolites converted to 2-(trifluoromethyl) benzoic acid and calculated as flutolanil, in or on the following commodities.

| Commodity           | Parts per million |
|---------------------|-------------------|
| Wheat, bran .....   | 0.20              |
| Wheat, forage ..... | 2.5               |

## § 180.485 Cyproconazole; tolerances for residues.

(a) *General.* (1) Tolerances are established for residues of the free and conjugated forms of the fungicide cyproconazole, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the proposed tolerance levels specified below is to be determined by measuring only cyproconazole ( $\alpha$ -(4-chlorophenyl)- $\alpha$ -(1-cyclopropylethyl)-1*H*-1,2,4-triazole-1-ethanol) in or on the following commodities:

| Commodity                                        | Parts per million |
|--------------------------------------------------|-------------------|
| Aspirated grain fractions .....                  | 2.5               |
| Cattle, fat .....                                | 0.01              |
| Cattle, meat byproducts (except liver) .....     | 0.01              |
| Coffee bean, green (Imported) <sup>1</sup> ..... | 0.1               |
| Corn, field, forage .....                        | 0.60              |
| Corn, field, grain .....                         | 0.01              |
| Corn, field, stover .....                        | 1.2               |
| Goat, fat .....                                  | 0.01              |
| Goat, meat byproducts (except liver) .....       | 0.01              |
| Horse, fat .....                                 | 0.01              |
| Horse, meat byproducts (except liver) .....      | 0.01              |
| Peanut .....                                     | 0.01              |
| Peanut, hay .....                                | 6.0               |
| Sheep, fat .....                                 | 0.01              |
| Sheep, meat byproducts (except liver) .....      | 0.01              |
| Soybean, forage .....                            | 1.0               |
| Soybean, hay .....                               | 3.0               |
| Soybean, oil .....                               | 0.10              |
| Soybean, seed .....                              | 0.05              |
| Wheat, forage .....                              | 0.80              |
| Wheat, grain .....                               | 0.05              |
| Wheat, grain, milled byproducts .....            | 0.10              |
| Wheat, hay .....                                 | 1.3               |
| Wheat, straw .....                               | 0.90              |

<sup>1</sup>There are no U.S. registrations as of February 15, 2008 for use on coffee bean.

(2) A tolerance is established for the combined residues of the free and conjugated forms of the fungicide cyproconazole, including its metabolites and degradates, in or on the commodity in the table below. Compliance with the tolerance level specified below is to be determined by measuring only the sum of cyproconazole ( $\alpha$ -(4-chlorophenyl)- $\alpha$ -(1-cyclopropylethyl)-1*H*-1,2,4-triazole-1-ethanol) and its metabolite  $\delta$ -(4-chlorophenyl)- $\beta$ , $\delta$ -dihydroxy- $\gamma$ -methyl-1*H*-1,2,4-triazole-1-hexenoic acid, calculated as the stoichiometric equivalent of cyproconazole, in or on the following commodity:

| Commodity  | Parts per million |
|------------|-------------------|
| Milk ..... | 0.02              |

(3) Tolerances are established for the combined residues of the free and conjugated forms of the fungicide cyproconazole, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance level specified below is to be determined by measuring only the sum of cyproconazole ( $\alpha$ -(4-chlorophenyl)- $\alpha$ -(1-cyclopropylethyl)-1*H*-1,2,4-triazole-1-ethanol) and its metabolite 2-(4-chlorophenyl)-3-cyclopropyl-1-[1,2,4]triazol-1-yl-butane-

## § 180.486

2,3-diol, calculated as the stoichiometric equivalent of cyproconazole, in or on the following commodities:

| Commodity           | Parts per million |
|---------------------|-------------------|
| Cattle, liver ..... | 0.50              |
| Goat, liver .....   | 0.50              |
| Hog, liver .....    | 0.01              |
| Horse, liver .....  | 0.50              |
| Sheep, liver .....  | 0.50              |

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[63 FR 53835, Oct. 7, 1998, as amended at 71 FR 71058, Dec. 8, 2006; 73 FR 27760, May 14, 2008; 78 FR 37473, June 21, 2013]

## § 180.486 Chlorethoxyfos; tolerances for residues.

(a) *General.* Tolerances are established for residues of the insecticide chlorethoxyfos, including its metabolites and degradates, in or on the commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only chlorethoxyfos, *O,O*-diethyl *O*-(1,2,2,2-tetrachloroethyl) phosphorothioate, in or on the commodity.

| Commodity                                             | Parts per million |
|-------------------------------------------------------|-------------------|
| Corn, field, forage .....                             | 0.01              |
| Corn, field, grain .....                              | 0.01              |
| Corn, field, stover .....                             | 0.01              |
| Corn, pop, grain .....                                | 0.01              |
| Corn, pop, stover .....                               | 0.01              |
| Corn, sweet, forage .....                             | 0.01              |
| Corn, sweet, kernel plus cob with husks removed ..... | 0.01              |
| Corn, sweet, stover .....                             | 0.01              |

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[76 FR 23498, Apr. 27, 2011]

## § 180.487 Pyriithiobac sodium; tolerances for residues.

(a) *General.* Tolerances are established for residues of the herbicide, pyriithiobac sodium, (sodium 2-chloro-6-[(4,6-dimethoxyprimidin-2-

## 40 CFR Ch. I (7–1–25 Edition)

yl)thio]benzoate), resulting from the application of the pesticide chemical in or on the following foods/feeds:

| Commodity                     | Parts per million |
|-------------------------------|-------------------|
| Cotton, gin byproducts .....  | 0.15              |
| Cotton, undelinted seed ..... | 0.02              |

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[62 FR 54783, Oct. 22, 1997, as amended at 64 FR 56469, Oct. 20, 1999; 67 FR 72110, Dec. 4, 2002]

## § 180.490 Imazapic; tolerances for residues.

(a) *General.* (1) Tolerances are established for residues of the herbicide imazapic, including its metabolites and degradates, in or on the commodities listed in the following table. Compliance with the tolerance levels specified is to be determined by measuring the sum of imazapic (2-[4,5-dihydro-4-methyl-4-(1-methylethyl)-5-oxo-1*H*-imidazol-2-yl]-5-methyl-3-pyridinecarboxylic acid) and its metabolites (±)-2-[4,5-dihydro-4-methyl-4-(1-methylethyl)-5-oxo-1*H*-imidazol-2-yl]-5-hydroxymethyl-3-pyridinecarboxylic acid and (±)-2-[4,5-dihydro-4-methyl-4-(1-methylethyl)-5-oxo-1*H*-imidazol-2-yl]-5-(β-D-glucopyranosyloxy)methyl-3-pyridinecarboxylic acid, calculated as the stoichiometric equivalent of imazapic.

| Commodity                          | Parts per million |
|------------------------------------|-------------------|
| Grass, forage .....                | 15                |
| Grass, hay .....                   | 30                |
| Peanut .....                       | 0.1               |
| Soybean, seed <sup>1</sup> .....   | 0.40              |
| Sugarcane, cane <sup>2</sup> ..... | 0.03              |

<sup>1</sup> There are no US registrations as of April 4, 2014.

<sup>2</sup> There are no U.S. registrations as of June 4, 2014.

(2) Tolerances are established for residues of the herbicide imazapic, including its metabolites and degradates, in or on the commodities listed in the following table. Compliance with the tolerance levels specified is to be determined by measuring the sum of imazapic (2-[4,5-dihydro-4-methyl-4-(1-methylethyl)-5-oxo-1*H*-imidazol-2-yl]-5-

## Environmental Protection Agency

§ 180.491

methyl-3-pyridinecarboxylic acid) and its metabolite (±)-2-[4,5-dihydro-4-methyl-4-(1-methylethyl)-5-oxo-1*H*-imidazol-2-yl]-5-hydroxymethyl-3-pyridinecarboxylic acid, calculated as the stoichiometric equivalent of imazapic.

| Commodity                                    | Parts per million |
|----------------------------------------------|-------------------|
| Cattle, fat .....                            | 0.10              |
| Cattle, kidney .....                         | 1.0               |
| Cattle, meat byproducts, except kidney ..... | 0.1               |
| Cattle, meat .....                           | 0.1               |
| Goat, fat .....                              | 0.1               |
| Goat, kidney .....                           | 1.0               |
| Goat, meat byproducts, except kidney .....   | 0.1               |
| Goat, meat .....                             | 0.1               |

| Onion, dried .....                       | 300               |
| Pistachio .....                          | 300               |
| Plum, prune, dried .....                 | 2.0               |

(2) Tolerances are established for residues of the reaction product, propylene chlorohydrin, including its metabolites and degradates, in or on the commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only the sum of propylene chlorohydrin (1-chloro-2-propanol), and its isomer 2-chloro-1-propanol, calculated as the stoichiometric equivalent of propylene chlorohydrin (1-chloro-2-propanol), that results from the use of propylene oxide as a postharvest fumigant, in or on the commodity.

COMMODITY

| Commodity                                             | Parts per million |
|-------------------------------------------------------|-------------------|
| Basil, dried leaves .....                             | 6000              |
| Cacao bean, cocoa powder .....                        | 20.0              |
| Cacao bean, dried bean .....                          | 20.0              |
| Fig .....                                             | 3.0               |
| Garlic, dried .....                                   | 6000              |
| Grape, raisin .....                                   | 4.0               |
| Herbs and spices, group 19, dried, except basil ..... | 1500              |
| Nut, pine .....                                       | 10.0              |
| Nut, tree, group 14 .....                             | 10.0              |
| Nutmeat, processed, except peanuts .....              | 10.0              |
| Onion, dried .....                                    | 6000              |
| Pistachio .....                                       | 10.0              |
| Plum, prune, dried .....                              | 2.0               |

(c) *Tolerances with regional registrations.* [Reserved]

## § 180.492

(d) *Indirect or inadvertent residues.*  
[Reserved]

[65 FR 33702, May 24, 2000, as amended at 68 FR 39430, July 1, 2003; 72 FR 49651, Aug. 29, 2007; 73 FR 54963, Sept. 24, 2008; 76 FR 38037, June 29, 2011; 77 FR 28495, May 15, 2012]

### § 180.492 Triflurosulfuron-methyl; tolerances for residues.

(a) *General.* Tolerances are established for residues of triflurosulfuron-methyl, including its metabolites and degradates, in or on the commodities listed in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only triflurosulfuron-methyl (methyl 2-[[[4-(dimethylamino)-6-(2,2,2-trifluoroethoxy)-1,3,5-triazin-2-yl]amino]carbonyl]amino]sulfonyl]-3-methylbenzoate) in or on the following commodities:

| Commodity                 | Parts per million |
|---------------------------|-------------------|
| Beet, garden, roots ..... | 0.01              |
| Beet, garden, tops .....  | 0.02              |
| Beet, sugar, roots .....  | 0.05              |
| Beet, sugar, tops .....   | 0.05              |
| Chicory, roots .....      | 0.05              |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.*  
[Reserved]

[67 FR 40196, June 12, 2002, as amended at 76 FR 22625, Apr. 22, 2011]

### § 180.493 Dimethomorph; tolerances for residues.

(a) *General.* Tolerances are established for residues of the fungicide dimethomorph, 4-[3-(4-chlorophenyl)-3-(3,4-dimethoxyphenyl)-1-oxo-2-propen-1-yl]morpholine, including its metabolites and degradates, in or on the commodities in the following table. Compliance with the tolerance levels specified in the following table is to be determined by measuring only dimethomorph in or on the commodities.

| Commodity                                  | Parts per million |
|--------------------------------------------|-------------------|
| Brassica, head and stem, subgroup 5A ..... | 6.0               |
| Brassica, leafy greens, subgroup 5B .....  | 30.0              |
| Ginseng .....                              | 0.90              |
| Grape .....                                | 3.0               |

## 40 CFR Ch. I (7–1–25 Edition)

| Commodity                                        | Parts per million |
|--------------------------------------------------|-------------------|
| Grape, raisin .....                              | 7.0               |
| Hop, dried cones .....                           | 60                |
| Onion, bulb, subgroup 3–07A .....                | 0.6               |
| Onion, green, subgroup 3–07B .....               | 15.0              |
| Papaya <sup>1</sup> .....                        | 1.5               |
| Potato .....                                     | 0.05              |
| Potato, wet peel .....                           | 0.20              |
| Strawberry .....                                 | 0.90              |
| Taro, corm .....                                 | 0.5               |
| Taro, leaves .....                               | 6.0               |
| Turnip, greens .....                             | 20.0              |
| Vegetable, cucurbit, group 9 .....               | 0.5               |
| Vegetable, fruiting, group 8 .....               | 1.5               |
| Vegetable, leafy (except Brassica) group 4 ..... | 30.0              |

<sup>1</sup> There are no U.S. registrations as of January 20, 2015.

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* Tolerances with regional registrations are established for residues of the fungicide dimethomorph, 4-[3-(4-chlorophenyl)-3-(3,4-dimethoxyphenyl)-1-oxo-2-propen-1-yl]morpholine, including its metabolites and degradates, in or on the commodities in the following table. Compliance with the tolerance levels specified in the following table is to be determined by measuring only dimethomorph in or on the commodity.

| Commodity                   | Parts per million |
|-----------------------------|-------------------|
| Bean, lima, succulent ..... | 0.60              |

(d) *Indirect or inadvertent residues.* Tolerances are established for the indirect or inadvertent residues of the fungicide dimethomorph, 4-[3-(4-chlorophenyl)-3-(3,4-dimethoxyphenyl)-1-oxo-2-propen-1-yl]morpholine, including its metabolites and degradates, in or on the commodities in the following table. Compliance with the tolerance levels specified in the following table is to be determined by measuring only dimethomorph in or on the commodity.

| Commodity           | Parts per million |
|---------------------|-------------------|
| Wheat, forage ..... | 0.15              |
| Wheat, hay .....    | 0.15              |
| Wheat, straw .....  | 0.4               |

## Environmental Protection Agency

## § 180.495

### § 180.494 Pyridaben; tolerance for residues.

(a) *General.* Tolerances are established for residues of the insecticide pyridaben, including its metabolites and degradates, in or on the commodities as indicated in the following table. Compliance with the tolerance levels specified below for plant commodities is to be determined by measuring the insecticide pyridaben [2-tert-butyl-5-(4-tert-butylbenzylthio)-4-chloropyridazin-3(2*H*)-one] on the plant commodity. Compliance with the tolerance levels specified below for animal commodities is to be determined by measuring the insecticide pyridaben and its metabolites, [2-tert-butyl-5-(4-(1-carboxy-1-methylethyl) benzylthio)-4-chloropyridazin-3 (2*H*)one] and [2-tert-butyl-5-[4-(1, 1-dimethyl-2-hydroxyethyl)benzylthio-4-chloropyridazin-3(2*H*)one] on the animal commodity.

| Commodity                                                                  | Parts per million |
|----------------------------------------------------------------------------|-------------------|
| Almond, hulls .....                                                        | 4.0               |
| Apple, wet pomace .....                                                    | 0.75              |
| Berry, low growing, subgroup 13-07G, except cranberry .....                | 2.5               |
| Canistel .....                                                             | 0.10              |
| Cattle, fat .....                                                          | 0.05              |
| Cattle, meat .....                                                         | 0.05              |
| Cattle, meat byproducts .....                                              | 0.05              |
| Citrus, dried pulp .....                                                   | 1.5               |
| Citrus, oil .....                                                          | 10.0              |
| Cucumber .....                                                             | 0.50              |

| Sapote, black .....                                                        | 0.10              |
| Sapote, mamey .....                                                        | 0.10              |
| Sheep, fat .....                                                           | 0.05              |
| Sheep, meat .....                                                          | 0.05              |
| Sheep, meat byproducts .....                                               | 0.05              |
| Star apple .....                                                           | 0.10              |
| Tomato .....                                                               | 0.15              |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* Tolerances with regional registration, as defined in §180.1(m) are established for residues of the insecticide pyridaben, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring the insecticide pyridaben [2-tert-butyl-5-(4-tert-butylbenzylthio)-4-chloropyridazin-3(2*H*)-one] on the following plant commodity.

| Commodity       | Parts per million |
|-----------------|-------------------|
| Cranberry ..... | 0.5               |

(d) *Indirect or inadvertent residues.*  
[Reserved]

[65 FR 43712, July 14, 2000, as amended at 66 FR 33199, June 21, 2001; 70 FR 55769, Sept. 23, 2005; 76 FR 56015, Sept. 15, 2010; 81 FR 70979, Oct. 14, 2016]

### § 180.495 Spinosad; tolerances for residues.

(a) *General.* Tolerances are established for residues of the insecticide spinosad, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only the sum of spinosyn A (Factor A; CAS #131929-60-7; (2*R*,3*aS*,5*aR*,5*bS*,9*S*,13*S*,14*R*,16*aS*,16*bR*)-2-[(6-deoxy-2,3,4-tri-*O*-methyl- $\alpha$ -L-mannopyranosyl)oxy]-13-[[[(2*R*,5*S*,6*R*)-5-(dimethylamino)tetrahydro-6-methyl-2*H*-pyran-2-yl]oxy]-9-ethyl-2,3,3*a*,5*a*,5*b*,6,9,10,11,12,13,14,16*a*,16*b*-tetradecahydro-14-methyl-1*H*-as-indaceno[3,2-*d*]oxacyclododecin-7,15-dione); and Spinosyn D (Factor D; CAS #131929-63-0) or (2*S*,3*aR*,5*aS*,5*bS*,9*S*,13*S*,14*R*,16*aS*,16*bS*)-2-[(6-deoxy-2,3,4-tri-*O*-methyl- $\alpha$ -L-mannopyranosyl)oxy]-13-[[[(2*R*,5*S*,6*R*)-5-(dimethylamino)tetrahydro-6-methyl-2*H*-pyran-2-yl]oxy]-9-ethyl-2,3,3*a*,5*a*,5*b*,6,9,10,11,12,13,14,16*a*,16*b*-tetradecahydro-4,14-dimethyl-1*H*-as-indaceno[3,2-*d*]oxacyclododecin-7,15-dione), calculated as the stoichiometric equivalent of spinosad.

TABLE 1 TO PARAGRAPH (a)

| Commodity                                                                  | Parts per million |
|----------------------------------------------------------------------------|-------------------|
| Acerola .....                                                              | 1.5               |

### § 180.498 Sulfentrazone; tolerances for residues.

(a) *General.* (1) Tolerances are established for the combined residues of the free and conjugated forms of sulfentrazone, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only the sum of sulfentrazone (*N*-[2,4-dichloro-5-[4-(difluoromethyl)-4,5-dihydro-3-methyl-5-oxo-1*H*-1,2,4-triazol-1-yl]phenyl]methanesulfonamide) and its metabolite HMS (*N*-(2,4-dichloro-5-(4-(difluoromethyl)-4,5-dihydro-3-hydroxymethyl-5-oxo-1*H*-1,2,4-triazol-1-yl)phenyl)methanesulfonamide, calculated as the stoichiometric equivalent of sulfentrazone in or on the following commodities.

TABLE 1 TO PARAGRAPH (a)(1)

| Commodity           | Parts per million |
|---------------------|-------------------|
| Soybean, seed ..... | 0.05              |

(2) Tolerances are established for the combined residues of the free and conjugated forms of sulfentrazone, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only the sum of sulfentrazone (*N*-[2,4-dichloro-5-[4-(difluoromethyl)-4,5-dihydro-3-methyl-5-oxo-1*H*-1,2,4-triazol-1-yl]phenyl]methanesulfonamide) and its metabolites HMS (*N*-(2,4-dichloro-5-(4-(difluoromethyl)-4,5-dihydro-3-hydroxymethyl-5-oxo-1*H*-1,2,4-triazol-1-yl)phenyl)methanesulfonamide) and DMS (*N*-(2,4-dichloro-5-(4-(difluoromethyl)-4,5-dihydro-5-oxo-1*H*-1,2,4-triazol-1-

yl)phenyl)methanesulfonamide, calculated as the stoichiometric equivalent of sulfentrazone in or on the following commodities.

TABLE 2 TO PARAGRAPH (a)(2)

| Commodity                                                      | Parts per million |
|----------------------------------------------------------------|-------------------|
| Apple .....                                                    | 0.15              |
| Berry and small fruit, group 13-07 .....                       | 0.15              |
| Brassica, leafy greens, subgroup 4-16B .....                   | 0.60              |
| Chia, seed .....                                               | 0.15              |
| Corn, field, forage .....                                      | 0.20              |
| Corn, field, grain .....                                       | 0.15              |

| Vegetable, tuberous and corm, subgroup 1C .....                | 0.15              |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* Tolerances with regional registration are established for the combined residues of the free and conjugated forms of sulfentrazone, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only the sum of sulfentrazone (*N*-[2,4-dichloro-5-[4-(difluoromethyl)-4,5-dihydro-3-methyl-5-oxo-1*H*-1,2,4-triazol-1-yl]phenyl]methanesulfonamide) and its metabolites HMS (*N*-(2,4-dichloro-5-(4-(difluoromethyl)-4,5-dihydro-3-hydroxymethyl-5-oxo-1*H*-1,2,4-triazol-1-yl)phenyl)methanesulfonamide) and DMS (*N*-(2,4-dichloro-5-(4-(difluoromethyl)-4,5-dihydro-5-oxo-1*H*-1,2,4-triazol-1-

**§ 180.499**

yl)phenyl)methanesulfonamide, calculated as the stoichiometric equivalent of sulfentrazone in or on the following commodities.

| Commodity                   | Parts per million |
|-----------------------------|-------------------|
| Bean, lima, succulent ..... | 0.15              |
| Cowpea, succulent .....     | 0.15              |
| Wheat, forage .....         | 0.50              |
| Wheat, grain .....          | 0.15              |
| Wheat, hay .....            | 0.30              |
| Wheat, straw .....          | 1.5               |

(d) *Indirect or inadvertent residues.* Tolerances are established for inadvertent and indirect combined residues of the free and conjugated forms of sulfentrazone, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only the sum of sulfentrazone (*N*-[2,4-dichloro-5-[4-(difluoromethyl)-4,5-dihydro-3-methyl-5-oxo-1*H*-1,2,4-triazol-1-yl]phenyl]methanesulfonamide) and its metabolites HMS (*N*-(2,4-dichloro-5-(4-(difluoromethyl)-4,5-dihydro-3-hydroxymethyl-5-oxo-1*H*-1,2,4-triazol-1-yl)phenyl)methanesulfonamide) and DMS (*N*-(2,4-dichloro-5-(4-(difluoromethyl)-4,5-dihydro-5-oxo-1*H*-1,2,4-triazol-1-yl)phenyl)methanesulfonamide, calculated as the stoichiometric equivalent of sulfentrazone in or on the following commodities when present therein as a result of the application of sulfentrazone to growing crops.

| Commodity                                                                          | Parts per million |
|------------------------------------------------------------------------------------|-------------------|
| Grain, cereal (excluding sweet corn), Hulls .....                                  | 0.30              |
| Grain, cereal, forage, fodder and straw, group 16, except sweet corn; forage ..... | 0.2               |
| Grain, cereal, forage, fodder and straw, group 16, except sweet corn; hay .....    | 0.2               |
| Grain, cereal, forage, fodder and straw, group 16, except sweet corn; stover ..... | 0.1               |

**§ 180.499 Propamocarb; tolerances for residues.**

(a) *General.* Tolerances are established for the residues of propamocarb, including its metabolites and degradates, in or on the commodities specified in table 1 to this paragraph (a) resulting from the application of the hydrochloride salt of propamocarb. Compliance with the tolerance levels in table 1 to this paragraph (a) is to be determined by measuring only propamocarb (propyl *N*-[3-(dimethylamino)propyl]carbamate):

TABLE 1 TO PARAGRAPH (a)

### § 180.500 Imazapyr; tolerances for residues.

(a) *General.* Tolerances are established for residues of the herbicide, imazapyr, including its metabolites and degradates, in or on the commodities in the following table. Compliance with the tolerance levels specified in the following table is to be determined by measuring only the residues of imazapyr [2-[4,5-dihydro-4-methyl-4-(1-methylethyl)-5-oxo-1H-imidazol-2-yl]-3-pyridinecarboxylic acid].

TABLE 1 TO PARAGRAPH (a)

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.*  
[Reserved]

[68 FR 55484, Sept. 26, 2003, as amended at 78 FR 66653, Nov. 6, 2013; 79 FR 19487, Apr. 9, 2014; 88 FR 57894, Aug. 24, 2023]

### § 180.501 Hydroprene; tolerances for residues.

(a) *General.* A tolerance of 0.2 part per million is established for residues of hydroprene [(S)-(Ethyl (2E,4E,7S)-3,7,11-trimethyl-2,4-dodecadienoate)], (CAS Reg. No. 65733-18-8) on food commodities in food-handling establishments in accordance with the following prescribed conditions:

(1) Application shall be limited to spot, crack and crevice, perimeter and ultra low volume (ULV) fogging treatment in food storage or food-handling establishments, including warehouses, food service, manufacturing, and processing establishments such as restaurants, cafeterias, supermarkets, bakeries, breweries, dairies, meat slaughtering and packing plants, and canneries where food and food products are held, processed, and served: Provided that the food is removed or covered prior to such use, and food-processing surfaces are covered during treatment or thoroughly cleaned before using, or in the case of point-source device treatments, devices must not come into direct contact with food preparation surfaces and must be in a minimum distance of 3 feet from exposed foods.

(2) To assure safe use of the insect growth regulator, the label and labeling shall conform to that registered by the U.S. Environmental Protection Agency, and it shall be used in accordance with such label and labeling.

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.*  
[Reserved]

### § 180.502 Aminoethoxyvinylglycine hydrochloride (aviglycine HCl); tolerances for residues.

(a) *General.* Tolerances are established for residues of

§ 180.503

aminoethoxyvinylglycine hydrochloride (aviglycine HCl) in or on the following food commodities:

| Commodity                                   | Parts per million |
|---------------------------------------------|-------------------|
| Apple .....                                 | 0.08              |
| Fruit, stone, group 12, except cherry ..... | 0.170             |
| Pear .....                                  | 0.08              |

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[62 FR 24838, May 7, 1997, as amended at 64 FR 31129, June 10, 1999; 66 FR 36481, 36484, July 12, 2001; 69 FR 7606, Feb. 18, 2004]

§ 180.503 Cymoxanil, tolerance for residues.

(a) *General.* Tolerances are established for residues of the fungicide, cymoxanil, 2-cyano -N-[(ethylamino)carbonyl]-2-(methoxyimino) acetamide, in or on the following food commodities:

| Commodity                          | Parts per million |
|------------------------------------|-------------------|
| Caneberry, subgroup 13A-07 .....   | 4.0               |
| Cilantro, leaves .....             | 19                |
| Hop, dried cones .....             | 7.0               |
| Leafy greens, subgroup 4A .....    | 19                |
| Leaf petioles, subgroup 4B .....   | 6.0               |
| Lychee <sup>1</sup> .....          | 1.0               |
| Onion, bulb, subgroup 3-07A .....  | 0.05              |
| Onion, green, subgroup 3-07B ..... | 1.1               |
| Potato .....                       | 0.05              |
| Vegetable, cucurbit, group 9 ..... | 0.05              |
| Vegetable, fruiting, group 8 ..... | 0.2               |

<sup>1</sup> There is no U.S. registration for lychee.

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with a regional registration.* Tolerances with a regional registration as defined in §180.1(l) are established for the residues of the fungicide cymoxanil, 2-cyano -N-[(ethylamino)carbonyl]-2-(methoxyimino) acetamide) in or on the raw agricultural commodities:

| Commodity   | Parts per million |
|-------------|-------------------|
| Grape ..... | 0.10              |

40 CFR Ch. I (7–1–25 Edition)

(d) *Indirect or inadvertent residues.* [Reserved]

§ 180.504 [Reserved]

§ 180.505 Emamectin; tolerances for residues.

(a) *General.* (1) Tolerances are established for emamectin, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only the sum of emamectin (a mixture of a minimum of 90% 4'-epi-methylamino-4'-deoxyavermectin B<sub>1a</sub> and maximum of 10% 4'-epi-methylamino-4'-deoxyavermectin B<sub>1b</sub>) and its metabolites 8,9-isomer of the B<sub>1a</sub> and B<sub>1b</sub> component of the parent (8,9-ZMA), or 4'-deoxy-4'-epi-amino-avermectin B<sub>1a</sub> and 4'-deoxy-4'-epi-amino-avermectin B<sub>1b</sub>; 4'-deoxy-4'-epi-amino avermectin B<sub>1a</sub> (AB<sub>1a</sub>); 4'-deoxy-4'-epi-(N-formyl-N-methyl)amino-avermectin (MFB<sub>1a</sub>); and 4'-deoxy-4'-epi-(N-formyl)amino-avermectin B<sub>1a</sub> (FAB<sub>1a</sub>), calculated as the stoichiometric equivalent of emamectin.

TABLE 1 TO PARAGRAPH (a)(1)

| Commodity                                            | Parts per million |
|------------------------------------------------------|-------------------|
| Almond, hulls .....                                  | 0.20              |

### § 180.509 Mefenpyr-diethyl; tolerance for residues.

(a) *General.* Tolerances are established for residues of the safener, mefenpyr-diethyl, including its metabolites and degradates, when applied at a rate no greater than 0.053 pound safener per acre per growing season in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only the sum of mefenpyr-diethyl (1-(2,4-dichlorophenyl)-4,5-dihydro-5-methyl-1H-pyrazole-3,5-dicarboxylic acid, diethyl ester) and its 2,4-dichlorophenyl-pyrazoline metabolites, calculated as the stoichiometric equivalent of mefenpyr-diethyl, in or on the commodity.

(2) A tolerance of 0.10 parts per million is established for all food commodities as a result of the proposed use of NYLAR in food handling establishments where food and food products are held, prepared, processed or served. Application is limited to space, general surface, spot, and/or crack and crevice treatment in food handling establishments where food and food products are held, processed, prepared and served. Space and general surface application may be used only when the facility is not in operation provided exposed food is covered or removed from the area being treated prior to application. Spot, and/or crack and crevice treatment may be used while the facility is in operation provided exposed food is covered or removed from the area being treated prior to application. Food contact surfaces should be thoroughly washed with an effective cleaning compound and rinsed with potable water after use of the product. To assure safe use of this additive, its label and labeling shall conform to that registered with the U.S. Environmental Protection Agency, and shall be used in accordance with such label and labeling.

(b) *Section 18 emergency exemptions.*  
[Reserved]

## Environmental Protection Agency

§ 180.511

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[64 FR 10233, Mar. 3, 1999]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 180.510, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at [www.govinfo.gov](http://www.govinfo.gov).

### § 180.511 Buprofezin; tolerances for residues.

(a) *General.* Tolerances are established for residues of buprofezin, including its metabolites and degradates in or on the commodities in the table in this paragraph (a). Compliance with the tolerance levels specified in the table in this paragraph (a) is to be determined by measuring only the buprofezin, 2-[(1,1-dimethylethyl)imino]tetrahydro-3-(1-methylethyl)-5-phenyl-4*H*-1,3,5-thiadiazin-4-one, in the commodity.

| Commodity                                                                  | Parts per million |
|----------------------------------------------------------------------------|-------------------|
| Almond, hulls .....                                                        | 2.0               |

§ 180.513 Chlorfenapyr; tolerances for residues.

(a) *General.* (1) Tolerances are established for residues of chlorfenapyr, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only chlorfenapyr, 4-bromo-2-(4-chlorophenyl)-1-(ethoxymethyl)-5-(trifluoromethyl)-1H-pyrrole-3-carbonitrile, in or on the commodity.

| Commodity                             | Parts per million |
|---------------------------------------|-------------------|
| Basil, fresh leaves .....             | 80                |
| Chive, fresh leaves .....             | 20                |
| Cucumber .....                        | 0.5               |
| Tea, dried <sup>1</sup> .....         | 70                |
| Vegetable, fruiting, group 8–10 ..... | 2                 |

<sup>1</sup> There are no U.S. registrations for Tea, dried as of January 26, 2018.

(2) A tolerance of 0.01 parts per million is established for residues of chlorfenapyr in or on all food commodities (other than those covered by a higher tolerance as a result of use on growing crops) in food/feed handling areas where food/feed products are prepared, held, processed, or served and in accordance with the following prescribed conditions:

(i) Application shall be no greater than a 0.5% active ingredient solution for spot crack and crevice use in food/feed handling establishments, where

40 CFR Ch. I (7–1–25 Edition)

food and food products are held, processed, prepared and/or served.

(ii) Application may only be undertaken when the facility is not in operation, and provided exposed food has been covered, or removed from the area being treated prior to application.

(iii) Food contact surfaces and equipment should be thoroughly washed with an effective cleaning compound, and rinsed with potable water after each use of the product.

(iv) Contamination of food or food contact surfaces shall be avoided. Application excludes any direct application to any food, food packaging, or any food contact surfaces.

(v) To assure safe use, the label and labeling shall conform to that registered by the U.S. Environmental Protection Agency, and it shall be used in accordance with such label and labeling.

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

§ 180.515

## § 180.515 Carfentrazone-ethyl; tolerances for residues.

(a) *General.* Tolerances are established for residues of the herbicide carfentrazone-ethyl, including its metabolites and degradates, in or on the commodities listed in the following table. Compliance with the following tolerance levels is to be determined by measuring only the sum of carfentrazone-ethyl (ethyl-alpha-2-dichloro-5-[4-(difluoromethyl)-4,5-dihydro-3-methyl-5-oxo-1*H*-1,2,4-triazol-1-yl]-4-fluorobenzenepropanoate) and its metabolite carfentrazone-chloropropionic acid (alpha, 2-dichloro-5-[4-(difluoromethyl)-4,5-dihydro-3-methyl-5-oxo-1*H*-1,2,4-triazol-1-yl]-4-fluorobenzenepropanoic acid), calculated as the stoichiometric equivalent of carfentrazone-ethyl, in or on the following commodities:

| Commodity                                                           | Parts per million |
|---------------------------------------------------------------------|-------------------|

§ 180.516 Fludioxonil; tolerances for residues.

(a) *General.* (1) Tolerances are established for residues of the fungicide fludioxonil, including its metabolites and degradates, in or on the commodities in the following table. Compliance with the tolerance levels specified in the following table is to be determined by measuring only fludioxonil, 4-(2,2-difluoro-1,3-benzodioxol-4-yl)-1-*H*-pyrrole-3-carbonitrile).

<sup>1</sup> There are no U.S. registrations as of July 28, 2021.

(2) Tolerances are established for residues of the fungicide fludioxonil, including its metabolites and degradates, in or on the commodities in the following table. Compliance with the tolerance levels specified in the following table is to be determined by measuring only the sum of fludioxonil, 4-(2,2-difluoro-1,3-benzodioxol-4-yl)-1-*H*-pyrrole-3-carbonitrile), and its metabolites converted to 2,2-difluoro-1,3-benzodioxole-4-carboxylic acid, calculated as the stoichiometric equivalent of fludioxonil.

[62 FR 56082, Oct. 29, 1997]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 180.516, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at [www.govinfo.gov](http://www.govinfo.gov).

## § 180.517 Fipronil; tolerances for residues.

(a) *General.* Therefore, tolerances are established for combined residues of the insecticide fipronil (5-amino-1-[2,6-dichloro-4-(trifluoromethyl)phenyl]-4-[(1*R,S*)-(trifluoromethyl)sulfinyl]-1*H*-pyrazole-3-carbonitrile) and its metabolites 5-amino-1-[2,6-dichloro-4-(trifluoromethyl)phenyl]-4-[(trifluoromethyl) sulfonyl]-1*H*-pyrazole-3-carbonitrile and 5-amino-1-[2,6-dichloro-4-(trifluoromethyl) phenyl]-4-[(trifluoromethyl)thio]-1*H*-pyrazole-3-carbonitrile and its photodegrade 5-amino-1-(2,6-dichloro-4-(trifluoromethyl)phenyl)-4-[(1*R,S*)-(trifluoromethyl)-1*H*-pyrazole-3-carbonitrile in or on the following items at the levels specified:

| Sheep, meat byproducts, except liver ..... | 0.04              |

(b) *Section 18 emergency exemptions.* Time-limited tolerances are established for combined residues of the insecticide, fipronil, 5-amino-1-(2,6-dichloro-4-(trifluoromethyl) phenyl)-4-((1R,S)-trifluoromethyl)sulfinyl)-1H-pyrazole-3-carbonitrile and its 2 metabolites MB45950 (5-amino-1-(2,6-dichloro-4-(trifluoromethyl)phenyl)-4-[(trifluoromethyl)thio]-1H-pyrazole-3-carbonitrile) and MB46136 (5-amino-1-(2,6-dichloro-4-(trifluoromethyl)phenyl)-4-[(trifluoromethyl)sulfonyl]-1H-pyrazole-3-carbonitrile) and its photodegradate MB46513 (5-amino-1-(2,6-dichloro-4-(trifluoromethyl)phenyl)-4-[(1R,S)-(trifluoromethyl)]-1H-pyrazole-3-carbonitrile), in connection with use of the pesticide under Section 18 emergency exemptions granted by EPA. The tolerances expire and are revoked on the dates specified in the table for this paragraph.

| Commodity      | Parts per million | Expiration/revocation date |
|----------------|-------------------|----------------------------|
| Rutabaga ..... | 1.0               | 12/31/16                   |
| Turnip .....   | 1.0               | 12/31/16                   |

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* Tolerances are established for combined indirect or inadvertent residues of the insecticide fipronil and its metabolites and photodegradate in or on food commodities when present therein as a result of the application of fipronil to growing crops listed in paragraphs (a) and (b) of this section and other nonfood crops to read as follows:

| Commodity           | Parts per million |
|---------------------|-------------------|
| Wheat, forage ..... | 0.02              |
| Wheat, grain .....  | 0.005             |
| Wheat, hay .....    | 0.03              |
| Wheat, straw .....  | 0.03              |

### § 180.519 Bromide ion and residual bromine; tolerances for residues.

(a) *General.* The food additives, bromide ion and residual bromine, may be present in water, potable in accordance with the following conditions:

(1) The food additives are present as a result of treating water aboard ships with a polybrominated ion-exchange resin (as a source of bromine) under the supervision of trained personnel.

(2) Residual bromine levels are controlled to not exceed 1.0 part per million (ppm) in the final treated water. Control is effected using calibrated recirculating or proportioning bromine feeder equipment and periodic checks of residual bromine using a bromine test kit. To assure safe use of the additives, the label and labeling of the disinfectant formulation containing the food additives shall conform to the

label and labeling registered by the U.S. Environmental Protection Agency.

(3) No tolerance is established for bromide ion levels.

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

### § 180.521 Fumigants for grain-mill machinery; tolerances for residues.

(a) *General.* Fumigants may be safely used in or on grain-mill machinery in accordance with the following prescribed conditions:

(1) The fumigants consist of methyl bromide.

(2) To assure safe use of the fumigant, its label and labeling shall conform to the label and labeling registered by the U.S. Environmental Protection Agency.

(3) Residues of inorganic bromides (calculated as Br) in milled fractions derived from cereal grain from all fumigation sources, including fumigation of grain-mill machinery, shall not exceed 125 parts per million.

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[40 FR 14156, Mar. 28, 1975. Redesignated at 41 FR 26568, June 28, 1976, as amended at 49 FR 44459, Nov. 7, 1984. Further redesignated at 53 FR 24667, June 29, 1988, as amended at 54 FR 6130, Feb. 8, 1989. Further redesignated and amended at 63 FR 34319, June 24, 1998]

### § 180.522 Fumigants for processed grains used in production of fermented malt beverage; tolerances for residues.

(a) *General.* Fumigants for processed grain may be safely used, in accordance with the following conditions.

(1) *Methyl bromide.* Total residues of inorganic bromides (calculated as Br) from the use of this fumigant shall not exceed 125 parts per million.

§ 180.523

(2) Methyl bromide is used to fumigate corn grits and cracked rice in the production of fermented malt beverage.

(3) To assure safe use of the fumigant, its label and labeling shall conform to the label and labeling registered by the U.S. Environmental Protection Agency, and the usage employed should conform with such label or labeling.

(4) The total residue of inorganic bromides in fermented malt beverage, resulting from the use of corn grits and cracked rice fumigated with the fumigant described in paragraph (a)(2) of this section plus additional residues of inorganic bromides that may be present from uses in accordance with other regulations in this chapter promulgated under section 408 and/or 409 of the Act, does not exceed 25 parts per million bromide (calculated as Br).

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[71 FR 74818, Dec. 13, 2006]

§ 180.523 Metaldehyde; tolerances for residues.

(a) *General.* Tolerances are established for residues of the molluscicide metaldehyde, including its metabolites and degradates, in or on the commodities listed in the following table. Compliance with the specified tolerance levels is to be determined by measuring only metaldehyde, 2,4,6,8-tetramethyl-1,3,5,7-tetroxocane, in or on the commodity.

| Commodity                                             | Parts per million |
|-------------------------------------------------------|-------------------|
| Artichoke, globe .....                                | 0.07              |
| Berry, low growing, subgroup 13-07G .....             | 6.25              |
| Bushberry subgroup 13-07B .....                       | 0.15              |
| Cactus .....                                          | 0.07              |
| Caneberry subgroup 13-07A .....                       | 0.15              |
| Corn, field, forage .....                             | 0.30              |
| Corn, field, grain .....                              | 0.05              |
| Corn, field, stover .....                             | 0.10              |
| Corn, sweet, forage .....                             | 0.30              |
| Corn, sweet, kernel plus cob with husks removed ..... | 0.05              |
| Corn, sweet, stover .....                             | 0.10              |
| Fruit, citrus, group 10-10 .....                      | 0.26              |
| Ginseng .....                                         | 0.05              |

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[71 FR 74819, Dec. 13, 2006]

## § 180.526 Synthetic isoparaffinic petroleum hydrocarbons; tolerances for residues.

(a) *General.* Synthetic isoparaffinic petroleum hydrocarbons complying with 21 CFR 172.882 (a) and (b) may be safely used as a component of insecticide formulations for use on animal feed in an amount no greater than reasonably required to accomplish its intended effect as an adjuvant in the insecticide formulation and shall not be intended to accomplish any effect in animal feed. It is used or intended for use as a component of insecticide formulations used in compliance with regulations issued in 40 CFR part 180 and in this part.

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

| Sapote, mamey .....                                                      | 1.2               |
| Star apple .....                                                         | 1.2               |
| Starfruit .....                                                          | 1.5               |
| Sugar apple .....                                                        | 4                 |
| Tropical and subtropical, small fruit, inedible peel, subgroup 24A ..... | 2                 |
| Vegetable, Brassica, head and stem, group 5–16 .....                     | 1                 |
| Vegetable, cucurbit, group 9 .....                                       | 0.70              |
| Vegetable, fruiting, group 8–10 .....                                    | 1.5               |
| Vegetable, leaves of root and tuber, group 2 .....                       | 10                |
| Vegetable, root, except sugarbeet, subgroup 1B .....                     | 0.75              |
| Vegetable, tuberous and corn, subgroup 1C .....                          | 0.01              |
| Watercress .....                                                         | 20                |
| Wax jambu .....                                                          | 1.5               |

<sup>1</sup> Import only.

(2) Tolerances are established for residues of the fungicide cyprodinil, including its metabolites and degradates, in the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only the sum of cyprodinil 4-cyclopropyl-6-methyl-*N*-phenyl-2-pyrimidinamine and free and conjugated CGA–304075 4-(4-cyclopropyl-6-methyl-pyrimidin-2-ylamino)-phenol, calculated as the stoichiometric equivalent of cyprodinil.

| Commodity                     | Parts per million |
|-------------------------------|-------------------|
| Cattle, meat byproducts ..... | 0.02              |
| Goat, meat byproducts .....   | 0.02              |
| Horse, meat byproducts .....  | 0.02              |
| Sheep, meat byproducts .....  | 0.02              |

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

# Environmental Protection Agency

§ 180.533

(d) *Indirect or inadvertent residues.*  
[Reserved]

[63 FR 17706, Apr. 10, 1998]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 180.532, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at [www.govinfo.gov](http://www.govinfo.gov).

## § 180.533 Esfenvalerate; tolerances for residues.

(a) *General.* (1) Tolerances are established for the combined residues of the insecticide esfenvalerate, (S)-cyano(3-phenoxyphenyl)methyl-(S)-4-chloro- $\alpha$ -(1-methylethyl)benzeneacetate, its non-racemic isomer, (R)-cyano(3-phenoxyphenyl)methyl-(R)-4-chloro- $\alpha$ -(1-methylethyl)benzeneacetate and its diastereomers (S)-cyano(3-phenoxyphenyl)methyl-(R)-4-chloro- $\alpha$ -(1-methylethyl)benzeneacetate and (R)-cyano(3-phenoxyphenyl)methyl-(S)-4-chloro- $\alpha$ -(1-methylethyl)benzeneacetate, in or on food commodities as follows:

| Commodity                                             | Parts per million |
|-------------------------------------------------------|-------------------|
| Almond .....                                          | 0.2               |
| Almond, hulls .....                                   | 5.0               |
| Apple .....                                           | 1.0               |
| Artichoke, globe .....                                | 1.0               |
| Bean, dry, seed .....                                 | 0.25              |
| Bean, snap, succulent .....                           | 1.0               |
| Beet, sugar, roots .....                              | 0.05              |
| Beet, sugar, tops .....                               | 5.0               |
| Blueberry .....                                       | 1.0               |
| Broccoli .....                                        | 1.0               |
| Cabbage, except Chinese cabbage .....                 | 3.0               |
| Caneberry subgroup 13A .....                          | 1.0               |

| Sweet potato, roots .....                    | 0.05              |
| Tomato .....                                 | 0.5               |
| Turnip, greens .....                         | 7.0               |
| Turnip, roots .....                          | 0.5               |
| Walnut .....                                 | 0.2               |
| Watermelon .....                             | 0.5               |

(2) A tolerance of 0.05 ppm on raw agricultural food commodities (other than those food commodities already covered by a higher tolerance as a result of use on growing crops) is established for the combined residues of the insecticide esfenvalerate, (S)-cyano(3-phenoxyphenyl)methyl-(S)-4-chloro- $\alpha$ -(1-methylethyl)benzeneacetate, its non-racemic isomer, (R)-cyano(3-phenoxyphenyl)methyl-(R)-4-chloro- $\alpha$ -(1-methylethyl)benzeneacetate and its diastereomers (S)-cyano(3-phenoxyphenyl)methyl-(R)-4-chloro- $\alpha$ -(1-methylethyl)benzeneacetate and (R)-cyano(3-phenoxyphenyl)methyl-(S)-4-chloro- $\alpha$ -(1-methylethyl)benzeneacetate as a result of the use of esfenvalerate in food-handling establishments.

§ 180.535

40 CFR Ch. I (7–1–25 Edition)

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* Tolerances with regional registration are established for the combined residues of the insecticide esfenvalerate, (S)-cyano(3-phenoxyphenyl)methyl-(S)-4-chloro- $\alpha$ -(1-methylethyl)benzeneacetate, its non-racemic isomer, (R)-cyano(3-phenoxyphenyl)methyl-(R)-4-chloro- $\alpha$ -(1-methylethyl)benzeneacetate and its diastereomers (S)-cyano(3-phenoxyphenyl)methyl-(R)-4-chloro- $\alpha$ -(1-methylethyl)benzeneacetate and (R)-cyano(3-phenoxyphenyl)methyl-(S)-4-chloro- $\alpha$ -(1-methylethyl)benzeneacetate, in or on food commodities as follows:

| Commodity                        | Parts per million |
|----------------------------------|-------------------|
| Cabbage, chinese, bok choy ..... | 1.0               |
| Kohlrabi .....                   | 2.0               |
| Lettuce, head .....              | 5.0               |

(d) *Indirect or inadvertent residues.*  
[Reserved]

[63 FR 23401, Apr. 29, 1998, as amended at 63 FR 48615, Sept. 11, 1998; 74 FR 46699, Sept. 11, 2009]

**§ 180.535 Fluroxypyr 1-methylheptyl ester; tolerances for residues.**

(a) *General.* Tolerances are established for combined residues of fluroxypyr 1-methylheptyl ester [1-methylheptyl ((4-amino-3,5-dichloro-6-fluoro-2-pyridinyl)oxy)acetate] and its metabolite fluroxypyr [(4-amino-3,5-dichloro-6-fluoro-2-pyridinyl)oxy]acetic acid] in or on the following raw agricultural commodities. Compliance with the established tolerance levels is determined by measuring only the sum of fluroxypyr 1-methylheptyl ester [1-methylheptyl ((4-amino-3,5-dichloro-6-fluoro-2-pyridinyl)oxy)acetate] and its metabolite fluroxypyr [(4-amino-3,5-dichloro-6-fluoro-2-pyridinyl)oxy]acetic acid] calculated as the stoichiometric equivalent of fluroxypyr.

| Commodity            | Parts per million |
|----------------------|-------------------|
| Barley, grain .....  | 0.5               |
| Barley, hay .....    | 12.0              |
| Barley, hay .....    | 20.0              |
| Barley, straw .....  | 12.0              |
| Cattle, fat .....    | 0.1               |
| Cattle, kidney ..... | 1.5               |

## Environmental Protection Agency

## § 180.544

### § 180.537 Isoxaflutole; tolerances for residues.

(a) *General.* Tolerances are established for residues of the herbicide, isoxaflutole, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only the sum of isoxaflutole ((5-cyclopropyl-4-isoxazolyl) [2-(methylsulfonyl)-4-(trifluoromethyl)phenyl] methanone) and its metabolite 1-(2-methylsulfonyl-4-trifluoromethylphenyl)-2-cyano-3-cyclopropyl propan-1,3-dione (RPA 202248), calculated as the stoichiometric equivalent of isoxaflutole, in or on the commodity:

| Commodity                        | Parts per million |
|----------------------------------|-------------------|
| Corn, field, forage .....        | 0.04              |
| Corn, field, grain .....         | 0.02              |
| Corn, field, stover .....        | 0.02              |
| Grain, aspirated fractions ..... | 0.30              |
| Soybean, seed .....              | 0.05              |

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[63 FR 50784, Sept. 23, 1998, as amended at 73 FR 75608, Dec. 12, 2008; 76 FR 76314, Dec. 7, 2011]

### § 180.540 Fenitrothion; tolerances for residues.

(a) *General.* Tolerances are established for residues of the insecticide fenitrothion, *O,O*-dimethyl *O*-(4-nitro-*m*-tolyl) phosphorothioate, from the postharvest application of the insecticide to stored wheat in Australia, in or on the following food commodity:

| Commodity                        | Parts per million |
|----------------------------------|-------------------|
| Wheat, gluten <sup>1</sup> ..... | 3.0               |

<sup>1</sup> There are no U.S. registrations on food commodities since 1987.

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[73 FR 54963, Sept. 24, 2008]

### § 180.543 Diclosulam; tolerances for residues.

(a) *General.* Tolerances are established for residues of the herbicide diclosulam [*N*-(2,6-dichlorophenyl)-5-ethoxy-7-fluoro[1,2,4] triazolo[1,5-*c*]pyrimidine-2-sulfonamide] in or on the following raw agricultural commodities as follows:

| Commodity           | Parts per million |
|---------------------|-------------------|
| Peanut .....        | 0.020             |
| Soybean, seed ..... | 0.020             |

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[65 FR 12134, Mar. 8, 2000]

### § 180.544 Methoxyfenozide; tolerances for residues.

(a) *General.* (1) Tolerances are established for residues of the insecticide methoxyfenozide, including its metabolites and degradates, in or on the commodities listed in the following table. Compliance with the tolerance levels specified in the following table is to be determined by measuring only methoxyfenozide (3-methoxy-2-methylbenzoic acid 2-(3,5-dimethylbenzoyl)-2-(1,1-dimethylethyl) hydrazide) in or on the commodity.

TABLE 1 TO PARAGRAPH (a)(1)

| Commodity                                     | Parts per million |
|-----------------------------------------------|-------------------|
| Acerola .....                                 | 0.4               |
| Almond, hulls .....                           | 25                |
| Animal feed, nongrass, group 18, forage ..... | 50.0              |
| Animal feed, nongrass, group 18, hay .....    | 150.0             |
| Apple, wet pomace .....                       | 7.0               |
| Artichoke, globe .....                        | 3.0               |
| Atemoya .....                                 | 0.60              |
| Avocado .....                                 | 0.6               |
| Bean, adzuki, dry seed .....                  | 0.5               |
| Bean, American potato, dry seed .....         | 0.5               |
| Bean, asparagus, dry seed .....               | 0.5               |
| Bean, asparagus, edible podded .....          | 2                 |
| Bean, black, dry seed .....                   | 0.5               |
| Bean, broad, dry seed .....                   | 0.5               |
| Bean, broad, succulent shelled .....          | 0.3               |
| Bean, catjang, dry seed .....                 | 0.5               |
| Bean, catjang, edible podded .....            | 2                 |

TABLE 1 TO PARAGRAPH (a)(1)—Continued

| Commodity                                                      | Parts per million |
|----------------------------------------------------------------|-------------------|
| Bean, catjang, succulent shelled .....                         | 0.3               |
| Bean, cranberry, dry seed .....                                | 0.5               |
| Bean, dry, dry seed .....                                      | 0.5               |
| Bean, field, dry seed .....                                    | 0.5               |
| Bean, French, dry seed .....                                   | 0.5               |
| Bean, French, edible podded .....                              | 2                 |
| Bean, garden, dry seed .....                                   | 0.5               |
| Bean, garden, edible podded .....                              | 2                 |
| Bean, goa, dry seed .....                                      | 0.5               |
| Bean, goa, edible podded .....                                 | 2                 |
| Bean, goa, succulent shelled .....                             | 0.3               |
| Bean, great northern, dry seed .....                           | 0.5               |
| Bean, green, dry seed .....                                    | 0.5               |

| Yam bean, African, dry seed .....                              | 0.5               |

<sup>1</sup> There are no U.S. registrations as of March 12, 2019 for use on tea.

<sup>2</sup> There are no U.S. registrations as of August 28, 2023.

(2) Tolerances are established for residues of the insecticide methoxyfenozide, including its metabolites and degradates, in or on the commodities in the following table. Compliance with the tolerance levels specified in the following table is to be determined by measuring only the sum of methoxyfenozide [3-methoxy-2-methylbenzoic acid 2-(3,5-dimethylbenzoyl)-2-(1,1-dimethylethyl) hydrazide] and its glucuronide metabolite (β-D-Glucopyranuronic acid, 3-[[2-(1,1-dimethylethyl)-2-(3,5-dimethylbenzoyl)-hydrazino]carbonyl]-2-methylphenyl-), calculated as the stoichiometric equivalent of methoxyfenozide.

TABLE 2 TO PARAGRAPH (A)(2)

| Commodity                                    | Parts per million |
|----------------------------------------------|-------------------|
| Cattle, liver .....                          | 0.40              |
| Cattle, meat byproducts, except liver .....  | 0.10              |
| Egg .....                                    | 0.02              |
| Goat, liver .....                            | 0.40              |
| Goat, meat byproducts, except liver .....    | 0.10              |
| Hog, liver .....                             | 0.1               |
| Hog, meat byproducts, except liver .....     | 0.02              |
| Horse, liver .....                           | 0.40              |
| Horse, meat byproducts, except liver .....   | 0.10              |
| Poultry, liver .....                         | 0.10              |
| Poultry, meat byproducts, except liver ..... | 0.02              |
| Sheep, liver .....                           | 0.40              |
| Sheep, meat byproducts, except liver .....   | 0.10              |

(b) [Reserved]

(c) *Tolerances with regional registrations.* Tolerances for regional registration are established for the insecticide methoxyfenozide, including its metabolites and degradates, in or on the raw agricultural commodities in the following table. Compliance with the tolerance levels specified in the following table is to be determined by measuring only methoxyfenozide [3-methoxy-2-methylbenzoic acid 2-(3,5-

**§ 180.545**

dimethylbenzoyl)-2-(1,1-dimethylethyl) hydrazide].

TABLE 3 TO PARAGRAPH (c)

| Commodity         | Parts per million |
|-------------------|-------------------|
| Rice, grain ..... | 30                |
| Rice, hulls ..... | 55                |

(d) *Indirect or inadvertent tolerances.*

(1) Tolerances are established for the indirect or inadvertent residues of the insecticide methoxyfenozide, including its metabolites and degradates, in or on the raw agricultural commodities in the following table, when present therein as a result of the application of methoxyfenozide to growing crops as listed in paragraph (a) of this section. Compliance with the tolerance levels specified in the following table is to be determined by measuring only methoxyfenozide [3-methoxy-2-methylbenzoic acid 2-(3,5-dimethylbenzoyl)-2-(1,1-dimethylethyl) hydrazide].

| Commodity                         | Parts per million |
|-----------------------------------|-------------------|
| Onion, bulb, subgroup 3-07A ..... | 0.10              |
| Potato .....                      | 0.02              |

(2) Tolerances are established for the indirect or inadvertent residues of the insecticide methoxyfenozide, including its metabolites and degradates, in or on the raw agricultural commodities in the following table, when present therein as a result of the application of methoxyfenozide to growing crops as listed in paragraph (a) of this section. Compliance with the tolerance levels specified in the following table is to be determined by measuring only the sum of methoxyfenozide [3-methoxy-2-methylbenzoic acid, 2-(3,5-dimethylbenzoyl)-2-(1,1-dimethylethyl) hydrazide] and the following metabolites (all calculated as the stoichiometric equivalent of methoxyfenozide): free phenol of methoxyfenozide [3,5-dimethylbenzoic acid N-tert-butyl-N'-(3-hydroxy-2-methylbenzoyl) hydrazide], the glucose conjugate of the phenol [3,5-dimethyl benzoic acid N-tert-butyl-N'-[3 (β-D-glucopyranosyloxy)-2-methylbenzoyl]-hydrazide] and the malonylglycosyl conjugate of the phenol [3,5-dimethyl benzoic acid N-tert-butyl-N'-[3 (β-D-6-malonyl-

**40 CFR Ch. I (7-1-25 Edition)**

glucopyranosyl-1-oxy)-2-methylbenzoyl]-hydrazide].

| Commodity                                                           | Parts per million |
|---------------------------------------------------------------------|-------------------|
| Animal feed, nongrass, group 18, straw .....                        | 8.0               |
| Grain, cereal, forage, fodder and straw group 16, except corn ..... | 6.0               |

| Sunflower subgroup 20B .....                                        | 1.0               |

[67 FR 59203, Sept. 20, 2002]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 180.544, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at [www.govinfo.gov](http://www.govinfo.gov).

**§ 180.545 Prallethrin; tolerances for residues.**

(a) *General.* Tolerances are established for residues of the insecticide prallethrin, including its metabolites and degradates, in or on all raw agricultural commodities and processed food from use of prallethrin in food handling establishments where food and food products are held, processed, prepared and/or served, or as a wide-area mosquito adulticide at 1.0 part per million (ppm). Compliance with the tolerance level specified is to be determined by measuring only prallethrin, 2-methyl-4-oxo-3-(2-propyn-1-yl)-2-cyclopenten-1-yl-2,2-dimethyl-3-(2-methyl-1-propen-1-yl)cyclopropanecarboxylate.

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[79 FR 64330, Oct. 29, 2014]

**§ 180.546 Mefenoxam; tolerances for residues.**

(a) *General.* Tolerances are established for residues of mefenoxam, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only metalaxyl (methyl N-(2,6-dimethylphenyl)-N-(methoxyacetyl)-DL-alaninate).

| Wasabi, stem .....                                               | 3.0               |
| Wasabi, tops .....                                               | 6.0               |

<sup>1</sup> There is no U.S. registration as of November 4, 2024.

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* Tolerances are established for indirect or inadvertent residues of mefenoxam in or on the food commodities when present therein as a result of the application of mefenoxam to growing crops listed in paragraph (a) of this section and other non-food crops to read as follows:

TABLE 2 TO PARAGRAPH (d)

| Commodity       | Parts per million |
|-----------------|-------------------|
| Sugarcane ..... | 0.1               |

[65 FR 57556, Sept. 25, 2000, as amended at 66 FR 48003, Sept. 17, 2001; 67 FR 35050, May 17, 2002; 76 FR 4548, Jan. 26, 2011; 81 FR 26727, May 4, 2016; 83 FR 65546, Dec. 21, 2018; 85 FR 72574, Nov. 13, 2020; 88 FR 39189, June 15, 2023; 89 FR 87512, Nov. 4, 2024]

## § 180.547 Prohexadione calcium; tolerances for residues.

(a) *General.* Tolerances are established for residues of the growth regulator, prohexadione calcium, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only prohexadione calcium (calcium 3-oxido-5-oxo-4-propionylcyclohex-3-enecarboxylate)’’ in or on the following commodities.

| Commodity                                    | Parts per million |
|----------------------------------------------|-------------------|
| Cattle, kidney .....                         | 0.10              |
| Cattle, meat byproducts, except kidney ..... | 0.05              |
| Cherry, sweet .....                          | 0.40              |
| Fruit, pome, group 11 .....                  | 3.0               |
| Goat, kidney .....                           | 0.10              |
| Goat, meat byproducts, except kidney .....   | 0.05              |
| Grass, forage <sup>1</sup> .....             | 0.10              |
| Grass, hay <sup>1</sup> .....                | 0.10              |
| Grass, seed screenings <sup>1</sup> .....    | 3.5               |
| Grass, straw <sup>1</sup> .....              | 1.2               |
| Hog, kidney .....                            | 0.10              |
| Hog, meat byproducts, except kidney .....    | 0.05              |
| Horse, kidney .....                          | 0.10              |
| Horse, meat byproducts, except kidney .....  | 0.05              |
| Peanut .....                                 | 1.0               |
| Peanut, hay .....                            | 0.60              |
| Sheep, kidney .....                          | 0.10              |
| Sheep, meat byproducts, except kidney .....  | 0.05              |
| Strawberry .....                             | 0.30              |
| Watercress .....                             | 4.0               |

<sup>1</sup>Registration is limited to grass grown for seed.

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* Tolerances with regional registration are established for residues of the plant growth regulator, prohexadione calcium, including its metabolites and degradates, in or on the commodities in table 2 in this paragraph (c). Compliance with the tolerance levels specified in table 2 in this paragraph (c) is to be determined by measuring only prohexadione calcium (calcium 3-oxido-5-oxo-4-propionylcyclohex-3-enecarboxylate) in or on the following commodities.

TABLE 2 TO PARAGRAPH (c)

| Commodity                 | Parts per million |
|---------------------------|-------------------|
| Alfalfa, forage .....     | 0.1               |
| Alfalfa, hay .....        | 0.1               |
| Corn, field, forage ..... | 0.1               |
| Corn, field, grain .....  | 0.1               |

[Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.*  
[Reserved]

[64 FR 4308, Jan. 28, 1999, as amended at 67 FR 55338, Aug. 29, 2002; 76 FR 34886, June 15, 2011]

#### § 180.551 Fluthiacet-methyl; tolerances for residues.

(a) *General.* (1) A tolerance is established for residues of the herbicide, fluthiacet-methyl, acetic acid [[2-chloro-4-fluoro-5-[(tetrahydro-3-oxo-1H,3H-[1,3,4]thiadiazolo[3,4- $\alpha$ ]pyridazin-1-ylidene)amino]phenyl]thio]-methyl ester, in or on the food commodity:

| Commodity                                             | Parts per million |
|-------------------------------------------------------|-------------------|
| Corn, field, forage .....                             | 0.050             |
| Corn, field, grain .....                              | 0.010             |
| Corn, field, stover .....                             | 0.050             |
| Corn, pop, grain .....                                | 0.010             |
| Corn, pop, stover .....                               | 0.050             |
| Corn, sweet, forage .....                             | 0.050             |
| Corn, sweet, kernel plus cob with husks removed ..... | 0.010             |
| Corn, sweet, stover .....                             | 0.050             |
| Soybean, seed .....                                   | 0.01              |

(2) A tolerance is established for the combined residues of the herbicide fluthiacet-methyl and its acid metabolite: acetic acid, [[2-chloro-4-fluoro-5-[(tetrahydro-3-oxo-1H,3H-[1,3,4]thiadiazolo[3,4- $\alpha$ ]pyridazin-1-ylidene)amino]phenyl]thio]-methyl ester, and its acid metabolite, acetic acid, [[2-chloro-4-fluoro-5-[(tetrahydro-3-oxo-1H,3H-[1,3,4]thiadiazolo[3,4- $\alpha$ ]pyridazin-1-ylidene)amino]phenyl]thio]-, in or on the following food commodities:

| Commodity                     | Parts per million |
|-------------------------------|-------------------|
| Cotton, gin byproducts .....  | 0.20              |
| Cotton, undelinted seed ..... | 0.020             |

(b) *Section 18 emergency exemptions.*  
[Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.*  
[Reserved]

## § 180.553 Fenhexamid; tolerances for residues.

(a) *General.* Tolerances are established for residues of fenhexamid, including its metabolites and degradate, in or on the commodities in the table in this paragraph (a). Compliance with the tolerance levels specified in this paragraph (a) is to be determined by measuring only fenhexamid (*N*-2,3-dichloro-4-hydroxyphenyl)-1-methylcyclohexanecarboxamide).

| Commodity                                                                  | Parts per million |

## § 180.554 Kresoxim-methyl; tolerances for residues.

(a) *General.* (1) Tolerances are established for the combined residues of the fungicide kresoxim-methyl (methyl (*E*)-2-[2-(2-methylphenoxy)-methyl]phenyl-2-(methoxyimido)acetate) and its metabolites as follows: (*E*)-2-[2-(2-methylphenoxy)methyl]-phenyl-2-(methoxyimido)acetic acid; (*E*)-2-[2-(2-hydroxymethylphenoxy)methyl]-phenyl-2-(methoxyimido)acetic acid (free and glucose conjugated); and (*E*)-2-[2-(4-hydroxy-2-methylphenoxy)-methyl]phenyl-2-(methoxyimido)acetic acid (free and glucose conjugated) in or on the following commodities:

| Commodity                          | Parts per million |
|------------------------------------|-------------------|
| Apple, dry pomace .....            | 1.0               |
| Apple, wet pomace .....            | 1.0               |
| Fruit, pome .....                  | 0.5               |
| Grape .....                        | 1.0               |
| Grape, raisin .....                | 1.5               |
| Pecan .....                        | 0.15              |
| Vegetable, cucurbit, group 9 ..... | 0.40              |

(2) Tolerances are established in or on the following commodities for the residues of the metabolite (*E*)-2-[2-(2-methylphenoxy)methyl]-phenyl-2-(methoxyimido)acetic acid resulting from the use of the fungicide kresoxim-methyl:

| Commodity                     | Parts per million |
|-------------------------------|-------------------|
| Cattle, meat byproducts ..... | 0.01              |
| Goat, meat byproducts .....   | 0.01              |
| Sheep, meat byproducts .....  | 0.01              |

**§ 180.555 Trifloxystrobin; tolerances for residues.**

(a) *General.* Tolerances are established for residues of trifloxystrobin, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only the sum of trifloxystrobin, benzenoacetic acid, (*E,E*)- $\alpha$ -(methoxyimino)-2-[[[1-[3-(trifluoromethyl) phenyl]ethylidene] amino]oxy]methyl]-, methyl ester, and the free form of its acid metabolite CGA-321113, (*E,E*)-methoxyimino-[2-[1-(3-trifluoromethyl-phenyl)-ethylideneamino]oxymethyl]-phenyl]acetic acid, calculated as the stoichiometric equivalent of trifloxystrobin, in or on the commodity.

TABLE 1 TO PARAGRAPH (a)

| Commodity                                     | Parts per million |
|-----------------------------------------------|-------------------|
| Alfalfa, forage .....                         | 0.01              |

[Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[64 FR 51907, Sept. 27, 1999]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 180.555, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at [www.govinfo.gov](http://www.govinfo.gov).

## § 180.556 Pymetrozine; tolerances for residues.

(a) *General.* Tolerances are established for residues of the insecticide pymetrozine 1,2,4-triazin-3(2H)-one,4,5-dihydro-6-methyl-4-[(3-pyridinylmethylene) amino] in or on the following raw agricultural commodities. The tolerance level for each commodity is expressed in terms of the parent insecticide only, which serves as an indicator of the use of pymetrozine on these raw agricultural commodities.

| Commodity                                        | Parts per million |
|--------------------------------------------------|-------------------|
| Asparagus .....                                  | 0.04              |
| Brassica, head and stem, subgroup 5A .....       | 0.5               |
| Brassica, leafy greens, subgroup 5B .....        | 0.25              |
| Cotton, gin byproducts .....                     | 2.0               |
| Cotton, undelinted seed .....                    | 0.3               |
| Hop, dried cones .....                           | 6.0               |
| Pecan .....                                      | 0.02              |
| Turnip, greens .....                             | 0.25              |
| Vegetable, fruiting, group 8 .....               | 0.2               |
| Vegetable, cucurbit, group 9 .....               | 0.1               |
| Vegetable, leafy, except brassica, group 4 ..... | 0.6               |
| Vegetable, tuberous and corm, subgroup 1C .....  | 0.02              |

(b) *Section 18 emergency exemptions.*

[Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

[65 FR 48634, Aug. 9, 2000, as amended at 66 FR 14846, Mar. 14, 2001; 66 FR 66794, Dec. 27, 2001; 70 FR 7047, Feb. 10, 2005; 70 FR 43298, July 27, 2005]

## § 180.557 Tetraconazole; tolerances for residues.

(a) *General.* Tolerances are established for residues of tetraconazole, including its metabolites and degradates, in or on the commodities listed below. Compliance with the following tolerance levels is to be determined by measuring only tetraconazole (1-[2-(2,4-dichlorophenyl)-3-(1,1,2,2-tetrafluoroethoxy)propyl]-1H-1,2,4-triazole), in or on the following commodities.

| Commodity                                                | Parts per million |
|----------------------------------------------------------|-------------------|
| Barley, bran .....                                       | 1.0               |
| Barley, flour .....                                      | 0.50              |
| Barley, grain .....                                      | 0.30              |
| Beet sugar, dried pulp .....                             | 0.20              |
| Beet sugar, molasses .....                               | 0.25              |

§ 180.559 Clodinafop-propargyl; tolerances for residues.

(a) *General.* Tolerances are established for clodinafop-propargyl, including its metabolites and degradates, in or on the commodities in the following table. Compliance with the tolerance levels specified in the following table is to be determined by measuring only clodinafop-propargyl [(2R)-2-[4-[(5-chloro-3-fluoro-2-pyridinyl)oxy]phenoxy]propanoic acid, 2-propynyl ester] and its metabolite clodinafop [(2R)-2-[4-[(5-chloro-3-fluoro-2-pyridinyl)oxy]phenoxy]propanoic acid].

§ 180.560 Cloquintocet-mexyl; tolerances for residues.

(a) *General.* Tolerances are established for residues of the inert ingredient cloquintocet-mexyl, including its metabolites and degradates, in or on the commodities in the following table when used as a safener in herbicide formulations. Compliance with the tolerance levels specified is to be determined by measuring the combined residues of cloquintocet-mexyl, (acetic acid [(5-chloro-8-quinolinyl)oxy]-, 1-methylhexyl ester; CAS Reg. No. 99607-70-2) and its acid metabolite (5-chloro-8-quinolinoxyacetic acid), expressed as cloquintocet-mexyl, in or on the following commodities:

TABLE 1 TO PARAGRAPH (A)

| Commodity                       | Parts per million |
|---------------------------------|-------------------|
| Barley, grain .....             | 0.1               |
| Barley, hay .....               | 0.1               |
| Barley, straw .....             | 0.1               |
| Teff, forage <sup>1</sup> ..... | 0.2               |
| Teff, grain <sup>1</sup> .....  | 0.1               |
| Teff, hay <sup>1</sup> .....    | 0.5               |
| Teff, straw <sup>1</sup> .....  | 0.1               |

### § 180.561 Acibenzolar-S-methyl; tolerances for residues.

(a) *General.* (1) Tolerances are established for residues of acibenzolar-*S*-methyl, benzo(1,2,3)thiadiazole-7-carbothioic acid-*S*-methyl ester, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only those acibenzolar-*S*-methyl residues convertible to benzo(1,2,3)thiadiazole-7-carboxylic acid (CGA-210007), expressed as the stoichiometric equivalent of acibenzolar-*S*-methyl, in or on the following raw agricultural commodities.

| Commodity                                 | Parts per million |
|-------------------------------------------|-------------------|
| Banana <sup>1</sup> .....                 | 0.1               |
| Berry, low growing, subgroup 13-07G ..... | 0.15              |
| Fruit, citrus, group 10-10 .....          | 0.02              |
| Fruit, pome, group 11-10 .....            | 0.03              |
| Onion, bulb, subgroup 3-07A .....         | 0.1               |
| Spinach .....                             | 1.0               |
| Tomato, paste .....                       | 3.0               |
| Vegetable, brassica, leafy, group 5 ..... | 1.0               |
| Vegetable, cucurbit, group 9 .....        | 2.0               |
| Vegetable, fruiting, group 8 .....        | 1.0               |
| Vegetable, leafy, group 4 .....           | 0.25              |

<sup>1</sup> There are no United States registrations for banana.

(2) Tolerances are established for residues of acibenzolar-*S*-methyl, benzo(1,2,3)thiadiazole-7-carbothioic acid-*S*-methyl ester, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only those acibenzolar-*S*-methyl residues convertible to benzo(1,2,3)thiadiazole-7-carboxylic acid (CGA-210007), expressed as the stoichiometric equivalent of acibenzolar-*S*-methyl, in or on the following raw agricultural commodities.

| Commodity        | Parts per million | Expiration/revocation date |
|------------------|-------------------|----------------------------|
| Apple .....      | 0.05              | 12/31/15                   |
| Grapefruit ..... | 0.05              | 12/31/15                   |

| Commodity  | Parts per million | Expiration/revocation date |

| Poultry, fat .....             | 0.20              |
| Poultry, meat .....            | 0.06              |
| Poultry, meat byproducts ..... | 0.06              |

(b) *Section 18 emergency exemptions.* Time-limited tolerances specified in the following table are established for residues of the indoxacarb, including its metabolites and degradates, in or on the specified agricultural commodities in the table below, resulting from use of the pesticide pursuant to FIFRA section 18 emergency exemptions. Compliance with the tolerance levels specified in the table below is to be determined by measuring only indoxacarb, (S)-methyl 7-chloro-2,5-dihydro-2-[(methoxycarbonyl)[4-(trifluoromethoxy)phenyl]amino]carbonyl]indeno[1,2-e][1,3,4]oxadiazine-4a(3H)-carboxylate, and its R-enantiomer, (R)-methyl 7-chloro-2,5-dihydro-2-[(methoxycarbonyl)[4-(trifluoromethoxy)phenyl]amino]car-

bonyl]indeno[1,2-e][1,3,4]oxadiazine-4a(3H)-carboxylate.

The tolerances expire on the dates specified in the table.

| Commodity           | Parts per million | Expiration date |
|---------------------|-------------------|-----------------|
| Grass, forage ..... | 10                | 12/31/2022      |
| Grass, hay .....    | 50                | 12/31/2022      |

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

### § 180.565 Thiamethoxam; tolerances for residues.

(a) *General.* Tolerances are established for residues of the insecticide thiamethoxam, including its metabolites and degradates, in or on the following commodities. Compliance with the tolerance levels specified below is to be determined by measuring only thiamethoxam 3-[(2-chloro-5-thiazolyl)methyl]tetrahydro-5-methyl-N-nitro-4H-1,3,5-oxadiazin-4-imine and its metabolite CGA-322704 N-[(2-chloro-thiazol-5-yl)methyl]-N'-methyl-N'-nitro-guanidine, calculated as the stoichiometric equivalent of thiamethoxam, in or on the following commodities:

<sup>1</sup>There are no U.S. registrations for these commodities as of February 15, 2017.

<sup>2</sup>There are no U.S. registrations for these commodities as of June 15, 2022.

(b) *Section 18 emergency exemptions.* Time-limited tolerances specified in the table are established for residues of the insecticide thiamethoxam, including its metabolites and degradates. Compliance with the tolerance levels specified below is to be determined by measuring only thiamethoxam 3-[(2-chloro-5-thiazolyl)methyl]tetrahydro-5-methyl-N-nitro-4H-1,3,5-oxadiazin-4-imine and its metabolite CGA-322704 N-[(2-chloro-thiazol-5-yl)methyl]-N'-methyl-N'-nitro-guanidine, calculated as the stoichiometric equivalent of thiamethoxam, in or on the specified agricultural commodities, resulting from use of the pesticide pursuant to FFIFRA section 18 emergency exemptions. The tolerances expire on the date specified in the table.

TABLE 2 TO PARAGRAPH (b)

| Commodity         | Parts per million | Expiration date |
|-------------------|-------------------|-----------------|
| Rice, grain ..... | 6                 | 12/31/2027      |
| Rice, straw ..... | 2                 | 12/31/2027      |

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

### § 180.566 Fenpyroximate; tolerances for residues.

(a) *General.* (1) Tolerances are established for residues of the insecticide fenpyroximate, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified in the table is to be determined by measuring only the sum of fenpyroximate, (*E*)-1,1-dimethylethyl 4-[[[(1,3-dimethyl-5-phenoxy-1*H*-pyrazol-4-yl)methylene]amino]oxy]methyl]benzoate and its *Z*-isomer, (*Z*)-1,1-dimethylethyl 4-[[[(1,3-dimethyl-5-phenoxy-1*H*-pyrazol-4-yl)methylene]amino]oxy]methyl]benzoate, calculated as the stoichiometric equivalent of fenpyroximate.

| Plum, prune, fresh .....        | 0.01              |

(2) Temporary tolerances are established for residues of forchlorfenuron, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring on forchlorfenuron (*N*-(2-chloro-4-pyridinyl)-*N*'-phenylurea).

| Commodity                | Parts per million | Expiration/revocation date |
|--------------------------|-------------------|----------------------------|
| Almond .....             | 0.01              | 12/31/15                   |

### § 180.570 Isoxadifen-ethyl; tolerances for residues.

(a) *General.* (1) Tolerances are established for residues of isoxadifen-ethyl (ethyl 5,5-diphenyl-2-isoxazoline-3-carboxylate, (CAS No. 163520–33–0), and its metabolite: 4,5-dihydro-5,5-diphenyl-3-isoxazolecarboxylic acid, when used as an inert ingredient

**§ 180.571**

(safener) in or on the following raw agricultural commodities:

| Commodity                                            | Parts per million |
|------------------------------------------------------|-------------------|
| Corn, field, forage .....                            | 0.20              |
| Corn, field, grain .....                             | 0.08              |
| Corn, field, stover .....                            | 0.40              |
| Corn, oil .....                                      | 0.50              |
| Corn, pop, grain .....                               | 0.04              |
| Corn, pop, stover .....                              | 0.25              |
| Corn, sweet, forage .....                            | 0.30              |
| Corn, sweet, kernel plus cob with husk removed ..... | 0.04              |
| Corn, sweet, stover .....                            | 0.45              |

(2) Tolerances are established for the residues of isoxadifen-ethyl (3-isoxazolecarboxylic acid, 4,5-dihydro-5,5-diphenyl-, ethyl ester (CAS No. 164520-33-0)), and its metabolites 4,5-dihydro-5,5-diphenyl-3-isoxazolecarboxylic acid and  $\beta$ -hydroxy- $\beta$ -benzenepropanenitrile when used as an inert ingredient (safener) in or on the following raw agricultural commodities:

| Commodity         | Parts per million |
|-------------------|-------------------|
| Rice, grain ..... | 0.10              |
| Rice, hulls ..... | 0.50              |

(b) *Section 18 emergency exemptions.* [Reserved]

(c) *Tolerances with regional registrations.* [Reserved]

(d) *Indirect or inadvertent residues.* [Reserved]

**§ 180.571 Mesotrione; tolerances for residues.**

(a) *General.* Tolerances are established for residues of the herbicide mesotrione, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance levels specified below is to be determined by measuring only mesotrione, 2-[4-(methylsulfonyl)-2-nitrobenzoyl]-1,3-cyclohexanedione, in or on the following raw agricultural commodities:

| Commodity             | Parts per million |
|-----------------------|-------------------|
| Almond, hulls .....   | 0.02              |
| Asparagus .....       | 0.01              |
| Berry, group 13 ..... | 0.01              |

**§ 180.572 Bifenazate; tolerance for residues.**

(a) *General.* (1) Tolerances are established for residues of bifenazate (1-methylethyl 2-(4-methoxy[1,1'-biphenyl]-3-yl)hydrazinecarboxylate) including its metabolites and degradates, in or on the commodities listed in the following table. Compliance with the tolerance levels specified are to be determined by measuring only the sum of bifenazate and its metabolite, diazinecarboxylic acid, 2-(4-methoxy-[1,1'-biphenyl]-3-yl), 1-

## Environmental Protection Agency

§ 180.572

methylethyl ester, (calculated as the stoichiometric equivalent of bifenazate) in or on the following food commodities:

| Commodity                                                                 | Parts per million |
|---------------------------------------------------------------------------|-------------------|
| Acerola .....                                                             | 0.90              |
