^a Tank not in use.

(B) The throughput shall be calculated as follows:

(1) Compute the monthly throughput for each tank by the 15th day of the following month.

(2) By the 15th day of each month, add the monthly throughputs for the 12 previous months to obtain the yearly throughput.

(ii) *Recordkeeping.* (A) On and after October 1, 1992, the owner and operator of the Nalco Chemical Company facility in Bedford Park, Illinois, shall keep the following records for all storage tanks. These records shall be compiled on a monthly basis, be retained at the facility for a period of 3 years, and be

made available to the Administrator upon request.

(1) The molecular weight of vapor in each storage tank (M_v), the true vapor pressure at bulk liquid conditions for each tank (P), the paint factor (F_p), and their product. F_p shall be determined from Table 4.3-1 of "Compilation of Air Pollutant Emission Factors, Volume I: Stationary Point and Area Sources," AP-42, September 1985.

(2) The monthly throughput.

(3) The total throughput per year for the 12 previous months.

(B) [Reserved]

(iii) *Test Methods.* (A) The true vapor pressure at bulk liquid temperature

Environmental Protection Agency**§ 52.741**

shall be determined by using the procedures specified in paragraph (a)(8) of this section.

(B) The molecular weight of vapor in the storage tank shall be determined by using Table 4.3-2 "Compilation of Air Pollutant Emission Factors, Volume I: Stationary Point and Area Sources," AP-42, September 1985, or by analysis of vapor samples. Where mixtures of organic liquids are stored in a tank, M_v shall be estimated from the liquid composition using the following equation:

$$M_v = M_a \frac{P_a X_a}{P_t} + M_b \frac{P_b X_b}{P_t}$$

Where:

M_a = Molecular weight of pure component a;
 P_a = Vapor pressure of pure component a;
 X_a = Mole fraction of pure component a in the liquid;
 M_b = Molecular weight of pure component b;
 P_b = Vapor pressure of pure component b;
 X_b = Mole fraction of pure component b in the liquid; and
 $P_t = P_a X_a + P_b X_b$.

(11) The control requirements in this paragraph apply to the fugitive emission sources listed in paragraph (x)(11)(i)(A) of this section at the Nalco Chemical Company facility in Bedford Park, Illinois, instead of the control requirements in paragraph (x)(3) of this section.

(i) *Production and Operation Restrictions.*

(A) On and after October 1, 1992, all components (e.g., pumps, valves, flanges, pressure relief valves (PRV's), and open end lines) at the specified locations (e.g., Building 32—Tube Reactor System, etc.), and in the specified type of service (e.g., heavy liquid stratified, light liquid stratified, etc.) shall be limited by the maximum monthly hours in the following table:

(ii) *Recordkeeping.*

(A) On and after October 1, 1992, the owner and operator of the Nalco Chemical Company facility in Bedford Park, Illinois, shall keep the following records for all fugitive emission sources. These records shall be compiled on a monthly basis, be retained at the facility for a period of 3 years, and be made available to the Administrator upon request.

(1) The total number of hours of organic service for each component at each location specified in paragraphs (x)(11)(i)(A) (1) through (10) of this section.

(2) The vapor pressure of each organic compound in each component at each location specified in paragraphs (x)(11)(i)(A) (1) through (10) of this section.

(B) [Reserved]

(12) The control and recordkeeping and reporting requirements, as well as the test methods in this paragraph, apply to the gravure and screen press operations at the Meyercord Corporation (Meyercord) in Carol Stream, Illinois, instead of the requirements in paragraphs (x)(1) through (x)(5) of this section.

(i) After July 1, 1991, no materials which contain volatile organic material (VOM), including coatings, inks, and cleaning material, may be used at any gravure or screen press unless the total VOM emissions remain below 100 tons of VOM for every consecutive 365-day period, or fraction thereof, starting on July 1, 1991. A new 365-day period starts on each day. The VOM emissions, which are to be calculated on a daily basis, are to be added to the VOM emissions for the prior 364 days (but not including any day prior to July 1, 1991). VOM emissions are based upon the VOM content of the material and the volume of material used. The effect of add-on control equipment is not considered in calculating VOM emissions; that is, the VOM emissions are to be determined as if the press(es) do(es) not have add-on control equipment. The applicable test methods and procedures specified in paragraph (a)(4) of this section are to be used in determining daily VOM emissions.

(ii) The VOM content of each coating, ink, and cleaning solution shall be determined by the applicable test methods and procedures specified in paragraph (a)(4) of this section to establish the records required under paragraph (x)(12)(ii) of this section. Beginning on July 1, 1991, the owner or operator of the subject presses shall collect and record all of the following information each day and maintain the information at the facility for 3 years:

§ 52.741

40 CFR Ch. I (7–1–25 Edition)

(A) The name and identification number of each coating, ink, and cleaning solution as applied on any press.

(B) The pounds (lbs) of VOM per gallon of each coating, ink, and cleaning solution (minus water and any compounds which are specifically exempted from the definition of VOM) as applied on any press.

(C) The total gallons of each coating, ink, and cleaning solution (minus water and any compounds which are specifically exempted from the definition of VOM) used per day.

(D) The total lbs of VOM contained in the volume of each coating, ink, and cleaning solution used per day on any press. The lbs of VOM per day is to be calculated by multiplying the lbs of VOM per gallon (minus water and any compounds which are specifically exempted from the definition of VOM) times the gallons (minus water and any compounds which are specifically exempted from the definition of VOM) used per day.

(E) The total lbs of VOM per day from all coatings, inks, and cleaning solutions used on all presses. The total lbs of VOM per day is to be obtained by adding the lbs of VOM per day contained in all coatings, inks, and cleaning solutions.

(F) Within 7 days after each 365-day period, the VOM emissions (as calculated in paragraph (x)(12)(ii)(E)) of this section before add-on control, from the 365-day period, are to be determined.

Starting on July 7, 1992, VOM emissions are to be determined for the 365 days ending 7 days earlier. Each day concludes a new 365-day period. However, no VOM emissions are to be included for any days prior to July 1, 1991. For example, on July 17, 1991, the emissions from July 1, through July 10, 1991, are to be included, whereas on January 7, 1994, the emissions from January 1, 1993, through December 31, 1993, are to be included.

(13) The control and recordkeeping and reporting requirements, as well as the test methods in this paragraph, apply to the sheet fed cold set presses and web heatset presses at the Wallace Computer Services, Inc. (Wallace) printing and binding plant in Hillside, Illinois, instead of the requirements in

40 CFR 52.741(h) and 40 CFR 52.741(x)(1) through 40 CFR 52.741(x)(5).

(i) After July 1, 1991, no inks shall at any time be applied, at the presses indicated below, which exceed the pounds (lbs) volatile organic material (VOM) per gallon of ink (minus water and any compounds which are specifically exempted from the definition of VOM) limit established for each press. After July 1, 1991, the yearly volume of ink used at each press, in gallons of ink (minus water and any compounds which are specifically exempted from the definition of VOM) per year, shall not exceed the gallons per year limit established below for each press. The yearly volume of ink used per press is to be calculated according to the procedure in paragraph (x)(13)(iii) of this section.

Press	Lbs VOM/gallon ink	Gallons/year ink
14	1.68	276
16	1.68	1896
22	3.01	2712
23	3.01	13140
25	3.01	12720
26	3.01	4764

(ii) After July 1, 1991, no materials (other than those inks subject to the limits in paragraph (x)(13)(i)) of this section, shall at any time be applied or used, at the presses indicated below, which exceed the lbs VOM per gallon of material (minus water and any compounds which are specifically exempted from the definition of VOM) limit established for each press. After July 1, 1991, the yearly volume of material (excluding ink and water) used at each press, in gallons of material (minus water and any compounds which are specifically exempted from the definition of VOM) per year, shall not exceed the gallons per year limit established for each press. The yearly volume of material (excluding ink and water) used per press is to be calculated according to the procedure in paragraph (x)(13)(iii) of this section.

Press	Lbs VOM/gallon material	Gallons/year material
14	6.9	612
16	6.9	8,340

Environmental Protection Agency

§ 52.741

Press	Lbs VOM/ gallon mate- rial	Gallons/ year ma- terial
22	7.1	360
23	7.1	480
25	7.1	516
26	7.1	1,848

(iii) The yearly volume of ink/material used is to be calculated as follows:

(A) Compute the volume of ink/material used each month per press by the 15th of the following month.

(B) By the 15th of each month, add the monthly ink/material usage per press for the 12 previous months (to obtain the yearly volume of ink used).

(iv) Beginning on July 1, 1991, the owner and operator of Wallace's plant in Hillside, Illinois, shall keep the following records for each press for each month. All records shall be retained by Wallace for 3 years and shall be made available to the Administrator on request:

(A) The name and identification number of each ink, fountain solution, fountain solution additive, cleaning solvent, and other VOM containing material as applied or used.

(B) The weight of VOM per volume of each ink, fountain solution, fountain solution additive, cleaning solvent, and each other VOM containing material (minus water and any compounds which are specifically exempted from the definition of VOM) as applied or used each month.

(C) The volume of ink (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each month.

(D) The total volume of miscellaneous VOM containing materials (minus water and any compounds which are specifically exempted from the definition of VOM), other than inks, that are used each month.

(v) Any record showing a violation of paragraph (x)(13)(i) or (x)(13)(ii) of this section shall be reported by sending a copy of such record to the Administrator within 30 days of the violation.

(vi) To determine compliance with paragraphs (x)(13)(i) and (x)(13)(ii) of this section and to establish the records required under paragraph (x)(13)(iv) of this section the VOM content of each ink and miscellaneous

VOM containing material shall be determined by the applicable test methods and procedures specified in paragraph (a)(4) of this section.

(14) The control and recordkeeping and reporting requirements, as well as the test methods in this paragraph, apply to the power-operated silk screen presses, the hand screen presses, the screen adhesive printing lines, the Andreotti rotogravure press, the Halley Rotogravure press, and the Viking press at the American Decal and Manufacturing Company's plant in Chicago, Illinois, instead of the requirements in paragraphs (h) and (x)(1) through (x)(5) of this section. The emissions from the sources listed above (in paragraph (x)(14) of this section) are to be included in the calculation of "maximum theoretical emissions" for determining applicability for any other sources (for which applicability is based on the quantity of maximum theoretical emissions) at American Decal and Manufacturing Company's Chicago plant not included in paragraph (x)(14) of this section.

(i) After July 24, 1992, no inks, coatings, thinner, clean-up material or other VOC-containing material shall at any time be applied, at the presses/printing lines listed above (in paragraph (x)(14) of this section), which exceed the VOC content (in percent by weight VOC) limit established below. After July 24, 1992, the yearly usage (in weight of material applied) of ink, coating, thinner, clean-up material, and other VOC-containing material, shall not exceed the applicable pounds per year limit established below. The yearly weight of ink, coating, thinner, clean-up material, and other VOC-containing material is to be calculated according to the procedure in paragraph (x)(14)(ii) of this section.

Material	Usage (lbs/yr)	Weight Percent VOC
#6 ink	9,076	56.8
#7 ink	1,278	54.2
#2 ink	2,911	72.7
Blue N.C. lacq.	394	64.3
Black M lacq.	753	61.6
4B9L Clear	2,451	77.1
4B9L H Clear	3,360	75.0
Flow-Out Agent	1,795	97.1
D.S. Stamp lacq.	1,047	62.0
Dull write-on	86	71.6
AH-16	621	84.5

Material	Usage (lbs/yr)	Weight Percent VOC
Thinner (#7,6)	2,350	100.0
Exon 470	1,668	65.4
9L Clear	2,451	77.1
White M lacq	3,467	47.0
Tedlar Gr. Vehicle	1,050	66.7
TH-98	22,047	73.2
TH-57	59	69.5
TH-14M	16,520	0.7
PS 160	10,644	3.0
#1 tint	4,872	69.3
#2 tint	4,256	83.7
Roto Color	13,884	62.0
1st SS White	25,740	51.5
2nd SS White	25,740	51.5
Clean Up	108,742	100.0
Other Materials	400	100.0

(ii) The yearly weight of material used is to be calculated as follows:

(A) Compute the weight of each ink, coating, thinner, clean-up material, and other VOC-containing material used each month by the 15th of the following month.

(B) By the 15th of each month, add the monthly usage (in pounds) for each ink, coating, thinner, clean-up material, and other VOC-containing material for the twelve previous months (to obtain the yearly weight of each ink, coating, thinner, clean-up material used). A comparison of these yearly usage levels (in pounds) with purchase records must be made to ensure the accuracy of the monthly usage levels (in pounds) obtained to satisfy paragraph (x)(14)(ii)(A) of this section.

(iii) Beginning on August 1, 1992, the owner and operator of the American Decal and Manufacturing Company plant in Chicago, Illinois, shall keep the following records for each ink, coating, thinner, clean-up material, and other VOC-containing material for each month. All records shall be kept by the American Decal and Manufacturing Company for 3 years and shall be made available to the Administrator on request:

(A) The name and identification number of each ink, coating, thinner, clean-up material, and other VOC-containing material as applied or used.

(B) The weight percent VOC of each ink, coating, thinner, clean-up material, and each other VOC-containing material as applied or used each month.

(C) The as applied weight of each ink, coating, thinner, clean-up material,

and other VOC-containing material used each month.

(iv) Any record showing a violation of paragraph (x)(14)(i) of this section after October 20, 1995 shall be reported by sending a copy of such record to the Administrator within 30 days of the violation.

(v) To determine compliance with paragraph (x)(14)(i) of this section and to establish the records required under paragraph (x)(14)(iii) of this section, the weight percent VOC of each ink, coating, thinner, clean-up material, and other VOC-containing material shall be determined by the applicable test methods and procedures specified in paragraph (a)(4) of this section. Any material reported to be 100 percent VOC does not have to be tested for weight percent VOC.

(y) *Recordkeeping and reporting for non-CTG sources*—(1) *Exempt emission sources*. Upon request by the Administrator, the owner or operator of an emission source which is exempt from the requirements of paragraphs (u), (v), (w), (x), or (e)(3)(ii) of this section shall submit records to the Administrator within 30 calendar days from the date of the request that document that the emission source is exempt from those requirements.

(2) *Subject emission sources*. (i) Any owner or operator of a VOM emission source which is subject to the requirements of paragraph (u), (v), (w) or (x) of this section and complying by the use of emission capture and control equipment shall comply with the following:

(A) By July 1, 1991, or upon initial start-up of a new emission source, the owner or operator of the subject VOM emission source shall perform all tests and submit to the Administrator the results of all tests and calculations necessary to demonstrate that the subject emission source will be in compliance on and after July 1, 1991, or on and after the initial start-up date.

(B) On and after July 1, 1991, or on and after the initial start-up date, the owner or operator of a subject VOM emission source shall collect and record all of the following information each day and maintain the information at the facility for a period of three years:

(1) Control device monitoring data.

(2) A log of operating time for the capture system, control device, monitoring equipment and the associated emission source.

(3) A maintenance log for the capture system, control device and monitoring equipment detailing all routine and non-routine maintenance performed including dates and duration of any outages.

(C) On and after July 1, 1991, the owner or operator of a subject VOM emission source shall notify the Administrator in the following instances:

(1) Any record showing a violation of the requirements of paragraphs (u), (v), (w), or (x) of this section shall be reported by sending a copy of such record to the Administrator within 30 days following the occurrence of the violation.

(2) At least 30 calendar days before changing the method of compliance with paragraphs (u) or (x) of this section from the use of capture systems and control devices to the use of complying coatings, the owner or operator shall comply with all requirements of paragraph (y)(2)(ii)(A) of this section. Upon changing the method of compliance with paragraphs (u) or (x) of this section from the use of capture systems and control devices to the use of complying coatings, the owner or operator shall comply with all requirements of paragraph (y)(2)(ii) of this section.

(ii) Any owner or operator of a coating line which is subject to the requirements of paragraphs (u) or (x) of this section and complying by means of the daily-weighted average VOM content limitation shall comply with the following:

(A) By July 1, 1991, or upon initial start-up of a coating line subject to paragraph (u) or (x) of this section; the owner or operator of the subject coating line shall certify to the Administrator that the coating line will be in compliance on and after July 1, 1991, or on and after the initial start-up date. Such certification shall include:

(1) The name and identification number of each coating line which will comply by means of the daily-weighted average VOM content limitation.

(2) The name and identification number of each coating as applied on each coating line.

(3) The weight of VOM per volume and the volume of each coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each day on each coating line.

(4) The instrument or method by which the owner or operator will accurately measure or calculate the volume of each coating as applied each day on each coating line.

(5) The method by which the owner or operator will create and maintain records each day as required in paragraph (y)(2)(ii)(B) of this section.

(6) An example of the format in which the records required in paragraph (y)(2)(ii)(B) of this section will be kept.

(B) On and after July 1, 1991, or on and after the initial start-up date, the owner or operator of a subject coating line shall collect and record all of the following information each day for each coating line and maintain the information at the facility for a period of three years:

(1) The name and identification number of each coating as applied on each coating line.

(2) The weight of VOM per volume and the volume of each coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each day on each coating line.

(3) The daily-weighted average VOM content of all coatings as applied on each coating line as defined in paragraph (a)(3) of this section.

(C) On and after July 1, 1991, the owner or operator of a subject coating line shall notify the Administrator in the following instances:

(1) Any record showing violation of the requirements of paragraph (u) or (x) of this section shall be reported by sending a copy of such record to the Administrator within 30 days following the occurrence of the violation.

(2) At least 30 calendar days before changing the method of compliance with paragraph (u) or (x) of this section from the use of complying coatings to the use capture systems and control devices, the owner or operator shall

§ 52.741

comply with all requirements of paragraph (y)(2)(i)(A) of this section. Upon changing the method of compliance with paragraphs (u) or (x) of this section from the use of complying coatings to the use capture systems and control devices, the owner or operator shall comply with all requirements of paragraph (y)(2)(i) of this section.

(iii) Any owner or operator of a VOM emission source which is subject to the requirements of paragraphs (u), (v), (w) or (x) of this section and complying by means of an alternative control plan which has been approved by the Administrator as a SIP or FIP revision shall comply with the recordkeeping and reporting requirements specified in the alternative control plan.

(z) *Rules stayed.* Notwithstanding any other provision of this subpart, the effectiveness of the following rules is stayed as indicated below.

(1) [Reserved]

(2) Compliance with all of 40 CFR 52.741 is stayed for 60 days (July 1, 1991, until August 30, 1991) as it pertains to the following parties: The Illinois Environmental Regulatory Group including its approximately 40 member firms; Allsteel, Incorporated; Riverside Laboratories, Incorporated; the Printing Industry of Illinois/Indiana Association including its member firms, and R.R. Donnelley & Sons Company; the rules applicable to General Motors Corporation; Reynolds Metals Company; Stepan Company; and Duo-Fast Corporation. Final compliance for these parties is extended 60 days from July 1, 1991 until August 30, 1991.

(3) The following rules are stayed from July 23, 1991, until USEPA completes its reconsideration as indicated:

(i) 40 CFR 52.741(e) only as it applies to Duo-Fast Corporation's Franklin Park, Illinois "power-driven metal fastener" manufacturing facility, and

(ii) 40 CFR 52.741 (w) and (y) only as it applies to Stepan Company's miscellaneous organic chemical manufacturing processes at its manufacturing facility located near Millsdale, Illinois.

When USEPA concludes its reconsideration, it will publish its decision and any actions required to effectuate that decision in the FEDERAL REGISTER.

(4)–(5) [Reserved]

40 CFR Ch. I (7–1–25 Edition)

APPENDIX A TO § 52.741—LIST OF CHEMICALS DEFINING SYNTHETIC ORGANIC CHEMICAL AND POLYMER MANUFACTURING

OCPDB No. ¹	Chemical
20	Acetal.

APPENDIX B TO § 52.741—VOM MEASUREMENT TECHNIQUES FOR CAPTURE EFFICIENCY

Procedure G.1—Captured VOC Emissions

1. Introduction

1.1 *Applicability.* This procedure is applicable for determining the volatile organic compounds (VOC) content of captured gas streams. It is intended to be used as a segment in the development of liquid/gas or gas/gas protocols for determining VOC capture efficiency (CE) for surface coating and printing operations. The procedure may not be acceptable in certain site-specific situations, e.g., when: (1) Direct fired heaters or other circumstances affect the quantity of VOC at the control device inlet; and (2) particulate organic aerosols are formed in the process and are present in the captured emissions.

1.2 *Principle.* The amount of VOC captured (G) is calculated as the sum of the products of the VOC content (C_{Gj}), the flow rate (Q_{Gj}), and the sample time (T_C) from each captured emissions point.

1.3 *Estimated measurement uncertainty.* The measurement uncertainties are estimated for each captured or fugitive emissions point as follows: $Q_{Gj} = \pm 5.5$ percent and $C_{Gj} = \pm 5.0$ percent. Based on these numbers, the probable uncertainty for G is estimated at about ± 7.4 percent.

1.4 *Sampling requirements.* A capture efficiency test shall consist of at least three sampling runs. The sampling time for each run should be at least 8 hours, unless otherwise approved.

1.5 *Notes.* Because this procedure is often applied in highly explosive areas, caution and care should be exercised in choosing appropriate equipment and installing and using the equipment. Mention of trade names or company products does not constitute endorsement. All gas concentrations (percent, ppm) are by volume, unless otherwise noted.

2. APPARATUS AND REAGENTS

2.1 *Gas VOC concentration.* A schematic of the measurement system is shown in Figure 1. The main components are described below:

2.1.1 *Sample probe.* Stainless steel, or equivalent. The probe shall be heated to prevent VOC condensation.

2.1.2 *Calibration valve assembly.* Three-way valve assembly at the outlet of sample probe to direct the zero and calibration gases to the analyzer. Other methods, such as quick-connect lines, to route calibration gases to the outlet of the sample probe are acceptable.

2.1.3 *Sample line.* Stainless steel or Teflon tubing to transport the sample gas to the analyzer. The sample line must be heated to prevent condensation.

2.1.4 *Sample pump.* A lead-free pump, to pull the sample gas through the system at a flow rate sufficient to minimize the response time of the measurement system. The components of the pump that contact the gas stream shall be constructed of stainless steel or Teflon. The sample pump must be heated to prevent condensation.

2.1.5 *Sample flow rate control.* A sample flow rate control valve and rotameter, or equivalent, to maintain a constant sampling rate within 10 percent. The flow rate control valve and rotameter must be heated to prevent condensation. A control valve may also be located on the sample pump bypass loop to assist in controlling the sample pressure and flow rate.

2.1.6 *Sample gas manifold.* Capable of diverting a portion of the sample gas stream to the flame ionization analyzer (FIA), and the remainder to the bypass discharge vent. The manifold components shall be constructed of stainless steel or Teflon. If captured or fugitive emissions are to be measured at multiple locations, the measurement system shall be designed to use separate sampling probes, lines, and pumps for each measurement location and a common sample gas manifold and FIA. The sample gas manifold and connecting lines to the FIA must be heated to prevent condensation.

2.1.7 *Organic concentration analyzer.* An FIA with a span value of 1.5 times the expected concentration as propane; however, other span values may be used if it can be demonstrated that they would provide more accurate measurements.

The system shall be capable of meeting or exceeding the following specifications:

2.1.7.1 *Zero drift.* Less than ± 3.0 percent of the span value.

2.1.7.2 *Calibration drift.* Less than ± 3.0 percent of the span value.

2.1.7.3 *Calibration error.* Less than ± 5.0 percent of the calibration gas value.

2.1.7.4 *Response time.* Less than 30 seconds.

2.1.8 *Integrator/data acquisition system.* An analog or digital device or computerized

data acquisition system used to integrate the FIA response or compute the average response and record measurement data. The minimum data sampling frequency for computing average or integrated values is one measurement value every 5 seconds. The device shall be capable of recording average values at least once per minute.

2.1.9 Calibration and other gases. Gases used for calibration, fuel, and combustion air (if required) are contained in compressed gas cylinders. All calibration gases shall be traceable to NIST standards and shall be certified by the manufacturer to ± 1 percent of the tag value. Additionally, the manufacturer of the cylinder should provide a recommended shelf life for each calibration gas cylinder over which the concentration does not change more than ± 2 percent from the certified value. For calibration gas values not generally available, alternative methods for preparing calibration gas mixtures, such as dilution systems, may be used with prior approval.

2.1.9.1 Fuel. A 40 percent H_2 /60 percent He or 40 percent H_2 /60 percent N_2 gas mixture is recommended to avoid an oxygen synergism effect that reportedly occurs when oxygen concentration varies significantly from a mean value.

2.1.9.2 Carrier gas. High purity air with less than 1 ppm of organic material (as propane or carbon equivalent) or less than 0.1 percent of the span value, whichever is greater.

2.1.9.3 FIA Linearity calibration gases. Low-, mid-, and high-range gas mixture standards with nominal propane concentrations of 20–30, 45–55, and 70–80 percent of the span value in air, respectively. Other calibration values and other span values may be used if it can be shown that more accurate measurements would be achieved.

2.1.10 Particulate filter. An in-stack or an out-of-stack glass fiber filter is recommended if exhaust gas particulate loading is significant. An out-of-stack filter must be heated to prevent any condensation unless it can be demonstrated that no condensation occurs.

2.2 Captured emissions volumetric flow rate.

2.2.1 Method 2 or 2A apparatus. For determining volumetric flow rate.

2.2.2 Method 3 apparatus and reagents. For determining molecular weight of the gas stream. An estimate of the molecular weight of the gas stream may be used if it can be justified.

2.2.3 Method 4 apparatus and reagents. For determining moisture content, if necessary.

3. DETERMINATIONS OF VOLUMETRIC FLOW RATE OF CAPTURED EMISSIONS

3.1 Locate all points where emissions are captured from the affected facility. Using Method 1, determine the sampling points. Be

sure to check each site for cyclonic or swirling flow.

3.2 Measure the velocity at each sampling site at least once every hour during each sampling run using Method 2 or 2A.

4. DETERMINATIONS OF VOC CONTENT OF CAPTURED EMISSIONS

4.1 Analysis duration. Measure the VOC responses at each captured emissions point during the entire test run or, if applicable, while the process is operating. If there are multiple captured emission locations, design a sampling system to allow a single FIA to be used to determine the VOC responses at all sampling locations.

4.2 Gas VOC concentration.

4.2.1 Assemble the sample train as shown in Figure 1. Calibrate the FIA according to the procedure in section 5.1.

4.2.2 Conduct a system check according to the procedure in section 5.3.

4.2.3 Install the sample probe so that the probe is centrally located in the stack, pipe, or duct, and is sealed tightly at the stack port connection.

4.2.4 Inject zero gas at the calibration valve assembly. Allow the measurement system response to reach zero. Measure the system response time as the time required for the system to reach the effluent concentration after the calibration valve has been returned to the effluent sampling position.

4.2.5 Conduct a system check before and a system check after each sampling run according to the procedures in sections 5.2 and 5.3. If the drift check following a run indicates unacceptable performance, the run is not valid. The tester may elect to perform system drift checks during the run not to exceed one drift check per hour.

4.2.6 Verify that the sample lines, filter, and pump temperatures are 120 ± 5 °C.

4.2.7 Begin sampling at the start of the test period and continue to sample during the entire run. Record the starting and ending times and any required process information as appropriate. If multiple captured emission locations are sampled using a single FIA, sample at each location for the same amount of time (e.g., 2 minutes) and continue to switch from one location to another for the entire test run. Be sure that total sampling time at each location is the same at the end of the test run. Collect at least 4 separate measurements from each sample point during each hour of testing. Disregard the measurements at each sampling location until two times the response time of the measurement system has elapsed. Continue sampling for at least 1 minute and record the concentration measurements.

4.3 Background concentration.

4.3.1 Locate all NDO's of the TTE. A sampling point shall be centrally located outside of the TTE at 4 equivalent diameters from

each NDO, if possible. If there are more than 6 NDO's, choose 6 sampling points evenly spaced among the NDO's.

4.3.2 Assemble the sample train as shown in Figure 2. Calibrate the FIA and conduct a system check according to the procedures in sections 5.1 and 5.3.

NOTE: This sample train shall be a separate sampling train from the one to measure the captured emissions.

4.3.3 Position the probe at the sampling location.

4.3.4 Determine the response time, conduct the system check and sample according to the procedures described in sections 4.2.4 to 4.2.7.

4.4 *Alternative procedure.* The direct interface sampling and analysis procedure described in section 7.2 of Method 18 may be used to determine the gas VOC concentration. The system must be designed to collect and analyze at least one sample every 10 minutes.

5. CALIBRATION AND QUALITY ASSURANCE

5.1 *FIA calibration and linearity check.* Make necessary adjustments to the air and fuel supplies for the FIA and ignite the burner. Allow the FIA to warm up for the period recommended by the manufacturer. Inject a calibration gas into the measurement system and adjust the back-pressure regulator to the value required to achieve the flow rates specified by the manufacturer. Inject the zero- and the high-range calibration gases and adjust the analyzer calibration to provide the proper responses. Inject the low- and mid-range gases and record the responses of the measurement system. The calibration and linearity of the system are acceptable if the responses for all four gases are within 5 percent of the respective gas values. If the performance of the system is not acceptable, repair or adjust the system and repeat the linearity check. Conduct a calibration and linearity check after assembling the analysis system and after a major change is made to the system.

5.2 *Systems drift checks.* Select the calibration gas that most closely approximates the concentration of the captured emissions for conducting the drift checks. Introduce the zero and calibration gas at the calibration valve assembly and verify that the appropriate gas flow rate and pressure are present at the FIA. Record the measurement system responses to the zero and calibration gases. The performance of the system is acceptable if the difference between the drift check measurement and the value obtained in section 5.1 is less than 3 percent of the span value. Conduct the system drift checks at the end of each run.

5.3 *System check.* Inject the high range calibration gas at the inlet to the sampling probe while the dilution air is turned off.

Record the response. The performance of the system is acceptable if the measurement system response is within 5 percent of the value obtained in section 5.1 for the high range calibration gas. Conduct a system check before and after each test run.

5.4 *Analysis audit.* Immediately before each test analyze an audit cylinder as described in section 5.2. The analysis audit must agree with the audit cylinder concentration within 10 percent.

6. NOMENCLATURE

A_i = area of NDO i , ft².

A_N = total area of all NDO's in the enclosure, ft².

C_{Bi} = corrected average VOC concentration of background emissions at point i , ppm propane.

C_B = average background concentration, ppm propane.

C_{Gj} = corrected average VOC concentration of captured emissions at point j , ppm propane.

C_{DH} = average measured concentration for the drift check calibration gas, ppm propane.

C_{DO} = average system drift check concentration for zero concentration gas, ppm propane.

C_H = actual concentration of the drift check calibration gas, ppm propane.

C_i = uncorrected average background VOC concentration measured at point i , ppm propane.

C_j = uncorrected average VOC concentration measured at point j , ppm propane.

G = total VOC content of captured emissions, kg.

$K_i = 1.830 \times 10^{-6}$ kg/ (m³-ppm).

n = number of measurement points.

Q_{Gj} = average effluent volumetric flow rate corrected to standard conditions at captured emissions point j , m³/min.

T_C = total duration of captured emissions sampling run, min.

7. CALCULATIONS

7.1 Total VOC captured emissions.

$$G = \sum_{j=1}^n (C_{Gj} - C_B) Q_{Gj} T_C K_i \quad \text{Eq. 1}$$

7.2 VOC concentration of the captured emissions at point j .

$$C_{Gj} = (C_j - C_{DO}) \frac{C_H}{C_{DH} - C_{DO}} \quad \text{Eq. 2}$$

7.3 Background VOC concentration at point i .

$$C_{Bi} = (C_i - C_{DO}) \frac{C_H}{C_{DH} - C_{DO}} \quad \text{Eq. 3}$$

7.4 Average background concentration.

$$C_B = \frac{\sum_{i=1}^n C_{Bi} A_i}{n A_N} \quad \text{Eq. 4}$$

NOTE: If the concentration at each point is within 20 percent of the average concentration of all points, the terms “ A_i ” and “ A_N ” may be deleted from Equation 4.

*Procedure G.2—Captured VOC Emissions
(Dilution Technique)*

1. INTRODUCTION

1.1 *Applicability.* This procedure is applicable for determining the volatile organic compounds (VOC) content of captured gas streams. It is intended to be used as a segment in the development of a gas/gas protocol in which fugitive emissions are measured for determining VOC capture efficiency (CE) for surface coating and printing operations. A dilution system is used to reduce the VOC concentration of the captured emission to about the same concentration as the fugitive emission. The procedure may not be acceptable in certain site-specific situations, e.g., when: (1) Direct fired heaters or other circumstances affect the quantity of VOC at the control device inlet; and (2) particulate organic aerosols are formed in the process and are present in the captured emissions.

1.2 *Principle.* The amount of VOC captured (G) is calculated as the sum of the products of the VOC content (C_{Gj}), the flow rate (Q_{Gj}), and the sampling time (T_c) from each captured emissions point.

1.3 *Estimated measurement uncertainty.* The measurement uncertainties are estimated for each captured or fugitive emissions point as follows: $O_{Gj} = \pm 5.5$ percent and $C_{Gj} = \pm 5$ percent. Based on these numbers, the probable uncertainty for G is estimated at about ± 7.4 percent.

1.4 *Sampling requirements.* A capture efficiency test shall consist of at least three sampling runs. The sampling time for each run should be at least 8 hours, unless otherwise approved.

1.5 *Notes.* Because this procedure is often applied in highly explosive areas, caution and care should be exercised in choosing appropriate equipment and installing and using the equipment. Mention of trade names or company products does not constitute endorsement. All gas concentrations (percent, ppm) are by volume, unless otherwise noted.

2. APPARATUS AND REAGENTS

2.1 *Gas VOC concentration.* A schematic of the measurement system is shown in Figure 1. The main components are described below:

2.1.1 *Dilution system.* A Kipp in-stack dilution probe and controller or similar device may be used. The dilution rate may be changed by substituting different critical orifices or adjustments of the aspirator supply pressure. The dilution system shall be heated to prevent VOC condensation.

NOTE: An out-of-stack dilution device may be used.

2.1.2 *Calibration valve assembly.* Three-way valve assembly at the outlet of sample probe to direct the zero and calibration gases to the analyzer. Other methods, such as quick-connect lines, to route calibration gases to the outlet of the sample probe are acceptable.

2.1.3 *Sample line.* Stainless steel or Teflon tubing to transport the sample gas to the analyzer. The sample line must be heated to prevent condensation.

2.1.4 *Sample pump.* A leak-free pump, to pull the sample gas through the system at a flow rate sufficient to minimize the response time of the measurement system. The components of the pump that contact the gas stream shall be constructed of stainless steel or Teflon. The sample pump must be heated to prevent condensation.

2.1.5 *Sample flow rate control.* A sample flow rate control valve and rotameter, or equivalent, to maintain a constant sampling rate within 10 percent. The flow control valve and rotameter must be heated to prevent condensation. A control valve may also be located on the sample pump bypass loop to assist in controlling the sample pressure and flow rate.

2.1.6 *Sample gas manifold.* Capable of diverting a portion of the sample gas stream to the flame ionization analyzer (FIA), and the remainder to the bypass discharge vent. The manifold components shall be constructed of stainless steel or Teflon. If captured or fugitive emissions are to be measured at multiple locations, the measurement system shall be designed to use separate sampling probes, lines, and pumps for each measurement location and a common sample gas manifold and FIA. The sample gas manifold and connecting lines to the FIA must be heated to prevent condensation.

2.1.7 *Organic concentration analyzer.* An FIA with a span value of 1.5 times the expected concentration as propane; however, other span values may be used if it can be demonstrated that they would provide more accurate measurements.

The system shall be capable of meeting or exceeding the following specifications:

2.1.7.1 *Zero drift.* Less than ± 3.0 percent of the span value.

Environmental Protection Agency

§ 52.741

2.1.7.2 *Calibration drift.* Less than ± 3.0 percent of the span value.

2.1.7.3 *Calibration error.* Less than ± 5.0 percent of the calibration gas value.

2.1.7.4 *Response time.* Less than 30 seconds.

2.1.7.8 *Integrator/data acquisition system.* An analog or digital device or computerized data acquisition system used to integrate the FIA response or compute the average response and record measurement data. The minimum data sampling frequency for computing average or integrated values is one measurement value every 5 seconds. The device shall be capable of recording average values at least once per minute.

2.1.9 *Calibration and other gases.* Gases used for calibration, fuel, and combustion air (if required) are contained in compressed gas cylinders. All calibration gases shall be traceable to NIST standards and shall be certified by the manufacturer to ± 1 percent of the tag value. Additionally, the manufacturer of the cylinder should provide a recommended shelf life for each calibration gas cylinder over which the concentration does not change more than ± 2 percent from the certified value. For calibration gas values not generally available, alternative methods for preparing calibration gas mixtures, such as dilution system, may be used with prior approval.

2.1.9.1 *Fuel.* A 40 percent H_2 /60 percent He or 40 percent H_2 /60 percent N_2 gas mixture is recommended to avoid an oxygen synergism effect that reportedly occurs when oxygen concentration varies significantly from a mean value.

2.1.9.2. *Carrier gas and dilution air supply.* High purity air with less than 1 ppm of organic material (as propane or carbon equivalent) or less than 0.1 percent of the span value, whichever is greater.

2.1.9.3 *FIA linearity calibration gases.* Low-, mid-, and high-range gas mixture standards with nominal propane concentrations of 20–30, 45–55, and 70–80 percent of the span value in air, respectively. Other calibration values and other span values may be used if it can be shown that more accurate measurements would be achieved.

2.1.9.4 *Dilution check gas.* Gas mixture standard containing propane in air, approximately half the span value after dilution.

2.1.10 *Particulate filter.* An in-stack or an out-of-stack glass fiber filter is recommended if exhaust gas particulate loading is significant. An out-of-stack filter must be heated to prevent any condensation unless it can be demonstrated that no condensation occurs.

2.2 *Captured emissions volumetric flow rate.*

2.2.1 *Method 2 or 2A apparatus.* For determining volumetric flow rate.

2.2.2 *Method 3 apparatus and reagents.* For determining molecular weight of the gas stream. An estimate of the molecular weight

of the gas stream may be used if it can be justified.

2.2.3 *Method 4 apparatus and reagents.* For determining moisture content, if necessary.

3. DETERMINATION OF VOLUMETRIC FLOW RATE OF CAPTURED EMISSIONS

3.1 Locate all points where emissions are captured from the affected facility. Using Method 1, determine the sampling points. Be sure to check each site for cyclonic or swirling flow.

3.2 Measure the velocity at each sampling site at least once every hour during each sampling run using Method 2 or 2A.

4. DETERMINATION OF VOC CONTENT OF CAPTURED EMISSIONS

4.1 *Analysis duration.* Measure the VOC responses at each captured emissions point during the entire test run or, if applicable, while the process is operating. If there are multiple captured emissions locations, design a sampling system to allow a single FIA to be used to determine the VOC responses at all sampling locations.

4.2 *Gas VOC concentration.*

4.2.1 Assemble the sample train as shown in Figure 1. Calibrate the FIA according to the procedure in section 5.1.

4.2.2 Set the dilution ratio and determine the dilution factor according to the procedure in section 5.3.

4.2.3 Conduct a system check according to the procedure in section 5.4.

4.2.4 Install the sample probe so that the probe is centrally located in the stack, pipe, or duct, and is sealed tightly at the stack port connection.

4.2.5 Inject zero gas at the calibration valve assembly. Measure the system response time as the time required for the system to reach the effluent concentration after the calibration valve has been returned to the effluent sampling position.

4.2.6 Conduct a system check before and a system drift check after each sampling run according to the procedures in sections 5.2 and 5.4. If the drift check following a run indicates unacceptable performance, the run is not valid. The tester may elect to perform system drift checks during the run not to exceed one drift check per hour.

4.2.7 Verify that the sample lines, filter, and pump temperatures are 120 ± 5 °C.

4.2.8 Begin sampling at the start of the test period and continue to sample during the entire run. Record the starting and ending times and any required process information as appropriate. If multiple captured emission locations are sampled using a single FIA, sample at each location for the same amount of time (e.g., 2 minutes) and continue to switch from one location to another for the entire test run. Be sure that total sampling time at each location is the

same at the end of the test run. Collect at least 4 separate measurements from each sample point during each hour of testing. Disregard the measurements at each sampling location until two times the response time of the measurement system has elapsed. Continue sampling for at least 1 minute and record the concentration measurements.

4.3 Background concentration.

4.3.1 Locate all NDO's of the TTE. A sampling point shall be centrally located outside of the TTE at 4 equivalent diameters from each NDO, if possible. If there are more than 6 NDO's, choose 6 sampling points evenly spaced among the NDO's.

4.3.2 Assemble the sample train as shown in Figure 2. Calibrate the FIA and conduct a system check according to the procedures in sections 5.1 and 5.4.

4.3.3 Position the probe at the sampling location.

4.3.4 Determine the response time, conduct the system check and sample according to the procedures described in sections 4.2.4 to 4.2.8.

4.4 *Alternative procedure.* The direct interface sampling and analysis procedure described in section 7.2 of Method 18 may be used to determine the gas VOC concentration. The system must be designed to collect and analyze at least one sample every 10 minutes.

5. CALIBRATION AND QUALITY ASSURANCE

5.1 *FIA Calibration and linearity check.* Make necessary adjustments to the air and fuel supplies for the FIA and ignite the burner. Allow the FIA to warm up for the period recommended by the manufacturer. Inject a calibration gas into the measurement system after the dilution system and adjust the back-pressure regulator to the value required to achieve the flow rates specified by the manufacturer. Inject the zero- and the high-range calibration gases and adjust the analyzer calibration to provide the proper responses. Inject the low- and mid-range gases and record the responses of the measurement system. The calibration and linearity of the system are acceptable if the responses for all four gases are within 5 percent of the respective gas values. If the performance of the system is not acceptable, repair or adjust the system and repeat the linearity check. Conduct a calibration and linearity check after assembling the analysis system and after a major change is made to the system.

5.2 *Systems drift checks.* Select the calibration gas that most closely approximates the concentration of the diluted captured emissions for conducting the drift checks. Introduce the zero and calibration gas at the calibration valve assembly and verify that the appropriate gas flow rate and pressure are present at the FIA. Record the measurement system responses to the zero and calibration

gases. The performance of the system is acceptable if the difference between the drift check measurement and the value obtained in section 5.1 is less than 3 percent of the span value. Conduct the system drift check at the end of each run.

5.3 *Determination of dilution factor.* Inject the dilution check gas into the measurement system before the dilution system and record the response. Calculate the dilution factor using Equation 3.

5.4 *System check.* Inject the high range calibration gas at the inlet to the sampling probe while the dilution air is turned off. Record the response. The performance of the system is acceptable if the measurement system response is within 5 percent of the value obtained in section 5.1 for the high range calibration gas. Conduct a system check before and after each test run.

5.5 *Analysis audit.* Immediately before each test analyze an audit cylinder as described in section 5.2. The analysis audit must agree with the audit cylinder concentration within 10 percent.

6. NOMENCLATURE

A_i = area of NDO i, ft².
 A_N = total area of all NDO's in the enclosure, ft².
 C_A = actual concentration of the dilution check gas, ppm propane.
 C_{Bi} = corrected average VOC concentration of background emissions at point i, ppm propane.
 C_B = average background concentration, ppm propane.
 C_{DH} = average measured concentration for the drift check calibration gas, ppm propane.
 C_{DO} = average system drift check concentration for zero concentration gas, ppm propane.
 C_H = actual concentration of the drift check calibration, gas, ppm propane.
 C_i = uncorrected average background VOC concentration measured at point i, ppm propane.
 C_j = uncorrected average VOC concentration measured at point j, ppm propane.
 C_M = measured concentration of the dilution check gas, ppm propane.
 D_F = dilution factor.
 G = total VOC content of captured emissions, kg.
 $K_1 = 1.830 \times 10^{-6}$ kg/(m³-ppm).
 n = number of measurement points.
 Q_{Gj} = average effluent volumetric flow rate corrected to standard conditions at captured emissions point j, m³/min.
 T_C = total duration of capture efficiency sampling run, min.

7. CALCULATIONS

7.1 Total VOC captured emissions.

Environmental Protection Agency

§ 52.741

$$G = \sum_{j=1}^n C_{Gj} Q_{Gj} T_C K_1$$

Eq. 1

7.2 VOC concentration of the captured emissions to point j .

$$C_{Gj} = DF(C_j + -C_{DO}) \frac{C_H}{C_{DH} - C_{DO}} \quad \text{Eq. 2}$$

7.3 Dilution factor.

$$DF = \frac{C_A}{C_M} \quad \text{Eq. 3}$$

7.4 Background VOC concentration at point i .

$$C_{Bi} = (C_i - C_{DO}) \frac{C_H}{C_{DH} - C_{DO}} \quad \text{Eq. 4}$$

7.5 Average background concentration.

$$C_B = \frac{\sum_{i=1}^n C_{Bi} A_i}{n A_N} \quad \text{Eq. 5}$$

NOTE: If the concentration at each point is within 20 percent of the average concentration of all points, the terms " A_i " and " A_N " may be deleted from Equation 4.

Procedure F.2—Fugitive VOC Emissions from Building Enclosures

1. Introduction

1.1 *Applicability.* This procedure is applicable for determining the fugitive volatile organic compounds (VOC) emissions from a building enclosure (BE). It is intended to be

used as a segment in the development of liquid/gas or gas/gas protocols for determining VOC capture efficiency (CE) for surface coating and printing operations.

1.2 *Principle.* The total amount of fugitive VOC emissions (F_B) from the BE is calculated as the sum of the products of the

VOC content (C_{Fj}) of each fugitive emissions point, its flow rate (Q_{Fj}), and time (T_F).

1.3 *Measurement uncertainty.* The measurement uncertainties are estimated for each fugitive emissions point as follows: $Q_{Fj} = \pm 5.0$ percent and $C_{Fj} = \pm 5.0$ percent. Based on these numbers, the probable uncertainty for F_B is estimated at about ± 11.2 percent.

1.4 *Sampling requirements.* A capture efficiency test shall consist of at least three sampling runs. The sampling time for each run should be at least 8 hours, unless otherwise approved.

1.5 *Notes.* Because this procedure is often applied in highly explosive areas, caution and care should be exercised in choosing appropriate equipment and installing and using the equipment. Mention of trade names or company products does not constitute endorsement. All gas concentrations (percent, ppm) are by volume, unless otherwise noted.

2. APPARATUS AND REAGENTS

2.1 *Gas VOC concentration.* A schematic of the measurement system is shown in Figure 1. The main components are described below:

2.1.1 *Sample probe.* Stainless steel, or equivalent. The probe shall be heated to prevent VOC condensation.

2.1.2 *Calibration valve assembly.* Three-way valve assembly at the outlet of sample probe to direct the zero and calibration gases to the analyzer. Other methods, such as quick-connect lines, to route calibration gases to the outlet of the sample probe are acceptable.

2.1.3 *Sample line.* Stainless steel or Teflon tubing to transport the sample gas to the analyzer. The sample line must be heated to prevent condensation.

2.1.4 *Sample pump.* A leak-free pump, to pull the sample gas through the system at a flow rate sufficient to minimize the response time of the measurement system. The components of the pump that contact the gas stream shall be constructed of stainless steel or Teflon. The pump shall be heated to prevent condensation.

2.1.5 *Sample flow rate control.* A sample flow rate control valve and rotameter, or equivalent, to maintain a constant sampling rate within 10 percent. The flow rate control valve and rotameter must be heated to prevent condensation. A control valve may also be located on the sample pump bypass loop to assist in controlling the sample pressure and flow rate.

2.1.6 *Sample gas manifold.* Capable of diverting a portion of the sample gas stream to the flame ionization analyzer (FIA), and the remainder to the bypass discharge vent. The manifold components shall be constructed of stainless steel or Teflon. If emissions are to be measured at multiple locations, the measurement system shall be designed to use separate sampling probes, lines, and pumps for each measurement location and a common sample gas manifold and FIA. The sample

gas manifold must be heated to prevent condensation.

2.1.7 *Organic Concentration Analyzer.* An FIA with a span value of 1.5 times the expected concentration as propane; however, other span values may be used if it can be demonstrated that they would provide more accurate measurements. The system shall be capable of exceeding the following specifications:

2.1.7.1 *Zero drift.* Less than ± 3.0 percent of the span value.

2.1.7.2 *Calibration drift.* Less than ± 3.0 percent of the span value.

2.1.7.3 *Calibration error.* Less than ± 5.0 percent of the calibration gas value.

2.1.7.4 *Response time.* Less than 30 seconds.

2.1.8 *Integrator/data acquisition system.* An analog or digital device or computerized data acquisition system used to integrate the FIA response or compute the average response and record measurement data. The minimum data sampling frequency for computing average or integrated values is one measurement value every 5 seconds. The device shall be capable of recording average values at least once per minute.

2.1.9 *Calibration and other gases.* Gases used for calibration, fuel, and combustion air (if required) are contained in compressed gas cylinders. All calibration gases shall be traceable to NIST standards and shall be certified by the manufacturer to ± 1 percent of the tag value. Additionally, the manufacturer of the cylinder should provide a recommended shelf life for each calibration gas cylinder over which the concentration does not change more than ± 2 percent from the certified value. For calibration gas values not generally available, alternative methods for preparing calibration gas mixtures, such as dilution systems, may be used with prior approval.

2.1.9.1 *Fuel.* A 40 percent H_2 /60 percent He or 40 percent H_2 /60 percent N_2 gas mixture is recommended to avoid an oxygen synergism effect that reportedly occurs when oxygen concentration varies significantly from a mean value.

2.1.9.2 *Carrier gas.* High purity air with less than 1 ppm of organic material (propane or carbon equivalent) or less than 0.1 percent of the span value, whichever is greater.

2.1.9.3 *FIA linearity calibration gases.* Low-, mid-, and high-range gas mixture standards with nominal propane concentrations of 20–30, 45–55, and 70–80 percent of the span value in air, respectively. Other calibration values and other span values may be used if it can be shown that more accurate measurements would be achieved.

2.1.10 *Particulate filter.* An in-stack or an out-of-stack glass fiber filter is recommended if exhaust gas particulate loading is significant. An out-of-stack filter must be heated to prevent any condensation unless it

can be demonstrated that no condensation occurs.

2.2 *Fugitive emissions volumetric flow rate.*

2.2.1 *Flow direction indicators.* Any means of indicating inward or outward flow, such as light plastic film or paper streamers, smoke tubes, filaments, and sensory perception.

2.2.2 *Method 2 or 2A apparatus.* For determining volumetric flow rate. Anemometers or similar devices calibrated according to the manufacturer's instructions may be used when low velocities are present. Vane anemometers (Young-maximum response propeller), specialized pitots with electronic manometers (e.g., Shortridge Instruments Inc., Airdata Multimeter 860) are commercially available with measurement thresholds of 15 and 8 mpm (50 and 25 fpm), respectively.

2.2.3 *Method 3 apparatus and reagents.* For determining molecular weight of the gas stream. An estimate of the molecular weight of the gas stream may be used if it can be justified.

2.2.4 *Method 4 apparatus and reagents.* For determining moisture content, if necessary.

3. DETERMINATION OF VOLUMETRIC FLOW RATE OF FUGITIVE EMISSIONS

3.1 *Preliminary determinations.* The purpose of this exercise is to determine which exhaust points should be measured for volumetric flow rates and VOC concentrations.

3.1.1 *Forced draft openings.* Identify all forced draft openings. Determine the volumetric flow rate according to Method 2.

3.1.2 *NDO's exhaust points.* The NDO's in the roof of a facility are considered to be exhaust points. Determine volumetric flow rate from these NDO's. Divide the cross-sectional area according to Method 1 using 12 equal areas. Use the appropriate velocity measurement devices, e.g., propeller anemometers.

3.1.3 *Other NDO's.*

3.1.3.1 This step is optional. Determine the exhaust flow rate, including that of the control device, from the enclosure and the intake air flow rate. If the exhaust flow rate divided by the intake air flow rate is greater than 1.1, then all other NDO's are not considered to be significant exhaust points.

3.1.3.2 If the option above is not taken, identify all other NDO's and other potential points through which fugitive emissions may escape the enclosure. Then use the following criteria to determine whether flow rates and VOC concentrations need to be measured:

3.1.3.2.1 Using the appropriate flow direction indicator, determine the flow direction. An NDO with zero or inward flow is not an exhaust point.

3.1.3.2.2 Measure the outward volumetric flow rate from the remainder of the NDO's. If the collective flow rate is 2 percent, or less, of the flow rate from sections 3.1.1 and 3.1.2, then these NDO's, except those within two

equivalent diameters (based on NDO opening) from VOC sources, may be considered to be non-exhaust points.

3.1.3.2.3 If the percentage calculated in section 3.1.3.2.2 is greater than 2 percent, those NDO's (except those within two equivalent diameters from VOC sources) whose volumetric flow rate totals 2 percent of the flow rate from sections 3.1.1 and 3.1.2 may be considered as non-exhaust points. All remaining NDO's shall be measured for volumetric flow rate and VOC concentrations during the CE test.

3.1.3.2.4 The tester may choose to measure VOC concentrations at the forced exhaust points and the NDO's. If the total VOC emissions from the NDO's are less than 2 percent of the emissions from the forced draft and roof NDO's, then these NDO's may be eliminated from further consideration.

3.2 *Determination of flow rates.*

3.2.1 Measure the volumetric flow rate at all locations identified as exhaust points in section 3.1. Divide each exhaust opening into 9 equal areas for rectangular openings and 8 for circular openings.

3.2.2 Measure the velocity at each site at least once every hour during each sampling run using Method 2 or 2A, if applicable, or using the low velocity instruments in section 2.2.2.

4. DETERMINATION OF VOC CONTENT OF FUGITIVE EMISSIONS

4.1 *Analysis duration.* Measure the VOC responses at each fugitive emission point during the entire test run or, if applicable, while the process is operating. If there are multiple emissions locations, design a sampling system to allow a single FIA to be used to determine the VOC responses at all sampling locations.

4.2 *Gas VOC concentration.*

4.2.1 Assemble the sample train as shown in Figure 1. Calibrate the FIA and conduct a system check according to the procedures in sections 5.1 and 5.3, respectively.

4.2.2 Install the sample probe so that the probe is centrally located in the stack, pipe, or duct, and is sealed tightly at the stack port connection.

4.2.3 Inject zero gas at the calibration valve assembly. Allow the measurement system response to reach zero. Measure the system response time as the time required for the system to reach the effluent concentration after the calibration valve has been returned to the effluent sampling position.

4.2.4 Conduct a system check before and a system drift check after each sampling run according to the procedures in sections 5.2 and 5.3. If the drift check following a run indicates unacceptable performance, the run is not valid. The tester may elect to perform drift checks during the run not to exceed one drift check per hour.

4.2.5 Verify that the sample lines, filter, and pump temperatures are 120 ± 5 °C.

4.2.6 Begin sampling at the start of the test period and continue to sample during the entire run. Record the starting and ending times and any required process information as appropriate. If multiple emission locations are sampled using a single FIA, sample at each location for the same amount of time (e.g., 2 minutes) and continue to switch from one location to another for the entire test run. Be sure that total sampling time at each location is the same at the end of the test run. Collect at least 4 separate measurements from each sample point during each hour of testing. Disregard the response measurements at each sampling location until two times the response time of the measurement system has elapsed. Continue sampling for at least 1 minute and record the concentration measurements.

4.3 *Alternative procedure.* The direct interface sampling and analysis procedure described in section 7.2 of Method 18 may be used to determine the gas VOC concentration. The system must be designed to collect and analyze at least one sample every 10 minutes.

5. CALIBRATION AND QUALITY ASSURANCE

5.1 *FIA calibration and linearity check.* Make necessary adjustments to the air and fuel supplies for the FIA and ignite the burner. Allow the FIA to warm up for the period recommended by the manufacturer. Inject a calibration gas into the measurement system and adjust the back-pressure regulator to the value required to achieve the flow rates specified by the manufacturer. Inject the zero- and the high-range calibration gases and adjust the analyzer calibration to provide the proper responses. Inject the low- and mid-range gases and record the responses of the measurement system. The calibration and linearity of the system are acceptable if the responses for all four gases are within 5 percent of the respective gas values. If the performance of the system is not acceptable, repair or adjust the system and repeat the linearity check. Conduct a calibration and linearity check after assembling the analysis system and after a major change is made to the system.

5.2 *Systems drift checks.* Select the calibration gas that most closely approximates the concentration of the captured emissions for conducting the drift checks. Introduce the zero and calibration gas at the calibration valve assembly and verify that the appropriate gas flow rate and pressure are present

at the FIA. Record the measurement system responses to the zero and calibration gases. The performance of the system is acceptable if the difference between the drift check measurement and the value obtained in section 5.1 is less than 3 percent of the span value. Conduct a system drift check at the end of each run.

5.3 *System check.* Inject the high range calibration gas at the inlet of the sampling probe and record the response. The performance of the system is acceptable if the measurement system response is within 5 percent of the value obtained in section 5.1 for the high range calibration gas. Conduct a system check before each test run.

5.4 *Analysis audit.* Immediately before each test analyze an audit cylinder as described in section 5.2. The analysis audit must agree with the audit cylinder concentration within 10 percent.

6. NOMENCLATURE

C_{DH} = average measured concentration for the drift check calibration gas, ppm propane.

C_{DO} = average system drift check concentration for zero concentration gas, ppm propane.

C_{Fj} = corrected average VOC concentration of fugitive emissions at point j, ppm propane.

C_H = actual concentration of the drift check calibration gas, ppm propane.

C_j = uncorrected average VOC concentration measured at point j, ppm propane.

F_B = total VOC content of fugitive emissions from the building, kg.

$K_1 = 1.830 \times 10^{-6}$ kg/(m³-ppm).

n = number of measurement points.

Q_{Fj} = average effluent volumetric flow rate corrected to standard conditions at fugitive emissions point j, m³/min.

T_F = total duration of capture efficiency sampling run, min.

7. CALCULATIONS

7.1 *Total VOC fugitive emissions from the building.*

$$F_B = \sum_{j=1}^n C_{Fj} Q_{Fj} T_F K_1 \quad \text{Eq. 1}$$

7.2 *VOC concentration of the fugitive emissions at point j.*

$$C_{Fj} = (C_j - C_{DO}) \frac{C_H}{C_{DH} - C_{DO}} \quad \text{Eq. 2}$$

Figure 1. Fugitive emissions measurement system.

3605 6/89

Procedure F.1—Fugitive VOC Emissions From Temporary Enclosures

1. Introduction

1.1 *Applicability.* This procedure is applicable for determining the fugitive volatile organic compounds (VOC) emissions from a

temporary total enclosure (TTE). It is intended to be used as a segment in the development of liquid/gas or gas/gas protocols for determining VOC capture efficiency (CE) for surface coating and printing operations.

1.2 *Principle.* The amount of fugitive VOC emissions (F) from the TTE is calculated as the sum of the products of the VOC content

(C_{Fi}), the flow rate (Q_{Fi}), and the sampling time (T_F) from each fugitive emissions point.

1.3 *Estimated measurement uncertainty.* The measurement uncertainties are estimated for each fugitive emission point as follows: $Q=\pm 5.5$ percent and $C_{Fi}=\pm 5.0$ percent. Based on these numbers, the probable uncertainty for F is estimated at about ± 7.4 percent.

1.4 *Sampling requirements.* A capture efficiency test shall consist of at least three sampling runs. The sampling time for each run should be at least 8 hours, unless otherwise approved.

1.5 *Notes.* Because this procedure is often applied in highly explosive areas, caution and care should be exercised in choosing appropriate equipment and installing and using the equipment. Mention of trade names or company products does not constitute endorsement. All gas concentrations (percent, ppm) are by volume, unless otherwise noted.

2. APPARATUS AND REAGENTS

2.1 *Gas VOC concentration.* A schematic of the measurement system is shown in Figure 1. The main components are described below:

2.1.1 *Sample probe.* Stainless steel, or equivalent. The probe shall be heated to prevent VOC condensation.

2.1.2 *Calibration valve assembly.* Three-way valve assembly at the outlet of sample probe to direct the zero and calibration gases to the analyzer. Other methods, such as quick-connect lines, to route calibration gases to the outlet of the sample probe are acceptable.

2.1.3 *Sample line.* Stainless steel or Teflon tubing to transport the sample gas to the analyzer. The sample line must be heated to prevent condensation.

2.1.4 *Sample pump.* A leak-free pump, to pull the sample gas through the system at a flow rate sufficient to minimize the response time of the measurement system. The components of the pump that contact the gas stream shall be constructed of stainless steel or Teflon. The sample pump must be heated to prevent condensation.

2.1.5 *Sample flow rate control.* A sample flow rate control valve and rotameter, or equivalent, to maintain a constant sampling rate within 10 percent. The flow control valve and rotameter must be heated to prevent condensation. A control valve may also be located on the sample pump bypass loop to assist in controlling the sample pressure and flow rate.

2.1.6 *Sample gas manifold.* Capable of diverting a portion of the sample gas stream to the flame ionization analyzer (FIA), and the remainder to the bypass discharge vent. The manifold components shall be constructed of stainless steel or Teflon. If emissions are to be measured at multiple locations, the measurement system shall be designed to use separate sampling probes, lines, and pumps for each measurement location and a common

sample gas manifold and FIA. The sample gas manifold and connecting lines to the FIA must be heated to prevent condensation.

2.1.7 *Organic concentration analyzer.* An FIA with a span value of 1.5 times the expected concentration as propane; however, other span values may be used if it can be demonstrated that they would provide more accurate measurements. The system shall be capable of meeting or exceeding the following specifications:

2.1.7.1 *Zero drift.* Less than ± 3.0 percent of the span value.

2.1.7.2 *Calibration drift.* Less than ± 3.0 percent of the span value.

2.1.7.3 *Calibration error.* Less than ± 5.0 percent of the calibration gas value.

2.1.7.4 *Response time.* Less than 30 seconds.

2.1.8 *Integrator/data acquisition system.* An analog or digital device or computerized data acquisition system used to integrate the FIA response or compute the average response and record measurement data. The minimum data sampling frequency for computing average or integrated values is one measurement value every 5 seconds. The device shall be capable of recording average values at least once per minute.

2.1.9 *Calibration and other gases.* Gases used for calibration, fuel, and combustion air (if required) are contained in compressed gas cylinders. All calibration gases shall be traceable to NIST standards and shall be certified by the manufacturer to ± 1 percent of the tag value. Additionally, the manufacturer of the cylinder should provide a recommended shelf life for each calibration gas cylinder over which the concentration does not change more than ± 2 percent from the certified value. For calibration gas values not generally available, alternative methods for preparing calibration gas mixtures, such as dilution systems, may be used with prior approval.

2.1.9.1 *Fuel.* A 40 percent H_2 /60 percent He or 40 percent H_2 /60 percent N_2 gas mixture is recommended to avoid an oxygen synergism effect that reportedly occurs when oxygen concentration varies significantly from a mean value.

2.1.9.2 *Carrier gas.* High purity air with less than 1 ppm of organic material (as propane or carbon equivalent) or less than 0.1 percent of the span value, whichever is greater.

2.1.9.3 *FIA linearity calibration gases.* Low-, mid-, and high-range gas mixture standards with nominal propane concentrations of 20–30, 45–55, and 70–80 percent of the span value in air, respectively. Other calibration values and other span values may be used if it can be shown that more accurate measurements would be achieved.

2.1.10 *Particulate filter.* An in-stack or an out-of-stack glass fiber filter is recommended if exhaust gas particulate loading is significant. An out-of-stack filter must be

heated to prevent any condensation unless it can be demonstrated that no condensation occurs.

2.2 *Fugitive emissions volumetric flow rate.*

2.2.1 *Method 2 or 2A apparatus.* For determining volumetric flow rate.

2.2.2 *Method 3 apparatus and reagents.* For determining molecular weight of the gas stream. An estimate of the molecular weight of the gas stream may be used if it can be justified.

2.2.3 *Method 4 apparatus and reagents.* For determining moisture content, if necessary.

2.3 *Temporary total enclosure.* The criteria for designing a TTE are discussed in Procedure T.

3. DETERMINATION OF VOLUMETRIC FLOW RATE OF FUGITIVE EMISSIONS

3.1 Locate all points where emissions are exhausted from the TTE. Using Method 1, determine the sampling points. Be sure to check each site for cyclonic or swirling flow.

3.2 Measure the velocity at each sampling site at least once every hour during each sampling run using Method 2 or 2A.

4. DETERMINATION OF VOC CONTENT OF FUGITIVE EMISSIONS

4.1 *Analysis duration.* Measure the VOC responses at each fugitive emission point during the entire test run or, if applicable, while the process is operating. If there are multiple emission locations, design a sampling system to allow a single FIA to be used to determine the VOC responses at all sampling locations.

4.2 *Gas VOC concentration.*

4.2.1 Assemble the sample train as shown in Figure 1. Calibrate the FIA and conduct a system check according to the procedures in sections 5.1 and 5.3, respectively.

4.2.2 Install the sample probe so that the probe is centrally located in the stack, pipe, or duct, and is sealed tightly at the stack port connection.

4.2.3 Inject zero gas at the calibration valve assembly. Allow the measurement system response to reach zero. Measure the system response time as the time required for the system to reach the effluent concentration after the calibration valve has been returned to the effluent sampling position.

4.2.4 Conduct a system check before and a system drift check after each sampling run according to the procedures in sections 5.2 and 5.3. If the drift check following a run indicates unacceptable performance, the run is not valid. The tester may elect to perform system drift checks during the run not to exceed one drift check per hour.

4.2.5 Verify that the sample lines, filter, and pump temperatures are $120 \pm 5^\circ\text{C}$.

4.2.6 Begin sampling at the start of the test period and continue to sample during the entire run. Record the starting and end-

ing times and any required process information as appropriate. If multiple emission locations are sampled using a single FIA, sample at each location for the same amount of time (*e.g.*, 2 minutes) and continue to switch from one location to another for the entire test run. Be sure that total sampling time at each location is the same at the end of the test run. Collect at least 4 separate measurements from each sample point during each hour of testing. Disregard the response measurements at each sampling location until two times the response time of the measurement system has elapsed. Continue sampling for at least 1 minute and record the concentration measurements.

4.3 *Background concentration.*

4.3.1 *Determination of VOC background concentration.*

4.3.1.1 Locate all NDO's of the TTE. A sampling point shall be centrally located outside of the TTE at 4 equivalent diameters from each NDO, if possible. If there are more than 6 NDO's, choose 6 sampling points evenly spaced among the NDO's.

4.3.1.2 Assemble the sample train as shown in Figure 2. Calibrate the FIA and conduct a system check according to the procedures in sections 5.1 and 5.3.

4.3.1.3 Position the probe at the sampling location.

4.3.1.4 Determine the response time, conduct the system check and sample according to the procedures described in sections 4.2.3 to 4.2.6.

4.4 *Alternative procedure.* The direct interface sampling and analysis procedure described in section 7.2 of Method 18 may be used to determine the gas VOC concentration. The system must be designed to collect and analyze at least one sample every 10 minutes.

5. CALIBRATION AND QUALITY ASSURANCE

5.1 *FIA calibration and linearity check.* Make necessary adjustments to the air and fuel supplies for the FIA and ignite the burner. Allow the FIA to warm up for the period recommended by the manufacturer. Inject a calibration gas into the measurement system and adjust the back-pressure regulator to the value required to achieve the flow rates specified by the manufacturer. Inject the zero- and the high-range calibration gases and adjust the analyzer calibration to provide the proper responses. Inject the low- and mid-range gases and record the responses of the measurement system. The calibration and linearity of the system are acceptable if the responses for all four gases are within 5 percent of the respective gas values. If the performance of the system is not acceptable, repair or adjust the system and repeat the linearity check. Conduct a calibration and linearity check after assembling the analysis system and after a major change is made to the system.

5.2 *Systems drift checks.* Select the calibration gas concentration that most closely approximates that of the fugitive gas emissions to conduct the drift checks. Introduce the zero and calibration gas at the calibration valve assembly and verify that the appropriate gas flow rate and pressure are present at the FIA. Record the measurement system responses to the zero and calibration gases. The performance of the system is acceptable if the difference between the drift check measurement and the value obtained in section 5.1 is less than 3 percent of the span value. Conduct a system drift check at the end of each run.

5.3 *System check.* Inject the high range calibration gas at the inlet of the sampling probe and record the response. The performance of the system is acceptable if the measurement system response is within 5 percent of the value obtained in section 5.1 for the high range calibration gas. Conduct a system check before each test run.

5.4 *Analysis audit.* Immediately before each test analyze an audit cylinder as described in section 5.2. The analysis audit must agree with the audit cylinder concentration within 10 percent.

6. NOMENCLATURE

A_i = area of NDO i , ft².

A_N = total area of all NDO's in the enclosure, ft².

C_{Bi} = corrected average VOC concentration of background emissions at point i , ppm propane.

C_B = average background concentration, ppm propane.

C_{DH} = average measured concentration for the drift check calibration gas, ppm propane.

C_{DO} = average system drift check concentration for zero concentration gas, ppm propane.

C_{Fj} = corrected average VOC concentration of fugitive emissions at point j , ppm propane.

C_H = actual concentration of the drift check calibration gas, ppm propane.

C_i = uncorrected average background VOC concentration at point i , ppm propane.

C_j = uncorrected average VOC concentration measured at point j , ppm propane.

F = total VOC content of fugitive emissions, kg.

$K_i = 1.830 \times 10^{-6}$ kg/(m³–ppm).

n = number of measurement points.

Q_{Fj} = average effluent volumetric flow rate corrected to standard conditions at fugitive emissions point j , m³/min.

T_F = total duration of fugitive emissions sampling run, min.

7. CALCULATIONS

7.1 Total VOC fugitive emissions.

$$\sum_{j=1}^{F=n} (C_{Fj} - C_B) Q_{Fj} T_F K_i \quad \text{Eq. 1}$$

7.2 VOC concentration of the fugitive emissions at point j .

$$C_{Fj} = (C_j - C_{DO}) \frac{C_H}{C_{DH} - C_{DO}} \quad \text{Eq. 2}$$

7.3 Background VOC concentration at point i .

$$C_{Bi} = (C_i - C_{DO}) \frac{C_H}{C_{DH} - C_{DO}} \quad \text{Eq. 3}$$

7.4 Average background concentration.

$$C_B = \frac{\sum_{i=1}^n C_{Bi} A_i}{n A_N} \quad \text{Eq. 4}$$

NOTE: If the concentration at each point is within 20 percent of the average concentration of all points, the terms " A_i " and " A_N " may be deleted from Equation 4.

Figure 2. Background measurement system.

VOC 2/90

Procedure L—VOC Input

1. INTRODUCTION

1.1 *Applicability.* This procedure is applicable for determining the input of volatile organic compounds (VOC). It is intended to be used as a segment in the development of liq-

uid/gas protocols for determining VOC capture efficiency (CE) for surface coating and printing operations.

1.2 *Principle.* The amount of VOC introduced to the process (L) is the sum of the products of the weight (W) of each VOC containing liquid (ink, paint, solvent, etc.) used and its VOC content (V). A sample of each

VOC containing liquid is analyzed with a flame ionization analyzer (FIA) to determine V.

1.3 *Estimated measurement uncertainty.* The measurement uncertainties are estimated for each VOC containing liquid as follows: $W=\pm 2.0$ percent and $V=\pm 12.0$ percent. Based on these numbers, the probable uncertainty for L is estimated at about ± 12.2 percent for each VOC containing liquid.

1.4 *Sampling requirements.* A capture efficiency test shall consist of at least three sampling runs. The sampling time for each run should be at least 8 hours, unless otherwise approved.

1.5 *Notes.* Because this procedure is often applied in highly explosive areas, caution and care should be exercised in choosing appropriate equipment and installing and using the equipment. Mention of trade names or company products does not constitute endorsement. All gas concentrations (percent, ppm) are by volume, unless otherwise noted.

2. APPARATUS AND REAGENTS

2.1 Liquid weight.

2.1.1 *Balances/digital scales.* To weigh drums of VOC containing liquids to within 0.2 lb.

2.1.2 *Volume measurement apparatus (alternative).* Volume meters, flow meters, density measurement equipment, etc., as needed to achieve same accuracy as direct weight measurements.

2.2 *VOC content (flame ionization analyzer technique).* The liquid sample analysis system is shown in Figures 1 and 2. The following equipment is required:

2.2.1 *Sample collection can.* An appropriately sized metal can to be used to collect VOC containing materials. The can must be constructed in such a way that it can be grounded to the coating container.

2.2.2 *Needle valves.* To control gas flow.

2.2.3 *Regulators.* For carrier gas and calibration gas cylinders.

2.2.4 *Tubing.* Teflon or stainless steel tubing with diameters and lengths determined by connection requirements of equipment. The tubing between the sample oven outlet and the FIA shall be heated to maintain a temperature of $120 \pm 5^\circ\text{C}$.

2.2.5 *Atmospheric vent.* A tee and 0- to 0.5-liter/min rotameter placed in the sampling line between the carrier gas cylinder and the VOC sample vessel to release the excess carrier gas. A toggle valve placed between the tee and the rotameter facilitates leak tests of the analysis system.

2.2.6 *Thermometer.* Capable of measuring the temperature of the hot water bath to within 1°C .

2.2.7 *Sample oven.* Heated enclosure, containing calibration gas coil heaters, critical orifice, aspirator, and other liquid sample analysis components, capable of maintaining a temperature of $120 \pm 5^\circ\text{C}$.

2.2.8 *Gas coil heaters.* Sufficient lengths of stainless steel or Teflon tubing to allow zero and calibration gases to be heated to the sample oven temperature before entering the critical orifice or aspirator.

2.2.9 *Water bath.* Capable of heating and maintaining a sample vessel temperature of $100 \pm 5^\circ\text{C}$.

2.2.10 *Analytical balance.* To measure ± 0.001 g.

2.2.11 *Disposable syringes.* 2-cc or 5-cc.

2.2.12 *Sample vessel.* Glass, 40-ml septum vial. A separate vessel is needed for each sample.

2.2.13 *Rubber stopper.* Two-hole stopper to accommodate 3.2-mm ($\frac{1}{8}$ -in.) Teflon tubing, appropriately sized to fit the opening of the sample vessel. The rubber stopper should be wrapped in Teflon tape to provide a tighter seal and to prevent any reaction of the sample with the rubber stopper. Alternatively, any leak-free closure fabricated of non-reactive materials and accommodating the necessary tubing fittings may be used.

2.2.14 *Critical orifices.* Calibrated critical orifices capable of providing constant flow rates from 50 to 250 ml/min at known pressure drops. Sapphire orifice assemblies (available from O'Keefe Controls Company) and glass capillary tubing have been found to be adequate for this application.

2.2.15 *Vacuum gauge.* 0- to 760-mm (0- to 30-in.) Hg U-Tube manometer or vacuum gauge.

2.2.16 *Pressure gauge.* Bourdon gauge capable of measuring the maximum air pressure at the aspirator inlet (e.g., 100 psig).

2.2.17 *Aspirator.* A device capable of generating sufficient vacuum at the sample vessel to create critical flow through the calibrated orifice when sufficient air pressure is present at the aspirator inlet. The aspirator must also provide sufficient sample pressure to operate the FIA. The sample is also mixed with the dilution gas within the aspirator.

2.2.18 *Soap bubble meter.* Of an appropriate size to calibrate the critical orifices in the system.

2.2.19 *Organic concentration analyzer.* An FIA with a span value of 1.5 times the expected concentration as propane; however other span values may be used if it can be demonstrated that they would provide more accurate measurements. The system shall be capable of meeting or exceeding the following specifications:

2.2.19.1 *Zero drift.* Less than ± 3.0 percent of the span value.

2.2.19.2 *Calibration drift.* Less than ± 3.0 percent of span value.

2.2.19.3 *Calibration error.* Less than ± 5.0 percent of the calibration gas value.

2.2.20 *Integrator/data acquisition system.* An analog or digital device or computerized data acquisition system used to integrate the FIA response or compute the average response and record measurement data. The

minimum data sampling frequency for computing average or integrated values is one measurement value every 5 seconds. The device shall be capable of recording average values at least once per minute.

2.2.21 *Chart recorder (optional)*. A chart recorder or similar device is recommended to provide a continuous analog display of the measurement results during the liquid sample analysis.

2.2.22 *Calibration and other gases*. For calibration, fuel, and combustion air (if required) contained in compressed gas cylinders. All calibration gases shall be traceable to NIST standards and shall be certified by the manufacturer to ± 1 percent of the tag value. Additionally, the manufacturer of the cylinder should provide a recommended shelf life for each calibration gas cylinder over which the concentration does not change more than ± 2 percent from the certified value. For calibration gas values not generally available, alternative methods for preparing calibration gas mixtures, such as dilution systems, may be used with prior approval.

2.2.22.1 *Fuel*. A 40 percent H_2 /60 percent He or 40 percent H_2 /60 percent N_2 gas mixture is recommended to avoid an oxygen synergism effect that reportedly occurs when oxygen concentration varies significantly from a mean value.

2.2.22.2 *Carrier gas*. High purity air with less than 1 ppm of organic material (as propane) or less than 0.1 percent of the span value, whichever is greater.

2.2.22.3 *FIA linearity calibration gases*. Low-, mid-, and high-range gas mixture standards with nominal propane concentrations of 20–30, 45–55, and 70–80 percent of the span value in air, respectively. Other calibration values and other span values may be used if it can be shown that more accurate measurements would be achieved.

2.2.22.4 *System calibration gas*. Gas mixture standard containing propane in air, approximately the undiluted VOC concentration expected for the liquid samples.

3. DETERMINATION OF LIQUID INPUT WEIGHT

3.1 *Weight difference*. Determine the amount of material introduced to the process as the weight difference of the feed material before and after each sampling run. In determining the total VOC containing liquid usage, account for: (a) The initial (beginning) VOC containing liquid mixture; (b) any solvent added during the test run; (c) any coating added during the test run; and (d) any residual VOC containing liquid mixture remaining at the end of the sample run.

3.1.1 Identify all points where VOC containing liquids are introduced to the process. To obtain an accurate measurement of VOC containing liquids, start with an empty fountain (if applicable). After completing the run, drain the liquid in the fountain back

into the liquid drum (if possible), and weigh the drum again. Weigh the VOC containing liquids to ± 0.5 percent of the total weight (full) or ± 0.1 percent of the total weight of VOC containing liquid used during the sample run, whichever is less. If the residual liquid cannot be returned to the drum, drain the fountain into a preweighted empty drum to determine the final weight of the liquid.

3.1.2 If it is not possible to measure a single representative mixture, then weigh the various components separately (e.g., if solvent is added during the sampling run, weigh the solvent before it is added to the mixture). If a fresh drum of VOC containing liquid is needed during the run, then weigh both the empty drum and fresh drum.

3.2 *Volume measurement (alternative)*. If direct weight measurements are not feasible, the tester may use volume meters and flow rate meters (and density measurements) to determine the weight of liquids used if it can be demonstrated that the technique produces results equivalent to the direct weight measurements. If a single representative mixture cannot be measured, measure the components separately.

4. DETERMINATION OF VOC CONTENT IN INPUT LIQUIDS

4.1 *Collection of liquid samples*.

4.1.1 Collect a 100-ml or larger sample of the VOC containing liquid mixture at each application location at the beginning and end of each test run. A separate sample should be taken of each VOC containing liquid added to the application mixture during the test run. If a fresh drum is needed during the sampling run, then obtain a sample from the fresh drum.

4.1.2 When collecting the sample, ground the sample container to the coating drum. Fill the sample container as close to the rim as possible to minimize the amount of headspace.

4.1.3 After the sample is collected, seal the container so the sample cannot leak out or evaporate.

4.1.4 Label the container to identify clearly the contents.

4.2 *Liquid sample VOC content*.

4.2.1 Assemble the liquid VOC content analysis system as shown in Figure 1.

4.2.2 Permanently identify all of the critical orifices that may be used. Calibrate each critical orifice under the expected operating conditions (i.e., sample vacuum and temperature) against a volume meter as described in section 5.3.

4.2.3 Label and tare the sample vessels (including the stoppers and caps) and the syringes.

4.2.4 Install an empty sample vessel and perform a leak test of the system. Close the carrier gas valve and atmospheric vent and evacuate the sample vessel to 250 mm (10 in.) Hg absolute or less using the aspirator. Close

the toggle valve at the inlet to the aspirator and observe the vacuum for at least one minute. If there is any change in the sample pressure, release the vacuum, adjust or repair the apparatus as necessary and repeat the leak test.

4.2.5 Perform the analyzer calibration and linearity checks according to the procedure in section 5.1. Record the responses to each of the calibration gases and the back-pressure setting of the FIA.

4.2.6 Establish the appropriate dilution ratio by adjusting the aspirator air supply or substituting critical orifices. Operate the aspirator at a vacuum of at least 25 mm (1 in.) Hg greater than the vacuum necessary to achieve critical flow. Select the dilution ratio so that the maximum response of the FIA to the sample does not exceed the high-range calibration gas.

4.2.7 Perform system calibration checks at two levels by introducing compressed gases at the inlet to the sample vessel while the aspirator and dilution devices are operating. Perform these checks using the carrier gas (zero concentration) and the system calibration gas. If the response to the carrier gas exceeds ± 0.5 percent of span, clean or repair the apparatus and repeat the check. Adjust the dilution ratio as necessary to achieve the correct response to the upscale check, but do not adjust the analyzer calibration. Record the identification of the orifice, aspirator air supply pressure, FIA back-pressure, and the responses of the FIA to the carrier and system calibration gases.

4.2.8 After completing the above checks, inject the system calibration gas for approximately 10 minutes. Time the exact duration of the gas injection using a stopwatch. Determine the area under the FIA response curve and calculate the system response factor based on the sample gas flow rate, gas concentration, and the duration of the injection as compared to the integrated response using Equations 2 and 3.

4.2.9 Verify that the sample oven and sample line temperatures are 120 ± 5 °C and that the water bath temperature is 100 ± 5 °C.

4.2.10 Fill a tared syringe with approximately 1 g of the VOC containing liquid and weigh it. Transfer the liquid to a tared sample vessel. Plug the sample vessel to minimize sample loss. Weigh the sample vessel containing the liquid to determine the amount of sample actually received. Also, as a quality control check, weigh the empty syringe to determine the amount of material delivered. The two coating sample weights should agree within ± 0.02 g. If not, repeat the procedure until an acceptable sample is obtained.

4.2.11 Connect the vessel to the analysis system. Adjust the aspirator supply pressure to the correct value. Open the valve on the carrier gas supply to the sample vessel and adjust it to provide a slight excess flow to

the atmospheric vent. As soon as the initial response of the FIA begins to decrease, immerse the sample vessel in the water bath. (Applying heat to the sample vessel too soon may cause the FID response to exceed the calibrated range of the instrument, and thus invalidate the analysis.)

4.2.12 Continuously measure and record the response of the FIA until all of the volatile material has been evaporated from the sample and the instrument response has returned to the baseline (i.e., response less than 0.5 percent of the span value). Observe the aspirator supply pressure, FIA back-pressure, atmospheric vent, and other system operating parameters during the run; repeat the analysis procedure if any of these parameters deviate from the values established during the system calibration checks in Section 4.2.7. After each sample perform the drift check described in Section 5.2. If the drift check results are acceptable, calculate the VOC content of the sample using the equations in Section 7. Integrate the area under the FIA response curve, or determine the average concentration response and the duration of sample analysis.

5. CALIBRATION AND QUALITY ASSURANCE

5.1 *FIA calibration and linearity check.* Make necessary adjustments to the air and fuel supplies for the FIA and ignite the burner. Allow the FIA to warm up for the period recommended by the manufacturer. Inject a calibration gas into the measurement system and adjust the back-pressure regulator to the value required to achieve the flow rates specified by the manufacturer. Inject the zero- and the high-range calibration gases and adjust the analyzer calibration to provide the proper responses. Inject the low- and mid-range gases and record the responses of the measurement system. The calibration and linearity of the system are acceptable if the responses for all four gases are within 5 percent of the respective gas values. If the performance of the system is not acceptable, repair or adjust the system and repeat the linearity check. Conduct a calibration and linearity check after assembling the analysis system and after a major change is made to the system.

5.2 *Systems drift checks.* After each sample, repeat the system calibration checks in Section 4.2.7 before any adjustments to the FIA or measurement system are made. If the zero or calibration drift exceeds ± 3 percent of the span value, discard the result and repeat the analysis.

5.3 *Critical orifice calibration.*

5.3.1 Each critical orifice must be calibrated at the specific operating conditions that it will be used. Therefore, assemble all components of the liquid sample analysis system as shown in Figure 3. A stopwatch is also required.

§ 52.741

40 CFR Ch. I (7-1-25 Edition)

5.3.2 Turn on the sample oven, sample line, and water bath heaters and allow the system to reach the proper operating temperature. Adjust the aspirator to a vacuum of 380 mm (15 in.) Hg vacuum. Measure the time required for one soap bubble to move a known distance and record barometric pressure.

5.3.3 Repeat the calibration procedure at a vacuum of 406 mm (16 in.) Hg and at 25-mm (1-in.) Hg intervals until three consecutive determinations provide the same flow rate. Calculate the critical flow rate for the orifice in ml/min at standard conditions. Record the vacuum necessary to achieve critical flow.

6. NOMENCLATURE

A_L = area under the response curve of the liquid sample, area count.

A_S = area under the response curve of the calibration gas, area count.

C_S = actual concentration of system calibration gas, ppm propane.

$K = 1.830 \times 10^{-9}$ g/(ml-ppm).

L = total VOC content of liquid input, kg.

M_L = mass of liquid sample delivered to the sample vessel, g.

q = flow rate through critical orifice, ml/min.

RF = liquid analysis system response factor, g/area count.

T_S = total gas injection time for system calibration gas during integrator calibration, min.

V_{Fj} = final VOC fraction of VOC containing liquid j.

V_{Ij} = initial VOC fraction of VOC containing liquid j.

V_{Aj} = VOC fraction of VOC containing liquid j added during the run.

V = VOC fraction of liquid sample.

W_{Fj} = weight of VOC containing liquid j remaining at end of the run, kg.

W_{Ij} = weight of VOC containing liquid j at beginning of the run, kg.

W_{Aj} = weight of VOC containing liquid j added during the run, kg.

7. CALCULATIONS

7.1 *Total VOC content of the input VOC containing liquid.*

$$L = \sum_{j=1}^n V_{Ij} W_{Ij} - \sum_{j=1}^n V_{Fj} W_{Fj} + \sum_{j=1}^n V_{Aj} W_{Aj} \quad \text{Eq. 1}$$

7.2 *Liquid sample analysis system response factor for systems using integrators, grams/area counts.*

$$RF = \frac{C_S q T_S K}{A_S} \quad \text{Eq. 2}$$

7.3 VOC content of the liquid sample.

$$V = \frac{A_L RF}{M_L} \quad \text{Eq. 3}$$

Figure 1. Liquid analysis sample system.

Figure 2. VOC sampling vessel.

Figure 3. Critical orifice calibration apparatus.

Procedure T—Criteria for and Verification of a Permanent or Temporary Total Enclosure

1. Introduction

1.1 *Applicability.* This procedure is used to determine whether a permanent or temporary enclosure meets the criteria of a total enclosure.

1.2 *Principle.* An enclosure is evaluated against a set of criteria. If the criteria are met and if all the exhaust gases are ducted to a control device, then the volatile organic compounds (VOC) capture efficiency (CE) is assumed to be 100 percent and CE need not be measured. However, if part of the exhaust gas stream is not ducted to a control device, CE must be determined.

2. DEFINITIONS

2.1 *Natural Draft Opening (NDO)*—Any permanent opening in the enclosure that remains open during operation of the facility and is not connected to a duct in which a fan is installed.

2.2 *Permanent Total Enclosure (PTE)*—A permanently installed enclosure that completely surrounds a source of emissions such that all VOC emissions are captured and contained for discharge through a control device.

2.3 *Temporary Total Enclosure (TTE)*—A temporarily installed enclosure that completely surrounds a source of emissions such that all VOC emissions are captured and contained for discharge through ducts that allow for the accurate measurement of VOC rates.

3. CRITERIA OF A TEMPORARY TOTAL ENCLOSURE

3.1 Any NDO shall be at least 4 equivalent opening diameters from each VOC emitting point.

3.2 Any exhaust point from the enclosure shall be at least 4 equivalent duct or hood diameters from each NDO.

3.3 The total area of all NDO's shall not exceed 5 percent of the surface area of the enclosure's four walls, floor, and ceiling.

3.4 The average facial velocity (FV) of air through all NDO's shall be at least 3,600 m/hr (200 fpm). The direction of air through all NDO's shall be into the enclosure.

3.5 All access doors and windows whose areas are not included in section 3.3 and are not included in the calculation in section 3.4 shall be closed during routine operation of the process.

4. CRITERIA OF A PERMANENT TOTAL ENCLOSURE

4.1 Same as sections 3.1 and 3.3–3.5.

4.2 All VOC emissions must be captured and contained for discharge through a control device.

5. PROCEDURE

5.1 Determine the equivalent diameters of the NDO's and determine the distances from each VOC emitting point to all NDO's. Determine the equivalent diameter of each exhaust duct or hood and its distance to all NDO's. Calculate the distances in terms of equivalent diameters. The number of equivalent diameters shall be at least 4.

5.2 Measure the total area (A_t) of the enclosure and the total area (A_N) of all NDO's of the enclosure. Calculate the NDO to enclosure area ratio (NEAR) as follows:

$$\text{NEAR} = A_N/A_t$$

The NEAR must be ≤ 0.05 .

5.3 Measure the volumetric flow rate, corrected to standard conditions, of each gas stream exiting the enclosure through an exhaust duct or hood using EPA Method 2. In some cases (*e.g.*, when the building is the enclosure), it may be necessary to measure the volumetric flow rate, corrected to standard conditions, of each gas stream entering the enclosure through a forced makeup air duct using Method 2. Calculate FV using the following equation:

$$\text{FV} = (Q_o - Q_i)/A_N$$

Where:

Q_o = the sum of the volumetric flow from all gas streams exiting the enclosure through an exhaust duct or hood.

Q_i = the sum of the volumetric flow from all gas streams into the enclosure through a forced makeup air duct; zero, if there is no forced makeup air into the enclosure.

A_N = total area of all NDO's in enclosure.

The FV shall be at least 3,600 m/hr (200 fpm).

5.4 Verify that the direction of air flow through all NDO's is inward. Use streamers, smoke tubes, tracer gases, etc. Strips of plastic wrapping film have been found to be effective. Monitor the direction of air flow at intervals of at least 10 minutes for at least 1 hour.

6. QUALITY ASSURANCE

6.1 The success of this protocol lies in designing the TTE to simulate the conditions that exist without the TTE, i.e., the effect of the TTE on the normal flow patterns around the affected facility or the amount of fugitive VOC emissions should be minimal. The TTE must enclose the application stations, coating reservoirs, and all areas from the application station to the oven. The oven does not have to be enclosed if it is under negative pressure. The NDO's of the temporary enclosure and a fugitive exhaust fan must be properly sized and placed.

6.2 Estimate the ventilation rate of the TTE that best simulates the conditions that exist without the TTE, i.e., the effect of the TTE on the normal flow patterns around the affected facility or the amount of fugitive

Environmental Protection Agency

§ 52.741

VOC emissions should be minimal. Figure 1 may be used as an aid. Measure the concentration (C_G) and flow rate (Q_G) of the captured gas stream, specify a safe concentration (C_F) for the fugitive gas stream, estimate the CE, and then use the plot in Figure 1 to determine the volumetric flowrate of the fugitive gas stream (Q_F). A fugitive VOC emission exhaust fan that has a variable flow control is desirable.

6.2.1 Monitor the concentration of VOC into the capture device without the TTE. To minimize the effect of temporal variation on the captured emissions, the baseline measurement should be made over as long a time period as practical. However, the process conditions must be the same for the measurement in section 6.2.3 as they are for this baseline measurement. This may require

short measuring times for this quality control check before and after the construction of the TTE.

6.2.2 After the TTE is constructed, monitor the VOC concentration inside the TTE. This concentration shall continue to increase and must not exceed the safe level according to OSHA requirements for permissible exposure limits. An increase in VOC concentration indicates poor TTE design or poor capture efficiency.

6.2.3 Monitor the concentration of VOC into the capture device with the TTE. To limit the effect of the TTE on the process, the VOC concentration with and without the TTE must be within ± 10 percent. If the measurements do not agree, adjust the ventilation rate from the TTE until they agree within 10 percent.

§ 52.743

§ 52.742 Incorporation by reference.

The materials listed below are incorporated by reference in the corresponding sections noted. The incorporation by reference was approved by the Director of the Office of Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. These materials are incorporated as they exist on the date of approval, and a notice of any change in these materials will be published in the FEDERAL REGISTER. The materials are available from the sources listed below.

(a) The following material is available for purchase from the American Society for Testing and Materials (ASTM), 1916 Race Street, Philadelphia, PA 19103.

(1) ASTM D1475-85, Standard Test Method for Density of Paint, Varnish, Lacquer, and Related Products, for § 52.741(a)(4)(i)(B)(3)(i).

(2) ASTM D2369-87, Standard Test Method for Volatile Content of Coatings, for § 52.741(a)(4)(i)(B)(3)(ii).

(3) ASTM D3792-86, Standard Test Method for Water Content of Water-Reducible Paints by Direct Injection into a Gas Chromatograph, for § 52.741(a)(4)(i)(B)(3)(iii).

(4) ASTM D4017-81(Reapproved 1987), Standard Test Method for Water in Paints and Paint Materials by Karl Fischer Method, for § 52.741(a)(4)(i)(B)(3)(iv).

(5) ASTM D4457-85, Standard Test Method for Determination of Dichloromethane and 1,1,1-Trichloroethane in Paints and Coatings by Direct Injection into a Gas Chromatograph, for § 52.741(a)(4)(i)(B)(3)(v).

(6) ASTM D2697-86, Standard Test Method for Volume Nonvolatile Matter in Clear or Pigmented Coatings, for § 52.741(a)(4)(i)(B)(3)(vi).

(7) ASTM D3980-87, Standard Practice for Interlaboratory Testing of Paint and Related Materials, for § 52.741(a)(4)(i)(B)(3)(vii).

(8) ASTM E180-85, Standard Practice for Determining the Precision of ASTM Methods for Analysis and Testing of Industrial Chemicals, for § 52.741(a)(4)(i)(B)(3)(viii).

(9) ASTM D2372-85, Standard Method of Separation of Vehicle from Solvent-Reducible Paints, for § 52.741(a)(4)(i)(B)(3)(ix).

(10) ASTM D2879-86, Standard Test Method for Vapor Pressure-Temperature Relationship and Initial Decomposition Temperature of Liquids by Isoteniscope, for § 52.741(a)(3), (a)(8)(ii), (a)(9)(iii), and (a)(10)(iii).

(11) ASTM D323-82, Standard Test Method for Vapor Pressure of Petroleum Products (Reid Method), for § 52.741(a)(3).

(12) ASTM D86-82, Standard Method for Distillation of Petroleum Products, for § 52.741(a)(3).

(13) ASTM D3925-81(Reapproved 1985), Standard Practice for Sampling Liquid Paints and Related Pigment Coatings, for § 52.741(a)(4)(i)(A)(1).

(14) ASTM E300-86, Standard Practice for Sampling Industrial Chemicals, for § 52.741(a)(4)(i)(A)(2).

(b) The Evaporation Loss From External Floating-Roof Tanks, Publication 2517, second edition, February 1980, for § 52.741(a)(3) is available for purchase from the American Petroleum Institute, 2101 L Street, NW., Washington, DC 20037.

(c) The Standard Industrial Classification Manual, 1987, for § 52.741(a)(3) is available for purchase from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

(d) 35 Illinois Administrative Code 215, June 1989, subparts (B), (E) (sections 215.182, 215.183, and 215.184), (K) (sections 215.301 and 215.302), (Q) (excluding sections 215.432 and 215.436), (R) (excluding sections 215.447, 215.450, and 215.452), (S), (V), (X), (Y) (sections 215.582, 215.583, and 215.584), and (Z) of 35 Ill. Adm. Code 215 for § 52.741 (d)(1)–(d)(3); (e)(3), (e)(4); (h)(2); (i)(1), (i)(2); (j)(1)–(j)(3); (q)(1); (s)(1); (u)(1), (3); (v)(1); (w)(1); and (x)(1), (x)(3) is available from the United States Environmental Protection Agency, Air and Radiation Division, Region V, 230 S. Dearborn, Chicago, IL, 60604.

[55 FR 26909, June 29, 1990]

§ 52.743 Continuous monitoring.

(a) Alternative monitoring requirements established under Section 201.402 of Title 35, IAC must be either: Incorporated into a federally enforceable operating permit or construction permit or submitted to USEPA for approval as

§ 52.744

a revision to the Illinois State Implementation Plan (SIP). Illinois shall set forth alternative emissions monitoring and reporting requirements to satisfy the intent of 40 CFR part 51, appendix P whenever Illinois exempts any source subject to Section 201.401 from installing continuous emission monitoring systems. Illinois may exempt a source if the source cannot install a continuous emission monitoring system because of physical plant limitations or extreme economic reasons, according to the criteria of Section 201.402.

(b) As codified at 40 CFR 52.737 (USEPA's approval of the Illinois operating permit program for the purpose of issuing federally enforceable construction and operating permits), USEPA reserves the right to deem an operating permit not federally enforceable. Such a determination will be made according to appropriate procedures including operating permit requirements promulgated at 54 FR 27274 (June 28, 1989) and will be based upon either; the permit, permit approval procedures or state or local permit requirements which do not conform with the operating permit program requirements or the requirements of USEPA's underlying regulations. Among other things, underlying requirements include 40 CFR 51.214 and part 51, appendix P and Illinois' approved SIP, 40 CFR part 52. Should USEPA deem an operating or construction permit containing alternative monitoring requirements not federally enforceable, the underlying continuous monitoring requirements at Section 201.401 of the State rule would be the Federal requirements contained in the SIP to which the source would be subject. This interpretation of the impact of an operating permit deemed not federally enforceable by USEPA on a source to which it was issued was acknowledged by the State in a March 3, 1993, letter from Bharat Mathur, Chief, Bureau of Air, Illinois Environmental Protection Agency, to Stephen Rothblatt, Chief, Regulation Development Branch, Region 5, USEPA.

[58 FR 17783, Apr. 6, 1993]

40 CFR Ch. I (7-1-25 Edition)

§ 52.744 Small business stationary source technical and environmental compliance assistance program.

The Illinois program submitted on November 12, 1992, as a requested revision to the Illinois State Implementation Plan satisfies the requirements of section 507 of the Clean Air Act Amendments of 1990.

[58 FR 45451, Aug. 30, 1993]

§§ 52.745-52.746 [Reserved]

§ 52.750 Original identification of plan section.

(a) This section identified the original "Air Quality Implementation Plan for the State of Illinois" and all revisions submitted by Illinois that were Federally-approved prior to June 1, 2017.

(b) The plan was officially submitted on January 31, 1972.

(c) The plan revision listed below were submitted on the dates specified.

(1) The role of the City of Chicago as a local agent was defined in a letter from the State Environmental Protection Agency on March 13, 1972.

(2) Copies of the Illinois Pollution Control Board Regulations, Chapter 2, Parts I, II and III were submitted May 4, 1972, by the Governor.

(3) A document describing the role of the Chicago Department of Environmental Control was submitted July 28, 1972, by the State Environmental Protection Agency.

(4) Copies of the revisions to the State air episode regulations were submitted on August 29, 1972, by the Governor.

(5) Compliance schedules submitted on March 13, 1973, by the Pollution Control Board.

(6) Compliance schedules submitted on April 3, 1973, by the Pollution Control Board.

(7) Transportation control plan submitted on April 17, 1973, by the Pollution Control Board.

(8) Compliance schedules submitted on May 3, 1973, by the Pollution Control Board.

(9) Compliance schedules submitted on June 15, 1973, by the Pollution Control Board.

Environmental Protection Agency

§ 52.750

(10) Compliance schedules submitted on August 7, 1973, by the Pollution Control Board.

(11) Information concerning the coal ban in the Chicago area was submitted on October 22, 1973, by Governor Walker.

(12) On July 22, 1976, the Director of the Illinois Environmental Protection Agency submitted revised emergency episode regulations.

(13) On November 29, 1977, the Director of the Illinois Environmental Protection Agency submitted grain handling and drying emission limitations as revisions to Rule 203.

(14) Revision consisting of an Illinois Pollution Control Board Order issued on July 20, 1978 to Commonwealth Edison Company, Christian County, Illinois and submitted on August 14, 1978 by the Illinois Environmental Protection Agency.

(15) Revision consisting of an Illinois Pollution Control Board Order issued to Shell Oil Company's Wood River refinery on December 14, 1978 by the Illinois Environmental Protection Agency.

(16) On April 4, 1979, the State submitted its draft nonattainment area plan for all areas designated nonattainment as of March 3, 1978 and as revised on October 5, 1978. This submittal contained a request for extensions of the statutory attainment deadline for CO and O₃. The submittal also included a vehicle emission inspection and maintenance program and a new source review plan. Although the State submittal also included the following provisions, U.S. EPA is taking no action to include them in the federally approved SIP at this time: the portions of Rules 101, 103 and 105 relating to the provisions addressing malfunctions, general requirements of the Clean Air Act which are not Part D requirements, and the provisions covering open burning, mobile source emission standards, diesel locomotive emission standards, sulfur dioxide emissions for certain fuel combustion sources located outside major metropolitan areas, compliance dates for organic emission limitations, particulate emissions from low carbon waste incinerators, and adoption of Federal New Source Performance Standards. In ad-

dition, U.S. EPA is not rulemaking at this time on those portions of the following rules which contain specified changes made between the publication of the notice of proposed rulemaking and the final rulemaking action:

(i)-(iii) [Reserved]

(iv) The new materials in Section 4.11 of the Rules for Issuance of Permits to New or Modified Air Pollution Sources;

(v) The addition of a definition of "reconstruction" in Section 4.7 of the Rules for Issuance of Permits;

(vi) The procedure allowing external offsets contained in Section 10 of the Rules for Issuance of Permits.

(17) On August 29, 1979, the State submitted additional information and clarification for the nonattainment area plan in response to USEPA's July 2, 1979 notice of proposed rulemaking.

(18) On September 20, 1979, the State submitted a summary of public hearing comments on the plan.

(19) On October 30, 1979, the State submitted copies of Illinois Pollution Control Board final orders for control of VOC emissions from stationary sources (Rule 205), sources of fugitive particulate (Rule 203(f)), and particulate emissions from iron and steel sources (Rule 203(d)).

(20) On December 20, 1979, the State submitted a letter containing the dates that most of the regulatory and non-regulatory portions of the nonattainment area plans were finally adopted by the Illinois Pollution Control Board. Rule 205 containing RACT controls for stationary sources of VOC was effective in the State on July 18, 1979. Rule 203(f) governing fugitive dust emissions was effective in the State on September 18, 1979.

(21) On January 25, 1980, the State submitted a copy of finally enacted "Rules for the Issuance of Permits to New or Modified Air Pollution Sources Affecting Nonattainment Areas." Sections 5.1(a)(2)(ii) and 5.1(a)(2)(iii) of these rules were reserved by the State. The effective date of these Rules was January 16, 1980.

(22) On March 21, 1979, the State of Illinois submitted to the USEPA revised regulations for control of sulfur dioxide emissions. On September 19, 1979, the

State submitted additional information on these revised regulations to the USEPA.

(23) On January 17, 1980 and on February 7, 1980 the State submitted further information and clarifications to Rule 204.

(24) On September 19, 1979, the State of Illinois submitted a revision to Rule 204(e)(1) for the Commonwealth Edison Company. The revision approves an emission limitation of 105,162 lbs SO₂/hour for the Kincaid Generating Station in Christian County, Illinois.

(25) On April 30, 1980, the State submitted revisions to the transportation control plan for northeast Illinois (Chicago).

(26) On December 20, 1979, the State of Illinois submitted a revision to provide for modification of the existing air quality surveillance network.

(27) On January 8, 1980, the State submitted an Opinion and Final Order of the Pollution Control Board (dated November 19, 1979) which deletes Rule 206(d) of Chapter 2 from the Illinois Air Pollution Control Regulations.

(28) On September 18, 1979, the State submitted a Final Order of the Pollution Control Board (dated April 12, 1979) which amended Rule 205(g)(1) of Chapter 2 of the Illinois Air Pollution Control Regulations.

(29) On July 21, 1981, the State submitted Volume 9 Lead, of the Illinois State Implementation Plan for Air Pollution Control for incorporation in the Illinois State Implementation Plan. This plan covers all areas in Illinois except for Granite City in the St. Louis Interstate AQCR.

(30) On July 29, 1980, the State submitted a May 29, 1980, Opinion and Order of the Illinois Pollution Control Board granting a variance from the requirements Rule 203(d)(8)(B) of Chapter 2 of the Air Pollution Control Regulations to Continental Grain Company's grain elevator located in Crossville, White County, Illinois. This variance expired July 1, 1980.

(31) On April 4, 1980, the State submitted a November 29, 1979, Opinion and Order of the Illinois Pollution Control Board (IPCB) and Supplementary IPCC Orders dated January 24, 1980, and February 7, 1980. These Orders grant 13 Caterpillar Tractor Company

boilers a variance from the requirements of IPCC (A), Rule 203(g)(1)(C)(i) and/or Rule 203(g)(1)(D) which regulate particulate emissions from new and existing sources. No action is taken at this time on variance provisions for Mapleton facility boilers #2, 3, 4, and 5. This variance expired on October 8, 1981.

(32) On August 31, 1981, the State of Illinois submitted a revision to the Illinois State Implementation Plan in the form of a July 9, 1981, Order of the Illinois Pollution Control Board (R-77-15). This Order creates Rule 204(c)(1)(E) which establishes sulfur dioxide (SO₂) emission limitations of 5.5 lbs/SO/MMBTU for solid fuel combustion sources having actual heat input not greater than 250 million BTU's per hour owned or operated by Bemis Company, Inc., Celotex Corporation or Sherex Corporation. On November 17, 1981, the State submitted additional information in support of this revision.

(33) On August 20, 1980, and March 20, 1981, the State submitted additional information on the transportation control plans for the Northeast Illinois (Chicago) Area.

(34) On October 15, 1980, the State submitted additional information on the transportation control plans for the Peoria Metropolitan Area.

(35) On April 1, 1981, the State submitted additional information on the transportation control plans for the St. Louis Metropolitan (Illinois) Area.

(36) On December 10, 1980, the State submitted a July 24, 1980, Opinion and Order of the Illinois Pollution Control Board and a September 18, 1980, Order of the Board granting Bunge Corporation's Cairo, Illinois soybean processing plant and grain elevator variance from Illinois Pollution Control Board's particulate emission standards under Rules 203(g)(1)(D) and 103(b)(1) of Chapter 2 of the Air Pollution Control Regulations through October 15, 1981.

(37) On July 17, 1980, the State submitted an April 3, 1980, Opinion and Order of the Illinois Pollution Control Board adopting a December 13, 1979, Proposed Opinion and Order of the Board which exempted certain small explosive waste incinerators from the requirements of Rule 203(e) Particulate Emission Standards and Limitations

for incinerators and Rule 206(b) Carbon Monoxide Emissions Standards and Limitations for incinerators.

(38) On May 10, 1982, the State submitted a February 4, 1982, Illinois Pollution Control Board Opinion and Order (PCB 81-184) granting a variance from the requirements of Rules 205(m)(1)(B) and 204(n)(1)(G) of Chapter 2 of the Air Pollution Control Regulations to the Lyon Metal Products, Incorporated, Montgomery, Illinois facility. This variance expires on May 31, 1985.

(39) On October 1, 1981, the State submitted a report in satisfaction of the Total Suspended Particulate Control Strategy approval condition in which the State agreed to conduct an analysis of the potential air quality impact from storage piles with uncontrolled emissions of less than 50 tons per year, to submit the results of any analysis to EPA, to submit any necessary regulations to the Illinois Pollution Control Board, and promulgate and submit any necessary regulations to EPA. This report concluded that no further regulations were needed.

(40) EPA Study Volatile Organic Compound Emissions from Solvent Cleaning Operations in the State of Illinois (EPA 905/4-80-008) was prepared to satisfy the Ozone Control Strategy approval condition in which the State agreed to conduct a study to demonstrate that the three pound per hour, 15 pound per day exemption for solvent metal cleaners contained in Rule 205(k) represents RACT, to submit the results of the study to EPA, to submit the necessary regulations to the Illinois Pollution Control Board and promulgate and submit any necessary regulations to EPA. The State reviewed this report and in a February 11, 1981, letter to EPA noted their agreement with the findings of the report and indicated that because there was no need for further regulations, this condition is satisfied.

(41) On December 7, 1981, the State submitted a October 8, 1981, Illinois Pollution Control Board Final Order (R79-11). This Final Order amends Rule 203(g)(1) by adding subsection (E).

(42) On January 4, 1983, the State submitted a revision to the Illinois State Implementation Plan in the form of an

October 27, 1982, Illinois Pollution Control Board (IPCB) Opinion and Order (PCB 82-88). This Opinion and Order grants a variance from the requirements of Rule 203(a) of Chapter 2 of the Air Pollution Control Regulations to a proposed fluidized bed combustion boiler at B.F. Goodrich's Henry County, Illinois facility. This variance continues until October 1, 1987, or until the facility is no longer subject to Rule 206(a), whichever comes first.

(43) On July 29, 1982, the State submitted a revision to the Illinois State Implementation Plan in the form of a May 28, 1981, Illinois Pollution Control Board (IPCB) Final Opinion of the Board (R78-17). This Final Opinion deletes Rule 204(c)(1)(D) and the reference to it in Rule 204(h) from the IPCB Air Pollution Control Regulations.

(44) On March 17, 1983, the Illinois Environmental Protection Agency (IEPA) submitted a revision to its ozone SIP for Chrysler's Belvidere facility. The revision request contains an alternative compliance time schedule with interim emission limitations which is in the form of a variance for prime coating and prime surface coating operations. Final compliance is changed from December 31, 1982 to December 31, 1987.

(45) On August 19, 1983, the State of Illinois submitted a revision to the Illinois State Implementation Plan in the form of a July 26, 1983, Order of the Illinois Pollution Control Board (R82-12). This Order creates Rule 313 which establishes 1.5 micrograms per cubic meter, maximum arithmetic mean, averaged over a calendar quarter as the State's ambient air quality standard for lead. The Board also adopted, as part of Rule 313, a measurement method for determining compliance with the standard.

(46) On August 15, 1983, the Illinois Environmental Protection Agency submitted a May 19, 1983, Opinion and Order (PCB-82-147) of the Illinois Pollution Control Board (IPCB) granting Del Monte Corporation's Can Manufacturing Plant No. 115 located in Rochelle, Ogle County, Illinois, a variance from the IPCB volatile organic compound emission standards under Rule 205(n)(1)(B)(i) and Rule 205(n)(1)(B)(vi)

of Chapter 2: Air Pollution Regulations. The variance expires on December 31, 1984.

(47) On March 24, 1983, and May 3, 1983, the State submitted information that indicated that a February 21, 1980 (45 FR 11472), conditional approval of the incorporation of a revised Part D sulfur dioxide control strategy into the Illinois State Implementation Plan has been satisfied for Cincinnati, Pekin and Elm Grove Townships in Tazewell County and for Logan and Limestone Townships in Peoria County. This approval condition required that the SIP include a reanalysis of the Pekin, Illinois area; a submittal of the analysis results to USEPA; the proposal of any necessary regulations to the Illinois Pollution Control Board necessary to insure attainment and maintenance of the sulfur dioxide standard; and the promulgation of any necessary regulations. Any promulgated regulations must be submitted to USEPA.

(48)–(49) [Reserved]

(50) On May 3, 1983, the State requested that USEPA incorporate IPCB Rule 204 (f)(2) into the Illinois SIP. Rule 204(f)(2) was adopted by Illinois as part of a February 24, 1983, Order of the Board (R80-22). USEPA approves the incorporation of Rule 204(f)(2) as it pertains to Pekin Energy, a source in the Peoria major metropolitan area.

(51) On January 30, 1984, the State submitted Rule 204(f) as contained in a February 24, 1983, Order of the IPCB (R80-22) as it applies to sources in the Peoria Major Metropolitan area for incorporation in the SIP. USEPA approves the incorporation of Rule 204(f) into the SIP as it applies to all sources in Peoria and Tazewell Counties except Caterpillar Tractor Mapleton and East Peoria Plants. No action is taken on Rule 204(f) as it applies to the Chicago or St. Louis (Illinois—portion) Major Metropolitan Areas or on Rule 204(f) (1) and (2).

(52) [Reserved]

(53) On September 30, 1983, the State submitted a revision to the Illinois State Implementation Plan in the form of a lead plan to assure attainment and maintenance of the NAAQS in the Granite City area. The Illinois plan includes a discussion of air quality data measured since 1978, an emission inven-

tory of three source categories capable of emitting lead, atmospheric modeling analyses and proposed necessary control strategies. On March 19, 1984, the State submitted five consent decrees entered by the State of Illinois with the Circuit Court for the Third Judicial Circuit of Madison County and filed March 16, 1984, for incorporation in the lead plan. These include *People of the State of Illinois vs. Taracorp, Inc.*; *People of the State of Illinois vs. St. Louis Lead Recyclers*; *People of the State of Illinois vs. First Granite City National Bank*; *People of the State of Illinois, vs. Stackcorp Inc.*; and *People of the State of Illinois vs. B.V. and G.V. Transport Company*.

(54) [Reserved]

(55) On November 14, 1985, the State of Illinois submitted a negative declaration for natural gas/gasoline processing plants.

(i) *Incorporation by reference.* (A) Letter dated November 14, 1985, from Michael J. Hayes, Manager, Division of Air Pollution Control, Illinois Environmental Protection Agency.

(56) On June 19, 1984, the State submitted Illinois Environmental Protection Agency Rule 252 entitled, “Rules for Governing Public Participation in the Air Pollution Permit Program for Major Source in Nonattainment Areas.”

(i) *Incorporation by reference.* (A) Illinois Environmental Protection Agency Rule 252 entitled, “Rule for Governing Public Participation in the Air Pollution Permit Program for Major Sources in Nonattainment Areas,” published on June 8, 1984.

(57)–(60) [Reserved]

(61) On March 15, 1984 and June 14, 1984 the Illinois Environmental Protection Agency submitted commitments for satisfying several outstanding conditions to the sulfur dioxide [52.724(a)(1)] State Implementation Plan.

(62) On January 16, 1985, the Illinois Environmental Protection Agency submitted a variance from Illinois Rule 206(a).

(i) *Incorporation by reference.* (A) June 14, 1984, Opinion and Order of the Illinois Pollution Control Board (IPCB), PCB 84-19. This is a variance from Illinois Rule 206(a) until June 14, 1987, for

Environmental Protection Agency

§ 52.750

CO emissions from a fluidized bed combustion boiler at Midwest Solvents Company's facility in Tazewell County, Illinois.

(63) On February 6, 1985, the Illinois Environmental Protection Agency (IEPA) submitted a site-specific revision to its total suspended particulates State Implementation Plan for Villa Grove's "Dump and Boot Pit" emissions in Champaign County, Illinois.

(i) *Incorporation by reference.* (A) Illinois Pollution Control Board, Opinion and Order of the Board, PCB 84-53, Villa Grove's "Dump and Boot Pit" site-specific TSP revision. This revision extends the compliance date for control requirements on these emissions until September 1, 1987, and was adopted on July 14, 1984.

(64) On May 13, 1985, the Illinois Environmental Protection Agency (IEPA) submitted a variance from Illinois Rule 202(b) for a Brule pathological waste incinerator (BPWI) at NPWC's facility located at the Great Lakes Naval Base, Great Lakes, Shields Township, Illinois, as a revision to its TSP SIP. Shields Township is an attainment area for both the primary and secondary national ambient air quality standards (NAAQS) for TSP.

(i) *Incorporation by reference.* (A) Opinion and Order of the Illinois Pollution Control Board 84-156 adopted on March 22, 1985.

(65) Submitted from the Illinois Environmental Protection Agency (IEPA) dated July 22, 1985, requesting an extended compliance schedule for Precision Coatings Incorporated (PCI) coating Machine Number 2.

(i) *Incorporation by reference.* (A) Illinois Pollution Control Board Opinion and Order of the Board, PCB 84-117, which was adopted on February 20, 1985, and a modification to PCB 84-117 which was adopted on April 14, 1985.

(66) On March 27, 1985, the Illinois Environmental Protection Agency (IEPA) submitted a site-specific revision to its Carbon Monoxide State Implementation Plan for Anderson Clayton Foods, Inc. (ACF), a variance from 35 Illinois Administrative Code (IAC) 216.121 which governs Carbon Monoxide emissions from the Fluidized Bed Combuster retrofitted boiler at ACF's Jacksonville, Illinois facility. IAC

216.121 was incorporated in the Illinois SIP on May 31, 1972 (37 FR 10862), as Illinois Pollution Control Board Rule 206(a).

(i) *Incorporation by reference.* (A) Illinois Pollution Control Board Opinion and Order of the Board, PCB 84-147, which was adopted on January 24, 1985.

(67) On April 18, 1983, the State of Illinois submitted a 0.60 lb TSP/MMBTU emission limit for the City of Rochelle Municipal Steam Power Plant. On May 24, 1985, it submitted a revised modeling analysis.

(i) *Incorporation by reference.* Illinois Pollution Control Board Order (R78-15), Rule 203(g)(1)(C)(iii) which is dated February 24, 1983.

(68) On May 8, 1985, the Illinois Environmental Protection Agency submitted a variance until December 31, 1987, from Illinois Rule 205(n)(1)(b)(v) and Rule 205(n)(1)(b)(vi), for American Can Corporation's Hoopeston, Illinois facility in the form of a January 24, 1985, Opinion and Order of the Illinois Pollution Control Board (PCB 84-106).

(i) *Incorporation by reference.* (A) A January 24, 1985, Opinion and Order of the Illinois Pollution Control Board (ICPB), PCB 84-106. This is a variance until December 31, 1987, for the coating reformulation programs at American Can Corporation's Hoopeston facility located in Hoopeston, Illinois.

(69) On January 28, 1983, the Illinois Environmental Protection Agency submitted a December 30, 1982, Illinois Pollution Control Board Order (R80-5). Illinois Pollution Control Board Rules 205(l) (4) through (10), 205(t) and 205(u) are approved.

(i) *Incorporation by reference.* (A) Illinois Pollution Control Board Rules 205(l)(4) through (10), 205(t) and 205(u) as contained in December 30, 1982, Illinois Pollution Control Board Order R80-5.

(ii) *Additional material.* None.

(70) On February 13, 1986, the Illinois Environmental Protection Agency (IEPA) submitted a revision to its ozone SIP for the Fedders-USA's facility located in Effingham, Effingham County, Illinois. It grants Fedders-USA a compliance date extension for control requirements from October 1, 1982, to April 1, 1986, and provides for a legally enforceable compliance program.

(i) *Incorporation by reference.* (A) A January 9, 1986, Opinion and Order of the Illinois Pollution Control Board (IPCB), PCB 83-47.

(71) On October 20, 1983, the Illinois Environmental Protection Agency submitted a site-specific revision to Illinois' sulfur dioxide plan for Illinois Power Company's Baldwin Power Station. The revised SO₂ emission limitations are 101,966 lbs/hour, in the aggregate, and 6 lbs/MMBTU.

(i) *Incorporation by reference.* (A) Emission limits within Paragraph 1 of Illinois Pollution Control Board Final Order PCB 79-7, which was adopted September 8, 1983.

(72) [Reserved]

(73) On May 6, 1985, the Illinois Environmental Protection Agency, requested an extended compliance schedule for National Can Corporation's Rockford facility.

(i) *Incorporation by reference.* (A) Illinois Pollution Control Board, April 1, 1982, Opinion and Order of the Board, PCB 81-189 and a January 24, 1985, Opinion and Order PCB 84-108. These orders grant National Can Corporation (Rockford Plant) a variance from the existing VOC SIP requirements from December 31, 1982, until December 31, 1983, and from December 31, 1983, until December 31, 1985, respectively.

(74) On October 30, 1986, the Illinois Environmental Protection Agency submitted a September 25, 1986, Final Order of the Illinois Pollution Control Board R85-33 revises the State's coke oven pushing and charging rules and recodifies some related rules.

(i) *Incorporation by reference.* (A) Order of the Illinois Pollution Control Board R85-33, which was adopted September 25, 1986.

(75)-(77) [Reserved]

(78) On January 28, 1983, June 25, 1987, August 21, 1987, September 28, 1987, October 2, 1987, December 22, 1987, January 8, 1988, March 29, 1988, and May 2, 1988 the State submitted stationary source control measures for incorporation in the ozone plan.

(i) *Incorporation by reference.* (A) The following sections of title 35, Environmental Protection; subtitle B: Air Pollution; Chapter 1: Pollution Control Board of the Illinois Administrative Code, (June 1989): section 211.122 (defi-

nitions of bead-dipping; component; dry cleaning facility; external floating roof; gas service; green tire spraying; green tires; heavy liquid; liquid mounted seal; liquid service; pneumatic rubber tire manufacture; refinery unit, process unit, or unit; tread end cementing; undertread cementing; valves not externally regulated; vapor collection system; vapor mounted primary seal; volatile organic liquid; and volatile organic material) of subpart B (part 211); section 215.104 (definitions of continuous process; in vacuum service; material recovery section; open-ended valve; polystyrene plant; polystyrene resin; repaired; styrene devolatilizer unit; and styrene recovery unit) of subpart A (part 215); sections 215.124, 215.125, and 215.126 of subpart B (part 215); section 215.205 of subpart F (part 215); sections 215.240, 215.241, and 215.249 of subpart H (part 215); section 215.408 of subpart P (part 215); sections 215.420 through 215.431, 215.433, 215.434, 215.435, 215.437, and 215.438, all of subpart Q (part 215); section 215.453 of subpart R (part 215); sections 215.465 and 215.466 of subpart S (part 215); sections 215.520, 215.521, 215.525, 215.526, and 215.527 all of subpart V (part 215); sections 215.582, 215.583, and 215.584 of subpart Y (part 215); sections 215.607 through 215.613 of subpart Z (part 215); and sections 215.875, 215.877, 215.879, 215.881, 215.883, and 215.886 all of subpart BB (part 215) are approved.

(ii) *Additional material.* (79) On March 20, 1986, November 17, 1986, and July 1, 1987, Illinois submitted its vehicle inspection and maintenance plan for the Chicago and East St. Louis areas.

(i) *Incorporation by reference.* (A) Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter II: Environmental Protection Agency, Part 276, Procedures To Be Followed in the Performance of Annual Inspections of Motor Vehicle Exhaust Emissions, Adopted at 10 Illinois Register 13954, effective August 13, 1986.

(ii) *Additional material.* (A) "Technical Procedures Memorandum—Enforcement" between the Illinois Secretary of State and the Illinois Environmental Protection Agency, as submitted by Michael J. Hayes, Manager, Division of Air Pollution Control on July 1, 1987.

(80) [Reserved]

(81) On April 6, 1990, and May 4, 1990, Illinois submitted a regulation which reduced the maximum allowable volatility for gasoline sold in Illinois during July and August 1990 to 9.5 pounds per square inch.

(i) *Incorporation by reference.* (A) Title 35: Environmental protection, Subtitle B: Air pollution, Chapter I: Pollution control board, Part 215, Organic material emission standards and limitations, §215.585, Gasoline volatility standards, Adopted at 14 Illinois register 6434, effective April 11, 1990.

(82)-(83) [Reserved]

(84) On September 18, 1991, and November 18, 1991, the State submitted documents intended to satisfy federal requirements for an operating permit program which can issue federally enforceable operating permits.

(i) *Incorporation in reference.* (A) Public Act 87-555, an Act to amend the Environmental Protection Act by changing section 9.1, effective September 17, 1991. (Ch. 111 1/2, par. 1009.1) par. 1009.1(a), (b), (c), (d) and (f).

(85) On March 24, 1988, the State submitted rules for issuance of construction permits to new and modified air pollution sources located in or affecting nonattainment areas (New Source Review rules).

(i) *Incorporation by reference.* (A) Illinois Administrative Code, Title 35 Environmental Protection, Subtitle B: Air Pollution, Chapter 1: Pollution Control Board, Part 203: Major Stationary Sources.

(86) On February 8, 1991, the State submitted revisions to its sulfur dioxide measurement methodology.

(i) *Incorporation by reference.* (A) Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter 1: Pollution Control Board, Part 214 Sulfur Limitations, Subpart A: General Provisions, section 214.101 Measurement Methods. Adopted December 20, 1990, effective January 15, 1991.

(87) On March 13, 1985, the State submitted revisions to its sulfur dioxide limitations.

(i) *Incorporation by reference.* (A) Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter 1: Pollution Control Board, Part 214 Sulfur Limitations, Subpart C: Existing Solid Fuel

Combustion Emission Sources, Section 214.141 Sources Located in Metropolitan Areas, through paragraph (a) only, effective March 28, 1983; Subpart F: Alternative Standards for Sources Inside Metropolitan Areas, Section 214.201 Alternative Standards for Sources in Metropolitan Areas and Section 214.202 Dispersion Enhancement Techniques, effective March 28, 1983.

(88) On June 9, 1986, the State submitted revisions to its sulfur dioxide limitations in the form of a April 24, 1986, opinion and order of the Illinois Pollution Board in proceeding R84-28.

(i) *Incorporation by reference.* (A) Title 35: Environmental Protection, Subtitle B: Air Pollution Chapter 1: Pollution Control Board Part 214 Sulfur Limitations, Subpart C: Existing Solid Fuel Combustion Emission Sources, §214.141 Sources Located in Metropolitan Areas, paragraphs b), c) and d), and Subpart X: Utilities, §214.560 Scope and §214.561 E.D. Edwards Electric Generating Station effective May 20, 1986.

(89) On March 17, 1989, and August 28, 1990, the State of Illinois submitted a revision to the Illinois State Implementation Plan. The revision is contained in subpart J, §201.281 and subpart L, §§201.401-.408 of part 210 of title 35 of the Illinois Administrative Code. This revision provides a legally enforceable procedure for continuously monitoring and recording emissions to determine the status of compliance of certain stationary source categories and complies with 40 CFR 51.214 and part 51, appendix P. The rules were adopted by the Illinois Pollution Control Board on December 15, 1988, published (13 Ill. Reg. 2066) and became effective February 3, 1989. The rules were corrected for an omission, published on November 15, 1989, (13 Ill Reg. 19444), and became effective December 5, 1989. In a November 18, 1991, letter from Bharat Mathur, then Manager, Division of Air Pollution Control, Illinois Environmental Protection Agency (IEPA) to Stephen Rothblatt, Chief, Regulation Development Branch, Region 5, USEPA, Illinois committed to notify USEPA of any pending construction or operating permit application during the 30 day public comment period which is part of Illinois' permit issuance process (Section 203.150). This

§ 52.750

commitment is part of the administrative record of USEPA's approval of the Illinois' operating permit program for the purpose of issuing federally enforceable operating permits at 40 CFR 52.720 (c) (84) and 52.737 on December 17, 1992 (57 FR 59928). USEPA may deem a permit not federally enforceable if monitoring provisions do not comply with the requirements of 40 CFR 51.214, part 51, appendix P or § 51.165.

(i) *Incorporation by reference.* (A) Title 35: Environmental Protection; Subtitle B: Air Pollution; Chapter I: Pollution Control Board; Subchapter a: Permits and General Provisions; Part 201: Permits and General Provisions, Subpart J: Monitoring and Testing, Section 201.281; and Subpart L: Continuous Monitoring, Sections 201.401 through 201.408, adopted at Ill. Reg. 2066, effective February 3, 1989.

(90) On June 11, 1991, Illinois submitted regulations concerning the emission of volatile organic compounds from pharmaceutical manufacturing.

(i) *Incorporation by reference.* (A) Title 35 of the Illinois Administrative Code: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter C: Emissions Standards and Limitations for Stationary Sources, Part 215: Organic Material Emission Standards and Limitations, Subpart T: Pharmaceutical Manufacturing, Subpart A: General Provisions: Amendments to sections 215.102 and 215.105 and Creation of section 215.108. Adopted at 15 ILLINOIS REGISTER 80 18, effective May 14, 1991.

(B) Title 35 of the Illinois Administrative Code: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter C: Emissions Standards and Limitations for Stationary Sources, Part 211: Definitions and General Provisions, Subpart B: Definitions. Adopted at 15 ILLINOIS REGISTER 79 01, effective May 14, 1991.

(91) [Reserved]

(92) On June 4, 1992, the State submitted particulate matter regulations adopted as part of Pollution Control Board Proceeding R91-35. These regulations concern particulate matter ambient limits and episode regulations.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environ-

40 CFR Ch. I (7-1-25 Edition)

mental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board

(A) Part 212 Visible and Particulate Matter Emissions: Section 212.113 Incorporations by Reference; section 212.424 Fugitive Particulate Matter Control for the Portland Cement Manufacturing Plant and Associated Quarry Operations located in LaSalle County, South of the Illinois River; section 212.443 Coke Plants; section 212.445 Blast Furnace Cast Houses; adopted at 16 Illinois Register 8204, effective May 15, 1992.

(B) Part 243 Air Quality Standards: Section 243.108 Incorporations by Reference; section 243.120 PM₁₀; section 243.121 Repealed; adopted at 16 Illinois Register 8185, effective May 15, 1992.

(C) Part 244 Episodes: Section 244.101 Definitions; section 244.106 Monitoring; section 244.107 Determination of Areas Affected; section 244.121 Local Agency Responsibilities; section 244.161 Advisory Alert and Emergency Levels; section 244.162 Criteria for Declaring and Advisory; section 244.163 Criteria for Declaring a Yellow Alert; section 244.166 Criteria for Terminating Advisory, Alert and Emergency; section 244.167 Episode Stage Notification; section 244.168 Contents of Episode Stage Notification; section 244.169 Actions During Episode Stages Adopted; section 244 appendix D; adopted at 16 Illinois Register 8191, effective May 15, 1992.

(93) On September 30, 1992, the State submitted rules regulating volatile organic compound emissions from gasoline dispensing facilities' motor vehicle fuel operations.

(i) *Incorporation by reference.* (A) Illinois Administrative Code, title 35 Environmental Protection, subtitle B: Air Pollution, chapter I: Pollution Control Board part 218: Organic Material Emission Standards and Limitations for the Chicago Area; subpart Y: Gasoline Distribution; § 218.583 Gasoline Dispensing Facilities—Storage Tank Filling Operations, amended at 16 Illinois Register 13864 effective August 24, 1992, and; § 218.586 Gasoline Dispensing Facilities—Motor Vehicle Fueling Operations, added at 16 Illinois Register 13864, effective August 24, 1992.

(B) [Reserved]

Environmental Protection Agency

§ 52.750

(ii) *Additional materials.* (A) Stage II Vapor Recovery SIP Program Description dated September 29, 1992.

(94) On July 30, 1986, the State submitted particulate boiler rules intended to replace rule 203(g)(1) which was vacated by the Courts. No action is taken on §212.209 because the variance which it authorized has expired. On July 22, 1988, the State submitted opacity rules intended to replace rule 202(b) which had been vacated by the Courts. Also on July 22, 1988, the State submitted Illinois Pollution Control Board procedural rules for considering Air Adjusted Standard Procedures.

(i) *Incorporation by reference.* (A) Title 35: Environmental Protection, Illinois Administrative Code, Subtitle B: Air Pollution; Chapter 1: Pollution Control Board; part 212 Visible and Particulate Matter Emissions; subpart E: Particulate Matter Emission from Fuel Combustion Emission Sources; §§212.201, 212.202, 212.203 and 212.204. Amended or added at 10 Ill. Reg. 12637, effective July 9, 1986.

(B) Title 35: Environmental Protection, Illinois Administrative Code, Subtitle B: Air Pollution; Chapter 1: Pollution Control Board; part 212 Visible and Particulate Matter Emissions; subpart B: Visible Emissions. Amended or added at 12 Ill. Reg. 12492, effective July 13, 1988.

(C) Title 35: Environmental Protection, Illinois Administrative Code; Subtitle A: General Provisions; Chapter 1: Pollution Control Board; part 106: Hearings Pursuant to Specific Rules; subpart E: Air Adjusted Standards Procedures. Added at 12 Ill. Reg. 12484, effective July 13, 1988.

(95) On October 16, 1991, and November 13, 1991, the State submitted particulate matter regulations adopted as part of Pollution Control Board Proceeding R91-6. These regulations concern particulate matter controls for LaSalle County, Illinois.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter 1: Pollution Control Board.

(A) The addition of definitions for “Condensible PM-10”, “PM-10”, “Portland Cement Manufacturing Process Emission Source”, and the

modification of the definition of “Portland Cement Process” to Part 211 Definitions and General Provisions; Section 211.122 Definitions; adopted at 15 Illinois Register 15673, effective October 14, 1991.

(B) Part 212 Visible and Particulate Matter Emissions: Section 212.110 Measurement Methods; the addition of an abbreviation for pounds per hour to Section 212.111 Abbreviations and Units; additions and deletions to Section 212.113 Incorporations by Reference including the addition and/or renumbering of paragraphs (a), (b), (c), (d), (e), and (h) and the deletion of paragraphs earlier numbered as (a) and (f); Section 212.423 Emission Limits for Portland Cement the Manufacturing Plant Located in LaSalle County, South of the Illinois River; adopted at 15 Illinois Register 15708, effective October 4, 1991.

(96) On November 12, 1992, the State of Illinois submitted a Small Business Stationary Source Technical and Environmental Assistance Program for incorporation in the Illinois State Implementation Plan as required by section 507 of the Clean Air Act Amendments of 1990. Included in the State's submittal were a program description, newly adopted enabling legislation including new subsection 20 of section 39.5 of the Environmental Protection Act, Public Act 87-1213, and new subsection 46.13(a) of the Civil Administrative Code, Public Act 87-1177, and a May 4, 1992, State of Illinois, Illinois Department of Commerce and Community Affairs (DCCA), Illinois Environmental Protection Agency (IEPA) Interagency Agreement defining the responsibilities of DCCA and IEPA in developing and implementing the Small Business Stationary Source Technical and Environmental Compliance Assistance Program (Program).

(i) *Incorporation by reference.* (A) Subsection 20 of section 39.5 of the Environmental Protection Act adopted as Public Act 87-1213 signed into law on September 26, 1992, and effective upon signature.

(B) Subsection 46.13(a) of the Civil Administrative Code adopted as Public Act 87-1177 signed into law on September 21, 1992, and effective upon signature.

(ii) *Other material.* (A) Program description.

(B) May 4, 1992, Interagency Agreement between DCCA and IEPA defining the responsibilities of each agency in developing and implementing the program.

(97) On October 12, 1992, and June 2, 1993, the State of Illinois submitted a requested revision to the Illinois State Implementation Plan (SIP) intended to satisfy the requirements of section 182(a)(3)(B) of the Clean Air Act as amended in 1990. Included were State rules establishing procedures for the annual reporting of emissions of volatile organic material (VOM) and oxides of nitrogen (NO_x) as well as other regulated air pollutants by stationary sources in ozone nonattainment areas. Also included was a June 2, 1993, commitment letter from the Illinois Environmental Protection Agency (IEPA) to fulfill the reporting requirements of the United States Environmental Protection Agency by performing the following tasks:

(i) Update the AIRS Facility Subsystem using the annual emissions report data. The 1992 data will be updated by December 31, 1993, and subsequent updates will be made by July 1st of each year.

(ii) Retain annual emissions reports for at least three (3) years.

(iii) Develop and submit Emissions Statement Status Reports (ESSR) on a quarterly basis each year until all applicable sources have submitted the required annual emissions reports. The report will show the total number of facilities from which emission statement data was requested, the number of facilities that met the provisions, and the number of facilities that failed to meet the provisions. Sources that are delinquent in submitting their emissions statements will be individually listed if they emit 500 tons per year or more of VOM or 2500 tons per year or more of NO_x. The report will also contain the emission data requested in Appendix F of the July 6, 1992, Draft Guidance on the Implementation of an Emission Statement Program.

(iv) All sources subject to the emission statement requirements must report, at a minimum, the information

specified under subpart C of part 254 of chapter II of subtitle B of title 35 of the Illinois Administrative Code.

(A) Incorporation by reference. Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter II: Environmental Protection Agency, Part 254: Annual Emissions Report, adopted at 17 Illinois Register 7782, effective May 14, 1993.

(B) *Other material.* June 2, 1993, commitment letter.

(98) On July 21, 1986, the State a submitted revision to its particulate matter regulations to incorporate an emission limit for continuous automatic stoking animal pathological waste incinerators.

(i) *Incorporation by reference.* (A) Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter 1: Pollution Control Board, Part 212 Visible and Particulate Matter Emissions, subpart D: Particulate Matter Emissions from Incinerators, section 212.185 Continuous Automatic Stoking Animal Pathological Waste Incinerators. Adopted December 18, 1986, added at 11 Ill. Reg. 1410, effective December 30, 1986.

(99) On January 4, 1989, the State submitted revisions to its sulfur dioxide rules.

(i) *Incorporation by reference.* (A) Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter 1: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 214 Sulfur Limitations, Subpart A: General Provisions, section 214.102 Abbreviations and Units. Amended at 12 Ill. Reg. 20778, effective December 5, 1988.

(B) Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter 1: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 214 Sulfur Limitations, Subpart A: General Provisions, section 214.104 Incorporations by Reference. Amended at 15 Ill. Reg. 1017, effective January 15, 1991.

(C) Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter 1: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 214 Sulfur Limitations, Subpart O: Petroleum Refining, Petrochemical and Chemical

Environmental Protection Agency**§ 52.750**

Manufacturing, section 214.382 Petroleum and Petrochemical Processes. Amended at 12 Ill. Reg. 20778, effective December 5, 1988.

(100) On October 21, 1993, the State submitted definitions codified as part of the Illinois Administrative Code for incorporation in the Illinois State Implementation Plan.

(i) *Incorporation by reference.* Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 211 Definitions and General Provisions, Subpart A: General Provisions: Sections 211.101 and 211.102, Subpart B: Definitions, Sections 211.121, 211.130, 211.150, 211.170, 211.210, 211.230, 211.250, 211.290, 211.310, 211.330, 211.350, 211.370, 211.390, 211.410, 211.430, 211.450, 211.470, 211.490, 211.510, 211.530, 211.550, 211.570, 211.590, 211.610, 211.630, 211.650, 211.670, 211.690, 211.710, 211.730, 211.750, 211.770, 211.790, 211.810, 211.830, 211.850, 211.870, 211.890, 211.910, 211.930, 211.950, 211.970, 211.990, 211.1010, 211.1050, 211.1090, 211.1110, 211.1130, 211.1150, 211.1170, 211.1190, 211.1210, 211.1230, 211.1250, 211.1270, 211.1290, 211.1310, 211.1330, 211.1350, 211.1370, 211.1390, 211.1410, 211.1430, 211.1470, 211.1490, 211.1510, 211.1530, 211.1550, 211.1570, 211.1590, 211.1610, 211.1630, 211.1650, 211.1670, 211.1690, 211.1710, 211.1730, 211.1750, 211.1770, 211.1790, 211.1810, 211.1830, 211.1850, 211.1870, 211.1890, 211.1910, 211.1930, 211.1950, 211.1970, 211.1990, 211.2010, 211.2050, 211.2070, 211.2090, 211.2110, 211.2130, 211.2150, 211.2170, 211.2190, 211.2210, 211.2230, 211.2250, 211.2270, 211.2310, 211.2330, 211.2350, 211.2370, 211.2390, 211.2410, 211.2430, 211.2450, 211.2470, 211.2490, 211.2510, 211.2530, 211.2550, 211.2570, 211.2590, 211.2650, 211.2670, 211.2690, 211.2710, 211.2730, 211.2750, 211.2770, 211.2790, 211.2810, 211.2830, 211.2850, 211.2870, 211.2890, 211.2910, 211.2930, 211.2950, 211.2970, 211.2990, 211.3010, 211.3030, 211.3050, 211.3070, 211.3090, 211.3110, 211.3130, 211.3150, 211.3170, 211.3190, 211.3210, 211.3230, 211.3250, 211.3270, 211.3290, 211.3310, 211.3330, 211.3350, 211.3370, 211.3390, 211.3410, 211.3430, 211.3450, 211.3470, 211.3490, 211.3510, 211.3530, 211.3550, 211.3570, 211.3590, 211.3610, 211.3630, 211.3650,

211.3670, 211.3690, 211.3710, 211.3730, 211.3750, 211.3770, 211.3790, 211.3810, 211.3830, 211.3850, 211.3870, 211.3890, 211.3910, 211.3930, 211.3970, 211.3990, 211.4010, 211.4030, 211.4050, 211.4070, 211.4090, 211.4110, 211.4130, 211.4150, 211.4170, 211.4190, 211.4210, 211.4230, 211.4250, 211.4270, 211.4290, 211.4310, 211.4330, 211.4350, 211.4370, 211.4390, 211.4410, 211.4430, 211.4450, 211.4470, 211.4490, 211.4510, 211.4530, 211.4550, 211.4590, 211.4610, 211.4630, 211.4650, 211.4670, 211.4690, 211.4710, 211.4730, 211.4750, 211.4770, 211.4790, 211.4810, 211.4870, 211.4890, 211.4910, 211.4930, 211.4950, 211.4990, 211.5030, 211.5050, 211.5070, 211.5090, 211.5110, 211.5130, 211.5150, 211.5170, 211.5185, 211.5190, 211.5210, 211.5230, 211.5250, 211.5270, 211.5310, 211.5330, 211.5350, 211.5370, 211.5410, 211.5430, 211.5450, 211.5470, 211.5490, 211.5510, 211.5550, 211.5570, 211.5590, 211.5610, 211.5630, 211.5650, 211.5670, 211.5690, 211.5710, 211.5730, 211.5750, 211.5770, 211.5790, 211.5810, 211.5830, 211.5850, 211.5870, 211.5890, 211.5910, 211.5930, 211.5950, 211.5970, 211.5990, 211.6010, 211.6030, 211.6050, 211.6070, 211.6090, 211.6130, 211.6150, 211.6190, 211.6210, 211.6230, 211.6270, 211.6290, 211.6310, 211.6330, 211.6350, 211.6370, 211.6390, 211.6410, 211.6430, 211.6450, 211.6470, 211.6490, 211.6510, 211.6530, 211.6550, 211.6570, 211.6590, 211.6610, 211.6670, 211.6690, 211.6730, 211.6750, 211.6770, 211.6790, 211.6810, 211.6850, 211.6870, 211.6890, 211.6910, 211.6930, 211.6950, 211.6970, 211.6990, 211.7010, 211.7030, 211.7070, 211.7090, 211.7110, 211.7130, 211.7150, 211.7170, 211.7190, 211.7210, 211.7230, 211.7250, 211.7270, 211.7290, 211.7310, 211.7330, 211.7350.

These section were added at 17 Ill. Reg. 16504, effective September 27, 1993.

(101) On October 21, 1993, the state submitted volatile organic compound (VOC) control regulations for incorporation in the Illinois State Implementation for ozone.

(i) *Incorporation by reference.* (A) Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources, Part 218: Organic Material Emission Standards and Limitations for the Chicago Area Subparts

A, B, C, E, F, G, H, Q, R, S, T, V, W, X, Y, Z, AA, BB, and Section 218.

Appendix A, B, C, and D. These regulations were adopted at R91–7 at 15 Ill. Reg. 12231, effective August 16, 1991; amended in R91–23 at Ill. Reg. 13564, effective August 24, 1992; amended in R91–28 and R91–30 at 16 Ill. Reg. 13864, effective August 24, 1992; amended in R93–9 at 17 Ill. Reg. 16636, effective September 27, 1993. The specific adoption and effective dates of the rules incorporated by reference follow.

(1) Adopted at R91–7 at 15 Ill. Reg. 12231, effective August 16, 1991. Subpart A: 218.108; Subpart C: 218.142; Subpart R: 218.442, 218.444, 218.448, 218.451; Subpart T: 218.484, 218.488; Subpart V: 218.526; Subpart X: 218.561, 218.563; Subpart Z: 218.607; Subpart AA: 218.625, 218.626 and 218.630.

(2) Amended in R93–9 at 17 Ill. Reg. 16636, effective September 27, 1993. Subpart A: 218.100, 218.101, 218.102, 218.103, 218.104, 218.105, 218.106, 218.107, 218.109, 218.110, 218.111, 218.112; Subpart B: 218.121, 218.122, 218.123, 218.124; Subpart C: 218.141, 218.143, 218.144; Subpart E: 218.181, 218.182, 218.183, 218.184, 218.186; Subpart F: 218.204, 218.205, 218.206, 218.207, 218.208, 218.209, 218.210, 218.211; Subpart G: 218.301, 218.302, 218.303, 218.304; Subpart H: 218.401, 218.402, 218.403, 218.404, 218.405; Subpart Q: 218.421, 218.422, 218.423, 218.424, 218.425, 218.426, 218.427, 218.428, 218.429; Subpart R: 218.441, 218.443, 218.445, 218.446, 218.447, 218.449, 218.450, 218.452; Subpart S: 218.461, 218.462, 218.463, 218.464; Subpart T: 218.480, 218.481, 218.482, 218.483, 218.485, 218.486, 218.487, 218.489; Subpart V: 218.525; Subpart W: 218.541; Subpart X: 218.562; Subpart Y: 218.581, 218.582, 218.583, 218.584, 218.585, 218.586; Subpart Z: 218.601, 218.602, 218.603, 218.608, 218.609, 218.610, 218.611; Subpart AA: 218.620, 218.621, 218.623, 218.624, 218.628, 218.636, 218.637; Subpart BB: 218.640, 218.642, 218.644, Section 218: Appendix A, Appendix B, Appendix C, Appendix D.

(3) Section 218.585 was repealed in 2013 and is removed without replacement; see paragraph (c)(201) of this section.

(B) Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for

Stationary Sources, Part 219: Organic Material Emission Standards and Limitations for Metro East Area Subparts A, B, C, E, F, G, H, Q, R, S, T, V, W, X, Y, Z, AA, BB and Section 219 Appendix A, B, C, and D. These regulations were adopted at R91–8 at Ill. Reg. 12491, effective August 16, 1991; amended in R91–24 at 16 Ill. Reg. 13597, effective August 24, 1992; amended in R91–30 at 16 Ill. Reg. 13833, effective August 24, 1992, emergency amendment in R93–12 at Ill. Reg. 8295, effective May 24, 1993, for a maximum of 150 days, amended in R93–9 at 17 Ill. Reg. 16918, effective September 27, 1993 and October 21, 1993. The specific adoption and effective dates of the rules incorporated by reference follow.

(1) Adopted at R91–8 at 15 Ill. Reg. 12491, effective August 16, 1991: Subpart A: 219.103, 219.108; Subpart C: 219.142; Subpart R: 219.442, 219.444, 219.448, 219.451; Subpart T: 219.484, 219.488; Subpart V: 219.526; Subpart X: 219.561, 219.563; Subpart Z: 219.607; Subpart AA: 219.625, 219.626, 219.630.

(2) Amended in R93–9 at 17 Ill. Reg. 16918, effective September 27, 1993:

Subpart A: 219.100, 219.101, 219.102, 219.104, 219.105, 219.106, 219.107, 219.109, 219.110, 219.111, 219.112;
Subpart B: 219.121, 219.122, 219.123, 219.124;
Subpart C: 219.141, 219.143, 219.144;
Subpart E: 219.181, 219.182, 219.183, 219.184, 219.186;
Subpart F: 219.204, 219.205, 219.206, 219.207, 219.208, 219.209, 219.210, 219.211;
Subpart G: 219.301, 219.302, 219.303, 219.304;
Subpart H: 219.401, 219.402, 219.403, 219.404, 219.405;
Subpart Q: 219.421, 219.422, 219.423, 219.424, 219.425, 219.426, 219.427, 219.428, 219.429;
Subpart R: 219.441, 219.443, 219.445, 219.446, 219.447, 219.449, 219.450, 219.452;
Subpart S: 219.461, 219.462, 219.463, 219.464;
Subpart T: 219.480, 219.481, 219.482, 219.483, 219.485, 219.486, 219.487, 219.489;
Subpart V: 219.525;
Subpart W: 219.541;
Subpart X: 219.562;
Subpart Y: 219.581, 219.582, 219.583, 219.584, 219.585, 219.586;
Subpart Z: 219.601, 219.602, 219.603, 219.608, 219.609, 219.610, 219.611;
Subpart AA: 219.620, 219.621, 219.623, 219.624, 219.628, 219.636, 219.637;
Subpart BB: 219.640, 219.642, 219.644;
Section 219: Appendix A, Appendix B, Appendix C, Appendix D.

Environmental Protection Agency

§ 52.750

(3) Section 219.585 was repealed in 2013 and is removed without replacement; see paragraph (c)(201) of this section.

(102) On October 21, 1993 and March 4, 1994, the State submitted volatile organic compound control regulations for incorporation in the Illinois State Implementation Plan for ozone.

(i) *Incorporation by reference.* (A) Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 211: Definitions and General Provisions, Subpart B: Definitions, Sections 211.270, 211.1070, 211.2030, 211.2610, 211.3950, 211.4050, 211.4830, 211.4850, 211.4970, 211.5390, 211.5530, 211.6110, 211.6170, 211.6250, 211.6630, 211.6650, 211.6710, 211.6830, 211.7050. These sections were adopted on January 6, 1994, Amended at 18 Ill. Reg. 1253, and effective January 18, 1994.

(B) Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources, Part 218: Organic Material Emissions Standards and Limitations for the Chicago Area, Subpart PP: 218.927, 218.928; Subpart QQ: 218.947, 218.948; Subpart RR: 218.967, 218.968; Subpart TT: 218.987, 218.988; Subpart UU: 218.990. These sections were adopted on September 9, 1993, Amended at 17 Ill. Reg. 16636, effective September 27, 1993.

(C) Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources, Part 218: Organic Material Emissions Standards and Limitations for the Chicago Area, Subpart A: 218.106, 218.108, 218.112, 218.114; Subpart H: 218.402; Subpart Z: 218.602, 218.611; Subpart AA: 218.620, 218.623 (repealed); Subpart CC; Subpart DD; Subpart PP: 218.920, 218.926; Subpart QQ: 218.940, 218.946; Subpart RR: 218.960, 218.966; Subpart TT: 218.980, 218.986; Subpart UU: 218.991. These sections were adopted on January 6, 1994, Amended at 18 Ill. Reg. 1945, effective January 24, 1994.

(103) On February 11, 1993, Illinois submitted a site specific revision to its carbon monoxide State Implementation Plan for a General Motors Corporation iron foundry located adjacent to Interstate 74 at G Street in Vermilion County, Illinois.

(i) *Incorporation by reference.* (A) Illinois Administrative Code; Title 35 Environmental Protection; Subtitle B: Air Pollution; Chapter I: Pollution Control Board; Subchapter C: Emission Standards and Limitations for Stationary Sources; P 216: Carbon Monoxide Emissions; Subpart O: Primary and Fabricated Metal Products; Section 216.382 Exception, General Motors Ferris Foundry in Vermilion County. Added at 16 Illinois Register 18075, effective November 13, 1992.

(104) [Reserved]

(105) On February 7, 1994, the State submitted revisions intended to create a permit program for small sources. The purpose of these revisions is to lessen the permitting burden on small sources and the permitting authority by reducing the frequency and/or the requirement of operating permit renewal for sources emitting a total of less than 25 tons per year of regulated air pollutants. A permit obtained through these procedures is intended to continue as a legally binding State document until the source modifies its operations, withdraws its permit or becomes subject to a new applicable requirement. At that time, the State will determine whether the small source procedures continue to be appropriate and issue a revised small source permit or direct the source in following the correct permit procedures. Since small source permits are not subject to a public comment period or review by USEPA, they are not federally enforceable and cannot be used to limit sources' potential to emit and thereby exempt them from the requirements of the title v operating permit program.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board.

(A) Subchapter a: Permits and General Provisions, Part 201: Permits and General Provisions.

(1) Subpart D: Permit Applications and Review Process, Section 201.162 Duration and Section 201.163 Joint Construction and Operating Permits. Amended at 17 Ill. Reg., effective December 7, 1993.

(2) Subpart E: Special Provisions for Operating Permits for Certain Smaller Sources, Section 201.180 Applicability, Section 201.181 Expiration and Renewal and Section 201.187 Requirement for a Revised Permit Added at 17 Ill. Reg., effective December 7, 1993.

(B) Subchapter C: Emission Standards and Limitations for Stationary Sources, Part 211: Definitions and General Provisions, Subpart B: Definitions, Section 211.5500 Regulated Air Pollutant. Adopted at 17 Ill. Reg., effective December 7, 1993.

(106) On November 23, 1994, the State submitted amended marine vessel loading rules which consisted of revised definitions, and revisions to the Ozone Control Plan for the Chicago and Metro-East St. Louis areas.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources.

(A) Part 211: Definitions and General Provisions, Subpart B: Definitions, Sections 211.3480 Loading Event and 211.3660 Marine Vessel added at 18 Ill. Reg. 166769, effective October 25, 1994; Sections 211.3650 Marine Terminal, and 211.6970 Vapor Collection System, and Section 211.6990 Vapor Control System amended at 18 Ill. Reg. 16769, effective October 25, 1994.

(B) Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart A; General Provisions, Sections 218.101 Savings Clause and 218.106 Compliance Dates amended at 18 Ill. Reg. 16392, effective October 25, 1994; Subpart GG: Marine Terminals, Sections 218.760 Applicability, 218.762 Control Requirements, 218.764 Compliance Certification, 218.766 Leaks, 218.768 Testing and Monitoring, and 218.770 Recordkeeping and Reporting added at 18 Ill. Reg. 16392, effective October 25, 1994; Appendix E: List of Affected Marine Terminals amended at 18

Ill. Reg. 16392, effective October 25, 1994.

(C) Part 219: Organic Material Emissions Standards and Limitations for the Metro-East Area, Subpart A; General Provisions, Sections 219.101 Savings Clause and 219.106 Compliance Dates amended at 18 Ill. Reg. 16415, effective October 25, 1994; Subpart GG: Marine Terminals, Sections 219.760 Applicability, 219.762 Control Requirements, 219.764 Compliance Certification, 219.766 Leaks, 219.768 Testing and Monitoring, and 219.770 Recordkeeping and Reporting added at 18 Ill. Reg. 16415, effective October 25, 1994.

(D) Part 219: Organic Material Emissions Standards and Limitations for the Metro-East Area, Appendix E: List of affected Marine Terminals amended at 20 Ill. Reg. 3848. Effective February 15, 1996.

(107) On October 25, 1994, Illinois submitted a regulation which requires gasoline dispensing operations in the Chicago and Metro-East St. Louis ozone nonattainment areas that have storage tanks of at least 575 gallons to install pressure/vacuum relief valves on storage tank vent pipes. Tanks installed before January 1, 1979, are exempt from the rule if they have a capacity of less than 2000 gallons, as are tanks that are equipped with floating roofs or equivalent control devices that have been approved by the State and USEPA.

(i) *Incorporation by reference.* Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources.

(A) Part 201 Permits and General Provisions, Section 201.302 Reports. Amended at 18 Ill. Reg. 15002. Effective September 21, 1994.

(B) Part 211 Definitions and General Provisions, Section 211.5060 Pressure/Vacuum Relief Valve. Added at 18 Ill. Reg. 14962. Effective September 21, 1994.

(C) Part 218 Organic Material Emission Standards and Limitations for Chicago Area, Section 218.583 Gasoline Dispensing Operations-Storage Tank Filling Operations. Amended at 18 Ill. Reg. 14973. Effective September 21, 1994.

(D) Part 219 Organic Material Emission Standards and Limitations for

Metro East Area, Section 219.583 Gasoline Dispensing Operations-Storage Tank Filling Operations. Amended at 18 Ill. Reg. 14987. Effective September 21, 1994.

(108) On January 25, 1994, the State submitted a revision to its ozone State Implementation Plan (SIP) for Quantum Chemical Corporation's facility located in Morris, Aux Sable Township, Grundy County, Illinois. It grants an adjusted standard from Parts 35 Illinois Administration Code (IAC) 218.966 and 218.986 as they apply to specific units or plants within this facility.

(i) *Incorporation by reference.* (A) Illinois Pollution Control Board Final Opinion and Order, AS 92-14, adopted on October 7, 1993, and effective on October 7, 1993.

(109) On October 25, 1994, Illinois submitted a regulation that reduces the maximum allowable volatility for gasoline sold in the Metro-East St. Louis ozone nonattainment area, which includes Madison, Monroe, and St. Clair Counties, to 7.2 pounds per square inch Reid Vapor Pressure (RVP) during the summer control period. On May 14, 1996, Illinois submitted an amendment to its RVP rule which changes the summer regulatory control period of the program. The summer control period for the Illinois RVP program is June 1 to September 15.

(i) *Incorporation by reference.* Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources, Part 219 Organic Material Emission Standards and Limitations for Metro East Area.

(A) Section 219.112 Incorporation by Reference. Amended at 18 Ill. Reg. 14987. Effective September 21, 1994.

(B) [Reserved]

(C) Section 219.585 Gasoline Volatility Standards. Amended at 20 Ill. Reg. 3848: Effective February 15, 1996.

(D) Section 219.585 was repealed in 2013 and is removed without replacement; see paragraph (c)(201) of this section.

(110) On September 26, 1994, the State of Illinois submitted a revision to its ozone State Implementation Plan for the J. M. Sweeney Company located in

Cicero, Cook County, Illinois. It grants a compliance date extension from Stage II vapor control requirements (35 Ill. Adm. Code 218.586) from November 1, 1993, to March 31, 1995.

(i) *Incorporation by reference.* (A) Illinois Pollution Control Board Final Opinion and Order, PCB 93-257, adopted on September 1, 1994, and effective on September 1, 1994. Certification dated 9/23/94 of Acceptance by J. M. Sweeney.

(111) On July 29, 1994, Illinois submitted regulations which require adoption and implementation of particulate matter contingency measures for Illinois' four moderate particulate matter nonattainment areas. Sources in the nonattainment areas which emit at least 15 tons of particulate matter must submit two levels of contingency measures, which will then become Federally enforceable. Sources will be required to implement the contingency measures if an exceedance of the National Ambient Air Quality Standard for Particulate Matter is measured, or if the United States Environmental Protection Agency finds that an area has failed to attain the National Ambient Air Quality Standards.

(i) *Incorporation by reference.* Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board;

(A) Part 106 Hearings Pursuant to Specific Rules, Section 106.930—Applicability, Section 106.931—Petition for Review, Section 106.932—Response and Reply, Section 106.933—Notice and Hearing, Section 106.934—Opinion and Order. Amended at 18 Ill. Reg. 11579-11586. Effective July 11, 1994.

(B) Part 212 Visible and Particulate Matter Emissions, Section 212.700—Applicability, Section 212.701—Contingency Measure Plans, Submittal and Compliance Date, Section 212.702—Determination of Contributing Sources, Section 212.703—Contingency Measure Plan Elements, Section 212.704—Implementation, Section 212.705—Alternative Implementation. Added at 18 Ill. Reg. 11587-11606. Effective July 11, 1994.

(112) On March 28, 1995, the State of Illinois submitted a revision to its ozone State Implementation Plan for P & S, Incorporated's facility located in Wood Dale, Du Page County, Illinois. It

grants a compliance date extension from Stage II vapor control requirements (35 Ill. Adm. Code 218.586) from November 1, 1994 until April 1, 1996, or 60 days after notification to P & S, Incorporated that the roadway construction complicating the installation of Stage II equipment will be abandoned for any reason, whichever is sooner.

(i) *Incorporation by reference.* (A) Illinois Pollution Control Board Final Opinion and Order, PCB 94-299, adopted on February 16, 1995, and effective on February 16, 1995. Certification dated March 1, 1995 of Acceptance by P & S, Incorporated.

(113) On April 27, 1995, the Illinois Environmental Protection Agency requested a revision to the Illinois State Implementation Plan in the form of revisions to the State's New Source Review rules for sources in the Chicago and metropolitan East St. Louis ozone nonattainment areas and are intended to satisfy Federal requirements of the Clean Air Act as amended in 1990. The State's New Source Review provisions are codified at Title 35: Environmental Protection Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter a: Permits and General Provisions. Part 203 Major Stationary Sources Construction and Modification is amended as follows:

(i) *Incorporation by reference.* (A) Title 35: Environmental Protection, Subpart A: General Provisions, Section 203.101 Definitions, Section 203.107 Allowable Emissions, Section 203.110 Available Growth Margin, Section 203.112 Building, Structure and Facility, Section 203.121 Emission Offset, Section 203.122 Emissions Unit, Section 203.123 federally Enforceable, Section 203.126 Lowest Achievable Emission Rate, Section 203.128 Potential to Emit, Section 203.145 Volatile Organic Material, Section 203.150 Public Participation. Effective April 30, 1993.

(B) Title 35: Environmental Protection, Subpart B: Major Stationary Sources in Nonattainment Areas, Section 203.201 Prohibition, Section 203.203 Construction Permit Requirement and Application, Section 203.206 Major Stationary Source, Section 203.207 Major Modification of a Source, Section 203.208 Net Emission Determination,

Section 203.209 Significant Emissions Determination. Effective April 30, 1993.

(C) Title 35: Environmental Protection, Subpart C: Requirements for Major Stationary Sources in Nonattainment Areas, Section 203.301 Lowest Achievable Emission Rate, Section 203.302 Maintenance of Reasonable Further Progress and Emission Offsets, Section 203.303 Baseline and Emission Offsets Determination, Section 203.306 Analysis of Alternatives. Effective April 30, 1993.

(D) Title 35: Environmental Protection, Subpart H: Offsets for Emission Increases From Rocket Engines and Motor Firing, Section 203.801 Offsetting by Alternative or Innovative Means. Effective April 30, 1993. Published in the Illinois Register, Volume 17, Issue 20, May 14, 1993.

(114) On November 30, 1994, the State submitted an amended Synthetic Organic Chemical Manufacturing Industry Air Oxidation Process rule which consisted of extended applicability and tightened control measures to the Ozone Control Plan for the Chicago and Metro-East St. Louis areas.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources.

(A) Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart V; Air Oxidation Processes, Sections 218.520 Emission Limitations for Air Oxidation Processes, 218.522 Savings Clause, 218.523 Compliance, 218.524 Determination of Applicability, and 218.525 Emission Limitations for Air Oxidation Processes (Renumbered) at 18 Ill. Reg. 16972, effective November 15, 1994.

(B) Part 219: Organic Material Emissions Standards and Limitations for the Metro-East Area, Subpart V; Air Oxidation Processes, Sections 219.520 Emission Limitations for Air Oxidation Processes, 219.522 Savings Clause, 219.523 Compliance, 219.524 Determination of Applicability, and 219.525 Emission Limitations for Air Oxidation Processes (Renumbered) at 18 Ill. Reg. 17001, effective November 15, 1994.

(115) On May 5, 1995, and May 26, 1995, the State submitted an amended coating rule which consisted of a tightened applicability cut-off level for wood furniture coating operations to the Ozone Control Plan for the Chicago and Metro-East St. Louis areas.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources.

(A) Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart F; Coating Operations, Sections 218.208 Exemptions from Emission Limitations, Subsection (b), amended at 19 Ill. Reg. 6848, effective May 9, 1995.

(B) Part 219: Organic Material Emissions Standards and Limitations for the Metro-East Area, Subpart F; Coating Operations, Section 219.208 Exemptions from Emission Limitations, Subsection (b), amended at 19 Ill. Reg. 6958, effective May 9, 1995.

(116) On May 5, 1995, and May 26, 1995, the State submitted a rule for automotive/transportation and business machine plastic parts coating operations, which consisted of new volatile organic compound emission limitations to the Ozone Control Plan for the Chicago and Metro-East St. Louis areas.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources.

(A) Part 211: Definitions and General Provisions, Subpart B: Definitions, Sections 211.660 Automotive/Transportation Plastic Parts, 211.670 Baked Coatings, 211.820 Business Machine Plastic Parts, 211.1880 Electromagnetic Interference/Radio Frequency Interference Shielding Coatings, 211.1900 Electrostatic Prep Coat, 211.2360 Flexible Coatings, 211.2630 Gloss Reducers, 211.4055 Non-Flexible Coating, 211.4740 Plastic Part, 211.5480 Reflective Argent Coating, 211.5600 Resist Coat, 211.6060 Soft Coat, 211.6140 Specialty Coatings, 211.6400 Stencil Coat, 211.6580 Texture Coat, and 211.6880 Vacuum Metallizing,

amended at 19 Ill. 6823, effective May 9, 1995.

(B) Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart F; Coating Operations, Sections 218.204 Emission Limitations, Subsection (n) Plastic Parts Coating: Automotive/Transportation and (o) Plastic Parts Coating: Business Machine, 218.205 Daily-Weighted Average Limitations, Subsection (g), and 218.207 Alternative Emission Limitations, Subsection (i), amended at 19 Ill. 6848, effective May 9, 1995.

(C) Part 219: Organic Material Emissions Standards and Limitations for the Metro-East Area, Subpart F; Coating Operations, Section 219.204 Emission Limitations, Subsection (m) Plastic Parts Coating: Automotive/Transportation and (n) Plastic Parts Coating: Business Machine, 219.205 Daily-Weighted Average Limitations, Subsection (f), and 219.207 Alternative Emission Limitations, Subsection (h), amended at 19 Ill. Reg. 6958, effective May 9, 1995.

(117) On May 31, 1995, the State submitted amended lithographic printing rules which consisted of revised definitions, and revisions to the Ozone Control Plan for the Chicago and Metro-East St. Louis areas.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources.

(A) Part 211: Definitions and General Provisions, Subpart B: Definitions, Sections 211.474 Alcohol, 211.560 As-Applied Fountain Solution, 211.2850 Heatset Web Offset Lithographic Printing Line, 211.4065 Non-Heatset, 211.5980 Sheet-Fed added at 19 Ill. Reg. 6823, effective May 9, 1995.

(B) Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart H; Printing and Publishing, Sections 218.405 Lithographic Printing: Applicability, 218.406 Provisions Applying to Heatset Web Offset Lithographic Printing Prior to March 15, 1996, 218.407 Emissions Limitations and Control Requirements for Lithographic Printing Lines On and

After March 15, 1996, 218.408 Compliance Schedule for Lithographic Printing on and After March 15, 1996, 218.409 Testing for Lithographic Printing On and After March 15, 1996, 218.410 Monitoring Requirements for Lithographic Printing, 218.411 Recordkeeping and Reporting for Lithographic Printing added at 19 Ill. Reg. 6848, effective May 9, 1995.

(C) Part 219: Organic Material Emissions Standards and Limitations for the Metro-East Area, Subpart H; Printing and Publishing, Sections 219.405 Lithographic Printing: Applicability, 219.406 Provisions Applying to Heatset Web Offset Lithographic Printing Prior to March 15, 1996, 219.407 Emissions Limitations and Control Requirements for Lithographic Printing Lines On and After March 15, 1996, 219.408 Compliance Schedule for Lithographic Printing on and After March 15, 1996, 219.409 Testing for Lithographic Printing On and After March 15, 1996, 219.410 Monitoring Requirements for Lithographic Printing, 219.411 Recordkeeping and Reporting for Lithographic Printing added at 19 Ill. Reg. 6848, effective May 9, 1995.

(118) On October 24, 1994, the State submitted a site-specific revision to the State Implementation Plan establishing lubricant selection and temperature control requirements for Alumax Incorporated, Morris, Illinois facility's hot and cold aluminum rolling mills, as part of the Ozone Control Plan for the Chicago area.

(i) *Incorporation by reference.* September 1, 1994, Opinion and Order of the Illinois Pollution Control Board AS 92-13, effective September 1, 1994.

(119) On May 5, 1995, and May 26, 1995, the State submitted a revised rule tightening volatile organic compound emission limitations for certain surface coating operations in the Chicago and Metro-East St. Louis areas.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources.

(A) Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart F; Coating Operations, Sections 218.204 Emission Limitations, 218.205 Daily-Weighted

Average Limitations, 218.207 Alternative Emission Limitations, 218.208 Exemptions From Emission Limitations, 218.210 Compliance Schedule, 218.212 Cross-line Averaging to Establish Compliance for Coating Lines, 218.213 Recordkeeping and Reporting for Cross-line Averaging Participating Coating Lines, 218.214 Changing Compliance Methods, 218 Appendix H Baseline VOM Content Limitations for Subpart F, Section 218.212 Cross-Line Averaging, amended at 19 Ill. 6848, effective May 9, 1995.

(B) Part 219: Organic Material Emissions Standards and Limitations for the Metro-East Area, Subpart F; Coating Operations, Sections 219.204 Emission Limitations, 219.205 Daily-Weighted Average Limitations, 219.207 Alternative Emission Limitations, 219.208 Exemptions From Emission Limitations, 219.210 Compliance Schedule, 219.212 Cross-line Averaging to Establish Compliance for Coating Lines, 219.213 Recordkeeping and Reporting for Cross-line Averaging Participating Coating Lines, 219.214 Changing Compliance Methods, 219 Appendix H Baseline VOM Content Limitations for Subpart F, Section 219.212 Cross-line Averaging, amended at 19 Ill. Reg. 6958, effective May 9, 1995.

(120) On May 5, 1995, and May 31, 1995, the State of Illinois submitted a rule for motor vehicle refinishing operations, which consisted of new volatile organic material (VOM) emission limitations to the Ozone Control Plan for the Chicago and Metro East St. Louis areas. This State Implementation Plan revision contains rules which establish VOM content limits for certain coatings and surface preparation products used in automobile and mobile equipment refinishing operations in the Chicago and Metro-East area, as well as requires these operations to meet certain equipment and work practice standards to further reduce VOM.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources.

(A) Part 211: Definitions and General Provisions, Subpart B; Definitions,

Environmental Protection Agency

§ 52.750

Sections 211.240 Adhesion Promoter, 211.495 Anti-Glare/Safety Coating, 211.685 Basecoat/Clearcoat System, 211.1875 Elastomeric Materials, 211.3915 Mobile Equipment, 211.3960 Motor Vehicles, 211.3965 Motor Vehicle Refinishing, 211.5010 Precoat, 211.5061 Pretreatment Wash Primer, 211.5080 Primer Sealer, 211.5090 Primer Surfacer Coat, 211.6145 Specialty Coatings for Motor Vehicles, 211.6540 Surface Preparation Materials, 211.6620 Three or Four Stage Coating System, 211.6695 Topcoat System, 211.6720 Touch-Up Coating, 211.6860 Uniform Finish Blender, amended at 19 Ill. 6823, effective May 9, 1995.

(B) Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart HH; Motor Vehicle Refinishing, Sections 218.780 Emission Limitations, 218.782 Alternative Control Requirements, 218.784 Equipment Specifications, 218.786 Surface Preparation Materials, 218.787 Work Practices, 218.788 Testing, 218.789 Monitoring and Record keeping for Control Devices, 218.790 General Record keeping and Reporting, 218.791 Compliance Date, 218.792 Registration, amended at 19 Ill. 6848, effective May 9, 1995.

(C) Part 219: Organic Material Emissions Standards and Limitations for the Metro-East Area, Subpart HH; Motor Vehicle Refinishing, Sections 219.780 Emission Limitations, 219.782 Alternative Control Requirements, 219.784 Equipment Specifications, 219.786 Surface Preparation Materials, 219.787 Work Practices, 219.788 Testing, 219.789 Monitoring and Record keeping for Control Devices, 219.790 General Record keeping and Reporting, 219.791 Compliance Date 219.792 Registration, amended at 19 Ill. Reg. 6958, effective May 9, 1995.

(D) Sections 218.792 and 219.792 were repealed in 2013 and are removed without replacement; see paragraph (c)(201) of this section.

(121) On May 23, 1995, and June 7, 1995, the State submitted volatile organic compound control regulations for incorporation in the Illinois State Implementation Plan for ozone.

(i) *Incorporation by reference.* (A) Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission

Standards and Limitations for Stationary Sources, Part 211: Definitions and General Provisions, Subpart B: Definitions, Sections 211.695, 211.696, 211.5245, 211.6025. These sections were adopted on May 4, 1995, Amended at 19 Ill. Reg. 7344, and effective May 22, 1995.

(B) Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart V: 218.500, 218.501, 218.502, 218.503, 218.504, 218.505, 218.506. These sections were adopted on May 4, 1995, Amended at 19 Ill. Reg. 7359, and effective May 22, 1995.

(C) Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 219: Organic Material Emission Standards and Limitations for the Metro East Area, Subpart V: 219.500, 219.501, 219.502, 219.503, 219.504, 219.505, 219.506. These sections were adopted on May 4, 1995, Amended at 19 Ill. Reg. 7385, and effective May 22, 1995.

(122) On June 26, 1995, the Illinois Environmental Protection Agency (IEPA) submitted a State Implementation Plan (SIP) revision containing the 1992 enhancements to the Illinois vehicle inspection and maintenance (I/M) program. Such enhancements were originally developed to meet the I/M performance standard as called for in the United States Environmental Protection Agency's (USEPA's) proposed 'post-1987' I/M SIP policy and specified in the settlement agreement entered into by the parties in *Wisconsin v. Reilly*, Case No. 87-C-0395, E.D. Wis. The submittal includes authorizing legislation P.A. 86-1433, signed into law on September 12, 1990 and procedural rules published in the Illinois Register on June 26, 1992 at Volume 16, Issue #16.

(i) *Incorporation by reference.* (A) 35 Illinois Administrative Code 276; Sections 276.101, 276.102, 276.204, 276.206, 276.301, 276.303, 276.304, 276.307, 276.308, 276.309, 276.310, 276.311, 276.401, 276.402, 276.701, 276.702, and 276.703 amended or added at 16 Ill. Reg. 10230, effective June 15, 1992.

(ii) *Other material.* (A) Public Act 86-1433 adopted by the Illinois General Assembly on June 29, 1990, signed into law by Governor Edgar on September 12, 1990 effective September 12, 1990 (Sections 2,3, and 4) and January 1, 1991 (Section 1). (B) June 26, 1995 letter and attachments from the IEPA's Bureau of Air Chief to the USEPA's Regional Air and Radiation Division Director submitting Illinois' revision to the ozone SIP.

(123) On May 5, 1995, May 26, 1995, and May 31, 1995, the State of Illinois submitted miscellaneous revisions to its Volatile Organic Material (VOM) Reasonably Available Control Technology (RACT) rules contained in 35 Illinois Administrative Code Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, and Part 219: Organic Material Emission Standards and Limitations for the Metro East Area. These amendments clarify certain applicability provisions, control requirements, and compliance dates contained within these regulations. Also included in these amendments is an exemption for certain polyethylene foam packaging operations from VOM RACT requirements.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources.

(A) Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart A: General Provisions, Section 218.106; Subpart T: Pharmaceutical Manufacturing, Section 218.480; Subpart DD: Aerosol Can Filling, Section 218.686; Subpart RR: Miscellaneous Organic Chemical Process, Section 218.966; Subpart TT: Other Emission Units, Section 218.980. Amended at 19 Ill. Reg. 6848; effective May 9, 1995.

(B) Part 219: Organic Material Emission Standards and Limitations for the Metro East Area, Subpart T: Pharmaceutical Manufacturing, Section 219.480; Subpart TT: Other Emission Units, Section 219.980. Amended at 19 Ill. Reg. 6958, effective May 9, 1995.

(124) The State of Illinois requested a revision to the Illinois State Imple-

mentation Plan (SIP). This revision is for the purpose of establishing and implementing a Clean-Fuel Fleet Program in the Chicago ozone nonattainment area, which includes Cook, DuPage, Grundy (Aux Sable and Goose Lake townships only), Kane, Kendall (Oswego township only), Lake, McHenry, and Will counties, to satisfy the federal requirements for a Clean Fuel Fleet Program to be part of the SIP for Illinois.

(i) *Incorporation by reference.* (A) 35 Illinois Administrative Code 241; Sections 241.101, 241.102, 241.103, 241.104, 241.110, 241.111, 241.112, 241.113, 241.114, 241.115, 241.130, 241.131, 241.140, 241.141, 241.142, 241. Appendix A, 241. Appendix B adopted in R95-12 at 19 Ill. Reg. 13265, effective September 11, 1995.

(ii) *Other material.* (A) September 29, 1995 letter and attachments from the Illinois Environmental Protection Agency's Bureau of Air Chief to the USEPA's Regional Air and Radiation Division Director submitting Illinois' revision to the ozone SIP.

(125) On November 14, 1995 the State submitted requested revisions to the Illinois State Implementation Plan in the form of revisions to the definitions of Organic Material and Organic Materials, Organic Solvent, Petroleum Liquid and Volatile Organic Material (VOM) or Volatile Organic Compound (VOC) intended to exempt acetone from regulation as a VOC.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 211: Definitions and General Provisions, Subpart B: Definitions, Section 211.4250 Organic Material and Organic Materials, Section 211.4260 Organic Solvent, Section 211.4610 Petroleum Liquid, Section 211.7150 Volatile Organic Material (VOM) or Volatile Organic Compounds (VOC). Amended at 19 Ill. Reg. 15176, effective October 19, 1995.

(126) On November 15, 1995 the State submitted a requested revision to the Illinois State Implementation Plan in the form of a revision to the definition Volatile Organic Material (VOM) or

Environmental Protection Agency

§ 52.750

Volatile Organic Compound (VOC) intended to exempt parachlorobenzotrifluoride and cyclic, branched or linear completely methylated siloxanes from the definition of VOM or VOC and thereby, from regulation as a VOC.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 211: Definitions and General Provisions, Subpart B: Definitions, Section 211.7150 Volatile Organic Material (VOM) or Volatile Organic Compounds (VOC). Amended at 19 Ill. Reg. 11066, effective July 12, 1995.

(127) On October 21, 1993, and May 26, 1995, Illinois submitted volatile organic compound control regulations for incorporation in the Illinois State Implementation Plan for ozone.

(i) *Incorporation by reference.* (A) Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources, Part 219: Organic Material Emissions Standards and Limitations for Metro East Area, Subpart PP: 219.920, 219.923, 219.927, 219.928; Subpart QQ: 219.940, 219.943, 219.947, 219.948; Subpart RR: 219.960, 219.963, 219.967, 219.968; Subpart TT: 219.980, 219.983, 219.987, 219.988; and Subpart UU. These Subparts were adopted on September 9, 1993, Amended at 17 Ill. Reg. 16918, effective September 27, 1993.

(B) Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources, Part 219: Organic Material Emissions Standards and Limitations for Metro East Area, Subpart PP: 219.926; Subpart QQ: 219.946; Subpart RR: 219.966; and Subpart TT: 219.986. These Subparts were adopted on April 20, 1995, Amended at 19 Ill. Reg. 6958, effective May 9, 1995.

(128) On November 30, 1994, the State submitted volatile organic compound control regulations for incorporation in the Illinois State Implementation Plan for ozone.

(i) *Incorporation by reference.* (A) Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 211: Definitions and General Provisions, Subpart B: Definitions, Sections 211.2300, 211.3695. These sections were adopted on October 20, 1994, Amended at 18 Ill. Reg. 16929, and effective November 15, 1994.

(B) Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart B: 218.119, 218.120, 218.125, 218.127, 218.128, 218.129. These sections were adopted on October 20, 1994, Amended at 18 Ill. Reg. 16950, and effective November 15, 1994.

(C) Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 219: Organic Material Emission Standards and Limitations for the Metro East Area, Subpart B: 219.119, 219.120, 219.125, 219.127, 219.128, 219.129. These sections were adopted on October 20, 1994, Amended at 18 Ill. Reg. 16980, and effective November 15, 1994.

(129) [Reserved]

(130) On June 29, 1995, the State of Illinois submitted a revision to the State Implementation Plan (SIP) for the implementation of an enhanced motor vehicle inspection and maintenance (I/M) program in the Chicago and East St. Louis ozone nonattainment areas. This revision included the Vehicle Emissions Inspection Law of 1995 (625 ILCS 5/13B), P.A. 88-533, effective January 18, 1995; I/M regulations (R94-19 and R94-20) adopted on December 1, 1994, by the Illinois Pollution Control Board; February 29, 1996, Request-For-Proposals; April 22, 1996, letter of commitment; plus additional support documentation including modeling demonstration.

(i) *Incorporation by reference.* (A) Vehicle Emissions Inspection Law of 1995 (625 ILCS 5/13B), Public Act 88-533, signed into law by Governor Edgar on January 18, 1995 effective January 18, 1995.

(B) 35 Illinois Administrative Code 240; Sections 240.101, 240.102, 240.104, 240.105, 240.106, 240.107, 240.124, 240.125, 240.151, 240.152, 240.153, 240.161, 240.162, 240.163, 240.164, 240.171, 240.Table A, 240.Table B amended or added in R94-19 at 18 Ill. Reg. 18228, effective December 14, 1994.

(C) 35 Illinois Administrative Code 240; Sections 240.172, 240.173 amended in R94-20 at 18 Ill. Reg. 18013, effective December 12, 1994.

(ii) *Additional materials.* (A) February 29, 1996, Request-For-Proposals submitted on April 22, 1996.

(B) April 22, 1996, letter of commitment and attachments from IEPA's Bureau of Air Chief to the USEPA's Regional Air and Radiation Division Director.

(131) On January 10, 1996, the State of Illinois submitted a site-specific State Implementation Plan (SIP) revision request for ozone, which extends the required deadline for the Rexam Medical Packaging Inc. facility in Mundelein, Lake County, Illinois (Rexam), to comply with 35 Illinois Administrative Code, part 218, subpart H, as it applies to its Inline Press Number No.105, Inline Press No. 111, Offline 32-inch Press, Offline 36-inch Press, and Offline 42-inch press. The compliance date is extended from March 15, 1995, until June 15, 1996, or upon submittal of the "certificate of compliance" required under section 218.404 of subpart H, whichever occurs first. The variance includes a compliance plan requiring the installation and use of a catalytic oxidizer to control emissions from Inline Press No. 105, Inline Press No. 111, Offline 32-inch Press, and Offline 42-inch Press. The Offline 36-inch Press is required to convert to water-based ink, or be controlled by the oxidizer if the press is not converted by March 1, 1996. The variance is contingent upon certain compliance milestone conditions.

(i) *Incorporation by reference.* (A) Illinois Pollution Control Board Final Opinion and Order, PCB 95-99, adopted on October 19, 1995, and effective March 15, 1995. Certification of Acceptance dated November 29, 1996, by Rexam.

(132) On January 8, 1996, Illinois submitted a site-specific revision to the State Implementation Plan estab-

lishing lubricant selection and temperature control requirements for the hot and cold aluminum operations at Reynolds Metals Company's McCook Sheet and Plate Plant in McCook, Illinois (in Cook County), as part of the Ozone Control Plan for the Chicago area.

(i) *Incorporation by reference.* September 21, 1995, Opinion and Order of the Illinois Pollution Control Board AS 91-8, effective September 21, 1995.

(133) On July 23, 1996, the Illinois Environmental Protection Agency submitted a site-specific State Implementation Plan revision request for the Chase Products Company's Broadview (Cook County), Illinois facility located at 19th Street and Gardner Road, as part of the Ozone Control Plan for the Chicago area. The resulting revision revises the control requirements codified at 35 Illinois Administrative Code Part 218 Subpart DD Section 218.686 as they apply to the Chase Products Company's Broadview facility.

(i) *Incorporation by reference.* May 16, 1996, Opinion and Order of the Illinois Pollution Control Board AS 94-4, effective May 16, 1996.

(134) On May 5, 1995, and May 26, 1995, the State of Illinois submitted a State Implementation Plan revision request to the United States Environmental Protection Agency for reactor processes and distillation operation processes in the Synthetic Organic Chemical Manufacturing Industry as part of the State's control measures for Volatile Organic Material (VOM) emissions for the Chicago and Metro-East (East St. Louis) areas. VOM, as defined by the State of Illinois, is identical to "volatile organic compounds" (VOC), as defined by EPA. This plan was submitted to meet the Clean Air Act requirement for States to adopt Reasonably Available Control Technology rules for sources that are covered by Control Techniques Guideline documents. The EPA approves the State Implementation Plan revision request as it applies to Stepan Company's Millsdale Facility.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control

Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources.

(A) Part 211: Definitions and General Provisions, Subpart B: Definitions, 211.980 Chemical Manufacturing Process Unit, 211.1780 Distillation Unit, 211.2365 Flexible Operation Unit, 211.5065 Primary Product.

(B) Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart Q: Synthetic Organic Chemical and Polymer Manufacturing Plant, Sections 218.431 Applicability, 218.432 Control Requirements, 218.433 Performance and Testing Requirements, 218.434 Monitoring Requirements, 218.435 Recordkeeping and Reporting Requirements, 218.436 Compliance Date, 218 Appendix G, TRE Index Measurement for SOCMR Reactors and Distillation Units, amended at 19 Ill. Reg. 6848, effective May 9, 1995.

(135) On January 23, 1996, Illinois submitted a site-specific revision to the State Implementation Plan which relaxes the volatile organic material (VOM) content limit for fabricated product adhesive operations at Solar Corporation's Libertyville, Illinois facility from 3.5 pounds VOM per gallon to 5.75 pounds VOM per gallon.

(i) *Incorporation by reference.* July 20, 1995, Opinion and Order of the Illinois Pollution Control Board, AS 94-2, effective July 20, 1995.

(136) On January 9, 1997, Illinois submitted a site-specific revision to the State Implementation Plan which grants a temporary variance from certain automotive plastic parts coating volatile organic material requirements at Solar Corporation's Libertyville, Illinois facility.

(i) *Incorporation by reference.* September 5, 1996, Opinion and Order of the Illinois Pollution Control Board, PCB 96-239, effective September 13, 1996. Certificate of Acceptance signed September 13, 1996.

(137) Approval—On April 25, 1997, the Illinois Environmental Protection Agency submitted a revision to the State Implementation Plan for general conformity rules. The general conformity rules enable the State of Illinois to implement the general conformity requirements in the nonattainment or maintenance areas at the

State or local level in accordance with 40 CFR part 93, subpart B—Determining Conformity of General Federal Actions to State or Federal Implementation Plans.

(i) *Incorporation by reference.* (A) Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter 2: Environmental Protection Agency, Part 255 General Conformity: Criteria and Procedures. Adopted at 21 Ill. Reg. effective March 6, 1997.

(138) On May 5, 1995, and May 26, 1995, the State of Illinois submitted State Implementation Plan (SIP) revision requests for reactor processes and distillation operation processes in the Synthetic Organic Chemical Manufacturing Industry as part of the State's control measures for Volatile Organic Material emissions for the Metro-East (East St. Louis) area. This State Implementation Plan revision request is approved as it applies to Monsanto Chemical Group's Sauget Facility.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources.

(A) Part 211: Definitions and General Provisions, Subpart B: Definitions, 211.980 Chemical Manufacturing Process Unit, 211.1780 Distillation Unit, 211.2365 Flexible Operation Unit, 211.5065 Primary Product, amended at 19 Ill. Reg. 6823, effective May 9, 1995.

(B) Part 219: Organic Material Emission Standards and Limitations for the Metro East Area, Subpart Q: Synthetic Organic Chemical and Polymer Manufacturing Plant, Sections 219.431 Applicability, 219.432 Control Requirements, 219.433 Performance and Testing Requirements, 219.434 Monitoring Requirements, 219.435 Recordkeeping and Reporting Requirements, 219.436 Compliance Date, 219 Appendix G, TRE Index Measurement for SOCMR Reactors and Distillation Units, amended at 19 Ill. Reg. 6958, effective May 9, 1995.

(139) On September 8, 1997, the State of Illinois submitted tightened volatile

organic material rules for cold cleaning degreasing operations in the Chicago and the Metro-East ozone non-attainment areas.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources.

(A) Part 211: Definitions and General Provisions, Subpart B: Definitions, Section 211.1885, amended at 21 Ill. Reg. 7695, effective June 9, 1997.

(B) Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart E: Solvent Cleaning, Section 218.182, amended at 21 Ill. Reg. 7708, effective June 9, 1997.

(C) Part 219: Organic Material Emissions Standards and Limitations for the Metro-East Area, Subpart E: Solvent Cleaning, Section 219.182, amended at 21 Ill. Reg. 7721, effective June 9, 1997.

(140) On March 5, 1998, the State of Illinois submitted amended rules for the control of volatile organic material emissions from wood furniture coating operations in the Chicago and Metro-East (East St. Louis) ozone nonattainment areas, as a requested revision to the ozone State Implementation Plan. This plan was submitted to meet the Clean Air Act requirement for States to adopt Reasonably Available Control Technology rules for sources that are covered by Control Techniques Guideline documents.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources.

(A) Part 211: Definitions and General Provisions, Subpart B: Definitions, 211.1467 Continuous Coater, 211.1520 Conventional Air Spray, 211.6420 Strippable Spray Booth Coating, 211.7200 Washoff Operations, amended at 22 Ill. Reg. 3497, effective February 2, 1998.

(B) Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart F: Coating Operations 218.204 Emission Limitations, 218.205 Daily-weighted Average Limita-

tions, 218.210 Compliance Schedule, 218.211 Recordkeeping and Reporting, 218.215 Wood Furniture Coating Averaging Approach, 218.216 Wood Furniture Coating Add-On Control Use, 218.217 Wood Furniture Coating Work Practice Standards, amended at 22 Ill. Reg. 3556, effective February 2, 1998.

(C) Part 219: Organic Material Emission Standards and Limitations for the Metro East Area, Subpart F: Coating Operations 219.204 Emission Limitations, 219.205 Daily-weighted Average Limitations, 219.210 Compliance Schedule, 219.211 Recordkeeping and Reporting, 219.215 Wood Furniture Coating Averaging Approach, 219.216 Wood Furniture Coating Add-On Control Use, 219.217 Wood Furniture Coating Work Practice Standards, amended at 22 Ill. Reg. 3517, effective February 2, 1998.

(141) On November 14, 1995, May 9, 1996, June 14, 1996, and February 3, 1997, October 16, 1997, and October 21, 1997, the State of Illinois submitted State Implementation Plan (SIP) revision requests to meet commitments related to the conditional approval of Illinois' May 15, 1992, SIP submittal for the Lake Calumet (SE Chicago), McCook, and Granite City, Illinois, Particulate Matter (PM) nonattainment areas. The EPA is approving the portion of the SIP revision request that applies to the Granite City area. The SIP revision request corrects, for the Granite City PM nonattainment area, all of the deficiencies of the May 15, 1992, submittal.

(i) *Incorporation by reference.* (A) Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 212: Visible and Particulate Matter Emissions, Subpart A: General, Sections 212.107, 212.108, 212.109, 212.110; Subpart L: Particulate Matter from Process Emission Sources, Section 212.324; Subpart N: Food Manufacturing, Section 212.362; Subpart Q: Stone, Clay, Glass and Concrete Manufacturing, Section 212.425; Subpart R: Primary and Fabricated Metal Products and Machinery Manufacture, Sections 212.446, 212.458; Subpart S: Agriculture, Section 212.464. Adopted at 20 Illinois Register 7605, effective May 22, 1996.

Environmental Protection Agency

§ 52.750

(B) Joint Construction and Operating Permit: Application Number 95010005, Issued on October 21, 1997, to Granite City Division of National Steel Corporation.

(142) On May 5, 1995, and May 26, 1995, the State of Illinois submitted State Implementation Plan revision requests for reactor processes and distillation operations in the Synthetic Organic Chemical Manufacturing Industry as part of the State's control measures for Volatile Organic Material emissions for the Chicago and Metro-East (East St. Louis) areas. This plan was submitted to meet the Clean Air Act requirement for States to adopt Reasonably Available Control Technology rules for sources that are covered by Control Techniques Guideline documents.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources.

(A) Part 211: Definitions and General Provisions, Subpart B: Definitions, 211.980 Chemical Manufacturing Process Unit, 211.1780 Distillation Unit, 211.2365 Flexible Operation Unit, 211.5065 Primary Product, amended at 19 Ill. Reg. 6823, effective May 9, 1995.

(B) Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart Q: Synthetic Organic Chemical and Polymer Manufacturing Plant, Sections 218.431 Applicability, 218.432 Control Requirements, 218.433 Performance and Testing Requirements, 218.434 Monitoring Requirements, 218.435 Recordkeeping and Reporting Requirements, 218.436 Compliance Date, 218. Appendix G, TRE Index Measurement for SOCOMI Reactors and Distillation Units, amended at 19 Ill. Reg. 6848, effective May 9, 1995.

(C) Part 219: Organic Material Emission Standards and Limitations for the Metro East Area, Subpart Q: Synthetic Organic Chemical and Polymer Manufacturing Plant, Sections 219.431 Applicability, 219.432 Control Requirements, 219.433 Performance and Testing Requirements, 219.434 Monitoring Requirements, 219.435 Recordkeeping and Reporting Requirements, 219.436 Com-

pliance Date, 219. Appendix G, TRE Index Measurement for SOCOMI Reactors and Distillation Units, amended at 19 Ill. Reg. 6958, effective May 9, 1995.

(143) [Reserved]

(144) On September 3, 1997, the Illinois Environmental Protection Agency submitted a temporary, site specific State Implementation Plan revision request for the D.B. Hess Company, Incorporated's (DB Hess) lithographic printing operations located in Woodstock (McHenry County), Illinois. This variance took the form of a March 20, 1997, Opinion and Order of the Illinois Pollution Control Board issued in PCB 96-194 (Variance—Air). The variance which will expire on March 30, 1999, grants DB Hess a variance from 35 Illinois Administrative Code Sections 218.407(a)(1)(C),(D),(E) and 218.411(b)(1), (2) and (3) for heatset web offset presses 3, 4, and 5 which are located at the Woodstock (McHenry County), Illinois facility.

(i) *Incorporation by reference.* (A) March 20, 1997, Opinion and Order of the Illinois Pollution Control Board in PCB 96-194 (Variance—Air) which was effective on March 20, 1997 and expires on March 30, 1999.

(ii) The variance is subject to the following conditions (the dates specified indicate the latest start dates of compliance periods terminating on March 30, 1999, when presses 3, 4, and 5 must be replaced by complying presses or must be brought into compliance with the rules from which DB Hess seeks the variance):

(A) On or before March 20, 1997, the combined actual volatile organic material (VOM) emissions from all of the presses in the Woodstock plant shall not exceed 18 tons per year or 1.5 tons per month.

(B) On or before March 20, 1997, DB Hess shall use only cleaning solutions with VOM concentrations less than or equal to 30 percent by weight.

(C) On or before March 20, 1997, DB Hess shall use cleaning solutions on presses 3, 4, and 5 that have a VOM composite partial vapor pressure of less than 10 millimeters (mm) of Mercury (Hg) at 20 degrees Celsius. These cleaning solutions must comply with the requirements of 35 IAC 218.407(a)(4).

(D) On or before March 20, 1997, DB Hess shall store and dispose of all cleaning towels in closed containers.

(E) On or before May 5, 1997, DB Hess shall monitor presses 3, 4, and 5 pursuant to 35 IAC 218.410 (b), (c), and (e).

(F) On or before May 5, 1997, DB Hess shall use fountain solutions on presses 3, 4, and 5 that are less than 5 percent VOM by volume, as applied, and which contain no alcohol.

(G) On or before May 5, 1997, DB Hess shall prepare and maintain records pursuant to 35 IAC 218.411 (b), (c), and (d) for presses 3, 4, and 5 and must show compliance with the requirements of 35 IAC 218.407(a)(1) (C), (D), and (E) and with the requirements of 35 IAC 218.411(b) (1), (2), and (3) for these presses.

(H) On or before May 5, 1997, DB Hess shall submit quarterly reports to the Illinois Environmental Protection Agency's (IEPA's) Compliance and Systems Management Section demonstrating compliance with the terms of the Illinois Pollution Control Board Order.

(I) On or before March 30, 1998, DB Hess shall cease operation of press 3.

(J) On or before March 30, 1999, DB Hess shall either:

(1) Cease operation of presses 4 and 5, and notify the IEPA of such cessation; or

(2) Retrofit presses 4 and 5 or replace presses 4 and 5 in compliance with 35 IAC 218.407 (a)(1) (C), (D), and (E) and with 35 IAC 218.411(b) (1), (2), and (3). In this case:

(i) DB Hess must apply for and obtain necessary construction permits by March 30, 1998, or six months before retrofitting or replacing presses 4 and 5, whichever is earlier.

(ii) DB Hess must send monthly status reports, due the 15th day of each month, to the IEPA, covering the progress of the installation of the presses and control equipment and testing of the control equipment.

(K) On or before March 30, 1999, DB Hess shall cease operations at presses 3, 4, and 5 except for those presses for which it has obtained permits and installed controls, which have been tested and demonstrated to be in compliance with applicable rules.

(145) On September 16, 1998, the State of Illinois submitted amendments to Volatile Organic Material (VOM) rules affecting Illinois' ozone attainment area (the area of the State not including the Chicago and Metro-East ozone nonattainment areas). The amendments contain various deletions of obsolete provisions, changes of some word usage to comport Part 215 with other Illinois VOM regulations, and the addition of certain exemptions from VOM coating requirements.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources.

(A) Part 215: Organic Material Emission Standards and Limitations; Subpart A: General Provisions, 215.104 Definitions, 215.109 Monitoring for Negligibly-Reactive Compounds; Subpart F: Coating Operations, 215.204 Emission Limitations for Manufacturing Plants, 215.205 Alternative Emission Limitations, 215.206 Exemptions from Emission Limitations, 215.207 Compliance by Aggregation of Emissions Units, 215.211 Compliance Dates and Geographical Areas, 215.212 Compliance Plan, and 215.214 Roadmaster Emissions Limitations (Repealed); Subpart Z: Dry Cleaners, 215.601 Perchloroethylene Dry Cleaners (Repealed), 215.602 Exemptions (Repealed), 215.603 Leaks (Repealed), 215.604 Compliance Dates and Geographical areas (Repealed), 215.605 Compliance Plan (Repealed), and 215.606 Exception to Compliance Plan (Repealed), amended at 22 Ill. Reg. 11427, effective June 19, 1998.

(146) On February 13, 1998, the Illinois Environmental Protection Agency (IEPA) submitted a revision to the Illinois State Implementation Plan (SIP). This revision amends certain sections of the Clean-Fuel Fleet Program (CFFP) in the Chicago ozone nonattainment area to reflect that fleet owners and operators will have an additional year to meet the purchase requirements of the CFFP. The amendment changes the first date by which owners or operators of fleets must submit annual reports to IEPA from November 1, 1998 to November 1, 1999. In

Environmental Protection Agency

§ 52.750

addition, this revision corrects two credit values in the CFFP credit program.

(i) *Incorporation by reference.* (A) 35 Illinois Administrative Code 241; Sections 241.113, 241.130, 241.140, 241.Appendix B.Table A, 241.Appendix B.Table D adopted in R95-12 at 19 Ill. Reg. 13265, effective September 11, 1995; amended in R98-8, at 21 Ill. Reg. 15767, effective November 25, 1997.

(ii) *Other material.* (A) February 13, 1998, letter and attachments from the Illinois Environmental Protection Agency's Bureau of Air Chief to the United States Environmental Protection Agency's Regional Air and Radiation Division Director submitting Illinois' amendments to the Clean Fuel Fleet regulations as a revision to the ozone State Implementation Plan.

(147) On June 21, 1997, and December 9, 1998, the State of Illinois submitted regulations adopted by the Illinois Pollution Control Board and the Illinois Environmental Protection Agency and legislation adopted by the General Assembly and signed by the Governor related to Illinois' vehicle inspection and maintenance (I/M) program. The purpose of these submittals was to change the existing program from a basic I/M program to a fully enhanced I/M program. These changes modify the program in both the Chicago and Saint Louis (Illinois Portion) Ozone non-attainment areas.

(i) *Incorporation by reference.* (A) Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter k: Emission Standards and Limitations for Mobile sources, Part 240 Mobile Sources, Except for Section 240. Table C. Adopted at 22 Ill. Reg. 13723, effective July 13, 1998.

(B) Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter k: Emission Standards and Limitations for Mobile sources, Part 240 Mobile Sources, Section 240. Table C. Corrected at 22 Ill. Reg. 21120, effective July 13, 1998.

(C) Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter II:

Environmental Protection Agency, Part 276 Procedures to be Followed in the Performance of Inspections of Motor Vehicle Emissions. Amended at 22 Ill. Reg. 18867, effective September 28, 1998.

(ii) *Other materials.* (A) Transmittal letters dated June 21, 1997, and December 9, 1998.

(B) Public Act 90-475, effective August 17, 1997. This Act amends the Illinois Environmental Protection Act by changing Sections 3.32, 3.78, 21, and 22.15 and adding Sections 3.78a and 22.38.

(148) On October 13, 1998, the State of Illinois submitted a site-specific State Implementation Plan (SIP) revision affecting Volatile Organic Material controls at Central Can Company (CCC), located in Chicago, Illinois. The SIP revision allows CCC to apply can coating control rules to pail coating operations limited to certain conditions.

(i) *Incorporation by reference.* August 6, 1998, Opinion and Order of the Illinois Pollution Control Board, AS 94-18, effective July 1, 1991.

(149) On September 17, 1998, the Illinois Environmental Protection Agency submitted a site specific State Implementation Plan revision request for W.R. Grace and Company's facility, which manufactures container sealants, lubricant fluids, and concrete additives, and is located at 6050 West 51st Street in Chicago, Illinois (Cook County). This rule revision is contained in R98-16, the July 8, 1998, Opinion and Order of the Illinois Pollution Control Board, and consists of new Section 218.940(h), which exempts W.R. Grace's facility from the control requirements in 35 Illinois Administrative Code Part 218 Subpart QQ.

(i) *Incorporation by reference.* Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources, Part 218 Organic Material Emission Standards and Limitations for the Chicago Area, Subpart QQ: Miscellaneous Formulation Manufacturing Processes, Section 218.940 Applicability, paragraph (h) which was amended in R98-16 at 22 Ill. Reg. 14282, effective July 16, 1998.

(150) On November 14, 1995, May 9, 1996, June 14, 1996, February 1, 1999, and May 19, 1999, the State of Illinois submitted State Implementation Plan (SIP) revision requests to meet commitments related to the conditional approval of Illinois' May 15, 1992, SIP submittal for the Lake Calumet (Southeast Chicago), McCook, and Granite City, Illinois, Particulate Matter (PM) nonattainment areas. The EPA is approving the SIP revision request as it applies to the Lake Calumet area. The SIP revision request corrects, for the Lake Calumet PM nonattainment area, all of the deficiencies of the May 15, 1992, submittal.

(i) *Incorporation by reference.*

(A) Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 212: Visible and Particulate Matter Emissions, Subpart A: General, Section 212.113; Subpart E: Particulate Matter from Fuel Combustion Sources, Section 212.210; Subpart K: Fugitive Particulate Matter, Sections 212.302, 212.309, and 212.316. Adopted at 20 Illinois Register 7605, effective May 22, 1996.

(B) Federally Enforceable State Operating Permit—Special: Application Number 98120091, Issued on May 14, 1999, to LTV Steel Company, Inc.

(151) On July 23, 1998, the State of Illinois submitted a State Implementation Plan (SIP) revision that included certain “clean-up” amendments to the State's permitting rules.

(i) *Incorporation by reference.*

Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board.

(A) Subchapter A: Permits and General Provisions, Part 201: Permits and General Provisions.

(1) Subpart D: Permit Applications and Review Process, Section 201.152 Contents of Application for Construction Permit, 201.153 Incomplete Applications (Repealed), Section 201.154 Signatures (Repealed), Section 201.155 Standards for Issuance (Repealed), Section 201.157 Contents of Application for Operating Permit, Section 201.158 Incomplete Applications, Section 201.159

Signatures, 201.160 Standards for Issuance, Section 201.162 Duration, Section 201.163 Joint Construction and Operating Permits, and Section 201.164 Design Criteria. Amended at 22 Ill. Reg. 11451, effective June 23, 1998.

(2) Subpart E: Special Provisions for Operating Permits for Certain Smaller Sources, Section 201.180 Applicability (Repealed), Section 201.181 Expiration and Renewal (Repealed), Section 201.187 Requirement for a Revised Permit (Repealed), Repealed at 22 Ill. Reg. 11451, effective June 23, 1998.

(3) Subpart F: CAAPP Permits, Section 201.207 Applicability, Amended at 22 Ill. Reg. 11451, effective June 23, 1998.

(152) On February 5, 1998, the Illinois Environmental Protection Agency submitted a requested revision to the Illinois State Implementation Plan. This revision provided additional exemptions from State of Illinois permit requirements codified by the State at Part 201 of Title 35 of the Illinois Administrative Code (35 IAC Part 201). The revision also added a definition of “Feed Mill” to Part 211 of 35 IAC (35 IAC Part 211).

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter C: Emission Standards and Limitations for Stationary Sources.

(A) Part 211 Definitions and General Provisions, Subpart B: Definitions, Section 211.2285 Feed Mill. Added at 21 Ill. Reg. 7856, effective June 17, 1997.

(B) Part 201 Permits and General Conditions, Subpart C: Prohibitions, Section 201.146 Exemptions from State Permit Requirements. Amended at 21 Ill. Reg. 7878, effective June 17, 1997.

(153) On July 9, 1999, the State of Illinois submitted a site-specific State Implementation Plan (SIP) revision affecting Volatile Organic Material control requirements at Sun Chemical Corporation (Sun) in Northlake, Illinois. The SIP revision changes requirements for 17 resin storage tanks operated by Sun. Specifically, the SIP revision exempts the 17 tanks from the bottom or submerged fill pipe requirements, provided that no odor nuisance exists at the Sun Northlake facility,

and that the vapor pressures of materials stored in the tanks remain less than 0.5 pounds per square inch absolute at 70 degrees Fahrenheit.

(i) *Incorporation by reference.*

May 20, 1999, Opinion and Order of the Illinois Pollution Control Board, AS 99-4, effective May 20, 1999.

(155) On May 21, 1999, the Illinois Environmental Protection Agency submitted a temporary, site-specific revision to the State Implementation Plan (SIP) for sulfur dioxide (SO₂) for the Central Illinois Light Company's E.D. Edwards Generating Station in Peoria County, Illinois (CILCO Edwards). The SIP revision took the form of an April 15, 1999, Opinion and Order of the Illinois Pollution Control Board (PCB 99-80, Variance-Air). In this Opinion and Order, the IPCB granted CILCO Edwards a variance from 35 Illinois Administrative Code 214.141, and provided for a relaxation in the fuel quality limit for one of the facility's three boilers, but added an overall fuel quality limit and retained an overall SO₂ emissions cap for the three CILCO Edwards boilers. The variance will expire on February 28, 2002, unless CILCO applies to Illinois for a permanent SIP revision.

(i) *Incorporation by reference.* An April 15, 1999, Opinion and Order of the Illinois Pollution Control Board in PCB 99-80 (Variance-Air), granting a variance from 35 IAC 214.141 for Boiler No. 2 at the Central Illinois Light Company's E.D. Edwards Generating Station near Peoria, Illinois. The variance expires on February 28, 2002, unless CILCO applies to Illinois for a permanent SIP revision. If CILCO applies for a permanent SIP revision, and the IPCB allows CILCO Edwards' variance to continue unamended through July 31, 2003, as stated in the Opinion and Order, then federal approval of the variance will continue until EPA approves alternate SO₂ limits for CILCO Edwards, or until July 31, 2003, whichever is earlier.

(156) On May 8, 2001, the State submitted rules to control Oxides of Nitrogen emissions from electric generating units.

(i) *Incorporation by reference.* Title 35: Environmental Protection; Subtitle B: Air Pollution; Chapter I: Pollution

Control Board; Subchapter C: Emission Standards and Limitations for Stationary Sources; Part 217 Nitrogen Oxides Emissions; Subpart V: Electric Power Generation. Adopted at 25 Ill. Reg. 5914, effective April 17, 2001.

(157) On May 8, 2001, the Illinois Environmental Protection Agency submitted revisions to 35 Ill. Adm. Code 217, Subpart W: NO_x Trading Program for Electrical Generating Units with a request that these rules be incorporated into the Illinois State Implementation Plan. On June 11, 2001, the Illinois EPA submitted Section 9.9(f) of the Illinois Environmental Protection Act as revised by Public Act 92-012 (formerly House Bill 1599) which was approved by both Houses of the Illinois General Assembly on June 7, 2001, approved by the Governor on June 22, 2001, and became effective on July 1, 2001. Section 9.9(f) requires a May 31, 2004 final compliance date for 35 Ill. Adm. Code 215, Subparts T, U and W. This compliance date replaces the compliance date contained in Section 217.756(d)(3).

(i) *Incorporation by reference.* (A) Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter 1: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 217 Nitrogen Oxides Emissions, Subpart W: NO_x Trading Program for Electrical Generating Units except for 217.756(d)(3) which has been superseded by Section 9.9(f) of the Illinois Environmental Protection Act. Added at 25 Ill. Reg. 128, January 25, 2001, effective December 26, 2000.

(B) Section 9.9(f) of the Illinois Environmental Protection Act. Adopted by both Houses of the Illinois General Assembly as part of Public Act 92-0012 (previously House Bill 1599) on May 31, 2001, approved by the Governor of Illinois on June 22, 2001, effective July 1, 2001.

(158) On December 16, 1997, Bharat Mathur, Chief, Bureau of Air, Illinois Environmental Protection Agency, submitted rules for a cap and trade program regulating volatile organic compound emissions in the Chicago area. By letter dated August 23, 2001, the state requested that USEPA defer rulemaking on section 205.150(e), which

exempts new and modified sources obtaining offsets under the trading program from the requirements for traditional, full year offsets.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35, Subtitle B, Chapter I, subchapter b, Part 205, entitled Emissions Reduction Market System, adopted November 20, 1997, effective November 25, 1997, except section 205.150(e).

(159) On April 9, 2001, David Kolaz, Chief, Bureau of Air, Illinois Environmental Protection Agency, submitted rules regulating NO_x emissions from cement kilns. On May 1, 2001, Mr. Kolaz submitted rules regulating NO_x emissions from industrial boilers and turbines and requesting two minor revisions to the Illinois NO_x emissions budget. On June 18, 2001, Mr. Kolaz submitted a demonstration that Illinois' regulations were sufficient to assure that NO_x emissions in Illinois would be reduced to the level budgeted for the state by USEPA. On September 20, 2001, Mr. Kolaz sent a letter clarifying that Illinois' rules for industrial boilers and turbines require compliance on a unit-by-unit basis.

(i) *Incorporation by reference.* (A) Illinois Administrative Code, Title 35, Subtitle B, Chapter I, subchapter c, Part 211, Definitions, sections 211.955, 211.960, 211.1120, 211.3483, 211.3485, 211.3487, 211.3780, 211.5015, and 211.5020, published at 25 Ill. Reg. 4582, effective March 15, 2001.

(B) Illinois Administrative Code, Title 35, Subtitle B, Chapter I, subchapter c, Part 217, Subpart A, Section 217.104, Incorporations by Reference, published at 25 Ill. Reg. 4597, effective March 15, 2001.

(C) Illinois Administrative Code, Title 35, Subtitle B, Chapter I, subchapter c, Part 217, Subpart T, Cement Kilns, sections 217.400, 217.400, 217.402, 217.404, 217.406, 217.408, and 217.410, published at 25 Ill. Reg. 4597, effective March 15, 2001.

(D) Illinois Administrative Code, Title 35, Subtitle B, Chapter I, subchapter c, Part 211, Sections 211.4067 and 211.6130, published at 25 Ill. Reg. 5900, effective April 17, 2001.

(E) Illinois Administrative Code, Title 35, Subtitle B, Chapter I, subchapter c, Part 217, Subpart U, NO_x

Control and Trading Program for Specified NO_x Generating Units, sections 217.450, 217.452, 217.454, 217.456, 217.458, 217.460, 217.462, 217.464, 217.466, 217.468, 217.470, 217.472, 217.474, 217.476, 217.478, 217.480 and 217.482, published at 25 Ill. Reg. 5914, effective April 17, 2001.

(ii) *Additional material.* (A) Letter dated June 18, 2001, from David Kolaz, Illinois Environmental Protection Agency, to Cheryl Newton, United States Environmental Protection Agency.

(B) Letter dated September 20, 2001, from David Kolaz, Illinois Environmental Protection Agency, to Bharat Mathur, United States Environmental Protection Agency.

(160) On March 21, 2001, Illinois submitted revisions to volatile organic compound rules for Formel Industries, Incorporated in Cook County, Illinois. The revisions consist of a January 18, 2001 Opinion and Order of the Illinois Pollution Control Board in the Matter of: Petition of Formel Industries, Inc. for an Adjusted Standard from 35 ILL. ADM. CODE 218.401(a),(b) and (c): AS 00–13 (Adjusted Standard Air). This Opinion and Order grants Formel Industries, Incorporated an adjusted standard to the Flexographic Printing Rule. The adjusted standard requirements include participation in a market-based emissions trading system, maintaining daily records, conducting trials of compliant inks, and reviewing alternate control technologies.

(i) *Incorporation by reference.* Volatile organic compound emissions limits contained in a January 18, 2001 Opinion and Order of the Illinois Pollution Control Board in the Matter of: Petition of Formel Industries, Inc. for an Adjusted Standard from 35 ILL. ADM. CODE 218.401(a), (b) and (c): AS 00–13 (Adjusted Standard-Air). This Opinion and Order was adopted by the Illinois Pollution Control Board on January 18, 2001. It became effective under State law on January 18, 2001.

(161) On March 28, 2001, Illinois submitted revisions to volatile organic compound rules for Bema Film Systems, Incorporated in DuPage County, Illinois. The revisions consist of AS 00–11, an adjusted standard to the Flexographic Printing Rule, 35 IAC 218.401 (a), (b), and (c). The adjusted standard

Environmental Protection Agency

§ 52.750

requirements include reducing the allotment baseline for the Illinois market-based emissions trading system, maintaining daily records, conducting trials of compliant inks, and reviewing alternate control technologies.

(i) *Incorporation by reference.* AS 00-11, an adjusted standard from the Volatile Organic Compound emission limits for Bema Film Systems, Inc. contained in Illinois Administrative Code Title 35: Environmental Regulations for the State of Illinois, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 218.401 (a), (b), and (c). Effective on January 18, 2001.

(ii) *Other material.* (A) November 14, 2001, letter from Dennis A. Lawler, Manager, Division of Air Pollution Control, Illinois Environmental Protection Agency to Jay Bortzer, Chief, Regulation Development Section, Air and Radiation Division, USEPA, Region 5, indicating that the effective date of the adjusted standard for Bema Film Systems, Inc. AS 00-11, is January 18, 2001, the date that AS 00-11 was adopted by the Illinois Pollution Control Board.

(162) On March 28, 2001, Illinois submitted revisions to volatile organic compound rules for Vonco Products, Incorporated in Lake County, Illinois. The revisions consist of AS 00-12, an adjusted standard to the Flexographic Printing Rule, 35 IAC 218.401 (a), (b), and (c). The adjusted standard requirements include reducing the allotment baseline for the Illinois market-based emissions trading system, maintaining daily records, conducting trials of compliant inks, and reviewing alternate control technologies.

(i) *Incorporation by reference.* AS 00-12, an adjusted standard from the Volatile Organic Compound emission limits applicable to Vonco Products, Inc. contained in Illinois Administrative Code Title 35: Environmental Regulations for the State of Illinois, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 218.401 (a), (b), and (c). Effective on January 18, 2001.

(ii) *Other material.* (A) November 14, 2001, letter from Dennis A. Lawler,

Manager, Division of Air Pollution Control, Illinois Environmental Protection Agency to Jay Bortzer, Chief, Regulation Development Section, Air and Radiation Division, USEPA, Region 5, indicating that the effective date of the adjusted standard for Vonco Products, Inc. AS 00-12, is January 18, 2001, the date that AS 00-12 was adopted by the Illinois Pollution Control Board.

(163) [Reserved]

(164) On October 9, 2001, the State of Illinois submitted new rules regarding emission tests.

(i) *Incorporation by reference.* (A) New rules of 35 Ill. Admin. Code Part 283, including sections 283.110, 283.120, 283.130, 283.210, 283.220, 283.230, 283.240, and 283.250, effective September 11, 2000, published in the Illinois Register at 24 Ill. Reg. 14428.

(B) Revised section 283.120 of 35 Ill. Admin. Code, correcting two typographical errors, effective September 11, 2000, published in the Illinois Register at 25 Ill. Reg. 9657.

(165) On April 8, 1999, the Illinois Environmental Protection Agency submitted revisions to particulate matter control requirements for rural grain elevators in Illinois. The revised requirements exempt rural grain elevators from certain particulate matter control requirements.

(i) *Incorporation by reference.* Revised grain elevator provisions in Section 9(f) of the Illinois Environmental Protection Act. Adopted by both Houses of the Illinois General Assembly as Public Act 89-491 (previously Senate Bill 1633) on April 25, 1996, approved by the Governor of Illinois on May 23, 1996, effective June 21, 1996.

(166) On November 6, 2001, the State of Illinois submitted revisions to its emission reporting rules, restructuring these rules and adding hazardous air pollutant emission reporting for sources in Illinois' Emission Reduction Market System.

(i) *Incorporation by reference.* (A) Revised rules of 35 Ill. Admin. Code Part 254, including new or amended sections 254.101, 254.102, 254.103, 254.120, 254.132, 254.134, 254.135, 254.136, 254.137, 254.138, 254.203, 254.204, 254.303, 254.306, and 254.501, effective July 17, 2001, retention of section 254.133, and the repeal of

other previously approved sections of 35 Ill. Admin. Code 254. Amended or adopted at 25 Ill. Reg. 9856. Effective July 17, 2001.

(167) On August 31, 1998, Illinois submitted revisions to its major stationary sources construction and modification rules (NSR Rules) as a State Implementation Plan revision request. These revisions apply only in areas in Illinois that have been designated as being in serious or severe nonattainment with the national ambient air quality standards for ozone.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter A: Permits and General Provisions, Part 203 Major Stationary Sources Construction and Modification, Subpart B: Major Stationary Sources in Nonattainment Areas, Section 203.206 Major Stationary Source and Section 203.207 Major Modification of a Source; and, Subpart C: Requirements for Major Stationary Sources in Nonattainment Areas, Section 203.301 Lowest Achievable Emissions Rate. Amended in R98-10 at 22 Ill. Reg. 5674, effective March 10, 1998.

(168) On October 31, 2003, the Illinois Environmental Protection Agency submitted revisions to the Illinois State Implementation Plan for ozone. The submittal revises the definition for volatile organic material (VOM) or volatile organic compound (VOC) contained in 35 Ill. Adm. Code 211.7150 to incorporate an exemption for perchloroethylene (tetrachloroethylene); 3,3-dichloro-1,1,1,2,2-pentafluoropropane (HCFC-225ca); 1,3-dichloro-1,1,2,2,3-pentafluoropropane (HCFC-225cb); decafluoropentane (HFC 43-10mee); difluoromethane (HFC-32); ethylfluoride (HFC-161); 1,1,1,3,3,3-hexafluoropropane (HFC-236fa); 1,1,2,2,3-pentafluoropropane (HFC-245ca); 1,1,2,3,3-pentafluoropropane (HFC-245ea); 1,1,1,2,3-pentafluoropropane (HFC-245eb); 1,1,1,3,3-pentafluoropropane (HFC-245fa); 1,1,1,2,3,3-hexafluoropropane (HFC-236ea); 1,1,1,3,3-pentafluorobutane (HFC-365mfc); chlorofluoromethane (HCFC-31); 1,2-dichloro-1,1,2-trifluoroethane (HCFC-123a); 1-chloro-

1-fluoroethane (HCFC-151a); 1,1,1,2,2,3,3,4,4-nonafluoro-4-methoxybutane (C₄F₉OCH₃); 2-(difluoromethoxymethyl)-1,1,1,2,3,3,3-heptafluoropropane ((CF₃)₂CF₂CF₂OCH₃); 1-ethoxy-1,1,2,2,3,3,4,4-nonafluorobutane (C₄F₉OC₂H₅); 2-(ethoxydifluoromethyl)-1,1,1,2,3,3,3-heptafluoropropane ((CF₃)₂CF₂CF₂OC₂H₅); and methyl acetate from the definition of VOM or VOC and thereby, from regulation as ozone precursors.

(i) *Incorporation by reference.* (A) Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter 1: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 211: Definitions and General Provisions, Subpart B: Definitions, Section 211.7150 Volatile Organic Material (VOM) or Volatile Organic Compound (VOC), amended at 22 Illinois Register 11405, effective June 22, 1998.

(169) On June 20, 2003, Illinois submitted an Adjusted Standard for Ford Motor Company's Chicago Assembly Plant. This Adjusted Standard from 35 Ill. Adm. Code 218.986 replaces those requirements with the control requirements in the Illinois Pollution Control Board's November 21, 2002, Order.

(i) *Incorporation by reference.* (A) The Illinois Pollution Control Board's November 21, 2002, Opinion and Order which granted the Ford Motor Company's Chicago Assembly Plant an adjusted standard (AS 02-3) from 35 Ill. Adm. Code 218.986. The requirements in 35 Ill. Adm. Code 218.986 have been replaced by the requirements in the Illinois Pollution Control Board's November 21, 2002, Order.

(170) On May 28, 2003, Illinois submitted an amendment to its leather coating rules for the Horween Leather Company's Chicago leather manufacturing facility. This adds a test method in Section 218.112(a)(26) and a new Section 35 Ill. Adm. Code 218.929. These amendments were incorporated in the Illinois Pollution Control Board's February 20, 2003, Final Order R02-20.

(i) *Incorporation by reference.* Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control

Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources, Part 218 Organic Material Emission Standards and Limitations for the Chicago Area.

(A) Subpart A: General Provisions, Section 218.112 Incorporations by Reference, (a) American Society for Testing and Materials, 100 Barr Harbor Drive, West Conshohocken, PA 19428-9555, 26) ASTM D2099-00. Amended at 27 Ill. Reg. 7283, effective April 8, 2003.

(B) Subpart PP: Miscellaneous Fabricated Product Manufacturing Processes, Section 218.929 Cementable and Dress or Performance Shoe Leather. Added at 27 Ill. Reg. 7283, effective April 8, 2003.

(171) On July 29, 2003, the Illinois Environmental Protection Agency submitted a site-specific revision to the State Implementation Plan (SIP) for sulfur dioxide (SO₂) for the Central Illinois Light Company's E.D. Edwards Generating Station, now known as AmerenEnergy Resources Generating Company, Edwards Power Plant, in Bartonville, Peoria County, Illinois.

(i) Incorporation by reference.

Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter 1: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources, Part 214: Sulfur Limitations, Subpart X: Utilities Section 214.561 E.D. Edwards Electric Generating Station which was amended at 27 *Illinois Register* 12101, effective July 11, 2003.

(172) On September 19, 2003, Illinois submitted a site-specific revision to the State Implementation Plan which relaxes the volatile organic material (VOM) content limit for the coating operations at Louis Berkman Company, d/b/a/ the Swenson Spreader Company's Lindenwood, Ogle County, Illinois facility from 3.5 pounds VOM per gallon to a monthly average of 4.75 pounds VOM per gallon until May 7, 2008.

(i) *Incorporation by reference.* Order contained in a May 7, 1998, Opinion and Order of the Illinois Pollution Control Board, AS 97-5, effective May 7, 1998.

(173) On March 11, 2004, Illinois submitted an Adjusted Standard for Argonne National Laboratory's

degreasing operations. Pursuant to this Adjusted Standard from 35 Ill. Adm. Code 218.182, the applicable vapor pressure and other associated requirements of 35 Ill. Code 218.182 do not apply to cold cleaning involving the preparation of sample materials and associated apparatus used for research and development testing and analysis at Argonne. These revised requirements were adopted in the Illinois Pollution Control Board's December 18, 2003, Adjusted Standard AS 03-4.

(i) *Incorporation by reference.* (A) The Illinois Pollution Control Board's December 18, 2003, Opinion and Order which granted the Argonne National Laboratory's degreasing operations an Adjusted Standard (AS 03-4) from 35 Ill. Code 218.182 for its cold cleaning involving the preparation of sample materials and associated apparatus used for research and development testing and analysis at Argonne.

(174) [Reserved]

(175) On January 4, 2006, Illinois submitted a site-specific State Implementation Plan revision for the Ford Motor Company (Ford) Chicago Assembly Plant. The revision allows Ford to discontinue use of its Stage II vapor recovery system and requires instead that Ford comply with federal onboard refueling vapor recovery regulations and other conditions.

(i) Incorporation by reference.

(A) September 1, 2005, Opinion and Order of the Illinois Pollution Control Board, AS 05-5, effective September 1, 2005.

(176) On June 14, 2004, Illinois submitted revisions to volatile organic compound rules for Formel Industries, Incorporated in Cook County, Illinois. The revisions consist of withdrawing an adjusted standard to the Flexographic Printing Rule. Formel Industries has installed a control device and is complying with the Flexographic Printing Rule.

(i) *Incorporation by reference.* An April 15, 2004, Supplemental Opinion and Order of the Illinois Pollution Control Board AS 00-13, terminating Formel's previously issued (January 18, 2001) adjusted standard from the Flexographic Printing Rule, effective April 15, 2004.

(177) On May 31, 2006, the Illinois Environmental Protection Agency submitted a requested revision to the Illinois State Implementation Plan. This revision provides additional exemptions from State of Illinois permit requirements codified by the State at Part 201 of Title 35 of the Illinois Administrative Code (35 IAC Part 201).

(i) Incorporation by reference.

Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter a: Permits and General Provisions, Part 201 Permits and General Provisions, Subpart C: Prohibitions, Section 201.146 Exemptions from State Permit Requirements paragraphs (hhh), (iii), (jjj), (kkk), and (lll). Amended at 30 Ill. Reg. 4901, effective March 3, 2006.

(178) On September 14, 2007, the Illinois Environmental Protection Agency submitted rules and related material to address requirements under the Clean Air Interstate Rule. These rules mandate participation of electric generating units in EPA-run trading programs for annual emissions of sulfur dioxide, annual emissions of nitrogen oxides, and ozone season emissions of nitrogen oxides. These rules provide a methodology for allocating allowances to subject sources and require these sources to hold sufficient allowances to accommodate their emissions and to meet various monitoring, record-keeping, and reporting requirements. EPA is approving the submitted provisions of Subparts A, C, D, and E of Part 225 of Title 35 of Illinois Administrative Code; EPA is deferring action on Subpart F.

(i) Incorporation by reference.

(A) Title 35 of the Illinois Administrative Code: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Part 225: Control of Emissions from Large Combustion Sources, effective August 31, 2007, including Subpart A: General Provisions, Subpart C: Clean Air Act Interstate Rule (CAIR) SO₂ Trading Program, Subpart D: CAIR NO_x Annual Trading Program, and Subpart E: CAIR NO_x Ozone Season Trading Program.

(179) On October 31, 2003, the Illinois Environmental Protection Agency submitted rules and related materials to

address site-specific requirements for Cromwell-Phoenix, Incorporated, located in Alsip, Illinois. These rules establish an adjusted standard for the corrosion inhibiting packaging production facility of Cromwell-Phoenix, Incorporated located at this source site. These rules provide a site-specific adjusted standard for this source facility for volume 35 of the Illinois Administrative Code subpart F section 218.204(c). The adjusted standard gives the corrosion inhibiting paper coating lines at the Alsip facility an adjusted volatile organic material (volatile organic compounds) content limit for paper coatings, and places an annual limit on the volatile organic material emissions from the Alsip facility as a whole. The adjusted standard also establishes source administration and reporting requirements for Cromwell-Phoenix, Incorporated Alsip facility. EPA is approving this site-specific adjusted standard as a revision of the Illinois state implementation plan.

(i) Incorporation by reference.

(A) September 18, 2003, Opinion and Order of the Illinois Pollution Control Board, AS 03–5, effective September 18, 2003.

(180) On January 10, 2007, Illinois submitted revisions to its rules for the Emission Reduction Market System. These revisions assure that sources in the Chicago area with potential emissions of VOC between 25 and 100 tons per year will remain subject to the program, irrespective of changes in the area's ozone nonattainment classification or designation and any associated changes in whether such sources are defined to be major sources. EPA is again deferring action on section 205.150(e).

(i) Incorporation by reference.

(A) Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter b: Alternative Reduction Program, Part 205 Emissions Reduction Market System, Sections:

205.120	Abbreviations and Acronyms
205.130	Definitions
205.150	Emissions Management Periods (except for 205.150(e))
205.200	Participating Source

(181) On August 17, 2005 and January 29, 2008, Illinois submitted revised regulations that are consistent with 40 CFR 51.100(s)(1), as amended by 69 FR 69298. The compounds 1,1,1,2,2,3,3-heptafluoro-3-methoxypropane ($n\text{-C}_3\text{F}_7\text{OCH}_3$), 3-ethoxy 1,1,1,2,3,4,4,5,5,6,6,6-dodecafluoro-2-(trifluoromethyl)hexane (HFE-7500), 1,1,1,2,3,3,3-heptafluoropropane (HFC-227ea), and methyl formate were added to the list of negligibly reactive compounds excluded from the definition of VOM in 35 IAC 211.7150(a). Tertiary-butyl acetate is also listed in 35 IAC 211.7150(a) with a notation that it must also meet the requirements of 35 IAC 211.7150(e), which state that tertiary-butyl acetate is considered a VOC for recordkeeping, emissions reporting, modeling, and inventory requirements, but is not considered a VOC for emission limits or content requirements.

(i) *Incorporation by reference.*

(A) Illinois Administrative Code Title 35: Environmental Protection, Part 211: Definitions and General Provisions, Subpart B: Definitions, Section 211.7150: Volatile Organic Matter (VOM) or Volatile Organic Compound (VOC), Subsections 211.7150(a) and 211.7150(e). Effective January 16, 2008.

(182) On January 29, 2008, Illinois submitted revised regulations that are consistent with 40 CFR 51.100(s)(1), as

amended by 72 FR 2193. The compound 1,1,1,2,2,3,4,5,5,5-decafluoro-3-methoxy-4-trifluoromethyl-pentane (HFE-7300) was added to the list of negligibly reactive compounds excluded from the definition of VOM in 35 IAC 211.7150(a).

(i) *Incorporation by reference.*

(A) Illinois Administrative Code Title 35: Environmental Protection, Part 211: Definitions and General Provisions, Subpart B: Definitions, Section 211.7150: Volatile Organic Matter (VOM) or Volatile Organic Compound (VOC), Subsection 211.7150(a). Effective January 16, 2008.

(183) On January 24, 2008, the Illinois Environmental Protection Agency submitted a revision to its state implementation plan for the packaging production facility of CP-D Acquisition Company, LLC. The revision changes the source name from Cromwell-Phoenix, Incorporated, to CP-D Acquisition Company, LLC.

(i) *Incorporation by reference.*

(A) November 20, 2003, Supplemental Opinion and Order of the Illinois Pollution Control Board, AS 03-05, effective November 20, 2003.

(184) On October 23, 2007, the Illinois Environmental Protection Agency submitted revisions to its State implementation plan for the Oxides of Nitrogen (NO_x) SIP Call Phase II. The State has submitted revisions to 35 Illinois Administrative Code (Ill. Adm. Code) Parts 211 and 217. The rules pertain to definitions and general provisions, and control of Nitrogen Oxides (NO_x), respectively. The rules satisfy the requirements of EPA's NO_x SIP Call Phase II Rule (the Phase II Rule).

(i) *Incorporation by reference.* (A) Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 211: Definitions and General Provisions, Subpart B: Definitions, Sections: 211.740 Brakehorsepower; 211.1740 Diesel Engine; 211.1920 Emergency or Standby Unit; 211.3300 Lean-burn Engine; and 211.5640 Rich-burn Engine; effective September 25, 2007. (B) Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board,

Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 217: Nitrogen Dioxide Emissions, Subpart A: General Provisions, Sections: 217.101 Measurement Methods; 217.102 Abbreviation and Units; Subpart Q: Stationary Reciprocating Internal Combustion Engines and Turbines, Sections 217.386 Applicability; 217.388 Control and Maintenance Requirements; 217.390 Emissions Averaging Plan; 217.392 Compliance; 217.394 Testing and Monitoring; 217.396 Recordkeeping and Reporting; and 217 Appendix G: Existing Reciprocating Internal Combustion Engines Affected by the NO_x SIP Call; *effective September 25, 2007.*

(ii) *Additional material.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 217: Nitrogen Dioxide Emissions, Subpart A: General Provisions, Section 217.104 Incorporation by Reference; *effective September 25, 2007.*

(185) On December 7, 2009, Illinois submitted a rule for the sunset of the provisions of 35 IAC 217 Subpart W, regulating electric generating unit participation in the NO_x Budget Trading Program, since these provisions have been superseded by provisions established pursuant to the Clean Air Interstate Rule.

(i) *Incorporation by reference.* The Illinois rule at 35 IAC 217.751, entitled “Sunset Provisions,” submitted on December 7, 2009, *effective on November 2, 2009*, is incorporated by reference.

(186) On July 17, 2009, Illinois submitted amendments to its pharmaceutical manufacturing rules for approval into its state implementation plan. These amendments consist of a site-specific rulemaking for certain of Abbott Laboratories’ (Abbott) tunnel dryers and fluid bed dryers.

(i) *Incorporation by reference.*

(A) Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart T: Pharmaceutical Manufacturing,

Section: 218.480 Applicability, *effective August 26, 2008.*

(ii) *Additional material.*

(A) Letter from Laurel L. Kroack, Illinois Environmental Protection Agency, to Cheryl Newton, EPA, dated May 12, 2010, with attachments, that establishes how compliance with Abbott’s 20.6 tons VOC per year limit is determined as well as Abbott’s record-keeping requirements.

(187) On October 25, 2010, Illinois submitted revised regulations that are consistent with 40 CFR 51.100(s)(1), as amended by 74 FR 3437. The compounds propylene carbonate and dimethyl were added to the list of negligibly reactive compounds excluded from the definition of VOC in 35 IAC 211.7150(a).

(i) *Incorporation by reference.* Illinois Administrative Code Title 35: Environmental Protection, Part 211: Definitions and General Provisions, Section 211.7150: Volatile Organic Matter (VOM) or Volatile Organic Compound (VOC), Subsection 211.7150(a). *Effective January 11, 2010.*

(188) On November 8, 2010, the Illinois Environmental Protection Agency submitted a revision to its state implementation plan. The revision to the SIP allows an adjusted standard to the general rule, Use of Organic Material Rule, known as the eight pound per hour (8 lb/hr) rule, for volatile organic matter, for Royal Fiberglass Pools, Inc. manufacturing facility located in Dix, Illinois. The adjusted standard is that 35 Ill. Adm. Code 217.301 does not apply to VOM emissions from Royal’s Dix, Illinois facility. The facility is subject to emission limit requirements set forth in the MACT under 40 CFR 63 subpart WWW finalized in 68 FR 19402, April 21, 2003.

(i) *Incorporation by reference.* (A) February 18, 2010, Opinion and Order of the Illinois Pollution Control Board, AS-09-04, *effective February 18, 2010.*

(189) On July 29, 2010, September 16, 2011 and September 29, 2011 Illinois submitted VOM RACT rules for the Chicago and Metro-East St. Louis 8-hour ozone nonattainment areas. These rules are consistent with the Control Technique Guideline documents issued by EPA in 2006, 2007 and 2008 and satisfy the RACT requirements of the Act.

Environmental Protection Agency

§ 52.750

On February 28, 2011, Illinois EPA submitted a confirmation that the sewage treatment plant exemption in Subpart TT of Parts 218 and 219 does not apply to industrial wastewater. This clarification clearly establishes that VOM emissions from major non-CTG industrial wastewater operations are regulated by Subpart TT.

(i) *Incorporation by reference.* The following sections of Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter 1: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, are incorporated by reference:

(A) Part 211: Definitions and General Provisions, Sections 211.1000, 211.1745, 211.1878, 211.1885, 211.2359, 211.2368, 211.2615, 211.2830, 211.2840, 211.2965, 211.3215, 211.3305, 211.3555, 211.3705, 211.3707, 211.4065, 211.5335, 211.5535, 211.5585, 211.5860, 211.5875, 211.5885, 211.6405, 211.6425, 211.6535, 211.7290; effective June 25, 2010.

(B) Part 211: Definitions and General Provisions, Sections 211.101, 211.102, 211.200, 211.233, 211.235, 211.260, 211.481, 211.492, 211.540, 211.715, 211.735, 211.820, 211.825, 211.880, 211.954, 211.965, 211.1128, 211.1455, 211.1560, 211.1565, 211.1655, 211.1700, 211.1872, 211.1876, 211.1877, 211.1880, 211.1882, 211.1883, 211.2040, 211.2055, 211.2210, 211.2310, 211.2320, 211.2360, 211.2369, 211.2415, 211.2525, 211.2622, 211.2825, 211.2955, 211.2956, 211.2958, 211.2960, 211.2980, 211.3095, 211.3120, 211.3240, 211.3505, 211.3665, 211.3760, 211.3775, 211.3785, 211.3820, 211.3925, 211.3961, 211.3966, 211.3967, 211.3968, 211.3969, 211.3975, 211.4052, 211.4080, 211.4220, 211.4285, 211.4455, 211.4540, 211.4735, 211.4760, 211.4765, 211.4768, 211.4769, 211.4895, 211.4900, 211.5012, 211.5061, 211.5062, 211.5075, 211.5090, 211.5400, 211.5520, 211.5550, 211.5800, 211.5890, 211.5985, 211.5987, 211.6012, 211.6015, 211.6017, 211.6020, 211.6063, 211.6065, 211.6400, 211.6427, 211.6460, 211.6585, 211.6640, 211.6670, 211.6690, 211.6720, 211.6740, 211.6780, 211.6825, 211.6885, 211.7220, 211.7240; effective September 14, 2010.

(C) Part 211: Definitions and General Provisions, Sections 211.493, 211.2200, 211.2358, 211.2800, 211.3985, 211.4460, 211.5140, 211.6587, 211.6635; effective July 27, 2011.

(D) Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart F: Coating Operations, Section 218.218; effective March 23, 2010.

(E) Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart E: Solvent Cleaning, Section 218.181, Subpart H: Printing and Publishing, Sections 218.403, 218.405, 218.406, 218.407, 218.408, 218.410, 218.412, 218.413, 218.416; effective June 25, 2010.

(F) Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart A: General Provisions, Sections 218.106, 218.112, Subpart F: Coating Operations, Sections 218.205, 218.208, 218.210, 218.212, 218.219, Subpart II: Fiberglass Boat Manufacturing Materials, Section 218.890, Subpart JJ: Miscellaneous Industrial Adhesives, Section 218.900; effective September 14, 2010.

(G) Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart A: General Provisions, Section 218.105, Subpart E: Solvent Cleaning, Section 218.187, Subpart F: Coating Operations, Sections 218.204, 218.207, 218.211, 218.217, Subpart H: Printing and Publishing, Sections 218.401, 218.402, 218.404, 218.409, 218.411, 218.415, 218.417, Subpart II: Fiberglass Boat Manufacturing Materials, Sections 218.891, 218.892, 218.894, Subpart JJ: Miscellaneous Industrial Adhesives, Sections 218.901, 218.902, 218.903, 218.904; effective July 27, 2011.

(H) Part 219: Organic Material Emission Standards and Limitations for the Metro East Area, Subpart F: Coating Operations, Section 219.218; effective March 23, 2010.

(I) Part 219: Organic Material Emission Standards and Limitations for the Metro East Area, Subpart E: Solvent Cleaning, Section 219.181, Subpart H: Printing and Publishing, Sections 219.402, 219.403, 219.405, 219.406, 219.407, 219.408, 219.410, 219.412, 219.413, 219.416; effective June 25, 2010.

(J) Part 219: Organic Material Emission Standards and Limitations for the Metro East Area, Subpart A: General Provisions, Sections 219.106, 219.112, Subpart F: Coating Operations, Sections 219.205, 219.208, 219.210, 219.212, 219.219, Subpart II: Fiberglass Boat

Manufacturing Materials, Section 219.890, Subpart JJ: Miscellaneous Industrial Adhesives, Section 219.900; effective September 14, 2010.

(K) Part 219: Organic Material Emission Standards and Limitations for the Metro East Area, Subpart A: General Provisions, Section 219.105, Subpart E: Solvent Cleaning, Section 219.187, Subpart F: Coating Operations, Sections 219.204, 219.207, 219.211, 219.217, Subpart H: Printing and Publishing, Sections 219.401, 219.404, 219.409, 219.411, 219.415, 219.417, Subpart II: Fiberglass Boat Manufacturing Materials, Sections 219.891, 219.892, 219.894, Subpart JJ: Miscellaneous Industrial Adhesives, Sections 219.901, 219.902, 219.903, 219.904; effective July 27, 2011.

(ii) *Additional material.* On February 28, 2011, Illinois EPA submitted an email confirmation that the sewage treatment plant exemption in Subpart TT of Parts 218 and 219 does not apply to industrial wastewater.

(190) On June 10, 2011, the Illinois Environmental Protection Agency submitted a revision to its state implementation plan. The revision to the SIP allows an adjusted standard to the general rule, Use of Organic Material Rule, known as the eight pound per hour (8 lb/hr) rule, for volatile organic matter, for Leisure Properties LLC/D/B/A Crownline Boats manufacturing facility located in West Frankfort, Illinois. The adjusted standard is that the facility takes an alternative standard of the emission limit requirements set forth in the MACT under 40 CFR part 63 subpart VVVV as published in 40 CFR Part 63 (§63.1200 to end) revised as of July 1, 2002.

(i) Incorporation by reference.

(A) July 22, 2004, Opinion and Order of the Illinois Pollution Control Board, AS-04-01, (identified in error as July 22, 2002 in the document heading), effective July 22, 2004.

(ii) *Additional material.*

(A) Letter from Laurel L. Kroack, Illinois Environmental Protection Agency, to Cheryl Newton, EPA, dated September 2, 2011, identifying that due to an ownership change to Crownline Boats, the Board transferred the adjusted standard to Leisure Properties LLC D/B/A Crownline Boats, which is the successor to Crownline Boats, by

Board order AS04-1, effective October 7, 2010.

(191) On September 14, 2012, Illinois submitted an amendment to its State Implementation Plan at 35 Illinois Administrative Code Part 223, which adds new consumer product categories and VOC limits for these products in Subpart B, and amends Subpart C to clarify applicability. 35 IAC Part 223 limits the amount of volatile organic compounds from consumer products and architectural and industrial maintenance coatings.

(i) Incorporation by reference.

(A) Illinois Administrative Code; Title 35: Environmental Protection; Subtitle B: Air Pollution; Chapter I: Pollution Control Board; Subchapter c: Emission Standards and Limitation for Stationary Sources; Part 223: Standards and Limitations for Organic material Emissions for Area Sources, effective May 4, 2012.

(B) Reserved.

(192) On June 24, 2011, Laurel Kroack, Illinois Environmental Protection Agency, submitted Illinois' regional haze plan to Cheryl Newton, Region 5, EPA. This plan includes a long-term strategy with emission limits for mandating emission reductions equivalent to the reductions from implementing best available retrofit technology and with emission reductions to provide Illinois' contribution toward achievement of reasonable progress goals at Class I areas affected by Illinois. The plan specifically includes regulations establishing Multi-Pollutant Standards and Combined Pollutant Standards, along with letters from the affected electric utilities establishing the applicability and enforceability of the option that includes sulfur dioxide and nitrogen oxide emission limits. The plan also includes permits establishing sulfur dioxide and nitrogen oxide emission limits for three additional electric generating plants and two consent decrees establishing sulfur dioxide and nitrogen oxide emission limits for two refineries.

Environmental Protection Agency

§ 52.750

Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 225, Control of Emissions from Large Combustion Sources, published at 33 IL Reg 10427, effective June 26, 2009, are incorporated by reference:

(1) Subpart B: Control Of Mercury Emissions From Coal-Fired Electric Generating Units, Section 225.233 Multi-Pollutant Standards (MPS), only subsections (a), (b), (e), and (g), Section 225.291 Combined Pollutant Standard: Purpose, Section 225.292 Applicability of the Combined Pollutant Standard, Section 225.293 Combined Pollutant Standard: Notice of Intent, Section 225.295 Combined Pollutant Standard: Emissions standards for NO_x and SO₂, and Section 225.296 Combined Pollutant Standard: Control Technology Requirements for NO_x, SO₂, and PM Emissions, except for 225.296(d).

(2) Section 225.Appendix A Specified EGUs for Purposes of the CPS (Midwest Generation's Coal-Fired Boilers as of July 1, 2006).

(B) Joint Construction and Operating Permit: Application Number 09090046, Issued on June 23, 2011, to City Water, Light & Power, City of Springfield.

(C) Joint Construction and Operating Permit: Application Number 09050022, Issued on June 24, 2011, to Kincaid Generation, LLC.

(ii) Additional material.

(A) Letter from Guy Gorney, Midwest Generation to Dave Bloomberg, Illinois EPA, dated December 27, 2007, choosing to be subject to provisions of the Multi-Pollutant Standards that include emission limits for sulfur dioxide and nitrogen oxides.

(B) Letter from R. Alan Kelley, Ameren, to Jim Ross, Illinois EPA, dated December 27, 2007, choosing to be subject to provisions of the Combined Pollutant Standards that include emission limits for sulfur dioxide and nitrogen oxides.

(C) Letter from Keith A. McFarland, Dynegy, to Raymond Pilapil, Illinois EPA, dated November 26, 2007, choosing to be subject to provisions of the Combined Pollutant Standards that include emission limits for sulfur dioxide and nitrogen oxides.

(193) On June 20, 2012, Illinois submitted an Adjusted Standard for the Greif Packaging, LLC facility located

at 5 S 220 Frontenac Road in Naperville, DuPage County. This adjustment to the Standard at 35 Ill. Adm. Code 218.986(a) for Greif's fiber drum manufacturing facility replaces the VOM capture and control requirements in 35 Ill. Adm. Code 218.986(a) with the control requirements in the Illinois Pollution Control Board's April 5, 2012 Order.

(i) Incorporation by reference.

(A) April 5, 2012 Opinion and Order of the Illinois Pollution Control Board (AS 2011-01), effective April 5, 2012.

(194) On November 14, 2011, the Illinois Environmental Protection Agency (Illinois EPA) submitted amendments to 35 Illinois Administrative Code 218.208 and 219.208. These sections add a "small container exemption" for pleasure craft surface coating operations in the Chicago and Metro-East St. Louis 8-hour ozone nonattainment areas. These exemptions are consistent with EPA volatile organic compound (VOC) reasonably available control technology (RACT) policy.

(i) Incorporation by reference. The following sections of Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter 1: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, are incorporated by reference.

(A) Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart F: Coating Operations, Section 218.208 Exemptions From Emission Limitations; effective October 25, 2011.

(B) Part 219: Organic Material Emission Standards and Limitations for the Metro East Area, Subpart F: Coating Operations, Section 219.208 Exemptions From Emission Limitations; effective October 25, 2011.

(195) On June 20, 2012, Illinois submitted an amendment to its State Implementation Plan at 35 Illinois Administrative Code part 243, which updates National Ambient Air Quality Standards for ozone, lead, and particulate matter while correcting various errors in the plan.

(i) *Incorporation by reference.* Illinois Administrative Code; Title 35: Environmental Protection; Subtitle B: Air Pollution; Chapter I: Pollution Control

Board; Subchapter 1: Air Quality Standards And Episodes; Part 243: Air Quality Standards; Sections 243.101 Definitions, 243.104 Nondegradation, 243.107 Reference Conditions, 243.108 Incorporations by Reference, 243.120 PM₁₀ and PM_{2.5}, 243.122 Sulfur Oxides (Sulfur Dioxide), 243.125 8-Hour Ozone, and 243.126 Lead; effective October 25, 2011.

(196) On April 11, 2013, Illinois submitted a revision to 35 IAC Part 254, Annual Emissions Report. The revision amends the applicability provisions as they relate to greenhouse gases.

(i) Incorporation by reference.

Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air Pollution; Chapter II: Environmental Protection Agency; Part 254: Annual Emission Report, Section 254.102: Applicability, effective April 20, 2012.

(197) On July 3, 2013, Illinois submitted revised regulations that are consistent with 40 CFR 51.100(s)(1). The compound trans-1,3,3,3-tetrafluoropropene (HFO-1234ze) was added to the list of negligibly reactive compounds excluded from the definition of “Volatile Organic Material (VOM)” or “Volatile Organic Compound (VOC)” at 35 IAC 211.7150(a).

(i) Incorporation by reference. Illinois Administrative Code Title 35: Environmental Protection; Subtitle B: Air Pollution; Chapter I: Pollution Control Board; Subchapter C: Emission Standards and Limitations for Stationary Sources; Part 211: Definitions and General Provisions, Section 211.7150: Volatile Organic Matter (VOM) or Volatile Organic Compound (VOC), Subsection 211.7150(a). Effective February 4, 2013.

(198) On January 9, 2014, Illinois submitted modifications to its Federally Enforceable State Operating Permits rules as a revision to the state implementation plan. The revision extends the maximum permit term of Federally Enforceable State Operating Permits from five years to ten years.

(i) Incorporation by reference. Illinois Administrative Code Title 35: Environmental Protection; Subtitle B: Air Pollution; Chapter I: Pollution Control Board; Subchapter a: Permits and General Provisions; Part 201: Per-

mits and General Provisions; Subpart D: Permit Applications and Review Process; Section 201.162: Duration; Subsection 201.162(a). Effective December 1, 2010.

(199) On January 8, 2014, the Illinois Environmental Protection Agency submitted a revision to its state implementation plan. The revision to the SIP substitutes Latham Pool Products, d/b/a Viking Pools, for Royal Fiberglass Pools, Inc. as the holder of the adjusted standard to the general rule, Use of Organic Material Rule, known as the eight pound per hour (8 lb/hr) rule, for volatile organic matter that was granted to Royal Fiberglass Pools, Inc. manufacturing facility located in Dix, Illinois on February 18, 2010 by the Illinois Pollution Control Board. The adjusted standard affected by the name change provides that 35 Ill. Adm. Code 215.301 does not apply to VOM emissions from Viking Pools fiberglass pool manufacturing facility in Dix, Illinois. The facility is subject to emission limit requirements set forth in the National Emissions Standards for Hazardous Air Pollutants for Reinforced Plastic Composites Production at 40 CFR 63, subpart WWWW, April 21, 2003.

(i) Incorporation by reference.

(A) Supplemental Opinion and Order of the Illinois Pollution Control Board, AS 09–4, effective September 5, 2013.

(200) On November 29, 2012, the Illinois Environmental Protection Agency submitted a request to revise Illinois’ vehicle inspection and maintenance (I/M) program to reflect changes that have been made to the program since EPA fully approved the I/M program on February 22, 1999.

(i) Incorporation by reference.

(A) Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter k: Emission Standards and Limitations for Mobile Sources, Part 240 Mobile Sources. Effective February 1, 2012.

(B) Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter II: Environmental Protection Agency, Part 276 Procedures to be Followed in the Performance of Inspections of Motor Vehicle Emissions. Effective January 30, 2012.

Environmental Protection Agency

§ 52.750

(ii) Other materials.

(A) Transmittal letter dated November 29, 2012.

(B) Vehicle Emissions Inspection Law of 2005, as amended, 625 ILCS 5/13C (Public Act 94-526 enacted on August 10, 2005; Public Act 94-848 enacted on June 9, 2006; Public Act 97-106, enacted on July 14, 2011).

(C) Listing of Chicago and Metro-East St. Louis NAA Facility Closures (July 2012).

(201) On March 19, 2013, the Illinois Environmental Protection Agency submitted a request to repeal the gasoline volatility standards at 35 Ill. Adm. Code 215.585, 218.585, and 219.585, including other related revisions to 35 Ill. Adm. Code Parts 211, 215, 218, and 219, to revise the motor vehicle refinishing equipment specifications at 35 Ill. Adm. Code 218.784 and 219.784, and to repeal the motor vehicle refinishing registration requirements at 35 Ill. Adm. Code 218.792 and 219.792.

(i) Incorporation by reference.

(A) Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 211, Definitions and General Provisions, Sections 211.101 Incorporations by Reference, 211.2870 Heavy Liquid, and 211.5510 Reid Vapor Pressure. Effective January 28, 2013.

(B) Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 215, Organic Material Emission Standards and Limitations, Sections 215.104 Definitions, and 215.105 Incorporation by Reference. Effective January 28, 2013.

(C) Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 218, Organic Material Emission Standards and Limitations for the Chicago Area, Sections 218.112 Incorporations by Reference, 218.128 Monitoring VOL Operations, and 218.784 Equipment Specifications. Effective January 28, 2013.

(D) Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 219, Organic Material Emission Standards and Limitations for the Metro East Area, Sections 219.112 Incorporations by Reference, 219.128 Monitoring VOL Operations, and 219.784 Equipment Specifications. Effective January 28, 2013.

(202) On June 10, 2014, Illinois submitted revised regulations that are consistent with 40 CFR 51.100(s)(1). The compounds (difluoromethoxy) (difluoro)methane ($\text{CHF}_2\text{OCHF}_2$ or HFE-134), bis(difluoromethoxy) (difluoro)methane ($\text{CHF}_2\text{OCF}_2\text{OCHF}_2$ or HFE-236cal2), 1-(difluoromethoxy)-2-[(difluoromethoxy) ((difluoro)methoxy)]-1,1,2,2-tetrafluoroethane ($\text{CHF}_2\text{OCF}_2\text{OCF}_2\text{CF}_2\text{OCHF}_2$ or HFE-43-10pccc), 1,2-bis(difluoromethoxy)-1,1,2,2-tetrafluoroethane ($\text{CHF}_2\text{OCF}_2\text{CF}_2\text{OCHF}_2$ or HFE-338pcc13), and *trans* 1-chloro-3,3,3-trifluoroprop-1-ene (CF_3CHCHCl) were added to the list of negligibly reactive compounds excluded from the definition of “Volatile Organic Material (VOM)” or “Volatile Organic Compound (VOC)” at 35 IAC 211.7150(a).

(i) *Incorporation by reference.*

Illinois Administrative Code Title 35: Environmental Protection; Subtitle B: Air Pollution; Chapter I: Pollution Control Board; Subchapter c: Emission Standards and Limitations for Stationary Sources; Part 211: Definitions and General Provisions; Subpart B: Definitions; Section 211.7150: Volatile Organic Material (VOM) or Volatile Organic Compound (VOC), effective November 27, 2013.

(203) On January 17, 2013, the Illinois Environmental Protection Agency submitted a request to phase out Stage II vapor recovery standards at 35 Ill. Adm. Code 218.586 and to make other related revisions to 35 Ill. Adm. Code Parts 201, 218, and 219.

(i) *Incorporation by reference.*

(A) Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter a: Permits and General Provisions, Part

201, Permits and General Provisions, Subpart C: Prohibitions, Section 201.146, Exemptions from State Permit Requirements, and Subpart K: Records and Reports, Section 201.302, Reports, effective December 23, 2013.

(B) Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 218, Organic Material Emission Standards and Limitations for the Chicago Area, Subpart A: General Provisions, Section 218.112, Incorporations by Reference, Subpart Y: Gasoline Distribution, Section 218.583, Gasoline Dispensing Operations—Storage Tank Filling Operations and Section 218.586, Gasoline Dispensing Operations—Motor Vehicle Fueling Operations, effective December 23, 2013.

(C) Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 219, Organic Material Emission Standards and Limitations for the Metro East Area, Subpart A: General Provisions, Section 219.105, Test Methods and Procedures, and Section 219.112, Incorporations by Reference, Subpart Y: Gasoline Distribution, Section 219.583, Gasoline Dispensing Operations—Storage Tank Filling Operations, effective December 23, 2013.

(204) On December 2, 2013, Illinois submitted an amendment to its State Implementation Plan at 35 Illinois Administrative Code part 243, which updates Illinois air quality standards to reflect National Ambient Air Quality Standards for sulfur dioxide, ozone, nitrogen dioxide, lead, fine particulate matter, particulate matter, and carbon monoxide and incorporates Federal test procedures for these pollutants.

(i) *Incorporation by reference.* Illinois Administrative Code Title 35: Environmental Protection; Subtitle B: Air Pollution; Chapter I: Pollution Control Board; Subchapter 1: Air Quality Standards And Episodes; Part 243: Air Quality Standards; Sections 243.101 Definitions, 243.102 Scope, 243.103 Applicability, 243.105 Air Quality Monitoring

Data Influenced by Exceptional Events, 243.107 Reference Conditions, 243.108 Incorporations by Reference, 243.120 PM₁₀ and PM_{2.5}, 243.122 Sulfur Oxides (Sulfur Dioxide), 243.123 Carbon Monoxide, 243.124 Nitrogen Oxides (Nitrogen Dioxide as Indicator), 243.125 Ozone, 243.126 Lead, and 243.127 TABLE A Schedule of Exceptional Event Flagging and Documentation Submission for New or Revised NAAQS, effective July 29, 2013.

(205) On May 16, 2013, and August 18, 2014, Illinois submitted variances to its regional haze state implementation plan affecting the following Midwest Generation, LLC facilities: Crawford Generating Station (Cook County), Joliet Generating Station (Will County), Powerton Generating Station (Tazewell County), Waukegan Generating Station (Lake County), and Will County Generating Station (Will County).

(i) *Incorporation by Reference.* (A) Illinois Pollution Control Board Order PCB 12–121, adopted on August 23, 2012; Certificate of Acceptance, dated August 24, 2012, filed with the Illinois Pollution Control Board Clerk's Office August 27, 2012.

(B) Illinois Pollution Control Board Order PCB 13–24, adopted on April 4, 2013; Certificate of Acceptance, dated May 16, 2013, filed with the Illinois Pollution Control Board Clerk's Office May 17, 2013.

(206) On December 18, 2014, the state submitted a proposed revision to the Illinois SIP updating the definition of Volatile Organic Material (VOM) or Volatile Organic Compound (VOC) to exclude the chemical compound 2,3,3,3-tetrafluoropropene (HFO–1234yf), along with minor administrative revisions.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 211: Definitions and General Provisions, Subpart B: Definitions, Section 211.7150 Volatile Organic Material (VOM) or Volatile Organic Compounds (VOC), effective June 9, 2014.

(207) On September 3, 2014, Illinois submitted a variance to its regional haze state implementation plan affecting the electrical generating units

(EGUs) included in the Ameren Multi-Pollutant Standard Group (Ameren MPS Group). The Ameren MPS Group consists of five facilities owned by Illinois Power Holdings, LLC (IPH) and two facilities owned by AmerenEnergy Medina Valley Cogen, LLC (Medina Valley). The IPH facilities included in the Ameren MPS Group and subject to the variance include: Coffeen Energy Center (Montgomery County), Duck Creek Energy Center (Fulton County), E.D. Edwards Energy Center (Peoria County), Joppa Energy Center (Massac County), and Newton Energy Center (Jasper County). The Medina Valley facilities included in the Ameren MPS Group and subject to the variance are the Meredosia Energy Center (Morgan County) and the Hutsonville Energy Center (Crawford County).

(i) *Incorporation by reference.*

(A) Illinois Pollution Control Board Order PCB 14-10, adopted on November 21, 2013; Certificate of Acceptance, filed with the Illinois Pollution Control Board Clerk's Office December 20, 2013.

(208) On December 18, 2014, and April 23, 2015, Illinois submitted amendments to its State Implementation Plan at 35 Illinois Administrative Code part 243, which updates Illinois air quality standards to reflect National Ambient Air Quality Standards promulgated by EPA through December 17, 2013, and incorporates Federal test procedures for these pollutants.

(i) *Incorporation by Reference.* (A) Illinois Administrative Code Title 35: Environmental Protection; Subtitle B: Air Pollution; Chapter I: Pollution Control Board; Subchapter I: Air Quality Standards And Episodes; Part 243: Air Quality Standards; Sections 243.107 Reference Conditions, 243.120 p.m.₁₀ and PM_{2.5}, 243.122 Sulfur Oxides (Sulfur Dioxide), and 243.Table A Schedule of Exceptional Event Flagging and Documentation Submission for New or Revised NAAQS, effective November 27, 2013.

(B) Illinois Administrative Code Title 35: Environmental Protection; Subtitle B: Air Pollution; Chapter I: Pollution Control Board; Subchapter I: Air Quality Standards And Episodes; Part 243: Air Quality Standards; Section 243.108 Incorporation by Reference, effective June 9, 2014.

(209) On August 9, 2016, the state submitted a proposed revision to the Illinois SIP updating the definition of Volatile Organic Material (VOM) or Volatile Organic Compound (VOC) to exclude the chemical compound 2-amino-2-methyl-1-propanol (AMP), along with minor administrative revisions.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Station Sources, Part 211: Definitions and General Provisions, Subpart B: Definitions, Section 211.7150 Volatile Organic Material (VOM) or Volatile Organic Compounds (VOC), effective March 24, 2015.

[37 FR 10862, May 31, 1972. Redesignated and amended at 82 FR 30638, June 30, 2017]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.750, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

Subpart P—Indiana

§ 52.769 Identification of plan—conditional approval.

The plan revision commitment listed in paragraphs (a) and (b) of this section were submitted on the dates specified.

(a)–(b) [Reserved]

[60 FR 22241, 22242, May 4, 1995, as amended at 62 FR 19056, Apr. 18, 1997; 63 FR 35144, June 29, 1998]

§ 52.770 Identification of plan.

(a) *Purpose and scope.* This section sets forth the applicable State Implementation Plan (SIP) for Indiana under section 110 of the Clean Air Act, 42 U.S.C. 7401, and 40 CFR Part 51 to meet National Ambient Air Quality Standards.

(b) *Incorporation by reference.* (1) Material listed in paragraphs (c), (d), and (e) of this section with an EPA approval date prior to December 31, 2009, was approved for incorporation by reference by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR Part 51. Material is incorporated as it exists on the date of the approval, and notice of any change

in the material will be published in the FEDERAL REGISTER. Entries in paragraphs (c), (d), and (e) of this section with an EPA approval date after December 31, 2009, will be incorporated by reference in the next update to the SIP compilation.

(2) EPA Region 5 certifies that the rules/regulations provided by the EPA in the SIP compilation at the addresses in paragraph (b)(3) of this section are an exact duplicate of the officially promulgated State rules/regulations which have been approved as part of the SIP as of December 31, 2009.

(3) Copies of the materials incorporated by reference may be inspected at the Environmental Protection Agency, Region 5, Air Programs Branch, 77

West Jackson Boulevard, Chicago, IL 60604; the EPA, Air and Radiation Docket and Information Center, EPA Headquarters Library, Infoterra Room (Room Number 3334), EPA West Building, 1301 Constitution Ave., NW., Washington, DC 20460, and the National Archives and Records Administration. If you wish to obtain materials from a docket in the EPA Headquarters Library, please call the Office of Air and Radiation (OAR) Docket/Telephone number: (202) 566-1742. For information on the availability of this material at NARA, call 202-741-6030, or go to: http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.

(c) *EPA approved regulations.*

EPA-APPROVED INDIANA REGULATIONS—Continued

Indiana citation	Subject	Indiana effective date	EPA approval date	Notes
Rule 2. Prevention of Significant Deterioration (PSD) Requirements				
2-2-1	Definitions	3/16/2011	9/28/2011, 76 FR 59899 ...	(a) through (e), (f)(2) through (f)(3), (g) through (cc), (dd)(2) through (dd)(3), (ee)(1) through (ee)(2), (ff)(2) through (ff)(6), (gg)(1)(A) through (gg)(1)(B), (gg)(2) through (gg)(3), (hh) through (rr), (ss)(2) through (ss)(6), (tt) through (vv), (ww)(1)(A) through (ww)(1)(E), (ww)(1)(G) through (ww)(1)(W), (ww)(2), (xx) through (aaa).
2-2-1	Definitions	7/11/2012	10/29/2012, 77 FR 65478	(dd)(1), (ff)(7), (ss)(1), (ww)(1)(F) and (ww)(1)(G) only.
2-2-1	Definitions	7/11/2012	7/2/2014, 79 FR 37646	(f)(1), (ee)(3), and (gg)(1)(C) only.
2-2-1	Definitions	9/16/2011	4/7/2022, 87 FR 20331	(ff)(1) only.
2-2-2	Applicability	10/31/2010	7/8/2011, 76 FR 40242.	
2-2-3	Control technology review; requirements.	9/10/2004	6/18/2007, 72 FR 33395.	
2-2-4	Air quality analysis; requirements	3/16/2011	9/28/2011, 76 FR 59899 ...	(a), (b)(1), (b)(2)(A)(i) through (b)(2)(A)(iv), (b)(2)(A)(vi) through (b)(2)(A)(xiii), (b)(2)(B), (b)(3), (c)(1) through (c)(3), (c)(5) through (c)(7).
2-2-4	Air quality analysis; requirements	7/11/2012	10/29/2012, 77 FR 65478	(b)(2)(A)(vi) only.
2-2-4	Air quality analysis; requirements	7/11/2012	7/2/2014, 79 FR 37646	(c)(4) only.
2-2-5	Air quality impact; requirements	10/31/2010	7/8/2011, 76 FR 40242.	
2-2-6	Increment consumption; requirements.	7/11/2012	8/11/2014, 79 FR 46710 ...	(b) only
2-2-8	Source obligation	10/31/2010	7/8/2011, 76 FR 40242.	
2-2-10	Source information	10/31/2010	7/8/2011, 76 FR 40242.	
2-2-11	Stack height provisions	4/22/2001	6/27/2003, 68 FR 38197.	
2-2-12	Permit rescission	4/8/2004	5/20/2004, 69 FR 29071.	
2-2-13	Area designation and redesignation ..	4/22/2001	6/27/2003, 68 FR 38197.	
2-2-14	Sources impacting federal Class I areas; additional requirements.	7/11/2012	7/2/2014, 79 FR 37646.	
2-2-15	Public participation	4/22/2001	6/27/2003, 68 FR 38197.	
2-2-16	Ambient air ceilings	4/22/2001	6/27/2003, 68 FR 38197.	
Rule 3. Emission Offset				
2-3-1	Definitions	10/31/2010	7/8/2011, 76 FR 40242.	
2-3-2	Applicability	10/31/2010	7/8/2011, 76 FR 40242.	
2-3-3	Applicable requirements	10/31/2010	7/8/2011, 76 FR 40242.	
2-3-4	Banking of emission offsets	12/13/1993	10/7/1994, 59 FR 51108.	
2-3-5	Location of offsetting emissions	12/13/1993	10/7/1994, 59 FR 51108.	
Rule 3.4. Actuals Plantwide Applicability Limitations in Nonattainment Areas				
2-3-4-1	Applicability	9/10/2004	6/18/2007, 72 FR 33395.	
2-3-4-2	Definitions	9/10/2004	6/18/2007, 72 FR 33395.	
2-3-4-3	Permit application requirements	9/10/2004	6/18/2007, 72 FR 33395.	
2-3-4-4	Establishing PALs; general requirements.	9/10/2004	6/18/2007, 72 FR 33395.	
2-3-4-5	Public participation requirements for PALs.	9/10/2004	6/18/2007, 72 FR 33395.	
2-3-4-6	Establishing a 10 year actuals PAL level.	9/10/2004	6/18/2007, 72 FR 33395.	
2-3-4-7	Contents of the PAL permit	9/10/2004	6/18/2007, 72 FR 33395.	

EPA-APPROVED INDIANA REGULATIONS—Continued

Indiana citation	Subject	Indiana effective date	EPA approval date	Notes
2–3.4–8	PAL effective period and reopening of the PAL permit.	9/10/2004	6/18/2007, 72 FR 33395.	
2–3.4–9	Expiration of a PAL	9/10/2004	6/18/2007, 72 FR 33395.	
2–3.4–10	Renewal of a PAL	9/10/2004	6/18/2007, 72 FR 33395.	
2–3.4–11	Increasing a PAL during the PAL effective period.	9/10/2004	6/18/2007, 72 FR 33395.	
2–3.4–12	Monitoring requirements for PALs	9/10/2004	6/18/2007, 72 FR 33395.	
2–3.4–13	Record keeping requirements	9/10/2004	6/18/2007, 72 FR 33395.

EPA-APPROVED INDIANA REGULATIONS—Continued

Indiana citation	Subject	Indiana effective date	EPA approval date	Notes
Rule 4. General Provisions				
3-4-1	Definitions	9/10/2011	10/23/2013, 78 FR 63093.	
3-4-2	Certification	9/10/2011	10/23/2013, 78 FR 63093.	
3-4-3	Conversion factors	9/10/2011		
Rule 5. Continuous Monitoring of Emissions				
3-5-1	Applicability; continuous monitoring requirements for applicable pollutants.	4/24/2020	6/25/2021, 86 FR 33525.	
3-5-2	Minimum performance and operating specifications.	9/10/2011	10/23/2013, 78 FR 63093.	
3-5-3	Monitor system certification	9/10/2011	10/23/2013, 78 FR 63093.	
3-5-4	Standard operating procedures	9/10/2011	10/23/2013, 78 FR 63093.	
3-5-5	Quality assurance requirements	9/10/2011	10/23/2013, 78 FR 63093.	
3-5-6	Recordkeeping requirements	9/10/2011	10/23/2013, 78 FR 63093.	
3-5-7	Reporting requirements	9/10/2011	10/23/2013, 78 FR 63093.	
3-5-8	Operation and maintenance of continuous emission monitoring and continuous opacity monitoring systems.	9/10/2011	10/23/2013, 78 FR 63093.	
Rule 6. Source Sampling Procedures				
3-6-1	Applicability; test procedures	9/10/2011	10/23/2013, 78 FR 63093.	
3-6-2	Source sampling protocols	9/10/2011	10/23/2013, 78 FR 63093.	
3-6-3	Emission testing	9/10/2011	10/23/2013, 78 FR 63093.	
3-6-4	Reporting	9/10/2011	10/23/2013, 78 FR 63093.	
3-6-5	Specific testing procedures; particulate matter; PM ₁₀ ; PM _{2.5} ; sulfur dioxide; nitrogen oxides; volatile organic compounds.	9/10/2011	10/23/2013, 78 FR 63093.	
Rule 7. Fuel Sampling and Analysis Procedures				
3-7-1	Applicability	9/10/2011	10/23/2013, 78 FR 63093.	
3-7-2	Coal sampling and analysis methods	9/10/2011	10/23/2013, 78 FR 63093.	
3-7-3	Alternate coal sampling and analysis methods.	9/10/2011	10/23/2013, 78 FR 63093.	
3-7-4	Fuel oil sampling; analysis methods	9/10/2011	10/23/2013, 78 FR 63093.	
3-7-5	Recordkeeping requirements; standard operating procedures.	9/10/2011	10/23/2013, 78 FR 63093.	
Article 4. Burning Regulations				
Rule 1. Open Burning¹				
4-1-0.5	Definitions	2/10/2001	12/9/2014, 79 FR 72979.	
4-1-1	Scope	2/10/2001	12/9/2014, 79 FR 72979.	
4-1-2	Prohibition against open burning	2/10/2001	12/9/2014, 79 FR 72979.	
4-1-3	Exemptions	10/28/2011	12/9/2014, 79 FR 72979.	
4-1-4	Emergency burning	10/28/2011	12/9/2014, 79 FR 72979.	
4-1-4.1	Open burning approval; criteria and conditions.	12/15/2002	12/9/2014, 79 FR 72979.	
4-1-4.2	Open burning; approval revocation ...	2/10/2001	12/9/2014, 79 FR 72979.	
4-1-4.3	Open burning approval; delegation of authority.	2/10/2001	12/9/2014, 79 FR 72979.	
Rule 2. Incinerators				
4-2-1	Applicability	12/15/2002	11/30/2004, 69 FR 69531.	
4-2-2	Incinerators	12/15/2002	11/30/2004, 69 FR 69531.	
4-2-3	Portable incinerators (Repealed)	12/15/2002	11/30/2004, 69 FR 69531.	
Article 5. Opacity Regulations				
Rule 1. Opacity Limitations				
5-1-1	Applicability	11/8/1998	7/16/2002, 67 FR 46589.	
5-1-2	Opacity limitations	11/8/1998	7/16/2002, 67 FR 46589.	

EPA-APPROVED INDIANA REGULATIONS—Continued

Indiana citation	Subject	Indiana effective date	EPA approval date	Notes
5–1–3	Temporary alternative opacity limitations.	11/8/1998	7/16/2002, 67 FR 46589.	
5–1–4	Compliance determination	6/11/1993	6/15/1995, 60 FR 31412 ...	Sec. 4(a). Sec. 4(b). (a) and (c). (b)(1)(A) through (b)(1)(D), (b)(1)(F) through (b)(1)(I), (b)(2) through (b)(11). (b)(1)(E) only.
5–1–5	Violations	11/8/1998	7/16/2002, 67 FR 46589 ...	
5–1–5	Violations	6/11/1993	6/15/1995, 60 FR 31412 ...	
5–1–5	Violations	11/8/1998	7/16/2002, 67 FR 46589 ...	
5–1–5	Violations	7/11/2012	7/2/2014, 79 FR 37646	
5–1–7	State implementation plan revisions	6/11/1993	6/15/1995, 60 FR 31412.	
5–1–8	Site-specific temporary alternate opacity limitations.	12/8/2021	4/25/2024, 89 FR 31645.	

Article 6. Particulate Rules

Rule 2. Particulate Emission Limitations for Sources of Indirect Heating

6–2–1	Applicability	10/21/1983	5/17/1985, 50 FR 20569.	
6–2–2	Emission limitations for facilities specified in 326 IAC 6–2–1(b).	10/21/1983	5/17/1985, 50 FR 20569.	
6–2–3	Emission limitations for facilities specified in 326 IAC 6–2–1(c).	10/21/1983	5/17/1985, 50 FR 20569.	
6–2–4	Emission limitations for facilities specified in 326 IAC 6–2–1(d).	10/21/1983	5/17/1985, 50 FR 20569.	

Rule 3. Particulate Emission Limitations for Manufacturing Processes

6–3–1	Applicability	6/12/2002	7/25/2005, 70 FR 42495 ...	Sec. 1.(a) and (b). only Sec. 1. (c).
6–3–1.5	Definitions	4/20/2012	6/17/2014, 79 FR 34435 ...	
6–3–2	Particulate emission limitations, work practices, and control technologies.	6/12/2002	7/25/2005, 70 FR 42495.	
6–3–2	Particulate emission limitations, work practices, and control technologies.	6/12/2002	7/25/2005, 70 FR 42495.	

Rule 4. Fugitive Dust Emissions

6–4–1	Applicability of rule	11/16/1973	10/28/1975, 40 FR 50032	Approved as APC–20 Sec. 1. Definitions.
6–4–2	Emission limitations	11/16/1973	10/28/1975, 40 FR 50032	Approved as APC–20 Sec. 2. Allowable Emissions.
6–4–3	Multiple sources of fugitive dust	11/16/1973	10/28/1975, 40 FR 50032	Approved as APC–20 Sec. 3. Applicability.
6–4–4	Motor vehicle fugitive dust sources ...	11/16/1973	10/28/1975, 40 FR 50032	Approved as APC–20 Sec. 4. Mobile Fugitive Dust Sources.
6–4–5	Measurement processes	11/16/1973	10/28/1975, 40 FR 50032	Approved as APC–20 Sec. 5. Methods of Measurement.
6–4–6	Exceptions	11/16/1973	10/28/1975, 40 FR 50032	Approved as APC–20 Sec. 6.
6–4–7	Compliance date	11/16/1973	10/28/1975, 40 FR 50032	Approved as APC–20 Sec. 3(e).

Rule 7. Particulate Matter Emission Limitations for Southern Indiana Gas and Electric Company

6–7–1	Southern Indiana Gas and Electric Company (SIGECO).	8/30/2008	11/10/2009, 74 FR 57904.	

Article 6.5. Particulate Matter Limitations Except Lake County

Rule 1. General Provisions

6.5–1–1	Applicability	4/20/2012	6/17/2014, 79 FR 34435.	
6.5–1–1.5	Definitions	9/9/2005	3/22/2006, 71 FR 14383.	
6.5–1–2	Particulate emission limitations; modification by commissioner.	4/20/2012	6/17/2014, 79 FR 34435.	
6.5–1–3	Nonattainment area particulate limitations; compliance determination.	9/9/2005	3/22/2006, 71 FR 14383.	
6.5–1–4	Compliance schedules	9/9/2005	3/22/2006, 71 FR 14383.	
6.5–1–5	Control strategies	4/20/2012	6/17/2014, 79 FR 34435.

Rule 10. Lake County: Fugitive Particulate Matter				
6.8–10–1	Applicability	2/22/2008	4/30/2008, 73 FR 23356.	
6.8–10–2	Definitions	9/9/2005	3/22/2006, 71 FR 14383.	
6.8–10–3	Particulate matter emission limitations.	9/9/2005	3/22/2006, 71 FR 14383.	
6.8–10–4	Compliance requirements; control plans.	9/9/2005	3/22/2006, 71 FR 14383.	
Rule 11. Lake County: Particulate Matter Contingency Measures				
6.8–11–1	Applicability	9/9/2005	3/22/2006, 71 FR 14383.	
6.8–11–2	"Ambient monitoring data" defined ...	9/9/2005	3/22/2006, 71 FR 14383.	
6.8–11–3	Exceedances	9/9/2005	3/22/2006, 71 FR 14383.	
6.8–11–4	Violation of 24-hour standard	9/9/2005	3/22/2006, 71 FR 14383.	
6.8–11–5	Violation of annual standard	9/9/2005	3/22/2006, 71 FR 14383.	
6.8–11–6	Reduction measures	9/9/2005	3/22/2006, 71 FR 14383.	
Article 7. Sulfur Dioxide Rules				
Rule 1.1. Sulfur Dioxide Emission Limitations				
7–1.1–1	Applicability	6/24/2005	9/26/2005, 70 FR 56129.	
7–1.1–2	Sulfur dioxide emission limitations	6/24/2005	9/26/2005, 70 FR 56129.	
7–1.1–3	Compliance Date	10/5/2015	3/22/2019, 84 FR 10692.	
Rule 2. Compliance				
7–2–1	Reporting Requirements; methods to determine compliance.	10/5/2015	3/22/2019, 84 FR 10692.	
Rule 3. Ambient Monitoring				
7–3–2	Ambient monitoring		5/13/1982, 47 FR 20583.	
Rule 4. Emission Limitations and Requirements by County				
7–4–2.1	Marion County sulfur dioxide emission limitations.	1/1/2017	3/22/2019, 84 FR 10692.	
7–4–3.1	Vigo County sulfur dioxide emission limitations.	1/1/2017	3/22/2019, 84 FR 10692.	
7–4–4	Wayne County sulfur dioxide emission limitations.	4/10/1988	9/1/1988, 53 FR 33808.	
7–4–5	LaPorte County sulfur dioxide emission limitations.	4/10/1988	9/1/1988, 53 FR 33808.	
7–4–6	Jefferson County sulfur dioxide emission limitations.	4/10/1988	9/1/1988, 53 FR 33808.	
7–4–7	Sullivan County sulfur dioxide emission limitations.	4/10/1988	9/1/1988, 53 FR 33808.	
7–4–8	Vermillion County sulfur dioxide emission limitations.	4/10/1988	1/19/1989, 54 FR 2112.	
7–4–9	Floyd County sulfur dioxide emission limitations.	4/10/1988	9/1/1988, 53 FR 33808.	
7–4–10	Warrick County sulfur dioxide emission limitations.	8/30/2008	11/10/2009, 74 FR 57904.	
7–4–11.1	Morgan County sulfur dioxide emission limitations.	7/5/2019	9/23/2019, 84 FR 49659.	
7–4–12.1	Gibson County sulfur dioxide emission limitations.	12/5/1990	9/19/1994, 59 FR 47804.	
7–4–13	Dearborn County sulfur dioxide emission limitations.	3/16/2005	2/28/2006, 71 FR 9936.	
7–4–14	Porter County sulfur dioxide emission limitations.	10/23/1988	1/19/1989, 54 FR 2112	Only Sec. 14. (1).
7–4–14	Porter County sulfur dioxide emission limitations.	3/31/2021	9/28/2023, 88 FR 66687 ...	Except Sec. 14. (1).
7–4–15	Pike County sulfur dioxide emission limitations.	10/5/2015	8/17/2020, 85 FR 49967 ...	Only (a), (b), (d), and (e). EPA is approving a commissioner's order in place of (c).

Article 8. Volatile Organic Compound Rules				
Rule 1. General Provisions				
8-1-0.5	Definitions	10/18/1995	11/3/1999, 64 FR 59642	
8-1-1	Applicability	6/5/1991	3/6/1992, 57 FR 8082	
8-1-2	Compliance methods	12/15/2002	5/5/2003, 68 FR 23604	
8-1-3	Compliance schedules	5/15/2010	4/14/2011, 76 FR 20850	
8-1-4	Testing procedures	7/15/2001	9/11/2002, 67 FR 57515	
8-1-5	Petition for site-specific reasonably available control technology (RACT) plan.	11/10/1988	9/6/1990, 55 FR 36635	
8-1-6	New facilities; general reduction requirements.	6/24/2006	6/13/2007, 72 FR 32531	
8-1-7	Military specifications		10/27/1982, 47 FR 20586	
8-1-9	General recordkeeping and reporting requirements.	5/22/1997	6/29/1998, 63 FR 35141	
8-1-10	Compliance certification, recordkeeping, and reporting requirements for certain coating facilities using compliant coatings.	5/22/1997	6/29/1998, 63 FR 35141	

EPA-APPROVED INDIANA REGULATIONS—Continued

Indiana citation	Subject	Indiana effective date	EPA approval date	Notes
8–1–11	Compliance certification, record-keeping, and reporting requirements for certain coating facilities using daily-weighted averaging.	5/22/1997	6/29/1998, 63 FR 35141	
8–1–12	Compliance certification, record-keeping, and reporting requirements for certain coating facilities using control devices.	5/22/1997	6/29/1998, 63 FR 35141	
Rule 2. Surface Coating Emission Limitations				
8–2–1	Applicability	11/19/2010	10/13/11, 76 FR 63549	
8–2–2	Automobile and light duty truck coating operations.	1/2/2010	2/24/2010, 75 FR 8246	
8–2–3	Can coating operations		2/10/1986, 51 FR 4912	
8–2–4	Coil coating operations		10/27/1982, 47 FR 20586	
8–2–5	Paper coating operations	12/3/2009	2/24/2010, 75 FR 8246	
8–2–6	Metal furniture coating operations	12/3/2009	2/24/2010, 75 FR 8246	
8–2–7	Large appliance coating operations ..	12/3/2009	2/24/2010, 75 FR 8246	
8–2–8	Magnet wire coating operations		10/27/1982, 47 FR 20586	
8–2–9	Miscellaneous metal and plastic parts coating operations.	11/19/2010	10/13/11, 76 FR 63549	
8–2–10	Flat wood panels; manufacturing operations.	12/3/2009	2/24/2010, 75 FR 8246	
8–2–11	Fabric and vinyl coating	10/23/1988	3/6/1992, 57 FR 8082	
8–2–12	Wood furniture and cabinet coating ..	4/10/1988	11/24/1990, 55 FR 39141	
Rule 3. Organic Solvent Degreasing Operations				
8–3–1	Applicability and Exemptions	1/4/2023	12/18/2023, 88 FR 87359.	
8–3–2	Cold cleaner degreaser control equipment and operating requirements.	6/9/2021	12/18/2023, 88 FR 87359.	
8–3–3	Open top vapor degreaser operation	6/9/2021	12/18/2023, 88 FR 87359.	
8–3–4	Conveyorized degreaser control equipment and operating requirements.	6/9/2012	12/18/2023, 88 FR 87359.	
8–3–5	Cold cleaner degreaser operation and control (Repealed).	3/1/2013	7/25/2014, 79 FR 43260.	
8–3–6	Open top vapor degreaser operation and control requirements (Repealed).	3/1/2013	7/25/2014, 79 FR 43260.	
8–3–7	Conveyorized degreaser operation and control (Repealed).	3/1/2013	7/25/2014, 79 FR 43260.	
8–3–8	Material requirements for cold cleaner degreasers.	6/9/2021	12/18/2023, 88 FR 87359.	
Rule 4. Petroleum Sources				
8–4–1	Applicability	3/5/2015	6/9/2016, 81 FR 37160.	
8–4–2	Petroleum refineries		1/18/1983, 48 FR 2127	
8–4–3	Petroleum liquid storage facilities		2/10/1986, 51 FR 4912	
8–4–4	Bulk gasoline terminals		1/18/1983, 48 FR 2127	
8–4–5	Bulk gasoline plants		1/18/1983, 48 FR 2127	
8–4–6	Gasoline dispensing facilities	3/5/2015	6/9/2016, 81 FR 37160.	
8–4–7	Gasoline transports	11/5/1999	5/31/2002, 67 FR 38006	
8–4–8	Leaks from petroleum refineries; monitoring; reports.	6/5/1991	3/6/1992, 57 FR 8082	
8–4–9	Leaks from transports and vapor collection systems; records.	11/5/1999	5/31/2002, 67 FR 38006	
Rule 5. Miscellaneous Operations				
8–5–1	Applicability of rule	3/22/2007	2/20/2008, 73 FR 9201	
8–5–2	Asphalt paving rules		2/10/1986, 51 FR 4912	
8–5–3	Synthesized pharmaceutical manufacturing operations.	5/18/1990	3/6/1992, 57 FR 8082	
8–5–4	Pneumatic rubber tire manufacturing		1/18/1983, 48 FR 2124	
8–5–5	Graphic arts operations	5/22/1997	6/29/1998, 63 FR 35141

8-7-7	Test methods and procedures	1/21/1995	7/5/1995, 60 FR 34856	
8-7-8	General recordkeeping and reports ..	1/21/1995	7/5/1995, 60 FR 34856	
8-7-9	Control system operation, maintenance, and testing.	1/21/1995	7/5/1995, 60 FR 34856	
8-7-10	Control system monitoring, recordkeeping, and reporting.	1/21/1995	7/5/1995, 60 FR 34856	
Rule 8.2. Federal Standards Applicable to Certain Municipal Solid Waste Landfill				
8-8.2	Adoption of federal standards applicable to certain municipal solid waste landfills.	12/8/2021	8/16/2024, 89 FR 66607 ...	
Rule 9. Volatile Organic Liquid Storage Vessels				
8-9-1	Applicability	7/16/2018	5/23/2019, 84 FR 23723.	
8-9-2	Exemptions	7/16/2018	5/23/2019, 84 FR 23723.	
8-9-3	Definitions	7/16/2018	5/23/2019, 84 FR 23723.	
8-9-4	Standards	7/16/2018	5/23/2019, 84 FR 23723.	
8-9-5	Testing and procedures	7/16/2018	5/23/2019, 84 FR 23723.	
8-9-6	Record keeping and reporting requirements.	7/16/2018	5/23/2019, 84 FR 23723 ...	Includes supplemental information provided on 9/28/2018.
Rule 10. Automobile Refinishing				
8-10-1	Applicability	8/13/1998	12/20/1999, 64 FR 7103	
8-10-2	Definitions	11/2/1995	6/13/1996, 61 FR 29965	
8-10-3	Requirements	5/23/1999	12/20/1999, 64 FR 71031	
8-10-4	Means to limit volatile organic compound emissions.	11/2/1995	6/13/1996, 61 FR 29965	
8-10-5	Work practice standards	8/13/1998	12/20/1999, 64 FR 71031	
8-10-6	Compliance procedures	8/13/1998	12/20/1999, 64 FR 71031	
8-10-7	Test procedures	11/2/1995	6/13/1996, 61 FR 29965	
8-10-8	Control system operation, maintenance, and monitoring (Repealed).	11/2/1995	6/13/1996, 61 FR 29965	
8-10-9	Recordkeeping and reporting	8/13/1998	12/20/1999, 64 FR 71031	
Rule 11. Wood Furniture Coating				
8-11-1	Applicability	1/4/1996	10/30/1996, 61 FR 55889	
8-11-2	Definitions	1/4/1996	10/30/1996, 61 FR 55889	
8-11-3	Emission limits	1/4/1996	10/30/1996, 61 FR 55889	
8-11-4	Work practice standards	1/4/1996	10/30/1996, 61 FR 55889	
8-11-5	Continuous compliance plan	1/4/1996	10/30/1996, 61 FR 55889	
8-11-6	Compliance procedures and monitoring requirements.	1/4/1996	10/30/1996, 61 FR 55889	
8-11-7	Test procedures	1/4/1996	10/30/1996, 61 FR 5588	
8-11-8	Recordkeeping requirements	1/4/1996	10/30/1996, 61 FR 55889	
8-11-9	Reporting requirements	1/4/1996	10/30/1996, 61 FR 55889	
8-11-10	Provisions for sources electing to use emissions averaging.	1/4/1996	10/30/1996, 61 FR 55889	

EPA-APPROVED INDIANA REGULATIONS—Continued

8–12–7	Recordkeeping, notification, and reporting requirements.	7/15/2001	4/1/2003, 68 FR 15664	
Rule 13. Sinter Plants				
8–13–1	Applicability	7/24/1998	7/5/2000, 65 FR 41350	
8–13–2	Definitions	7/24/1998	7/5/2000, 65 FR 41350	
8–13–3	Emission limit	7/24/1998	7/5/2000, 65 FR 41350	
8–13–4	Compliance requirements	7/24/1998	7/5/2000, 65 FR 41350	
8–13–5	Test procedures	7/24/1998	7/5/2000, 65 FR 41350	
8–13–6	Control measure operation, maintenance, and monitoring.	7/24/1998	7/5/2000, 65 FR 41350	
8–13–7	Recordkeeping and reporting	7/24/1998	7/5/2000, 65 FR 41350	
8–13–8	Continuous emissions monitoring	7/24/1998	7/5/2000, 65 FR 41350	
Rule 14. Architectural and Industrial Maintenance (AIM) Coatings				
8–14–1	Applicability	12/1/2010	8/30/2012, 77 FR 52606.	
8–14–2	Definitions	12/1/2010	8/30/2012, 77 FR 52606.	
8–14–3	Standards for AIM coatings	12/1/2010	8/30/2012, 77 FR 52606.	
8–14–4	Container labeling	12/1/2010	8/30/2012, 77 FR 52606.	
8–14–5	Recordkeeping and reporting requirements.	12/1/2010	8/30/2012, 77 FR 52606.	
8–14–6	Compliance provisions and test methods.	12/1/2010	8/30/2012, 77 FR 52606.	
8–14–7	Application of traffic marking materials.	12/1/2010	8/30/2012, 77 FR 52606.	
Rule 15. Standards for Consumer and Commercial Products				
8–15–1	Applicability	12/1/2010	6/29/2012, 77 FR 38725.	
8–15–2	Definitions	12/1/2010	6/29/2012, 77 FR 38725.	
8–15–3	Standards	12/1/2010	6/29/2012, 77 FR 38725.	
8–15–4	Exemptions	12/1/2010	6/29/2012, 77 FR 38725.	
8–15–5	Innovative products exemption	12/1/2010	6/29/2012, 77 FR 38725.	
8–15–6	Alternative control plan	12/1/2010	6/29/2012, 77 FR 38725.	
8–15–7	Administrative requirements	12/1/2010	6/29/2012, 77 FR 38725.	
8–15–8	Record keeping and reporting requirements.	12/1/2010	6/29/2012, 77 FR 38725.	
8–15–9	Test methods	12/1/2010	6/29/2012, 77 FR 38725.	
Rule 17. Industrial Solvent Cleaning Operations				
8–17–1	Applicability	1/2/2010	2/24/2010, 75 FR 8246	
8–17–2	Exemptions	5/3/2012	12/27/2013, 78 FR 78726	
8–17–3	“Composite partial vapor pressure” defined.	1/2/2010	2/24/2010, 75 FR 8246	
8–17–4	VOC emissions control requirements	5/3/2012	12/27/2013, 78 FR 78726	
8–17–5	Compliance dates	1/2/2010	2/24/2010, 75 FR 8246	
8–17–6	Compliance test methods	1/2/2010	2/24/2010, 75 FR 8246	
8–17–7	Monitoring and recordkeeping	5/3/2012	12/27/2013, 78 FR 78726	
8–17–8	Reporting requirements for monitoring and recordkeeping information.	1/2/2010	2/24/2010, 75 FR 8246	
8–17–9	Requirements on compliance certification.	1/2/2010	2/24/2010, 75 FR 8246	
8–17–10	Recordkeeping requirements for exempt sources.	1/2/2010	2/24/2010, 75 FR 8246

EPA-APPROVED INDIANA REGULATIONS—Continued

Indiana citation	Subject	Indiana effective date	EPA approval date	Notes
Article 9. Carbon Monoxide Emission Rules				
9-1	Carbon Monoxide Emission Limits	12/15/2002	11/30/2004, 69 FR 69531	
Article 10. Nitrogen Oxides Rules				
10-1	Nitrogen Oxides Control in Clark and Floyd Counties.	6/12/1996	6/3/1997, 62 FR 30253.	
10-2	NO _x Emissions from Large Affected Units.	8/26/2018	7/24/2020, 85 FR 44738.	
10-3	Nitrogen Oxide Reduction Program for Specific Source Categories.	8/26/2018	7/24/2020, 85 FR 44738.	
10-5	Nitrogen Oxide Reduction Program for Internal Combustion Engines (ICE).	2/26/2006	10/1/2007, 72 FR 55664.	
10-6	Nitrogen Oxides Emission Limitations for Southern Indiana Gas and Electric Company.	8/30/2008	11/10/2009, 74 FR 57904.	
Article 11. Emission Limitations for Specific Types of Operations				
11-1	Existing Foundries	7/25/1968	5/31/1972, 37 FR 10863	
11-3	Coke Oven Batteries	9/26/1980	12/1/1983, 48 FR 54615 ...	Sec. 1, 3, 5.
		6/11/1993	6/15/1995, 60 FR 31412 ...	Sec. 2(a)–(f), 2(i), 4.
11-4	Fiberglass Insulation Manufacturing ..	9/26/1980	4/3/1984, 49 FR 13144	Sec. 1, 2, 3, 4.
		9/27/2002	12/9/2002, 67 FR 72844 ...	Sec. 5.
11-5	Fluoride Emission Limitations for Existing Primary Aluminum Plants.	2/6/1981	11/27/1981, 46 FR 57892	
Article 13. Motor Vehicle Emission and Fuel Standards				
13-1.1	Motor Vehicle Inspection and Maintenance Requirements.	1/22/1999	9/27/2001, 66 FR 49297	
13-3	Control of Gasoline Reid Vapor Pressure.	12/15/2002	7/21/2003, 68 FR 42978 ...	Sec. 1.
		8/5/1995	2/9/1996, 61 FR 4895	Sec. 2 to 7.
Article 14. Emission Standards for Hazardous Air Pollutants				
14-1	General Provisions	5/13/1988	9/17/1992, 57 FR 42889	
14-8	Emission Standard for Equipment Leaks (Fugitive Emission Sources).	5/13/1988	9/17/1992, 57 FR 42889	
14-9	Emission Limitations for Benzene from Furnace Coke Oven By-Product Recovery Plants.	5/13/1988	9/17/1992, 57 FR 42889	
Article 15. Lead Rules				
Rule 1. Lead Emission Limitations				
15-1-2	Source-specific provisions	3/1/2013	7/17/2015, 80 FR 42393.	
15-1-3	Control of fugitive lead dust	3/1/2013	7/17/2015, 80 FR 42393.	
15-1-4	Compliance	3/1/2013	7/17/2015, 80 FR 42393.	
Article 16. State Environmental Policy				
16-3	General Conformity	7/6/1996	1/14/1998, 63 FR 2146	Sec. 1.
Article 19. Mobile Source Rules				
19-3	Clean Fuel Fleet Vehicles	1/18/1996	3/21/1996, 61 FR 11552	
Article 20. Hazardous Air Pollutants				
Rule 10 Bulk Gasoline Distribution Facilities				
20-10-1	Applicability; incorporation by reference of federal standards.	11/14/1999	5/31/2002, 67 FR 38006.

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.770, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

§ 52.771 Classification of regions.

(a) The Indiana plan was evaluated on the basis of the following classifications:

Air quality control region	Pollutant				
	Particulate matter	Sulfur oxides	Nitrogen dioxide	Carbon monoxide	Photochemical oxidants (hydrocarbons)
East Central Indiana Intrastate	II	II	III	III	III
Evansville (Indiana)-Owensboro-Henderson (Kentucky) Interstate	I	II	III	III	III
Louisville Interstate	I	I	III	III	I
Metropolitan Chicago Interstate (Indiana-Illinois)	I	I	I	I	I
Metropolitan Cincinnati Interstate	I	II	III	III	I
Metropolitan Indianapolis Intrastate	I	I	I	I	I
Northeast Indiana Intrastate	II	III	III	III	III
South Bend-Elkhart (Indiana)-Benton Harbor (Michigan) Interstate	I	IA	III	III	III
Southern Indiana Intrastate	IA	IA	III	III	III
Wabash Valley Intrastate	I	I	III	III	III

(b) The requirements of § 51.150 of this chapter are not met by the classification of counties in APC-22 for the purposes of attainment and maintenance of the total suspended particulate ambient air quality standards.

(c) The requirements of § 51.150 of this chapter are not met by the classification of counties in APC-22 for the purposes of attainment and maintenance of the photochemical oxidant (hydrocarbon) ambient air quality standards.

(d) The requirements of § 51.150 of this chapter are not met by the classification of Jefferson, LaPorte, Porter, Vigo and Warrick Counties in Indiana in Regulation APC-22 for the purposes of attainment and maintenance of the sulfur dioxide ambient air quality standards.

[37 FR 10863, May 31, 1972, as amended at 39 FR 16346, May 8, 1974; 40 FR 50033, Oct. 28, 1975; 41 FR 35677, Aug. 24, 1976; 42 FR 34519, July 6, 1977; 51 FR 40675, Nov. 7, 1986]

§ 52.772 [Reserved]

§ 52.773 Approval status.

(a) With the exceptions set forth in this subpart, the Administrator approves Indiana's plan for attainment and maintenance of the National Ambient Air Quality Standards under section 110 of the Clean Air Act.

(b) [Reserved]

(c) The Administrator finds that Indiana's new source review strategy satisfies all requirements of Part D, Title 1 of the Clean Air Act as amended in 1977.

(d)–(e) [Reserved]

(f) The Administrator finds ozone strategies for Clark, Elkhart, Floyd, Lake, Marion, Porter, and St. Joseph Counties satisfy all requirements of Part D, Title I of the Clean Air Act that are required to be submitted by January 1, 1981, except as noted below.

(g) The administrator finds that the total suspended particulate strategies for Clark, Dearborn, Dubois, St. Joseph, Vanderburgh, and Vigo Counties

satisfy all the requirements of Part D, Title I of the Clean Air Act except as noted below.

(h) The Administrator finds that the SO₂ strategies for Lake, LaPorte, Marion, Vigo, and Wayne Counties satisfy all requirements of Part D, Title I of the Clean Air Act, as amended in 1977. See § 52.770 (c)(67) and (c)(72).

(i) The Administrator finds that Indiana's ozone plan for Lake and Porter Counties, which was required to be submitted by July 1, 1992, does not satisfy all the requirements of part D, title 1 of the Clean Air Act and, thus, is disapproved. See §§ 52.770(c)(69) and 52.770(d). The disapproval does not affect USEPA's approval (or conditional approval) of individual parts of Indiana's ozone plan and they remain approved.

(j) The Administrator finds that the following portions of Indiana's ozone and CO plans satisfy the related requirements of part D, title 1 of the Clean Air Act, as amended in 1977:

(1) The transportation control plans for Lake, Porter, Clark and Floyd Counties, submitted on May 14, 1986, June 10, 1986, and April 6, 1987.

(2) The vehicle inspection and maintenance plan for Clark, Floyd, Lake, and Porter Counties, submitted October 27, 1989, and January 19, 1990.

(3) The demonstration of attainment, submitted December 2, 1983, and the carbon monoxide plan as a whole for the designated nonattainment area in Lake County.

[37 FR 10864, May 31, 1972, as amended at 46 FR 38, Jan. 2, 1981; 47 FR 6275, Feb. 11, 1982; 47 FR 6623, Feb. 16, 1982; 47 FR 10825, Mar. 12, 1982; 47 FR 20586, May 13, 1982; 47 FR 30980, July 16, 1982; 51 FR 4915, Feb. 10, 1986; 53 FR 33811, Sept. 1, 1988; 53 FR 46613, Nov. 18, 1988; 54 FR 2118, Jan. 19, 1989; 55 FR 31052, July 31, 1990; 59 FR 51114, Oct. 7, 1994; 75 FR 82554, Dec. 30, 2010; 76 FR 59901, Sept. 28, 2011]

§ 52.774 Determination of attainment.

(a) Based upon EPA's review of the air quality data for the 3-year period 2007–2009, EPA determined that the Louisville, Kentucky-Indiana PM_{2.5} nonattainment Area attained the 1997 annual PM_{2.5} NAAQS by the applicable attainment date of April 5, 2010. Therefore, EPA has met the requirement pursuant to CAA section 179(c) to determine, based on the Area's air qual-

ity as of the attainment date, whether the Area attained the standard. EPA also determined that the Louisville PM_{2.5} nonattainment Area is not subject to the consequences of failing to attain pursuant to section 179(d).

(b) Based upon EPA's review of the air quality data for the 3-year period 2007–2009, EPA determined that the Cincinnati-Hamilton, Ohio, Kentucky, and Indiana PM_{2.5} nonattainment Area attained the 1997 annual PM_{2.5} NAAQS by the applicable attainment date of April 5, 2010. Therefore, EPA has met the requirement pursuant to CAA section 179(c) to determine, based on the Area's air quality as of the attainment date, whether the Area attained the standard. EPA also determined that the Cincinnati-Hamilton, Ohio, Kentucky, and Indiana PM_{2.5} nonattainment Area is not subject to the consequences of failing to attain pursuant to section 179(d).

[76 FR 55545, Sept. 7, 2011, as amended at 76 FR 60375, Sept. 29, 2011]

§ 52.775 Legal authority.

(a) The requirements of § 51.232(b) of this chapter are not met since the following deficiencies exist in the local agency legal authority:

(1) East Chicago: (i) Authority to require recordkeeping is inadequate (§ 51.230(e) of this chapter).

(ii) Authority to require installation of monitoring devices is inadequate (§ 51.230(f) of this chapter).

(2) Evansville: (i) Authority to prevent construction, modification, or operation of any stationary source at any location where emissions from such source will prevent the attainment or maintenance of a national standard is inadequate (§ 51.230(d) of this chapter).

(ii) Authority to require recordkeeping is inadequate (§ 51.230(e) of this chapter).

(iii) Authority to require installation of monitoring devices is inadequate (§ 51.230(f) of this chapter).

(3) Gary: (i) Authority to require recordkeeping is inadequate (§ 51.230(e) of this chapter).

(ii) Authority to require installation of monitoring devices is inadequate (§ 51.230(f) of this chapter).

(4) Hammond: (i) Authority to require recordkeeping is inadequate (§51.230(e) of this chapter).

(ii) Authority to require installation of monitoring devices is inadequate (§51.230(f) of this chapter).

(5) Indianapolis: (i) Authority to require recordkeeping is inadequate (§51.230(e) of this chapter).

(ii) Authority to require installation of monitoring devices is inadequate (§51.230(f) of this chapter).

(6) Michigan City: (i) Authority to require recordkeeping is inadequate (§51.230(e) of this chapter).

(ii) Authority to require installation of monitoring devices is inadequate (§51.230(f) of this chapter).

(7) Wayne County: (i) Authority to require recordkeeping and to make inspections and conduct tests of air pollution sources is inadequate (§51.230(e) of this chapter).

(ii) Authority to require installation of monitoring devices is inadequate (§51.230(f) of this chapter).

(iii) Authority to prevent construction, modification, or operation of any stationary source at any location where emissions from such source will prevent the attainment or maintenance of a national standard is inadequate (§51.230(d) of this chapter).

(8) Lake County: (i) Authority to require installation of monitoring devices is inadequate (§51.230(f) of this chapter).

(ii) Authority to prevent construction, modification, or operation of any stationary source at any location where emissions from such source will prevent the attainment or maintenance of a national standard is inadequate (§51.230(d) of this chapter).

(9) St. Joseph County: (i) Authority to prevent construction, modification, or operation of any stationary source at any location where emissions from such source will prevent the attainment or maintenance of a national standard is inadequate (§51.230(d) of this chapter).

(ii) Authority to require recordkeeping is inadequate (§51.230(e) of this chapter).

(iii) Authority to require installation of monitoring devices is inadequate (§51.230(f) of this chapter).

(10) Vigo County: (i) Authority to require recordkeeping is inadequate (§51.230(e) of this chapter).

(ii) Authority to require installation of monitoring devices is inadequate (§51.230(f) of this chapter).

(iii) Authority to prevent construction, modification, or operation of any stationary source at any location where emissions from such source will prevent the attainment or maintenance of a national standard is inadequate (§51.230(d) of this chapter).

(11) Anderson County: (i) Authority to require installation of monitoring devices is inadequate (§51.230(f) of this chapter).

[37 FR 10863, May 31, 1972, as amended at 40 FR 55329, Nov. 28, 1975; 51 FR 40676, Nov. 7, 1986; 52 FR 24367, June 30, 1987]

§ 52.776 Control strategy: Particulate matter.

(a) The requirements of subpart G of this chapter are not met since the plan does not provide for attainment and maintenance of the secondary standards for particulate matter in the Metropolitan Indianapolis Intrastate Region.

(b) APC 4-R of Indiana's "Air Pollution Control Regulations" (emission limitation for particulate matter from fuel combustion sources), which is part of the control strategy for the secondary standards for particulate matter, is disapproved for the Metropolitan Indianapolis Intrastate Region since it does not provide the degree of control needed to attain and maintain the secondary standards for particulate matter. APC 4-R is approved for attainment and maintenance of the primary standards for particulate matter in the Metropolitan Indianapolis Intrastate Region.

(c) APC-3 of Indiana's Air Pollution Control Regulations (visible emission limitation) is disapproved insofar as the phrase "for more than a cumulative total of 15 minutes in a 24-hour period" will interfere with attainment and maintenance of particulate standards.

(d) [Reserved]

(e) Part D—Conditional Approval—The complete Indiana plan for Clark, Dearborn, Dubois, Marion (except for coke batteries), St. Joseph,

Vanderburgh, and Vigo Counties is approved provided that the following condition is satisfied:

(1) The Part D Plan must contain Industrial Fugitive Dust Regulations. The State must submit these by July 31, 1982.

(f) 325 IAC 11-3-2(f), (as amended on August 27, 1981) is not approved as it applies to Lake and Marion Counties, insofar as it does not meet the requirements of section 172(b)(3) of the Clean Air Act.

(g) 325 IAC 11-3-2(g) and 11-3-2(h) (as amended on August 27, 1981) are disapproved insofar as they do not meet the requirements of section 110(a)(2)(D) of the Clean Air Act.

(h) Equivalent Visible Emission Limits (EVEL). (1) A 20% 2-hour opacity limit for the underfire stack at Bethlehem Steel Corporation's Coke Battery No. 2 in Porter County is approved as an EVEL to determine compliance with the 325 IAC 6-2 SIP limit of 0.33 lbs/MMBTU. This EVEL is approved for as long as the SIP mass emission limit for this source remains the same as determined by 325 IAC 6-2 (October 6, 1980, submittal). See § 52.770(c)(6), (35), and (42).

(2) Revised opacity limits for the boilers at Olin Corporation in Warren County are approved at § 52.770(c)(51) as an EVEL to determine compliance with the 325 IAC 6-2 SIP limit of 0.80 lbs/MMBTU. This EVEL is approved for as long as the SIP mass emission limit for this source remains the same as determined by 325 IAC 6-2 (October 6, 1980 submittal). See § 52.770(c)(6) and (35).

(i) 325 IAC 6-2.1 is approved with the State's March 27, 1985, commitment that any "bubble" approved by the State under 325 IAC 6-2.1-2(b) and 3(b) will also be subject to the State's general "bubble" regulation, 325 IAC 2-4. The State additionally committed that until such time as 325 IAC 2-4 is approved as a part of the SIP, all such limits approved under the bubbling provisions of 325 IAC 6-2.1-2(b) and 3(b) will be submitted as site specific revisions to the SIP. Unless and until these emission point specific limits are approved as a portion of the SIP, the SIP limit for each individual emission point will remain the general limit calculated by means of the formulae in 325

IAC 6-2.1-2(a) and 3(a), even though a revised emission point specific limit has been adopted by Indiana under 325 IAC 6-2.1-2(b) and 3(b). See 52.770(c)(50).

(j) [Reserved]

(k) On January 18, 1984, Indiana submitted a visible emission limit on coke oven battery doors and a limit on total dissolved solids content of coke quench makeup water for Battery Number One at Citizens Gas and Coke Utility in Marion County. These limits are disapproved because they are impermissible relaxations of requirements for each new major stationary sources, as provided at § 52.21(j)(2) and section 173 of the Clean Air Act. See § 52.770(c)(60).

(l) The revised Porter County TSP plan, as submitted by Indiana on October 15, 1984, is disapproved, because the State did not demonstrate that it assures the attainment and maintenance of the primary TSP NAAQS in Porter County, Indiana. See § 52.770(c)(61).

(m) The Indiana Part D TSP plan is disapproved insofar as it does not contain RACT level opacity limits for certain process fugitive sources in TSP nonattainment areas and, therefore, does not meet the requirements of section 172 of the Clean Air Act.

(n) Approval—On June 23, 1988, and July 17, 1989, the State of Indiana submitted committal SIPs for particulate matter with an aerodynamic diameter equal to or less than 10 micrometers (PM₁₀) for the Group II areas within Marion and Vigo Counties and all of Porter County, respectively. The committal SIPs meet all the requirements identified in the July 1, 1987, promulgation of the SIP requirements for PM₁₀ at 52 FR 24681.

(o) Approval—On November 16, 1988 and September 10, 1992, Indiana submitted the following list of control measures for particulate matter (PM) already in its State Implementation Plan as a Group III Plan: 326 IAC 1-3-2, its air monitoring network, its list of possible additional sites for PM, its Prevention of Significant Deterioration rules and the following control measures which are part of 325 IAC: 2, Permit Review Rules; 5-1, Opacity Limitations; 6-1-1 to 6-1-6, Nonattainment Area Limitations; 6-1-8, Dearborn County; 6-1-9, Dubois County; 6-1-

12, Marion County; 6–1–13, Vigo County; 6–1–14, Wayne County; 6–1–15, Howard County; 6–1–16, Vanderburgh County; 6–1–17, Clark County; 6–1–18, St. Joseph County; 6–2, Particulate Emissions Limitations for Sources of Indirect Heating; 6–3, Process Operations; 6–4, Fugitive Dust Emissions; 11–1, Existing Foundries; 11–4, Fiberglass Insulation Manufacturing; 11–5, Fluoride Emission Limitations for Existing Primary Aluminum Plants.

(p) Approval—On January 13, 1993, the State of Indiana submitted a particulate matter State Implementation Plan revision for the Vermillion County nonattainment area. Additional information was submitted on February 22, 1993, and April 8, 1993. These materials demonstrate that the plan will provide for attainment of the National ambient air quality standards for particulate matter by December 31, 1994, in accordance with section 189(a)(1)(B) of the Clean Air Act.

(q) Approval—On April 8, 1993, and supplemented on June 17, 1997, the State of Indiana submitted a maintenance plan and a request that sections 15, 16, 21, 22, 27, 28, 33 and 34 of Clinton Township in Vermillion County be redesignated to attainment of the National Ambient Air Quality Standard for particulate matter. The redesignation request and maintenance plan satisfy all applicable requirements of the Clean Air Act.

(r) Approval—EPA is approving the PM₁₀ maintenance plan for Lake County that Indiana submitted on September 25, 2002.

(s) *Determination of Attainment.* EPA has determined, as of November 27, 2009, that the Chicago-Gary-Lake County, IL-IN PM_{2.5} nonattainment area, which includes Lake and Porter counties in IN, and the Evansville nonattainment area have attained the 1997 PM_{2.5} NAAQS. These determinations, in accordance with 40 CFR 51.1004(c), suspend the requirements for these areas to submit an attainment demonstration, associated reasonably available control measures, reasonable further progress, contingency measures, and other plan elements related to attainment of the standard for as long as the area(s) continue to meet the 1997 PM_{2.5} NAAQS.

(t) *Determination of Attainment.* EPA has determined, as of March 9, 2011, that the Louisville, IN-KY PM_{2.5} nonattainment area has attained the 1997 PM_{2.5} NAAQS. These determinations, in accordance with 40 CFR 51.1004(c), suspend the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, reasonable further progress, contingency measures, and other plan elements related to attainment of the standards for as long as the area continues to meet the 1997 PM_{2.5} NAAQS.

(u) *Disapproval.* EPA is disapproving the portions of Indiana's Infrastructure SIP for the 2006 24-hour PM_{2.5} NAAQS addressing interstate transport, specifically with respect to section 110(a)(2)(D)(i)(I).

(v) Approval—The 1997 annual PM_{2.5} maintenance plans for the following areas have been approved:

(1) The Evansville area (Dubois, Vanderburgh, and Warrick Counties, and portions of Gibson, Pike, and Spencer Counties), as submitted on April 8, 2011. The maintenance plan establishes 2015 motor vehicle emission budgets for the Evansville area of 2628.35 tons per year for NO_x and 57.05 tons per year for PM_{2.5}, and 2022 motor vehicle emission budgets of 1869.84 tons per year for NO_x and 53.83 tons per year for PM_{2.5}.

(2) The Indianapolis area (Hamilton, Hendricks, Johnson, Marion and Morgan Counties), as submitted on October 20, 2009, and supplemented on May 31, 2011, January 17, 2013, and March 18, 2013. The maintenance plan establishes 2015 motor vehicle emissions budgets for the Indianapolis area of 853.76 tpy for primary PM_{2.5} and 25,314.49 tpy for NO_x and 2025 motor vehicle emissions budgets of 460.18 tpy for primary PM_{2.5} and 13,368.60 tpy for NO_x.

(3) The Indiana portion of the Cincinnati-Hamilton nonattainment area (Lawrenceburg Township in Dearborn County), as submitted on December 9, 2010. The maintenance plan establishes 2015 motor vehicle emissions budgets for the Ohio and Indiana portions of the Cincinnati-Hamilton area of 1,678.60 tpy for primary PM_{2.5} and 35,723.83 tpy for NO_x and 2021 motor vehicle emissions budgets of 1,241.19 tpy for primary PM_{2.5} and 21,747.71 tpy for NO_x.

(4) Approval—On February 1, 2013, Indiana submitted a request to revise the motor vehicle emission budgets (budgets) in the 1997 annual PM_{2.5} maintenance plan for the Lake and Porter County, Indiana maintenance area. The budgets are being revised with budgets developed with the MOVES2010a model. The 2015 motor vehicle emissions budgets for Lake and Porter County, Indiana are 347.30 tpy PM_{2.5} and 10,486.08 tpy NO_x. The 2025 motor vehicle emissions budgets for the Lake and Porter County area are 188.73 tpy PM_{2.5} and 5,472.34 tpy for NO_x.

(5) Approval—On July 2, 2013 Indiana submitted a request to revise the approved MOBILE6.2 motor vehicle emission budgets (budgets) in the 1997 annual fine particulate matter maintenance plan for the Evansville maintenance area. The budgets are being revised with budgets developed with the MOVES2010a model. The 2015 motor vehicle emissions budgets are 199.93 tpy PM_{2.5} and 5,642.95 tpy NO_x. The 2022 motor vehicle emissions budgets are 100.45 tpy PM_{2.5} and 3,173 tpy NO_x.

(6) Approval—The 1997 annual PM_{2.5} maintenance plan for the Indiana portion of the Louisville (KY-IN) (Madison Township, Jefferson County and Clark and Floyd Counties), has been approved as submitted on June 16, 2011. The maintenance plan establishes 2025 motor vehicle emissions budgets for the Louisville area to be 324.04 tpy for primary PM_{2.5} and 9,311.76 tpy for NO_x.

(w) Approval—The 1997 annual PM_{2.5} comprehensive emissions inventories for the following areas have been approved:

(1) Indiana's 2005 NO_x, directly emitted PM_{2.5}, and SO₂ emissions inventory satisfies the emission inventory requirements of section 172(c)(3) for the Evansville area.

(2) Indiana's 2006 NO_x, primary PM_{2.5}, and SO₂ emissions inventories and 2007/2008 VOC and ammonia emission inventories, as submitted on October 20, 2009 and supplemented on May 31, 2011 and March 18, 2013, satisfy the emission inventory requirements of section 172(c)(3) of the Clean Air Act for the Indianapolis area.

(3) Indiana's 2005 NO_x, directly emitted PM_{2.5}, and SO₂ emissions inventory; and 2007 VOCs and ammonia emissions

inventory, satisfy the emissions inventory requirements of section 172(c)(3) for the Cincinnati-Hamilton area.

(4) Indiana's 2005 NO_x, primary PM_{2.5}, and SO₂ emissions inventory satisfies the emission inventory requirements of section 172(c)(3) of the Clean Air Act for Lake and Porter Counties.

(5) Indiana's 2008 NO_x, directly emitted PM_{2.5}, SO₂, VOC, and ammonia emissions inventory satisfies the emission inventory requirements of section 172(c)(3) for the Louisville area.

(x) *Determination of Attainment.* EPA has determined, as of September 29, 2011, that based upon 2007–2009 air quality data, the Cincinnati-Hamilton, Ohio, Kentucky, and Indiana, non-attainment Area has attained the 1997 annual PM_{2.5} NAAQS. This determination, in accordance with 40 CFR 52.1004(c), suspends the requirements for this Area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as this Area continues to meet the 1997 annual PM_{2.5} NAAQS.

(y) Approval—By submittal dated July 3, 2008, Indiana demonstrated satisfaction of the requirements for reasonably available control measures for its portion of the Cincinnati-Hamilton OH-KY-IN area.

[37 FR 15084, July 27, 1972]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.776, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

§ 52.777 Control strategy: photochemical oxidants (hydrocarbons).

(a) The requirements of subpart G of this chapter are not met because the plan does not provide for attainment and maintenance of the national standards for photochemical oxidants (hydrocarbons) in the Metropolitan Indianapolis Intrastate Region by May 31, 1975.

(b) The requirements of subpart G are not met by Revised APC-15 (November 8, 1974 submission) because it does not provide for attainment and maintenance of the photochemical oxidant

(hydrocarbon) standards throughout Indiana.

(c) Part D—Conditional approval—The 1979 Indiana plan for Clark, Floyd, Elkhart, Lake, Marion, Porter, and St. Joseph Counties is approved provided the following conditions are satisfied:

(1) The plan for stationary source volatile organic compound control must contain the following:

(i)–(iv) [Reserved]

(v) For regulation 325 IAC 8-5, Section 6, Perchloroethylene Dry Cleaning, the State must conduct a study to demonstrate that the 1,500 gallons exemption meets RACT requirements and submit the results to EPA within 6 months of the effective date of final rulemaking on 325 IAC 8 for VOC from Group II CTG source categories. If the demonstrated emissions resulting from the State's exemption are not essentially equivalent to those resulting from the RACT requirements, then the State must submit to EPA by July 1, 1983, a rule which requires control of emissions from dry cleaning sources using less than 1,500 gallons of perchloroethylene per year.

(2) The stationary source volatile organic control measures submitted by the State on October 23, 1990, and August 19, 1991, are approved as described in 40 CFR 52.770(c)(87) with the exception of 326 IAC 8-5-4 Pneumatic Rubber Tire Manufacturing, on which USEPA has taken no action. It should be noted that although the State's control measures provide that equivalent test methods, alternative emission controls, and revisions in rule applicability must be submitted to the USEPA as proposed revisions to the State Implementation Plan (SIP), such proposed SIP revisions are not part of the SIP unless and until they are approved as such by the USEPA.

(d) Part D—Disapproval. The 1982 Indiana plan for Lake and Porter County is disapproved because it does not assure the attainment and maintenance of the NAAQS there. See §§ 52.770(c)(69) and 52.773(i). The disapproval does not affect USEPA's approval (or conditional approval) of individual parts of Indiana's ozone plan and they remain approved.

(e) Approval—The Administrator approves the incorporation of the photo-

chemical assessment ambient monitoring system submitted by Indiana on November 15, 1993, into the Indiana State Implementation Plan. This submittal satisfies 40 CFR 58.20(f), which requires the State to provide for the establishment and maintenance of photochemical assessment monitoring stations (PAMS) by November 12, 1993.

(f) *Approval.* The Indiana Department of Environmental Management submitted two ozone redesignation requests and maintenance plans requesting the ozone nonattainment areas to be redesignated to attainment for ozone: South Bend/Elkhart (St. Joseph and Elkhart Counties), submitted on September 22, 1993; Indianapolis (Marion County), submitted on November 12, 1993. The redesignation requests and maintenance plans meet the redesignation requirements in section 107(d)(3)(d) of the Act as amended in 1990. The redesignations meet the Federal requirements of section 182(a)(1) of the Clean Air Act as a revision to the Indiana Ozone State Implementation Plan for the above mentioned counties.

(g) The base year ozone precursor emission inventory requirement of section 182(a)(1) of the Clean Air Act, as amended in 1990, has been satisfied for the following areas: Vanderburgh County in the Evansville Metropolitan Area; Marion County in the Indianapolis Metropolitan Area; and St. Joseph and Elkhart Counties in the South Bend Metropolitan Area.

(h) On November 17, 1993, Indiana submitted two of three elements required by section 182(d)(1)(A) of the Clean Air Act Amendments of 1990 to be incorporated as part of the vehicle miles traveled (VMT) State Implementation Plan intended to offset any growth in emissions from a growth in vehicle miles traveled. These elements are the offsetting of growth in emissions attributable to growth in VMT which was due November 15, 1992, and, any transportation control measures (TCMs) required as part of Indiana's 15 percent reasonable further progress (RFP) plan which was due November 15, 1993. Indiana satisfied the first requirement by projecting emissions from mobile sources and demonstrating that no increase in emissions would take place.

Indiana satisfied the second requirement by determining that no TCMs were required as part of Indiana's 15 percent RFP plan.

(i) Approval—EPA is approving the section 182(f) oxides of nitrogen (NO_x) reasonably available control technology (RACT), new source review (NSR), vehicle inspection/maintenance (I/M), and general conformity exemptions for the Indiana portion of the Chicago-Gary-Lake County severe ozone nonattainment area as requested by the States of Illinois, Indiana, Michigan, and Wisconsin in a July 13, 1994 submittal. This approval does not cover the exemption of NO_x transportation conformity requirements of section 176(c) for this area. Approval of these exemptions is contingent on the results of the final ozone attainment demonstration expected to be submitted in mid-1997. The approval will be modified if the final attainment demonstration demonstrates that NO_x emission controls are needed in the nonattainment area to attain the ozone standard in the Lake Michigan Ozone Study modeling domain.

(j) The base year ozone precursor emission inventory requirement of section 182(a)(1) of the Clean Air Act, as amended in 1990, has been satisfied for Lake and Porter Counties, Indiana.

(k) On June 26, 1995, and June 13, 1997, Indiana submitted a 15 percent rate-of-progress plan for the Lake and Porter Counties portion of the Chicago-Gary-Lake County ozone nonattainment area. This plan satisfies the counties' requirements under section 182(b)(1) of the Clean Air Act, as amended in 1990.

(l) [Reserved]

(m) On July 12, 1995, Indiana submitted a 15 percent rate-of-progress plan for the Clark and Floyd Counties portion of the Louisville ozone nonattainment area. This plan satisfies Clark and Floyd Counties' requirements under section 182(b) of the Clean Air Act, as amended in 1990.

(n) On July 12, 1995, Indiana submitted corrections to the 1990 base year emissions inventory for Clark and Floyd Counties. The July 12, 1995, corrections are recognized revisions to Indiana's emissions inventory.

(o) On July 12, 1995, Indiana submitted as a revision to the Indiana

State Implementation Plan a ride-sharing transportation control measure which affects commuters in Clark and Floyd Counties.

(p) On August 26, 1996, Indiana submitted a rule for the purpose of meeting oxides of nitrogen (NO_x) reasonably available control technology (RACT) requirements under section 182(f) of the Clean Air Act (Act) for the Clark and Floyd Counties moderate ozone nonattainment area. The rule's NO_x control requirements meets RACT for major sources of portland cement kilns, electric utility boilers, and industrial, commercial, or institutional boilers. In addition, on April 30, 1997, Indiana certified to the satisfaction of the United States Environmental Protection Agency that, to the best of the State's knowledge, there are no remaining major sources of NO_x in Clark and Floyd Counties which need RACT rules. Indiana, therefore, has satisfied the NO_x RACT requirements under section 182(f) of the Act for the Clark and Floyd Counties ozone nonattainment area.

(q) Approval—On February 5, 1997, Indiana submitted a transportation control measure under section 108(f)(1)(A) of the Clean Air Amendments of 1990 for Vanderburgh County, Indiana to aid in reducing emissions of precursors of ozone. The transportation control measure being approved as a revision to the ozone state implementation plan is the conversion of at least 40 vehicles from gasoline as a fuel to compressed natural gas.

(r) Indiana's November 15, 1996, request for a 1-year attainment date extension for the Indiana portion of the Louisville moderate ozone nonattainment area which consists of Clark and Floyd Counties is approved. The date for attaining the ozone standard in these counties is November 15, 1997.

(s) Approval—On November 4, 1993, the State of Indiana submitted a maintenance plan and a request that Vanderburgh County be redesignated to attainment of the 1-hour National Ambient Air Quality Standard for ozone. The redesignation request and maintenance plan meet the redesignation requirements in section 107(d)(3)(E) of the Clean Air Act as amended in 1990. The redesignation

meets the Federal requirements of section 182(a)(1) of the Clean Air Act as a revision to the Indiana ozone State Implementation Plan.

(t) Approval—On May 24, 1996, the Indiana Department of Environmental Management submitted a revision to the ozone State Implementation Plan for Lake and Porter Counties. The submittal pertained to a plan for the implementation of the Federal transportation conformity requirements in accordance with 40 CFR part 51 subpart T—Conformity to State or Federal Implementation Plans, Programs, and Projects Developed, Funded or Approved Under Title 23 U.S.C. or the Federal Transit Act.

(u) On December 17, 1997, and January 22, 1998, Indiana submitted the Post-1996 rate-of-progress plan for the Lake and Porter Counties portion of the Chicago-Gary-Lake County ozone nonattainment area. This plan satisfies the counties' requirements under section 182(c)(2)(B) of the Clean Air Act, as amended in 1990. The plan contains a 1999 mobile source vehicle emission budget for volatile organic compounds of 40,897 pounds per average summer day.

(v) Negative declarations—Aerospace coating operations, industrial clean up solvents, industrial wastewater processes, offset lithography operations, business plastics, automotive plastics, and synthetic organic chemical manufacturing industries (SOCMI) batch processes, reactors and distillation units categories. On November 8, 1999, the State of Indiana certified to the satisfaction of the Environmental Protection Agency that no major sources categorized as part of the nine categories listed above and have a potential to emit 100 tons or more of volatile organic compounds annually are located in Clark or Floyd Counties in southeast Indiana, adjacent to Louisville, Kentucky.

(w) Negative declarations—Aerospace coating operations, industrial clean up solvents, industrial wastewater processes, offset lithography operations, business plastics, automotive plastics, and synthetic organic chemical manufacturing industries (SOCMI) batch processes, reactors and distillation units categories. On November 8, 1999,

and January 10, 2000, the State of Indiana certified to the satisfaction of the Environmental Protection Agency that no major sources categorized as part of the nine categories listed above and have a potential to emit 25 tons or more of volatile organic compounds annually are located in Lake or Porter Counties in northwest Indiana.

(x) The request submitted by Indiana on April 11, 2001 and supplemented on August 24, 2001, to redesignate the Indiana portion of the Louisville moderate interstate ozone nonattainment area from nonattainment to attainment was approved on October 23, 2001. The motor vehicle emissions budgets for VOC and NO_x in the Indiana portion of the Louisville moderate interstate maintenance plan are adequate for conformity purposes and approvable as part of the maintenance plan. The 1-hour ozone standard maintenance plan motor vehicle emission budgets for the entire interstate Louisville area for the purposes of transportation conformity are now 48.17 tons per summer day of VOC and 92.93 tons per summer day of NO_x for the year 2012.

(y) Lake and Porter Counties Attainment Demonstration Approval—On December 21, 2000, Indiana submitted a 1-hour ozone attainment demonstration plan as a requested revision to the Indiana State Implementation Plan. This approval includes: A modeled demonstration of attainment, a plan to reduce ozone precursor emissions by 3 percent per year from 2000 to 2007, and associated conformity budgets for 2002 and 2005, a revision to the NO_x waiver, a contingency measures plan for both the ozone attainment demonstration and the post-1999 ROP plan, the conformity budgets for the 2007 attainment year, until such time that revised budgets are submitted and found adequate for conformity purposes as called for by the state in its commitment to recalculate and apply a revised budget for conformity within two years of the formal release of MOBILE6, the RACM analysis, the commitment to conduct a mid-course review of the attainment status of the Lake Michigan area, and an agreed order between U.S. Steel (currently USX Corporation) and the IDEM signed by IDEM on March 22,

1996, which requires U.S. Steel to establish a coke plant process water treatment plant at its Gary Works. Today's action finalizes approval of Indiana's 1-hour ozone attainment demonstration SIP revision.

(z) EPA is approving a revision to the Indiana SIP submitted by Indiana on June 26, 2003. The revision is for transportation conformity budgets for the Clark and Floyd portion of the Louisville area. The revised 2012 motor vehicle emission budgets (MVEBs) for the total Louisville area are 47.28 tons per day (tpd) for volatile organic compounds (VOC) and 111.13 tpd for oxides of nitrogen.

(aa) Approval—On August 6, 2004, Indiana submitted a revision to the 1-hour ozone attainment plan for Lake and Porter Counties. The revision consists of new motor vehicle emission estimates and new MOBILE6 based motor vehicle emissions budgets. The motor vehicle emissions budget for volatile organic compounds (VOCs) for Lake and Porter Counties, Indiana for the 2005 interim Rate of Progress year is now 15.18 tons per summer day (tpd). The 2007 motor vehicle emissions budgets for the Lake and Porter Counties, Indiana are now 12.37 tpd VOC and 63.33 tpd oxides of nitrogen.

(bb)(1) Approval—On July 15, 2005, Indiana submitted requests to redesignate Greene and Jackson Counties to attainment of the 8-hour ozone National Ambient Air Quality Standard. These requests were supplemented with submittals dated September 6, 2005, September 7, 2005, October 6, 2005, and October 20, 2005. As part of the redesignation requests, the State submitted maintenance plans as required by section 175A of the Clean Air Act. Elements of the section 175 maintenance plan include a contingency plan and an obligation to submit a subsequent maintenance plan revision in 8 years as required by the Clean Air Act. Also included were motor vehicle emission budgets for use to determine transportation conformity in Greene and Jackson Counties. The 2015 motor vehicle emission budgets for Greene County are 1.46 tpd for VOC and 1.54 tpd for NO_x. The 2015 motor vehicle emission budgets for Jackson County are 1.65 tpd for VOC and 3.18 tpd for NO_x.

(2) Approval—On July 8, 2013, Indiana submitted a request to revise the approved MOBILE6.2 motor vehicle emission budgets (budgets) in the 1997 8-hour ozone maintenance plan for the Greene County, Indiana area. The budgets are being revised with budgets developed with the MOVES2010a model. The 2015 budgets for Greene County, Indiana are 0.90 tons per day VOC and 2.31 tons per day NO_x.

(cc)(1) Approval—On August 25, 2005, Indiana submitted a request to redesignate Delaware County to attainment of the 8-hour ozone National Ambient Air Quality Standard. This request was supplemented with a submittal dated October 20, 2005. As part of the redesignation request, the State submitted a maintenance plan as required by section 175A of the Clean Air Act. Elements of the section 175 maintenance plan include a contingency plan and an obligation to submit a subsequent maintenance plan revision in 8 years as required by the Clean Air Act. Also included were motor vehicle emission budgets for use to determine transportation conformity in Delaware County. The 2015 motor vehicle emission budgets for Delaware County are 3.50 tons per day for VOC and 4.82 tons per day for NO_x.

(2) Approval—On August 17, 2012, Indiana submitted a request to revise the approved MOBILE6.2 motor vehicle emission budgets (budgets) in the 1997 8-hour ozone maintenance plan for the Delaware County (Muncie), Indiana area. The budgets are being revised with budgets developed with the MOVES2010a model. The 2015 budgets for Delaware County, Indiana are 2.53 tons per day volatile organic compounds (VOCs) and 7.02 tons per day nitrogen oxides (NO_x).

(dd)(1) Approval—On July 5, 2005, Indiana submitted a request to redesignate Vigo County to attainment of the 8-hour ozone National Ambient Air Quality Standard. This request was supplemented with submittals dated October 20, 2005 and November 4, 2005. As part of the redesignation request, the State submitted a maintenance plan as required by section 175A of the Clean Air Act. Elements of the section 175 maintenance plan include a contingency plan and an obligation to submit

a subsequent maintenance plan revision in 8 years as required by the Clean Air Act. Also included were motor vehicle emission budgets for use to determine transportation conformity in Vigo County. The 2015 motor vehicle emission budgets are 2.84 tons per day for VOC and 3.67 tons per day for NO_x.

(2) Approval—On July 2, 2013, Indiana submitted a request to revise the approved MOBILE6.2 motor vehicle emission budgets (budgets) in the 1997 8-hour ozone maintenance plan for the Vigo County, Indiana area. The budgets are being revised with budgets developed with the MOVES2010a model. The 2015 budgets for Vigo County, Indiana are 2.17 tons per day VOC and 5.07 tons per day NO_x.

(ee)(1) Approval—On June 2, 2005, Indiana submitted a request to redesignate Vanderburgh and Warrick Counties to attainment of the 8-hour ozone National Ambient Air Quality Standard. This request was supplemented with a submittal dated October 20, 2005. As part of the redesignation request, the State submitted a maintenance plan as required by section 175A of the Clean Air Act. Elements of the section 175 maintenance plan include a contingency plan and an obligation to submit a subsequent maintenance plan revision in 8 years as required by the Clean Air Act. Also included were motor vehicle emission budgets for use to determine transportation conformity in Vanderburgh and Warrick Counties. The 2015 motor vehicle emission budgets are 4.20 tons per day for VOC and 5.40 tons per day for NO_x for both counties combined.

(2) Approval—On July 2, 2013, Indiana submitted a request to revise the approved MOBILE6.2 motor vehicle emission budgets (budgets) in the 1997 8-hour ozone maintenance plan for the Vanderburgh and Warrick Counties, Indiana area. The budgets are being revised with budgets developed with the MOVES2010a model. The 2015 budgets for Vanderburgh and Warrick Counties, Indiana are 5.02 tons per day VOC and 12.61 tons per day NO_x.

(ff)(1) Approval—On May 30, 2006, Indiana submitted a request to redesignate Allen County to attainment of the 8-hour ozone National Ambient Air Quality Standard. As part of the redesignation request, the State submitted a

maintenance plan as required by section 175A of the Clean Air Act. Elements of the section 175 maintenance plan include a contingency plan and an obligation to submit a subsequent maintenance plan revision in eight years as required by the Clean Air Act. Also included were motor vehicle emission budgets to determine transportation conformity in Allen County. The 2020 motor vehicle emission budgets are 6.5 tons per day for VOC and 7.0 tons per day for NO_x.

(2) Approval—On July 2, 2013, Indiana submitted a request to revise the approved MOBILE6.2 motor vehicle emission budgets (budgets) in the 1997 8-hour ozone maintenance plan for the Allen County, Indiana area. The budgets are being revised with budgets developed with the MOVES2010a model. The 2020 budgets for Allen County, Indiana are 4.52 tons per day VOC and 9.72 tons per day NO_x.

(gg) Approval—On May 30, 2006, Indiana submitted a request to redesignate LaPorte County to attainment of the 8-hour ozone National Ambient Air Quality Standard. As part of the redesignation request, the State submitted a maintenance plan as required by section 175A of the Clean Air Act. Elements of the section 175 maintenance plan include a contingency plan and an obligation to submit a subsequent maintenance plan revision in eight years as required by the Clean Air Act. The maintenance plan establishes 2020 motor vehicle emission budgets for LaPorte County of 3.40 tons per day for volatile organic compounds (VOC) and 6.50 tons per day for oxides of nitrogen (NO_x).

(hh)(1) Approval—On May 30, 2006, Indiana submitted a request to redesignate St. Joseph and Elkhart Counties to attainment of the 8-hour ozone National Ambient Air Quality Standard. As part of the redesignation request, the State submitted a maintenance plan as required by section 175A of the Clean Air Act. Elements of the section 175 maintenance plan include a contingency plan and an obligation to submit a subsequent maintenance plan revision in eight years as required by the Clean Air Act. Also included were

motor vehicle emission budgets to determine transportation conformity in St. Joseph and Elkhart Counties. The 2020 motor vehicle emission budgets are 6.64 tons per day for volatile organic compounds and 7.73 tons per day for oxides of nitrogen.

(2) Approval—On August 17, 2012, Indiana submitted a request to revise the approved MOBILE6.2 motor vehicle emission budgets (budgets) in the 1997 8-hour ozone maintenance plan for the South Bend/Elkhart, Indiana area. The budgets are being revised with budgets developed with the MOVES2010a model. The 2020 budgets for South Bend/Elkhart, Indiana are 6.73 tons per day volatile organic compounds (VOCs) and 13.95 tons per day nitrogen oxides (NO_x).

(ii) Approval—On November 15, 2006, Indiana submitted a request to redesignate the Indiana portion of the Louisville 8-hour ozone nonattainment area (Clark and Floyd Counties) to attainment of the 8-hour ozone National Ambient Air Quality Standard. As part of the redesignation request, the State submitted a maintenance plan as required by section 175A of the Clean Air Act. Elements of the section 175 maintenance plan include a contingency plan and an obligation to submit a subsequent maintenance plan revision in eight years as required by the Clean Air Act. Also included were motor vehicle emission budgets to determine transportation conformity for the entire Louisville area. The 2003 and 2020 motor vehicle emission budgets are 40.97 tons per day for VOC and 95.51 tons per day for NO_x, and 22.92 tons per day for VOC and 29.46 tons per day for NO_x, respectively.

(jj)(1) Approval—On March 26, 2007, Indiana submitted a request to redesignate Boone, Hamilton, Hancock, Hendricks, Johnson, Madison, Marion, Morgan, and Shelby Counties (the Central Indiana Area) (Indianapolis ozone nonattainment area) to attainment of the 8-hour ozone National Ambient Air Quality Standard. As part of the redesignation request, the State submitted an ozone maintenance plan as required by section 175A of the Clean Air Act. Part of the section 175A maintenance plan includes a contingency plan. The ozone maintenance plan establishes

2006 motor vehicle emission budgets for the Central Indiana Area of 54.32 tons per day for volatile organic compounds (VOC) and 106.19 tons per day for nitrogen oxides (NO_x) and 2020 motor vehicle emission budgets for the Central Indiana Area of 29.52 tons per day for VOC and 35.69 tons per day for NO_x.

(2) Approval—On April 16, 2012, Indiana submitted a request to revise the approved MOBILE6.2 motor vehicle emission budgets (budgets) in the 1997 8-hour ozone maintenance plan for the Central Indiana area. The budgets are being revised with budgets developed with the MOVES2010a model. The 2006 budgets for Central Indiana are 64.32 tons per day volatile organic compounds (VOCs) and 210.93 tons per day nitrogen oxides (NO_x) and 2020 budgets are 25.47 tons per day VOCs and 69.00 tons per day of NO_x.

(kk) Approval—On October 25, 2007, the Indiana Department of Environmental Management (IDEM) requested that EPA find that the Indiana portion of the Chicago-Gary-Lake County, IL-IN nonattainment area, has attained the revoked 1-hour ozone NAAQS. After review of this submission, EPA approves this finding.

(ll) Lake/Porter Co 8-hr Ozone NO_x Waiver—On June 5, 2009, the Indiana Department of Environmental Management (IDEM) requested that EPA grant a waiver from the Clean Air Act requirement for Nitrogen Oxides (NO_x) Reasonably Available Control Technology (RACT) in Lake and Porter Counties. After review of this submission, EPA approves and grants this NO_x RACT waiver to Lake and Porter Counties.

(mm) Lake/Porter Co 8-hr Ozone Finding of Attainment—On June 5, 2009, the Indiana Department of Environmental Management (IDEM) requested that EPA find that the Indiana portion of the Chicago-Gary-Lake County, Illinois-Indiana (IL-IN) ozone nonattainment area has attained the 1997 8-hour ozone National Ambient Air Quality Standard (NAAQS). After review of this submission and 2006–2008 ozone air quality data for this ozone nonattainment area, EPA finds that Lake and Porter Counties and the entire Chicago-Gary-Lake County, IL-IN

area have attained the 1997 8-hour ozone NAAQS.

(nn) Approval—Indiana's 2002 inventory satisfies the base year emissions inventory requirements of section 172(c)(3) of the Clean Air Act for the Indiana portion of the Cincinnati-Hamilton, OH-KY-IN area under the 1997 8-hour ozone standard.

(oo)(1) Approval—On January 21, 2010, the Indiana Department of Environmental Management submitted a request to redesignate the Indiana portion of the Cincinnati-Hamilton, OH-KY-IN area to attainment of the 8-hour ozone NAAQS. As part of the redesignation request, the State submitted a maintenance plan as required by section 175A of the Clean Air Act. Elements of the section 175 maintenance plan include a contingency plan and an obligation to submit a subsequent maintenance plan revision in 8 years as required by the Clean Air Act. The 2015 motor vehicle emissions budgets for the Ohio and Indiana portions of the Cincinnati-Hamilton, OH-KY-IN area are 31.73 tpd for VOC and 49.00 tpd for NO_x. The 2020 motor vehicle emissions budgets for the Ohio and Indiana portions of the area are 28.82 tpd for VOC and 34.39 tpd for NO_x.

(2) Approval—On December 11, 2012, Indiana submitted a request to revise the approved MOBILE6.2 motor vehicle emission budgets (budgets) in the 1997 8-hour ozone maintenance plan for the Indiana portion of the Cincinnati-Hamilton, OH-KY-IN maintenance area. The budgets are being revised with budgets developed with the MOVES2010a model. The 2015 motor vehicle emissions budgets for the Ohio and Indiana portions are 56.06 tpd VOC and 94.25 tpd NO_x. The 2020 motor vehicle emissions budgets for the Ohio and Indiana portions of the area are 42.81 tpd VOC and 73.13 tpd for NO_x.

(pp)(1) Approval—On June 5, 2009, the Indiana Department of Environmental Management submitted a request to redesignate Lake and Porter Counties to attainment of the 1997 8-hour ozone NAAQS. As part of the redesignation request, the State submitted a maintenance plan as required by section 175A of the Clean Air Act. Elements of the section 175A maintenance plan include a contingency plan and an obligation

to submit a subsequent maintenance plan revision in 8 years, as required by the Clean Air Act. The 2010 motor vehicle emissions budgets for Lake and Porter Counties are 10.5 tpd for VOC and 40.6 tpd for NO_x. The 2020 motor vehicle emissions budgets for Lake and Porter Counties are 6.0 tpd for VOC and 12.6 tpd for NO_x.

(2) Approval—On February 1, 2013, Indiana submitted a request to revise the motor vehicle emission budgets (budgets) in the 1997 8-hour ozone maintenance plan for the Lake and Porter County, Indiana maintenance area. The budgets are being revised with budgets developed with the MOVES2010a model. The 2010 motor vehicle emissions budgets for Lake and Porter County, Indiana are 13.99 tpd VOC and 47.26 tpd NO_x. The 2020 motor vehicle emissions budgets for the Lake and Porter County area are 5.99 tpd VOC and 16.69 tpd for NO_x.

(qq) Approval—Indiana's 2002 VOC and NO_x emissions inventories satisfy the emission inventory requirements of section 182(a)(1) of the Clean Air Act for Lake and Porter Counties under the 1997 8-hour ozone NAAQS.

(rr) Approval—EPA is approving a request submitted by the State of Indiana on October 10, 2006, and supplemented on November 15, 2006, November 29, 2007, November 25, 2008, April 23, 2010 and November 19, 2010, to discontinue the vehicle inspection and maintenance (I/M) program in Clark and Floyd Counties. The submittal also includes Indiana's demonstration that eliminating the I/M programs in Clark and Floyd Counties will not interfere with the attainment and maintenance of the ozone NAAQS and the fine particulate NAAQS and with the attainment and maintenance of other air quality standards and requirements of the CAA. We are further approving Indiana's request to modify the SIP such that I/M is no longer an active program in these areas and is instead a contingency measure in this area's maintenance plan.

(ss) *Disapproval.* EPA is disapproving Indiana's December 5, 2012, ozone redesignation request for Lake and Porter Counties for the 2008 ozone standard. EPA is also disapproving Indiana's motor vehicle emission budgets and

Environmental Protection Agency

§ 52.780

ozone maintenance plan submitted with the redesignation request.

(tt) *Determination of attainment.* As required by section 181(b)(2)(A) of the Clean Air Act, the EPA has determined that the Cincinnati, OH-KY-IN Marginal 2008 ozone nonattainment area has attained the 2008 ozone NAAQS by the applicable attainment date of July 20, 2015.

(uu) *Approval*—On February 23, 2016, the Indiana Department of Environmental Management submitted a request to redesignate the Indiana portion of the Cincinnati, OH-KY-IN area to attainment of the 2008 ozone NAAQS. As part of the redesignation request, the State submitted a maintenance plan as required by section 175A of the Clean Air Act. Elements of the section 175 maintenance plan include a contingency plan and an obligation to submit a subsequent maintenance plan revision in 8 years as required by the Clean Air Act. The 2020 motor vehicle emissions budgets for the Indiana and Ohio portions of the Cincinnati, OH-KY-IN area are 30.02 tons per summer day (TPSD) for VOC and 30.79 TPSD for NO_x. The 2030 motor vehicle emissions budgets for the Indiana and Ohio portions of the area are 18.22 TPSD for VOC and 16.22 TPSD for NO_x.

(vv) On June 15, 2016, Indiana submitted 2011 volatile organic compounds and oxides of nitrogen emissions inventories for the Indiana portion of the Chicago-Naperville, Illinois-Indiana-Wisconsin nonattainment area for the

2008 ozone national ambient air quality standard as a revision of the Indiana state implementation plan. The documented emissions inventories are approved as a revision of the state's implementation plan.

(ww) On June 15, 2016, Indiana submitted a certification that sources of volatile organic compounds or oxides of nitrogen located in Lake and Porter Counties are required to annually submit statements documenting these emissions to the state. This certification is approved as a revision to the state's implementation plan.

[38 FR 16565, June 22, 1973]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.777, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

§ 52.778 Compliance schedules.

(a) The requirements of § 51.262(a) of this chapter are not met since the compliance schedules for sources of nitrogen oxides extend over a period of more than 18 months and periodic increments of progress are not included.

(b)–(c) [Reserved]

(d) The compliance schedule for the source identified below is disapproved as not meeting the requirements of subpart N of this chapter. All regulations cited are air pollution control regulations of the State, unless otherwise noted.

Source	Location	Regulation involved	Date schedule adopted
LAKE COUNTY			
Commonwealth Edison Co. of Indiana, Inc. (State Line Station).	Hammond	APC 13	Jan. 18, 1973.

[38 FR 12698 May 14, 1973, as amended at 39 FR 28158, Aug. 5, 1974; 51 FR 40675, 40676, 40677, Nov. 7, 1986; 54 FR 25258, June 14, 1989]

§ 52.779 [Reserved]

§ 52.780 Review of new sources and modifications.

(a) The requirements of § 51.160(a) of this chapter are not met in that the plan does not contain procedures to enable the State to determine whether construction or modification of coal

burning equipment having a heat input of between 350,000 Btu per hour and 1,500,000 Btu per hour will result in violations of applicable portions of the control strategy and section 4(a)(2)(iii) of APC-19 is disapproved to the extent that it exempts coal burning equipment having a heat input of between 350,000 Btu per hour and 1,500,000 Btu

per hour from pre-construction/modification review.

(b)-(c) [Reserved]

(d) Limited regulation for the review of new sources and modifications. (1) This requirement is applicable to any coal burning equipment other than smokehouse generators, having a heat input of between 350,000 Btu per hour (88.2 Mg-cal/h) and 1,500,000 Btu per hour (378.0 MG cal/h), the construction of which was commenced after May 14, 1973.

(2) No owner or operator shall commence construction or modification of any coal burning equipment subject to this regulation without first obtaining approval from the Administrator of the location and design of such source.

(i) Application for approval to construct or modify shall be made on forms furnished by the Administrator,

(ii) A separate application is required for each source.

(iii) Each application shall be signed by the applicant.

(iv) Each application shall be accompanied by site information, plans, descriptions, specifications, and drawings showing the design of the source, the nature and amount of emissions, and the manner in which it will be operated and controlled.

(v) Any additional information, plans, specifications, evidence, or documentation that the Administrator may require shall be furnished upon request.

(3) No approval to construct or modify will be granted unless the applicant shows to the satisfaction of the Administrator that:

(i) The source will operate without causing a violation of any local, State, or Federal regulation which is part of the applicable plan; and

(ii) The source will not prevent or interfere with attainment or maintenance of any national standard.

(4) (i) Within twenty (20) days after receipt of an application to construct, or any addition to such application, the Administrator shall advise the owner or operator of any deficiency in the information submitted in support of the application. In the event of such a deficiency, the date of receipt of the application for the purpose of paragraph (d)(4)(ii) of this section, shall be

the date on which all required information is received by the Administrator.

(ii) Within thirty (30) days after receipt of a complete application, the Administrator shall:

(a) Make a preliminary determination whether the source should be approved, approved with conditions, or disapproved.

(b) Make available in at least one location in each region in which the proposed source would be constructed, a copy of all materials submitted by the owner or operator, a copy of the Administrator's preliminary determination and a copy or summary of other materials, if any, considered by the Administrator in making his preliminary determination; and

(c) Notify the public, by prominent advertisement in a newspaper of general circulation in each region in which the proposed source would be constructed, of the opportunity for written public comment on the information submitted by the owner or operator and the Administrator's preliminary determination on the approvability of the source.

(iii) A copy of the notice required pursuant to this paragraph shall be sent to the applicant and to state and local air pollution control agencies, having cognizance over the location where the source will be situated.

(iv) Public comments submitted in writing within thirty (30) days after the date such information is made available shall be considered by the Administrator in making his final decision on the application. No later than ten (10) days after the close of the public comment period, the applicant may submit a written response to any comment submitted by the public. The Administrator shall consider the applicant's response in making his final decision. All comments shall be made available for public inspection in at least one location in the region in which the source would be located.

(v) The Administrator shall take final action on an application within thirty (30) days after the close of the public comment period. The Administrator shall notify the applicant in writing of his approval, conditional approval, or denial of the application, and

shall set forth his reasons for conditional approval or denial. Such notification shall be made available for public inspection in at least one location in the region in which the source would be located.

(vi) The Administrator may extend each of the time periods specified in paragraph (d)(4) (ii), (iv) or (v) of this section by no more than 30 days, or such other period as agreed to by the applicant and the Administrator.

(5) The Administrator may impose any reasonable conditions upon an approval, including conditions requiring the source to be provided with:

(i) Sampling ports of a size, number, and location as the Administrator may require,

(ii) Safe access to each port,

(iii) Instrumentation to monitor and record emission data, and

(iv) Any other sampling and testing facilities.

(6) The Administrator may cancel an approval if the construction is not begun within 2 years from the date of issuance, or if during the construction, work is suspended for 1 year.

(7) Any owner or operator subject to the provisions of this regulation shall furnish the Administrator written notification as follows:

(i) A notification of the anticipated date of initial startup of a source not more than 60 days or less than 30 days prior to such date.

(ii) A notification of the actual date of initial startup of a source within 15 days after such date.

(8) Within 60 days after achieving the maximum production rate at which the source will be operated but not later than 180 days after initial startup of such source, the owner or operator of such source shall conduct a performance test(s) in accordance with methods and under operating conditions approved by the Administrator and furnish the Administrator a written report of the results of such performance test.

(i) Such test shall be at the expense of the owner or operator.

(ii) The Administrator may monitor such test and may also conduct performance tests.

(iii) The owner or operator of a source shall provide the Administrator

15 days prior notice of the performance test to afford the Administrator the opportunity to have an observer present.

(iv) The Administrator may waive the requirement of performance tests if the owner or operator of a source has demonstrated by other means to the Administrator's satisfaction that the source is being operated in compliance with all local, State, and Federal regulations which are part of the applicable plan.

(9) [Reserved]

(10) Approval to construct or modify shall not relieve any owner or operator of the responsibility to comply with all local, State, and Federal regulations which are part of the applicable plan.

(11) Any owner or operator who constructs, modifies, or operates a stationary source not in accordance with the application, as approved and conditioned by the Administrator, or any owner or operator of a stationary source subject to this paragraph who commences construction or modification without applying for and receiving approval hereunder, shall be subject to enforcement action under section 113 of the Act.

(e) The requirements of subpart I of this chapter are not met because the State failed to submit a plan for review of new or modified indirect sources.

(f) Regulation for review of new or modified indirect sources. The provisions of § 52.22(b) are hereby incorporated by reference and made a part of the applicable implementation of the plan for the State of Indiana.

(g) Delegation of authority. (1) The Administrator shall have the authority to delegate responsibility for implementing the procedures for conducting source review pursuant to this section in accordance with paragraphs (f) (2), (3), and (4) of this section.

(2) Where the Administrator delegates the responsibility for implementing the procedures for conducting source review pursuant to this section to any Agency, other than a Regional Office of the Environmental Protection Agency, a copy of the notice pursuant to paragraph (d)(4)(iii) of this section shall be sent to the Administrator through the appropriate Regional Office.

§ 52.781

(3) In accordance with Executive Order 11752, the Administrator's authority for implementing the procedures for conducting source review pursuant to this section shall not be delegated, other than to a Regional Office of the Environmental Protection Agency, for new or modified sources which are owned or operated by the Federal Government or for new or modified sources located on Federal lands; except that, with respect to the latter category, where new or modified sources are constructed or operated on Federal lands pursuant to leasing or other Federal agreements, the Federal Land Manager may at his discretion, to the extent permissible under applicable statutes and regulations, require the lessee or permittee to be subject to new source review requirements which have been delegated to a State or local agency pursuant to this paragraph.

(4) The Administrator's authority for implementing the procedures for conducting source review pursuant to this section shall not be redelegated, other than to a Regional Office of the Environmental Protection Agency, for new or modified sources which are located in Indian reservations except where the State has assumed jurisdiction over such land under other laws, in which case the Administrator may delegate his authority to the States in accordance with paragraphs (g) (2), (3), and (4) of this section.

(h) On March 7, 1994, Indiana requested a revision to the State Implementation Plan (SIP) for New Source Review (NSR) to satisfy the requirements of the Clean Air Act Amendments of 1990. The Indiana 326 IAC regulations do not include a definition of "federally enforceable". On July 13, 1994, Pamela Carter, Attorney General of the State of Indiana, sent a letter to USEPA clarifying Indiana's interpretation of the definition of federally enforceable. The letter states that federally enforceable, e.g. as used in 326 IAC 2-3-1, should be interpreted in accordance with the federal definition at 40 CFR 51.165(a)(1)(xiv). The USEPA took the opportunity of rulemaking on the State's submittal to recodify the per-

40 CFR Ch. I (7-1-25 Edition)

mitting SIP to conform to Title 326 the Indiana Administrative Code.

[37 FR 10863, May 31, 1972, as amended at 38 FR 12698, May 14, 1973; 39 FR 4663, Feb. 6, 1974; 39 FR 7281, Feb. 25, 1974; 40 FR 50270, Oct. 29, 1975; 51 FR 40677, Nov. 7, 1986; 59 FR 51114, Oct. 7, 1994]

§ 52.781 Rules and regulations.

(a) [Reserved]

(b) A part of the second sentence in section 3, APC-17, which states "Where there is a violation or potential violation of ambient air quality standards, existing emission sources or any existing air pollution control equipment shall comply with th

(c)-(d) [Reserved]

(e) Section 2(d) of APC-20, Fugitive Dust Emissions, is disapproved because it is unenforceable within the terms of the regulation.

(f) Subsections 3(b)(3) and 3(b)(5) of APC-2 (May 18, 1977) are disapproved because they are unenforceable within the terms of the regulation.

(g) *Disapproval.* EPA is disapproving 326 IAC 25-2-1, 326 IAC 25-2-3 and 326 IAC 25-2-4 as revisions to the Indiana SIP.

(h) *Disapproval.* EPA is disapproving the December 10, 2009 submittal of 326 IAC 7-4-14 as a revision to the Indiana SIP.

[37 FR 10863, May 31, 1972, as amended at 37 FR 15084, July 27, 1972; 38 FR 12698, May 14, 1973; 40 FR 50033, Oct. 28, 1975; 43 FR 26722, June 22, 1978; 75 FR 72965, Nov. 29, 2010; 78 FR 78725, Dec. 27, 2013]

§ 52.782 Request for 18-month extension.

(a) The requirements of § 51.341 of this chapter are not met since the request for an 18-month extension for submitting that portion of the plan that implements the secondary standards for particulate matter in the Metropolitan Indianapolis Intrastate Region does not show that attainment of the secondary standards will require emission reductions exceeding those which can be achieved through the application of reasonably available control technology.

[37 FR 10863, May 31, 1972, as amended at 51 FR 40677, Nov. 7, 1986]

Environmental Protection Agency

§ 52.786

§ 52.783 [Reserved]

§ 52.784 Transportation and land use controls.

(a) To complete the requirements of subpart L and subpart G of this chapter, the Governor of Indiana must submit to the Administrator:

(1) No later than April 15, 1973, transportation and/or land use control strategies and a demonstration that said strategies, along with Indiana's presently adopted stationary source emission limitations for carbon monoxide and hydrocarbons and the Federal Motor Vehicle Control Program, will attain and maintain the national standards for carbon monoxide and photochemical oxidants (hydrocarbons) in the Metropolitan Indianapolis Intrastate Region by May 31, 1975. By such date (April 15, 1973), the State also must submit a detailed timetable for implementing the legislative authority, regulations, and administrative policies required for carrying out the transportation and/or land use control strategies by May 31, 1975.

(2) No later than July 30, 1973, the legislative authority that is needed for carrying out such strategies.

(3) No later than December 30, 1973, the necessary adopted regulations and administrative policies needed to implement such strategies.

[38 FR 7326, Mar. 20, 1973, as amended at 51 FR 40676, Nov. 7, 1986]

§ 52.785 Control strategy: Carbon monoxide.

(a) The requirements of subpart G of this chapter are not met because the plan does not provide for attainment and maintenance of the national standards for carbon monoxide in the Metropolitan Indianapolis Intrastate Region by May 31, 1975.

(b) On December 21, 1999, the Indiana Department of Environmental Management submitted carbon monoxide maintenance plans for those portions of Lake and Marion Counties which they requested the Environmental Protection Agency redesignate to attainment of the carbon monoxide national ambient air quality standard.

(c) Approval—The Indiana Department of Environmental Management (IDEM) submitted Carbon Monoxide

(CO) Limited Maintenance Plan Updates for Lake and Marion Counties on January 12, 2009. The updated Limited Maintenance Plans demonstrate attainment of the CO National Ambient Air Quality Standard (NAAQS) for Lake and Marion Counties for an additional ten years.

[38 FR 16565, June 22, 1973, as amended at 51 FR 40676, Nov. 7, 1986; 65 FR 2888, Jan. 19, 2000; 74 FR 52893, Oct. 15, 2009]

§ 52.786 Inspection and maintenance program.

(a) Definitions:

(1) *Inspection and maintenance program* means a program to reduce emissions from in-use vehicles through identifying vehicles that need emission control related maintenance and requiring that such maintenance be performed.

(2) *Light-duty vehicle* means a motor vehicle rated at 6,000 lb. GVW (gross vehicle weight) or less.

(3) All other terms used in this section that are defined in part 51, subpart G of this chapter, are used herein with the meanings so defined.

(b) This regulation is applicable in the County of Marion, Indiana (including all cities, towns and municipal corporations therein).

(c) The State of Indiana shall establish and cause the implementation of an inspection and maintenance program applicable to all gasoline-powered light duty vehicles which are registered in Marion County. Such program shall conform with this § 52.786. The Consolidated City of Indianapolis, the County of Marion, and other municipalities within the County of Marion, shall take all legislative, executive, or other action necessary to establish and implement the program required by this regulation.

(d) Not later than April 1, 1975, the State of Indiana, the County of Marion and the Consolidated City of Indianapolis shall jointly submit to the Administrator, for his approval, legally adopted legislation and/or regulations establishing the regulatory scheme for the inspection/maintenance program required by paragraph (c) of this section. The legislation and/or regulations shall include:

(1) Provisions requiring inspection of all light-duty motor vehicles subject to the inspection program required by paragraph (c) of this section at periodic intervals no more than 1 year apart by means of an idle test. Any class or category of vehicles that are found to be rarely used on public streets and highways (such as classic or antique vehicles) may be exempted.

(2) Provisions for regulatory criteria that are consistent with achieving an 11 percent reduction of hydrocarbon emissions from light-duty vehicles.

(3) Provisions ensuring that failed vehicles receive, within 30 days, the maintenance necessary to achieve compliance with the inspection standards. These provisions shall impose sanctions against owners of non-complying vehicles, require retest of failed vehicles following maintenance, require a suitable distinctive tag or sticker for display on complying vehicles, and include such other measures as are necessary or appropriate.

(4) Provisions establishing a certification program to ensure that testing stations performing the required tests have the necessary equipment and knowledgeable operators to perform the tests satisfactorily, imposing sanctions against non-complying testing stations, and containing such other measures as necessary or appropriate to a testing program.

(5) Provisions prohibiting vehicles from being intentionally readjusted or modified subsequent to the inspection and/or maintenance in such a way as would cause them no longer to comply with the inspection standards. These may include authorization of spot checks of idle adjustments or of a suitable type of physical seal or tag on vehicles. These provisions shall include appropriate penalties for violation by any person.

(6) Designation of agency or agencies responsible for conducting, overseeing, and enforcing the inspection/maintenance program. Private parties may be designated to conduct parts of the program to certify compliance.

(e) After July 1, 1976, the State of Indiana, County of Marion, the Consolidated City of Indianapolis, and other municipalities in Marion County shall not allow the operation on streets,

roads, or highways under their ownership or control of any light duty motor vehicle subject to the inspection program established pursuant to paragraph (c) of this section that does not comply with the applicable standards and procedures adopted in accordance with paragraph (d) of this section.

(f) After July 1, 1976, no person shall operate or allow the operation of any motor vehicle subject to the inspection program established pursuant to paragraph (c) of this section that does not comply with the applicable standards and procedures adopted in accordance with paragraph (d) of this section.

(g) No later than October 1, 1974, the State of Indiana, County of Marion, and the Consolidated City of Indianapolis shall jointly submit to the Administrator, for his approval, a detailed compliance schedule showing the steps they will take to establish, operate and enforce the inspection program required by paragraph (c) of this section including:

(1) A detailed description of the inspection program required by paragraph (c) of this section (including a description of the way in which the program will be established, operated, and enforced and the respective responsibilities of the State, county, and municipalities for such tasks).

(2) A description of the legal authority for establishing and enforcing the inspection/maintenance program, including the text of proposed or adopted legislation and regulations.

(3) Specific dates (day, month, and year) by which various steps to implement the inspection/maintenance system will be completed, such steps to include, at a minimum, the following: submitting final plans and specifications for the system to the Administrator for this approval (this date to be no later than February 1, 1975), ordering necessary equipment (this date to be no later than April 15, 1975), commencement of onsite construction and/or installation, and system operational (this date to be no later than April 15, 1975), commencement of onsite construction and/or installation, and system operational (this date to be no later than July 1, 1975).

(4) An identification of the sources and amounts of funds necessary to implement the system together with written assurances from the chief executive officers of the State, city, and county that they will seek such necessary funding from the appropriate legislative bodies.

(5) Other provisions necessary or appropriate to carry out the program.

(h) The State's December 2, 1992, commitment to timely adopt and implement enhanced inspection and maintenance (I/M) rules for Lake and Porter Counties is disapproved based on the failure of the State of Indiana to meet important milestones pertaining to the development and adoption of necessary authority for the I/M program. This disapproval initiates the sanction process of section 179(a) of the Act.

[39 FR 12348, Apr. 5, 1974, as amended at 46 FR 38, Jan. 2, 1981; 51 FR 40677, Nov. 7, 1986; 55 FR 31052, July 31, 1990; 58 FR 62535, Nov. 29, 1993]

§ 52.787 Gasoline transfer vapor control.

(a) *Gasoline* means any petroleum distillate having a Reid vapor pressure of 4 pounds or greater.

(b) This section is applicable in the County of Marion, Indiana (including all cities, towns and municipal corporations therein).

(c) No person shall transfer or permit the transfer of gasoline from any delivery vessel into any stationary source container with a capacity greater than 250 gallons unless such container is equipped with a submerged fill pipe and unless the displaced vapors from the storage container are processed by a control system that prevents release to the atmosphere of no less than 90 percent by weight of organic compounds in said vapors displaced from the stationary storage container location. The control system shall include one or more of the following:

(1) A vapor-tight return line from the storage container to the delivery vessel and a system that will ensure that the vapor return line is connected before gasoline can be transferred into the container. If a "vapor-balance return" system is used to meet the requirements of this section, the system shall

be so constructed as to be readily adapted to retrofit with an adsorption system, refrigeration-condensation system or equivalent system connected to the stationary storage container.

(2) Refrigeration-condensation system or adsorption system connected to the stationary storage container.

(3) An equivalent system, approved by the Administrator or his designee, designed to recover or eliminate no less than 90 percent by weight of the organic compounds in the displaced vapor.

(d) No person shall own or operate a delivery vessel containing gasoline unless the delivery vessel is so designed and maintained as to be vapor-tight at all times. This paragraph (d) shall not apply to delivery vessels in transit through Marion County which neither are filled nor deliver gasoline therein, nor shall this paragraph (d) be construed to prohibit safety-valves on other devices required by governmental safety regulations. Delivery vessels which are filled in Marion County but do not deliver in Marion County may be controlled only for filling.

(e) No person shall own or operate a facility for the filling of delivery vessels with gasoline unless the facility is equipped with a control system, which can recover or eliminate at least 90 percent by weight of the organic compounds in the vapors displaced from the delivery vessel during refilling. Facilities which have a daily throughput of 20,000 gallons or less are required to have a vapor recovery system in operation no later than May 31, 1977. Delivery vessels and storage containers served exclusively by facilities required to have a vapor recovery system in operation no later than May 31, 1977, also will be required to meet the provisions of this section no later than May 31, 1977.

(f) After March 1, 1976, no person shall intentionally release gasoline vapors from a delivery vessel, except to a control system that can recover or eliminate at least 90 percent by weight of organic compounds in the vapors released.

(g) The provisions of paragraph (c) of this section shall not apply to the following:

(1) Stationary containers having a capacity less than 550 gallons used exclusively for the fueling of farming equipment.

(2) Any stationary container having a capacity less than 2,000 gallons installed prior to promulgation of this paragraph.

(3) Transfer made to storage tanks equipped with floating roofs or their equivalent.

(4) Gasoline storage compartments of 1,000 gallons or less in gasoline delivery vessels in use on the promulgated date of this regulation will not be required to be retrofitted with a vapor return system until January 1, 1977.

(h) The operation of a source, otherwise, subject to paragraph (c), (d), or (e) of this section, shall not be a violation of paragraph (c), (d), or (e), respectively, if the following acts shall be completed with respect to such source before the following dates:

(1) October 1, 1974. The owner of the source or his designee shall submit to the Administrator, a final control plan, which describes at a minimum the steps that will be taken by the source to achieve compliance with the applicable provisions of paragraphs (c), (d), and (e) of this section.

(2) March 1, 1975. Negotiate and sign all necessary contracts for control systems, or issue orders for the purchase of component parts to accomplish emission control.

(3) May 1, 1975. Initiate on-site construction or installation of control system equipment.

(4) February 1, 1976. Complete on-site construction or installation of control system equipment.

(5) March 1, 1976. Achieve final compliance with the applicable provisions of paragraphs (c), (d), and (e) of this section.

(6) Any owner of a source subject to the compliance schedule in this paragraph shall certify to the Administrator, within 5 days after the deadline for each increment of progress, whether or not the required increment of progress has been met.

(i) As an alternative to compliance with the schedule under paragraph (h) of this section:

(1) The owner of a source which is in compliance with the provisions of para-

graph (c), (d), or (e) of this section, shall certify such compliance to the Administrator by October 1, 1974. The Administrator may request whatever supporting information he considers necessary for proper certification.

(2) A source for which a compliance schedule is adopted by the State and approved by the Administrator may operate in conformity with such compliance schedule.

(3) The owner of a source may submit to the Administrator, by October 1, 1974, a proposed alternative compliance schedule. No such schedule may provide for compliance after March 1, 1976. Until promulgated by the Administrator, such source shall conform with applicable portions of paragraph (c), (d), (e), or (h) of this section. Upon promulgation of the compliance schedule by the Administrator, no person shall own or operate the source except in conformity with the promulgated schedule.

(j) Nothing in this section shall preclude the Administrator from promulgating a separate schedule for any source to which the application of the compliance schedule in paragraph (h) of this section fails to satisfy the requirements of § 51.15 (b) and (c) of this chapter.

(k) Any new container, facility, or vessel subject to this regulation that is placed in operation after October 1, 1974, shall within 30 days of commencing operation submit a compliance schedule in conformity with paragraph (i) of this section and shall otherwise comply with this section. Any facility subject to this regulation that is placed in operation after March 1, 1976, shall comply with the applicable requirements of this section immediately upon commencing operation.

[39 FR 12349, Apr. 5, 1974, as amended at 39 FR 41253, Nov. 26, 1974; 41 FR 56643, Dec. 29, 1976; 42 FR 29004, June 7, 1977]

§ 52.788 Operating permits.

Emission limitations and other provisions contained in operating permits issued by the State in accordance with the provisions of the federally approved permit program shall be the applicable requirements of the federally approved State Implementation Plan (SIP) for Indiana for the purpose of sections

112(b) and 113 of the Clean Air Act and shall be enforceable by the United States Environmental Protection Agency (USEPA) and any person in the same manner as other requirements of the SIP. USEPA reserves the right to deem an operating permit not federally enforceable. Such a determination will be made according to appropriate procedures, and be based upon the permit, permit approval procedures or permit requirements which do not conform with the operating permit program requirements or the requirements of USEPA's underlying regulations.

[60 FR 43012, Aug. 18, 1995]

§ 52.789 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of nitrogen oxides?

(a)(1) The owner and operator of each source and each unit located in the State of Indiana and for which requirements are set forth under the CSAPR NO_x Annual Trading Program in subpart AAAAA of part 97 of this chapter must comply with such requirements. The obligation to comply with such requirements will be eliminated by the promulgation of an approval by the Administrator of a revision to Indiana's State Implementation Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan under § 52.38(a), except to the extent the Administrator's approval is partial or conditional.

(2) Notwithstanding the provisions of paragraph (a)(1) of this section, if, at the time of the approval of Indiana's SIP revision described in paragraph (a)(1) of this section, the Administrator has already started recording any allocations of CSAPR NO_x Annual allowances under subpart AAAAA of part 97 of this chapter to units in the State for a control period in any year, the provisions of subpart AAAAA of part 97 of this chapter authorizing the Administrator to complete the allocation and recordation of CSAPR NO_x Annual allowances to units in the State for each such control period shall continue to apply, unless provided otherwise by such approval of the State's SIP revision.

(b)(1) The owner and operator of each source and each unit located in the

State of Indiana and for which requirements are set forth under the CSAPR NO_x Ozone Season Group 1 Trading Program in subpart BBBBB of part 97 of this chapter must comply with such requirements with regard to emissions occurring in 2015 and 2016.

(2) The owner and operator of each source and each unit located in the State of Indiana and for which requirements are set forth under the CSAPR NO_x Ozone Season Group 2 Trading Program in subpart EEEEE of part 97 of this chapter must comply with such requirements with regard to emissions occurring in 2017 through 2020. The obligation to comply with such requirements will be eliminated by the promulgation of an approval by the Administrator of a revision to Indiana's State Implementation Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan (FIP) under § 52.38(b)(1) and (b)(2)(ii), except to the extent the Administrator's approval is partial or conditional, provided that because the CSAPR FIP was promulgated as a partial rather than full remedy for an obligation of the State to address interstate air pollution, the SIP revision likewise will constitute a partial rather than full remedy for the State's obligation unless provided otherwise in the Administrator's approval of the SIP revision.

(3) The owner and operator of each source and each unit located in the State of Indiana and for which requirements are set forth under the CSAPR NO_x Ozone Season Group 3 Trading Program in subpart GGGGG of part 97 of this chapter must comply with such requirements with regard to emissions occurring in 2021 and each subsequent year. The obligation to comply with such requirements will be eliminated by the promulgation of an approval by the Administrator of a revision to Indiana's State Implementation Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan (FIP) under § 52.38(b)(1) and (b)(2)(iii), except to the extent the Administrator's approval is partial or conditional.

(4) Notwithstanding the provisions of paragraphs (b)(2) and (3) of this section,

if, at the time of the approval of Indiana's SIP revision described in paragraph (b)(2) or (3) of this section, the Administrator has already started recording any allocations of CSAPR NO_x Ozone Season Group 2 allowances or CSAPR NO_x Ozone Season Group 3 allowances under subpart EEEEE or GGGGG, respectively, of part 97 of this chapter to units in the State for a control period in any year, the provisions of such subpart authorizing the Administrator to complete the allocation and recordation of such allowances to units in the State for each such control period shall continue to apply, unless provided otherwise by such approval of the State's SIP revision.

(5) Notwithstanding the provisions of paragraph (b)(2) of this section, after 2020 the provisions of §97.826(c) of this chapter (concerning the transfer of CSAPR NO_x Ozone Season Group 2 allowances between certain accounts under common control), the provisions of §97.826(d) of this chapter (concerning the conversion of amounts of unused CSAPR NO_x Ozone Season Group 2 allowances allocated for control periods before 2021 to different amounts of CSAPR NO_x Ozone Season Group 3 allowances), and the provisions of §97.811(d) of this chapter (concerning the recall of CSAPR NO_x Ozone Season Group 2 allowances equivalent in quantity and usability to all such allowances allocated to units in the State for control periods after 2020) shall continue to apply.

(6) Notwithstanding any other provision of this part, the effectiveness of paragraph (b)(3) of this section is stayed with regard to emissions occurring in 2024 and thereafter, provided that while such stay remains in effect, the provisions of paragraph (b)(2) of this section shall apply with regard to such emissions.

(c)(1) The owner and operator of each source located in the State of Indiana and for which requirements are set forth in §52.40 and §52.41, §52.42, §52.43, §52.44, §52.45, or §52.46 must comply with such requirements with regard to emissions occurring in 2026 and each subsequent year.

(2) Notwithstanding any other provision of this part, the effectiveness of

paragraph (c)(1) of this section is stayed.

[76 FR 48364, Aug. 8, 2011, as amended at 81 FR 74586 and 74594, Oct. 26, 2016; 83 FR 65924, Dec. 21, 2018; 86 FR 23174, Apr. 30, 2021; 88 FR 36890, June 5, 2023; 89 FR 87969, Nov. 6, 2024]

§ 52.790 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of sulfur dioxide?

(a) The owner and operator of each source and each unit located in the State of Indiana and for which requirements are set forth under the CSAPR SO₂ Group 1 Trading Program in subpart CCCCC of part 97 of this chapter must comply with such requirements. The obligation to comply with such requirements will be eliminated by the promulgation of an approval by the Administrator of a revision to Indiana's State Implementation Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan under §52.39 except to the extent the Administrator's approval is partial or conditional.

(b) Notwithstanding the provisions of paragraph (a) of this section, if, at the time of the approval of Indiana's SIP revision described in paragraph (a) of this section, the Administrator has already started recording any allocations of CSAPR SO₂ Group 1 allowances under subpart CCCCC of part 97 of this chapter to units in the State for a control period in any year, the provisions of subpart CCCCC of part 97 of this chapter authorizing the Administrator to complete the allocation and recordation of CSAPR SO₂ Group 1 allowances to units in the State for each such control period shall continue to apply, unless provided otherwise by such approval of the State's SIP revision.

[76 FR 48364, Aug. 8, 2011, as amended at 81 FR 74586, Oct. 26, 2016]

§ 52.791 Visibility protection.

(a) *Regional Haze.* The requirements of section 169A of the Clean Air Act are not met because the regional haze plan submitted by Indiana on January 14, 2011, and supplemented on March 10, 2011, does not include fully approvable measures for meeting the requirements of 40 CFR 51.308(d)(3) and 51.308(e) with respect to emissions of NO_x and SO₂

Environmental Protection Agency

§ 52.795

from electric generating units. EPA has given limited approval and limited disapproval to the plan provisions addressing these requirements.

(b) *Measures Addressing Limited Disapproval Associated with NO_x*. The deficiencies associated with NO_x identified in EPA's limited disapproval of the regional haze plan submitted by Indiana on January 14, 2011, and supplemented on March 10, 2011, are satisfied by § 52.789.

(c) *Measures Addressing Limited Disapproval Associated with SO₂*. The deficiencies associated with SO₂ identified in EPA's limited disapproval of the regional haze plan submitted by Indiana on January 14, 2011 and supplemented on March 10, 2011 are satisfied by § 52.790.

[77 FR 33657, June 7, 2012]

§ 52.792 [Reserved]

§ 52.793 Significant deterioration of air quality.

(a) The requirements of sections 160 through 165 of the Clean Air Act are not met, since the plan does not include approvable procedures for preventing the significant deterioration of air quality.

(b) *Regulations for preventing significant deterioration of air quality*. The provisions of § 52.21(a)(2) and (b) through (bb) are hereby incorporated and made a part of the applicable state plan for the State of Indiana.

(c) All applications and other information required pursuant to § 52.21 of this part from sources located in the State of Indiana shall be submitted to the state agency, Indiana Department of Environmental Management, Office of Air Quality, 100 North Senate Avenue, Indianapolis, Indiana 46204, rather than to EPA's Region 5 office.

[45 FR 52741, Aug. 7, 1980, as amended at 53 FR 18985, May 26, 1988; 68 FR 11323, Mar. 10, 2003; 75 FR 55275, Sept. 10, 2010]

§ 52.794 Source surveillance.

(a) The requirements of 51.212 of this chapter are not met by the phrase "for more than a cumulative total of 15 minutes in a 24-hour period" contained in section 1 of APC-3 of the Indiana Air Pollution Control Regulations.

(b) [Reserved]

(c) 325 IAC 5-1 (October 6, 1980, submittal—§ 52.770(c)(53)) is disapproved for the Lake County sources specifically listed in Table 2 of 325 IAC 6-1-10.2 (§ 52.770(c)(57)); for pushing and quenching sources throughout the State (August 27, 1981, 325 IAC 11-3-2 (g) and (h)—§ 52.770(c)(42)); and for coke oven doors in Lake and Marion Counties (325 IAC 11-3-2(f)—§ 52.770(c)(42)). Applicability of this regulation to these sources is being disapproved because 325 IAC 5-1 does not meet the enforceability requirements of § 51.22 as it applies to these sources. Opacity limits in 325 IAC 6-1-10.2 and certain opacity limits in 325 IAC 11-3 supersede those in 325 IAC 5-1, and USEPA has previously disapproved these superseding regulations (§ 52.776 (j), (g), and (f), respectively).

[40 FR 50033, Oct. 28, 1975; 41 FR 3475, Jan. 23, 1976, as amended at 48 FR 55860, Dec. 16, 1983; 51 FR 40676, 40677, Nov. 7, 1986; 52 FR 3644, Feb. 5, 1987; 52 FR 23038, June 17, 1987]

§ 52.795 Control strategy: Sulfur dioxide.

(a) Revised APC-13 (December 5, 1974 submission) of Indiana's Air Pollution Control regulations (sulfur dioxide emission limitation) is disapproved insofar as the provisions identified below will interfere with the attainment and maintenance of the suffix dioxide ambient air quality standards:

(1) The phrase "equivalent full load" in section 1(b)(2).

(2) The formula " $E_p = 17.0 Q_m^{0.67}$ where $E_p = E_m \times Q_m$ " in section 2(a).

(3) The phrase "Direct fired process operations" in sections 2(a), 3(c), 4(b), and 4(c).

(4) The modification of Q_m for non-Indiana coal as expressed in Section 2(a).

(b) The requirements of § 51.281 are not met by Warrick and Culley electrical generating stations enforcement orders which would revise the sulfur dioxide emission limitations for these two stations.

(c) The requirements of § 51.110(e) are not met by Wayne, Dearborn, Jefferson, Porter, and Warrick Counties.

(d)-(e) [Reserved]

(f) Approval—On March 14, 1996, the State of Indiana submitted a maintenance plan for Lawrence, Washington,

and Warren Townships in Marion County and the remainder of the county, and requested that it be redesignated to attainment of the National Ambient Air Quality Standard for sulfur dioxide. The redesignation request and maintenance plan satisfy all applicable requirements of the Clean Air Act.

(g) Approval—On June 17, 1996, the State of Indiana submitted a maintenance plan for LaPorte, Vigo, and Wayne Counties and requested redesignation to attainment for the National Ambient Air Quality Standard for sulphur dioxide for each county in its entirety. The redesignation requests and maintenance plans satisfy all applicable requirements of the Clean Air Act.

(h) Approval—On June 21, 2005, and as supplemented on August 11, 2005, the State of Indiana submitted a request to redesignate the Lake County sulfur dioxide (SO₂) nonattainment area to attainment of the NAAQS. In its submittal, the State also requested that EPA approve the maintenance plan for the area into the Indiana SO₂ SIP. The redesignation request and maintenance plan satisfy all applicable requirements of the Clean Air Act.

(i) Approval—On March 28, 2013 the State of Indiana submitted a maintenance plan update for the Lake County, Indiana SO₂ maintenance area. This plan update demonstrates that Lake County will maintain attainment of the 1971 SO₂ NAAQS through 2025. This maintenance plan update satisfies section 175A of the Act.

[41 FR 35677, Aug. 24, 1976, as amended at 42 FR 34519, July 6, 1977; 47 FR 10825, Mar. 12, 1982; 47 FR 39168, Sept. 7, 1982; 49 FR 585, Jan. 5, 1984; 51 FR 40676, 40677, Nov. 7, 1986; 53 FR 1358, Jan. 19, 1988; 54 FR 2118, Jan. 19, 1989; 61 FR 58486, Nov. 15, 1996; 70 FR 56131, Sept. 26, 2005; 78 FR 54176, Sept. 3, 2013]

§ 52.796 Industrial continuous emission monitoring.

(a) APC–8, Appendix I 1.2.3, 3.3, and 6.0 are disapproved because they do not meet the requirements of 40 CFR 51.214.

(b)(1) The requirements of 40 CFR 51, Appendix P 3.3 are hereby incorporated and made a part of the applicable implementation plan for the State of Indiana.

(2) APC–8 does not apply to any source scheduled for retirement by Oc-

tober 6, 1980, or within five years after the promulgation of continuous emission monitoring requirements for that source category in 40 CFR part 51, Appendix P 1.1, provided that adequate evidence and guarantees are provided that clearly show that the source will cease operations on or before such date.

[43 FR 26722, June 22, 1978, as amended at 51 FR 40677, Nov. 7, 1986]

§ 52.797 Control strategy: Lead.

(a)–(b) [Reserved]

(c) On January 12, 1988, Indiana's Office of Air Management (OAM), Indiana Department of Environmental Management, agreed to review all relevant hood designs and performance guidance to determine which criteria to use in determining ongoing compliance with the capture efficiency provisions in 326 IAC 15–1 for Quemetco, Inc., and Refined Metals. Because these efficiencies are closely related to equipment design, OAM believes that a review of the process and control equipment designs and operating parameters should provide the necessary determination of compliance. OAM will work with the Indianapolis local agency, the Indianapolis Air Pollution Control Division, on viable alternatives and will keep USEPA up to date on its progress. OAM anticipates that specific criteria for determining compliance will be incorporated into the sources' operation permits (and forwarded to USEPA for informational purposes), and, should the opportunity arise, 326 IAC 15–1 will be revised to similarly incorporate capture efficiency criteria.

(d) On March 2, 2000, Indiana submitted a maintenance plan for Marion County as part of its request to redesignate the County to attainment of the lead standard.

(e) On April 1, 2009, Indiana submitted an updated maintenance plan under section 175A of the CAA for Marion County for the continued attainment of the 1.5 µg/m³ lead standard.

(f) Approval—Indiana's 2008 lead emissions inventory for the Muncie area, as submitted on April 14, 2016, satisfying the emission inventory requirements of section 172(c)(3) of the Clean Air Act for the Muncie area.

Environmental Protection Agency

§ 52.800

(g) Approval — The 2008 lead maintenance plan for the Muncie, Indiana nonattainment area has been approved as submitted on April 14, 2016.

[53 FR 12905, Apr. 19, 1988, as amended at 53 FR 38722, Oct. 3, 1988; 54 FR 33896, Aug. 17, 1989; 65 FR 29963, May 10, 2000; 74 FR 48662, Sept. 24, 2009; 85 FR 29337, May 15, 2020]

§ 52.798 Small business stationary source technical and environmental compliance assistance program.

The Indiana program submitted on January 14, 1993, as a requested revision to the Indiana State Implementation Plan satisfies the requirements of section 507 of the Clean Air Act Amendments of 1990.

[58 FR 46544, Sept. 2, 1993]

§ 52.799 Transportation conformity.

On June 4, 2010, Indiana submitted the Transportation Conformity Consultation SIP consisting of Metropolitan Planning Organization resolutions and Memorandums of Understanding to address interagency consultation and enforceability of certain transportation related control measures and mitigation measures. EPA is approving the Transportation Conformity SIP from Indiana.

[75 FR 50710, Aug. 17, 2010]

§ 52.800 Original identification of plan section.

(a) This section identifies the original “Air Implementation Plan for the State of Indiana” and all revisions submitted by Indiana that were Federally approved prior to December 31, 2009.

(b) The plan was officially submitted on January 31, 1972.

(c) The plan revisions listed below were submitted on the dates specified.

(1) The State Air Pollution Control Board submitted a SO₂ control strategy for the City of Indianapolis on March 16, 1972.

(2) The Governor submitted Pub. L. 100, Regulation APC 12-R and 13 through 17 on April 11, 1972.

(3) On May 1, 1972, the Governor’s office submitted an errata sheet and revised pages for the State plan.

(4) A request for a nine month extension to achieve secondary SO₂ stand-

ards in the Indianapolis Region was made by the Governor on May 16, 1972.

(5) The State Air Pollution Control Board submitted additional information on surveillance methodology (non-regulatory) on May 17, 1972.

(6) Regulation APC 4-R was transmitted by the Governor on June 30, 1972.

(7) Assurance that emission data for sources was available for public inspection was given on July 24, 1972, by the Technical Secretary to the Indiana Board.

(8) Clarification of a policy on availability of emission data to the public sent August 17, 1972, by the Technical Secretary to the Indiana Board.

(9) On September 15, 1972, amendments to State control regulations 13, 15 and 16 were submitted to the Governor.

(10) On May 8, 1973, the Governor submitted a new regulation (APC-19) which replaced APC-1.

(11) The Governor submitted a transportation control plan for Marion County on October 19, 1973.

(12) On March 7, 1974, the Technical Secretary of the Air Pollution Control Board, acting for the Governor of Indiana, submitted new regulation APC-20.

(13) On October 3, 1974, the Technical Secretary submitted revised regulations APC-16 covering CO, APC-17 covering NO₂ and a new regulation APC-22 covering classification of counties for SO₂, oxidants, particulates, NO₂ and CO.

(14) On November 8, 1974, the Technical Secretary submitted revised regulation APC-3 covering visible emissions and revised regulation APC-15 covering hydrocarbons.

(15) On December 5, 1974, the Technical Secretary submitted revised regulation APC-13 covering SO₂. On July 18, 1975, an updated Technical Support Document on APC-13 was submitted by the Technical Secretary.

(16) On June 14, 1976, the Technical Secretary submitted enforcement orders varying the final sulfur dioxide emission limitations for the Warrick and Culley electrical generating stations in Warrick County.

(17) On March 16, 1977, the Technical Secretary submitted new regulation

APC-8, Continuous Emission Monitoring; and revised regulations APC-7, Incinerators; and APC-14, Indiana Ambient Air Quality Standards.

(18) On May 18, 1977, the Technical Secretary submitted revised regulation APC-2, Open Burning.

(19) On June 26, 1979, the Governor submitted a revised sulfur dioxide strategy, including regulation APC 13 with appendix, which was promulgated by the State on June 19, 1979 for all areas of the State. This included the Part D sulfur dioxide regulations for Lake, LaPorte, and Marion Counties. On August 27, 1980 and July 16, 1981 the State committed itself to correct conditionally approved items within their strategy. On October 6, 1980, the State submitted a recodified version of APC 13 which was promulgated by the State on August 27, 1980. This included 325 IAC 7, 325 IAC 1.1-6, 325 IAC 1.1-7-2 and 4, 325 IAC 12-5-1 and 2(a), 325 IAC 12-9-1 and 4, and 325 IAC 12-18-1 and 2. EPA is not taking action on: (i) 325 IAC 7 as it applies to Floyd and Vigo Counties, (ii) the 30-day averaging compliance method contained in 325 IAC 7-1-3, and (iii) the stack height provision for NIPSCO's Mitchell Station in the Lake County SO₂ strategy and (4) the stack height provisions for IPALCO's Stout Generating Chemicals Company, and Detroit Diesel Allison's Plant #8 in the Marion County SO₂ strategy.

(20) On June 26, 1979, the State of Indiana submitted to EPA revisions to the ozone and carbon monoxide portions (section 3.3.24) of its Marion County State Implementation Plan. On March 11, 1980, the state submitted revisions to the Marion County technical appendix to section 3.3.24. On May 19, 1980, the state submitted ozone and carbon monoxide attainment demonstrations for Marion County (section 1.5). On September 8, 1980 the state submitted its memoranda of understanding. On October 9 and October 15, 1980, the state submitted documentation concerning interagency coordination and the analysis of transportation control measures. On January 7, 1981, the state submitted corrections and clarifications in response to EPA's notice of proposed rulemaking (45 FR 81070).

(21) On June 26, 1979 Indiana submitted a motor vehicle inspection and maintenance program for Clark, Floyd, Lake, and Porter Counties. Additional commitments were submitted on April 7, 1980; June 12, 1980; August 27, 1980; November 13, 1980 and November 24, 1980.

(22) On June 26, 1979, Indiana made submittals pertaining to section 121 Consultation, section 110(a)(2)(K)—Permit Fees, section 126—Interstate Pollution, section 127—Public Notification, section 128—State Boards and section 110(a)(2)(F) (ii) and (iii)—Continuous Emission Monitoring Additional commitments were secured on April 17, 1980, June 25, 1980, August 1, 1980, November 10, 1980, December 9, 1980, and December 31, 1980. A revised version of Indiana's continuous emission monitoring regulation (325 IAC 3) was submitted on October 6, 1980.

(23) On June 26, 1979, the State of Indiana submitted a revision to provide for modification of the existing air quality surveillance network.

(24) On June 26, 1979, the Governor submitted a revised new source review regulation, APC-19. Additional information and commitments were submitted on June 25, 1980 and May 19, 1981. EPA is not taking action on section 7 of APC-19, Prevention of Significant deterioration.

(25) On June 26, 1979 the Governor submitted revised emission limits for Knauf Fiberglass, Shelby County. Additional information was submitted by November 21, 1979. The emission limitations were recodified as 325 IAC 11-4 and 11-4 Appendix A and were resubmitted on October 6, 1980.

(26) On June 26, 1979 the Governor submitted Indiana's definition regulation, APC-1. The definitions were recodified as 325 IAC 1.1-1 and resubmitted on October 6, 1980. On January 21, 1981 Indiana submitted a revised definition for "positive net air quality benefit." EPA is taking no action on 325 IAC 1.1-1-82, definition of "State Implementation Plan (SIP)."

(27) On October 6, 1980, Indiana submitted Regulation 325 IAC 1.1-2 (formerly APC 14) which includes the primary and secondary ambient air quality standards for ozone and lead.

Environmental Protection Agency

§ 52.800

(28) On February 26, 1981, Indiana submitted a revision to its plan waiving the State's sulfur dioxide air monitoring requirement of section 4(a) of Regulation 325 IAC 7-1 for the area around Public Service of Indiana's Noblesville Generating Station.

(29) On June 26, 1979, May 19, 1980, September 24, 1980, October 9, 1980 and October 15, 1980, Indiana submitted transportation control plans and ozone demonstrations of attainment for Lake, Porter, Clark, Floyd, St. Joseph, Elkhart and Allen Counties. It also submitted a carbon monoxide demonstration of attainment for Lake County. EPA is taking no action on the ozone demonstration of attainment for St. Joseph, Elkhart and Allen Counties.

(30) On April 10, 1981, Indiana submitted revised emission limits for Indiana Farm Bureau Cooperative Association's Beech Grove plant.

(31) On February 11, 1980, Indiana submitted a revised sulfur dioxide strategy for Vigo County. Technical information was submitted on December 10, 1979 and on May 30, 1980. On October 6, 1980, the State submitted a recodified version of the Vigo County Regulations, 325 IAC Article 7, which was promulgated by the State on August 27, 1980. EPA is not taking action on the 30-day averaging compliance method contained in 325 IAC 7-1-3 as it applies to Vigo County.

(32) On November 24, 1981, Indiana submitted site specific emission limitations for Tecumseh Pipe Line Company, Schererville; and Wayne Transportation Division, Richmond.

(33) On February 11, 1980, Indiana submitted APC 15. EPA is taking no action the "bubble" provisions contained in Section 8(a)(2) of revised APC 15.

(34) On June 26, 1979, the Governor of Indiana submitted general TSP RACT emission limits for nonattainment areas. These regulations were amended and recodified as 325 IAC 6-1 and resubmitted on October 6, 1980. On October 6, 1980, the State submitted a revised TSP regulation for process sources, 325 IAC 6-3; a source specific Dearborn County strategy (amendments were submitted on August 10, 1981), 325 IAC 6-1-8; a source specific Dubois County strategy, 325 IAC 6-1-9; and a source specific

Wayne County strategy (amendments were submitted on January 29, 1981), 325 IAC 6-1-14. On February 11, 1980, Indiana submitted a source specific Marion County strategy (amendments were submitted on October 28, 1981), 325 IAC 6-1-12. EPA is deferring rulemaking at this time on the coke battery emission limitations in the Marion County strategy. On January 29, 1981, the State submitted a source specific Vigo County strategy (amendments were submitted on October 28, 1981 and May 7, 1982), 325 IAC 6-1-13; a source specific Howard County strategy, 325 IAC 6-1-15; and a source specific Vanderburgh County strategy (amendments were submitted on October 28, 1981), 325 IAC 6-1-16. EPA is deferring rulemaking at this time on the coke battery emission limitations in the Vigo County strategy and on whether the Howard County strategy currently contains all the elements required by the Clean Air Act. On July 8, 1981, the State submitted a source specific Clark County strategy, 325 IAC 6-1-17, and a source specific St. Joseph County strategy, 325 IAC 6-1-18. On January 29, 1981 and May 7, 1982, the State submitted additional information and commitments.

(35) On October 6, 1980, Indiana submitted its regulations as recodified. Amendments were submitted on January 29, 1981 and March 18, 1981. EPA's approval is directed specifically to the codification numbering system change, not to the substance within each of the codified rules.

(36) [Reserved]

(37) On May 10, 1982, Indiana submitted source specific emission limits contained in operating permits for the Bunge Corporation, Globe Industries, Skyline Corporation, and Dubois County Farm Bureau Co-op Assn., Inc. as revisions to the Indiana SIP.

(38) On April 27, 1982, Indiana submitted source specific TSP emission limits for Huntingburg Wood Products, Jasper Desk Company, Jasper Office Furniture Company, Arist-O-Kraft Company, Mohr Construction Company, Dana Corporation, and Allis Chalmers Corporation. On April 29, 1982, Indiana submitted source specific VOC emission limits for McGee Refining Corporation, Hesco Industries, and Clark Oil and Refining Corporation.

(39) On November 25, 1980, Indiana submitted 325 IAC Article 8, Volatile Organic Compound Regulations. This regulation adds Group II CTG requirements to Indiana's VOC plan and was State promulgated on October 15, 1980. EPA is not taking action on 325 IAC 8-1.1 Section 2(b), Bubble Approach.

(40) On November 24, 1981, Indiana submitted site specific emission limitations for Jeffboat, Inc., Jeffersonville.

(41) On November 23, 1982, Indiana submitted source-specific emission limits for Paul H. Rohe Company, Inc.

(42) On June 26, 1979, Indiana submitted its coke oven battery regulation, APC 9. On October 6, 1980 Indiana resubmitted this regulation recodified as 325 IAC 11-3. On August 27, 1981, Indiana submitted amendments to 325 IAC 11-3. EPA is taking no action on 325 IAC 11-3-2(a), Pre-Carbonization Emissions. It is taking no action on 325 IAC 11-3-2(i), Underfire Particulate and Sulfur Dioxide Emissions, as it applies to Lake County.

(43) On February 26, 1981 and June 22, 1982, Indiana submitted a 9.57 lbs/MMBTU sulfur dioxide emission limit for IMEC's Breed Generating Station in Sullivan County. This limit supersedes that approved at paragraph (c)(19).

(44) On June 28, 1982, Indiana submitted new open burning regulations for Marion County. An amendment was submitted on August 25, 1982.

(45) On March 15, 1983, Indiana submitted a revision to the TSP and SO₂ portions of its SIP in the form of operating permits for the Sisters of Providence Convent in St. Mary-of-the-Woods, Indiana.

(46) On November 29, 1982, and December 9, 1982, Indiana submitted amendments to 325 IAC 11-4, Fiber Glass Insulation Manufacturing (Superfine Process) Limitations.

(47) On August 17, 1983, Indiana submitted emission limits of 1.8 lbs/hr and 2.4 tons/yr for the boilers at Jasper Cabinet Co., Dubois County. The 1.8 lbs/hr limit replaces the 7.6 lbs/hr limit approved for this source in subparagraph 34.

(48) [Reserved]

(49) On March 28, 1983, Indiana submitted a 20% 2-hour opacity limit as an "equivalent visible emission limit" (EVEL) for the underfire stack at Beth-

lehem Steel Corporation's Coke Battery No. 2 in Porter County. This EVEL is approved for as long as the SIP mass emission limit determined from 325 IAC 6-2 (October 6, 1980, submittal) for this source remains in the SIP See (c)(6), (35), and (42).

(50) On December 21, 1983, the Indiana Air Pollution Control Board submitted Indiana Rule 325 IAC 6-2.1, Particulate Emission Limitations for Sources of Indirect Heating. This rule repeals and replaces Indiana Rule 325 IAC 6-2. See §§ 52.770(c)(4) and (c)(35) and § 52.776(i).

(i) *Incorporation by reference.* (A) 325 IAC 6-2.1, revised regulation establishing Particulate Emission Limitations for Sources of Indirect Heating.

(ii) *Additional material.* (A) December 21, 1983, submittal of Finding of Facts and Recommendations of Hearing Officer R. W. James on 325 IAC 6-2.1.

(B) March 27, 1985, commitment letter from the State concerning the procedures the State will use in processing "bubbles" under 325 IAC 6-2.1-2(B) and 3(b). See § 52.776(i).

(51) On February 7, 1983, Indiana submitted revised opacity limits for existing boilers at Olin Corporation, located in Covington, Indiana. These "equivalent visible emission limits" (EVEL) are approved for as long as the SIP mass emission limit determined from 325 IAC 6-2 (October 6, 1980 submittal) for this source remains in the SIP. See § 52.770(c) (6) and (35) and § 52.776(h)(2).

(i) *Incorporation by reference.* (A) EVELs for Olin Corporation contained in Operating Permits issued by IAPCB, dated October 6, 1981.

(ii) *Additional material.* (A) September 1, 1983, transmittal by IAPCD's A. Sunderland of Olin's Mass Emission Tests, dated August 26, 1983.

(B) April 5, 1984, letter from IAPCD's E. Stresino transmitting original petition, including Method 9 opacity data.

(52) On February 23, 1984, the Indiana Air Pollution Control Board submitted a revision to Indiana's SO₂ SIP waiving the self-monitoring requirement for Public Service Indiana's Edwardsport Generating Station, as set forth in section 4(a) of Rule 325 IAC 7-1. See (c)(19). This revision becomes effective once the Edwardsport Station achieves an annual operating capacity of no greater than 10%.

(53) On October 6, 1980, Indiana submitted revised opacity regulation 325 IAC 5-1. It replaces 1972 APC 3 for process sources, approved at paragraph (b), and SIP 1974 APC 3 for combustion sources, approved in part at subparagraph (c)(14). Indiana does not intend 325 IAC 5-1 to regulate the emission points in Lake County listed in Table 2 of 325 IAC 6-1-110.2 (subparagraph (c)(57)). USEPA is disapproving 325 IAC 5-1 for these sources. Indiana does not intend 325 IAC 5-1 to regulate certain coke battery emission sources listed in 325 IAC 11-3 (subparagraph (c)(42)). USEPA is disapproving 325 IAC 5-1 as it applies to the provisions of 325 IAC 11-3 which USEPA disapproved at (c)(42), i.e., pushing and quenching sources throughout the State and coke oven doors in Lake and Marion Counties. Additionally, Indiana has modified 325 IAC 5-1 as it applies to the stack emission points in Porter County listed at 325 IAC 6-6-4. USEPA disapproved 325 IAC 5-1 as it applies to these Porter County sources on February 5, 1987 (52 FR 3640). For those source categories where USEPA is disapproving 325 IAC 5-1, they remain regulated by the previously approved opacity SIP which consists of SIP 1974 APC 3 for combustion sources and 1972 APC 3 for process sources. Additionally, as long as the Bethlehem Steel Corporation No. 2 Coke Oven Battery Underfire Stack EVEL (subparagraph (c)(49)) remains approved, it replaces 325 IAC 5-1.

(i) *Incorporation by reference.* (A) A letter dated October 6, 1980 from the State of Indiana Air Pollution Control Board and 325 IAC 5-1, Visible Emission Limitations, State promulgated on August 26, 1980.

(ii) *Additional material.* (A) February 12, 1985, letter from the Technical Secretary of the Air Pollution Control Board committing the State to make certain technical changes to 325 IAC 5-1.

(54) On March 28, 1984, Indiana submitted a revised TSP emission limitation for Richmond State Hospital, Wayne County, Indiana. This limitation replaces the one in 325 IAC 6-1-14 which was previously approved at (c)(34).

(i) *Incorporation by reference.* (A) On January 13, 1984, Indiana issued to

Richmond State Hospital an amendment to operating permit, 89-04-85-0153, which revised its TSP emission limitations for the four boilers to 0.60 lbs/MMBTU with an annual total limit of 452 tons/yr.

(55) On January 30, 1985, Indiana submitted revised VOC regulations 325 IAC 8-1.1, 8-2, 8-3, 8-4 and 8-5 to satisfy certain conditions of USEPA's approval. Those regulations amended those approved at (c)(33) and (c)(34). In addition, the applicability of the regulations was extended to cover St. Joseph and Elkhart Counties. USEPA is taking no action on changes to 325 IAC 8-1.1-2(f), Methods of Compliance, and the repeal of 325 IAC 8-5-6, Perchloroethylene Dry Cleaning, because these exempt the compound perchloroethylene from control without the State justifying that such exemption is consistent with the Part D reasonably available control technology (RACT) requirements.

NOTE: If Indiana allows use of a non-USEPA test method in the future, its use must be submitted to USEPA as a SIP revision.

(i) *Incorporation by reference.* (A) Indiana's Volatile Organic Compounds (VOC) RACT I and II regulations, Title 325 Air Pollution Control Board:

(1) 325 IAC 8-1.1, Establishes Volatile Organic Compound Emission Limitations. State promulgated on June 21, 1984, and amended November 7, 1984.

NOTE: 325 IAC 8-1.1-4 Test methods and procedures. If Indiana allows use of a non-USEPA test method in the future, its use must be submitted to USEPA as a SIP revision.

(2) 325 IAC 8-2 Surface Coating Emission Limitations. State promulgated on June 21, 1984, and amended November 7, 1984.

(3) 325 IAC 8-3 Solvent Metal Cleaning Operating Requirements. State promulgated on October 15, 1984, and amended November 7, 1984.

(4) 325 IAC 8-4 Petroleum Sources. State promulgated on June 21, 1984, and amended November 7, 1984.

(5) 325 IAC 8-5 Miscellaneous Operations. State promulgated on June 21, 1984, and amended November 7, 1984.

(56) On September 2, 1983, the Indiana Air Pollution Control Board (Board)

submitted revised emission limitations for Occidental Chemical Corporation (OCC), located in Clark County, Indiana. Amendments to these operating permits were submitted by the State on December 21, 1983. These emission limits replace those approved for OCC (under its former name, Hooker Chemical) at (c)(34).

(i) *Incorporation by reference.* (A) Indiana Air Pollution Control Board Operation Permits:

(1) Control Number 16113, date issued December 27, 1982.

(2) Control Number 16114, date issued December 27, 1982.

(3) Control Number 16115, date issued December 27, 1982.

(ii) *Additional material.* (A) OCC corrected emissions dated September 13, 1984.

(B) OCC's new modeled data, dated November 6, 1984.

(C) State's modeling for OCC and surrounding area, dated July 2, 1984 and August 7, 1984.

(57) On October 11, 1983, October 24, 1983, and April 16, 1984, Indiana submitted a revised Lake County Total Suspended Particulates (TSP) Plan, including regulations 325 IAC 6-1-10.2 and 6-1-11.1. This plan is disapproved. See § 52.776(j).

(58) On November 13, 1984, Indiana submitted 325 IAC 13-2, Motor Vehicle Tampering and Fuel Switching.

(i) *Incorporation by reference.* (A) Indiana Rule 325 IAC 13-2, promulgated by the State on September 24, 1984.

(59) On March 24, 1986, the State of Indiana submitted a negative declaration for synthetic organic chemical manufacturing industry (SOCMI) source leaks and oxidation, and for natural gas/gasoline processing plants. On April 14, 1986, the State of Indiana submitted a negative declaration for manufacturers of high-density polyethylene, polypropylene, and polystyrene resins, and for large petroleum dry cleaners.

(i) *Incorporation by reference.* (A) Letter dated March 24, 1986, from Harry D. Williams, Director, Air Pollution Control Division, Indiana State Board of Health. Letter dated April 14, 1986, from Walter J. Kulakowski, Assistant Commissioner for Air Management,

Department of Environmental Management.

(60) On January 18, 1984, Indiana submitted as a revision to the TSP SIP certain operating conditions and limits for three coke oven batteries at Citizens Gas and Coke Utility in Marion County. The operating permits included conditions and limits for Batteries E, H and Number One with respect to visible emissions from coke oven doors and pushing operations and allowable content of total dissolved solids in quench makeup water. EPA disapproves the limit on coke oven door visible emissions and total dissolved solids content for quench makeup water on Battery Number One, because the limits are inconsistent with that battery's Part C Prevention of Significant Deterioration requirements and Part D Lowest Achievable Emission Rate requirements. See subparagraphs (c)(34) and (c)(42) for further background on actions concerning coke oven batteries.

(i) *Incorporation by reference.* (A) Certificates of Operation Numbers 06895, 06896, and 06897 for Citizens Gas and Coke Utility issued by the City of Indianapolis, dated June 30, 1980, with addition of operating conditions and emission limits, dated September 12, 1983, as adopted by the State on January 4, 1984, and transmitted on January 18, 1984.

(ii) *Additional information.* (A) September 7, 1983, letter from the City of Indianapolis to the State concerning quarterly analysis of coke quenching makeup water.

(61) On October 15, 1984, Indiana submitted a revision to the Porter County total suspended particulate (TSP) plan, including regulation 325 IAC 6-6, which was promulgated by Indiana on November 7, 1984. This plan is disapproved. See § 52.776(l).

(62) On March 4, 1985, Indiana submitted a revision to the Marion County carbon monoxide (CO) plan. USEPA approved this plan based on monitoring and modeling data and a commitment to implement a one-way street pair in the Indianapolis central business district. These elements demonstrate attainment of the CO National Ambient Air Quality Standards by December 31, 1987.

Environmental Protection Agency

§ 52.800

(i) *Incorporation by reference.* (A) Marion County CO plan for attainment and maintenance of the CO NAAQS from Indianapolis Air Pollution Control Division, Sections 1.0, 3.4, 4.1, 4.2, 4.3.1, 4.3.2, 4.4, 5.1, 5.5.4, 6.1, 6.2.1, 6.2.2, 6.3, and 6.4, dated November 12, 1984.

(B) Letter from Indiana forwarding Marion County CO plan to USEPA, dated March 4, 1985.

(ii) *Additional material.* (A) Portion of additional technical information from Indianapolis Air Pollution Control Division, including Section 1.0, dated August 28, 1985.

(B) Letter from Indiana forwarding additional technical information, dated October 7, 1985.

(63) On January 23, 1986, the State submitted revisions to its Stage I Gasoline Dispensing regulations, which replace those conditionally approved at (c)(33), (c)(35)—Codification only, and (c)(55).

(i) *Incorporation by reference.* (A) Letter of January 23, 1986 to EPA from the State of Indiana, and Title 325 Air Pollution Control Board Rule 325 IAC 8-4-6, Gasoline Dispensing Facilities, which was promulgated on January 14, 1986.

(B) Title 325 Air Pollution Control Board Rule 8-1.1-3, Compliance Schedules, subsections (f), (g), and (h), which was promulgated on January 14, 1986.

(64) On January 23, 1986, the State of Indiana submitted to USEPA a revision to the Indiana Lead State Implementation Plan in order to satisfy the requirements of 40 CFR 51.160 through 51.163 and 51.165(b) (formerly 40 CFR 51.18 (a) through (i) and 51.18(k)) for a new source review program, USEPA approved this revision for lead new source review only.

(i) *Incorporation by reference.* (A) Construction and Operating Permit Requirements, 325 IAC 2-1.1 promulgated on January 8, 1986.

(B) Letter of November 17, 1987, to EPA from the Indiana Department of Environmental Management.

(65) On November 30, 1981, Indiana established its air quality surveillance network for lead. On November 21, 1983, Indiana notified USEPA that Corning Glass was shut down. On February 18, 1987, Indiana submitted its regulation to control lead emissions, 325 IAC 15-1.

(i) *Incorporation by reference.* (A) 325 IAC 15-1, Lead Emission Limitations, effective February 27, 1987.

(B) Letter of February 18, from the State of Indiana to EPA.

(ii) *Additional material.* (A) A November 30, 1981, letter from Harry Williams, Technical Secretary, Indiana Air Pollution Control Board establishing Indiana's air quality surveillance network for lead.

(B) A November 21, 1983, letter from Harry Williams, Technical Secretary, confirming that the Corning Glass facility in Wells County was permanently shut down and had been taken out of the State's emission inventory.

(C) A June 9, 1987, letter from Timothy Method, Acting Assistant Commissioner, submitting a general strategy and additional increments of progress required of Hammond Lead.

(66) On October 21, 1987, the State of Indiana submitted 325 IAC 7-1-3.1, Reporting Requirements and Methods to Determine Compliance, as a revision to its SO₂ plan. At paragraph (c)(19) of this section, USEPA approved/conditionally approved Indiana's SO₂ plan, 325 IAC 7-1, for most areas of the State. However, the emission limits in this plan were set aside by the Court of Appeals for the Seventh Circuit because USEPA took no action on the State's 30-day averaging compliance method in 325 IAC 7-1-3. New compliance method 325 IAC 7-1-3.1 replaces former 325 IAC 7-1-3. Therefore, with EPA's approval of 325 IAC 7-1-3.1, USEPA is reinstating its March 12, 1982, approval of Indiana's October 6, 1980, SO₂ rule, 325 IAC 7-1-1, 7-1-2 (except for any emission limits in the below named counties), 7-1-4, 7-1-5, 7-1-6, and 7-1-7. Other than these general provisions and 325 IAC 7-1-3.1, USEPA is not acting on or approving today Indiana's SO₂ plan for Dearborn, Floyd, Gibson, Jefferson, Lake, LaPorte, Marion, Morgan, Porter, Sullivan, Vermillion, Vigo, Warrick, and Wayne Counties. Indiana recodified 325 IAC 7-1-1 through 7-1-7 to 326 IAC 7-1-1 through 7-1-7 and submitted the recodified rules on November 16, 1988.

(i) *Incorporation by reference.* (A) 326 IAC 7-1-1 through 326 7-1-7, Sulfur Dioxide Emission Limitations, as published in the April 1, 1988, *Indiana Register* (IR) at 11 IR 2511.

(67) On February 3, 1988, Indiana submitted its SO₂ plan for Jefferson, LaPorte, Marion, Sullivan, and Wayne Counties; on March 23, 1988, it submitted its SO₂ plan for Vermillion County; and on August 1, 1988, it submitted its SO submitted the same rules in its plans for Jefferson, LaPorte, Marion, Sullivan, and Wayne Counties, as recodified into Title 326 of the Indiana Administrative Code. These plans consist of the provisions and requirements in 326nIAC 7-1 approved or reinstated for these counties at paragraph (c)(66), any SO₂ emission limits in 326 IAC 7-1-2 applicable in these counties (as incorporated by reference at (c)(66)(i)(C)), and the site-specific SO₂ emission limits and other requirements in 326 IAC 7-1-13 (Jefferson County), 326 IAC 7-1-12 (LaPorte County), 326 IAC 7-1-9 (Marion County), 326 IAC 7-1-14 (Sullivan County), 326 IAC 7-1-15 (Vermillion County), 326 IAC 7-1-10.1 (Vigo County), and 326 IAC 7-1-11 (Wayne County).

(i) *Incorporation by reference.* (A) 326 IAC 7-1-13, Jefferson County Sulfur Dioxide Emission Limitations, as published in the April 1, 1988, *Indiana Register* (IR) at 11 IR 2526.

(B) 326 IAC 7-1-12, LaPorte County Sulfur Dioxide Emission Limitations, as published on April 1, 1988, at 11 IR 2526.

(C) 326 IAC 7-1-9, Marion County Sulfur Dioxide Emission Limitations, as published on April 1, 1988, at 11 IR 2518.

(D) 326 IAC 7-1-14, Sullivan County Sulfur Dioxide Emission Limitations, as published on April 1, 1988, at 11 IR 2526.

(E) 326 IAC 7-1-15, Vermillion County Sulfur Dioxide Emission Limitations, as published on March 1, 1988, at 11 IR 1735.

(F) 326 IAC 7-1-10.1, Vigo County Sulfur Dioxide Emission Limitations, as published on August 1, 1988, at 11 IR 3785.

(G) 325 IAC 7-1-11, Wayne County Sulfur Dioxide Emission Limitations, as published on April 1, 1988, at 11 IR 2525.

(68) On December 2, 1983, Indiana submitted its transportation control plans as an element in its ozone strategy for Lake and Porter Counties. Further information was submitted on June 10, 1986.

(i) *Incorporation by reference.* (A) Chapter 7, Mobile Source Strategies and Reductions, Sections A.1.a, 2, and 3 and Exhibits 7-1 and 7-3 of Indiana's 1982 ozone and carbon monoxide plan, as adopted by the Indiana Air Pollution Control Board at its November 2, 1983, meeting.

(B) [Reserved]

(ii) *Additional material.* (A) On June 10, 1986, Indiana submitted a May 23, 1986, letter from the Northwestern Indiana Regional Planning Commission discussing the Lake and Porter Counties' transportation control plans and their implementation.

(B) [Reserved]

(69) On December 2, 1983, Indiana submitted its ozone plan for Lake and Porter Counties, as adopted by the Indiana Air Pollution Control Board on November 2, 1983. On March 2, 1984, Indiana submitted as its attainment demonstration for Lake and Porter Counties, Illinois' attainment demonstration for the greater Chicago area. The greater Chicago attainment demonstration, as submitted by Indiana, and Indiana's overall ozone plan for Lake and Porter Counties is disapproved. See §§ 52.773(i) and 52.777(d). The disapproval does not affect USEPA's approval (or conditional approval) of individual parts of Indiana's ozone plan, and they remain approved. See § 52.770(c) (20), (21), (29), (33), (38), (39), (55), (58), and (59).

(70) On February 3, 1988, and August 23, 1988, Indiana submitted its lead plans for Quemetco, Inc., in Indianapolis; Exide Corporation in Logansport; C and D Power System in Attica; and General Battery Corporation in Frankfort. This included a recodification of its former lead rule, 325 IAC 15-1 (40 CFR 52.770(c)(65)), to 326 IAC 15-1 and revisions to this rule.

(i) *Incorporation by reference.* (A) Title 326—Air Pollution Control Board—Indiana Administrative Code (326 IAC) 15-1, Lead Emission Limitations, as published in the *Indiana Register* (IR) on April 1, 1988, at 11 IR 2564.

(B) Corrections of typographical, clerical, or spelling errors to the document printed at 11 IR 2368 (Indiana's recodified air rules, including 326 IAC 15-1), as published on August 1, 1988, at 11 IR 3921.

Environmental Protection Agency

§ 52.800

(71) On March 23, 1988, Indiana submitted its SO₂ plan for Morgan County; on July 12, 1988, it submitted its SO₂ plan for Floyd County, and on November 16, 1988, it submitted its SO₂ plan for Warrick County. On December 6, 1988, it submitted its Warrick County rule as published in the *Indiana Register*. These plans consist of the provisions and requirements in 326 IAC 7-1 approved or reinstated for these counties at paragraph (c)(66), and SO₂ emission limits in 326 IAC 7-1-2 applicable in these counties (as incorporated by reference at paragraph (c)(66)(i)(C) of this section), and the site-specific SO₂ emission limits and other requirements in 326 IAC 7-1-16 (Floyd County), 326 IAC 7-1-18 (Morgan County), and 326 IAC 7-1-17 (Warrick County).

(i) *Incorporation by reference.* (A) 326 IAC 7-1-16, Floyd County Sulfur Dioxide Emission Limitations, as published in the March 1, 1988, *Indiana Register* (IR) at 11 IR 1737.

(B) 326 IAC 7-1-18, Morgan County Sulfur Dioxide Emission Limitations, as published on June 1, 1988, at 11 IR 3018.

(C) 326 IAC 7-1-17, Warrick County Sulfur Dioxide Emission Limitations, as published on December 1, 1988, at 12 IR 553.

(72) On November 16, 1988, Indiana submitted its SO₂ plan for Dearborn County; on July 12, 1988, it submitted its SO₂ plan for Gibson County; on November 16, 1988, and December 6, 1988, it submitted its SO₂ plan for Lake County, and on November 16, 1988, and December 6, 1988, it submitted its SO₂ plan for Porter County. These plans consist of the provisions and requirements in 326 IAC 7-1 approved or reinstated for these counties at paragraph (c)(66), any SO₂ emission limits in 326 IAC 7-1-2 applicable in these counties (as incorporated by reference at paragraph (c)(66)(i)(C) of this section), and the site-specific SO₂ emission limits and other requirements in 326 IAC 7-1-20 (Dearborn County), 326 IAC 7-1-8.1 (Lake County), 326 IAC 7-1-19 (Gibson County), and 326 IAC 7-1-21 (Porter County).

(i) *Incorporation by reference.* (A) 326 IAC 7-1-20, Dearborn County Sulfur Dioxide Emission Limitations, as pub-

lished in the August 1, 1988, *Indiana Register* (IR) at 11 IR 3784.

(B) 326 IAC 7-1-19, Gibson County Sulfur Dioxide Emission Limitations, as published on June 1, 1988, at 11 IR 3019.

(C) 326 IAC 7-1-8.1, Lake County Sulfur Dioxide Emission Limitations, as published on November 1, 1988, at 12 IR 262, and corrected on December 1, 1988, at 12 IR 597.

(D) 326 IAC 7-1-21, Porter County Sulfur Dioxide Emission Limitations, as published on November 1, 1988, at 12 IR 259, and corrected on December 1, 1988, at 12 IR 597.

(E) 326 IAC 7-1-1, Applicability, as published on December 1, 1988, at 12 IR 552.

(73) [Reserved]

(74) On July 23, 1987, the Indiana Department of Environmental Management submitted to USEPA a request for a site-specific revision to Indiana's ozone SIP. This revision consists of compliance date extensions until November 7, 1987, for Uniroyal's two fabric coaters and four vinyl printers at its Mishawaka plant, located in St. Joseph County, Indiana.

(i) *Incorporation by reference.* (A) Air pollution Operation Permits Numbers: U 2 33-15A, U 2 34-23, U 2 33-14C, U 2 34-3C, U 2 33-16, U 2 33-18, Date issued December 1, 1988, and Date Expires December 1, 1990.

(75) [Reserved]

(76) On October 21, 1987, the State submitted 325 IAC 8-1.1-5, Petition for alternative controls, which gives the provisions and requirements for petitioning for reasonably available control technology volatile organic compound plans. On November 16, 1988, the State submitted this rule recodified as 326 IAC 8-1-5, Petition for site-specific reasonably available control technology (RACT) plan.

(i) *Incorporation by reference.* (A) Title 326 Air Pollution Control Board, Indiana Administration Code (IAC) 8-1-5, Petition for site-specific reasonably available control technology (RACT) plan, as published in the April 1, 1988, *Indiana Register*, at Volume 11 IR 2530. Filed with the Secretary of State on March 10, 1988.

(77) [Reserved]

(78) On January 18, 1989, and June 23, 1989, Indiana submitted its revised lead

plan for the HLP-Lead Plant of Hammond Lead Products, Inc. in Hammond Indiana. Additionally, minor changes were made to Indiana's overall lead rule, 326 IAC 15-1, Lead Emission Limitations.

(i) *Incorporation by reference.* (A) Title 326—Air Pollution Control Board—Indiana Administrative Code (326 IAC) 15-1, as published in the Indiana Register (IR) on July 1, 1989, at 1850. This rule was effective for State purposes on July 14, 1989.

(79) [Reserved]

(80) On October 15, 1987, the State submitted 325 IAC 8-2-13, Wood Furniture and Cabinet Coating, as a portion of its 1982 ozone plan, which gives provisions and requirements for controlling volatile organic compound (VOC) emissions from sources located in Clark, Floyd, Lake and Porter Counties. On November 16, 1988, the State submitted this rule recodified as 326 IAC 8-2-12, Wood Furniture and Cabinet Coating.

(i) *Incorporation by reference.* (A) Title 326 Air Pollution Control Board, Indiana Administrative Code (IAC) 8-2-1, Applicability of rule; and 326 IAC 8-2-12, Wood furniture and cabinet coating, as published in the April 1, 1988, "Indiana Register" (IR), at 11 IR 2536 and corrected on March 1, 1989, at 12 IR 1394. Filed with the Secretary of State on March 10, 1988.

(81) On April 11, 1988, the State submitted, as a portion of its 1982 ozone plan, rules to control volatile organic compound (VOC) emissions in Lake and Porter Counties. These rules consist of the provisions and requirements in 326 IAC 14-1, General Provisions; 326 IAC 14-8, Emission Standards for Equipment Leaks; and 326 IAC 14-9, Emission Limitations for Benzene from Furnace Coke Oven By-product Recovery Plants.

(i) *Incorporation by reference.* (A) Amendments to title 326, Air Pollution Control Board, Indiana Administrative Code (IAC) 14-1 General Provisions; 326 IAC 14-8 Emission Standards for Equipment Leaks; (Fugitive Emission Sources); and 326 IAC 14-9 Emission Limitations for Benzene from Furnace Coke Oven By-Product Recovery Plants, as published in the June 1, 1988, Indiana Register (IR) at 11 IR 3011.

Filed with the Secretary of State on April 13, 1988.

(82) [Reserved]

(83) On January 21, 1981, the State submitted its revised Malfunctions Rule 325 IAC 1.1-5. On November 16, 1988, Indiana submitted its recodified regulations. This rule was renumbered 326 IAC 1-6, Malfunctions.

(i) *Incorporation by reference.* (A) Title 326 of the Indiana Administrative Code (IAC), Rule 326 IAC 1-6: Malfunctions as published in the April 1, 1988, Indiana Register (IR) at 11 IR 2380. Filed with the Secretary of State on March 10, 1988.

(ii) *Additional materials.* (A) On July 2, 1982, the State submitted clarifications of its intent for 325 IAC 1.1-5.

(84) On October 27, 1989, and January 19, 1990, Indiana submitted its vehicle inspection and maintenance plan for Clark, Floyd, Lake, and Porter Counties.

(i) *Incorporation by reference.* (A) Title 326, Air Pollution Control Board, of the Indiana Administrative Code (IAC), Rule 13-1, Motor Vehicle Inspection and Maintenance Requirements, Adopted at 13 Indiana Register 500, effective January 1, 1990.

(85) On December 2, 1983, Indiana submitted its transportation control plan for Clark and Floyd Counties as one element in its ozone plan for the area. Additional material was submitted on May 14, 1986.

(i) *Incorporation by reference.* (A) Chapter 7, Mobile Source Strategies and Reductions, sections A.1.b and exhibits 7-2 and 7-4, as adopted by the Indiana Air Pollution Control Board at its November 2, 1983, meeting.

(ii) *Additional material.* (A) On May 14, 1986, Indiana submitted an April 23, 1986, Letter from Jim Thorne, Transportation Director, Kentuckiana Regional Planning and Development Agency, discussing the Clark and Floyd Counties portion of the Louisville, Kentucky transportation control plan.

(86) On February 15, 1990, Indiana submitted an amended rule which updates the applicable edition of the Code of Federal Regulations from the 1987 edition to the 1988 edition.

(i) *Incorporation by reference.* (A) Title 326, Air Pollution Control Board, Indiana Administrative Code (IAC) 1-1-3,

Environmental Protection Agency

§ 52.800

References to the Code of Federal Regulations, as published in the February 1, 1990, Indiana Register (IR), Volume 13 at IR 867. Filed with the Secretary of State on December 14, 1989.

(87) On October 23, 1990, and August 19, 1991, the Indiana Department of Environmental Management submitted regulations adopted by the Indiana Air Pollution Control Board as part of title 326 of the Indiana Administrative Code and intended incorporation to the Indiana ozone plan as part of the stationary source control strategy.

(i) *Incorporation by reference.* (A) The following volatile organic compound rules adopted by the Indiana Air Pollution Control Board as part of title 326 of the Indiana Administrative Code (326 IAC) and intended to partially satisfy the requirements of the Clean Air Act.

(1) Effective October 23, 1988: 326 IAC 8-1-.05 Coating Definition; 326 IAC 8-2-11 Fabric and Vinyl Coating.

(2) Effective February 15, 1990: 326 IAC 1-2-48 Non-Photochemically Reactive Hydrocarbon Defined; 326 IAC 8-2-5 Paper Coating Operations.

(3) Effective May 18, 1990: 326 IAC 1-2-18.5 Cold Cleaner Degreaser Defined; 326 IAC 1-2-21.5 Conveyorized Degreaser Defined; 326 IAC 1-2-29.5 Freeboard Height Defined; 326 IAC 1-2-29.6 Freeboard Ratio Defined; 326 IAC 1-2-49.5 Open Top Vapor Degreaser Defined; 326 IAC 8-2-9 Miscellaneous Metal Coating Operations; 326 IAC 8-3-1 Organic Solvent Degreasing Operations; 326 IAC 8-5-3 Synthesized Pharmaceutical Manufacturing Operations; 326 IAC 8-5-5 Graphic Arts Operations.

(4) Effective June 8, 1990: 326 IAC 8-1-2 Compliance Methods; 326 IAC 1-2-90 Volatile Organic Compound (VOC) Definition; 326 IAC 8-1-4 Testing Procedures.

(5) Effective June 5, 1991: 326 IAC 1-2-14 Coating Line Definition; 326 IAC 8-1-1 Applicability of Rule; 326 IAC 8-1-2 Compliance Methods; 326 IAC 8-1-4 Testing Procedures; 326 IAC 8-2-1 Applicability; 326 IAC 8-3-5 Cold Cleaner Degreaser Operation and Control; 326 IAC 8-3-6 Open Top Vapor Degreaser Operation and Control Requirements; 326 IAC 8-3-7 Conveyorized Degreaser Operation and Control; 326 IAC 8-4-8 Leaks from Petroleum Refineries,

Monitoring, Reports; 326 IAC 8-5-5 Graphic Arts Operations.

(88) On February 15, 1990, the Indiana Department of Environmental Management submitted a request to revise the Indiana State Implementation Plan by adding a site specific particulate matter revision for Navistar International Transportation Corporation (Navistar) gray iron foundry and engine plant in Indianapolis, Indiana.

(i) *Incorporation by reference.* (A) Title 326 Air Pollution Control Board, Indiana Administrative Code (IAC) 6-1-12 as amended, effective January 13, 1990.

(89) On July 22, 1991, as supplemented on April 18, 1994, the State submitted regulations adopted by the Indiana Air Pollution Control Board as part of Title 326 of the Indiana Administrative Code for incorporation into the Indiana sulfur dioxide State Implementation Plan.

(i) *Incorporation by reference.* (A) 326 Indiana Administrative Code 7-4-12.1: Gibson County sulfur dioxide emission limitations; effective December 5, 1990. Published in the *Indiana Register*, Volume 14, Number 3, December 1, 1990.

(90) On March 3, 1989, the Indiana Department of Environmental Management submitted a request to revise the Indiana State Implementation Plan (SIP) by adding an emission trade or bubble for Joseph E. Seagram and Sons which is located in Lawrenceburg, Indiana. This requested SIP revision repeals rule 326 Indiana Administrative Code (IAC) 6-1-8, adds a new Section, 326 IAC 6-1-8.1, and amends 326 IAC 6-1-7 to include a reference for the new Section and a recodification of the applicable rule.

(i) *Incorporation by reference.* (A) Title 326 IAC 6-1-7 as published in the Indiana Register Volume 12, Number 6, March 1, 1989, effective April 9, 1989.

(B) Title 326, IAC 6-1-8.1, repeal of 326 IAC 6-1-8 as published in the Indiana Register, Volume 12, Number 6, March 1, 1989, effective March 1, 1989.

(91) [Reserved]

(92) On February 25, 1994, Indiana submitted an employee commute option rule intended to satisfy the requirements of section 182(d)(1)(B) of the Clean Air Act Amendments of 1990.

(i) *Incorporation by reference.* (A) Title 326 of the Indiana Administrative Code,

Article 19 MOBILE SOURCE RULES, Rule 1, Employee Commute Options. Filed with the Secretary of State, October 28, 1993, effective November 29, 1993. Published at Indiana Register, Volume 17, Number 3, December 1, 1993.

(93) On February 25, 1994, the Indiana Department of Environmental Management requested a revision to the Indiana State Implementation Plan in the form of Stage II Vapor Recovery Rules as amendments to Title 326 of the Indiana Administrative Code (326 IAC) 8-1-0.5 and 8-4-6.

(i) *Incorporation by reference.* (A) 326 IAC 8-1-0.5 Definitions and 8-4-6 Gasoline dispensing facilities. Filed with the Secretary of State October 28, 1993, effective November 29, 1993. Published at Indiana Register, Volume 17, Number 3, December 1, 1993.

(94) On February 25, 1994, Indiana requested a revision to the State Implementation Plan (SIP) in the form of amendments to Title 326: Air Pollution Control Board of the Indiana Administrative Code (326 IAC) 2-1-1 and 2-1-3 which were intended to satisfy the additional new source review requirements of the Clean Air Act Amendments of 1990. The USEPA, at this time, is also approving the incorporation of permitting rules Recodified as Article 2. Permit Review Rules of 326 IAC into the SIP to replace APC 19 which was incorporated into the Indiana SIP at 40 CFR 52.770 (c)(24).

(i) *Incorporation by reference.* (A) Amendments to Title 326 IAC 2-1-1, 2-1-2, 2-1-3, 2-3-1, 2-3-2, 2-3-3, and 2-3-5. Filed with the Secretary of State November 12, 1993, effective December 13, 1993.

(B) Amendments to Title 326 IAC 2-1-4, 2-1-5, 2-1-6, 2-1-7, 2-1-9, 2-1-10, 2-1-11, 2-1-12, 2-1-13, 2-3-4. Filed with the Secretary of State March 10, 1988, effective April 9, 1988.

(95) On May 22, 1994, the Indiana Department of Environmental Management submitted a request to revise the Indiana State Implementation Plan by adding a lead plan for Marion County which consists of a source specific revision to Title 326 of the Indiana Administrative Code (326 IAC) for Refined Metals.

(i) *Incorporation by reference.* (A) Amendments to 326 IAC 15-1-2 Source-

specific provisions. Filed with the Secretary of State March 25, 1994. Effective April 24, 1994. Published at Indiana Register, Volume 17, Number 8, May 1, 1994.

(96) On August 3, 1994 and February 6, 1995, the Indiana Department of Environmental Management submitted a requested SIP revision to the ozone plan for ozone nonattainment areas.

(i) *Incorporation by reference.* (A) Indiana Administrative Code, Title 326: Air Pollution Control Board, Article 1: General Provisions, Rule 2: Definitions, Section 22.5 “Department” definition, Section 28.5 “Federally enforceable” definition, and Section 64.1 “Reasonably available control technology” or “RACT” definition. Added at 18 *Indiana Register* 1223-4, effective January 21, 1995.

(B) Indiana Administrative Code, Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 7: Specific VOC Reduction Requirements for Lake, Porter, Clark, and Floyd Counties. Added at 18 *Indiana Register* 1224-9, effective January 21, 1995.

(97) On October 25, 1994, the Indiana Department of Environmental Management requested a revision to the Indiana State Implementation Plan in the form of revisions to State Operating Permit Rules intended to satisfy Federal requirements for issuing federally enforceable State operating permits (FESOP) and thereby exempt certain small emission sources from review under the State’s title V operating permit program. This FESOP rule is also approved for the purpose of providing federally enforceable emissions limits on hazardous air pollutants listed under section 112(b) of the Clean Air Act. This revision took the form of an amendment to Title 326: Air Pollution Control Board of the Indiana Administrative Code (326 IAC) 2-8 Federally Enforceable State Operating Permit Program.

(i) *Incorporation by reference.* 326 IAC 2-8 Federally Enforceable State Operating Permit Program. Sections 1 through 17. Filed with the Secretary of State May 25, 1994. Effective June 24, 1994. Published at Indiana Register, Volume 17, Number 10, July 1, 1994.

Environmental Protection Agency

§ 52.800

(98) On October 25, 1994, the Indiana Department of Environmental Management requested a revision to the Indiana State Implementation Plan in the form of revisions to State Operating Permit Rules intended to allow State permitting authorities the option of integrating requirements determined during preconstruction permit review with those required under title V. The State's Enhanced New Source Review provisions are codified at Title 326: Air Pollution Control Board (326 IAC) 2-1-3.2 Enhanced New Source Review.

(i) *Incorporation by reference.* 326 IAC 2-1-3.2 Enhanced new source review. Filed with the Secretary of State May 25, 1994. Effective June 24, 1994. Published at Indiana Register, Volume 17, Number 10, July 1, 1994.

(99) On June 16, 1993, December 9, 1993, September 8, 1994, and November 17, 1994, Indiana submitted a part D particulate matter (PM) nonattainment area plan for the Lake County moderate nonattainment area.

(i) *Incorporation by reference.* (A) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 1: General Provisions, Rule 2: Definitions, Section 32.1: "Gooseneck cap" definition, Section 34.1: "Jumper pipe" definition, Section 62.1: "Quench car" definition, Section 63.1: "Quench reservoir" definition, and Section 63.2: "Quench tower" definition. Added at 16 *Indiana Register* 2363, effective June 11, 1993.

(B) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 5: Opacity Regulations, Rule 1: Opacity Limitations, Section 1: Applicability of rule, Section 2: Visible emissions limitations, Section 3: Temporary exemptions, Section 4: Compliance determination, Section 5: Violations, and Section 7: State implementation plan revisions. Amended at 16 *Indiana Register* 2363, effective June 11, 1993.

(C) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: Nonattainment Area Limitations, Opacity Limitations, Section 10.1: Lake County PM₁₀ emissions requirements (subsections a through k), Section 10.2: Lake County PM₁₀ coke battery emissions requirements, and Sec-

tion 11.1: Lake County fugitive particulate matter control requirements. Added at 16 *Indiana Register* 2363, effective June 11, 1993.

(D) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 11: Emissions Limitations for Specific Types of Operations, Rule 3: Coke Oven Batteries, Section 2: Emissions limitations (subsections a through f, and i), and Section 4: Compliance determination. Amended at 16 *Indiana Register* 2363, effective June 11, 1993.

(100) On August 25, 1995, Indiana submitted a regulation which bans residential open burning in Clark, Floyd, Lake, and Porter Counties in Indiana. The regulation allows residential open burning, with certain restrictions, in other parts of the State, and describes other types of open burning which are allowed in Indiana.

(i) *Incorporation by reference.* (A) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 4: Burning Regulations, Rule 1: Open Burning, Section 3: Exemptions. Added at 18 *In. Reg.* 2408 Effective June 23, 1995.

(101) On August 25, 1995, Indiana submitted a regulation which reduced the maximum allowable volatility for gasoline sold in Clark and Floyd Counties to 7.8 psi during the summer control period. The summer control period is June 1, to September 15, for retail outlets and wholesale customers, and May 1, to September 15, for all others.

(i) *Incorporation by reference.* 326 Indiana Administrative Code 13-3 Control of Gasoline Reid Vapor Pressure. Sections 1 through 7. Finally adopted by the Indiana Air Pollution Control Board January 11, 1995. Signed by the Secretary of State July 6, 1995. Effective August 5, 1995. Published at Indiana Register, Volume 18, Number 11, August 1, 1995.

(102) On June 6, 1995, and on September 28, 1995 the Indiana Department of Environmental Management submitted State Implementation Plan (SIP) revisions establishing an enhanced inspection and maintenance (I/M) program in accordance with the requirements of the Clean Air Act as amended in 1990. The new enhanced I/M

program replaces the basic I/M programs in operation in Lake, Porter, Clark, and Floyd Counties. The Air Pollution Control Board adopted new rule 326 IAC 13-1.1 and repealed existing 326 IAC 13-1, thereby putting in place a revised I/M program.

(i) *Incorporation by reference.* (A) 326 Indiana Administrative Code 13-1.1 adopted April 5, 1995, effective October 1, 1995.

(ii) *Other material.* (A) June 6, 1995 letter and enclosures from the Indiana Department of Environmental Management (IDEM) Commissioner to the Regional Administrator of the United States Environmental Protection Agency (USEPA) submitting Indiana's revision to the ozone State Implementation Plan (SIP).

(B) September 28, 1995 letter and enclosures from the IDEM Assistant Commissioner to the Regional Administrator of USEPA submitting supplemental vehicle inspection and maintenance SIP revision information and documentation.

(103) On August 25, 1995, the State submitted regulations adopted by the Indiana Air Pollution Control Board as part of title 326 of the Indiana Administrative Code for incorporation into the Indiana sulfur dioxide State Implementation Plan.

(i) *Incorporation by reference.* (A) 326 Indiana Administrative Code 7-4-13(3); Dearborn County sulfur dioxide emission limitations; effective May 18, 1995. Published in the *Indiana Register*, Volume 18, Number 9, June 1, 1995.

(104) On December 20, 1995, and February 14, 1996, Indiana submitted a Clean-Fuel Fleet Program for Lake and Porter Counties as a revision to the State Implementation Plan.

(i) *Incorporation by reference.* 326 Indiana Administrative Code 19-3 Clean Fuel Fleet Vehicles, Sections 1 through 7. Adopted by the Indiana Air Pollution Control Board October 4, 1995. Signed by the Secretary of State December 19, 1995. Effective January 18, 1996. Published at *Indiana Register*, Volume 19, Number 5, February 1, 1996.

(105) On October 25, 1994, the Indiana Department of Environmental Management submitted a requested revision to the Indiana State Implementation Plan in the form of Source Specific Oper-

ating Agreement (SSOA) regulations. The SSOA regulations are intended to limit the potential to emit for a source to below the threshold level of Title V of the Clean Air Act. This revision took the form of an amendment to title 326: Air Pollution Control Board of the Indiana Administrative Code (326 IAC) 2-9-1, 2-9-2(a), 2-9-2(b), and 2-9-2(e) Source Specific Operating Agreement Program.

(i) *Incorporation by reference.* 326 Indiana Administrative Code 2-9. Sections 1, 2(a), 2(b), and 2(e). Adopted by the Indiana Air Pollution Control Board March 10, 1994. Signed by the Secretary of State May 25, 1994. Effective June 24, 1994. Published at *Indiana Register*, Volume 17, Number 10, July 1, 1994.

(106) On September 19, 1995, and November 8, 1995, Indiana submitted automobile and mobile equipment refinishing rules for Clark, Floyd, Lake, and Porter Counties as a revision to the State Implementation Plan. This rule requires suppliers and refinishers to meet volatile organic compound content limits or equivalent control measures for coatings used in automobile and mobile equipment refinishing operations in the four counties, as well as establishing certain coating applicator and equipment cleaning requirements.

(i) *Incorporation by reference.* 326 Indiana Administrative Code 8-10: Automobile refinishing, Section 1: Applicability, Section 2: Definitions, Section 3: Requirements, Section 4: Means to limit volatile organic compound emissions, Section 5: Work practice standards, Section 6: Compliance procedures, Section 7: Test procedures, Section 8: Control system operation, maintenance, and monitoring, and Section 9: Record keeping and reporting. Adopted by the Indiana Air Pollution Control Board June 7, 1995. Filed with the Secretary of State October 3, 1995. Published at *Indiana Register*, Volume 19, Number 2, November 1, 1995. Effective November 2, 1995.

(107) On August 8, 1995, Indiana submitted a site specific SIP revision request for Richmond Power and Light in Wayne County Indiana. The submitted revisions provide for revised particulate matter and opacity limitations on the number 1 and number 2 coal fired boilers at Richmond Power and Light's

Whitewater Generating Station. The revisions also allow for time weighted averaging of stack test results at Richmond Power and Light to account for soot blowing. Indiana is making revisions to 326 IAC 3-2-1, which currently allows Indiana to authorize alternative emission test methods for Richmond Power and Light. Until the rule is revised to remove this authority, and approved by the United States Environmental Protection Agency, no alternate emission test method, changes in test procedures or alternate operating load levels during testing is to be granted to Richmond Power and Light.

(i) *Incorporation by reference.* Indiana Administrative Code Title 326: Air Pollution Control Board, Article 3: Monitoring Requirements, Rule 2.1: Source Sampling Procedures, Section 5: Specific Testing Procedures; Particulate Matter; Sulfur Dioxide; Nitrogen Oxides; Volatile Organic Compounds; Article 5: Opacity Regulations, Rule 1: Opacity Limitations, Section 2: Visible Emission Limitations; and Article 6: Particulate Rules, Rule 1: Nonattainment Area Limitations, Section 14: Wayne County. Added at 18 In. Reg. 2725. Effective July 15, 1995.

(ii) *Additional information.* (A) August 8, 1995 letter from the Indiana Department of Environmental Management to USEPA Region 5 regarding submittal of a state implementation plan revision for Richmond Power and Light.

(108) On August 29, 1995, Indiana submitted a site specific SIP revision request for Allison Engine Company in Marion County, Indiana. The revision provides limits of 0 tons per year for boilers 2 and 11, which have shut down. The hourly mass limits remain unchanged at 0.337 pounds per million British Thermal Units (lbs/MMBTU) for boilers 1-4 of plant 5, 0.15 lbs/MMBTU for boilers 3-6 of plant 8, and 0.15 lbs/MMBTU for boilers 7-10 of plant 8. The rule provides for a combined limit of 130.0 tons per year for the boilers mentioned above, as well as new limits on the types and amounts of fuel which may be burned at the boilers, and a recordkeeping requirement to document compliance.

(i) *Incorporation by reference.* Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate

ulate Rules, Rule 1: Nonattainment Area Limitations, Section 12: Marion County. Added at 19 In. Reg. 186. Effective November 3, 1995.

(109) On October 25, 1994, and April 29, 1997, the Indiana Department of Environmental Management requested a revision to the Indiana State Implementation Plan in the form of revisions to the General Provisions and Permit Review Rules intended to update and add regulations which have been effected by recent SIP revisions, and to change regulations for streamlining purposes. This revision took the form of an amendment to Title 326: Air Pollution Control Board of the Indiana Administrative Code (326 IAC) 1-1 Provisions Applicable Throughout Title 326, 1-2 Definitions, 1-6 Malfunctions, 2-1 Construction and Operating Permit Requirements.

(i) *Incorporation by reference.* 326 IAC 1-1-2 and 1-1-3. 326 IAC 1-2-2, 1-2-4, 1-2-12, 1-2-33.1, and 1-2-33.2. 326 IAC 1-6-1. 326 IAC 2-1-1, 2-1-3, and 2-1-10. Adopted by the Indiana Air Pollution Control Board March 10, 1994. Filed with the Secretary of State May 25, 1994. Effective June 24, 1994. Published at Indiana Register, Volume 17, Number 10, July 1, 1994.

(110) On November 21, 1995, and February 14, 1996, Indiana submitted Municipal Solid Waste (MSW) Landfill rules for Clark, Floyd, Lake, and Porter Counties as a revision to the State Implementation Plan. This rule requires MSW landfills that emit greater than fifty-five tons per day of non-methane organic compound, or that have a minimum design capacity of one hundred eleven thousand tons (one hundred thousand megagrams) of solid waste, to install a landfill gas collection and control system that either incinerates the gas or recovers the gas for energy use.

(i) *Incorporation by reference.* 326 Indiana Administrative Code 8-8 Municipal Solid Waste Landfills, Section 1 Applicability, Section 2 Definitions, Section 3 Requirements; incorporation by reference of federal standards, Section 4 Compliance deadlines. Adopted by the Indiana Air Pollution Control Board July 12, 1995. Filed with the Secretary of State December 19, 1995. Published

at Indiana Register, Volume 19, Number 5, February 1, 1996. Effective January 18, 1996.

(111) On November 21, 1995, and February 14, 1996, Indiana submitted a rule for the control of volatile organic compound emissions from volatile organic liquid storage operations in Clark, Floyd, Lake, and Porter Counties.

(i) *Incorporation by reference.* 326 Indiana Administrative Code 8-9: Volatile Organic Liquid Storage Vessels, Section 1: Applicability, Section 2: Exemptions, Section 3: Definitions, Section 4: Standards, Section 5: Testing and procedures, Section 6: Record keeping and reporting requirements. Adopted by the Indiana Air Pollution Control Board May 3, 1995. Filed with the Secretary of State December 19, 1995. Published at Indiana Register, Volume 19, Number 5, February 1, 1996. Effective January 18, 1996.

(112) [Reserved]

(113) On February 13, 1996, and June 27, 1996, Indiana submitted rules for the control of volatile organic compound emissions from shipbuilding and ship repair operations in Clark, Floyd, Lake, and Porter Counties as a revision to the State Implementation Plan.

(i) *Incorporation by reference.* 326 Indiana Administrative Code 8-12: Shipbuilding or Ship Repair operations in Clark, Floyd, Lake, and Porter Counties, Section 1: Applicability, Section 2: Exemptions, Section 3: Definitions, Section 4: Volatile organic compound emissions limiting requirements, Section 5: Compliance requirements, Section 6: Test methods and procedures, and Section 7: Record keeping, notification, and reporting requirements. Adopted by the Indiana Air Pollution Control Board September 6, 1995. Filed with the Secretary of State April 1, 1996. Published at Indiana Register, Volume 19, Number 8, May 1, 1996. Effective May 1, 1996.

(114) On November 21, 1995, and February 14, 1996, Indiana submitted regulations for wood furniture coating operations in Clark, Floyd, Lake, and Porter Counties as a revision to the State Implementation Plan for ozone.

(i) *Incorporation by reference.* 326 Indiana Administrative Code 8-11 Wood Furniture Coatings, Section 1 Applicability, Section 2 Definitions, Section 3

Emission limits, Section 4 Work practice standards, Section 5 Continuous compliance plan, Section 6 Compliance procedures and monitoring requirements, Section 7 Test procedures, Section 8 Recordkeeping requirements, Section 9 Reporting requirements, Section 10 Provisions for sources electing to use emission averaging. Adopted by the Indiana Air Pollution Control Board May 3, 1995. Filed with the Secretary of State December 5, 1996. Published at Indiana Register, Volume 19, Number 5, February 1, 1996. Effective January 4, 1996.

(115) [Reserved]

(116) On September 20, 1996 the Indiana Department of Environmental Management submitted a request to revise the Indiana State Implementation Plan by adding parachlorobenzotrifluoride (PCBTF), cyclic, branched or linear completely methylated siloxanes and acetone to the definition of “nonphotochemically reactive hydrocarbon,” and by deleting “vegetable oil” from a list of compounds not considered to be volatile organic compounds (VOC) from the definition of VOC (thus including “vegetable oil” as a “VOC”).

(i) *Incorporation by reference.* (A) 326 IAC 1-2-48 “nonphotochemically reactive hydrocarbon”. Sections 48(a)(22) “parachlorobenzotrifluoride” and (23) “cyclic, branched, or linear completely methylated siloxanes.” 326 IAC 1-2-90 “volatile organic compound (VOC)” definition. Section 90. Published in Indiana Register, Volume 19, Number 1, October 1, 1995, page 29. Filed with the Secretary of State September 5, 1995, effective October 5, 1995.

(B) 326 IAC 1-2-48 “nonphotochemically reactive hydrocarbon.” Section 48(a)(24) “acetone” (CAS Number 67-64-1). Published in Indiana Register, Volume 19, Number 10, July 1, 1996, page 2856. Filed with the Secretary of State, May 13, 1996, effective June 12, 1996.

(117) [Reserved]

(118) On July 12, 1995, Indiana submitted as a revision to the State Implementation Plan construction permits CP 019-2110, CP 019-2696, and CP 019-4362, issued under Indiana rule 326 IAC 2-1. The permits establish volatile

Environmental Protection Agency

§ 52.800

organic compound control requirements for Rhodes Incorporated's heatset web offset printing presses.

(i) *Incorporation by reference.* Construction Permit CP 019-2110, issued and effective October 15, 1991; Construction Permit CP 019-2696, issued and effective December 18, 1992; Construction permit CP 019-4362, issued and effective April 21, 1995.

(119) Approval—On October 2, 1996, the State of Indiana submitted a State Implementation Plan revision request to eliminate references to total suspended particulates (TSP) while maintaining the existing opacity requirements. The SIP revision became effective July 19, 1996. The SIP revision request satisfies all applicable requirements of the Clean Air Act.

(i) *Incorporation by reference.* 326 Indiana Administrative Code 5-1: Opacity Limitations, Section 1: Applicability of Rule, Section 2: Visible emission limitations. Adopted by the Indiana Air Pollution Control Board April 3, 1996. Filed with the Secretary of State June 19, 1996. Published at the Indiana Register, Volume 19, Number 11, August 1, 1996 (19 IR 3049). Effective July 19, 1996.

(120) On August 26, 1996, Indiana submitted a rule requiring an oxides of nitrogen (NO_x) reasonably available control technology (RACT) rule for the Clark and Floyd Counties moderate ozone nonattainment area as a revision to the State Implementation Plan.

(i) *Incorporation by reference.* 326 Indiana Administrative Code 10: Nitrogen Oxides Rules. Rule 1: Nitrogen Oxides Control in Clark and Floyd Counties. Section 1: Applicability, Section 2: Definitions, Section 3: Requirements, Section 4: Emission limits, Section 5: Compliance procedures, Section 6: Emissions monitoring, and Section 7: Certification, record keeping, and reports. Adopted by the Indiana Air Pollution Control Board February 7, 1996. Filed with the Secretary of State May 13, 1996. Published at Indiana Register, Volume 19, Number 10, July 1, 1996. Effective June 12, 1996.

(121) On January 23, 1997, the Indiana Department of Environmental Management submitted a revision to the State Implementation Plan (SIP) for the general conformity rules. The general conformity SIP revision enables the State

of Indiana to implement and enforce the Federal general conformity requirements in the nonattainment and maintenance areas at the State and local level in accordance with 40 CFR part 51, subpart W—Determining Conformity of General Federal Actions to State or Federal Implementation Plans.

(i) *Incorporation by reference.* 326 Indiana Administrative Code 16-3: General Conformity, Section 1: Applicability; incorporation by reference of Federal standards. Adopted by the Indiana Air Pollution Control Board April 3, 1996. Filed with the Secretary of State June 6, 1996. Published at the Indiana Register, Volume 19, Number 11, August 1, 1996 (19 IR 3050). Effective July 6, 1996.

(122) On July 24, 1997, Indiana submitted rules requiring record keeping and reporting requirements for graphic arts sources of volatile organic compounds and amended source applicability requirements for graphic arts sources located in Lake and Porter Counties as a revision to the State Implementation Plan.

(i) *Incorporation by reference.* (A) 326 IAC 8-1-9 General record keeping and reporting requirements. 326 IAC 8-1-10 Compliance certification, record keeping, and reporting requirements for certain coating facilities using compliant coatings. 326 IAC 8-1-11 Compliance certification, record keeping, and reporting requirements for certain coating facilities using daily weighted averaging. 326 IAC 8-1-12 Compliance certification, record keeping, and reporting requirements for certain coating facilities using control devices. Adopted by the Indiana Air Pollution Control Board November 6, 1996. Filed with the Secretary of State April 22, 1997. Published at Indiana Register, Volume 20, Number 9, June 1, 1997. Effective May 22, 1997.

(B) 326 IAC 8-5-5 Graphic arts operations. Adopted by the Indiana Air Pollution Control Board November 6, 1996. Filed with the Secretary of State April 22, 1997. Published at Indiana Register, Volume 20, Number 9, June 1, 1997. Effective May 22, 1997.

(123) On July 9, 1997, Indiana submitted a site specific SIP revision request for the University of Notre Dame in Saint Joseph County, Indiana. The

submitted revision amends 326 IAC 6-1-18, and provides for revised particulate matter and heat input limitations on the five boilers at Notre Dame's power plant.

(i) *Incorporation by reference.* Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: Nonattainment Area Limitations, Section 18: St. Joseph County. Added at 20 In. Reg. 2299. Effective May 22, 1997.

(124) On February 3, 1999, and May 17, 2000, Indiana submitted revised particulate matter emissions regulations for Allison Transmission in Marion County, Indiana. The submittal amends 326 IAC 6-1-12, and includes the combination of annual emissions limits for 5 boilers into one overall limit as well as new recordkeeping requirements.

(i) *Incorporation by reference.* Emissions limits and recordkeeping requirements for Allison Transmission in Marion County contained in Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: Nonattainment Area Limitations, Section 12: Marion County. Added at 22 In. Reg. 416. Effective October 16, 1998.

(125) On April 6, 1999, Indiana submitted amended rules for the control of volatile organic compound emissions from vehicle refueling in Clark, Floyd, Lake, and Porter Counties as a revision to the State Implementation Plan.

(i) *Incorporation by reference.* 326 Indiana Administrative Code 8-1: General Provisions, Section 0.5: Definitions and 326 Indiana Administrative Code 8-4: Petroleum Sources, Section 6: Gasoline Dispensing Facilities. Adopted by the Indiana Air Pollution Control Board May 3, 1995. Filed with the Secretary of State September 18, 1995. Published at Indiana Register, Volume 19, Number 2, November 1, 1995. Effective October 18, 1995.

(126) On August 18, 1999, Indiana submitted amendments to the State's automobile refinishing rule for Lake, Porter, Clark, and Floyd Counties.

(i) *Incorporation by reference.* 326 Indiana Administrative Code 8-10: Automobile Refinishing, Section 1: Applicability, Section 5: Work practice standards, Section 6: Compliance procedures, Section 9: Recordkeeping and report-

ing. Adopted by the Indiana Air Pollution Control Board February 4, 1998. Filed with the Secretary of State July 14, 1998. Published at Indiana Register, Volume 21, Number 12, page 4518, September 1, 1998. Effective August 13, 1998.

(127) On August 18, 1999, Indiana submitted rules for controlling Volatile Organic Compound (VOC) emissions in Vanderburgh County. The rules contain control requirements for Stage I gasoline vapor recovery equipment, and a requirement for automobile refinishers to use special coating application equipment (automobile refinishing spray guns) to reduce VOC.

(i) *Incorporation by reference.* (A) 326 Indiana Administrative Code 8-4: Petroleum Sources, Section 1: Applicability, Subsection (c). Adopted by the Indiana Air Pollution Control Board November 4, 1998. Filed with the Secretary of State April 23, 1999. Published at Indiana Register, Volume 22, Number 9, June 1, 1999. Effective May 23, 1999.

(B) 326 Indiana Administrative Code 8-10: Automobile Refinishing, Section 1: Applicability, Section 3: Requirements. Adopted by the Indiana Air Pollution Control Board November 4, 1998. Filed with the Secretary of State April 23, 1999. Published at Indiana Register, Volume 22, Number 9, June 1, 1999. Effective May 23, 1999.

(128) [Reserved]

(129) On May 18, 1999, the Indiana Department of Environmental Management submitted revised site-specific lead emission limits for Hammond Group—Halstab Division located in Hammond (Lake County), Indiana. The revised emission limits are expressed as pounds-per-hour limits ranging from 0.04 to 0.07 applicable to sixteen separate emissions points. The revised emission limits will result in the reduction of total allowable lead emissions from 31,546 pounds per year as provided for in the current federally-approved State Implementation Plan to 6,832.8 pounds per year.

(i) *Incorporation by reference.* (A) Indiana Administrative Code 326: Air Pollution Control Board, Article 15 Lead, Rule 1 Lead Emissions Limitations, Section 2—Source Specific Provisions, subsection (a), subdivision 7, clauses

Environmental Protection Agency

§ 52.800

(A) through (G). Amended at 22 Indiana Register 1427, effective February 5, 1999.

(130) On February 3, 1999, Indiana submitted a site specific SIP revision request for the Central Soya Company, Incorporated, Marion County, Indiana. The submitted revision amends 326 IAC 6-1-12(a), and provides for revised particulate matter emission totals for a number of source operations at the plant. The revision reflects the closure of nine operations and the addition of five new ones, resulting in a net reduction in particulate matter emissions.

(i) *Incorporation by reference.* The entry for Central Soya Company, Incorporated contained in Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: Nonattainment Area Limitations, Section 12: Marion County. Subsection (a) amended at 22, Indiana Register 416, effective October 16, 1998.

(131) On April 6, 1999, Indiana submitted rules for the control of volatile organic compound emissions from steel mill sinter plant operations in Lake and Porter Counties as a revision to the State Implementation Plan.

(i) *Incorporation by reference.*

326 Indiana Administrative Code 8-13: Sinter Plants. Adopted by the Indiana Air Pollution Control Board March 4, 1998. Filed with the Secretary of State June 24, 1998. Published at Indiana Register, Volume 21, Number 11, August 1, 1998. Effective July 24, 1998.

(132) On February 3, 1999, Indiana submitted revised particulate matter emissions regulations for Dubois County, Indiana. The submitted revision amends 326 IAC 6-1-9, and includes relaxation of some PM limits, the elimination of limits for boilers which are no longer operating, updated facility names, and changes to boiler fuel types.

(i) *Incorporation by reference.* Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: Nonattainment Area Limitations, Section 9: Dubois County. Added at 22 In. Reg. 423. Effective October 18, 1998.

(133) On November 22, 1999, Indiana submitted revised particulate matter emissions regulations for Indianapolis

Power and Light Company in Marion County, Indiana. The submittal amends 326 IAC 6-1-12, and includes relaxation of some PM limits, tightening of other limits, and the elimination of limits for several boilers which are no longer operating. The revisions also include the combination of annual emissions limits for several boilers, and correction of a typographical error in one limit.

(i) *Incorporation by reference.* Emissions limits for Indianapolis Power and Light in Marion County contained in Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: Nonattainment Area Limitations, Section 12: Marion County, subsection (a). Added at 22 In. Reg. 2857. Effective May 27, 1999.

(134) On February 3, 1999, the State of Indiana submitted a revision to particulate matter limitations for the Lever Brothers facility in Lake County. On December 28, 1999, Indiana submitted revisions to particulate matter and sulfur dioxide limitations for NIPSCO's Dean Mitchell Station.

(i) *Incorporation by reference.* (A) Title 326 of the Indiana Administrative Code (326 IAC) 6-1-10.1 (d)(28) and (d)(33), filed with the Secretary of State on May 13, 1999, effective June 12, 1999. Published at Indiana Register Volume 22, Number 10, July 1, 1999 (22 IR 3047).

(B) Title 326 of the Indiana Administrative Code (326 IAC) 7-4-1.1 (c)(17), filed with the Secretary of State on May 13, 1999, effective June 12, 1999. Published at Indiana Register Volume 22, Number 10, July 1, 1999 (22 IR 3070).

(135) On January 1, 2000, Indiana submitted revised opacity limits for three processes at ALCOA Warrick Operations. The revised limits allow higher opacity emissions during fluxing operations at three casting complexes. This action does not change mass emissions limits for these sources.

(i) *Incorporation by reference.* (A) Modifications to Operating Permits OP 87-07-91-0112 thru 0116: Permit I.D. 173-10913, Issued on October 1, 1999, to ALCOA, Inc.—Warrick Operations. Effective October 1, 1999.

(B) Modifications to Operating Permit OP 87-07-91-0113: Permit I.D. 173-11414, Issued on December 15, 1999, to

ALCOA, Inc.—Warrick Operations. Effective December 15, 1999.

(136) On August 30, 1999, and May 17, 2000, Indiana submitted revised particulate matter and sulfur dioxide emissions regulations for National Starch in Marion County, Indiana. The submittal amends 326 IAC 6-1-12, and includes elimination of shut down sources from the rules, increases in some limits, and a decrease in one limit.

(i) *Incorporation by reference.*

(a) Emissions limits for National Starch in Marion County contained in Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: Nonattainment Area Limitations, Section 12: Marion County. Added at 22 In. Reg. 1953. Effective March 11, 1999.

(b) Emissions limits for National Starch in Marion County contained in Indiana Administrative Code Title 326: Air Pollution Control Board, Article 7: Sulfur Dioxide Rules, Rule 4: Emission Limitations and Requirements by County, Section 2: Marion County Sulfur Dioxide Emission Limitations. Added at 22 In. Reg. 1953. Effective March 11, 1999.

(138) On August 2, 2000, Indiana submitted revised total suspended particulate emissions regulations for Illinois Cereal Mills, Incorporated in Marion County, Indiana. The submittal amends 326 IAC 6-1-12(a). It includes an increase in the annual particulate matter limit from 0.7 tons per year (TPY) to 1.0 TPY for a boiler and a decrease in the annual limit from 6.3 TPY to 6.0 TPY for a grain elevator.

(i) *Incorporation by reference.*

Emissions limits for Illinois Cereal Mills, Incorporated in Marion County contained in Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: Non-attainment Area Limitations, Section 12: Marion County, subsection (a). Filed with the Secretary of State on May 26, 2000 and effective on June 25, 2000. Published in 23 *Indiana Register* 2414 on July 1, 2000.

(139) On December 30, 1999, Indiana submitted revised total suspended particulate emissions regulations for Johns Manville Corporation in Wayne County. The submittal amends 326 IAC

6-1-14. It includes raising seven long-term emissions limits, lowering one short-term limit, removing one emissions source, and a name change for the company. The long-term limits are being raised to allow the facility to operate 8760 hours annually. Switching fuel for a boiler allows its short-term limit to be decreased. One emissions source was removed from this facility. The Johns Manville, Wayne County, facility was formerly known as Schuller International, Incorporated.

(i) *Incorporation by reference.*

Emissions limits for Johns Manville Corporation in Wayne County contained in Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: Non-attainment Area Limitations, Section 14: Wayne County. Filed with the Secretary of State on September 24, 1999, and effective on October 24, 1999. Published in 23 *Indiana Register* 301 on November 1, 1999.

(140) On August 31, 2000, Indiana submitted revised particulate matter emissions regulations for Rolls-Royce Allison in Marion County, Indiana. The submittal amends 326 IAC 6-1-12(a). It includes a name change for the company from the Allison Engine Company to Rolls-Royce Allison and the addition of an alternate fuel, landfill gas. Landfill gas can be used in boilers 1 through 4 of plant 5 and boilers 3, 4, and 7 through 10 of plant 8. These state implementation plan revisions do not change the particulate matter emissions limits.

(i) *Incorporated by reference.* Amendments to Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: Non-attainment Area Limitations, Section 12: Marion County, subsection (a). Filed with the Secretary of State on May 26, 2000 and effective on June 25, 2000. Published in 23 *Indiana Register* 2419 on July 1, 2000.

(141) On February 16, 2001 Indiana submitted revised particulate matter emissions regulations for Cerestar USA, Inc. The submittal amends 326 IAC 6-1-10.1, and includes the elimination of 18 emission points, the addition of 39 new emission points, and a change in the way the short-term emission limits are expressed (from pounds

Environmental Protection Agency

§ 52.800

of particulate matter per ton of product to grains per dry standard cubic foot). The revision also changes the name of the facility listed in the rules from American Maize Products (Amaizo) to Cerestar USA, Inc.

(i) *Incorporation by reference.* Emissions limits for Cerestar USA, Inc. in Lake County contained in Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: Nonattainment Area Limitations, Section 10.1: Lake County PM₁₀ emission requirements. Added at 24 In. Reg. 1308. Effective January 13, 2001.

(142) On June 8, 2000 the Indiana Department of Environmental Management submitted a State Implementation Plan (SIP) revision amending certain provisions of the Indiana vehicle inspection and maintenance (I/M) program in operation in Lake, Porter, Clark, and Floyd Counties. Among the most significant changes being made to the program include: the exemption of the current calendar year model vehicle plus the (3) previous model years vehicles from emission testing; the inclusion of language that allows the use of the IM93 alternative vehicle emission test currently being used in the program; language that updates the requirement to test vehicles equipped with second generation on-board diagnostics systems (OBDII); and the elimination of the off-cycle test, which is the emission test currently required when there is a change in possession of motor vehicle titles. The Air Pollution Control Board amended 326 IAC 13-1.1 and repealed 326 IAC 13-1.1-17, thereby putting in place the revisions to the I/M program.

(i) *Incorporation by reference.* (A) 326 Indiana Administrative Code 13-1.1 adopted December 2, 1998, effective January 22, 1999.

(ii) *Other material.* (A) June 8, 2000 letter and enclosures from the Indiana Department of Environmental Management (IDEM) Commissioner to the Regional Administrator of the United States Environmental Protection Agency (USEPA) submitting Indiana's revision to the ozone State Implementation Plan (SIP).

(143) On November 15, 2000, the State submitted rules to reduce volatile or-

ganic compound emissions from cold cleaning degreasing.

(i) *Incorporation by reference.* 326 Indiana Administrative Code 8-3: Organic Solvent Degreasing Operations, Section 1, Applicability, and Section 8, Material Requirements for Cold Cleaning Degreasers. Final adoption by the Indiana Air Pollution Control Board on November 4, 1998. Filed with the Secretary of State on April 27, 1999. Effective May 27, 1999. Published at Indiana Register, Volume 22, Number 9, June 1, 1999.

(144) On August 20, 2001 and September 19, 2001, Indiana submitted a plan in response to Phase I of the NO_x SIP Call. The plan includes Indiana's Phase I NO_x Budget Demonstration and supporting documentation including initial unit allocations and two new rules: 326 IAC 10-3 and 326 IAC 10-4.

(i) *Incorporation by reference.* (A) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 10; Ozone rules, Rule 3: Nitrogen Oxide Reduction Program for Specific Source Categories (326 IAC 10-3). Adopted June 6, 2001. Submitted August 20, 2001 and September 19, 2001. State effective September 16, 2001.

(B) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 10; Ozone rules, Rule 4: Nitrogen Oxides Budget Trading Program (326 IAC 10-4). Adopted June 6, 2001. Submitted August 20, 2001 and September 19, 2001. State effective September 16, 2001.

(145) Indiana submitted on December 17, 1997, as part of the 9% Rate of Progress Plan, an agreed order between U.S. Steel and the Indiana Department of Environmental Management. Section 3 of Exhibit E requires U.S. Steel to establish a coke plant process water treatment plant at its Gary Works.

(i) *Incorporation by reference.* (A) Section 3 of Exhibit E of the March 22, 1996, Agreed Order between U.S. Steel (currently USX Corporation) and the Indiana Department of Environmental Management.

(146) On October 21, 1999, Indiana submitted revised state opacity regulations. The submittal amends 326 IAC 5-1-1, 5-1-2, 5-1-3, 5-1-4(b), and 5-1-5(b).

The revisions address provisions concerning the startup and shutdown of operations, averaging period terminology, temporary exemptions, alternative opacity limits, and conflicts between continuous opacity monitor and visual readings.

(i) *Incorporation by reference.* Opacity limits for Indiana contained in Indiana Administrative Code Title 326: Air Pollution Control Board, Article 5: Opacity Regulations. Filed with the Secretary of State on October 9, 1998 and effective on November 8, 1998. Published in 22 *Indiana Register* 426 on November 1, 1998.

(ii) *Additional material.* Letter of October 10, 2001, from Janet McCabe, Indiana Department of Environmental Management, Assistant Commissioner of the Office of Air Quality, to Stephen Rothblatt, US EPA Region 5, Chief of Air Programs Branch. The letter adds the technical justification and air quality analysis required for alternate opacity limits.

(147) On February 1, 2002, Indiana submitted its Prevention of Significant Deterioration rules as a revision to the State implementation plan.

(i) *Incorporation by reference.* (A) Title 326 of the Indiana Administrative Code, Rules 2–2–1, 2–2–2, 2–2–3, 2–2–4, 2–2–5, 2–2–6, 2–2–7, 2–2–9, 2–2–12, and 2–2–14. Filed with the Secretary of State on December 20, 2001, effective January 19, 2002.

(B) Title 326 of the Indiana Administrative Code, Rules 2–2–8, 2–2–10, 2–2–11, 2–2–13, 2–2–15 and 2–2–16. Filed with the Secretary of State on March 23, 2001, effective April 22, 2001.

(C) Title 326 of the Indiana Administrative Code, Rules 2–1.1–6 and 2–1.1–8. Filed with the Secretary of State on November 25, 1998, effective December 25, 1998. Errata filed with the Secretary of State on May 12, 1999, effective June 26, 1999.

(148) On August 8, 2001, the State submitted rules to incorporate by reference Federal capture efficiency test methods. The submittal amends 326 IAC 8–1–4.

(i) *Incorporation by reference.*

Title 326: Air Pollution Control Board; Article 8: Volatile Organic Compound Rules; Rule 1: General Provisions; Section 4: Testing procedures. Filed with the Secretary of State on

June 15, 2001 and effective on July 15, 2001. Published in 24 *Indiana Register* 3619 on August 1, 2001.

(149) [Reserved]

(150) On July 18, 2000 the Indiana Department of Environmental Management submitted a State Implementation Plan (SIP) revision amending certain provisions of Indiana's gasoline transport testing requirements with additional material submitted on January 11, 2002 and March 13, 2002. The Air Pollution Control Board amended 326 IAC 8–4–7 and 326 IAC 8–4–9 and added 326 IAC 20–10.

(i) *Incorporation by reference.* (A) 326 Indiana Administrative Code 8–4–7; 8–4–9; and 20–10–01 adopted May 5, 1999, effective November 5, 1999.

(ii) *Additional materials.* (A) July 18, 2000 letter and enclosures from the Indiana Department of Environmental Management (IDEM) Commissioner to the Regional Administrator of the United States Environmental Protection Agency (EPA) submitting Indiana's revision to the ozone SIP.

(B) January 11, 2002 letter and enclosures from IDEM to EPA submitted as an addendum to the July 18, 2000 revision to the ozone SIP.

(C) March 13, 2002 letter and enclosures from IDEM to EPA submitted as an addendum to the July 18, 2000 revision to the ozone SIP.

(151) On March 5, 2002, the Indiana Department of Environmental Management requested a revision to the Indiana State Implementation Plan in the form of revisions to the Permit Review Rules intended to add regulations to assure that construction permit conditions exist independently of title V permits. This revision took the form of an amendment to Title 326: Air Pollution Control Board of the Indiana Administrative Code (326 IAC) 2–1.1–9.5 General Provisions; Term of Permit.

(i) *Incorporation by reference.* (A) Indiana Administrative Code Rules 326 IAC 2–1.1–9.5. Adopted by the Indiana Air Pollution Control Board October 3, 2001. Filed with the Secretary of State December 20, 2001. Effective January 19, 2002. Published at Indiana Register, Volume 25, Number 5, February 1, 2002.

(152) On December 19, 2001, Indiana submitted revised Particulate Matter (PM) control requirements. A March 17,

Environmental Protection Agency

§ 52.800

2003 letter from Indiana clarified what portions of the original submission the State was seeking revisions for. EPA is approving revisions for certain natural gas combustion sources in Indiana and various cleanup revisions to Indiana's PM rules. One revision eliminates PM emissions limits on specified natural gas combustion sources and replaces the limits with a requirement that such sources may only burn natural gas. The submission also contains many cleanup provisions such as eliminating limits for sources which have shut down and updating names of sources.

(i) *Incorporation by reference.* (A) Indiana Administrative Code (IAC) Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: Non-attainment Area Limitations, IAC 6-1-1.5: Definitions; IAC 6-1-2: Particulate emission limitations; fuel combustion steam generators, asphalt concrete plant, grain elevators, foundries, mineral aggregate operations; modification by commissioner; IAC 6-1-3: Non-attainment area particulate limitations; compliance determination; IAC 6-1-4: Compliance schedules; IAC 6-1-5: Control strategies; IAC 6-1-6: State Implementation Plan revisions; IAC 6-1-8.1: Dearborn County particulate matter emissions limitations; IAC 6-1-9: Dubois County; IAC 6-1-10.1: Lake County PM₁₀ emission requirements, Subsections (a) through (k); IAC 6-1-11.1: Lake County fugitive particulate matter control requirements; IAC 6-1-12: Marion County; IAC 6-1-13: Vigo County; IAC 6-1-14: Wayne County; IAC 6-1-15: Howard County; IAC 6-1-16: Vanderburgh County; IAC 6-1-17: Clark County; and, IAC 6-1-18: St. Joseph County. Adopted by the Indiana Air Pollution Control Board August 1, 2001. Filed with the Secretary of State November 8, 2001. Published in the *Indiana Register*, Volume 25, Number 3, December 1, 2001 at 709. State effective December 8, 2001.

(B) Indiana Administrative Code (IAC) Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: Non-attainment Area Limitations, 6-1-1: Applicability. Adopted by the Indiana Air Pollution Control Board August 1, 2001. Filed with the Secretary of State November 8, 2001.

Published in the *Indiana Register*, Volume 25, Number 3, December 1, 2001 at 709. State effective, December 8, 2001. Amended by Errata filed with the Secretary of State January 10, 2002. Published in the *Indiana Register*, Volume 25, Number 5, February 1, 2002 at 1644. State effective, February 24, 2002. And amended by Errata filed with the Secretary of State October 2, 2002. Published in the *Indiana Register*, Volume 26, Number 2, November 1, 2002 at 383. State effective, November 16, 2002.

(153) On April 30, 2002 and September 6, 2002, Indiana submitted revised particulate matter regulations for Union Tank Car's railcar manufacturing facility in Lake County, Indiana. The submittal amends 326 IAC 6-1-10.1. The revisions consist of relaxing the limits for the grit blaster. The new limits are 0.01 grains per dry standard cubic foot and 9.9 pounds per hour.

(i) *Incorporation by reference.*

Amendments to Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: Non-attainment Area Limitations, Section 10.1: Lake County PM₁₀ emission requirements. Filed with the Secretary of State on July 26, 2002 and effective on August 25, 2002. Published in 25 *Indiana Register* 4076 on September 1, 2002.

(154) On August 08, 2001, Indiana submitted revised volatile organic Compound control requirements for certain facilities in the Indiana shipbuilding and ship repair industry. This submittal changes the individual and plantwide coating exemption levels and makes revisions to the compliance requirements, test methods and record-keeping requirements. On October 1, 2002, Indiana submitted a letter providing its interpretation of certain of the above requirements.

(i) *Incorporation by reference.* (A) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compounds, Rule 12: Shipbuilding or Ship Repair Operations in Clark, Floyd, Lake, and Porter Counties, Section 2: Exemptions, Section 4: Volatile organic compound emissions limiting requirements, Section 5: Compliance requirements, Section 6: Test methods and procedures, Section 7: Recordkeeping, notification,

and reporting requirements. Adopted by the Indiana Air Pollution Control Board on February 7, 2001. Filed with the Secretary of State June 15, 2001, effective July 15, 2001.

(B) An October 1, 2002, letter from the Indiana Department of Environmental Management which provides background information on its shipbuilding and ship repair rule revisions and its interpretation of certain of these requirements.

(155) On October 17, 2002, the State submitted revised particulate matter emission limits for the Knauf Fiber Glass in Shelby County for incorporation into the Indiana SIP.

(i) *Incorporation by reference.*

(A) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 11 Emission Limitations for Specific Types of Operations, Rule 4 Fiberglass Insulation Manufacturing, Paragraph 5 Shelby County (326 IAC 11–4–5). Adopted by the Indiana Air Pollution Control Board on May 1, 2002. Filed with the Secretary of State on August 28, 2002. Published in the *Indiana Register*, Volume 26, Number 1, October 1, 2002, effective September 27, 2002.

(156) On April 3, 2000 the State submitted a revision to Indiana's State Implementation Plan to allow the Department of the Navy use of military specification coatings containing volatile organic compound (VOC) control requirements with content up to 5.45 pounds of VOC per gallon of coating less water for the projectile renovations operations in Building 2728 at the Naval Surface Warfare Center, Crane Division.

(i) *Incorporation by reference.* (A) Part 70 Significant Source Modification No.: 101–11153–00005 as issued by the Indiana Air Pollution Control Board on October 12, 1999.

(157) On December 19, 2001, and February 11, 2004, Indiana submitted revised volatile organic compound (VOC) emissions regulations for Eli Lilly and Company in Marion County. The submission provides alternate VOC control requirements for reactors, vacuum dryers, centrifuges, and filters in the pilot plant. The alternate control requirements are being approved under site-

specific Reasonably Available Control Technology standards.

(i) *Incorporation by reference.* (A) Commissioner's Order #2003–02 as issued by the Indiana Department of Environmental Management on February 11, 2004.

(158) On October 21, 2002 and January 10, 2003, Indiana submitted revised volatile organic compound regulations for dip and flow coating operations. The revisions include replacing daily compliance with a rolling thirty day average and adding new equivalent emission limits.

(i) *Incorporation by reference.* Amendments to Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 1: General Provisions, Section 2: Compliance Methods. Filed with the Secretary of State on November 15, 2002, and effective on December 15, 2002. Published in 26 *Indiana Register* 1073 on January 1, 2003.

(159) On January 31, 2003, Indiana submitted revised particulate matter regulations for Richmond Power and Light Company's coal burning power plant in Wayne County, Indiana. The submission amends 326 IAC 6–1–14. The revisions make the long-term emission limits consistent with the short-term limits approved by EPA on April 9, 1996. The new limits are 320 tons per years for boiler number 1 and 700 tons per years for boiler number 2.

(i) *Incorporation by reference.* Amendments to Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: Non-attainment Area Limitations, Section 14: Wayne County PM emission requirements. Filed with the Secretary of State on March 10, 2003 and effective on April 9, 2003. Published in 26 *Indiana Register* 2318–19 on April 1, 2003.

(160) On July 9, 2002, Indiana submitted revised process weight rate rules as a requested revision to the Indiana State Implementation Plan. The changes clarify rule applicability, correct errors in the process weight rate table, allow sources to substitute work standard practices instead of the process weight rate table. They clarify the definitions of particulate and particulate matter. They also reduce duplicative recordkeeping.

Environmental Protection Agency

§ 52.800

(i) *Incorporation by reference.* (A) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules Rule 3: Particulate Emission Limitations for Manufacturing Process. 6-3-1 Applicability, 6-3-1.5 Definitions and 6-3-2 Particulate emission limitations, work practices, and control technologies. Adopted by the Indiana Air Pollution Control Board on February 6, 2002. Filed with the Secretary of State May 13, 2002, effective June 12, 2002.

(161) On October 30, 2002 and January 10, 2003, the Indiana Department of Environmental Management submitted revisions to Chapter 326 IAC 4-2 and 9-1 of the Indiana Administrative Code (IAC), an incineration plan for selected sources in Indiana, with a request that the Indiana State Implementation Plan be revised to include these amended carbon monoxide and particulate matter rules.

(i) *Incorporation by reference.* (A) *Indiana rule:* 326 IAC 4-2-1 and 326 IAC 4-2-2 (particulate matter), published at *Indiana Register*, January 1, 2003, 26 IR 1070, with an effective date of December 15, 2002.

(B) *Indiana rule:* 326 IAC 9-1-1 and 326 IAC 9-1-2 (carbon monoxide), published at *Indiana Register*, January 1, 2003, 26 IR 1072, with an effective date of December 15, 2002.

(162) On January 7, 2003 the Indiana Department of Environmental Management submitted a State Implementation Plan (SIP) revision amending certain provisions of Indiana's 326 IAC 8-2-9 (Miscellaneous metal coating operations) and 326 IAC 13-3-1 (Applicability, Control of gasoline Reid vapor pressure).

(i) *Incorporation by reference.* (A) 326 Indiana Administrative Code 8-2-9; and 13-3-1 adopted August 7, 2002, effective December 15, 2002.

(ii) *Additional materials.* (A) January 7, 2003 letter and enclosures from the Indiana Department of Environmental Management (IDEM) Commissioner to the Regional Administrator of the United States Environmental Protection Agency (EPA) submitting Indiana's revisions to the ozone SIP.

(163) On June 26, 2003, the Indiana Department of Environmental Management (IDEM) submitted revisions to 326

IAC 10-3 (NO_x Reduction Program for Specific Source Categories) and 326 IAC 10-4 (NO_x Budget Trading Program) of the Indiana Administrative Code (IAC). Also, on August 4, 2003, IDEM submitted a letter containing the Legislative Service Agency Document #00-54(F) as published in the Indiana Register on August 1, 2003, 26 IR 3550, containing the legal and approving signatures. The revised rules change the Indiana Phase I NO_x budget to 233,548 tons per ozone season for 2007.

(i) *Incorporation by reference.* (A) Indiana Pollution Control Board rules: 326 IAC 10-3-1 and 326 IAC 10-4-1, 10-4-2, 10-4-9, 10-4-10, 10-4-13, 10-4-14 and 10-4-15. Adopted by the Indiana Pollution Control Board on May 7, 2003. Filed with the Secretary on July 7, 2003. Published at Indiana Register Volume 26, Number 11, August 1, 2003 (26 IR 3550). Effective August 6, 2003.

(164) On June 13, 2003, and as supplemented on October 3, 2003, Indiana submitted a State Implementation Plan (SIP) revision for the control of emissions of particulate matter (PM₁₀) in the state of Indiana. Revisions to 326 IAC 6-1-10.1 and 326 IAC 6-1-10.2 amend the PM₁₀ emission limits at U.S. Steel-Gary Works and U.S. Steel-Gary Coke Operations, located in Lake County, Indiana, and should result in decreased PM₁₀ emissions of approximately 350 tons per year.

(i) *Incorporation by reference.* The following sections of the Indiana Administrative Code are incorporated by reference.

(A) Amendments to Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: Non-attainment Area Limitations, Section 10.1: Lake County PM₁₀ emission requirements. Filed with the Secretary of State on August 6, 2003 and effective on September 5, 2003. Published at Indiana Register, Volume 27, Number 1, October 1, 2003 (27 IR 61).

(B) Amendments to Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: Non-attainment Area Limitations, Section 10.2: Lake County PM₁₀ coke battery emission requirements. Filed with the Secretary of State on August 6, 2003 and effective on

September 5, 2003. Published at Indiana Register, Volume 27, Number 1, October 1, 2003 (27 IR 85).

(165) On January 16, 2004 Indiana submitted revised Prevention of Significant Deterioration rules as a revision to the Indiana State Implementation Plan.

(i) *Incorporation by reference.* (A) Amendments to the Indiana Administrative Code, Title 326: Air Pollution Control Board; Article 2: Permit Review Rules; Rule 2: Prevention of Significant Deterioration (PSD) Requirements; Section 2–2–1 Definitions; Section 2–2–6 Increment consumption; requirements; and Section 2–2–12 Permit rescission. Filed with the Secretary of State on March 9, 2004, effective April 8, 2004. Published at 27 Indiana Register 2216; April 1, 2004.

(166)–(167) [Reserved]

(168) On October 7, 2004, Indiana submitted a request revision to particulate matter and sulfur dioxide emission limits as an amendment to its State Implementation Plan. The particulate matter and sulfur dioxide emission limits were deleted for the five boilers removed from the Pfizer, Incorporated facility in Vigo County, Indiana. These limits were listed in 326 Indiana Administrative Code (IAC) 6–1–13 and 326 IAC 7–4–3.

(i) *Incorporation by reference.* Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: County Specific Particulate Limitations, Section 13: Vigo County and Title 326: Air Pollution Control Board, Article 7: Sulfur Dioxide Rules, Rule 4: Emission Limitations and Requirements by County, Section 3: Vigo County Sulfur Dioxide Emission Limitations. Filed with the Secretary of State on August 31, 2004 and effective September 30, 2004. Published in 28 *Indiana Register* 115–18 on October 1, 2004.

(169) On December 22, 2004, Indiana submitted a request to revise the volatile organic compound requirements for Transwheel Corporation of Huntington County, Indiana. EPA is approving the oil cover as an equivalent control device under 326 Indiana Administrative Code 8–3–5 (a)(5)(C).

(i) *Incorporation by reference.* (A) Commissioner's Order #2004–04 as

issued by the Indiana Department of Environmental Management on December 22, 2004.

(170) The Indiana Department of Environmental Management submitted revisions to Indiana's State Implementation plan on February 18, 2005, February 21, 2005, and April 8, 2005. Revisions to 326 IAC 1–2–52, 326 IAC 1–2–82.5, and 326 IAC 1–3–4 amend the definition of “particulate matter” to include the definition of PM_{2.5} and amends the section that specifies the national ambient air quality standards. Revisions to 326 IAC 1–1–3 and 326 IAC 1–1–6 update the references to the Code of Federal Regulations (CFR) from the 2000 edition to the 2002 edition and add “credible evidence provisions” into state rules consistent with federal requirements, respectively.

(i) *Incorporation by reference.* The following sections of the Indiana Administrative Code are incorporated by reference.

(A) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 1: General Provisions, Rule 2: Definitions, Section 52: “‘Particulate matter’” defined,” Section 52.2: “‘PM_{2.5}’ defined,” Section 52.4: “‘PM₁₀’ defined,” Section 82.5: “‘Total suspended particulate’ or ‘TSP’ defined.” Indiana Administrative Code Title 326: Air Pollution Control Board, Article 1: General Provisions, Rule 3: Ambient Air Quality Standards, Section 4: “Ambient air quality standards.” Filed with the Secretary of State on December 20, 2004 and effective on January 19, 2005. Published at Indiana Register, Volume 28, Number 5, February 1, 2005 (28 IR 1471–1473).

(B) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 1: General Provisions, Rule 1: Provisions Applicable Throughout Title 326, Section 3: “References to the Code of Federal Regulations.” Filed with the Secretary of State on August 26, 2004 and effective on September 25, 2004. Published at Indiana Register, Volume 28, Number 1, October 1, 2004 (28 IR 17).

(C) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 1: General Provisions, Rule 1: Provisions Applicable Throughout

Environmental Protection Agency

§ 52.800

Title 326, Section 6: “Credible evidence.” Filed with the Secretary of State on February 14, 2005 and effective on March 16, 2005. Published at Indiana Register, Volume 28, Number 7, April 1, 2005 (28 IR 2045).

(171) On April 8, 2005, Indiana submitted final adopted revisions for the Dearborn County sulfur dioxide emission limitations in 326 IAC 7-4-13 as a requested revision to the Indiana state implementation plan. EPA is approving these revisions, which remove obsolete rule language for Indiana Michigan Tanners Creek Station and update information for other companies listed in the rule.

(i) Incorporation by reference. (A) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 7: Sulfur Dioxide Rules, Rule 4: Emission Limitations and Requirements by County, Section 13: Dearborn County Sulfur Dioxide Emission Limitations. Filed with the Secretary of State on February 14, 2005, and effective March 16, 2005. Published in the Indiana Register on April 1, 2005 (28 IR 2021).

(172) On April 8, 2005, and as supplemented on July 6, 2005, Indiana submitted a State Implementation Plan (SIP) revision for the control of sulfur dioxide (SO₂) emissions in Lake County, Indiana. The SIP revision submitted by the Indiana Department of Environmental Management (IDEM) amends 326 Indiana Administrative Code (IAC) Article 7. Indiana’s revised SO₂ rule consists of changes to 326 IAC 7-4 which sets forth facility-specific SO₂ emission limitations and record-keeping requirements for Lake County. The rule revision also reflects updates to company names, updates to emission limits currently in permits, deletion of facilities that are already covered by natural gas limits, and other corrections and updates. Due to changes in section numbers, references to citations in other parts of the rule have also been updated.

(i) *Incorporation by reference.* (A) Amendments to Indiana Administrative Code Title 326: Air Pollution Control Board, Article 7 SULFUR DIOXIDE RULES, Rule 1.1 Sulfur Dioxide Emission Limitations, sections 326 IAC 7-1.1-1, “Applicability”, 326 IAC 7-1.1-2 “Sulfur Dioxide Emission Limita-

tions”, and 326 IAC 7-2-1 “Reporting Requirements: Methods to Determine Compliance”; newly created 326 IAC 7-4.1, “Lake County Sulfur Dioxide Emission Limitations”, adopted by the Indiana Air Pollution Control Board on March 2, 2005. Filed with the Secretary of State May 25, 2005, effective June 24, 2005.

(173) The Indiana Department of Environmental Management submitted amendments to Indiana’s State Implementation Plan on September 1, 2005. The amendments include the repeal of 326 IAC 6-1, which is replaced with new articles 326 IAC 6.5, “Particulate Matter Limitations for all Counties Except Lake County” and 326 IAC 6.8, “Particulate Matter Limitations for Lake County.”

(i) Incorporation by reference. The following sections of the Indiana Administrative Code are incorporated by reference.

(A) Amendments to Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.5 Particulate Matter Limitations Except Lake County, and Article 6.8 Particulate Matter Limitations For Lake County. Adopted by the Indiana Air Pollution Control Board on May 4, 2005. Filed with the Secretary of State on August 10, 2005 and effective on September 9, 2005. Published at Indiana Register, Volume 28, Number 12, September 1, 2005 (3454).

(174) [Reserved]

(175) On December 15, 2005, Indiana submitted revised particulate matter (PM₁₀) regulations for ASF Keystone, Inc. in Lake County. The emission limit for the small coil manufacturing unit is increased while the limits for the medium and large coil manufacturing units are decreased. The result of these revisions is a net decrease in PM₁₀ emission limits. The emission limits for miscellaneous coil manufacturing are removed because the unit no longer operates. EPA also removed the process weight rate emission limits for the four units.

(i) Incorporation by reference.

(A) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.8: Particulate Matter Limitations for Lake County, Rule 2: Lake County: PM₁₀ Emission Requirements,

Section 4: ASF Keystone, Inc.-Hammond. Filed with the Secretary of State on October 20, 2005 and effective November 19, 2005. Published in 29 *Indiana Register* 794 on December 1, 2005.

(176) On December 21, 2005, Indiana submitted revised regulations to the EPA. As a result, the compounds, 1,1,1,2,2,3,3-heptafluoro-3-methoxypropane, 3-ethoxy-1,1,1,2,3,4,4,5,5,6,6,6-dodecafluoro-2-(trifluoromethyl)hexane, 1,1,1,2,3,3,3-heptafluoropropane, and methyl formate, are added to the list of “nonphotochemically reactive hydrocarbons” or “negligibly photochemically reactive compounds” in 326 IAC 1–2–48 and these compounds are deleted from the list of VOCs in 326 IAC 1–2–90. Companies producing or using the four compounds will no longer need to follow the VOC rules for these compounds. The requirements in 326 IAC 1–2–48 and 1–2–90 were also modified for the compound t-butyl acetate. It is not considered a VOC for emission limits and content requirements. T-butyl acetate will still be considered a VOC for the record-keeping, emissions reporting, and inventory requirements.

(i) Incorporation by reference.

(A) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 1: General Provisions, Rule 2: Definitions, Section 48: “Nonphotochemically reactive hydrocarbon” or “negligibly photochemically reactive compounds” defined”, and Section 90: “Volatile organic compound” or “VOC” defined”. Filed with the Secretary of State on October 20, 2005 and effective November 19, 2005. Published in 29 *Indiana Register* 795–797 on December 1, 2005. (177) The Indiana Department of Environmental Management submitted revisions to Indiana’s State Implementation plan on December 21, 2005, and June 27, 2006. Revisions to 326 IAC 1–3–4 provide consistency between State (326 IAC 1–3–4) and Federal (40 CFR 50.3) reference conditions for measurements of particulate matter air quality; and amendments to 326 IAC 1–1–3 update the references to the Code of Federal Regulations (CFR) from the 2002 edition to the 2004 edition.

(i) Incorporation by reference. The following sections of the Indiana Ad-

ministrative Code are incorporated by reference.

(A) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 1: General Provisions, Rule 1: Provisions Applicable Throughout Title 326, Section 3: References to the Code of Federal Regulations. Filed with the Secretary of State on October 14, 2005 and effective on November 13, 2005. Published at Indiana Register, Volume 29, Number 3, December 1, 2005 (29 IR 795).

(B) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 1: General Provisions, Rule 3: Ambient Air Quality Standards, Section 4: Ambient Air Quality Standards. Filed with the Secretary of State on March 6, 2006 and effective on April 5, 2006. Published at Indiana Register, Volume 29, Number 7, April 1, 2006 (29 IR 2179).

(178) On August 25, 2006, Indiana submitted final adopted revisions to its emission reporting requirement rules as a revision to the Indiana State Implementation Plan.

(i) *Incorporation by reference.* Indiana Administrative Code Title 326: Air Pollution Control Board, Article 2: Permit Review Rules, Rule 6 Emission Reporting, Section 1: Applicability, Section 3: Compliance schedule, and Section 4: Requirements. Approved by the Attorney General June 29, 2006. Approved by the Governor July 13, 2006. Filed with the Publisher July 14, 2006. Published on the Indiana Register Web site August 9, 2006, Document Identification Number (DIN):20060809–IR–326050078FRA. Effective August 13, 2006.

(179) On July 17, 2006, Indiana submitted final adopted revisions, which add 326 IAC 8–1–6 (3)(B) and (C), to its VOC rules for new facilities in 326 IAC 8–1–6 as a requested revision to the Indiana state implementation plan. EPA is approving these revisions, which exempt boat manufacturers subject to NESHAPS for boat manufacturing, or reinforced plastics composites manufacturers subject to NESHAPS for reinforced composites production facilities, from the requirement to do a best available control technology analysis provided they comply with the applicable NESHAPS.

(i) Incorporation by reference.

Environmental Protection Agency

§ 52.800

(A) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 1: General Provisions, Section 6: New facilities; general reduction requirements. Final adopted by the Air Pollution Control Board on March 1, 2006. Filed with the Secretary of State on May 25, 2006, and became effective June 23, 2006. Published in the Indiana Register on July 1, 2006 (29 IR 3350).

(180) On November 1, 2005, and supplemented on March 20, 2007, the State of Indiana submitted a source specific revision to its state implementation plan for control of particulate matter in Title 326 of the Indiana Administrative Code (IAC), Rule 6.5-7, Section 13, which contains particulate matter emission limits for Holy Cross Services Corporation, to reflect current operating conditions of the boilers at St. Mary's College, located in Notre Dame, Indiana. The revision in 326 IAC 6.5-7-13 also changes the source name from St. Mary's to Holy Cross Services Corporation (Saint Mary's Campus).

(i) Incorporation by reference. Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.5: PM Limitations Except Lake County, Rule 7: St. Joseph County, Section 13: Holy Cross Services Corporation (Saint Mary's Campus). Approved by the Attorney General January 18, 2007. Approved by the Governor January 23, 2007. Filed with the Publisher January 26, 2007. Published on the Indiana Register Web site February 14, 2007, Document Identification Number (DIN):20070214-IR-326060121FRA. Effective February 25, 2007.

(181) On September 2, 2004, Indiana submitted modifications to its Prevention of Significant Deterioration and nonattainment New Source Review rules as a revision to the state implementation plan. On October 25, 2005, and January 17, 2007, Indiana submitted revisions to the September 2, 2004 submittal.

(i) Incorporation by reference.

(A) Title 326 of the Indiana Administrative Code, Rules 2-1.1-7, 2-2-1(a) through (l), 2-2-1(n) through (kk), 2-2-1(mm) through (tt), 2-2-1(uu)(1) through (4), 2-2-1(vv) through (aaa), 2-2-2(a) through (d)(4), 2-2-2(d)(6) through (e), 2-2-2(g) through (i), 2-2-3, 2-2-4, 2-2-

5(a), 2-2-5(c) through (e), 2-2-6, 2-2-8, 2-2-4, 2-3-1(a) through (i), 2-3-1(k) through (ff), 2-3-1(hh) through (uu), 2-3-2(a) through (c)(4), 2-3-2(c)(6) through (k), 2-3-2(m), 2-3-3(a) through (b)(11), 2-3-3(b)(14), 2-3-4, 2-5.1-4. Filed with the Secretary of State on August 10, 2004, effective September 10, 2004. Published in the Indiana Register on September 1, 2004 (27 IR 3887).

(182) On March 30, 2007, Indiana submitted final adopted revisions, which amend 326 IAC 8-5-1, concerning rule applicability, and add 326 IAC 8-5-6, fuel grade ethanol production at dry mills, to its VOC rules as a requested revision to the Indiana state implementation plan. By letter of December 19, 2007, Indiana stated that it would be acceptable to measure the concentration limits in 326 IAC 8-5-6 using EPA Method 25(a) expressed as equivalent ethanol with the calibration gas being a mixture of ethanol in air. EPA is approving these revisions, authorizing Indiana to establish an industry-specific State BACT standard for fuel grade ethanol production at dry mill facilities that emit 25 tons or more of VOC per year.

(i) *Incorporation by reference.* The following sections of the Indiana Administrative Code (IAC) are incorporated by reference. 326 IAC 8-5-1, "Applicability of Rule", and 326 IAC 8-5-6 "Fuel Grade Ethanol Production at Dry Mills". Approved by the Attorney General February 16, 2007. Approved by the Governor February 16, 2007. Filed with the Publisher February 20, 2007. Published on the Indiana Register Web site March 21, 2007, Document Identification Number (DIN):20070321-IR-326050197FRA. Effective March 22, 2007.

(ii) *Additional materials.* A December 19, 2007, letter from Daniel Murray, Assistant Commissioner of the Indiana Department of Environmental management, Office of Air Quality, which states that it would be acceptable to measure the concentration limits in 326 IAC 8-5-6 using EPA Method 25(a) expressed as equivalent ethanol with the calibration gas being a mixture of ethanol in air.

(183) On February 7, 2002, Indiana submitted revisions to its State Implementation Plan (SIP) for lead (Pb) as part of the State's incorporation of a

Federal standard for secondary lead smelters. On October 3, 2006, and November 27, 2007, Indiana supplemented its request as it pertained to Quemetco, Incorporated, in Marion County. This revision removes from the Indiana SIP the source-specific provisions for Quemetco found in article 326 IAC 15, previously approved in paragraph (c)(95) of this section, and replaces them with the corresponding provisions of article 326 IAC 20–13.

(i) *Incorporation by reference.* The following sections of Title 326 of the Indiana Administrative Code (IAC) are incorporated by reference:

(A) 326 IAC 15–1–2(c) “Source-specific provisions” and 326 IAC 15–1–3 “Control of fugitive lead dust”. Filed with the Secretary of State on December 1, 2000, effective December 30, 2000. Published in the Indiana Register on January 1, 2001 (24 IR 954).

(B) 326 IAC 20–13–1(c) “Applicability; incorporation by reference of federal standards”, 326 IAC 20–13–2(a) “Emission limitations lead standards for Quemetco, Incorporated”, and 326 IAC 20–13–6 “Compliance testing”. Filed with the Secretary of State on December 1, 2000, effective December 30, 2000. Published in the Indiana Register on January 1, 2001 (24 IR 958).

(184) Indiana Department of Environmental Management submitted amendments to the State Implementation Plan to control nitrogen oxide emissions from internal combustion engines in 326 Indiana Administrative Code (IAC) 10–5 and corrections to 326 IAC 10–3–3 and 326 IAC 10–4 on March 8, 2006.

(i) *Incorporation by reference.* The following sections of the Indiana Administrative Code (IAC) are incorporated by reference.

(A) Title 326: Air Pollution Control Board, Article 10: Nitrogen Oxides Rules, Rule 3: Nitrogen Oxide Reduction Program for Specific Source Categories, Section 3: Emissions limits. Filed with the Secretary of State on January 27, 2006, effective February 26, 2006. Published in the Indiana Register on March 1, 2006 (29 IR 1876).

(B) Title 326: Air Pollution Control Board, Article 10: Nitrogen Oxides Rules, Rule 4: Nitrogen Oxides Budget Trading Program, Section 1: Applicability, Section 2: Definitions, Section 3:

Retired unit exemption, Section 9: NO_x allowance allocations, Section 13: Individual opt-ins, Section 14: NO_x allowance banking, and Section 15: Compliance supplement pool. Filed with the Secretary of State on January 27, 2006, effective February 26, 2006. Published in the Indiana Register on March 1, 2006 (29 IR 1877).

(C) Title 326: Air Pollution Control Board, Article 10: Nitrogen Oxides Rules, Rule 5: Nitrogen Oxide Reduction Program for Internal Combustion Engines (ICE). Filed with the Secretary of State on January 27, 2006, effective February 26, 2006. Published in the Indiana Register on March 1, 2006 (29 IR 1899).

(185) The Indiana Department of Environmental Management submitted amendments on September 20, 2007 to the State Implementation Plan to Control Emissions from electric generating units (EGU) and non-EGUs. Rules affecting these units include: 326 Indiana Administrative Code (IAC) 24–1–2, 326 IAC 24–1–8, 326 IAC 24–1–12, 326 IAC 24–2–11, 326 IAC 24–3–1, 326 IAC 24–3–2, 326 IAC 24–3–8 and 326 IAC 24–3–12 respectively.

(i) *Incorporation by reference.* The following sections of the Indiana Administrative Code (IAC) are incorporated by reference: 326 IAC 24–1–2(36) “Control period”; 326 IAC 24–1–2(38) “Energy efficiency or renewable energy projects”; 326 IAC 24–1–2(60) “Rated energy efficiency”; 326 IAC 24–1–8 “CAIR NO_x allowance allocations”; 326 IAC 24–1–12 “CAIR NO_x opt-in units”; 326 IAC 24–2–11 “CAIR SO₂ opt-in units”; 326 IAC 24–3–1 “Applicability”; 326 IAC 24–3–2(38) “Energy efficiency or renewable energy projects”; 326 IAC 24–3–2(49) “Large affected unit”; 326 IAC 24–3–2(61) “Rated energy efficiency”; 326 IAC 24–3–8 “CAIR NO_x ozone season allowance”; and 326 IAC 24–3–12 “CAIR NO_x ozone season opt-in units”. Approved by the Attorney General January 12, 2007. Approved by the Governor January 23, 2007. Filed with the Publisher January 26, 2007. Published on the Indiana Register Web site February 28, 2007, Document Identification Number (DIN): 20070221–IR–326050117FRA. Effective February 25, 2007.

(186) The Indiana Department of Environmental Management submitted

revisions to Indiana's State Implementation plan on July 20, 2007, as revised on December 19, 2007, to amend 326 IAC 1-1-3, "References to the Code of Federal Regulations"; 326 IAC 1-2-48, "nonphotochemically reactive hydrocarbons" or "negligibly photochemically reactive compounds" defined; and 326 IAC 1-2-90, "volatile organic compound" or "VOC" defined. The revision to 326 IAC 1-1-3 updates the references to CFR from the 2005 edition to the 2006 edition. In 326 IAC 1-2-48, and 326 IAC 1-2-90, the SIP revision deletes references to outdated FEDERAL REGISTER citations.

(i) *Incorporation by reference.* The following sections of the Indiana Administrative Code (IAC) are incorporated by reference.

(A) 326 IAC 1-1-3, "References to the Code of Federal Regulations". Filed with the Secretary of State on April 26, 2007, and effective on May 26, 2007. Published in the Indiana Register, on May 23, 2007 (DIN: 20070523-IR-326060412FRA).

(B) 326 IAC 1-2-48, "nonphotochemically reactive hydrocarbons" or "negligibly photochemically reactive compounds" defined; and 326 IAC 1-2-90, "volatile organic compound" or "VOC" defined. Filed with the Secretary of State on April 26, 2007, and effective on May 26, 2007. Published in the Indiana Register, on May 23, 2007 (DIN: 20070523-IR-326060412FRA).

(ii) *Additional Materials.* A December 19, 2007, letter from Daniel Murray, Assistant Commissioner of the Indiana Department of Environmental Management, Office of Air Quality, which limits the July 20, 2007, SIP revision request to the following definitions: 326 IAC 1-1-3, "References to the CFR"; 326 IAC 1-2-48, "nonphotochemically reactive hydrocarbons" or "negligibly photochemically reactive compounds" defined; and 326 IAC 1-2-90, "volatile organic compound" or "VOC" defined.

(187) On February 21, 2008, Indiana submitted revisions to its particulate matter SIP. On March 27, 2008, Indiana submitted a corrected copy of its rules. The submittal revises 326 IAC 6.5: Particulate Matter Limitations Except Lake County and 326 IAC 6.8: Particulate Matter Limitations for Lake

County. This SIP revision updates facility names, revises formatting, removes sources no longer in operation, and revises some emission limits.

(i) *Incorporation by reference.* The following sections of Title 326 of the Indiana Administrative Code (IAC) are incorporated by reference:

(A) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.5: Particulate Matter Limitations Except Lake County, Rule 1, General Provisions, sections 326 IAC 6.5-1-1 through 326 IAC 6.5-1-7, filed August 10, 2005, effective on September 9, 2005 and previously incorporated by reference (see paragraph (c)(173)(i)(A) of this section).

(B) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.5: Particulate Matter Limitations Except Lake County, Rule 2, Clark County, sections 326 IAC 6.5-2-1 through 326 IAC 6.5-2-12, filed January 23, 2008, effective on February 22, 2008 (326 IAC 6.5-2-8 Kimball Office-Borden, filed January 23, 2008, effective on February 22, 2008, errata filed on February 29, 2008).

(C) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.5: Particulate Matter Limitations Except Lake County, Rule 3, Dearborn County, sections 326 IAC 6.5-3-1 through 326 IAC 6.5-3-9, filed January 23, 2008, effective on February 22, 2008.

(D) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.5: Particulate Matter Limitations Except Lake County, Rule 4, Dubois County, sections 326 IAC 6.5-4-1 through 326 IAC 6.5-4-24, filed January 23, 2008, effective on February 22, 2008.

(E) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.5: Particulate Matter Limitations Except Lake County, Rule 5, Howard County, sections 326 IAC 6.5-5-1 through 326 IAC 6.5-5-16, filed January 23, 2008, effective on February 22, 2008.

(F) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.5: Particulate Matter Limitations Except Lake County, Rule 6, Marion County, sections 326 IAC 6.5-6-1 through 326 IAC 6.5-6-36, filed January 23, 2008, effective on February 22, 2008

(326 IAC 6.5–6–18, Cargill, Inc., filed January 23, 2008, effective on February 22, 2008, errata filed on January 31, 2008).

(G) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.5: Particulate Matter Limitations Except Lake County, Rule 7, St. Joseph County, sections 326 IAC 6.5–7–1 through 326 IAC 6.5–7–20, filed January 23, 2008, effective on February 22, 2008 (326 IAC 6.5–7–14 Accucast Technology, LLC, filed January 23, 2008, effective on February 22, 2008, errata filed on February 5, 2008).

(H) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.5: Particulate Matter Limitations Except Lake County, Rule 8, Vanderburgh County, sections 326 IAC 6.5–8–1 through 326 IAC 6.5–8–15, filed January 23, 2008, effective on February 22, 2008.

(I) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.5: Particulate Matter Limitations Except Lake County, Rule 9, Vigo County, sections 326 IAC 6.5–9–1 through 326 IAC 6.5–9–20, filed January 23, 2008, effective on February 22, 2008.

(J) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.5: Particulate Matter Limitations Except Lake County, Rule 10, Wayne County, sections 326 IAC 6.5–10–1 through 326 IAC 6.5–10–19, filed January 23, 2008, effective on February 22, 2008.

(K) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.8: Particulate Matter Limitations For Lake County, Rule 1, General Provisions, sections 326 IAC 6.8–1–1, Applicability, 6.8–1–5, Control strategies, and 6.8–1–7, Scope, filed January 23, 2008, effective on February 22, 2008; and Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.8: Particulate Matter Limitations For Lake County, Rule 1, General Provisions, sections 326 IAC 6.8–1–1.5, Definitions, 6.8–1–2, Particulate emission limitations; fuel combustion steam generators, asphalt concrete plant, grain elevators, foundries, mineral aggregate operations; modification by commission, 6.8–1–3, Compliance Determination, 6.8–1–4, Compliance schedules, and 6.8–6–6, State implementation

plan revisions, filed August 10, 2005, effective on September 9, 2005 and previously incorporated by reference (see paragraph (c)(173)(i)(A) of this section).

(L) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.8: Particulate Matter Limitations for Lake County, Rule 2, Lake County: PM10 Emission Requirements, sections 326 IAC 6.8–2–1 through 326 IAC 6.8–2–38, filed January 23, 2008, effective on February 22, 2008 (326 IAC 6.8–2–6 BP Products North America, Inc.-Whiting Refinery, filed January 23, 2008, effective on February 22, 2008, errata filed on February 29, 2008).

(M) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.8: Particulate Matter Limitations for Lake County, Rule 3, Lake County: Opacity Limits; Exceptions to 326 IAC 5–1–2, sections 326 IAC 6.8–3–1 through 326 IAC 6.8–3–4, filed January 23, 2008, effective on February 22, 2008.

(N) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.8: Particulate Matter Limitations for Lake County, Rule 4, Lake County: Opacity Limits; Test Methods, filed January 23, 2008, effective on February 22, 2008.

(O) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.8: Particulate Matter Limitations for Lake County, Rule 5, Lake County: Opacity Continuous Emissions Monitors, Installation and operation of continuous emissions monitors (Repealed), filed January 23, 2008, effective on February 22, 2008.

(P) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.8: Particulate Matter Limitations for Lake County, Rule 6, Lake County: Combustion Sources; Natural Gas, sections 326 IAC 6.8–6–1 through 326 IAC 6.8–6–20, filed January 23, 2008, effective on February 22, 2008.

(Q) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.8: Particulate Matter Limitations for Lake County, Rule 7, Lake County: Site-Specific Control Requirements, sections 326 IAC 6.8–7–1 through 326 IAC 6.8–7–8, filed January 23, 2008, effective on February 22, 2008.

(R) Indiana Administrative Code Title 326: Air Pollution Control Board,

Article 6.8: Particulate Matter Limitations for Lake County, Rule 8, Lake County: Continuous Compliance Plan, section 326 IAC 6.8-8-1 Applicability, filed January 23, 2008, effective on February 22, 2008; and Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.8: Particulate Matter Limitations for Lake County, Rule 8, Lake County: Continuous Compliance Plan, sections 326 IAC 6.8-8-2 Documentation; operation and maintenance procedures, 326 IAC 6.8-8-3 Plan requirements, 326 IAC 6.8-8-4 Plan; schedule for complying with 326 IAC 6.8-7, 326 IAC 6.8-8-5 Plan; source categories, 326 IAC 6.8-8-6 Plan; particulate matter control equipment; operation and maintenance, 326 IAC 6.8-8-7 Plan; particulate matter control equipment; recording; operation; inspection, 326 IAC 6.8-8-8 Plan; department review, filed August 10, 2005, effective on September 9, 2005 and previously incorporated by reference (see paragraph (c)(173)(i)(A) of this section).

(S) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.8: Particulate Matter Limitations for Lake County, Rule 9, Lake County: PM10 Coke Battery Emission Requirements, section 326 IAC 6.8-9-3 Emission limitations, filed January 23, 2008, effective on February 22, 2008; and Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.8: Particulate Matter Limitations for Lake County, Rule 9, Lake County: PM10 Coke Battery Emission Requirements, sections 326 IAC 6.8-9-1 Applicability, and 326 IAC 6.8-9-2 Definitions, filed August 10, 2005, effective on September 9, 2005 and previously incorporated by reference (see paragraph (c)(173)(i)(A) of this section).

(T) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.8: Particulate Matter Limitations for Lake County, Rule 10, Lake County: Fugitive Particulate Matter, section 326 IAC 6.8-10-1 Applicability, filed January 23, 2008, effective on February 22, 2008; and Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.8: Particulate Matter Limitations for Lake County, Rule 10, Lake County: Fugitive Particulate Matter, sections 326 IAC 6.8-10-2 Definitions, 326 IAC 6.8-10-3 Particu-

late matter emission limitations, and 326 IAC 6.8-10-4 Compliance requirements; control plans, filed August 10, 2005, effective on September 9, 2005 and previously incorporated by reference (see paragraph (c)(173)(i)(A) of this section).

(U) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.8: Particulate Matter Limitations for Lake County, Rule 11, Lake County: Particulate Matter Contingency Measures, sections 326 IAC 6.8-11-1 through 326 IAC 6.8-11-6, filed August 10, 2005, effective on September 9, 2005 and previously incorporated by reference (see paragraph (c)(173)(i)(A) of this section).

(ii) *Additional material.*

(A) Certificate of Authenticity, Indiana Administrative Code, (As Updated Through March 26, 2008), signed by John M. Ross, Executive Director, Legislative Services Agency.

(188) The Indiana Department of Environmental Management submitted a revision to Indiana's State Implementation plan on May 22, 2008, to amend 326 IAC 1-1-3, "References to the Code of Federal Regulations". The revision to 326 IAC 1-1-3 updates the references to CFR from the 2006 edition to the 2007 edition.

(i) *Incorporation by reference.* Title 326 of the Indiana Administrative Code (IAC), section 1-1-3, "References to the Code of Federal Regulations" is incorporated by reference. The rule was filed with the Publisher of the Indiana Register on April 1, 2008, and became effective on May 1, 2008. Published in the Indiana Register, on April 30, 2008 (DIN: 20080430-IR-32607037FRA).

(189) On December 19, 2007, Indiana submitted modifications to its Federally Enforceable State Operating Permits rules as a revision to the state implementation plan. The revision extends the maximum permit term for renewals of Federally Enforceable State Operating Permits from five years to ten years. EPA has determined that this revision is approvable under the Clean Air Act.

(i) *Incorporation by reference.*

(A) Indiana Administrative Code Title 326, Article 2: Permit Review Rules, sections 2-1.1-9.5, "General provisions; term of permit", and 2-8-4,

“Permit content”, are incorporated by reference. Filed with the Publisher of the Indiana Register on November 16, 2007, and became effective on December 16, 2007. Published in the Indiana Register on December 13, 2007 (20071212-IR-326060487FRA).

(190) On September 11, 2008, Indiana submitted a revision to its SIP. The revisions add particulate matter, sulfur dioxide, and nitrogen oxides control and emission limitations on the Southern Indiana Gas and Electric Company’s F.B. Culley Generating Station, a power plant located in Warrick County, Indiana.

(i) Incorporation by reference.

(A) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 7: Particulate Matter Emission Limitations for Southern Indiana Gas and Electric Company, Section 1: “Southern Indiana Gas and Electric Company (SIGECO)”; Article 7: Sulfur Dioxide Rules, Rule 4: Emission Limitations and Requirements by County, Section 10: “Warrick County sulfur dioxide emission limitations”; and Article 10: Nitrogen Oxides Rules, Rule 6: Nitrogen Oxides Emission Limitations for Southern Indiana Gas and Electric Company, Section 1: “Southern Indiana Gas and Electric Company (SIGECO)”.

Filed with the Secretary of State on July 31, 2008 and effective on August 30, 2008. Published in Indiana Register 326070309 on August 28, 2008, LSA Document #07-309(F).

(191) The Indiana Department of Environmental Management submitted a revision to Indiana’s State Implementation plan on September 25, 2009, to amend 326 IAC 1–1–3, “References to the Code of Federal Regulations”. The revision to 326 IAC 1–1–3 updates the references to CFR from the 2007 edition to the 2008 edition.

(i) *Incorporation by reference.* Title 326 of the Indiana Administrative Code (IAC), section 1–1–3, “References to the Code of Federal Regulations” is incorporated by reference. The rule was filed with the Publisher of the Indiana Register on July 1, 2009, and became effective on July 31, 2009. Published in the Indiana Register, on July 29, 2009 (DIN: 20090729-IR-326080901FRA).

(192) On April 25, 2008, Indiana submitted regulations that incorporate its continuous emission monitoring requirements into its SIP. Indiana also submitted Commissioner’s Orders that provide an alternative monitoring plan for a Warrick County source. The alternative monitoring requirements allow the use of a particulate matter continuous emissions monitoring system in place of a continuous opacity monitor.

(i) *Incorporation by reference.* (A) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 3: Monitoring Requirements, Rule 5: Continuous Monitoring of Emissions, Section 1: Applicability; monitoring requirements for applicable pollutants. Filed with the Secretary of State on January 30, 1998, and effective on March 1, 1998. Published in 21 *Indiana Register* 2062–2079 on March 1, 1998. (B) Commissioner’s Order #2008–01 as issued by the Indiana Department of Environmental Management on February 11, 2008.

(193) On December 10, 2009, the Indiana Department of Environmental Management submitted several volatile organic compound rules for approval into the Indiana State Implementation Plan for the Lake and Porter County portion of the Chicago-Gary-Lake County, IL-IN, 8-hour ozone nonattainment area. This includes both revisions to existing rules and also new rules. Also submitted were subsequent technical corrections to typographical, clerical, or spelling errors for some of these rules.

(i) Incorporation by reference.

(A) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 1: General provisions, Section 0.5: Definitions, Section 2: Compliance Methods, and Section 4: Testing procedures, filed with the Publisher of the Indiana Register on November 3, 2009, and became effective on December 3, 2009. Published in the Indiana Register on December 2, 2009 (DIN: 20091202-IR-326090220FRA).

(B) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 2: Surface Coating Emission Limitations, Section 1: Applicability, Section 2: Automobile and light

Environmental Protection Agency

§ 52.800

duty truck coating regulations, Section 5: Paper coating operations, Section 6: Metal furniture coating operations, Section 7: Large appliance coating operations, Section 9: Miscellaneous metal and plastic parts coating operations, and Section 10: Flat wood panels; manufacturing operations, filed with the Publisher of the Indiana Register on November 3, 2009, and became effective on December 3, 2009. Published in the Indiana Register on December 2, 2009 (DIN: 20091202-IR-326090220FRA).

(C) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 5: Miscellaneous Operations, Section 5: Graphic arts operations, filed with the Publisher of the Indiana Register on November 3, 2009, and became effective on December 3, 2009. Published in the Indiana Register on December 2, 2009 (DIN: 20091202-IR-326090220FRA).

(D) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 16: Offset Lithographic Printing and Letterpress Printing, filed with the Publisher of the Indiana Register on November 3, 2009, and became effective on December 3, 2009. Published in the Indiana Register on December 2, 2009 (DIN: 20091202-IR-326090221FRA).

(E) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 17: Industrial Solvent Cleaning Operations, filed with the Publisher of the Indiana Register on November 3, 2009, and became effective on December 3, 2009. Published in the Indiana Register on December 2, 2009 (DIN: 20091202-IR-326090221FRA).

(F) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 18: Synthetic Organic Chemical Manufacturing Industry Air Oxidation, Distillation, and Reactor Processes, filed with the Publisher of the Indiana Register on November 3, 2009, and became effective on December 3, 2009. Published in the Indiana Register on December 2, 2009 (DIN: 20091202-IR-326090222FRA).

(G) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 19: Control of Volatile Organic Compound Emissions from Process Vents in Batch Operations, filed with the Publisher of the Indiana Register on November 3, 2009, and became effective on December 3, 2009. Published in the Indiana Register on December 2, 2009 (DIN: 20091202-IR-326090222FRA).

(H) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 20: Industrial Wastewater, filed with the Publisher of the Indiana Register on November 3, 2009, and became effective on December 3, 2009. Published in the Indiana Register on December 2, 2009 (DIN: 20091202-IR-326090222FRA).

(I) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 21: Aerospace Manufacturing and Rework Operations, filed with the Publisher of the Indiana Register on November 3, 2009, and became effective on December 3, 2009. Published in the Indiana Register on December 2, 2009 (DIN: 20091202-IR-326090222FRA).

(J) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 22: Miscellaneous Industrial Adhesives, filed with the Publisher of the Indiana Register on November 3, 2009, and became effective on December 3, 2009. Published in the Indiana Register on December 2, 2009 (DIN: 20091202-IR-326090221FRA).

(K) Corrections to Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 1: General provisions, Section 2: Compliance Methods and Section 4: Testing procedures, filed with the Publisher of the Indiana Register on November 18, 2009, and became effective on January 2, 2010. Published in the Indiana Register on December 16, 2009 (DIN: 20091216-IR-326090220ACA).

(L) Corrections to Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 2: Surface

Coating Emission Limitations, Section 2: Automobile and light duty truck coating operations, filed with the Publisher of the Indiana Register on November 18, 2009, and became effective on January 2, 2010. Published in the Indiana Register on December 16, 2009 (DIN: 20091216-IR-326090220ACA).

(M) Corrections to Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 16: Offset Lithographic Printing and Letterpress Printing, filed with the Publisher of the Indiana Register on November 18, 2009, and became effective on January 2, 2010. Published in the Indiana Register on December 16, 2009 (DIN: 20091216-IR-326090221ACA).

(N) Corrections to Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 17: Industrial Solvent Cleaning Operations, filed with the Publisher of the Indiana Register on November 18, 2009, and became effective on January 2, 2010. Published in the Indiana Register on December 16, 2009 (DIN: 20091216-IR-326090221ACA).

(O) Corrections to Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 18: Synthetic Organic Chemical Manufacturing Industry Air Oxidation, Distillation, and Reactor Processes, filed with the Publisher of the Indiana Register on November 19, 2009, and became effective on January 3, 2010. Published in the Indiana Register on December 16, 2009 (DIN: 20091216-IR-326090222ACA).

(P) Corrections to Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 19: Control of Volatile Organic Compound Emissions from Process Vents in Batch Operations, filed with the Publisher of the Indiana Register on November 19, 2009, and became effective on January 3, 2010. Published in the Indiana Register on December 16, 2009 (DIN: 20091216-IR-326090222ACA).

(Q) Corrections to Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 20: Industrial Wastewater, filed with the Pub-

lisher of the Indiana Register on November 19, 2009, and became effective on January 3, 2010. Published in the Indiana Register on December 16, 2009 (DIN: 20091216-IR-326090222ACA).

(R) Corrections to Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 21: Aerospace Manufacturing and Rework Operations, filed with the Publisher of the Indiana Register on November 19, 2009, and became effective on January 3, 2009. Published in the Indiana Register on December 16, 2009 (DIN: 20091216-IR-326090222ACA).

(S) Corrections to Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 22: Miscellaneous Industrial Adhesives, filed with the Publisher of the Indiana Register on November 18, 2009, and became effective on January 2, 2010. Published in the Indiana Register on December 16, 2009 (DIN: 20091216-IR-326090221ACA).

(194) On December 31, 2008, Indiana submitted a Commissioner's Order that provided an alternative monitoring plan for Indianapolis Power and Light—Harding Street Generating Station in Marion County that is being incorporated into its SIP. The alternative monitoring requirements allow the use of a particulate matter continuous emissions monitoring system in place of a continuous opacity monitor.

(i) *Incorporation by reference.* Commissioner's Order #2008-02 for Indianapolis Power and Light as issued by the Indiana Department of Environmental Management on October 31, 2008.

(195) On June 5, 2009, the Indiana Department of Environmental Management submitted amendments to Indiana's automobile refinishing rule for approval into its state implementation plan (SIP). These rule revisions extend the applicability of Indiana's approved volatile organic compound (VOC) automobile refinishing rules to all persons in Indiana who sell or manufacture automobile refinishing coatings or who refinish motor vehicles.

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.800, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

Subpart Q—Iowa

§ 52.820 Identification of plan.

(a) *Purpose and scope.* This section sets forth the applicable SIP for Iowa under section 110 of the CAA, 42 U.S.C. 7401, and 40 CFR part 51 to meet NAAQS.

(b) *Incorporation by reference.* (1) Material listed in paragraphs (c) and (d) of this section with an EPA approval date prior to December 31, 2014, was approved for incorporation by reference by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Material is incorporated

as it exists on the date of the approval, and notice of any change in the material will be published in the FEDERAL REGISTER. Entries in paragraphs (c) and (d) of this section with EPA approval dates after December 31, 2014, will be incorporated by reference in the next update to the SIP compilation.

(2) EPA Region 7 certifies that the rules/regulations provided by EPA in the SIP compilation at the addresses in paragraph (b)(3) of this section are an exact duplicate of the officially promulgated state rules/regulations which have been approved as part of the SIP as of December 31, 2014.

(3) Copies of the materials incorporated by reference may be inspected at the Environmental Protection Agency, Region 7, Air Planning and Development Branch, 11201 Renner Boulevard, Lenexa, Kansas 66219; and the National Archives and Records Administration (NARA). If you wish to obtain material from the EPA Regional Office, please call (913) 551-7089. For information on the availability of this material at NARA, call (202) 741-6030, or go to: www.archives.gov/federal-register/cfr/ibr-locations.html.

Chapter 33—Special Regulations and Construction Permit Requirements for Major Stationary Sources—Prevention of Significant Deterioration (PSD) of Air Quality				
567–33.1 ...	Purpose	4/18/2018	2/5/2019, 84 FR 1615.	Provisions of the 2010 PM _{2.5} PSD—Increments, SILs and SMCs rule, published in the Federal Register on October 20, 2010, relating to SILs and SMCs that were affected by the January 22, 2013, U.S. Court of Appeals decision are not, at the state's request, included in Iowa's SIP provisions (see Federal Register , March 14, 2014) (Vol. 79, No. 50).
567–33.3 ...	Special Construction Permit Requirements for Major Stationary Sources in Areas Designated Attainment or Unclassified (PSD).	7/22/2020	6/25/2021, 86 FR 33544	
567–33.9 ...	Plantwide Applicability Limitations	7/17/2013	6/17/2016, 81 FR 39585	
567–33.10	Exceptions to adoption by reference	11/1/2006	5/14/2007, 72 FR 27056.

EPA-APPROVED IOWA SOURCE-SPECIFIC ORDERS/PERMITS—Continued

Name of source	Order/Permit No.	State effective date	EPA Approval date	Explanation
(17) Holnam, Inc	Permits for 17-01-009, Project Nos. 99-511 and 00-468..	7/24/2001	11/6/2002, 67 FR 67563	For a list of the 47 permits issued for individual emission points see IDNR letters to Holnam, Inc., dated 7/24/01.
(18) Lehigh Portland Cement Company.	A.C.O. 1999-AQ-32	9/2/1999	11/6/2002, 67 FR 67563	For a list of the 41 permits issued for individual emission points see IDNR letters to Lehigh dated 7/24/01 and 2/18/02.
(19) Lehigh Portland Cement Company.	Permits for plant No. 17-01-005, Project Nos. 99-631 and 02-037.	2/18/2002	11/6/2002, 67 FR 67563	For a list of the 41 permits issued for individual emission points see IDNR letters to Lehigh dated 7/24/01 and 2/18/02.
(20) Blackhawk Foundry and Machine Company.	A.C.O. 03-AQ-51	12/4/2003	6/10/2004, 69 FR 32454	Together with the permits listed below this order comprises the PM ₁₀ control strategy for Dav-enport, Iowa.
(21) Blackhawk Foundry and Machine Company.	Permit No. 02-A-116 (Cold Box Core Machine).	8/19/2002	6/10/2004, 69 FR 32454	Provisions of the permit that relate to pollutants other than PM ₁₀ are not approved by EPA as part of this SIP.
(22) Blackhawk Foundry and Machine Company.	Permit No. 02-A-290(Wheelabrator #2 and Casting Sorting).	8/19/2002	6/10/2004, 69 FR 32454	Provisions of the permit that relate to pollutants other than PM ₁₀ are not approved by EPA as part of this SIP.
(23) Blackhawk Foundry and Machine Company.	Permit No. 02-A-291 (Mold Sand Silo).	8/19/2002	6/10/2004, 69 FR 32454	Provisions of the permit that relate to pollutants other than PM ₁₀ are not approved by EPA as part of this SIP.
(24) Blackhawk Foundry and Machine Company.	Permit No. 02-A-292 (Bond Storage).	8/19/2002	6/10/2004, 69 FR 32454	Provisions of the permit that relate to pollutants other than PM ₁₀ are not approved by EPA as part of this SIP.
(25) Blackhawk Foundry and Machine Company.	Permit No. 02-A-293 (Induction Furnace and Aluminum Sweat Furnace).	8/19/2002	6/10/2004, 69 FR 32454	Provisions of the permit that relate to pollutants other than PM ₁₀ are not approved by EPA as part of this SIP.

EPA-APPROVED IOWA SOURCE-SPECIFIC ORDERS/PERMITS—Continued

Name of source	Order/Permit No.	State effective date	EPA Approval date	Explanation
(26) Blackhawk Foundry and Machine Company.	Permit No. 77–A–114–S1 (Wheelabrator #1 & Grinding).	8/19/2002	6/10/2004, 69 FR 32454	Provisions of the permit that relate to pollutants other than PM ₁₀ are not approved by EPA as part of this SIP.
(27) Blackhawk Foundry and Machine Company.	Permit No. 84–A–055–S1 (Cupola ladle, Pour deck ladle, Sand shakeout, Muller, Return sand #1, Sand cooler, Sand screen, and Return sand #2).	8/19/2002	6/10/2004, 69 FR 32454	Provisions of the permit that relate to pollutants other than PM ₁₀ are not approved by EPA as part of this SIP.
(28) Blackhawk Foundry and Machine Company.	Permit No. 72–A–060–S5 (Cupola).	8/19/2002	6/10/2004, 69 FR 32454	Provisions of the permit that relate to pollutants other than PM ₁₀ are not approved by EPA as part of this SIP.
(29) Grain Processing Corporation.	Administrative Consent Order No. 2014–AQ–A1.	1/16/2017	12/1/2014, 79 FR 71025; amendment approved 6/28/2018, 83 FR 30348.	The last sentence of Paragraph 5, Section III and Section VI are not approved by EPA as part of the SIP.
(30) Muscatine Power and Water	Permit No. 74–A–175–S3 ..	7/22/2013	12/1/2014, 79 FR 71025.

EPA-APPROVED IOWA NONREGULATORY PROVISIONS

Name of nonregulatory SIP provision	Applicable geographic or nonattainment area	State submittal date	EPA Approval date	Explanation
(1) Air Pollution Control Implementation Plan.	Statewide	1/27/1972	5/31/1972, 37 FR 10842.	
(2) Request for a Two Year Extension to Meet the NAAQS.	Council Bluffs	1/27/1972	5/31/1972, 37 FR 10842	Correction notice published 3/2/1976.
(3) Revisions to Appendices D and G.	Statewide	2/2/1972	5/31/1972, 37 FR 10842	Correction notice published 3/2/1976.
(4) Source Surveillance and Record Maintenance Statements.	Statewide	4/14/1972	3/2/1976, 41 FR 8956	[FRL 484–4].
(5) Statement Regarding Public Availability of Emissions Data.	Statewide	5/2/1972	3/2/1976, 41 FR 8956	[FRL 484–4].
(7) Letter Describing the Certificates of Acceptance for Local Air Pollution Control Programs.	Linn County, Polk County.	12/14/1972	10/1/1976, 41 FR 43406	[FRL 616–1].
(8) High Air Pollution Episode Contingency Plan.	Statewide	6/20/1973	10/1/1976, 41 FR 43406	[FRL 616–1].
(9) Summary of Public Hearing on Revised Rules Which Were Submitted on July 17, 1975.	Statewide	9/3/1975	10/1/1976, 41 FR 43406	[FRL 616–1].
(10) Air Quality Modeling to Support Sulfur Dioxide Emission Standards.	Statewide	3/4/1977	6/1/1977, 42 FR 27892 ...	[FRL 739–1].
(11) Nonattainment Plans	Mason City, Davenport, Cedar Rapids, Des Moines.	6/22/1979	3/6/1980, 45 FR 14561 ...	[FRL 1427–5].
(12) Information on VOC Sources to Support the Nonattainment Plan.	Linn County	10/8/1979	3/6/1980, 45 FR 14561 ...	[FRL 1427–5].
(13) Information and Commitments Pertaining to Legally Enforceable RACT Rules to Support the Nonattainment Plan.	Linn County	11/16/1979	3/6/1980, 45 FR 14561 ...	[FRL 1427–5].
(14) Lead Plan	Statewide	8/19/1980	3/20/1981, 46 FR 17778	[A–7–FRL–1776–5].
(15) Letter to Support the Lead Plan.	Statewide	1/19/1981	3/20/1981, 46 FR 17778	[A–7–FRL–1776–5].
(16) Nonattainment Plans to Attain Secondary Standards.	Mason City, Cedar Rapids, Des Moines, Davenport, Keokuk, Council Bluffs, Fort Dodge, Sioux City, Clinton, Marshalltown, Muscatine, Waterloo.	4/18/1980	4/17/1981, 46 FR 22368	[A–7–FRL 1792–2].
(17) Information to Support the Particulate Matter Nonattainment Plan.	Mason City, Cedar Rapids, Des Moines, Davenport, Keokuk, Council Bluffs, Fort Dodge, Sioux City, Clinton, Marshalltown, Muscatine, Waterloo.	9/16/1980	4/17/1981, 46 FR 22368	[A–7–FRL 1792–2].

EDITORIAL NOTES: For FEDERAL REGISTER citations affecting § 52.820, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

§ 52.821 Classification of regions.

The Iowa plan was evaluated on the basis of the following classification:

Air quality control region	Pollutant				
	Particulate matter	Sulfur oxides	Nitrogen dioxide	Carbon monoxide	Photochemical oxidants (hydrocarbons)
Metropolitan Omaha-Council Bluffs Interstate	I	II	III	III	III
Metropolitan Sioux Falls Interstate	II	III	III	III	III
Metropolitan Sioux City Interstate	III	III	III	III	III
Metropolitan Dubuque Interstate	I	III	III	III	III
Metropolitan Quad Cities Interstate	I	III	III	III	III
Burlington-Keokuk Interstate	I	I	III	III	III
Northwest Iowa Intrastate	III	III	III	III	III
North Central Iowa Intrastate	IA	III	III	III	III
Northeast Iowa Intrastate	I	III	III	III	III
Southwest Iowa Intrastate	III	III	III	III	III
South Central Iowa Intrastate	I	III	III	III	I
Southeast Iowa Intrastate	III	III	III	III	III

[37 FR 10865, May 31, 1972, as amended at 39 FR 16346, May 8, 1974]

§ 52.822 Approval status.

(a) With the exceptions set forth in this subpart, the Administrator approves Iowa's plan for the attainment and maintenance of the national standards. Further, the Administrator finds the plan satisfies all requirements of Part D, Title I, of the Clean Air Act as amended in 1977, except as noted below.

(b) [Reserved]

[45 FR 14567, Mar. 6, 1980, as amended at 46 FR 47546, Sept. 29, 1981; 75 FR 82555, Dec. 30, 2010; 76 FR 67070, Oct. 31, 2011]

§ 52.823 PM₁₀ State Implementation Plan Development in Group II Areas.

The Iowa Department of Natural Resources committed to comply with the PM₁₀ regulations as set forth in 40 CFR part 51. In a letter to Morris Kay, EPA, dated October 28, 1988, Mr. Larry J. Wilson, Director, Iowa Department of Natural Resources, stated:

Three groups within the State of Iowa have been classified as Group II areas for fine particulate (PM-10) State Implementation Plan (SIP) development purposes. This includes

Environmental Protection Agency

§ 52.824

portions of the cities of Des Moines, Mason City, and Cedar Rapids. The specific boundaries of these areas were identified in a letter of October 13, 1987, from Peter R. Hamlin to Carl Walter. The remainder of the State was classified as Group III.

In accordance with the SIP development procedures identified in the preamble of the PM-10 regulations for Implementing Revised Particulate Matter Standards, promulgated July 1, 1987, the State of Iowa commits to perform the following activities in these three Group II areas of the state:

(a) Gather ambient PM-10 data, to an extent consistent with minimum EPA requirements (note the network description contained in a letter of January 26, 1988, from Peter R. Hamlin to John Helvig).

(b) Analyze and verify the ambient PM-10 data and report exceedances of the 24-hour PM-10 National Ambient Air Quality Standards (NAAQS) to the Regional Office within 60 days of each exceedance.

(c) Immediately notify the Regional Office:

(1) Upon the availability of an appropriate number of verifiable 24-hour NAAQS exceedances to indicate a violation (see Section 2.0 of the PM-10 SIP development guideline) or

(2) when an annual arithmetic mean (AAM) above the annual PM-10 NAAQS becomes available.

(d) Within thirty (30) days of any notification of the Regional Office pursuant to (c) above (or upon collection of thirty-six (36) months of PM-10 ambient air quality data acceptable to EPA, whichever comes first) determine whether the measures in the existing SIP will assure timely attainment and maintenance of the primary PM-10 NAAQS and immediately notify the Regional Office of the results of this determination.

(e) Within six (6) months of any notification pursuant to (d) above, adopt and submit to EPA a PM-10 control strategy that assures attainment as expeditiously as practicable but not later than three (3) years from approval of the Committal SIP.

Because of the uncertainty about when the determination can be made pursuant to (d) above, it is difficult to determine if that control strategy could provide for the attainment of the PM-10 NAAQS within three years from the date EPA approves this Committal SIP. Therefore, I reserve the right to request a two-year extension of the attainment date as provided in Section 110(e) of the Clean Air Act, if and when the State of Iowa submits a SIP revision for any of these areas of the state.

The State of Iowa also commits to develop a PM-10 emission inventory for the areas submitted as part of any PM-10 SIP pursuant to items (c), (d), and (e) above. If the PM-10 NAAQS are not violated, the State of Iowa will proceed with this inventory for the

three Group II areas in accordance with the following schedule:

October 1, 1988—Request special assistance funds from EPA to perform the inventory.

October 1, 1989—Initiate inventory.

August 1, 1990—Complete inventory.

October 31, 1990*—Submit inventory as part of a determination of adequacy that the current SIP will attain and maintain the PM-10 NAAQS.

[54 FR 33539, Aug. 15, 1989]

§ 52.824 Original identification of plan section.

(a) This section identifies the original "Air Implementation Plan for the State of Iowa" and all revisions submitted by Iowa that were Federally approved prior to July 1, 1998.

(b) The plan was officially submitted on January 27, 1972.

(c) The plan revisions listed below were submitted on the dates specified:

(1) Request for a two-year extension to meet the National Primary and Secondary Ambient Air Quality Standards for nitrogen dioxide in the Metropolitan Omaha-Council Bluffs Interstate Air Quality Control Region was submitted by the Governor on January 27, 1972. (Non-regulatory)

(2) Revisions of Appendices D and G of the plan were submitted on February 2, 1972, by the State Department of Health. (Non-regulatory)

(3) Source surveillance and record maintenance statements were submitted on April 14, 1972, by the State Department of Health. (Non-regulatory)

(4) Revised statement regarding public availability of emission data was submitted on May 2, 1972, by the State Department of Health. (Non-regulatory)

(5) State submitted Senate File 85 which created the Department of Environmental Quality and replaced the Iowa air pollution control statute which appeared as Chapter 136B of the Code of Iowa, on May 4, 1972. (Regulatory)

(6) A letter describing the issuance of a Certificate of Acceptance for the local air pollution control programs conducted by the Linn County Board of

*Presuming that sufficient ambient data acceptable to EPA are collected by July 31, 1990, and available by September 30, 1990.

Health for the jurisdictions of the City of Cedar Rapids and Linn County, and the Des Moines-Polk County Health Department for the jurisdictions of the City of Des Moines and Polk County was submitted by the State Department of Health on December 14, 1972. (Non-regulatory)

(7) Compliance schedules were submitted by the State in February 1973. (Regulatory)

(8) Compliance schedules were submitted by the State in May 1973. (Regulatory)

(9) The State of Iowa High Air Pollution Episode Contingency Plan was submitted on June 20, 1973, by the Governor.

(10) The letter which requested the inclusion of the Linn County Health Department Rules and Regulations, the City of Cedar Rapids Air Pollution Control Ordinance, the Polk County Rules and Regulations—Air Pollution Control, and the City of Des Moines Air Pollution Control Regulations in the State of Iowa implementation plan was submitted by the State Department of Environmental Quality on June 25, 1974. (No approval action was taken on the request because it did not meet the procedural requirements specified in 40 CFR part 51.)

(11) Revisions of Rules 2.1, 3.1, 3.4, 4.1, 4.3(3) and 4.3(4) of the Iowa Rules and Regulations Relating to Air Pollution Control were submitted on April 24, 1974 (by the Governor's office). (No approval or disapproval action was taken on amended Subrule 4.3(3)a., which restricts emissions of sulfur oxides from fuel-burning sources.) (Regulatory)

(12) Compliance schedules were submitted by the State in May 1974.

(13) Compliance schedules were submitted by the State in May 1974.

(14) Compliance schedules were submitted by the State in July 1974.

(15) Compliance schedules were submitted by the State in August 1974.

(16) A letter from the Director of the Department of Environmental Quality, dated August 29, 1974, which requested that no further action be taken on Subrule 4.3(3) a. as submitted on April 24, 1974. (Regulatory)

(17) Compliance schedules were submitted by the State in September 1974.

(18) Compliance schedules were submitted by the State in November 1974.

(19) Compliance schedules were submitted by the State in February 1975.

(20) Compliance schedules were submitted by the State in April 1975.

(21) Compliance schedules were submitted by the State in June 1975.

(22) Revisions of Rules 1.2, 2.1, 3.1, 3.4, 4.1, 4.2, 4.3, 5.1, 7.1, 8.3 and 8.4 of the Iowa Rules and Regulations Relating to Air Pollution Control were submitted on July 17, 1975, by the Governor's office. (Regulatory) (No approval or disapproval action was taken on Subrules 4.3(2)c. or 4.3(3)b.)

(23) Summary of the public hearing which was held on the revised rules which were submitted on July 17, 1975, by the Governor's office was submitted by the Iowa Department of Environmental Quality on September 3, 1975. (non-regulatory)

(24) Letter which withdrew amended Subrule 4.3(2)c. from the proposed Iowa plan revision submitted on July 17, 1975, was submitted by the Governor's office on January 20, 1976.

(25) Revisions to Rules 1.2, 2.1, 3.1, 3.2, 4.1, 4.3, 4.4, and new Chapters 14 and 52 of the Iowa Administrative Code Relating to Air Pollution Control were submitted June 9, 1976, by the Department of Environmental Quality (Subrules 4.3(3)a(1) and 4.3(3)a(5) were disapproved).

(26) Additional air quality modeling to support the sulfur dioxide emission standards of Subrules 4.3(3)a(1) and 4.3(3)a(2) was submitted March 4, 1977, by the Department of Environmental Quality (Non-regulatory).

(26a) Revisions of Rules 1.2, 4.3(2)b, 4.4(6), 4.4(12) and of Chapter 7 of the Iowa Administrative Code relating to Air Pollution Control were submitted June 20, 1977, by the Department of Environmental Quality.

(27) Nonattainment plan provisions as required by the Clean Air Act Amendments of 1977 were submitted on June 22, 1979, by the Department of Environmental Quality. The submission included amended rule 4.3(2) relating to fugitive dust and new rule 4.5 relating to offsets for particulate matter. The revisions included attainment plans for particulate in Mason City and Davenport, particulate and ozone in Cedar

Environmental Protection Agency

§ 52.824

Rapids and particulate and carbon monoxide in Des Moines. The submission was disapproved in part for failure to meet the requirements of Section 173 and was conditionally approved with respect to several requirements.

(28) On October 8, 1979, the Iowa Department of Environmental Quality submitted additional information to support the June 22, 1979, submission.

(29) On November 16, 1979, the Iowa Air Quality Commission submitted additional information and commitments to allow approval or conditional approval of portions of the June 22, 1979, submission.

(30) Nonattainment plan provisions as required by the Clean Air Act Amendments of 1977 were submitted on April 18, 1980, by the Department of Environmental Quality. The submission included amended rule 4.3(2) relating to fugitive dust and amended rule 3.5 relating to particulate matter offsets. The revisions included plans to attain the secondary particulate standards for all areas designated nonattainment as of March 6, 1980. The submission was conditionally approved with respect to several requirements.

(31) The State of Iowa Lead State Implementation Plan was submitted on August 19, 1980 by the Director of the Department of Environmental Quality.

(32) Additional information to support the April 18, 1980 submission was submitted on September 16, 1980, by the Department of Environmental Quality.

(33) Additional information to support the April 18, 1980 submission was submitted on November 17, 1980, by the Department of Environmental Quality.

(34) A revised Chapter 5, dealing with excess emissions and malfunctions was submitted on December 23, 1980, by the Department of Environmental Quality.

(35) [Reserved]

(36) A letter was submitted dated January 19, 1981 by the Director of the Department of Environmental Quality which provided additional information concerning the Iowa Lead State Implementation Plan.

(37) A variance from 400—4.2(1) of the Iowa Administrative Code for the Iowa Army Ammunition Plant at Middletown, Iowa, was submitted on October 19, 1979 by the Executive Director.

(38) Revisions to Subrule 400—4.3(2)“c” relating to fugitive emissions control and a document describing how this subrule is to be enforced were submitted on June 1, 1981, by the Department of Environmental Quality.

(39) A schedule for studying nontraditional sources of particulate matter and for implementing the results of the studies in the form of control strategies was submitted on June 26, 1981 by the Department of Environmental Quality. (Non-Regulatory).

(40) Revisions to Subrule 400—4.3(2)“b” relating to particulate emissions from fuel burning sources were submitted on July 31, 1981, by the Department of Environmental Quality.

(41) The Iowa Ambient Air Monitoring Strategy was submitted July 15, 1981, by the Department of Environmental Quality (non-regulatory).

(42) A conditional permit containing an alternative emission reduction program for the Progressive Foundry, Inc., of Perry, Iowa, under 400-3.7 and 400-4.6 of the Iowa Administrative Code; and an administrative order setting forth a compliance schedule, were submitted on December 18, 1981, by the Executive Director. The conditional permit specifies particulate emissions not to exceed 16.3 pounds per hour from the gray iron cupola with a process weight rate not to exceed 8534 pounds per hour and specifies the casting shakeout exhaust system shall not exceed 0.05 grains per standard cubic foot nor 12.8 pounds per hour of particulate matter. The compliance schedule specifies a final compliance date of September 1, 1983.

(43) On July 1, 1983, the State's air pollution control regulations were recodified at Department 900, Title II, Chapters 20 through 29.

(44) Revised Chapter 22 regulations, dealing with new source review in non-attainment areas, were submitted on July 18, 1984, by the Iowa Department of Water, Air and Waste Management. Subrules 22.5(4) g, i, and j remain unapproved. EPA will temporarily defer action on these subrules pending a May 14, 1985, commitment from the State to submit appropriate revisions.

(i) *Incorporation by reference.* Revised Chapter 22 regulations, dealing with new source review in nonattainment

areas, adopted by the State on July 17, 1984.

(ii) *Additional material.* May 14, 1985, letter of commitment from the State to revise unapprovable portions of their Chapter 22 air pollution regulations.

(45) Revised Chapter 22 subrules 22.5(2) a and b; and revised subrules 22.5(4) g, i, and j, all relating to new source review in nonattainment areas, were submitted on December 31, 1985, by the Iowa Department of Water, Air and Waste Management.

(a) *Incorporation by reference.*

(i) Revised Chapter 22 subrules 22.5(2) a and b; and subrules 22.5(4) g, i, and j, adopted by the State on December 17, 1985.

(ii) April 22, 1986, letter of commitment from the Iowa Department of Water, Air and Waste Management to submit stack height regulations by May 30, 1986, and to implement EPA's stack height requirements until such time that the regulations are fully approved.

(46) Revised Chapter 22 regulations pertaining to new source review in attainment and unclassified areas of the state (PSD) were submitted on March 9, 1987, by the Iowa Department of Natural Resources.

(i) *Incorporation by reference.* (A) Iowa Administrative Bulletin (ARC 7446), amendments to Chapter 22, "Controlling Pollution," adopted by the Iowa Environmental Protection Commission on February 17, 1987.

(B) Letter from Iowa dated April 22, 1987, committing to implementation of its stack height regulations in a manner consistent with EPA's stack height regulations with respect to new source review/PSD regulations.

(47) Revised Chapters 22 and 23 regulations pertaining to stack height credits for modeling purposes were submitted on May 20, 1986, by the Iowa Department of Natural Resources. Revised definition of "emission limitation" and "emission standard" at Iowa regulation 567.20.2(455B), Definitions.

(i) *Incorporation by reference.* (A) Iowa Administrative Bulletin (ARC 6566), amendments to Chapter 22, "Controlling Pollution" and Chapter 23, "Emission Standards for Contaminants" adopted by the Iowa Environmental

Protection Commission on April 22, 1986, effective June 25, 1986.

(B) Iowa Administrative Bulletin (ARC 8023) amendment to 567-20.2(455B). Effective September 22, 1987.

(48) Revised Chapter 22, subrule 22.1(2)"d" exemptions from permit requirements were submitted on September 13, 1988, by the Iowa Department of Natural Resources. The revision clarifies permit exemptions for certain grain roasting equipment.

(i) *Incorporation by reference.* (A) Amendment to Chapter 22, "Controlling Pollution," Iowa Administrative Code, subrule 22.1(2)"d", effective September 14, 1988.

(49) Revised Polk County, Iowa, Board of Health Rules and Regulations, Chapter V, Air Pollution, submitted by the Iowa Department of Natural Resources on February 3, 1988. EPA approves these regulations with the provision that any operating permit which changes any requirement of the Iowa SIP, including requirements in any construction permit, must be submitted to EPA, and approved, as a SIP revision. In the absence of such approval, the enforceable requirements shall be those in the Iowa SIP.

(i) *Incorporation by reference.* (A) Ordinance No. 28, Amendment to Polk County Board of Health Rules and Regulations chapter V, Air Pollution, Article I, 5-1 and 5-2 (except for variance); Article II, 5-3; and Article X, 5-28 through 5.50-1 (except for 5-49 and 5-50), effective October 8, 1987.

(ii) *Additional material.* (A) None.

(50) Revised Linn County, Iowa, Chapter 10 Ordinance "Air Pollution Control" submitted as a SIP revision by the Iowa Department of Natural Resources on February 3, 1988. EPA approves these regulations with the provision that any operating permit which changes any requirement of the Iowa SIP, including requirements in any construction permit, must be submitted to EPA, and approved, as a SIP revision. In the absence of such approval, the enforceable requirements shall be those in the Iowa SIP.

(i) *Incorporation by reference.* (A) Linn County Chapter 10 Ordinance "Air Pollution Control" sections 10.1 (except for 10.1(50)), 10.2, 10.3, and 10.4, adopted

by the Linn County Board of Supervisors on September 2, 1987.

(ii) *Additional material.* (A) None.

(51) Revised Iowa regulations pertaining to PM₁₀ were submitted by the state on October 28, 1988. These rules became effective on December 21, 1988.

(i) *Incorporation by reference.* (A) Amended Iowa Administrative Code pertaining to the prevention, abatement, and control of air pollution: Chapter 20, "Scope of Title—Definitions—Forms—Rules of Practice;" Chapter 22, "Controlling Pollution;" Chapter 26, "Prevention of Air Pollution Emergency Episodes;" and Chapter 28, "Ambient Air Quality Standards," effective December 21, 1988.

(ii) *Additional information.* (A) None.

(52) Revised chapter 22, subrule 22.4(1), submitted on May 7, 1990, incorporates by reference revised EPA Modeling Guideline Supplement A, July 1987, and recodified air quality rules chapter 20–29.

(i) *Incorporation by reference.* (A) Amendment to chapter 22, "Controlling Pollution," Iowa Administrative Code, subrule 22.4(1). Effective March 14, 1990.

(B) Recodification of Iowa Administrative Code, title II—Air Quality, chapters 20–29, effective December 3, 1986.

(53) Revised chapter 22, rule 22.4(455B), submitted on November 8, 1990, incorporates by reference revised EPA PSD rules pertaining to NO_x increments.

(i) *Incorporation by reference.* (A) Amendment to chapter 22, "Controlling Pollution," Iowa Administrative Code, subrule 22.4, adopted by the Environmental Protection Commission on October 17, 1990, effective November 21, 1990.

(ii) *Additional material.* (A) Letter from the state dated November 8, 1990, pertaining to NO_x rules and analysis which certifies the material was adopted by the state on October 17, 1990.

(54) On March 13, 1991, the Iowa Department of Natural Resources (IDNR) submitted a plan revision pertaining to major SO₂ sources in Clinton County, Iowa.

(i) *Incorporation by reference.* (A) Administrative Consent Order #90-AQ-10, signed by Larry Wilson, Director, IDNR, dated July 5, 1990, and revision

dated March 25, 1991. Also, three letters to Archer-Daniels-Midland (ADM) Company dated June 20, 1990, signed by Michael Hayward, IDNR, which contain or reference new or revised permit conditions for ADM sources, and a letter to ADM from IDNR dated February 26, 1991, correcting certain permit provisions.

(B) Administrative Consent Order #89-AQ-04, signed by Larry Wilson, Director, IDNR, dated February 21, 1990. Also, two letters to Interstate Power Company dated January 25 and 29, 1990, and signed by Michael Hayward, IDNR, which contain supplemental permit condition for permits 74-A-117-S and 78-A-157-S.

(ii) *Additional material.* (A) Letter and supplemental material from Larry J. Wilson to Morris Kay dated March 13, 1991.

(55) Revised Polk County, Iowa Board of Health Rules and Regulations, chapter V, Air Pollution, submitted by the Iowa Department of Natural Resources on May 23, 1991.

(i) *Incorporation by reference.* (A) Polk County Board of Health Rules and Regulations, chapter V, Air Pollution, Ordinances 28, 72 and 85, effective May 1, 1991, except for the following: Article I, definition of variance; Article VI, Section 5-16 (n), (o), and (p); Article VI, Section 5-17(d), variance provision; Article VIII; Article IX, Sections 5-27(3) and 5-27(4); and Article X, Division 5—Variance.

(ii) *Additional material.* (A) Letter from Allan Stokes to William A. Spratlin dated October 23, 1991.

(56) Revised Chapter 23, rule 23.2, submitted on October 3, 1991, incorporates changes to the open burning rule.

(i) *Incorporation by reference.* (A) Amendment to Chapter 23, "Emission Standards for Contaminants," Iowa Administrative Code, subrule 23.2, adopted by the Environmental Protection Commission, effective September 12, 1990.

(ii) *Additional information.* (A) Letter from Allan Stokes, IDNR, to William Spratlin, dated October 3, 1991.

(57) On January 5, 1993, the Iowa Department of Natural Resources (IDNR) submitted air quality rule revisions to Iowa Administrative Code, Chapters 20,

22, 23, 24, 25, 29, and revisions to the Compliance Sampling Manual.

(i) *Incorporation by reference.* (A) Revisions to Chapter 20 (20.2), Scope of Title-Definitions-Forms-Rules of Practice; Chapter 22 (22.3(1), 22.4, 22.5(2)), Controlling Pollution; Chapter 23 (23.2(3), 23.3(2), 23.3(3), 23.4(12)), Emission Standards for Contaminants; Chapter 24 (24.1(1), 24.1(5)), Excess Emission; Chapter 25, (25.1(7), 25.1(9)), Measurement of Emissions and rescind 25.1(10)d; and Chapter 29 (29.1), Qualification in Visual Determination of the Opacity of Emissions. These revisions were adopted by the Iowa Environmental Protection Commission on December 21, 1992, and became effective on February 24, 1993.

(ii) *Additional material.* (A) Letter from Larry Wilson, IDNR, to Morris Kay, EPA, dated January 5, 1993, and the Compliance Sampling Manual, revised December 1992.

(58) A plan for implementation of the Small Business Stationary Source Technical and Environmental Compliance Assistance Program was submitted by the Iowa Department of Natural Resources as a revision to the Iowa SIP on December 22, 1992.

(i) *Incorporation by reference.* (A) Revisions to the Iowa State Implementation Plan for the Small Business Stationary Source Technical and Environmental Compliance Assistance Program dated December 1992.

(59) On May 5, 1994, the Director of the Iowa Department of Natural Resources submitted revisions to the State Implementation Plan (SIP) to update the state's incorporation by reference and conformity to various federally approved regulations.

(i) *Incorporation by reference.* (A) Revised rules, "Iowa Administrative Code," effective January 12, 1994. This revision approves an amendment to paragraph 23.2(3)g pertaining to open fires burned for the purpose of training fire-fighting personnel.

(B) Revised rules, "Iowa Administrative Code," effective April 20, 1994. This revision approves amendments to rules 22.4; 23.3(2)d (3) and (4); 23.4(6); and 25.1(9). These rules concern the update of the state's incorporation of prevention of significant deterioration and test method requirements.

(ii) *Additional material.* None.

(60) On May 5, 1994, the Director of the Iowa Department of Natural Resources submitted revisions to the State Implementation Plan (SIP) to update the state's incorporation by reference and conformity to various Federally approved regulations.

(i) *Incorporation by reference.* (A) Revised rules, "Polk County Ordinance No. 132—Polk County Board of Health Rules and Regulations," effective December 2, 1993. This revision approves all articles in Chapter V, except for Article VI, Section 5–16(n) and (p), Article VIII, and Article XIII.

(ii) *Additional material.* (A) None.

(61) On October 18, 1994, and January 26, 1995, the Director of the Iowa Department of Natural Resources submitted revisions to the state implementation plan (SIP) to include special requirements for nonattainment areas, provisions for use of compliance, and enforcement information and adoption of EPA definitions. These revisions fulfill Federal regulations which strengthen maintenance of established air quality standards.

(i) *Incorporation by reference.* (A) Revised rules "Iowa Administrative Code," effective November 16, 1994. This revision approves revised rules 567–20.2, 567–22.5(1)a, 567–22.5(1)f(2), 567–22.5(1)m, 567–22.5(2), 567–22.5(3), 567–22.5(4)b, 567–22.5(6), 567–22.5(7), 567–22.105(2), and new rule 567–21.5. These rules provide for special requirements for nonattainment areas, provisions for use of compliance and enforcement information and adopts EPA's definition of volatile organic compound.

(B) Revised rules, "Iowa Administrative Code," effective February 22, 1995. This revision approves new definitions to rule 567–20.2. This revision adopts EPA's definitions of "EPA conditional method" and "EPA reference method."

(ii) *Additional material.* None.

(62) [Reserved]

(63) On December 8, 1994; February 16, 1996; and February 27, 1996, the Director of the Iowa Department of Natural Resources submitted revisions to the State Implementation Plan (SIP) to create a voluntary operating permit program as an alternative to Title V.

Environmental Protection Agency

§ 52.824

These revisions strengthen maintenance of established air quality standards.

(i) *Incorporation by reference.* (A) “Iowa Administrative Code,” sections 567–22.200–22.208, effective December 14, 1994. These rules create the voluntary operating permit program.

(B) “Iowa Administrative Code,” sections 567–22.201(1)“a” and 22.206(1)“h”, effective January 11, 1995.

(C) “Iowa Administrative Code,” section 567–22.203(1)“a”(1), effective February 24, 1995.

(D) “Iowa Administrative Code,” sections 567–20.2; 22.200; 22.201(1)“a” and “b”; 22.201(2)“a”; and 22.206(2)“c”, effective October 18, 1995.

(ii) *Additional material.* (A) Letter from Allan E. Stokes, Iowa Department of Natural Resources, to William A. Spratlin, U.S. EPA, dated February 16, 1995. This letter outlines various commitments by the state to meet requirements outlined by the EPA.

(64) In correspondence dated February 16, 1996, February 19, 1996, and February 27, 1996, the Director of the Iowa Department of Natural Resources (IDNR) submitted revisions to the State Implementation Plan concerning open burning, new source review (NSR) requirements for nonattainment areas, test method and definition updates.

(i) *Incorporation by reference.* (A) “Iowa Administrative Code,” section 567–22.8(1), effective July 12, 1995, containing a permit by rule for spray booths.

(B) “Iowa Administrative Code,” sections 567–23.2(3); 23.2(4), effective April 19, 1995, addressing open burning.

(C) “Iowa Administrative Code,” sections 567–22.5 (2)–(6), (8)–(10), effective March 20, 1996. These rules address NSR requirements in nonattainment areas.

(D) “Iowa Administrative Code,” sections 567–20.2; 22.4(1); and 25.1(9), effective July 12, 1995. These rules address test method and definition updates.

(E) “Iowa Administrative Code,” section 567–31.1, effective February 22, 1995. This rule addresses permit requirements relating to nonattainment areas.

(ii) *Additional material.* (A) Letter dated July 11, 1997, from Pete Hamlin, IDNR, to Wayne Leidwanger, EPA, requesting approval under 112(1).

(65) On June 13, 1996, and April 25, 1997, the Director of the Iowa Department of Natural Resources (IDNR) submitted a revision to the State Implementation Plan (SIP) which included permits containing source specific emission limits and conditions for three sources in Muscatine, Iowa.

(i) *Incorporation by reference.* (A) Grain Processing Corporation permits #95–A–374, #74–A–015–S, #79–A–194–S, #79–A–195–S, signed September 18, 1995.

(B) Muscatine Power and Water permits #74–A–175–S, #95–A–373 signed September 14, 1995.

(C) Monsanto Corporation permits #76–A–265S3, #76–A–161S3, signed July 18, 1996.

(ii) *Additional material.* (A) Letters from Allan E. Stokes, IDNR, to Dennis Grams, Environmental Protection Agency, dated June 13, 1996, and April 21, 1997, containing supporting SIP information.

(66) On April 2, 1997, the Director of the Iowa Department of Natural Resources submitted revisions to the State Implementation Plan (SIP) for the State’s two local agencies: the Polk County Public Works Department and Linn County Health Department.

(i) *Incorporation by reference.* (A) Revised rules, “Polk County Board of Health Rules and Regulations: Chapter V, Air Pollution,” effective December 18, 1996. This revision approves all articles insofar as they pertain to the SIP. Article XIII is specifically excluded from this approval. No action is taken on Sections 5–16(n), 5–16(p), 5–20, and 5–27(3) and (4).

(B) Revised rules, “Linn County Air Pollution Control Code of Ordinances,” effective March 7, 1997. This revision approves all sections insofar as they pertain to the SIP. Sections 10.4(1.), 10.11, and 10.15 are specifically excluded from this approval. No action is taken on Sections 10.9(2.), 10.9(3.), 10.9(4.), and the definition of “federally enforceable” in Section 10.2.

(ii) *Additional material.* (A) Letter from Allan E. Stokes, Iowa Department of Natural Resources, to William A. Spratlin, Environmental Protection Agency, dated May 15, 1997. This letter provides additional information regarding various administrative requirements outlined in 40 CFR part 51.

(67) In correspondence dated October 21, 1997, and January 21, 1998, the Director of the Iowa Department of Natural Resources submitted revisions to the State Implementation Plan.

(i) *Incorporation by reference.* (A) “Iowa Administrative Code” sections 567-22.8(1) “b,” “c,” and “e,” 567-22.203(1) “a,” 567-22.300, 567-22.300(1) through 567-22.300(11), 567-23.3(2) “d,” and 567-29.1, effective June 12, 1996.

(B) “Iowa Administrative Code” section 567-20.2, effective October 16, 1996.

(C) “Iowa Administrative Code” sections 567-22.300(40) “b”(1), 567-22.300(8) “a”(1), and 567-22.300(8) “b”(2), effective December 25, 1996. (D) “Iowa Administrative Code” sections 567-20.2, 567-22.2(1), 567-22.201(1) “a,” 567-22.201(2) “b,” 567-22.202, 567-22.203(1), 567-22.300(3) “b” and “c,” 567-22.300(8) “a,” effective May 14, 1997.

(ii) *Additional material.* (A) “Iowa Administrative Code” section 567-23.1(5), Calculation of emission limitations based upon stack height, was renumbered to section 567-23.1(6), effective August 20, 1997.

§ 52.825 Compliance schedules.

(a) [Reserved]

(b) *Regulation for increments of progress.* (1) Except as provided in paragraph (b)(2) of this section, the owner or operator of any stationary source subject to regulation 4.3.(3)(b), “Rules and Regulations Relating to Air Pollution Control of the Iowa Air Pollution

Control Commission” shall, no later than December 31, 1972, submit to the Administrator for approval, a proposed compliance schedule that demonstrates compliance with the applicable regulation as expeditiously as practicable but no later than January 1, 1975. The compliance schedule shall provide for periodic increments of progress towards compliance. The dates for achievement of such increments shall be specified. Increments of progress shall include, but not be limited to: Letting of necessary contract for construction or process changes, if applicable; initiation of construction; completion and start-up of control system; performance tests; and submittal of performance test analysis and results.

(2) Where any such owner or operator demonstrates to the satisfaction of the Administrator that compliance with the applicable regulations will be achieved on or before December 31, 1973, no compliance schedule shall be required.

(3) Any owner or operator who submits a compliance schedule pursuant to this paragraph shall, within 5 days after the deadline for each increment of progress, certify to the Administrator whether or not the required increment of the approved compliance schedule has been met.

(4) Any compliance schedule adopted by the State and approved by the Administrator shall satisfy the requirements of this paragraph for the affected source.

(c) The compliance schedules for the sources identified below are approved as revisions to the plan pursuant to § 51.104 and subpart N of this chapter. All regulations cited are air pollution control regulations of the State, unless otherwise noted.

IOWA

Source	Location	Regulation involved	Date adopted	Variance expiration date	Final compliance date
Iowa Army Ammunition Plant (explosive contaminated waste burning).	Middletown, Iowa.	400-4.2(1)	June 14, 1979	Feb. 28, 1982 ..	Feb. 1982.
Progressive Foundry, Inc., cupola and casting shakeout area.	Perry	400-4.6	Nov. 6, 1981 ...		Sept. 1, 1983.

NOTE 1: Linn County Health Department does not issue variances if source(s) is on an approvable compliance schedule.

NOTE 2: Polk County Department of Health does not issue variances if source(s) is on an accepted and approved compliance schedule.

NOTE 3: City of Des Moines, Department of Public Health does not issue variances if source(s) is on an accepted and approved compliance schedule.

[37 FR 10865, May 31, 1972]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.825, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

§§ 52.826–52.827 [Reserved]

§ 52.828 Enforcement.

(a) Sections 23(1)(b) and 13(7) of Senate File 85, Division II for Iowa are disapproved insofar as they permit the Air Quality Commission of the Iowa Department of Environmental Quality to issue abatement orders (1) that defer compliance with plan requirements beyond the dates required for attainment of the national standards, (2) without the approval of the Administrator, and (3) for reasons not permitted by the Clean Air Act.

(b) Regulation limiting administrative abatement orders:

(1) No order deferring compliance with a requirement of the Iowa Implementation Plan shall be issued by the Air Quality Commission of the Iowa Department of Environmental Quality which does not meet the following requirements:

(i) An order must require compliance with the plan requirement within the times and under the conditions specified in § 51.261 (a) and (b) of this chapter.

(ii) An order may not defer compliance beyond the last date permitted by section 110 of the Act for attainment of the national standard which the plan implements unless the procedures and conditions set forth in section 110(f) of the Act are met.

(iii) An order shall not be effective until it has been submitted to and approved by the Administrator in accordance with §§ 51.104, 51.105, 51.261 and 51.262(a).

(2) Notwithstanding the limitations of paragraph (b)(1)(ii) of this section, an order may be granted which provides for compliance beyond the statutory attainment date for a national standard where compliance is not possible because of breakdowns or malfunctions of equipment, acts of God, or other unavoidable occurrences. However, such order may not defer compliance for more than three (3) months unless the procedures and conditions

set forth in section 110(f) of the Act are met.

[38 FR 30877, Nov. 8, 1973, as amended at 51 FR 40675, 40676, 40677, Nov. 7, 1986; 52 FR 24367, June 30, 1987]

§§ 52.829–52.832 [Reserved]

§ 52.833 Significant deterioration of air quality.

(a) The requirements of sections 160 through 165 of the Clean Air Act are met, except for sources seeking permits to locate on Indian lands in the state of Iowa; and certain sources affected by the stack height rules described in a letter from Iowa dated April 22, 1987.

(b) Regulations for preventing significant deterioration of air quality. The provisions of § 52.21 except paragraph (a)(1) are hereby incorporated and made a part of the applicable State plan for the State of Iowa for sources wishing to locate on Indian lands; and certain sources as identified in Iowa's April 22, 1987, letter.

[71 FR 16053, Mar. 30, 2006]

§ 52.834 Control strategy: Sulfur dioxide.

(a) *Approval.* On April 21, 1997, the Iowa Department of Natural Resources (IDNR) submitted a maintenance plan and redesignation request for the Muscatine County nonattainment area for the 1971 SO₂ national ambient air quality standard (NAAQS). The maintenance plan and redesignation request satisfy all applicable requirements of the Clean Air Act.

(b) *Determination of attainment by the attainment date.* As of May 9, 2022, the EPA has determined that the Muscatine, Iowa SO₂ nonattainment area has attained the 2010 1-hour SO₂ primary NAAQS by the applicable attainment date of October 4, 2018.

[87 FR 20331, Apr. 7, 2022]

§ 52.840 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of nitrogen oxides?

(a)(1) The owner and operator of each source and each unit located in the State of Iowa and Indian country within the borders of the State and for which requirements are set forth under the CSAPR NO_x Annual Trading Program in subpart AAAAA of part 97 of this chapter must comply with such requirements. The obligation to comply with such requirements with regard to sources and units in the State will be eliminated by the promulgation of an approval by the Administrator of a revision to Iowa's State Implementation Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan under § 52.38(a) for those sources and units, except to the extent the Administrator's approval is partial or conditional. The obligation to comply with such requirements with regard to sources and units located in Indian country within the borders of the State will not be eliminated by the promulgation of an approval by the Administrator of a revision to Iowa's SIP.

(2) Notwithstanding the provisions of paragraph (a)(1) of this section, if, at the time of the approval of Iowa's SIP revision described in paragraph (a)(1) of this section, the Administrator has already started recording any allocations of CSAPR NO_x Annual allowances under subpart AAAAA of part 97 of this chapter to units in the State for a control period in any year, the provisions of subpart AAAAA of part 97 of this chapter authorizing the Administrator to complete the allocation and recordation of CSAPR NO_x Annual allowances to units in the State for each such control period shall continue to apply, unless provided otherwise by such approval of the State's SIP revision.

(b)(1) The owner and operator of each source and each unit located in the State of Iowa and Indian country within the borders of the State and for which requirements are set forth under the CSAPR NO_x Ozone Season Group 1 Trading Program in subpart BBBB of part 97 of this chapter must comply with such requirements with regard to emissions occurring in 2015 and 2016.

(2) The owner and operator of each source and each unit located in the State of Iowa and Indian country within the borders of the State and for which requirements are set forth under the CSAPR NO_x Ozone Season Group 2 Trading Program in subpart EEEEE of part 97 of this chapter must comply with such requirements with regard to emissions occurring in 2017 and each subsequent year. The obligation to comply with such requirements with regard to sources and units in the State will be eliminated by the promulgation of an approval by the Administrator of a revision to Iowa's State Implementation Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan (FIP) under § 52.38(b) for those sources and units, except to the extent the Administrator's approval is partial or conditional. The obligation to comply with such requirements with regard to sources and units located in Indian country within the borders of the State will not be eliminated by the promulgation of an approval by the Administrator of a revision to Iowa's SIP.

(3) Notwithstanding the provisions of paragraph (b)(2) of this section, if, at the time of the approval of Iowa's SIP revision described in paragraph (b)(2) of this section, the Administrator has already started recording any allocations of CSAPR NO_x Ozone Season Group 2 allowances under subpart EEEEE of part 97 of this chapter to units in the State for a control period in any year, the provisions of subpart EEEEE of part 97 of this chapter authorizing the Administrator to complete the allocation and recordation of CSAPR NO_x Ozone Season Group 2 allowances to units in the State for each such control period shall continue to apply, unless provided otherwise by such approval of the State's SIP revision.

[76 FR 48364, Aug. 8, 2011, as amended at 76 FR 80774, Dec. 27, 2011; 81 FR 74586 and 74595, Oct. 26, 2016; 83 FR 65924, Dec. 21, 2018]

§ 52.841 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of sulfur dioxide?

(a) The owner and operator of each source and each unit located in the

Environmental Protection Agency

§ 52.870

State of Iowa and Indian country within the borders of the State and for which requirements are set forth under the CSAPR SO₂ Group 1 Trading Program in subpart CCCCC of part 97 of this chapter must comply with such requirements. The obligation to comply with such requirements with regard to sources and units in the State will be eliminated by the promulgation of an approval by the Administrator of a revision to Iowa's State Implementation Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan under § 52.39 for those sources and units, except to the extent the Administrator's approval is partial or conditional. The obligation to comply with such requirements with regard to sources and units located in Indian country within the borders of the State will not be eliminated by the promulgation of an approval by the Administrator of a revision to Iowa's SIP.

(b) Notwithstanding the provisions of paragraph (a) of this section, if, at the time of the approval of Iowa's SIP revision described in paragraph (a) of this section, the Administrator has already started recording any allocations of CSAPR SO₂ Group 1 allowances under subpart CCCCC of part 97 of this chapter to units in the State for a control period in any year, the provisions of subpart CCCCC of part 97 of this chapter authorizing the Administrator to complete the allocation and recordation of CSAPR SO₂ Group 1 allowances to units in the State for each such control period shall continue to apply, unless provided otherwise by such approval of the State's SIP revision.

[76 FR 48365, Aug. 8, 2011, as amended at 81 FR 74586 and 74595, Oct. 26, 2016]

§ 52.842 Visibility protection.

The requirements of section 169A of the Clean Air Act are met because the Regional Haze plan submitted by Iowa on March 25, 2008 and supplemented on May 14, 2019, includes fully approvable measures for meeting the requirements of the Regional Haze Rule including 40 CFR 51.308(d)(3) and 51.308(e) with re-

spect to emissions of NO_x and SO₂ from electric generating units.

[84 FR 66078, Dec. 3, 2019]

Subpart R—Kansas

§ 52.869 [Reserved]

§ 52.870 Identification of plan.

(a) *Purpose and scope.* This section sets forth the applicable SIP for Kansas under Section 110 of the CAA, 42 U.S.C. 7401 *et seq.* and 40 CFR Part 51 to meet NAAQS.

(b) *Incorporation by reference.* (1) Material listed in paragraphs (c) and (d) of this section with an EPA approval date prior to December 31, 2014, was approved for incorporation by reference by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Material is incorporated as it exists on the date of the approval, and notice of any change in the material will be published in the FEDERAL REGISTER. Entries in paragraphs (c) and (d) of this section with EPA approval dates after December 31, 2014, will be incorporated by reference in the next update to the SIP compilation.

(2) EPA Region 7 certifies that the rules/regulations provided by EPA in the SIP compilation at the addresses in paragraph (b)(3) of this section are an exact duplicate of the officially promulgated state rules/regulations which have been approved as part of the SIP as of December 31, 2014.

(3) Copies of the materials incorporated by reference may be inspected at the Environmental Protection Agency, Region 7, Air Planning and Development Branch, 11201 Renner Boulevard, Lenexa, Kansas 66219; at the EPA, Air and Radiation Docket and Information Center, and the National Archives and Records Administration (NARA). If you wish to obtain material from the EPA Regional Office, please call (913) 551-7089. For information on the availability of this material at NARA, call (202) 741-6030, or go to: www.archives.gov/federal-register/cfr/ibr-locations.html.

(e) *EPA-approved nonregulatory provisions and quasi-regulatory measures.*

EPA-APPROVED KANSAS NONREGULATORY PROVISIONS

Name of nonregulatory SIP provision	Applicable geographic or non-attainment area	State submittal date	EPA approval date	Explanation
(1) Implementation Plan for Attainment and Maintenance of the National Air Quality Standards.	Statewide	1/31/72	5/31/72, 37 FR 10867.	
(2) Comments on the Plan in Response to EPA Review.	Kansas City	3/24/72	6/22/73, 38 FR 16550	Correction notice published 3/2/76.
(3) Emergency Episode Operations/Communications Manual.	Kansas City	4/6/72	11/8/73, 38 FR 30876	Correction notice published 3/2/76.
(4) Emergency Episode Operations/Communications Manual.	Statewide except Kansas City.	2/15/73	11/8/73, 38 FR 30876	Correction notice published 3/2/76.
(5) Letter Concerning Attainment of CO Standards.	Kansas City	5/29/73	11/8/73, 38 FR 30876	Correction notice published 3/2/76.
(6) Amendment to State Air Quality Control Law Dealing with Public Access to Emissions Data.	Statewide	7/27/73	11/8/73, 38 FR 30876	Correction notice published 3/2/76.
(7) Analysis and Recommendations Concerning Designation of Air Quality Maintenance Areas.	Statewide	2/28/74	3/2/76, 41 FR 8956	[FRL 484–4].
(8) Ozone Nonattainment Plan	Kansas City	9/17/79	4/3/81, 46 FR 20164	[A–7–FRL 1788–5].
(9) Ozone Nonattainment Plan	Douglas County	10/22/79	4/3/81, 46 FR 20164	[A–7–FRL 1788–5].
(10) TSP Nonattainment Plan	Kansas City	3/10/80	4/3/81, 46 FR 20164	[A–7–FRL 1788–5].
(11) Lead Plan	Statewide	2/17/81	10/22/81, 46 FR 51742 ...	[A–7–FRL–1938–8].
(12) CO Nonattainment Plan	Wichita	4/16/81	12/15/81, 46 FR 61117 ...	[A–7–FRL–1990–3].
(13) Air Monitoring Plan	Statewide	10/16/81	1/22/82, 47 FR 3112	[A–7–FRL–2024–8].
(14) Letter and Supporting Documentation Relating to Reasonably Available Control Technology for Certain Particulate Matter Sources.	Kansas City	9/15/81	6/18/82, 47 FR 26387	[EPA Action KS 276; FRL 2137–6]. Correction notice published 1/12/84.
(15) Letter Agreeing to Follow EPA Interim Stack Height Policy for Each PSD Permit Issued Until EPA Revises the Stack Height Regulations.	Statewide	6/20/84	12/11/84, 49 FR 48185 ...	[A–7–FRL–2734–4; EPA No 1163].
(16) Letters Pertaining to Permit Fees.	Statewide	3/27/86, 9/15/87	12/21/87, 52 FR 48265 ...	[FRL 3299–4].

EPA-APPROVED KANSAS NONREGULATORY PROVISIONS—Continued

Name of nonregulatory SIP provision	Applicable geographic or non-attainment area	State submittal date	EPA approval date	Explanation
(17) Revisions to the Ozone Attainment Plan.	Kansas City	7/2/86, 4/16/87, 8/18/87, 8/19/87, 1/6/88	5/18/88, 53 FR 17700	[3375–5].
(18) Revised CO Plan	Wichita	3/1/85, 9/3/87	10/28/88, 53 FR 43691 ...	[FRL–3449–1].
(19) Letter Pertaining to the Effective Date of Continuous Emission Monitoring Regulations.	Statewide	1/6/88	11/25/88, 53 FR 47690 ...	[FRL–3473–9].
(20) Letters Pertaining to New Source Permit Regulations, Stack Height Regulations, and Stack Height Analysis and Negative Declarations.	Statewide	3/27/86, 12/7/87 1/6/88	4/20/89, 54 FR 15934	[FRL–3558–5].
(21) PM ₁₀ Plan	Statewide	10/5/89, 10/16/89	1/16/90, 55 FR 1420	[FRL–3704–3].
(22) Ozone Maintenance Plan	Kansas City	10/23/91	6/23/92, 57 FR 27936	[KS1–1–5439; FRL 4126–6].
(23) Letter Pertaining to PSD NO _x Requirements.	Statewide	9/15/92	1/12/93, 58 FR 3847	[KS–2–1–5640; FRL–4552–3].
(24) Small Business Assistance Plan.	Statewide	1/25/94	5/12/94, 59 FR 24644	[KS–3–1–8332; FRL–4882–4].
(25) Letter Regarding Compliance Verification Methods and Schedules Pertaining to the Board of Public Utilities Power Plants.	Kansas City	12/11/92	10/18/94, 59 FR 52425 ...	[KS–4–1–6508a; FRL–5079–2].
(26) Emissions Inventory Update Including a Motor Vehicle Emissions Budget.	Kansas City	5/11/95	4/25/96, 61 FR 18251	[KS–6–1–6985, MO–31–1–7153; FRL 5448–9].
(27) Air monitoring plan	Statewide	1/6/02	8/30/02, 67 FR 55726	[KS 162–1162a; FRL–7270–4].
(28) Maintenance Plan for the 1-hour ozone standard in the Kansas portion of the Kansas City maintenance area for the second ten-year period.	Kansas City	1/9/03	1/13/04, 69 FR 1919	[KS 202–1202; FRL–7608–9].
(29) Revision to Maintenance Plan for the 1-hour ozone standard in the Kansas portion of the Kansas City maintenance area for the second ten-year period.	Kansas City	2/10/06	6/26/06, 71 FR 36213	[EPA–R07–OAR–2006–0365; FRL–8188–4].
(30) CAA 110(a)(2)(D)(i) SIP—Interstate Transport.	Statewide	1/7/07	3/9/07, 72 FR 10608	[EPA–R07–OAR–2007–0141; FRL–8286–3].
(31) Maintenance Plan for the 8-hour ozone standard in the Kansas portion of the Kansas City area.	Kansas City	5/23/07	8/9/07, 72 FR 44781	[EPA–R07–OAR–2007–0620; FRL–8450–5] This plan replaces numbers (28) and (29).
(32) Section 110(a)(2) Infrastructure Requirements for the 1997 8-Hour Ozone NAAQS.	Statewide	1/8/08 7/20/09	7/11/11, 76 FR 40624	[EPA–R07–OAR–2011–0304; FRL–9434–3]. This action addresses the following CAA elements as applicable: 111(a)(2)(A), (B), (C), (D)(ii), (E), (F), (G), (H), (J), (K), (L) and (M).
(33) Regional Haze Plan for the first implementation period.	Statewide	11/9/09	12/27/11, 76 FR 80754 ...	[EPA–R07–OAR–2011–0675; FRL–9611–3]. Certain provisions withdrawn from plan as identified in letter dated 12/1/11 from Kansas.

Environmental Protection Agency

§ 52.870

EPA-APPROVED KANSAS NONREGULATORY PROVISIONS—Continued

Name of nonregulatory SIP provision	Applicable geographic or non-attainment area	State submittal date	EPA approval date	Explanation
(34) Section 110(a)(2) Infrastructure Requirements for the 1997 PM _{2.5} NAAQS.	Statewide	1/08/08	6/20/13, 78 FR 37126	[EPA-R07-OAR-2013-0233; FRL-9825-6]. This action addresses the following CAA elements: 110(a)(2)(A), (B), (C), (D)(i)(II) (prongs 3 and 4), D(ii), (E), (F), (G), (H), (J), (K), (L), and (M), except as noted.
(35) Section 110(a)(2) Infrastructure Requirements for the 2006 PM _{2.5} NAAQS.	Statewide	4/12/10	6/20/13, 78 FR 37126	[EPA-R07-OAR-2013-0233; FRL-9825-6]. This action addresses the following CAA elements: 110(a)(2)(A), (B), (C), (D)(i)(II) (prongs 3 and 4), D(ii), (E), (F), (G), (H), (J), (K), (L) and (M), except as noted.
(36) Section 128 Declaration: Kansas Department of Health and Environment Representation and Conflicts of Interest Provisions, Kansas Revised Statutes (KSA). KSA 46-221, KSA 46-229, KSA 46-247(c).	Statewide	3/19/13	6/20/13, 78 FR 37126	[EPA-R07-OAR-2013-0233; FRL-9825-6].
(37) Section 110(a)(2) infrastructure Requirements for the 2008 Pb NAAQS.	Statewide	1/13/12	9/15/14, 79 FR 54908	[EPA-R07-OAR-2014-0271; FRL-9916-50-Region 7]. This action addresses the following CAA elements: 110(a)(2)(A), (B), (C), (D), (E), (F), (G), (H), (J), (K), (L) and (M).
(38) Section 110(a)(2) Infrastructure Requirements for the 2008 O ₃ NAAQS.	Statewide	3/19/13	10/21/14, 79 FR 62861 ...	[EPA-R07-OAR-2014-0401; FRL-9918-19-Region 7]. This action addresses the following CAA elements: 110(a)(2)(A), (B), (C), (D)(i)(II) (prongs 3 and 4), (D)(ii), (E), (F), (G), (H), (J), (K), (L) and (M) except as noted.
(39) Section 110(a)(2) Infrastructure Requirements for the 2010 NO ₂ NAAQS.	Statewide	3/19/13	10/22/14, 79 FR 63044 ...	[EPA-R07-OAR-2014-0500; FRL-9918-11-Region 7]. This action addresses the following CAA elements: 110 (a)(2)(A), (B), (C), (D), (E), (F), (G), (H), (J), (K), (L) and (M).
(40) Cross State Air Pollution Rule—State-Determined Allowance Allocations for the 2016 control periods.	Statewide	3/30/2015	8/21/2015, 80 FR 50789.	
(41) Section 110(a)(2) Infrastructure Requirements for the 2008 O ₃ NAAQS.	Statewide	3/19/2013	8/27/2015, 80 FR 51955	This action addresses the visibility protection portion of section 110(a)(2)(J) of the CAA.

EPA-APPROVED KANSAS NONREGULATORY PROVISIONS—Continued

Name of nonregulatory SIP provision	Applicable geographic or non-attainment area	State submittal date	EPA approval date	Explanation
(42) State Implementation Plan (SIP) Revision for the Attainment and Maintenance of National Ambient Air Quality Standards for Regional Haze (2014 Five-Year Progress Report).	Statewide	3/10/2015	9/14/2015, 80 FR 55030.	
(43) Attainment plan for 2008 lead NAAQS.	Salina	2/3/2015	7/20/2016, 81 FR 47034	[EPA–R07–OAR–2015–0708; 9949–13–Region 7].
(44) Section 110(a)(2) Infrastructure Requirements for the 2012 PM _{2.5} NAAQS.	Statewide	11/16/2015	9/9/2016, 81 FR 62373 ...	This action addresses the following CAA elements: 110(a)(2)(A), (B), (C), (D), (E), (F), (G), (H), (J), (K), (L), and (M). 110(a)(2)(I) is not applicable. [EPA–R07–OAR–2016–0313; FRL–]
(45) Section 110(a)(2) Infrastructure Requirements for the 2015 O ₃ NAAQS.	Statewide	9/27/2018	1/15/2021, 86 FR 3818 ...	[EPA–R07–OAR–2020–0422; FRL–10013–71–Region 7]. This action addresses the following CAA elements: 110(a)(2)(A), (B), (C), (D)(i)(II)—prongs 3 and 4, (D)(ii), (E), (F), (G), (H), (J), (K), (L), and (M). EPA intends to act on 110(a)(2)(D)(i)(I)—prongs 1 and 2, in a separate action. 110(a)(2)(I) is not applicable.
(46) Section 110(a)(2)(D)(i)(I)—significant contribution to nonattainment (prong 1), and interfering with maintenance of the NAAQS (prong 2) (Interstate Transport) Infrastructure Requirements for the 2010 SO ₂ NAAQS.	Statewide	4/7/2020	8/11/2021, 86 FR 43960	[EPA–R07–OAR–2021–0365; FRL–8705–02–Region 7]. This action addresses the following CAA elements: 110(a)(2)(D)(i)(I)—prongs 1 and 2.
(47) Transport SIP for the 2015 Ozone Standard.	Statewide	9/27/2018	4/4/2022, 87 FR 19390 ...	[EPA–R07–OAR–2022–0075; FRL–9428–02–R7]. This transport SIP shows that Kansas does not significantly contribute to ozone nonattainment or maintenance in any other state. This submittal is approved as meeting the requirements of Clean Air Act section 110(a)(2)(D)(i)(I).

[64 FR 7098, Feb. 12, 1999]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.870, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

§ 52.871 Classification of regions.

The Kansas plan was evaluated on the basis of the following classifications:

Environmental Protection Agency

§ 52.874

Air quality control region	Pollutant				
	Particulate matter	Sulfur oxides	Nitrogen dioxide	Carbon monoxide	Photochemical oxidants (hydrocarbons)
Metropolitan Kansas City Interstate	I	III	III	I	I
South Central Kansas Intrastate	I	III	III	III	I
Northeast Kansas Intrastate	I	III	III	III	III
Southeast Kansas Intrastate	III	III	III	III	III
North Central Kansas Intrastate	I	III	III	III	III
Northwest Kansas Intrastate	I	III	III	III	III
Southwest Kansas Intrastate	I	III	III	III	III

[37 FR 10867, May 31, 1972]

§ 52.872 Operating permits.

Emission limitations and related provisions which are established in Kansas operating permits as Federally enforceable conditions shall be enforceable by EPA. EPA reserves the right to deem permit conditions not Federally enforceable. Such a determination will be made according to appropriate procedures and be based upon the permit, permit approval procedures, or permit requirements which do not conform with the operating permit program requirements or the requirements of EPA underlying regulations.

[60 FR 36364, July 17, 1995]

§ 52.873 Approval status.

(a) Kansas rule K.A.R. 28-19-719 was rescinded on April 12, 2021.

(b) [Reserved]

(c) The Administrator approves Rule K.A.R. 28-19-31 as identified at § 52.870(c)(29), with the understanding that any alternative compliance plans issued under this rule must be approved by EPA as individual SIP revisions.

[37 FR 10867, May 31, 1972, as amended at 46 FR 20170, Apr. 3, 1981; 46 FR 61118, Dec. 15, 1981; 57 FR 27939, June 23, 1992; 59 FR 52427, Oct. 18, 1994; 61 FR 16061, Apr. 11, 1996; 86 FR 14002, Mar. 12, 2021]

§ 52.874 Legal authority.

(a) The requirements of § 51.230(f) of this chapter are not met since authority to make emission data available to the public is inadequate. Kansas Statutes Annotated 65-3015 would require confidential treatment if the data related to processes or production unique to the owner or would tend to affect

adversely the competitive position of the owner.

(b) The requirements of § 51.232(b) of this chapter are not met since the following deficiencies exist in the local agency legal authority:

(1) *Kansas City, Kans.-Wyandotte County Health Department.* (i) Authority to make emission data available to the public is inadequate because the Kansas Statutes Annotated 65-3016 provides a designated local air quality conservation authority with the same authority as the State (§ 51.230(f) of this chapter).

(2) *Topeka-Shawnee County Health Department.* (i) Authority to make emission data available to the public is inadequate because the Kansas Statutes Annotated 65-3016 provides a designated air quality conservation authority with the same authority as the State (§ 51.230(f) of this chapter).

(3) *Wichita-Sedgwick County Health Department.* (i) Authority to make emission data available to the public is inadequate because the Kansas Statutes Annotated 65-3016 provides a designated local air quality conservation authority with the same authority as the State (§ 51.230(f) of this chapter).

(c) The requirements of § 51.230(d) of this chapter are not met since statutory authority to prevent construction, modification, or operation of a facility, building, structure, or installation, or combination thereof, which indirectly results or may result in emissions of any air pollutant at any location which

§ 52.875

40 CFR Ch. I (7-1-25 Edition)

will prevent the maintenance of a national air quality standard is not adequate.

[37 FR 10867, May 31, 1972, as amended at 39 FR 7281, Feb. 25, 1974; 51 FR 40676, Nov. 7, 1986]

§ 52.875 Original identification of plan section.

(a) This section identifies the original “Air Quality Implementation Plan for the State of Kansas” and all revisions submitted by Kansas that were Federally approved prior to July 1, 1998.

(b) The plan was officially submitted on January 31, 1972.

(c) The plan revisions listed below were submitted on the dates specified.

(1) Various comments on the plan in response to the Regions review were submitted on March 24, 1972, by the State Department of Health. (Non-regulatory)

(2) The Emergency Episode Operations/Communications Manual for the Kansas City Interstate AQCR was submitted on April 6, 1972, by the State Department of Health. (Non-regulatory)

(3) Emergency Episode Operations/Communications Manual for all Kansas Intrastate AQCR’s was submitted on February 15, 1973, by the State Department of Health. (Non-regulatory)

(4) Revisions of sections 28-19-6 through 15, 20-24, 30-32, 40-47, 50-52 and 55-58 of the State air pollution control regulations were submitted by the State Department of Health on April 17, 1973.

(5) Letter from the Governor, dated May 29, 1973, concerning the attainment of CO emission standards. (Non-regulatory)

(6) An amendment to the State air quality control law, Senate Bill No. 30, dealing with public access to emission data was submitted on July 27, 1973, by the Governor.

(7) Revisions of sections 28-19-8, 9, 14, 22, 25 and 47 of the State air pollution control regulations were submitted on February 6, 1974, by the Governor.

(8) Copy of the State’s analysis and recommendations concerning the designation of Air Quality Maintenance Areas was submitted by letter from the

State Department of Health on February 28, 1974. (Non-regulatory)

(9) Kansas submitted State Implementation Plan (SIP) revisions to attain the National Ambient Air Quality Standards on September 17, 1979 for Wyandotte and Johnson Counties, on October 22, 1979 for Douglas County, and on March 10, 1980 for Kansas City of the state designated nonattainment areas under section 107 of the Clean Air Act as amended in 1977. On September 22 and 25, 1980, the state submitted revised regulations on the control of volatile organic compounds and a regulation on the new source permit review program. Included in the plan are the following approved state air pollution control regulations:

(i) The VOC regulations which EPA approved as RACT: 28-19-61 Definitions, 28-19-62 Testing Procedures, 28-19-63 Automobile and Light Duty Trunk Surface Coating, 28-19-65 Petroleum Liquid Storage Tanks, 28-19-66 Petroleum Liquid Storage in External Floating Roof Tanks, 28-19-67 Petroleum Refineries, 28-19-68 Leaks from Petroleum Refinery Equipment, 28-19-69 Cutback Asphalt.

(ii) The New Source Permit Review regulation 28-19-16 through 16m which EPA conditionally approved as meeting the requirements of sections 172(b)(6); 172(b)(11)(A), and 173.

(iii) The Kansas City-Wyandotte County air pollution control regulations which have been adopted by both the Kansas City, Kansas Board of City Commissioners and the Wyandotte County Board of County Commissioners:

2A-1 Jurisdiction, 2A-2 Purpose, 2A-3 Definitions, 2A-4 Powers of the Board, 2A-5 Facts and Circumstances Pertinent to Orders of Joint Board, 2A-6 Right of Entry for Inspection, 2A-7 Time for Compliance Schedule, 2A-8 Variance, 2A-9 Circumvention of Chapter or Regulations, 2A-10 Air Pollution Nuisances Prohibited; Additional Emission Restrictions; Interference with the Enjoyment of Life and Property, 2A-11 Reserved, 2A-12 Confidential Information, 2A-13 Registration and Permit System; Exemptions, 2A-14 Review of New or Altered Sources, 2A-15 Public Hearings, 2A-16 Installations in which Fuel is Burned, 2A-17 Restriction of Emission of Particulate Matter from Industrial Processes, 2A-18 Open Burning Prohibition, 2A-19 Opacity Requirements, 2A-20 Exceptions Due to Breakdowns or Scheduled

Environmental Protection Agency

§ 52.875

Maintenance, 2A-21 Preventing Particulate Matter from Becoming Air-Borne, 2A-22 Measurement of Emissions, 2A-23 Restriction of Emission of Odors, 2A-24 Sulfur Compound Emissions, 2A-24.1 Hydrocarbon Emissions; Stationary Sources, 2A-25 Control of Carbon Monoxide Emissions, 2A-26 Control of Nitrogen Oxide Emissions, 2A-26.1 Incinerators, 2A-27 Air Pollution Emergencies—General Provisions, 2A-28 Air Pollution Emergencies—Episode Criteria, 2A-29 Emission Reduction Requirements, 2A-30 Emergency Episode Plans, 2A-31 Penalties for Violation of Chapter or Air Pollution Control Regulations, and 2A-32 Conflict of Ordinances, Effect Partial Invalidity.

(10) The Kansas State Implementation Plan for lead was submitted on February 17, 1981, by the Governor of Kansas, along with a submittal letter which provided additional information concerning the Kansas State Implementation Plan for lead.

(11) Kansas submitted SIP revisions to attain and maintain the National Ambient Air Quality Standards for carbon monoxide on April 16, 1981, for the South Central Kansas Interstate Air Quality Control Region, Wichita non-attainment area. The plan included commitments to complete transportation control measures for the reduction of carbon monoxide from transportation related sources for the attainment of the national standards by December 31, 1982.

(12) A plan revision which makes modifications to the existing Kansas air quality surveillance network was submitted by the Kansas Department of Health and Environment on October 16, 1981.

(13) Additional information to correct two plan deficiencies was submitted by the Kansas Department of Health and Environment on May 12, 1981.

(14) Letter and supporting documents submitted on September 15, 1981, from the Director of Air Quality and Occupational Health relating to reasonably available control technology for certain particulate matter sources in the Kansas City, Kansas area.

(15) New regulations 28-19-70 and 28-19-62 applicable to tank trucks operating at bulk gasoline terminals were submitted by the Kansas Department of Health and Environment on June 15, 1982. State regulation 28-19-51 is revoked. Revised regulations 28-19-16, 28-

19-16a, 28-19-16b, 28-19-16c, 28-19-16f, 28-19-16g, 28-19-16h, and 28-19-16i, applicable to new sources in nonattainment areas were included with the June 15, 1982 submittal. Action is deferred on the following regulations: 28-19-16a(d), 28-19-16a(v), 28-19-16, 28-19-16b, 28-19-16c, 28-19-16f, 28-19-16h, 28-19-16i, and 28-19-16a(o). The remainder of the provisions are approved.

(16) New regulations K.A.R. 28-19-17 through K.A.R. 28-19-171 applicable to stationary sources subject to prevention of significant deterioration (PSD) permit requirements were submitted on May 5, 1983. Regulation K.A.R. 28-19-171 pertaining to the use of innovative control technology is not approved. By letter dated June 20, 1984, the State of Kansas agrees to follow the EPA interim stack height policy for each PSD permit issued until such time as EPA revises its general stack height regulations.

(17) Revised regulation K.A.R. 28-19-69, applicable to the use of cutback asphalt, was submitted by the Secretary of the Kansas Department of Health and Environment on February 21, 1986.

(i) *Incorporation by reference.* (A) Revised regulation K.A.R. 28-19-69 as approved by the Kansas Attorney General on December 5, 1985.

(18) Revised regulations K.A.R. 28-19-63 applicable to automobile and light-duty truck surface coating; K.A.R. 28-19-64 applicable to bulk gasoline terminals; K.A.R. 28-19-67 applicable to petroleum refineries; and K.A.R. 28-19-68 applicable to leaks at petroleum refineries, were submitted by the Secretary of the Kansas Department of Health and Environment on February 21, 1986.

(i) *Incorporation by reference.* (A) Revised regulations K.A.R. 28-19-63, K.A.R. 28-19-64, K.A.R. 28-19-67, and K.A.R. 28-19-68 as approved by the Kansas Attorney General on October 30, 1985.

(19) Revised Kansas regulations pertaining to fees for permits to construct and operate were submitted by the Kansas Department of Health and Environment on March 27, 1986.

(i) *Incorporation by reference.* (A) Kansas Administrative Regulations (KAR) 28-19-7, 28-19-8, 28-19-9, 28-19-14, 14(a) and 14(b), 28-19-31, 28-19-45, which became effective on May 1, 1986.

(B) Letter of March 27, 1986 to EPA from the State of Kansas Department of Health and Environment.

(C) Letter of September 15, 1987 to EPA from the State of Kansas Department of Health and Environment.

(20) Revisions to the ozone attainment plan for the Kansas City metropolitan area were submitted by the Governor on July 2, 1986. Pursuant to this plan, revised regulations for the control of volatile organic compound emissions were submitted by the Secretary of the Kansas Department of Health and Environment on January 6, 1988. In numerous instances, the revised Kansas regulations provide for departmental discretion to approve compliance plans and test methods which are alternatives to the EPA reference methods. EPA approves these regulations with the understanding that all such alternative compliance plans and test methods must be submitted to EPA, and approved, as individual SIP revisions. In the absence of such approval, the enforceable requirements of the SIP shall be the emission limits or reduction requirements stated in the regulations. Also, the Kansas regulations contain provisions whereby testing is required when the facility intends to demonstrate compliance by improved operations or new emission controls, yet no test procedures are specified. Examples of such provisions are transfer efficiency (TE) and vapor processing systems. Test methods which are developed by the state must be approved by EPA before facilities may demonstrate compliance through alternative controls and/or TE.

(i) *Incorporation by reference.* (A) Revised regulations K.A.R. 28-19-8, Reporting required; K.A.R. 28-19-61, Definitions; K.A.R. 28-19-62, Testing procedures; K.A.R. 28-19-63, Automobile and light-duty truck surface coating; K.A.R. 28-19-64, Bulk gasoline terminals; K.A.R. 28-19-65, VOC liquid storage in permanent fixed roof type tanks; K.A.R. 28-19-66, VOC liquid storage in external floating roof tanks; K.A.R. 28-19-69, Cutback asphalt; K.A.R. 28-19-70, Leaks from gasoline delivery vessels and vapor collection systems; K.A.R. 28-19-71, Printing operations; K.A.R. 28-19-72, Gasoline dispensing facilities; K.A.R. 28-19-73, Surface coating of mis-

cellaneous metal parts and products and metal furniture; K.A.R. 28-19-74, Wool fiberglass manufacturing; and K.A.R. 28-19-75, Solvent metal cleaning. Temporary versions of these regulations are effective December 16, 1987, through April 30, 1988. The permanent regulations are effective May 1, 1988.

(B) Letter of January 6, 1988, from the Secretary of the Kansas Department of Health and Environment. This letter establishes the effective dates for the revised regulations referenced in subparagraph (20)(i)(A) above.

(ii) *Additional material.* (A) State of Kansas Implementation Plan, Part A—Kansas City Metropolitan Area, Ozone, dated June 1986, submitted by the Governor on July 2, 1986. The plan contains an attainment demonstration, emissions inventories, and a control strategy.

(B) Supplemental information, pursuant to the above referenced plan, was submitted on August 19, 1987.

(C) Negative declarations for certain VOC source categories were submitted on April 16 and August 18, 1987.

(21) Revised Kansas regulations applicable to air quality models and definitions were submitted by the Kansas Department of Health and Environment on January 6, 1988.

(i) *Incorporation by reference.* (A) Kansas Administrative Regulations (K.A.R.) 28-19-17(f) and 28-19-7 (a) through (f) and (h) through (w) which became effective December 16, 1987. EPA is deferring action on 28-19-7(g), *Emission Limitation and Standard*.

(22) On March 1, 1985, the Governor of Kansas submitted a revised carbon monoxide state implementation plan for Wichita, Kansas. On September 3, 1987, the Kansas Department of Health and Environment submitted two new transportation control measures as part of the revised Wichita carbon monoxide control plan.

(i) *Incorporation by reference.* (A) Letter of September 3, 1987, from the Kansas Department of Health and Environment and attached transportation control measures adopted August 18, 1987.

(B) Revision of the Wichita-Sedgwick County Portion of the Kansas State Implementation Plan for Carbon Monoxide submitted by the Governor on

March 1, 1985. The plan contains an attainment demonstration, emissions inventory, and a control strategy.

(23) Kansas Administrative Regulations (K.A.R.) 28-19-19(a) through 28-19-19(o) pertaining to continuous emission monitoring at certain stationary sources were submitted on January 6, 1988, by the Kansas Department of Health and Environment. K.A.R. 28-19-19(o) allows for departmental discretion on use of different but equivalent procedures than those specified in 28-19-19(a) through 28-19-19(n). EPA approves this rule with the understanding that all such equivalent procedures and requirements must be submitted to EPA as individual SIP revisions. In the absence of such approval, the enforceable provisions of K.A.R. 28-19-19(a) through 28-19-19(n) shall be applicable.

(i) *Incorporation by reference.* (A) K.A.R. 28-19-19(a) through 28-19-19(o), continuous emission monitoring, as submitted by the Secretary of the Kansas Department of Health and Environment. These regulations became effective on May 1, 1988.

(B) Letter of January 6, 1988, from the Secretary of the Kansas Department of Health and Environment. This letter establishes the effective date for the revised regulations referenced in paragraph (23)(i)(A) of this section.

(24) Revised regulations K.A.R. 28-19-7(g), K.A.R. 28-19-16, and K.A.R. 28-19-17 pertaining to new source permit requirements, were submitted by the Secretary of the Kansas Department of Health and Environment on March 27, 1986. Revised regulation K.A.R. 28-19-18 pertaining to stack heights was submitted by the Secretary of the Kansas Department of Health and Environment on January 6, 1988.

(i) *Incorporation by reference.* (A) Revised regulations, K.A.R. 28-19-16, 28-19-16b, 28-19-16d, 28-19-16g, 28-19-16i, 28-19-16l, 28-19-17, 28-19-17a, and 28-19-17b, which became effective on May 1, 1986.

(B) Revised regulations K.A.R. 28-19-7(g), and K.A.R. 28-19-18 through 28-19-18f. The temporary regulations became effective December 16, 1987, and became permanently effective on May 1, 1988.

(ii) *Additional material.* (A) KDHE letter of March 27, 1986, to EPA pertaining to new source permit regulations.

(B) KDHE letter of January 6, 1988, and June 9, 1988, to EPA pertaining to stack height regulations.

(C) KDHE letters of December 7, 1987, and December 23, 1987, pertaining to the state's stack heights analysis and negative declarations.

(25) Revised Kansas Administrative Regulations (K.A.R.) pertaining to PM₁₀ regulations and the PM₁₀ commitment SIP were submitted by Kansas on October 5, 1989.

(i) *Incorporation by reference.* (A) Revised regulations Article 19—Ambient Air Quality Standards and Air Pollution Control, K.A.R. 28-19-7, 28-19-8, 28-19-14, 28-19-16a, 28-19-17a, 28-19-17b, 28-19-17c, 28-19-17g, 28-19-17i, 28-19-20, 28-19-21, and 28-19-56, published August 31, 1989, effective October 16, 1989.

(ii) *Additional material.* (A) Letter of October 5, 1989, from the Secretary of the Kansas Department of Health and Environment (KDHE).

(B) Memorandum of October 16, 1989, from the Secretary of State (Kansas) to Stanley Grant (KDHE).

(C) Revised Air Quality Surveillance Monitoring Plan—Section E.

(26) Revisions to the state implementation plan for the Kansas City metropolitan area were submitted by the Governor on October 23, 1991. Revisions include a maintenance plan which demonstrates continued attainment of the NAAQS for ozone through the year 2002. Rule revisions were also submitted on October 23, 1991.

(i) *Incorporation by reference.* (A) Article 19—Ambient Air Quality Standards and Air Pollution Control, revised Kansas Administrative Regulations (K.A.R.) 28-19-61, Definitions, and K.A.R. 28-19-62, Testing procedures; and new rules K.A.R. 28-19-76, Lithography printing facilities, and K.A.R. 28-19-77, Chemical processing facilities that operate alcohol plants or liquid detergent plants. These rules were published August 22, 1991, and became effective October 7, 1991.

(ii) *Additional material.* (A) State of Kansas Implementation Plan, Kansas City Metropolitan Area Maintenance Provisions, October 1991.

(27) On September 15, 1992, the Secretary of KDHE submitted rule revisions to K.A.R. 28-19-17, the PSD rule; to K.A.R. 28-19-19, the CEM rule; and to

K.A.R. 28-19-73, a surface coating rule. These rule revisions were adopted by KDHE on April 3, 1992.

(i) *Incorporation by reference.* (A) Revised regulations K.A.R. 28-19-17 through 28-19-171, K.A.R. 28-19-19 and K.A.R. 28-19-73, and new regulations K.A.R. 28-19-17m through 28-19-17q, effective June 8, 1992.

(ii) *Additional material.* (A) Letter and attachment from KDHE dated September 15, 1992 pertaining to PSD NO_x requirements.

(28) A plan for implementation of the Small Business Stationary Source Technical and Environmental Compliance Assistance Program was submitted by the Kansas Department of Health and Environment as a revision to the Kansas State Implementation Plan (SIP) on January 25, 1994.

(i) *Incorporation by reference.* (A) Kansas SIP, Small Business Stationary Source Technical and Environmental Compliance Assistance Program, dated November 15, 1993.

(29) On May 16, 1994 the Secretary of KDHE submitted revisions to rules K.A.R. 28-19-31, 28-19-32, 28-19-63, and operating permits #20090048 (BPU Quindaro station) and #20090049 (BPU Kaw station).

(i) *Incorporation by reference.* (A) Revised regulations K.A.R. 28-19-31, K.A.R. 28-19-32, K.A.R. 28-19-63, effective November 8, 1993.

(B) Operating permits; Kansas City, Kansas, Board of Public Utilities Quindaro permit #20090048, and Kaw permit #20090049, effective October 20, 1993.

(ii) *Additional material.* (A) Letter from BPU to KDHE dated December 11, 1992, regarding compliance verification methods and schedules.

(30) On February 17, 1995, the Secretary of the Kansas Department of Health and Environment (KDHE) submitted for approval numerous rule revisions which add and revise definitions, revise the Kansas construction permit program, and create a class II operating permit program.

(i) *Incorporation by reference.* (A) Revised rules K.A.R. 28-19-7 effective November 22, 1993; K.A.R. 28-19-8 effective January 23, 1995; K.A.R. 28-19-14 effective January 24, 1994; and the revocation of K.A.R. 28-19-14a effective Janu-

ary 23, 1995; and the revocation of K.A.R. 28-19-14b effective January 24, 1994.

(B) New rules K.A.R. 28-19-204, 212, 300, 301, 302, 303, 304, 400, 401, 402, 403, 404, 500, 501, 502, 540, 541, 542, 543, 544, 545, 546, 561, 562, and 563 effective January 23, 1995.

(31) On May 11, 1995, the Kansas Department of Health and Environment submitted an emissions inventory update to the Kansas City maintenance plan approved by EPA on June 23, 1992. The submittal also establishes a motor vehicle emissions budget for the purpose of fulfilling the requirements of the Federal Transportation Conformity rule.

(i) *Incorporation by reference.* (A) Kansas City Ozone Maintenance State Implementation Plan Revision: Emissions Inventories and Motor Vehicle Emissions Budgets for the Kansas City Metropolitan Area, adopted on May 11, 1995.

(32) A Plan revision was submitted by the Kansas Department of Health and Environment (KDHE) on June 6, 1996, which incorporates by reference the EPA's regulations relating to determining conformity of general Federal actions to State or Federal Implementation Plans, and which revokes old and adopts new open burning regulations.

(i) *Incorporation by reference.* (A) Regulation K.A.R. 28-19-800, adopted by the Secretary of the KDHE on February 21, 1996, effective March 15, 1996.

(B) Regulations K.A.R. 28-19-645 to K.A.R. 28-19-648, adopted by the Secretary of KDHE on February 6, 1996, effective March 1, 1996.

(C) Regulations K.A.R. 28-19-45 to K.A.R. 28-19-47, revoked by the Secretary of KDHE on February 6, 1996, effective March 1, 1996.

(33) A revision to the Kansas SIP was submitted by the Kansas Department of Health and Environment on May 23, 1997, pertaining to fuel volatility.

(i) *Incorporation by reference.* (A) K.A.R. 28-19-79, Fuel Volatility, effective May 2, 1997.

(d) Plan revisions were submitted on April 17, 1974, and February 17, 1974.

[37 FR 10867, May 31, 1972]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.875, see the List of CFR

Environmental Protection Agency

§ 52.876

Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

§ 52.876 Compliance schedules.

(a) The requirements of § 51.260 and of § 51.15(a)(2) of this chapter as of September 19, 1976 (40 FR 43216), are not met since the plan does not contain legally enforceable compliance schedules setting forth the dates by which all stationary sources or categories of such sources must be in compliance with applicable portions of the control strategy. Paragraphs C and D of Kansas Regulation 28-19-9 specify that all sources not in compliance must submit an acceptable compliance schedule within 120 days after receiving notification from the State. There are no assurances that all sources will be notified by the State in a timely manner, therefore, paragraphs C and D of Regulation 28-19-9 are disapproved.

(b) *Federal compliance schedule.* (1) Except as provided in paragraph (2) of this paragraph (b), the owner or operator of any stationary source subject to any emission regulation which is part of the approved plan shall be in compliance on or before January 31, 1974.

(i) Any owner or operator in compliance with any such applicable regulation on the effective date of this paragraph shall certify such compliance to the Administrator no later than December 31, 1972.

(ii) Any owner or operator who achieves compliance with any such applicable regulation after the effective date of this paragraph shall certify such compliance to the Administrator within 5 days of the date compliance is achieved.

(2) An owner or operator of a stationary source subject to any emission regulation approved by the Administrator may no later than December 31, 1972, submit to the Administrator for approval a proposed compliance schedule that demonstrates compliance with such regulation as expeditiously as practicable, but no later than July 31, 1975. The compliance schedule shall provide for periodic increments of progress toward compliance. The dates for achievement of such increments shall be specified. Increments of progress shall include, but not be limited to: Letting of necessary contracts for construction or process changes, if applicable; initiation of construction; completion and startup of control systems; performance tests; and submittal of performance test analysis and results.

(3) Any owner or operator who submits a compliance schedule pursuant to this paragraph shall, within 5 days after the deadline for each increment of progress, certify to the Administrator whether or not the required increment of the approved compliance schedule has been met.

(4) Any compliance schedule adopted by the State and approved by the Administrator shall satisfy the requirements of this paragraph for the affected source.

(c) *State compliance schedules.* (1) [Reserved]

(2) The compliance schedules identified below are disapproved as not meeting the requirements of § 51.102 or subpart N of this chapter. All regulations cited are air pollution control regulations of the state, unless otherwise noted.

§§ 52.877–52.880 [Reserved]

§ 52.881 PM₁₀ State implementation plan development in group II areas.

The state has submitted a committal SIP for Kansas City, Kansas. The committal SIP contains all the requirements identified in the July 1, 1987, promulgation of the SIP requirements for PM₁₀ at 52 FR 24681, except the state will report the PM₁₀ data which exceed the standard within 60 days of the exceedance, rather than 45 days.

[55 FR 1423, Jan. 16, 1990]

§ 52.882 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of nitrogen oxides?

(a)(1) The owner and operator of each source and each unit located in the State of Kansas and Indian country within the borders of the State and for which requirements are set forth under the CSAPR NO_x Annual Trading Program in subpart AAAAA of part 97 of this chapter must comply with such requirements. The obligation to comply with such requirements with regard to sources and units in the State will be eliminated by the promulgation of an approval by the Administrator of a revision to Kansas' State Implementa-

tion Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan under § 52.38(a) for those sources and units, except to the extent the Administrator's approval is partial or conditional. The obligation to comply with such requirements with regard to sources and units located in Indian country within the borders of the State will not be eliminated by the promulgation of an approval by the Administrator of a revision to Kansas' SIP.

(2) Notwithstanding the provisions of paragraph (a)(1) of this section, if, at the time of the approval of Kansas' SIP revision described in paragraph (a)(1) of this section, the Administrator has already started recording any allocations of CSAPR NO_x Annual allowances under subpart AAAAA of part 97 of this chapter to units in the State for a control period in any year, the provisions of subpart AAAAA of part 97 of this chapter authorizing the Administrator to complete the allocation and recordation of CSAPR NO_x Annual allowances to units in the State for each such control period shall continue to apply, unless provided otherwise by such approval of the State's SIP revision.

(b)(1) The owner and operator of each source and each unit located in the State of Kansas and Indian country

within the borders of the State and for which requirements are set forth under the CSAPR NO_x Ozone Season Group 2 Trading Program in subpart EEEEE of part 97 of this chapter must comply with such requirements with regard to emissions occurring in 2017 and each subsequent year. The obligation to comply with such requirements with regard to sources and units in the State will be eliminated by the promulgation of an approval by the Administrator of a revision to Kansas' State Implementation Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan (FIP) under § 52.38(b) for those sources and units, except to the extent the Administrator's approval is partial or conditional. The obligation to comply with such requirements with regard to sources and units located in Indian country within the borders of the State will not be eliminated by the promulgation of an approval by the Administrator of a revision to Kansas' SIP.

(2) Notwithstanding the provisions of paragraph (b)(1) of this section, if, at the time of the approval of Kansas' SIP revision described in paragraph (b)(1) of this section, the Administrator has already started recording any allocations of CSAPR NO_x Ozone Season Group 2 allowances under subpart EEEEE of part 97 of this chapter to units in the State for a control period in any year, the provisions of subpart EEEEE of part 97 of this chapter authorizing the Administrator to complete the allocation and recordation of CSAPR NO_x Ozone Season Group 2 allowances to units in the State for each such control period shall continue to apply, unless provided otherwise by such approval of the State's SIP revision.

[76 FR 48365, Aug. 8, 2011, as amended at 80 FR 50793, Aug. 21, 2015; 81 FR 74586 and 74595, Oct. 26, 2016; 83 FR 65924, Dec. 21, 2018]

§ 52.883 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of sulfur dioxide?

(a) The owner and operator of each source and each unit located in the State of Kansas and Indian country within the borders of the State and for which requirements are set forth under

the CSAPR SO₂ Group 2 Trading Program in subpart DDDDD of part 97 of this chapter must comply with such requirements. The obligation to comply with such requirements will be eliminated with regard to sources and units in the State by the promulgation of an approval by the Administrator of a revision to Kansas' State Implementation Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan under § 52.39 for those sources and units, except to the extent the Administrator's approval is partial or conditional. The obligation to comply with such requirements with regard to sources and units located in Indian country within the borders of the State will not be eliminated by the promulgation of an approval by the Administrator of a revision to Kansas' SIP.

(b) Notwithstanding the provisions of paragraph (a) of this section, if, at the time of the approval of Kansas' SIP revision described in paragraph (a) of this section, the Administrator has already started recording any allocations of CSAPR SO₂ Group 2 allowances under subpart DDDDD of part 97 of this chapter to units in the State for a control period in any year, the provisions of subpart DDDDD of part 97 of this chapter authorizing the Administrator to complete the allocation and recordation of CSAPR SO₂ Group 2 allowances to units in the State for each such control period shall continue to apply, unless provided otherwise by such approval of the State's SIP revision.

[76 FR 48365, Aug. 8, 2011, as amended at 81 FR 74586 and 74596, Oct. 26, 2016]

§ 52.884 Significant deterioration of air quality.

(a) The requirements of section 160 through 165 of the Clean Air Act, as amended are met; except that:

(1) EPA retains PSD permit authority for Indian lands in the State of Kansas.

[49 FR 48186, Dec. 11, 1984, as amended at 54 FR 15935, Apr. 20, 1989; 58 FR 3848, Jan. 12, 1993]

Subpart S—Kentucky**§ 52.919 [Reserved]****§ 52.920 Identification of plan.**

(a) *Purpose and scope.* This section sets forth the applicable State Implementation Plan for Kentucky under section 110 of the Clean Air Act, 42 U.S.C. 7401, and 40 CFR part 51 to meet national ambient air quality standards.

(b) *Incorporation by reference.* (1) Material listed in paragraphs (c) and (d) of this section with an EPA approval date prior to September 30, 2022, for the Commonwealth of Kentucky and September 30, 2022, for Jefferson County, Kentucky, was approved for incorporation by reference by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Material is incorporated as it exists on the date of the approval and notice of any change in the material will be published in the FEDERAL REGISTER. Entries in paragraph (c), Tables 1 and 2, and paragraph (d) of this section with EPA approval dates after September 30, 2022, for the Commonwealth of Ken-

tucky and September 30, 2022, for Jefferson County, Kentucky, will be incorporated by reference in the next update to the SIP compilation.

(2) EPA Region 4 certifies that the rules/regulations provided by EPA in the SIP compilation at the addresses in paragraph (b)(3) of this section are an exact duplicate of the officially promulgated State rules/regulations which have been approved as part of the State Implementation Plan as of the dates referenced in paragraph (b)(1).

(3) Copies of the materials incorporated by reference may be inspected at the Region 4 EPA office at 61 Forsyth Street SW, Atlanta, GA 30303. To obtain the material, please call (404) 562-9022. You may also inspect the material with an EPA approval date prior to September 30, 2022, for the Commonwealth at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit www.archives.gov/federal-register/cfr/ibr-locations or email fr.inspection@nara.gov.

(c) *EPA-approved laws and regulations.*

TABLE 2 TO PARAGRAPH (c)—EPA-APPROVED JEFFERSON COUNTY REGULATIONS FOR KENTUCKY

Reg	Title/subject	EPA approval date	Federal Register notice	District effective date	Explanation
Reg 1—General Provisions					
1.01	General Application of Regulations and Standards.	10/23/2001	66 FR 53658	3/17/1999	Except for the definition of “Acute non-cancer effect.”
1.02	Definitions	May 13, 2024	89 FR 41319	3/15/2023	
1.03	Abbreviations and Acronyms.	8/31/2017	82 FR 41335	1/16/2008	
1.04	Performance Tests ..	7/10/2020	85 FR 41399	6/19/2019	
1.05	Compliance with Emission Standards and Maintenance Requirements.	10/23/2001	66 FR 53658	11/18/1992	Except Section 5 and any references to Section 5 in this regulation.
1.06	Stationary Source Self-Monitoring, Emissions Inventory Development, and Reporting.	1/10/2024	89 FR 1461	3/16/2022	
1.07	Excess Emissions During Startups, Shutdowns, and Upset Conditions.	6/10/2014	79 FR 33101	7/21/2005	
1.08	Administrative Procedures.	10/21/2020	85 FR 66876	11/20/2019	
1.09	Prohibition of Air Pollution.	10/23/2001	66 FR 53658	11/16/1983	
1.10	Circumvention	10/23/2001	66 FR 53658	4/19/1972	
1.11	Control of Open Burning.	12/27/24	89 FR 105463	3/15/2023	
1.14	Control of Fugitive Particulate Emissions.	10/23/2001	66 FR 53658	1/20/1988	
1.18	Rule Effectiveness ...	10/23/2001	66 FR 53686	9/21/1994	
1.19	Administrative Hearings.	8/31/2017	82 FR 41335	1/16/2008	
Reg 2—Permit Requirements					
2.01	General Application	10/23/2001	66 FR 53658	4/21/1982	
2.02	Air Pollution Regulation Requirements and Exemptions	10/23/2001	66 FR 53658	6/21/1995	

TABLE 2 TO PARAGRAPH (c)—EPA-APPROVED JEFFERSON COUNTY REGULATIONS FOR KENTUCKY—Continued

Reg	Title/subject	EPA approval date	Federal Register notice	District effective date	Explanation
2.03	Permit Requirements—Non-Title V Construction and Operating Permits and Demolition/Renovation Permits.	10/23/2001	66 FR 53658	12/15/1993	Except for paragraphs 1.3, 5.3 and 5.6 regarding asbestos demolition, which were removed from the federally approved SIP by EPA on 5/7/2021.
2.04	Construction or Modification of Major Sources in or Impacting upon Non-Attainment Areas (Emission Offset Requirements).	3/7/2024	89 FR 16460	3/16/2022	Except for the ethanol production facilities exclusion in Sections 1.4.3.20 and 5.20. Additionally, EPA is retaining Sections 2.2.20 and 10 from Version 7 of Regulation 2.04, locally effective on March 17, 1993.
2.05	Prevention of Significant Deterioration of Air Quality.	9/16/2020	85 FR 57707	1/17/2018	This approval does not include Jefferson County's revisions to incorporate by reference the Fugitive Emissions Rule (December 19, 2008).
2.06	Permit Requirements—Other Sources.	10/23/2001	66 FR 53658	11/16/1983	
2.07	Public Notification for Title V, PSD, and Offset Permits; SIP Revisions; and Use of Emission Reduction Credits.	10/23/2001	66 FR 53658	6/21/1995	
2.09	Causes for Permit Suspension.	11/3/2003	68 FR 62236	6/19/2002	
2.10	Stack Height Considerations.	10/23/2001	66 FR 53658	7/19/1989	
2.11	Air Quality Model Usage.	10/23/2001	66 FR 53658	5/19/1999	
2.17	Federally Enforceable District Origin Operating Permits.	3/1/2023	88 FR 12831	3/16/2022	
Reg 3—Ambient Air Quality Standards					
3.01	Ambient Air Quality Standards.	5/11/2018	83 FR 21907	2/15/2017	
Reg 4—Emergency Episodes					
4.01	General Provisions for Emergency Episodes.	10/23/2001	66 FR 53658	6/13/1979

Board Order General Electric Company.	NO _x RACT Plan 01/17/01.	3/1/2001	10/23/2001, 66 FR 53665	
Board Order Kosmos Cement Company.	NO _x RACT Plan 05/03/04.	5/3/2004	5/18/2005, 70 FR 28429	
Board Order Louisville Gas and Electric Company, Cane Run Generating Station.	NO _x RACT Plan 10/18/00.	1/1/2001	10/23/2001, 66 FR 53665	
Board Order Louisville Gas and Electric Company, Mill Creek Generating Station.	NO _x RACT Plan 10/18/00.	1/1/2001	10/23/2001, 66 FR 53665	
Board Order Louisville Medical Center Steam Plant.	NO _x RACT Plan 1/18/2017.	1/18/2017	10/12/2017, 82 FR 47376	

TABLE 3 TO PARAGRAPH (d)—EPA-APPROVED KENTUCKY SOURCE-SPECIFIC REQUIREMENTS—
Continued

Name of source	Permit No.	State effective date	EPA approval date	Explanations
Board Order Oxy Vinyls, LP.	NO _x RACT Plan 12/20/00.	1/1/2001	10/23/2001, 66 FR 53665	
Board Order Rohm and Haas Company.	NO _x RACT Plan 12/20/00.	1/1/2001	10/23/2001, 66 FR 53665	
Board Order Texas Gas Transmission.	NO _x RACT Plan 5/18/2016.	5/18/2016	10/12/2017, 82 FR 47376	
Lawson Mardon Packaging, USA, Inc.	N/A	8/11/2003	7/10/2003, 68 FR 41083	
Calgon Carbon Corporation.	V–00–015	5/13/2005	5/24/2006, 71 FR 29786	The only parts of the permit being approved and incorporated are the SO ₂ emission limits from the following emissions points: 12, 14, 21, 31, 32, 34, 39, 40, 42, and 64.
TVA Paradise Permit ..	KDEPDAQ Permit 0–87–012.	10/19/2007	4/29/2008, 73 FR 23105	Emission Rates Units 1 and 2 are 1.2 lb/MMBTU and Unit 3 is 1.2 lb/MMBTU or *3.1 lb/MMBTU.
Source-Specific SIP Revision for Avis Budget Car Rental Group.	N/A	8/9/2007	11/30/2009, 74 FR 62499	Removal of stage II requirements.
LG & E Cane Run Generating Station NO _x RACT Plan Amendment 2.	N/A	7/18/2012	8/30/2016, 81 FR 59488	
Louisville Gas and Electric Mill Creek Electric Generating Station.	145–97–TV(R3).	6/23/2017	6/28/2019, 84 FR 30920	Plant-wide Specific condition S1-Standards, S2-Monitoring and Record Keeping and S3-Reporting in title V permit 145–97–TV(R3) for EGU U1, U2, U3 and U4.
Board Order for the American Synthetic Rubber Company—Amendment 2.	N/A	11/17/2021	6/7/2022, 87 FR 34577	Including the attached VOC/NO _x RACT Plan.
Board Order for LL Flex, LLC.	N/A	11/18/2020	9/30/2022, 87 FR 59309	

* Bypass of the scrubber shall be limited to 720 operating hours in any 12 consecutive months.

(e) *EPA-approved non-regulatory provisions.*

EPA—APPROVED KENTUCKY NON-REGULATORY PROVISIONS

Name of non-regulatory SIP provision	Applicable geographic or nonattainment area	State submittal date/ effective date	EPA approval date	Explanations
Air Quality surveillance plan	Commonwealth of Kentucky.	11/15/79	11/16/81, 46 FR 56198.	

Environmental Protection Agency

§ 52.920

EPA—APPROVED KENTUCKY NON-REGULATORY PROVISIONS—Continued

Name of non-regulatory SIP provision	Applicable geographic or nonattainment area	State submittal date/ effective date	EPA approval date	Explanations
Protection Visibility in Class I Areas.	Mammoth Cave National Park (Class I area).	08/31/97	07/12/88, 53 FR 26253.	
Small Business Assistance Program.	Commonwealth of Kentucky.	07/15/93	06/19/95, 60 FR 31915.	
Lexington Maintenance Plan	Fayette County, Scott County.	08/24/04	09/16/04, 69 FR 55751.	
Ashland-Huntington Maintenance Plan.	Boyd County, Greenup County.	05/24/95	06/29/95, 60 FR 33752.	
Maintenance Plan for Owensboro & Edmonson County Area.	Daviess County, Hancock County, Edmonson County.	04/14/98	09/03/98, 63 FR 46898.	
Northern Kentucky 15% Plan & I/ M.	Boone, Campbell and Kenton Counties.	09/11/98	12/08/98, 63 FR 67591.	
Negative Declarations for the nonattainment portions of Bullitt and Oldham Counties in Louisville 1-hour moderate ozone nonattainment area for CTG rules for aerospace, SOCM, shipbuilding, and wood furniture manufacturing.	Jefferson County, Bullitt County, Oldham County.	12/14/99	10/23/01, 66 FR 53665.	
Negative Declarations submitted by the Air Pollution Control District of Jefferson County for the Louisville 1-hour moderate ozone nonattainment area for CTG rules for aerospace, shipbuilding, and wood furniture manufacturing.	Jefferson County, Bullitt County, Oldham County.	02/26/01	10/23/01, 66 FR 53665.	
Louisville 1-Hour Ozone Maintenance Plan.	Jefferson County and portions of Bullitt and Oldham Counties.	11/1/03	05/18/05, 70 FR 28429.	
Maintenance Plan for Paducah Area.	Marshall County and a portion of Livingston County.	06/14/01	08/20/01, 66 FR 43488.	
Northern Kentucky 1-Hour Ozone Maintenance Plan.	Boone, Campbell, and Kenton Counties.	02/09/05	10/04/05, 70 FR 57750	
8-Hour Ozone Maintenance Plan for the Christian County, Kentucky area.	Christian County	05/20/05	01/25/06, 71 FR 4047	
Kentucky portion of the Ashland-Huntington Sulfur Dioxide Maintenance Plan.	Boyd County	05/13/05	05/24/06, 71 FR 29786	
Louisville 8-hour Ozone Maintenance Plan.	Bullitt County, Jefferson County, Oldham County.	09/26/2006	07/05/07, 72 FR 36601	
Huntington-Ashland 8-hour Ozone Maintenance Plan.	Boyd County	09/29/06	08/03/07, 71 FR 43172	
Northern Kentucky 8-Hour Ozone Maintenance plan.	Boone, Campbell and Kenton Counties in Kentucky.	1/29/2010	8/5/2010, 75 FR 47218	For the 1997 8-hour ozone NAAQS.
Paducah 8-Hour Ozone Attainment/1-Hour Ozone Maintenance Plan Section 110(a)(1).	Marshall and Livingston Counties.	May 27, 2008	8/26/2010, 75 FR 52467	
Huntington—Ashland 8-Hour Ozone Section 110(a)(1) Maintenance Plan.	A portion of Greenup County.	May 27, 2008	4/14/11, 76 FR 20853	For the 1997 8-hour ozone NAAQS.
Lexington 8-Hour Ozone Section 110(a)(1) Maintenance Plan Section 110(a)(1).	Fayette and Scott Counties.	May 27, 2008	4/14/11, 76 FR 20853	For the 1997 8-hour ozone NAAQS.
Edmonson County 8-Hour Ozone Section 110(a)(1) Maintenance Plan.	Edmonson County	May 27, 2008	4/14/11, 76 FR 20853	For the 1997 8-hour ozone NAAQS.
Owensboro 8-Hour Ozone Section 110(a)(1) Maintenance Plan.	Daviess County and a portion of Hancock County.	May 27, 2008	4/14/11, 76 FR 20853	For the 1997 8-hour ozone NAAQS.

EPA—APPROVED KENTUCKY NON-REGULATORY PROVISIONS—Continued

Name of non-regulatory SIP provision	Applicable geographic or nonattainment area	State submittal date/ effective date	EPA approval date	Explanations
110(a)(1) and (2) Infrastructure Requirements for the 1997 8-Hour Ozone National Ambient Air Quality Standards.	Commonwealth of Kentucky.	12/13/2007	7/13/2011, 76 FR 41088	For the 1997 8-hour ozone NAAQS.
1997 Annual PM _{2.5} Maintenance Plan for the Northern Kentucky Area.	Boone, Campbell and Kenton Counties (Kentucky portion of the Cincinnati-Hamilton OH-KY-IN Area).	1/27/11	12/15/2011, 76 FR 77903	For the 1997 Annual PM _{2.5} NAAQS.
Huntington-Ashland 1997 PM _{2.5} Attainment Plan.	Boyd County; Portion of Lawrence County.	12/03/2008	4/11/2012, 77 FR 21663	For the 1997 PM _{2.5} NAAQS.
Regional Haze Plan and Plan Amendment.	Statewide	06/25/08 and 05/28/10	03/30/12, 77 FR 19098	Source-specific BART requirements are summarized in Table 7.5.3–2 of the Commonwealth's May 28, 2010 submittal.
Louisville; 1997 Annual Fine Particulate Matter 2002 Base Year Emissions Inventory.	Bullitt and Jefferson Counties.	12/03/2008	8/2/12, 77 FR 45956.	
110(a)(1) and (2) Infrastructure Requirements for 1997 Fine Particulate Matter National Ambient Air Quality Standards.	Kentucky	8/26/2008	10/3/2012, 77 FR 60307	With the exception of section 110(a)(2)(D)(i), With respect to sections 110(a)(2)(C) related to PSD requirements and 110(a)(2)(J) related to PSD requirements, EPA conditionally approved these requirements.
110(a)(1) and (2) Infrastructure Requirements for 2006 Fine Particulate Matter National Ambient Air Quality Standards.	Kentucky	7/17/2012	10/3/2012, 77 FR 60307	With the exception of section 110(a)(2)(D)(i), With respect to sections 110(a)(2)(C) related to PSD requirements and 110(a)(2)(J) related to PSD requirements, EPA conditionally approved these requirements.
1997 Annual PM _{2.5} Maintenance Plan for the Kentucky portion of the Huntington-Ashland Area.	Boyd County and Lawrence County (part) (Kentucky portion of the Huntington-Ashland WV-KY-OH Area).	2/9/12	12/26/12, 77 FR 75865	For the 1997 Annual PM _{2.5} NAAQS.

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.920, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

§ 52.921 Classification of regions.

The Kentucky plan was evaluated on the basis of the following classifications:

Air quality control region	Pollutant				
	Particulate matter	Sulfur oxides	Nitrogen dioxide	Carbon monoxide	Photochemical oxidants (hydrocarbons)
Appalachian Intrastate	II	III	III	III	III
Bluegrass Intrastate	II	III	III	III	III
Evansville (Indiana)-Owensboro-Henderson (Kentucky) Interstate	I	II	III	III	III
Huntington (West Virginia)-Ashland (Kentucky)-Portsmouth-Ironton (Ohio) Interstate	I	III	III	III	III
Louisville Interstate	I	I	III	III	I
Metropolitan Cincinnati Interstate	I	II	III	III	I
North Central Kentucky Intrastate	II	III	III	III	III
Paducah (Kentucky)-Cairo (Illinois) Interstate	I	II	III	III	III
South Central Kentucky Intrastate	III	III	III	III	III

[37 FR 10868, May 31, 1972, as amended at 39 FR 16346, May 8, 1974]

§ 52.922 [Reserved]

of Appendix S of 40 CFR part 51 are met.

§ 52.923 Approval status.

(a) With the exceptions set forth in this subpart, the Administrator approves Kentucky's plan for the attainment and maintenance of the national standards under section 110 of the Clean Air Act. Furthermore, the Administrator finds that the plan satisfies all requirements of part D, title 1, of the Clean Air Act as amended in 1977.

(b) New Source review permits issued pursuant to Section 173 of the Clean Air Act will not be deemed valid by EPA unless the provisions of Section V

[45 FR 72157, Oct. 31, 1980, as amended at 79 FR 30050, May 27, 2014]

§ 52.924 Legal authority.

(a) The requirements of § 51.230(f) of this chapter are not met since K.R.S. 224.380 of the Air Pollution Control Law of the Commonwealth of Kentucky (June 18, 1970) does not provide for the release, under certain circumstances, of emission data to the public.

(b) Delegation of Authority: Pursuant to section 114 of the Act, Kentucky requested a delegation of authority to enable it to collect, correlate, and release emission data to the public. The Administrator has determined that

§ 52.925

40 CFR Ch. I (7–1–25 Edition)

Kentucky is qualified to receive a delegation of the authority it requested. Accordingly, the Administrator delegates to Kentucky his authority under section 114(a) (1) and (2) and section 114(c) of the Act, i.e., authority to collect, correlate, and release emission data to the public.

[37 FR 10868, May 31, 1972, as amended at 37 FR 15084, July 27, 1972; 51 FR 40676, Nov. 7, 1986]

§ 52.925 General requirements.

(a) The requirements of § 51.116(c) of this chapter are not met since the legal

authority to provide for public availability of emission data is inadequate.

[39 FR 34536, Sept. 26, 1974, as amended at 51 FR 40676, Nov. 7, 1986]

§ 52.926 Attainment dates for national standards.

The following table presents the latest dates by which the national standards are to be attained. The dates reflect the information presented in Kentucky's plan, except where noted.

Air quality control region	Pollutant						
	Particulate matter		Sulfur oxides		Nitrogen dioxide	Carbon monoxide	Ozone
	Primary	Sec-ondary	Primary	Sec-ondary

See § 81.318 of this chapter to identify the specific nonattainment area.

NOTE: Dates or footnotes in italics are prescribed by the Administrator because the plan did not provide a specific date or the dates provided were not acceptable. Sources subject to plan requirements and attainment dates established under section 110(a)(2)(A) prior to the 1977 Clean Air Act Amendments remain obligated to comply with those requirements by the earlier deadlines. The earlier attainment dates are set out at 40 CFR 52.926 (1979 edition).

- a. Air quality levels presently below primary standards or area is unclassifiable.
- b. Air quality levels presently below secondary standards or area is unclassifiable.
- c. April 1975.
- d. July 1975.
- e. July 1977.
- f. July 1978.
- g. December 31, 1982.
- h. December 31, 1987.

- i. 18 month extension for plan submittal granted: attainment date not yet established.
j. January 1, 1985.

[45 FR 85002, Dec. 24, 1980]

§ 52.927 Compliance schedule.

(a) The information in this section is available in the 40 CFR, part 52 edition revised as of July 1, 1999, the 40 CFR, part 52, Volume 1 of 2 (§§ 52.01 to 52.1018) editions revised as of July 1, 2000 through July 1, 2011, and the 40 CFR, part 52, Volume 1 of 3 (§§ 52.01 to 52.1018) editions revised as of July 1, 2012.

(b) [Reserved]

[79 FR 30050, May 27, 2014]

§ 52.928 Control strategy: Sulfur oxides.

The revised SO₂ emission limit for large coal-fired boilers in Bell, Clark, and Woodford Counties, submitted on June 29, 1979, is disapproved since it does not provide for attainment and maintenance of all SO₂ NAAQS. The limit approved by EPA on May 10, 1976 (41 FR 19105), remains the limit applicable to these sources.

[49 FR 11091, Mar. 23, 1984]

§ 52.929 Determination of attainment.

(a) Based upon EPA's review of the air quality data for the 3-year period 2007–2009, EPA determined that the Huntington-Ashland, West Virginia-Kentucky-Ohio PM_{2.5} nonattainment Area attained the 1997 annual PM_{2.5} NAAQS by the applicable attainment date of April 5, 2010. Therefore, EPA has met the requirement pursuant to CAA section 179(c) to determine, based on the Area's air quality as of the attainment date, whether the Area attained the standard. EPA also determined that the Huntington-Ashland PM_{2.5} nonattainment Area is not subject to the consequences of failing to attain pursuant to section 179(d).

(b) Based upon EPA's review of the air quality data for the 3-year period 2007–2009, EPA determined that the Louisville, Kentucky-Indiana PM_{2.5} nonattainment Area attained the 1997 annual PM_{2.5} NAAQS by the applicable attainment date of April 5, 2010. Therefore, EPA has met the requirement pursuant to CAA section 179(c) to determine, based on the Area's air qual-

ity as of the attainment date, whether the Area attained the standard. EPA also determined that the Louisville PM_{2.5} nonattainment Area is not subject to the consequences of failing to attain pursuant to section 179(d).

(c) Based upon EPA's review of the air quality data for the 3-year period 2007–2009, EPA determined that the Cincinnati-Hamilton, Ohio, Kentucky, and Indiana PM_{2.5} nonattainment Area attained the 1997 annual PM_{2.5} NAAQS by the applicable attainment date of April 5, 2010. Therefore, EPA has met the requirement pursuant to CAA section 179(c) to determine, based on the Area's air quality as of the attainment date, whether the Area attained the standard. EPA also determined that the Cincinnati-Hamilton, Ohio, Kentucky, and Indiana PM_{2.5} nonattainment Area is not subject to the consequences of failing to attain pursuant to section 179(d).

[76 FR 55543, Sept. 7, 2011, as amended at 76 FR 55546, Sept. 7, 2011; 76 FR 60375, Sept. 29, 2011]

§ 52.930 Control strategy: Ozone.

(a) The VOC bubble for Alcan Foil Products in Louisville submitted as a SIP revision on March 3, 1986, is disapproved. The source must continue to meet all the requirements of Jefferson County Regulation 6.29.

(b) *Part D—disapproval—(1) Campbell and Kenton Counties nonattainment area.* The 1979 SIP revisions for these two counties are disapproved because the Commonwealth failed to submit evidence of legal authority to implement a vehicle inspection and maintenance program as required under section 172(b)(11)(B) of the Clean Air Act. No major new or modified sources of volatile organic compounds can be built in these two counties by virtue of the provisions of section 110(a)(2)(1) of the Clean Air Act.

(2) *Northern Kentucky (Boone, Campbell and Kenton Counties) ozone nonattainment area.* The demonstration of attainment of the ozone standards by the end of 1982, submitted as part of

Kentucky's ozone SIP revision on June 23, 1982, (draft), September 27, 1982, and November 3, 1982, is disapproved. As a result, the extension of the attainment deadline until December 31, 1987, remains in effect, along with the related requirement to submit a SIP revision addressing all requirements of Part D extension areas.

(c) The redesignation request submitted by the Commonwealth of Kentucky, on November 11, 1994, for the Kentucky portion of the Cincinnati-Northern Kentucky moderate interstate ozone nonattainment area from nonattainment to attainment was disapproved on September 27, 1996.

(d) Kentucky's November 15, 1996, request for a 1-year attainment date extension for the Kentucky portion of the Cincinnati-Hamilton metropolitan moderate ozone nonattainment area which consists of Kenton, Boone, and Campbell Counties is approved. The date for attaining the ozone standard in these counties is November 15, 1997.

(e) Kentucky's November 15, 1996, request for a 1-year attainment date extension for the Kentucky portion of the Louisville moderate ozone nonattainment area which consists of Jefferson County and parts of Bullitt and Oldham Counties is approved. The date for attaining the ozone standard in these counties is November 15, 1997.

(f) Kentucky's January 7, 1998, request for a 1-year attainment date extension for the Kentucky portion of the Cincinnati-Hamilton metropolitan moderate ozone nonattainment area which consists of Kenton, Boone, and Campbell Counties is approved. The date for attaining the ozone standard in these counties is November 15, 1998.

(g) The redesignation request submitted by the Commonwealth of Kentucky, on October 29, 1999, for the Kentucky portion of the Cincinnati-Hamilton moderate interstate ozone nonattainment area from nonattainment to attainment was approved on July 5, 2000. The mobile source budgets for the Kentucky portion of the area for the purposes of transportation conformity are now 5.83 tons per summer day of volatile organic compounds and 15.13 tons per summer day of nitrogen oxides for the year 2010.

(h) Determination—EPA is determining that as of July 5, 2000, the Kentucky portion of the Cincinnati-Hamilton ozone nonattainment area (which includes the Counties of Boone, Kenton, and Campbell) has attained the 1-hour ozone standard and that the attainment demonstration requirements of section 182(b)(1), 182(j), and 172(c)(1), along with the section 172(c)(9) contingency measure requirements, do not apply to the area.

(i) Approval—EPA is approving an exemption from the requirements contained in section 182(f) of the Clean Air Act. This approval exempts Boone, Kenton, and Campbell counties in Kentucky from the NO_x related general conformity provisions; nonattainment NSR for new sources and modifications that are major for NO_x; NO_x RACT; and the requirement for a demonstration of compliance with the enhanced I/M performance standard for NO_x.

(j) [Reserved]

(k) The redesignation request submitted by the Commonwealth of Kentucky, on March 30, 2001, and supplemented on July 9, 2001, for the Kentucky portion of the Louisville moderate interstate ozone nonattainment area from nonattainment to attainment was approved on October 23, 2001. The motor vehicle emissions budgets for VOC and NO_x in the Kentucky portion of the Louisville moderate interstate maintenance plan are adequate for conformity purposes and approvable as part of the maintenance plan. The 1-hour ozone standard maintenance plan motor vehicle emission budgets for the entire interstate Louisville area for the purposes of transportation conformity are now 48.17 tons per summer day of VOC and 92.93 tons per summer day of NO_x for the year 2012.

(l) *Disapproval.* EPA is disapproving in part, the Commonwealth of Kentucky's Infrastructure SIP for the 2008 8-hour Ozone National Ambient Air Quality Standards addressing section 110(a)(2)(D)(i)(I) concerning interstate transport requirements, submitted July 17, 2012.

(m) *Determination of attainment.* The EPA has determined, as of June 3, 2016, that based on 2012 to 2014 ambient air quality data, the Cincinnati, OH-KY-IN 2008 ozone Marginal nonattainment

Environmental Protection Agency

§ 52.932

area has attained the 2008 ozone NAAQS. Therefore, the EPA has met the requirement pursuant to CAA section 181(b)(2)(A) to determine, based on the area's air quality data as of the attainment date, whether the area attained the standard. The EPA also determined that the Cincinnati, OH-KY-IN nonattainment area will not be reclassified for failure to attain by its applicable attainment date under section 181(b)(2)(A).

(n) *Disapproval*. The state implementation plan (SIP) revision submitted on January 11, 2019, addressing Clean Air Act section 110(a)(2)(D)(i)(I) (prongs 1 and 2) for the 2015 ozone national ambient air quality standards (NAAQS) is disapproved.

[46 FR 58082, Nov. 30, 1981]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.930, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

§ 52.931 Significant deterioration of air quality.

(a) Regulations for preventing significant deterioration of air quality. The provisions of § 52.21 (b) through (w) are hereby incorporated and made a part of the applicable state plan for the State of Kentucky only as they apply to permits issued pursuant to § 52.21 prior to final approval of Kentucky's Regulation for Prevention of Significant Deterioration (PSD), Visibility Monitoring, and Visibility New Source Review in Attainment Areas. The provisions of § 52.21 (b) through (w) are rescinded for permits issued after final approval of Kentucky's Regulation for Prevention of Significant Deterioration (PSD), Visibility Monitoring, and Visibility New Source Review in Attainment Areas.

(b) The Commonwealth of Kentucky has committed to revising the state's regulations accordingly when EPA amends the federal vessel emissions provisions contained in 40 CFR 51.166. In a letter dated October 17, 1986, Kentucky stated:

As requested, the Division of Air Pollution Control hereby commits to changing the definition of "building, structure, facility, or installation," and any other applicable definitions, when the issue of vessel emissions is

resolved at the federal level, and after the federal regulation, 40 CFR 51.24, is amended.

(c) In a letter dated May 3, 1988, EPA informed Kentucky that the following caveat must be included in all potentially affected permits due to a decision of the U.S. Court of Appeals for the District of Columbia Circuit (*NRDC v. Thomas*, 838 F.2d 1224):

In approving this permit, the Kentucky Division for Air Quality has determined that the application complies with the applicable provisions of the stack height regulations as revised by the EPA on July 8, 1985 (50 FR 27892). Portions of the regulations have been remanded by a panel of the U.S. Court of Appeals for the D.C. Circuit in *NRDC v. Thomas*, 838 F.2d 1224 (D.C. Cir. 1988). Consequently, this permit may be subject to modification if and when the EPA revises the regulation in response to the court decision. This may result in revised emission limitations or may affect other actions taken by the source owners or operators.

Kentucky responded with a letter dated May 11, 1988, stating in part:

This is in response to your letter dated May 3, 1988 * * *. As requested by your letter, the Kentucky Division for Air Quality agrees to include the condition set forth in your letter, in all potentially affected permits issued under regulation 401 KAR 51:017 or 401 KAR 51:052. Therefore, we request that you consider this letter as our commitment that the required caveat will be included in all potentially affected permits * * *.

(d) All applications and other information required pursuant to § 52.21 from sources located in the Commonwealth of Kentucky shall be submitted to the appropriate state or local agency for which the source is located, rather than to EPA's Region 4 office: Kentucky Department for Environmental Protection, Division for Air Quality, 300 Sower Boulevard, 2nd Floor, Frankfort, Kentucky 40601; or Louisville Metro Air Pollution Control District, 701 W. Ormsby Ave., Suite 303, Louisville, Kentucky 40203.

[54 FR 36311, Sept. 1, 1989, as amended at 74 FR 55143, Oct. 27, 2009; 79 FR 30050, May 27, 2014; 82 FR 32645, July 17, 2017]

§ 52.932 Rules and regulations.

(a) The last sentence of section 3(1) of Kentucky regulation 401 KAR 3:050, which specifies that a new fossil fuel fired steam electric generator's allowable SO₂ emissions may be calculated

by averaging SO₂ emissions from existing units of this type and from new ones, is disapproved since it contravenes subpart D of 40 CFR part 60, New Source Performance Standards.

(b) Section 8(2)(a) of regulation 401 KAR 61:015 is disapproved in that it allows the Tennessee Valley Authority's Shawnee power plant until October 1, 1981, to achieve compliance with emissions limits which are not made more stringent by the 1979 Part D revisions, and which the source was previously required to meet by July 1, 1977.

(c) Section 8(2)(d) of regulation 401 KAR 61:015 is disapproved in that it allows sources until December 31, 1982, to achieve compliance with emission limits which are not made more stringent by the 1979 Part D revisions, and which the sources were previously required to meet prior to 1979.

[41 FR 19106, May 10, 1976, as amended at 46 FR 40188, Aug. 7, 1981]

§ 52.933 Control Strategy: Sulfur oxides and particulate matter.

(a) In a letter dated March 27, 1987, the Kentucky Department for Natural Resources and Environmental Protection certified that no emission limits in the State's plan are based on dispersion techniques not permitted by EPA's stack height rules. This certification does not apply to: Big Rivers-Green #1 & 2, Kentucky Utilities-Ghent #3 & 4, and Ashland Oil, Inc.-Catlettsburg.

(b) *Determination of Attainment.* EPA has determined, as of March 9, 2011, that the Louisville, IN-KY PM_{2.5} nonattainment area has attained the 1997 PM_{2.5} NAAQS. These determinations, in accordance with 40 CFR 51.1004(c), suspend the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, reasonable further progress, contingency measures, and other plan elements related to attainment of the standards for as long as the area continues to meet the 1997 PM_{2.5} NAAQS.

(c) *Disapproval.* EPA is disapproving portions of Kentucky's Infrastructure SIP for the 2006 24-hour PM_{2.5} NAAQS addressing interstate transport, specifically with respect to section 110(a)(2)(D)(i)(I).

(d) *Determination of Attainment.* EPA has determined, as of September 7, 2011, that based upon 2007–2009 air quality data, the Huntington-Ashland, West Virginia-Kentucky-Ohio, nonattainment Area has attained the 1997 annual PM_{2.5} NAAQS. This determination, in accordance with 40 CFR 52.1004(c), suspends the requirements for this Area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as this Area continues to meet the 1997 annual PM_{2.5} NAAQS.

(e) *Determination of Attainment.* EPA has determined, as of September 29, 2011, that based upon 2007–2009 air quality data, the Cincinnati-Hamilton, Ohio-Kentucky-Indiana nonattainment Area has attained the 1997 annual PM_{2.5} NAAQS. This determination, in accordance with 40 CFR 52.1004(c), suspends the requirements for this Area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as this Area continues to meet the 1997 annual PM_{2.5} NAAQS.

[54 FR 23478, June 1, 1989, as amended at 76 FR 12862, Mar. 9, 2011; 76 FR 43143, July 20, 2011; 76 FR 55543, Sept. 7, 2011; 76 FR 60376, Sept. 29, 2011]

§ 52.934 [Reserved]

§ 52.935 PM₁₀ State implementation plan development in group II areas.

On July 7, 1988, the State submitted a committal SIP for the cities of Ashland and Catlettsburg in Boyd County. The committal SIP contains all the requirements identified in the July 1, 1987, promulgation of the SIP requirements for PM₁₀ at 52 FR 24681. The SIP commits the State to submit an emissions inventory, continue to monitor for PM₁₀, report data and to submit a full SIP if a violation of the PM₁₀ National Ambient Air Quality Standards is detected.

[55 FR 4172, Feb. 7, 1990]

Environmental Protection Agency

§ 52.940

§ 52.936 [Reserved]

§ 52.937 Review of new sources and modifications.

(a) Approval—EPA is approving the section 182(f) oxides of nitrogen (NO_x) reasonably available control technology (RACT) exemption request submitted by the Kentucky Department for Environmental Protection on August 16, 1994, for the Kentucky portion of the Huntington-Ashland ozone (O₃) moderate nonattainment area. This approval exempts this area from implementing NO_x RACT on major sources of NO_x. If a violation of the O₃ NAAQS occurs in the area, the exemption from the requirement of section 182(f) of the CAA in the applicable area shall not apply.

(b) Approval—EPA is approving the section 182(f) oxides of nitrogen (NO_x) reasonably available control technology (RACT) exemption for the Kentucky portion of the Cincinnati-Hamilton ozone (O₃) moderate nonattainment area. This approval exempts this area from implementing NO_x RACT on major sources of NO_x.

[60 FR 21717, May 3, 1995, as amended at 65 FR 37898, June 19, 2000]

§ 52.938 General conformity.

The General Conformity regulations were submitted on November 10, 1995, and adopted into the Kentucky State Implementation Plan (SIP). The Commonwealth of Kentucky incorporated by reference regulations 40 CFR part 51, subpart W—determining conformity of General Federal Actions to State or Federal Implementation Plans.

[63 FR 40046, July 27, 1998]

§ 52.939 Original identification of plan section.

(a) This section identified the original “Air Implementation Plan for the State of Kentucky” and all revisions submitted by Kentucky that were federally approved prior to March 1, 1999. The information in this section is available in the 40 CFR, part 52 edition revised as of July 1, 1999, the 40 CFR, part 52, Volume 1 of 2 (§§ 52.01 to 52.1018) editions revised as of July 1, 2000 through July 1, 2011, and the 40 CFR, part 52, Volume 1 of 3 (§§ 52.01 to 52.1018)

editions revised as of July 1, 2012. The Jefferson County portion of the Commonwealth of Kentucky’s SIP previously identified in section 52.934(a) and (b) is also available in the above editions.

[79 FR 30051, May 27, 2014]

§ 52.940 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of nitrogen oxides?

(a)(1) The owner and operator of each source and each unit located in the State of Kentucky and for which requirements are set forth under the CSAPR NO_x Annual Trading Program in subpart AAAAA of part 97 of this chapter must comply with such requirements. The obligation to comply with such requirements will be eliminated by the promulgation of an approval by the Administrator of a revision to Kentucky’s State Implementation Plan (SIP) as correcting the SIP’s deficiency that is the basis for the CSAPR Federal Implementation Plan under § 52.38(a), except to the extent the Administrator’s approval is partial or conditional.

(2) Notwithstanding the provisions of paragraph (a)(1) of this section, if, at the time of the approval of Kentucky’s SIP revision described in paragraph (a)(1) of this section, the Administrator has already started recording any allocations of CSAPR NO_x Annual allowances under subpart AAAAA of part 97 of this chapter to units in the State for a control period in any year, the provisions of subpart AAAAA of part 97 of this chapter authorizing the Administrator to complete the allocation and recordation of CSAPR NO_x Annual allowances to units in the State for each such control period shall continue to apply, unless provided otherwise by such approval of the State’s SIP revision.

(b)(1) The owner and operator of each source and each unit located in the State of Kentucky and for which requirements are set forth under the CSAPR NO_x Ozone Season Group 1 Trading Program in subpart BBBBB of part 97 of this chapter must comply with such requirements with regard to emissions occurring in 2015 and 2016.

(2) The owner and operator of each source and each unit located in the State of Kentucky and for which requirements are set forth under the CSAPR NO_x Ozone Season Group 2 Trading Program in subpart EEEEE of part 97 of this chapter must comply with such requirements with regard to emissions occurring in 2017 through 2020.

(3) The owner and operator of each source and each unit located in the State of Kentucky and for which requirements are set forth under the CSAPR NO_x Ozone Season Group 3 Trading Program in subpart GGGGG of part 97 of this chapter must comply with such requirements with regard to emissions occurring in 2021 and each subsequent year. The obligation to comply with such requirements will be eliminated by the promulgation of an approval by the Administrator of a revision to Kentucky's State Implementation Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan (FIP) under § 52.38(b)(1) and (b)(2)(iii), except to the extent the Administrator's approval is partial or conditional.

(4) Notwithstanding the provisions of paragraph (b)(3) of this section, if, at the time of the approval of Kentucky's SIP revision described in paragraph (b)(3) of this section, the Administrator has already started recording any allocations of CSAPR NO_x Ozone Season Group 3 allowances under subpart GGGGG of part 97 of this chapter to units in the State for a control period in any year, the provisions of subpart GGGGG of part 97 of this chapter authorizing the Administrator to complete the allocation and recordation of CSAPR NO_x Ozone Season Group 3 allowances to units in the State for each such control period shall continue to apply, unless provided otherwise by such approval of the State's SIP revision.

(5) Notwithstanding the provisions of paragraph (b)(2) of this section, after 2020 the provisions of § 97.826(c) of this chapter (concerning the transfer of CSAPR NO_x Ozone Season Group 2 allowances between certain accounts under common control), the provisions of § 97.826(d) of this chapter (concerning

the conversion of amounts of unused CSAPR NO_x Ozone Season Group 2 allowances allocated for control periods before 2021 to different amounts of CSAPR NO_x Ozone Season Group 3 allowances), and the provisions of § 97.811(d) of this chapter (concerning the recall of CSAPR NO_x Ozone Season Group 2 allowances equivalent in quantity and usability to all such allowances allocated to units in the State for control periods after 2020) shall continue to apply.

(6) Notwithstanding any other provision of this part, the effectiveness of paragraph (b)(3) of this section is stayed with regard to emissions occurring in 2023 and thereafter, provided that while such stay remains in effect, the provisions of paragraph (b)(2) of this section shall apply with regard to such emissions.

(c)(1) The owner and operator of each source located in the State of Kentucky and for which requirements are set forth in § 52.40 and § 52.41, § 52.42, § 52.43, § 52.44, § 52.45, or § 52.46 must comply with such requirements with regard to emissions occurring in 2026 and each subsequent year.

(2) Notwithstanding any other provision of this part, the effectiveness of paragraph (c)(1) of this section is stayed.

[76 FR 48365, Aug. 8, 2011, as amended at 81 FR 74586 and 74596, Oct. 26, 2016; 83 FR 33760, July 17, 2018; 86 FR 23174, Apr. 30, 2021; 88 FR 36890, June 5, 2023; 88 FR 49303, July 31, 2023]

§ 52.941 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of sulfur dioxide?

(a) The owner and operator of each source and each unit located in the State of Kentucky and for which requirements are set forth under the CSAPR SO₂ Group 1 Trading Program in subpart CCCCC of part 97 of this chapter must comply with such requirements. The obligation to comply with such requirements will be eliminated by the promulgation of an approval by the Administrator of a revision to Kentucky's State Implementation Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan under § 52.39, except to the extent the

Environmental Protection Agency

§ 52.970

Administrator's approval is partial or conditional.

(b) Notwithstanding the provisions of paragraph (a) of this section, if, at the time of the approval of Kentucky's SIP revision described in paragraph (a) of this section, the Administrator has already started recording any allocations of CSAPR SO₂ Group 1 allowances under subpart CCCCC of part 97 of this chapter to units in the State for a control period in any year, the provisions of subpart CCCCC of part 97 of this chapter authorizing the Administrator to complete the allocation and recordation of CSAPR SO₂ Group 1 allowances to units in the State for each such control period shall continue to apply, unless provided otherwise by such approval of the State's SIP revision.

[76 FR 48366, Aug. 8, 2011, as amended at 81 FR 74586, Oct. 26, 2016]

Subpart T—Louisiana

§ 52.970 Identification of plan.

(a) *Purpose and scope.* This section sets forth the applicable State Implementation Plan (SIP) for Louisiana under section 110 of the Clean Air Act, 42 U.S.C. 7410, and 40 CFR part 51 to meet national ambient air quality standards.

(b) *Incorporation by reference.* (1) Material listed in paragraphs (c), (d) and (e) of this section with an EPA approval date prior to July 1, 1998, was approved for incorporation by reference by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Material is incorporated as it exists on the date of the approval, and notice of any change in the material will be published in the FEDERAL REGISTER. Entries in paragraphs (c), (d) and (e) of this section with EPA approval dates after July 1, 1998, will be incorporated by reference in the next update to the SIP compilation.

(2) EPA Region 6 certifies that the rules/regulations provided by EPA in the SIP compilation at the addresses in paragraph (b)(3) of this section are an exact duplicate of the officially promulgated State rules/regulations which have been approved as part of the State Implementation Plan as of July 1, 1998.

(3) Copies of the materials incorporated by reference may be inspected at <https://www.epa.gov/sips-la> or the Environmental Protection Agency, Region 6, 1201 Elm Street, Suite 500, Dallas, Texas 75270-2102. If you wish to obtain material from the EPA Regional Office, please call (800) 887-6063 or (214) 665-2760.

(c) *EPA approved regulations.*

Chapter 15—Emission Standards for Sulfur Dioxide				
Section 1501	Degradation of Existing Emission Quality Restricted.	Apr. 1992, LR18:374	7/15/1993, 58 FR 38060	Ref 52.999(c)(59)
Section 1503	Emission Standards for Sulfur Dioxide. Emission Limitations.	7/20/1998	7/5/2011, 76 FR 38977	
Section 1505	Variance	Apr. 1992, LR18:374	7/15/1993, 58 FR 38060	Ref 52.999(c)(59)
Section 1509	Reduced Sulfur Compounds (New and Existing Sources).	Apr. 1992, LR18:374	7/15/1993, 58 FR 38060	Ref 52.999(c)(59)
Section 1511.B	Continuous Emission Monitoring.	12/20/1996	7/5/2011, 76 FR 38977	
Section 1513	Recordkeeping and Reporting.	Apr. 1992, LR18:374	7/15/1993, 58 FR 38060	Ref 52.999(c)(59)
Table 4	Emissions—Methods of Contaminant Measurement.	Apr. 1992, LR18:374	7/15/1993, 58 FR 38060	Ref 52.999(c)(59)
Chapter 17—Control of Emissions of Carbon Monoxide (New Sources)				
Subchapter A. General				
Section 1701	Degradation of Existing Emission Quality Restricted.	Dec. 1987, LR13:741	3/8/1989, 54 FR 9795	Ref 52.999(c)(49)
Subchapter B. Ferrous Metal Emissions				
Section 1703	Ferrous Metal Emissions	Dec. 1987, LR13:741	3/8/1989, 54 FR 9795	Ref 52.999(c)(49)
Subchapter C. Petroleum Refinery Emissions				
Section 1705	Petroleum Refinery Emissions.	Dec. 1987, LR13:741	3/8/1989, 54 FR 9795	Ref 52.999(c)(49)
Chapter 21—Control of Emissions of Organic Compounds				
Subchapter A. General				
Section 2101	Compliance Schedules ...	Nov. 1990, LR16:959	5/5/1994, 59 FR 23166	Ref 52.999(c)(60)
Section 2103	Storage of Volatile Organic Compounds.	10/20/2010	8/29/2017, 82 FR 40949	2103.E.3 is not included in the SIP.
Section 2104.A	Crude Oil and Condensate.	4/20/2004	7/5/2011, 76 FR 38977	
Section 2104.B.–2104.C.1.	Crude Oil and Condensate.	11/20/1997	7/5/2011, 76 FR 38977	
Section 2104.C.2.–2104.C.4.	Crude Oil and Condensate.	4/20/2004	7/5/2011, 76 FR 38977	
Section 2104.D	Crude Oil and Condensate.	11/20/1997	7/5/2011, 76 FR 38977	
Section 2104.E	Crude Oil and Condensate.	4/20/2004	7/5/2011, 76 FR 38977	
Section 2104.F.–2104.F.2.d.	Crude Oil and Condensate.	11/20/1997	7/5/2011, 76 FR 38977	
Section 2104.G	Crude Oil and Condensate.	11/20/1997	7/5/2011, 76 FR 38977	
Section 2105	Storage of Volatile Organic Components (Small Tanks).			NOT IN SIP
Section 2107	Volatile Organic Compounds—Loading.	9/20/2008	8/29/2017, 82 FR 40949	E.1.b., E.1.d. and E.1.e. have not been submitted for approval into the SIP.
Section 2108	Marine Vapor Recovery	9/20/2008	8/29/2017, 82 FR 40949	
Section 2109.C.1–4	Oil/Water—Separation	12/20/1996	7/5/2011, 76 FR 38977	
Section 2111	Pumps and Compressors	Apr. 1991, LR17:360	5/5/1994, 59 FR 23166	Ref 52.999(c)(60)
Section 2113.A	Housekeeping	5/20/1999	7/5/2011, 76 FR 38977	
Section 2113.A.4	Housekeeping	10/20/2007	1/28/2016, 81 FR 4891	
Section 2115	Waste Gas Disposal Introductory paragraph.	4/20/2004	7/5/2011, 76 FR 38977

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.970, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

§ 52.971 Classification of regions.

The Louisiana plan was evaluated on the basis of the following classifications:

Environmental Protection Agency

§ 52.975

Air quality control region	Pollutant				
	Particulate matter	Sulfur oxides	Nitrogen dioxide	Carbon monoxide	Ozone
Southern Louisiana-Southeast Texas Interstate	II	I	III	III	I
Shreveport-Texarkana-Tyler Interstate	II	III	III	III	III
Monroe-El Dorado Interstate	II	III	III	III	III

[37 FR 10869, May 31, 1972, as amended at 45 FR 9909, Feb. 14, 1980]

§§ 52.972–52.974 [Reserved]

§ 52.975 Redesignations and maintenance plans; ozone.

(a) *Approval.* The Louisiana Department of Environmental Quality (LDEQ) submitted redesignation requests and maintenance plans for the areas of Beauregard, Lafourche, and St. Mary Parishes on June 14, 1993. Redesignation requests and maintenance plans were submitted for the areas of Grant and Lafayette on May 25, 1993. The EPA deemed these requests complete on September 10, 1993. Several approvability issues existed, however. The LDEQ addressed these approvability issues in supplemental ozone redesignation requests and revised maintenance plans. These supplemental submittals were received for the areas of Beauregard, Grant, Lafayette, Lafourche, and St. Mary Parishes on March 27, 1995, December 12, 1994, October 21, 1994, November 18, 1994, and November 23, 1994, respectively. The redesignation requests and maintenance plans meet the redesignation requirements in section 107(d)(3)(E) of the Act as amended in 1990. The redesignations meet the Federal requirements of section 182(a)(1) of the Clean Air Act as a revision to the Louisiana ozone State Implementation Plan for these areas. The EPA therefore approved the request for redesignation to attainment with respect to ozone for the areas of Beauregard, Grant, Lafayette, Lafourche, and St. Mary Parishes on October 17, 1995.

(b) *Approval.*—The Louisiana Department of Environmental Quality (LDEQ) submitted a redesignation request and maintenance plan for St. James Parish on May 25, 1993. The EPA deemed this request complete on September 10, 1993. Several approvability issues existed, however. The LDEQ ad-

ressed these approvability issues in a supplemental ozone redesignation request and revised maintenance plan. This supplemental submittal was received for St. James Parish on December 15, 1994. The redesignation request and maintenance plan meet the redesignation requirements in section 107(d)(3)(E) of the Act as amended in 1990. The redesignation meets the Federal requirements of section 182(a)(1) of the Clean Air Act as a revision to the Louisiana ozone State Implementation Plan for this parish. The EPA therefore approved the request for redesignation to attainment with respect to ozone for St. James Parish on November 13, 1995.

(c) *Approval.*—The Louisiana Department of Environmental Quality (LDEQ) submitted a redesignation request and maintenance plan for the New Orleans CMSA on April 23, 1993. The EPA deemed this request complete on September 10, 1993. Several approvability issues existed, however. The LDEQ addressed these approvability issues in a supplemental ozone redesignation request and revised maintenance plan. This supplemental submittal was received on October 14, 1994. The redesignation request and maintenance plans meet the redesignation requirements in section 107(d)(3)(E) of the Act as amended in 1990. The redesignation meets the Federal requirements of section 182(a)(1) of the Clean Air Act as a revision to the Louisiana ozone State Implementation Plan for Jefferson, Orleans, St. Bernard, and St. Charles Parishes. The EPA therefore approved the request for redesignation to attainment with respect to ozone for 7 Jefferson, Orleans, St. Bernard, and St. Charles Parishes on December 1, 1995.

(d) *Approval.*—The Louisiana Department of Environmental Quality submitted a redesignation request and

maintenance plan for Pointe Coupee Parish on December 20, 1995. The redesignation request and maintenance plan meet the redesignation requirements in section 107(d)(3)(E) of the Act as amended in 1990. The redesignation meets the Federal requirements of section 182(a)(1) of the Clean Air Act as a revision to the Louisiana ozone State Implementation Plan for Pointe Coupee Parish. The EPA therefore approved the request for redesignation to attainment with respect to ozone for Pointe Coupee Parish on December 20, 1996.

(e) *Approval*—The Louisiana Department of Environmental Quality submitted a redesignation request and maintenance plan for Calcasieu Parish on December 20, 1995. The redesignation request and maintenance plan meet the redesignation requirements in section 107(d)(3)(E) of the Act. The redesignation meets the Federal requirements of section 182(a)(1) of the Act as a revision to the Louisiana ozone State Implementation Plan for Calcasieu Parish. The EPA therefore approved the request for redesignation to attainment with respect to ozone for Calcasieu Parish on June 2, 1997.

(f) *Approval*—The Louisiana Department of Environmental Quality (LDEQ) submitted minimal maintenance plans for Lafourche Parish on November 18, 1994. The LDEQ submitted a redesignation request on August 9, 2000. The maintenance plans meet the redesignation requirements in section 107(d)(3)(E) of the Act as amended in 1990. The redesignation meets the Federal requirements of section 182(a)(1) of the Clean Air Act as a revision to the Louisiana ozone State Implementation Plan for Lafourche Parish.

(g) *Approval*—The Louisiana Department of Environmental Quality (LDEQ) submitted to the EPA a request on December 4, 2000, to revise the Louisiana SIP for Beauregard, St. Mary, Lafayette, and Grant Parishes and the New Orleans Consolidated Metropolitan Statistical Area ozone maintenance area. The revision involves changes to the approved contingency plans. The contingency measures and the schedule for implementation satisfy the requirements of section 175A(d)

of the Act. The EPA therefore approved this request on June 20, 2003.

(h) *Approval*. The Louisiana Department of Environmental Quality (LDEQ) submitted 8-hour ozone maintenance plans for the areas of Beauregard, Grant, and St. Mary Parishes on August 23, 2006, August 23, 2006, and October 10, 2006, respectively. The three areas are designated unclassifiable/attainment for the 8-hour ozone standard. EPA determined these requests for Beauregard, Grant, and St. Mary Parishes were complete on October 9, 2006, October 9, 2006, and November 30, 2006, respectively. The maintenance plans meet the requirements of section 110(a)(1) of the Clean Air Act, and are consistent with EPA's maintenance plan guidance document dated May 20, 2005. The EPA therefore approved the 8-hour ozone maintenance plans for the areas of Beauregard, Grant, and St. Mary parishes on November 6, 2007.

(i) *Approval*. The Louisiana Department of Environmental Quality (LDEQ) submitted 8-hour ozone maintenance plans for the Lafayette and Lafourche Parish areas on October 13, 2006 and December 19, 2006, respectively. The two areas are designated unclassifiable/attainment for the 8-hour ozone standard. EPA determined these requests for Lafayette and Lafourche Parishes were complete on November 30, 2006 and May 2, 2007, respectively. These maintenance plans meet the requirements of section 110(a)(1) of the Clean Air Act, and are consistent with EPA's maintenance plan guidance document dated May 20, 2005. The EPA therefore approved the 8-hour ozone maintenance plans for the Lafayette and Lafourche Parish areas on March 24, 2008.

(j) *Approval*. The Louisiana Department of Environmental Quality (LDEQ) submitted 1997 8-hour ozone NAAQS maintenance plans for the areas of Calcasieu and St. James Parishes on July 20, 2007, and August 24, 2007, respectively. The two areas are designated unclassifiable/attainment for the 1997 8-hour ozone standard. EPA determined these requests for Calcasieu and St. James Parishes were

complete on October 5, 2007, and October 16, 2007, respectively. The maintenance plans meet the requirements of section 110(a)(1) of the Clean Air Act, and are consistent with EPA's maintenance plan guidance document dated May 20, 2005. The EPA therefore approved the 1997 8-hour ozone NAAQS maintenance plans for the areas of Calcasieu and St. James Parishes on October 9, 2008.

(k) *Approval.* The LDEQ submitted a maintenance plan addressing the 1997 8-hour ozone standard for the New Orleans Ozone Maintenance Area on June 29, 2007. This area is designated unclassifiable/attainment for the 1997 ozone standard. EPA determined this request for the New Orleans Ozone Maintenance Area was complete on August 8, 2007. This maintenance plan meets the requirements of section 110(a)(1) of the CAA, and is consistent with EPA's maintenance plan guidance document dated May 20, 2005. The EPA therefore approved the 1997 8-hour ozone NAAQS maintenance plan for the New Orleans Ozone Maintenance Area including the parishes of Jefferson, Orleans, St. Bernard and St. Charles on September 16, 2008.

(l) *Approval.* The Louisiana Department of Environmental Quality (LDEQ) submitted a 1997 8-hour ozone NAAQS maintenance plan for the area of Pointe Coupee Parish on February 28, 2007. The area is designated unclassifiable/attainment for the 1997 8-hour ozone standard. EPA determined this request for Pointe Coupee Parish was complete on May 2, 2007. The maintenance plan meets the requirements of section 110(a)(1) of the Clean Air Act, and is consistent with EPA's maintenance plan guidance document dated May 20, 2005. The EPA therefore approved the 1997 8-hour ozone NAAQS maintenance plan for the area of Pointe Coupee Parish on May 9, 2013.

[60 FR 43025, Aug. 18, 1995, as amended at 60 FR 47285, Sept. 12, 1995; 60 FR 51360, Oct. 2, 1995; 62 FR 652, Jan. 6, 1997; 62 FR 24038, May 2, 1997; 62 FR 64286, Dec. 5, 1997; 66 FR 66321, Dec. 26, 2001; 68 FR 19375, Apr. 21, 2003; 72 FR 62584, Nov. 6, 2007; 73 FR 15416, Mar. 24, 2008; 73 FR 53378, Sept. 16, 2008; 73 FR 59523, Oct. 9, 2008; 78 FR 27062, May 9, 2013]

§ 52.976 Review of new sources and modification.

(a) Section 6.7 of Regulation 6.0 is disapproved since it could conflict with the preconstruction requirements for the prevention of significant deterioration (PSD) of air quality.

(b) Section 6.9 of Regulation 6.0 is disapproved since it could conflict with the preconstruction requirements for the prevention of significant deterioration (PSD) of air quality and the Administrator's Interpretative on Rule of December 21, 1976.

[44 FR 18491, Mar. 28, 1979, as amended at 47 FR 6017, Feb. 10, 1982]

§ 52.977 Control strategy and regulations: Ozone.

(a) *Determination of Attainment.* Effective March 12, 2010 EPA has determined the Baton Rouge 1-hour ozone nonattainment area has attained the 1-hour ozone National Ambient Air Quality Standard (NAAQS). Under the provisions of EPA's Clean Data Policy, this determination suspends the requirements for this area to submit a severe attainment demonstration, a severe reasonable further progress plan, applicable contingency measures plans, and other planning Louisiana State Implementation Plan (SIP) requirements related to attainment of the 1-hour ozone NAAQS for so long as the area continues to attain the 1-hour ozone NAAQS.

(b) *Determination of Attainment.* Effective October 12, 2010 EPA has determined that the Baton Rouge 8-hour ozone nonattainment area has attained the 1997 8-hour ozone National Ambient Air Quality Standard (NAAQS). Under the provisions of 40 CFR 51.918 this determination suspends the requirements for this area to submit an attainment demonstration, a reasonable further progress plan, applicable contingency measures, and other planning Louisiana State Implementation Plan (SIP) requirements related to attainment of the 1997 8-hour ozone NAAQS for so long as the area continues to attain the 1997 8-hour ozone NAAQS.

(c) *Determination to Terminate the Clean Air Act Section 185 Penalty Fee Requirement.* Effective September 6, 2011 EPA has determined that the

State of Louisiana is no longer required to submit a section 185 fee program State Implementation Plan (SIP) revision for the Baton Rouge ozone nonattainment area to satisfy anti-backsliding requirements for the 1-hour ozone standard. This determination is based on EPA's determination that the area has attained the 1-hour ozone standard due to permanent and enforceable emissions reductions.

(d) Redesignation for the 1997 8-hour Ozone Standard. Effective December 30, 2011, EPA has redesignated the Baton Rouge area to attainment for the 1997 8-hour ozone standard. With this final redesignation to attainment for the 1997 8-hour ozone NAAQS and the final determination of attainment for the 1-hour ozone NAAQS in paragraph (a) of this section, the 1-hour anti-backsliding obligations to submit planning SIPs to meet the attainment demonstration and reasonably available control measures requirements, the rate of progress and contingency measures requirements, and any other outstanding 1-hour requirements, cease to apply.

(e) *Clean Data Determination.* Effective June 16, 2014 EPA has determined that the Baton Rouge, Louisiana, marginal 2008 8-hour ozone nonattainment area is currently attaining the 2008 8-hour NAAQS for ozone.

(f) The EPA has determined that the Baton Rouge Marginal 2008 ozone NAAQS nonattainment area attained the NAAQS by the applicable attainment date of July 20, 2015.

[75 FR 6575, Feb. 10, 2010, as amended at 75 FR 54779, Sept. 9, 2010; 76 FR 39777, July 7, 2011; 76 FR 74002, Nov. 30, 2011; 79 FR 21142, Apr. 15, 2014; 81 FR 26709, May 4, 2016]

§ 52.978 Control strategy and regulations: Sulfur dioxide.

(a) *Determination of failure to attain.* Effective November 4, 2022, the EPA has determined that the St. Bernard Parish nonattainment area failed to attain the 2010 1-hour primary sulfur dioxide (SO₂) national ambient air quality standards (NAAQS) by the applicable attainment date of October 4, 2018. This determination triggers the requirements of CAA section 179(d) for the State of Louisiana to submit a revision to the Louisiana SIP for the St.

Bernard Parish nonattainment area to the EPA by October 5, 2023. The SIP revision must, among other elements, provide for attainment of the 1-hour primary SO₂ NAAQS in the St. Bernard Parish SO₂ nonattainment area as expeditiously as practicable but no later than October 5, 2027.

(b) *Determination of failure to attain.* Effective January 15, 2025, the EPA has determined that the Evangeline Parish nonattainment area failed to attain the 2010 1-hour primary sulfur dioxide (SO₂) national ambient air quality standard (NAAQS) by the applicable statutory attainment date of April 9, 2023. This determination triggers the requirements of CAA section 179(d) for the State of Louisiana to submit a revision to the Louisiana SIP for the Evangeline Parish nonattainment area to the EPA December 16, 2024. The SIP revision must, among other elements, provide for attainment of the 1-hour primary SO₂ NAAQS in the Evangeline Parish SO₂ nonattainment area as expeditiously as practicable but no later than December 16, 2029.

[87 FR 60292, Oct. 5, 2022, as amended at 89 FR 101477, Dec. 16, 2024]

§§ 52.979–52.983 [Reserved]

§ 52.984 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of nitrogen oxides?

(a)(1) The owner and operator of each source located within the State of Louisiana and for which requirements are set forth under the Federal CAIR NO_x Annual Trading Program in subparts AA through II of part 97 of this chapter must comply with such applicable requirements. The obligation to comply with these requirements in part 97 of this chapter will be eliminated by the promulgation of an approval by the Administrator of a revision to the Louisiana State Implementation Plan (SIP) as meeting the requirements of CAIR for PM_{2.5} relating to NO_x under § 51.123 of this chapter, except to the extent the Administrator's approval is partial or conditional or unless such approval is under § 51.123(p) of this chapter.

(2) Notwithstanding any provisions of paragraph (a)(1) of this section, if, at

the time of such approval of the State's SIP, the Administrator has already allocated CAIR NO_x allowances to sources in the State for any years, the provisions of part 97 of this chapter authorizing the Administrator to complete the allocation of CAIR NO_x allowances for those years shall continue to apply, unless the Administrator approves a SIP provision that provides for the allocation of the remaining CAIR NO_x allowances for those years.

(b)(1) The owner and operator of each NO_x source located within the State of Louisiana and for which requirements are set forth under the Federal CAIR NO_x Ozone Season Trading Program in subparts AAAA through IIII of part 97 of this chapter must comply with such applicable requirements. The obligation to comply with these requirements in part 97 of this chapter will be eliminated by the promulgation of an approval by the Administrator of a revision to the Louisiana State Implementation Plan (SIP) as meeting the requirements of CAIR for ozone relating to NO_x under § 51.123 of this chapter, except to the extent the Administrator's approval is partial or conditional or unless such approval is under § 51.123(ee) of this chapter.

(2) Notwithstanding any provisions of paragraph (b)(1) of this section, if, at the time of such approval of the State's SIP, the Administrator has already allocated CAIR NO_x Ozone Season allowances to sources in the State for any years, the provisions of part 97 of this chapter authorizing the Administrator to complete the allocation of CAIR NO_x Ozone Season allowances for those years shall continue to apply, unless the Administrator approves a SIP provision that provides for the allocation of the remaining CAIR NO_x Ozone Season allowances for those years.

(c) Notwithstanding any provisions of paragraphs (a) and (b) of this section and subparts AA through II and AAAA through IIII of part 97 of this chapter to the contrary:

(1) With regard to any control period that begins after December 31, 2014,

(i) The provisions in paragraphs (a) and (b) of this section relating to NO_x annual or ozone season emissions shall not be applicable; and

(ii) The Administrator will not carry out any of the functions set forth for the Administrator in subparts AA through II and AAAA through IIII of part 97 of this chapter;

(2) The Administrator will not deduct for excess emissions any CAIR NO_x allowances or CAIR NO_x Ozone Season allowances allocated for 2015 or any year thereafter;

(3) By March 3, 2015, the Administrator will remove from the CAIR NO_x Allowance Tracking System accounts all CAIR NO_x allowances allocated for a control period in 2015 and any subsequent year, and, thereafter, no holding or surrender of CAIR NO_x allowances will be required with regard to emissions or excess emissions for such control periods; and

(4) By March 3, 2015, the Administrator will remove from the CAIR NO_x Ozone Season Allowance Tracking System accounts all CAIR NO_x Ozone Season allowances allocated for a control period in 2015 and any subsequent year, and, thereafter, no holding or surrender of CAIR NO_x Ozone Season allowances will be required with regard to emissions or excess emissions for such control periods.

(d)(1) The owner and operator of each source and each unit located in the State of Louisiana and Indian country within the borders of the State and for which requirements are set forth under the CSAPR NO_x Ozone Season Group 1 Trading Program in subpart BBBB of part 97 of this chapter must comply with such requirements with regard to emissions occurring in 2015 and 2016.

(2) The owner and operator of each source and each unit located in the State of Louisiana and Indian country within the borders of the State and for which requirements are set forth under the CSAPR NO_x Ozone Season Group 2 Trading Program in subpart EEEEE of part 97 of this chapter must comply with such requirements with regard to emissions occurring in 2017 through 2020.

(3) The owner and operator of each source and each unit located in the State of Louisiana and Indian country within the borders of the State and for which requirements are set forth under the CSAPR NO_x Ozone Season Group 3 Trading Program in subpart GGGGG of

part 97 of this chapter must comply with such requirements with regard to emissions occurring in 2021 and each subsequent year. The obligation to comply with such requirements with regard to sources and units in the State and areas of Indian country within the borders of the State subject to the State's SIP authority will be eliminated by the promulgation of an approval by the Administrator of a revision to Louisiana's State Implementation Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan (FIP) under § 52.38(b)(1) and (b)(2)(iii) for those sources and units, except to the extent the Administrator's approval is partial or conditional. The obligation to comply with such requirements with regard to sources and units located in areas of Indian country within the borders of the State not subject to the State's SIP authority will not be eliminated by the promulgation of an approval by the Administrator of a revision to Louisiana's SIP.

(4) Notwithstanding the provisions of paragraph (d)(3) of this section, if, at the time of the approval of Louisiana's SIP revision described in paragraph (d)(3) of this section, the Administrator has already started recording any allocations of CSAPR NO_x Ozone Season Group 3 allowances under subpart GGGGG of part 97 of this chapter to units in the State and areas of Indian country within the borders of the State subject to the State's SIP authority for a control period in any year, the provisions of subpart GGGGG of part 97 of this chapter authorizing the Administrator to complete the allocation and recordation of CSAPR NO_x Ozone Season Group 3 allowances to such units for each such control period shall continue to apply, unless provided otherwise by such approval of the State's SIP revision.

(5) Notwithstanding the provisions of paragraph (d)(2) of this section, after 2020 the provisions of § 97.826(c) of this chapter (concerning the transfer of CSAPR NO_x Ozone Season Group 2 allowances between certain accounts under common control), the provisions of § 97.826(d) of this chapter (concerning the conversion of amounts of unused CSAPR NO_x Ozone Season Group 2 al-

lowances allocated for control periods before 2021 to different amounts of CSAPR NO_x Ozone Season Group 3 allowances), and the provisions of § 97.811(d) of this chapter (concerning the recall of CSAPR NO_x Ozone Season Group 2 allowances equivalent in quantity and usability to all such allowances allocated to units in the State and Indian country within the borders of the State for control periods after 2020) shall continue to apply.

(6) Notwithstanding any other provision of this part, the effectiveness of paragraph (d)(3) of this section is stayed with regard to emissions occurring in 2023 and thereafter, provided that while such stay remains in effect, the provisions of paragraph (d)(2) of this section shall apply with regard to such emissions.

(e)(1) The owner and operator of each source located in the State of Louisiana and Indian country within the borders of the State and for which requirements are set forth in § 52.40 and § 52.41, § 52.42, § 52.43, § 52.44, § 52.45, or § 52.46 must comply with such requirements with regard to emissions occurring in 2026 and each subsequent year.

(2) Notwithstanding any other provision of this part, the effectiveness of paragraph (e)(1) of this section is stayed.

[72 FR 62348, Nov. 2, 2007, as amended at 76 FR 48366, Aug. 8, 2011; 79 FR 71671, Dec. 3, 2014; 81 FR 74596, Oct. 26, 2016; 83 FR 65924, Dec. 21, 2018; 86 FR 23175, Apr. 30, 2021; 88 FR 36890, June 5, 2023; 88 FR 49303, July 31, 2023]

§ 52.985 Visibility protection.

(a) *Measures addressing best available retrofit technology (BART) for electric generating unit (EGU) emissions of nitrogen oxides (NO_x).* The BART requirements for EGU NO_x emissions are satisfied by § 52.984.

(b) *Other measures addressing BART.* The BART requirements for emissions other than EGU NO_x emissions are satisfied by the Louisiana Regional Haze SIP approved December 21, 2017.

[82 FR 60543, Dec. 21, 2017]

§ 52.986 Significant deterioration of air quality.

(a) The plan submitted by the Governor of Louisiana on August 14, 1984

(as adopted by the Secretary of Louisiana Department of Environmental Quality (LDEQ) on May 23, 1985), July 26, 1988 (as revised and adopted by the LDEQ on May 5, 1988), and October 26, 1990 (as revised and adopted by the LDEQ on July 20, 1990), LAC:33:III: § 509 Prevention of Significant Deterioration (PSD) and its Supplement documents, is approved as meeting the requirements of Part C, Clean Air Act for preventing significant deterioration of air quality.

(b) The requirements of sections 160 through 165 of the Clean Air Act are not met for federally designated Indian lands since the plan (specifically LAC: 33:III:509.A.1) excludes all federally recognized Indian lands from the provisions of this regulation. Therefore, the provisions of § 52.21 except paragraph (a)(1) are hereby incorporated and made a part of the applicable implementation plan, and are applicable to sources located on land under the control of Indian governing bodies.

(c) The revisions to the Louisiana SIP adopted on April 20, 2011, and submitted on December 21, 2011, establishing PSD permitting requirements for sources that are classified as major and thus required to obtain a PSD permit based solely on their potential GHG emissions (“Step 2” sources) at the definition of “major stationary source” paragraph (c) and the definition of “significant” at LAC 33:III.509(B), are disapproved as inconsistent with federal law for the regulation and permitting of GHGs.

[56 FR 20139, May 2, 1991, as amended at 68 FR 11323, Mar. 10, 2003; 68 FR 74489, Dec. 24, 2003; 75 FR 82555, Dec. 30, 2010; 81 FR 46608, July 18, 2016]

§ 52.987 Control of hydrocarbon emissions.

(a) Notwithstanding any provisions to the contrary in the Louisiana Implementation Plan, the control measures listed in paragraphs (b) through (n) of this section shall be implemented in accordance with the schedule set forth below.

(b) Removal from service of a 10,000 barrel capacity crude oil storage tank at the Belcher Station of the Exxon Pipeline Company, Belcher, Louisiana, with a final compliance date of January

1, 1980. This shall result in an estimated hydrocarbon emission reduction of at least 208 tons per year.

(c) Removal from service of a 55,000 barrel capacity crude oil storage tank at the Weller Station of the Exxon Pipeline Company, near Minden, Louisiana, with a final compliance date of January 1, 1980. This shall result in an estimated hydrocarbon emission reduction of at least 263 tons per year.

(d) Installation of emission control systems on three 3,000 barrel capacity distillate storage tanks, at the Jones O'Brien Inc., Keatchie, Louisiana, with a final compliance date of January 1, 1978. This shall result in an estimated hydrocarbon emission reduction of at least 23 tons per year.

(e) Installation of emission control systems on crude oil storage tanks TK-43, TK-44, T-45 and T-49, and distillate tanks T-46 and T-50 at the Atlas Processing Company, Shreveport, Louisiana with a final compliance date of January 2, 1980. This shall result in an estimated hydrocarbon emission reduction of at least 881 tons per year.

(f) Installation of emission control systems on crude oil storage tanks TK-19-74, TK-HC-74, TK-571-74 and TK-15-74 and agreement to store only non-volatile organic solvent in tanks TK-F2-74, TK-41-74 and TK-40-74 at the Cotton Valley Solvents Company, Cotton Valley, Louisiana with a final compliance date of January 2, 1980. This shall result in an estimated hydrocarbon emission reduction of at least 934 tons per year.

(g) Discontinue use of residue gas in pneumatic instrumentation and control systems at the Kerr-McGee Corporation, Devon Corporation, and Eason Oil Company, Calhoun Plant, Calhoun, Louisiana with a final compliance date of July 1, 1978. This shall result in an estimated hydrocarbon emission reduction of at least 21 tons per year.

(h) Discontinue use of residue gas in pneumatic instrumentation and control systems with a final compliance date of July 1, 1978, and install emission control systems on distillate storage tanks 2-7 and 2-13 with a final compliance date of January 2, 1980, at the Kerr-McGee Corp., Devon Corp., and Eason Oil Co., Dubach Plant, Dubach,

§ 52.988

Louisiana. This shall result in an estimated hydrocarbon reduction of at least 367 tons per year.

(i) Installation of emission control systems on a 37,500 barrel capacity crude oil storage tank at Cities Service Pipeline Company, Oil City, Louisiana with a final compliance date of February 1, 1980. This shall result in an estimated hydrocarbon emission reduction of at least 208 tons per year.

(j) Installation of emission control systems on a 25,000 barrel capacity crude oil storage tank at Cities Service Pipeline Company, Haynesville, Louisiana with a final compliance date of February 1, 1980. This shall result in an estimated hydrocarbon emission reduction of at least 28 tons per year.

(k) Installation of emission control systems on a 10,000 barrel capacity crude oil storage tank at Cities Service Pipeline Company, Summerfield, Louisiana with final compliance achieved in August 1977. This shall result in an estimated hydrocarbon emission reduction of at least 162 tons per year.

(l) Installation of emission control systems on a 30,000 barrel capacity crude oil storage tank at the Scurlock Oil Company, Lake End, Louisiana, with a final compliance date of January 15, 1980. This shall result in an estimated hydrocarbon emission reduction of at least 90 tons per year.

(m) Installation of emission control systems on a 55,000 barrel capacity crude oil storage tank at the Scurlock Oil Company, Dutchtown Oil Field near Minden, Louisiana, with a final compliance date of January 15, 1980. This shall result in an estimated hydrocarbon emission reduction of at least 186 tons per year.

(n) Installation of emission control systems on distillate storage tank No. 414 with a final compliance date of September 1, 1979, and the removal from service of tank No. 450 with final compliance achieved on December 1, 1977, at the Texas Eastern Products Pipeline Company, Sarepta, Louisiana. This shall result in an estimated hydrocarbon emission reduction of at least 355 tons per year.

[44 FR 15705, Mar. 15, 1979]

40 CFR Ch. I (7–1–25 Edition)

§ 52.988 [Reserved]

§ 52.990 Stack height regulations.

The State of Louisiana has committed to submit to EPA a SIP revision whenever a new or revised emission limitation for a specific source exceeds the height allowed by Section 921(A) “Good Engineering Practice (GEP) Stack Height 1 or 2” of the State regulations. A letter from the Secretary of Louisiana Department of Environmental Quality, dated September 23, 1986, stated that:

In specific, the State regulation, Section 17.14.2 [now LAC 33: Part III, Section 921(B)], provides that the degree of emission limitation required of any source for control of any air pollutant must not be affected by so much of any source’s stack height that exceeds good engineering practice or by any other dispersion technique. In reference to this requirement, the Louisiana Department of Environmental Quality or the Administrative Authority will submit to EPA a SIP revision whenever the Louisiana Department of Environmental Quality adopts a new or revised emission limitation for a specific source that is based on a stack height that exceeds the height allowed by Section 17.14.1(e)(1) [now LAC 33: Part III, Section 921(A) “Good Engineering Practice (GEP) Stack Height 1”] or Section 17.14.1(e)(2) [now LAC 33: Part III, Section 921(A) “Good Engineering Practice (GEP) Stack Height 2”].

[53 FR 36010, Sept. 16, 1988]

§ 52.991 Small business assistance program.

The Governor of Louisiana submitted on October 22, 1992, a plan revision to develop and implement a Small Business Stationary Source Technical and Environmental Compliance Assistance Program to meet the requirements of section 507 of the Clean Air Act by November 15, 1994. The plan commits to provide technical and compliance assistance to small businesses, hire an Ombudsman to serve as an independent advocate for small businesses, and establish a Compliance Advisory Panel to advise the program and report to EPA on the program’s effectiveness.

[59 FR 32360, June 23, 1994]

§ 52.992 Area-wide nitrogen oxides exemptions.

(a) The Louisiana Department of Environmental Quality submitted to the

EPA on August 5, 1994, a petition requesting that the nonclassifiable ozone nonattainment areas in the State of Louisiana be exempted from the requirement to meet the NO_x provisions of the Federal transportation conformity rule. The exemption request was based on monitoring data which demonstrated that the National Ambient Air Quality Standard for ozone had been attained in this area for the 3 years prior to the petition. The parishes for which the NO_x exemption was requested include: Beauregard, Grant, Lafayette, Lafourche, Jefferson, Orleans, St. Bernard, St. Charles, St. James, and St. Mary. The EPA approved this exemption request on March 2, 1995.

(b) The LDEQ submitted to the EPA on November 17, 1994, a petition requesting that the Baton Rouge serious ozone nonattainment area be exempted from the NO_x control requirements of the CAA. In addition, supplemental information was submitted to the EPA by the LDEQ on January 26, 1995, June 6, 1995, and June 16, 1995. The Baton Rouge nonattainment area consists of East Baton Rouge, West Baton Rouge, Pointe Coupee, Livingston, Iberville, and Ascension Parishes. The exemption request was based on photochemical grid modeling which shows that reductions in NO_x would not contribute to attainment in the nonattainment area. On January 18, 1996, the EPA approved the State's request for an areawide exemption from the following requirements: NO_x new source review, NO_x reasonably available control technology, NO_x general conformity, and NO_x inspection and maintenance requirements.

(c) The LDEQ submitted to the EPA on July 25, 1995, a revision to the SIP, pursuant to section 182(b)(1), requesting that the Baton Rouge serious ozone nonattainment area be exempted from the transportation conformity NO_x requirements of the CAA. The Baton Rouge nonattainment area consists of East Baton Rouge, West Baton Rouge, Pointe Coupee, Livingston, Iberville, and Ascension Parishes. The exemption request was based on photochemical grid modeling which shows that additional reductions in NO_x would not contribute to attainment in the non-

attainment area. On February 12, 1996, the EPA approved the State's request for an areawide exemption from the transportation conformity NO_x requirements.

(d) The LDEQ submitted to the EPA on October 28, 1994, a petition requesting that the Lake Charles marginal ozone nonattainment area be exempted from the NO_x control requirements of the Act. The Lake Charles nonattainment area consists of Calcasieu Parish. The exemption request was based on photochemical grid modeling which shows that reductions in NO_x would not contribute to attainment in the nonattainment area. On May 27, 1997, the EPA approved the State's request for an area-wide exemption from the following requirements: NO_x new source review, NO_x general conformity, and NO_x transportation conformity requirements. The waiver was granted on the basis of modeling, and ambient air quality data demonstrating the area has attained the ozone NAAQS.

(e) On September 24, 2001, and on December 31, 2001, the LDEQ requested that EPA rescind the Baton Rouge section 182(f) and 182(b)(1) NO_x exemptions that were approved by EPA, and published in the FEDERAL REGISTER on January 26, 1996 (61 FR 2438), and February 27, 1996 (61 FR 7218). The State based its request on photochemical grid modeling recently performed for the Baton Rouge State Implementation Plan (SIP) which indicates that controlling NO_x sources will assist in bringing the Baton Rouge area into attainment with the National Ambient Air Quality Standard (NAAQS) for ozone. On May 7, 2002, EPA proposed approval of the State's request to rescind both NO_x exemptions. Based on our review of the State's request and the supporting photochemical grid modeling the NO_x exemptions are rescinded on May 5, 2003.

[60 FR 5864, Jan. 31, 1995, as amended at 61 FR 2446, Jan. 26, 1996; 61 FR 7221, Feb. 27, 1996; 62 FR 29078, May 29, 1997; 68 FR 23604, May 5, 2003]

§ 52.993 Emissions inventories.

(a) The Governor of the State of Louisiana submitted the 1990 base year emission inventories for the Baton Rouge (BTR) and Calcasieu Parish

(CAL) ozone nonattainment areas on November 16, 1992 as a revision to the State Implementation Plan (SIP). The 1990 base year emission inventory requirement of section 182(a)(1) of the Clean Air Act, as amended in 1990, has been satisfied for each of these areas.

(b) The inventories are for the ozone precursors which are volatile organic compounds, nitrogen oxides, and carbon monoxide. The inventories cover point, area, non-road mobile, on-road mobile, and biogenic sources.

(c) The BTR nonattainment area is classified as Serious and includes Ascension, East Baton Rouge, Iberville, Livingston, Point Coupee, and West Baton Rouge Parishes; the CAL nonattainment area is classified as Marginal and includes Calcasieu Parish.

(d) On December 15, 1995, the Governor of the State of Louisiana submitted a revision to the 1990 base year volatile organic compound (VOC) emissions inventory for the Baton Rouge, Louisiana ozone nonattainment area. The revised inventory was submitted as part of the revised Baton Rouge 15 Percent Rate-of-Progress Plan. This revision to the base year inventory modified the point source VOC emissions. The revisions satisfy the requirements of section 182(a)(1) of the Clean Air Act, as amended in 1990.

(e) On January 2, 1997, the Governor of the State of Louisiana submitted a revision to the 1990 base year volatile organic compound (VOC) emissions inventory for the Baton Rouge, Louisiana ozone nonattainment area. The revised inventory was submitted as part of the revised Baton Rouge Post-1996 Rate-of-Progress Plan. This revision to the base year inventory modified the point, area, non-road mobile, on-road mobile, and biogenic sources of VOC emissions. The revisions satisfy the requirements of section 182(a)(1) of the Clean Air Act, as amended in 1990.

[60 FR 13911, Mar. 15, 1995, as amended at 64 FR 35941, July 2, 1999]

§ 52.994 [Reserved]

§ 52.995 Enhanced ambient air quality monitoring.

(a) The Governor of the State of Louisiana submitted the photochemical assessment monitoring stations (PAMS)

State Implementation Plan (SIP) revision for the Baton Rouge ozone nonattainment area on September 10, 1993. This SIP submittal satisfies 40 CFR 58.20(f), which requires the State to provide for the establishment and maintenance of PAMS.

(b) The Baton Rouge ozone nonattainment area is classified as Serious and includes Ascension, East Baton Rouge, Iberville, Livingston, Pointe Coupee, and West Baton Rouge Parishes.

[61 FR 31037, June 19, 1996]

§ 52.996 Disapprovals.

(a) The portion of the SIP submitted on June 4, 2013 addressing Clean Air Act section 110(a)(2)(D)(i)(I) for the 2008 ozone NAAQS is disapproved.

(b) The SIP submittal from November 13, 2019, addressing Clean Air Act section 110(a)(2)(D)(i)(I) for the 2015 ozone NAAQS is disapproved.

[81 FR 53309, Aug. 12, 2016, as amended at 81 FR 68334, Oct. 4, 2016; 86 FR 24716, May 10, 2021; 88 FR 9382, Feb. 13, 2023]

§ 52.999 Original identification of plan section.

(a) This section identifies the original “The Louisiana Air Control Commission Implementation Plan” and all revisions submitted by Louisiana that were federally approved prior to July 1, 1998.

(b) The plan was officially submitted on January 28, 1972.

(c) The plan revisions listed below were submitted on the dates specified.

(1) Certification that public hearings were held on the State’s implementation plan was submitted on February 28, 1972. (Non-regulatory)

(2) Response to comments by Region VI on the plan was transmitted by the Louisiana Air Control Commission on May 8, 1972. (Non-regulatory)

(3) Revisions to Louisiana Air Control Regulations 6, 8, 18, 19, 22, A22, 27, 28, control strategy for photochemical oxidants-hydrocarbons, prevention of air pollution emergency episodes, source surveillance, and procedures for submission and approval and compliance schedules were submitted by the Governor on July 17, 1972.

(4) Revisions concerning the control strategy for photochemical oxidants

Environmental Protection Agency

§ 52.999

and hydrocarbon for Region 106 was submitted by the Governor on March 30, 1973. (Regulatory)

(5) Revision of Section 6.1 of the State air control regulations was submitted by the Governor on April 25, 1973.

(6) A revision concerning the control strategy for particulate matter for the Southern Louisiana-Southeast Texas AQCR was submitted by the Governor on January 2, 1973.

(7) Variances to Emission Limiting Regulations adopted by the Louisiana Air Control Commission on October 29, 1975, December 12, 1975, and April 6, 1976, and submitted by the Governor on April 22, 1976.

(8) Commission Orders creditable as emission offsets for the GM Plant in Shreveport were submitted by the Governor on January 25, 1978 as amendments to the Louisiana State Implementation Plan.

(9) A proposed dedesignation of the Shreveport area as an AQMA for particulate matter was submitted by the Governor on December 9, 1977.

(10) An administrative revision of the Air Quality Surveillance Network was submitted by the Louisiana Air Control Commission on April 3, 1978. (Non regulatory)

(11) Revisions to Regulation 19.0, Emission Standards for Particulate Matter, as adopted on November 30, 1977, were submitted by the Governor on December 9, 1977.

(12) Minor changes and administrative revisions to regulations 2.0, 3.0, 4.0, 5.0, 6.0, 7.0, 8.0, 9.0, 10.0, 11.0, 12.0, 13.0, 14.0, 15.0, 16.0, and 17.0 of the Louisiana SIP were submitted by the Governor on December 9, 1977.

(13) A variance to Regulation 19.5 for Kaiser Aluminum & Chemical Corporation at Norco, Louisiana was submitted by the Governor on August 31, 1978.

(14) Revisions to the Air Control Regulations 18.1, 18.3, 18.5, 18.6-18.6.2, 18.7, 20.1-20.8, 21.1-21.6.4, 23.0-23.4.2, 24.1-24.5, 24.6.2, 24.7-24.7.3, 24.8, 25.0-25.6.2, 26.0-26.2, 26.4-26.8.2, 27.0-27.5.4, 28.0-28.6.2 and 30.0, as adopted by the Louisiana Air Control Commission on November 30, 1977, were submitted by the Governor on December 9, 1977.

(15) Revisions to the plan for attainment of standards for ozone (Part D re-

quirements) were submitted by the Governor on April 30, 1979.

(16) Evidence of notice and public hearing for the April 30, 1979 plan was submitted by the Governor on June 20, 1979.

(17) Emission inventory information, emission reduction information, a certification of the lack of major degreasing sources, and a commitment to adopt future regulations were submitted by the Louisiana Air Control Commission on August 28, 1979 (non-regulatory).

(18) Schedule for the modification and submittal of regulations 22.6 and regulation 6.3.8 were submitted by the Louisiana Air Control Commission on October 11, 1979 (non-regulatory).

(19) Regulations 22.17 and 22.18, adopted by the Louisiana Air Control Commission on September 25, 1979 were submitted by the Governor on October 18, 1979.

(20) On January 10, 1980, the Governor submitted final revisions to the ambient monitoring portion of the plan.

(21) Revised Regulation 22.8(c) was submitted by the Governor on June 20, 1979. This regulation was adopted by the Louisiana Air Control Commission on March 27, 1979.

(22) Revised Regulation 22.5 was submitted by the Governor on April 30, 1979. This regulation was adopted by the Louisiana Air Control Commission on March 27, 1979. A second revision to Regulation 22.5 was submitted by the Governor on July 7, 1979, as adopted by the Louisiana Air Control Commission on June 26, 1979.

(23) Revised Regulations 6.3.8, 22.3, 22.6.1, 22.6.2, 22.10, and 22.12.4 were submitted by the Governor on December 10, 1979. These regulations were adopted by the Louisiana Air Control Commission on November 27, 1979. A second revision to Regulation 6.3.8 was submitted by the Governor on October 23, 1980. The second revision was adopted by the Louisiana Air Control Commission on September 25, 1980.

(24) Revisions to the Air Control Regulations 24.6.1 and 24.7.4, as adopted by the Louisiana Environmental Control Commission on March 27, 1979, were submitted by the Governor on April 30, 1979.

(25) Revised Regulations 22.9.2, 22.9.3(b), 22.19, 22.20, 22.21, 22.22 and 22.23 and revised Regulation 4.0 (i.e. sections 4.99 through 4.116) were adopted by the State on November 27, 1979 and submitted by the Governor on December 10, 1979; and revised Regulations 22.3 and 22.20.2 were adopted by the State on July 22, 1980 and submitted by the Governor on September 12, 1980.

(26) Revised Regulations 22.9.3(b), 22.20.3, and 22.23.7 were adopted by the State on December 11, 1980 and submitted by the Governor on January 12, 1981; revised Regulation 22.21.2(E) was adopted by the State on April 23, 1981 and submitted by the Governor on June 3, 1981; and, revised Regulation 22.19.2(B) was adopted by the State on June 25, 1981 and submitted by the Governor on July 22, 1981.

(27) Revisions to the Air Control Regulations 6.1.1, 18.2, 18.4, 18.6.3, 19.5.1, 24.9.1, 24.9.2, 26.3.1, 26.3.2 and 51.11, as adopted by the Louisiana Environmental Control Commission on September 25, 1980, were submitted by the Governor on October 23, 1980.

(28) Revisions to the plan for permit fee systems, interstate pollution abatement, public availability of emission data, maintenance of pay, permit public comment, and public notification of exceedances of the primary national ambient air quality standards (NAAQS), were submitted by the Governor on April 30, 1979. In addition, revised submittals for permit fee schedules were submitted on July 7, 1979; September 12, 1980; October 23, 1980; and January 12, 1981. The September 12, 1980 letter also included a new § 51.285 (a), (b) and (c). Finally, the State sent a notification letter on August 7, 1979, which corrected a typographical error in the maintenance of pay revision.

(29) A revision to the Air Control Regulations 22.9.3(d) as adopted by the Louisiana Air Control Commission on December 11, 1980, was submitted by the Governor on January 12, 1981.

(30) Revisions to the Air Control Regulations 8.5.1, 22.3.1.1, 22.3.1.2, and 22.10, as adopted by the Louisiana Air Control Commission on April 23, 1981, were submitted by the Governor on June 3, 1981.

(31) A revision to the Air Control Regulation 22.9.3(a), as adopted by the

Louisiana Air Control Commission on May 28, 1981, was submitted by the Governor on June 3, 1981.

(32) A revision to the Air Control Regulation 22.3.2, as adopted by the Louisiana Air Control Commission on July 23, 1981, was submitted by the Governor on August 17, 1981.

(33) The Louisiana State Implementation Plan for lead and Regulations for—the Control of Air Pollution from lead, 10.0–10.3 and 19A.0, were submitted to EPA on July 27, 1979, by the Governor of Louisiana as adopted by the Louisiana Air Control Commission on July 24, 1979. Letters of Clarification dated January 6, 1982, April 1, 1982 and May 4, 1982 also were submitted. No action is taken on the Baton Rouge area.

(34) Section 6.1 of Regulation 6.0 amended and adopted by the Louisiana Environmental Control Commission on October 22, 1981, was submitted by the Governor on November 30, 1981.

(35) Revisions to the Air Control Regulations 4.102, 4.110, 22.20.2 and 22.21.2(D), as adopted by the Louisiana Environmental Control Commission on December 11, 1980, were submitted by the Governor on January 12, 1981.

(36) [Reserved]

(37) Revisions to the Air Control Regulations 4.14, 4.36, 6.6, 22.3.1.1, and 22.3.1.2, as adopted by the Louisiana Environmental Control Commission on February 26, 1981, were submitted by the Governor on March 25, 1981.

(38) Revisions to the Air Control Regulations 17.13, 23.4.1.1 and 23.4.4, as adopted by the Louisiana Environmental Control Commission on January 28, 1982, were submitted by the Governor on February 15, 1982.

(39) A revision to section 2210 of the Louisiana Air Control Law was submitted to EPA on March 10, 1982. The Section was renamed Section 1077 of the Environmental Affairs Act, by the Louisiana Legislature, and was effective January 1, 1980.

(40) The Louisiana State Implementation Plan for lead for the Baton Rouge area was submitted on July 27, 1979, with letters of clarification and revisions dated January 4, 1983, September 15, 1983, September 30, 1983. The final lead control plan was submitted in a letter dated October 31, 1983, as

Environmental Protection Agency

§ 52.999

adopted by the Louisiana Air Control Commission on October 20, 1983.

(41) Revisions to sections 2.3, 3.1, 3.4, and 4.1 of the Rules and Regulations for the Fee System of the Air Quality Control Program, as adopted by the Louisiana Environmental Control Commission on January 26, 1983, were submitted by the Louisiana Department of Natural Resources (now the Department of Environmental Quality), Air Quality Division, on November 17, 1983.

(42) Deletion of Air Control Regulation 14.0, and deletion of hydrocarbon guideline standard from Table 1, 1a, and 2, as adopted by the Louisiana Environmental Control Commission on July 28, 1983, was submitted by the Governor on October 19, 1983.

(43) Revisions to the Air Control Regulation 22.22 as adopted by the Louisiana Environmental Control Commission on September 23, 1982, and submitted by the Governor on July 14, 1983.

(i) *Incorporation by reference.* (A) Regulation 22.22.1(A) and 22.22.2(A) Letter dated July 14, 1983, from the State of Louisiana and which change the reference for the test methods from a CTG document to the Louisiana Air Quality Regulations Division's Source Test Manual. These regulations were adopted on September 23, 1982.

(44) On October 4, 1985, the Governor submitted a revision entitled, "Protection of Visibility for Mandatory Class I Federal Areas," July 12, 1985. This submittal included new source review and visibility monitoring strategy as adopted by the Secretary of the Louisiana Department of Environmental Quality in October 1985.

(45) On August 14, 1985, the Governor of Louisiana submitted a Prevention of Significant Deterioration (PSD) Plan including Air Quality Regulations—Part V, (sections 90.1–90.19) as adopted by the Secretary of the Department of Environmental Quality on May 23, 1985. Air Quality Regulations—Part V provides authority for the State to implement the PSD program in certain areas of the State. Letters of commitment for air quality modeling (dated September 30, 1985) and Federal stack height and dispersion technique regulation (dated June 3, 1986) were sub-

mitted by the Secretary of Louisiana Department of Environmental Quality.

(i) *Incorporation by reference.* (A) Louisiana Air Quality Regulations—Part V, Prevention of Significant Deterioration of Air Quality, except that no provision of this part applies to Indian Reservations meaning any Federally recognized reservation established by Treaty, Agreement, Executive Order, or Act of Congress, as adopted on May 23, 1985.

(B) A letter from the Secretary of Louisiana Department of Environmental Quality dated September 30, 1985, which commits the Department to use only the EPA approved air quality models in accordance with the provisions of 40 CFR 51.24(1) [now 40 CFR 51.166(1)] and to submit a stack height and dispersion techniques SIP revision by April 8, 1986.

(C) A letter from the Secretary of Louisiana Department of Environmental Quality dated June 3, 1986, which certifies that the Department interprets the provisions of section 90.8 of Louisiana PSD regulations as having the same meaning as the Federal stack height and dispersion technique regulation, 40 CFR 51.1(hh)-(kk) [now 40 CFR 51.100(hh)-(kk)], promulgated by EPA in the FEDERAL REGISTER of July 8, 1985, and that the State will apply, implement, and enforce these requirements in the PSD permitting process.

(D) A narrative explanation and additional requirements entitled "Prevention of Significant Deterioration Revisions to the Louisiana State Implementation Plan".

(46) On January 6, 1988, the Governor of Louisiana submitted a revision to the State Implementation Plan (SIP) that contained Air Quality Regulations, LAC 33: Part III, Section 921, Stack Heights, as adopted by the Secretary of the Department of Environmental Quality on December 20, 1987. Section 921, Stack Heights, enables the State to ensure that the degree of emission limitation required for the control of any air pollutant under its SIP is not affected by that portion of any stack height which exceeds GEP or by any other dispersion technique.

(i) *Incorporation by reference.* (A) Louisiana Air Quality Regulations—LAC 33: Part III, Section 921, Stack Heights,

as adopted by the Secretary of the Department of Environmental Quality on December 20, 1987.

(ii) Other material—none.

(47) A revision exempting four rural carbon black plants—Ashland Chemical, Louisa, LA; Cabot Corporation, Centerville, LA; Cabot Corporation, Ville Platte, LA; and Columbian Chemicals, Franklin, LA—from further controls on acetylene emissions as required under Louisiana Air Quality Regulation 22.8 received from the Governor on January 12, 1987, and amended May 13, 1987.

(i) *Incorporation by reference.* (A) A letter dated May 29, 1987, from Martha Madden, Secretary, Louisiana Department of Environmental Quality, to the Governor of Louisiana approving the exemptions from further controls on acetylene emissions for the four rural carbon black plants and ordering each facility to maintain its emissions at or below the levels specified in the attached summary of emissions.

(ii) *Additional material.* (A) A summary of VOC emissions for each of the four rural carbon black plants exempted from further controls on acetylene emissions under Louisiana Air Quality Regulation 22.8.

(48) Part II of the Visibility Protection Plan was submitted by the Governor on October 26, 1987.

(i) *Incorporation by reference.* (A) Revision entitled, “Louisiana State Implementation Plan Revision: Protection of Visibility: Proposed Part II Long-Term Strategy, October 26, 1987”. This submittal includes a visibility long-term strategy and general plan provisions as approved and adopted by the Secretary of the Louisiana Department of Environmental Quality on October 26, 1987.

(B) Letter dated October 26, 1987, from Secretary of Louisiana Department of Environmental Quality (LDEQ), to the Governor approving the SIP revision.

(ii) *Additional material.* (A) Letter dated June 16, 1988, from Administrator, Air Quality Division, LDEQ, to Chief, SIP/New Source Section (6T-AN), EPA Region 6, committing to make its three-year periodic review report available to the public as well as to EPA.

(49) The recodified and revised regulations of the Louisiana Administrative Code, Title 33, Part 3 (LAC:33:III) that were adopted by the State effective December 20, 1987, and submitted by the Governor by letters dated January 6, 1988, and October 4, 1988, for inclusion in the SIP. These regulations include LAC:33:III: Chapters 1, 5, 7, 9, 11, 13, 15, 17, 23, 56, 60, 63, and 65, except LAC:33:III:111 “Particulate matter,” and “Suspended particulate matter,” LAC:33:III:505.J, and LAC:33:III:505.L, which were previously disapproved, and LAC:33:III:6099, which was withdrawn by the Governor.

(i) *Incorporation by reference.* (A) Louisiana Administrative Code, Title 33, Part 3, Chapters 1, 5, 7, 9, 11, 13, 15, 17, 23, 56, 60, 63, and 65 as adopted by Louisiana Department of Environmental Quality on December 20, 1987, except LAC:33:III: section 111 “Particulate matter,” “Suspended particulate matter,” section 505.J, section 505.L, and section 6099.

(ii) *Additional material.* (A) A letter dated December 16, 1987, from Martha Madden, Secretary of the Louisiana Department of Environmental Quality, to the Governor of Louisiana, approving the codified air quality regulations effective December 20, 1987.

(50) The Louisiana State Implementation Plan for PM₁₀ as submitted by the Governor in a letter dated July 26, 1988, and adopted by the State effective June 20, 1988.

(i) *Incorporation by reference.* (A) Revisions to the Louisiana Administrative Code, Title 33, Chapter III, Sections 111, 509.B, 509.I.8.a, 709, 1301.B, 1303.A, 1305.A., 1311.B, 1311.C, 1313.C, 1315, 1319.G, 5609.A.1, 5609.A.2, 5609.A.3, and Tables 1, 1a, and 2 of chapter 7 as adopted effective June 20, 1988.

(B) A letter dated May 22, 1989, from Mike D. McDaniel, Louisiana Department of Environmental Quality, to William B. Hathaway, U.S. Environmental Protection Agency.

(ii) *Additional material.* (A) A letter dated July 26, 1988, from Paul H. Templet, Secretary, Louisiana Department of Environmental Quality, to the Governor of Louisiana approving the adoption of amendments to the Louisiana Air Quality Regulations to implement

Environmental Protection Agency

§ 52.999

the new PM₁₀ standard effective June 20, 1988.

(B) A narrative supplement to the Louisiana PM₁₀ submitted by the Governor in a letter dated July 26, 1988.

(51) Revision to the Louisiana Lead State Implementation Plan (SIP) submitted by the Governor in a letter dated July 18, 1986.

(i) *Incorporation by reference.* (A) An amended Compliance Order dated January 31, 1986, issued by the Secretary of the State of Louisiana Department of Environmental Quality in the matter of Ethyl Corporation, Baton Rouge, Louisiana.

(ii) *Additional material.* (A) Computer modeling submitted by letter dated May 27, 1988, from Doug Walters, Louisiana Department of Environmental Quality, to Joe Winkler, U.S. Environmental Protection Agency.

(B) Explanatory letter dated January 27, 1989, from Gustave Von Bodungen, Louisiana Department of Environmental Quality, to Gerald Fontenot, U.S. Environmental Protection Agency.

(52) On October 31, 1983, the Governor submitted a request to revise the Louisiana SIP to include an Alternative Emission Reduction Plan for the Vulcan Materials Company facility located at Geismar, Ascension Parish. A permit was issued by LDEQ on March 24, 1983 (#1829T), but after several revisions, the final permit for the trade is #1829T (M-2), issued July 28, 1989. This Bubble uses credits obtained from installation of a vapor recovery system on a tank farm of five VOC storage tanks in lieu of controls on one process vent and one VOC storage tank.

(i) *Incorporation by reference.* (A) LDEQ Permit number 1829T (M-2), Revision of Bubble Permit—Vulcan Chemicals Company, Geismar, Ascension Parish, Louisiana, issued July 28, 1989.

(ii) *Additional material.* (A) Letter dated June 28, 1989, from the Administrator of the Louisiana Office of Air Quality, giving assurances that the State has resources and plans necessary to strive toward attainment and maintenance of the NAAQS for ozone taking into account the influence of this Bubble on air quality.

(53) On May 5, 1986, the Governor submitted a request to revise the Louisiana SIP to include an alternate Emission Reduction Plan for the American Cyanamid Company Fortier Plant located at Westwego, Jefferson Parish. A permit was issued by LDEQ on October 17, 1984 (#1896), but after several revisions, the final permit for the trade is #1896 (M-2), issued July 20, 1989. This Bubble uses credits obtained from the change of service of three storage tanks from VOC to non-VOC usage to offset reductions required by controlling one methanol storage tank.

(i) *Incorporation by reference.* (A) LDEQ permit number 1896 (M-2) issued July 20, 1989, a Revision to Bubble Permit No. 1896 (M-1)—American Cyanamid Company, Westwego, Jefferson Parish, Louisiana.

(ii) *Additional material.* (A) Letter dated June 6, 1989, from the Administrator of the Louisiana Office of Air Quality, giving the State position that the Volatile Organic Compounds that have been shifted out of the emission reduction credit donating tanks have not been shifted elsewhere in the non-attainment area.

(B) Letter received by EPA on March 31, 1989, from Mr. Addison Tatum of the State of Louisiana, including calculations for the permit.

(54) A revision to allow an alternative emission reduction plan ("bubble") for the Vista Chemical Company facility in Westlake, Louisiana, as submitted by the Governor on November 22, 1983, and amended by Louisiana Department of Environmental Quality Air Quality Division permit #1828 M-2 issued September 25, 1986.

(i) *Incorporation by reference.* (A) Louisiana Department of Environmental Quality Air Quality Division permit #1828 M-2 issued September 25, 1986.

(ii) *Additional material.*—None.

(55) A revision to allow an alternative emission reduction plan ["bubble"] for the Union Carbide facility in Hahnville, Louisiana, as submitted by the Governor on October 19, 1983, and amended by Louisiana Department of Environmental Quality Air Quality Division permit #1836T(M-1) issued April 23, 1987, and revised on May 5, 1990.

(i) *Incorporation by reference.* (A) Louisiana Department of Environmental

Quality Air Quality Division permit #1836T(M–1) issued April 23, 1987, and revised on May 5, 1990.

(ii) *Additional material*.—None.

(56) Revisions to Louisiana's volatile organic compound regulations were submitted by the Governor on June 13, 1990.

(i) *Incorporation by reference*. (A) Revisions to Title 33, Environmental Quality, Part III, Chapter 21, Control of Emission of Volatile Organic Compounds, Subchapter B, Organic Solvents, Section 2123, Organic Solvents, paragraphs C.6. and D.3., effective February 20, 1990.

(57) Revisions to the Louisiana State Implementation Plan for LAC:33:III: Section 509 Prevention of Significant Deterioration (PSD) sections (509)(B) (Baseline Area) (1), 509(B) (Baseline Area) (2), 509(B) (Baseline Concentration) (1), (509)(B) (Baseline Concentration) (1)(b), 509(B) (Baseline Concentration) (2)(a), 509(B) (Baseline Concentration) (2)(b), 509(B) (Baseline Date) (1)(a), 509(B) (Baseline Date) (1)(b), 509(B) (Baseline Date) (2), 509(B) (Baseline Date) (2)(a), 509(B) (Baseline Date) (2)(b), 509(B) (Net Emission Increases) (4), 509(D), and 509(P)(4), as adopted by the Secretary of Louisiana Department of Environmental Quality (LDEQ) on July 20, 1990, were submitted by the Governor on October 26, 1990.

(i) *Incorporation by reference*. (A) LAG:33:III: Section 509 Prevention of Significant Deterioration Sections (509)(B) (Baseline Area) (1), 509(B) (Baseline Area) (2), 509(B) (Baseline Concentration) (1)(a), (509)(B) (Baseline Concentration) (1)(b), 509(B) (Baseline Concentration) (2)(a), 509(B) (Baseline Concentration) (2)(b), 509(B) (Baseline Date) (1)(a), 509(B) (Baseline Date) (1)(b), 509(B) (Baseline Date) (2), 509(B) (Baseline Date) (2)(a), 509(B) (Baseline Date) (2)(b), 509(B) (Net Emission Increase) (4), 509(D), and 509(P)(4) as amended on July 20, 1990.

(ii) *Additional material*.—None.

(58) Louisiana Air Quality Regulation section 6.6 as revised and adopted by the Louisiana Environmental Control Commission on February 26, 1981, submitted by the Governor on March 25, 1981, and approved by the Environmental Protection Agency on June 9, 1982.

(i) *Incorporation by reference*. (A) Louisiana Air Quality Regulation section 6.6 as revised and adopted by the Louisiana Environmental Control Commission on February 26, 1981, submitted by the Governor on March 25, 1981, and approved by the Environmental Protection Agency on June 9, 1982.

(ii) *Additional material*. (A) Letter dated March 24, 1981, from the Secretary of the Louisiana Department of Natural Resources to the Governor of Louisiana acknowledging approval of Louisiana Air Quality Regulation section 6.6 by the Louisiana Environmental Control Commission effective on February 26, 1981.

(59) A revision to the Louisiana State Implementation Plan (SIP) to include revisions to LAC, Title 33, “Environmental Quality,” Part III, Air, Chapter 15, Emission Standards for Sulfur Dioxide, effective April 20, 1992, and submitted by the Governor by cover letter dated August 5, 1992.

(i) *Incorporation by reference*. (A) Revisions to LAC, Title 33, “Environmental Quality,” Part III, Air, Chapter 15, Emission Standards for Sulfur Dioxide, Section 1501, “Degradation of Existing Emission Quality Restricted;” Section 1503, “Emission Limitations;” Table 4, “Emissions—Methods of Contaminant Measurement;” Section 1505, “Variances;” Section 1507, “Exceptions;” Section 1509, “Reduced Sulfur Compounds (New and Existing Sources);” Section 1511, “Continuous Emissions Monitoring;” and Section 1513, “Recordkeeping and Reporting,” effective April 20, 1992.

(60) A revision to the Louisiana State Implementation plan (SIP) to include revisions to Louisiana Administrative Code (LAC), Title 33, Environmental Quality, Part III, Air, Chapter 1, Chapter 21, and Chapter 61 as submitted by the Governor on June 13, 1990, October 26, 1990, May 24, 1991, and March 24, 1992.

(i) *Incorporation by reference*. (A) LAC, Title 33, Environmental Quality, Part III, Air, Chapter 21 (December 1987). Control of Emission of Organic Compounds, except section 2105. Storage of Volatile Organic Components (Small Tanks).

(B) Revisions to LAC, Title 33, Environmental Quality, Part III. Air, Chapter 1. General Provisions, section 111. Definitions—Administrator, Administrative Authority*, Attainment Areas, Nonattainment Areas, SIP, Volatile Organic Compound, and Chapter 21. Control of Emission of Organic Compounds, Subchapter A. General, section 2103. Storage of Volatile Organic Compounds paragraphs A., C., D.1., D.1.a. through D.1.d., D.2., D.2.a., D.2.b., D.3., E., F., H.1., H.2., I. effective January 20, 1990.

(C) Revisions to LAC, Title 33, Environmental Quality, Part III. Air, Chapter 21. Control of Emission of Organic Compounds Subchapter A. General, section 2107. Volatile Organic Compounds—Loading, section 2109. Oil/Water-Separation, paragraphs A.1. through A.4., B. through D., section 2113. Housekeeping, paragraphs A.1 through A.3., A.5., section 2117. Exemptions, section 2119. Variances B., and Subchapter D. Cutback Paving Asphalt section 2127. Cutback Paving Asphalt, paragraphs A., B., C.1., C.2., C.3., D., D.1., D.1.b., D.1.c., D.1.d., and D.2., effective February 20, 1990.

(D) Revisions to LAC, Title 33, Environmental Quality, Part III. Air, Chapter 21. Control of Emission of Organic Compounds, Subchapter B. Organic Solvents, section 2123. Organic Solvents, paragraphs C., C.1. through C.5., C.7. through C.9., effective February 20, 1990.

(E) Revisions to LAC, Title 33, Environmental Quality, Part III. Air, Chapter 21. Control of Emission of Organic Compounds, Subchapter F. Gasoline Handling, section 2131. Filling of Gasoline Storage Vessels, paragraphs A., B., B.1., B.3., D., D.1., D.4., D.5., E., F., and G., section 2133. Gasoline Bulk Plants paragraphs A., A.1., A.3. through A.6., B., B.3., B.4., C. and D., section 2135. Bulk Gasoline Terminals paragraphs A., B., B.1.a., B.1.a.i., B.1.a.iii., B.1.d., B.2. through B.5., and C. through E., E.1. through E.4., and section 2137. Gasoline Terminal Vapor-Tight Control Procedure. effective July 20, 1990.

(F) Revisions to LAC, Title 33, Environmental Quality, Part III. Air, Chapter 21. Control of Emission of Organic Compounds Subchapter A. General, section 2101. Compliance Schedules,

section 2115. Waste Gas Disposal paragraphs A., B., C., D., F., G., H., I.1. through I.5., J. through K., section 2121. Fugitive Emission Control paragraphs B., B.1, B.2., C., C.1.b., C.1.b.i., C.1.b.ii., C.1.b.iii., C.1.c., C.2., C.2.b., C.2.b.i., C.4., C.4.c., C.4.d., C.5. and G., Subchapter C. Vapor Degreasers, section 2125. Vapor Degreasers paragraphs A., A.1., A.2., A.2.i. through A.2.m., A.3., A.3.a. through A.3.d., B., B.1., B.7., B.8., C., C.1., C.1.a. through C.1.c., C.1.i., C.1.j., and D. through G., Subchapter E. Perchloroethylene Dry Cleaning Systems, section 2129. Perchloroethylene Dry Cleaning Systems paragraphs A., A.1., A.2., A.2.a. through A.2.c., C., and D., Subchapter H. Graphic Arts, section 2143. Graphic Arts (Printing) by Rotogravure and Flexographic Processes paragraphs A., A.1., A.3., A.5., B., C. and D., Subchapter I. Pharmaceutical Manufacturing Facilities, section 2145. Pharmaceutical Manufacturing Facilities, paragraphs A., A.1., A.1.c., and E. through G. effective November 20, 1990.

(G) Revisions to LAC, Title 33, Environmental Quality, Part III. Air, Chapter 21. Control of Emissions of Organic Compounds Subchapter A. General, section 2103. Storage of Volatile Organic Compounds paragraphs B., D., D.2.c. through D.2.e., G., H.3., I.2.c., I.4. and I.5., section 2107. Volatile Organic Compounds—Loading paragraphs D.3. and D.4., section 2109. Oil/Water Separation paragraphs A., B.4., and B.5., section 2111. Pumps and Compressors, section 2113. Housekeeping paragraph A.4., section 2119. Variances paragraph A.; Subchapter D. Cutback Paving Asphalt, section 2127. Cutback Paving Asphalt paragraphs C. and D.1.a. effective April 20, 1991.

(H) Revisions to LAC, Title 33, Environmental Quality, Part III. Air, Chapter 21. Control of Emission of Organic Compounds, section 2115. Waste Gas Disposal paragraphs I., K., and K.4., section 2121. Fugitive Emission Control paragraphs A., C.1., C.1.b.iv. through C.1.b.vi., C.4.a., C.4.b., C.4.h., D., D.1., D.1.b. through D.1.f., and D.2., section 2123. Organic Solvents paragraphs A., A.1. through A.3., B., B.1., B.1.a. through B.1.c., C.11., D., D.1. through D.9., E., E.1. through E.7., F., and F.1. through F.4., Subchapter F. Gasoline

Handling, section 2131. Filling of Gasoline Storage Vessels paragraphs D.2. and D.3., section 2135. Bulk Gasoline Terminals paragraph E.5., Subchapter G-Petroleum Refinery Operations, section 2139. Refinery Vacuum Producing Systems paragraphs A. and B. and section 2141. Refinery Process Unit Turn-arounds effective July 20, 1991.

(I) Revisions to LAC, Title 33, Environmental Quality, Part III. Air, Chapter 61. Division's Sources Test Manual, Subchapter A. Method 43-Capture Efficiency Test Procedures section 6121 through section 6131 effective July 20, 1991.

(J) Revisions to LAC, Title 33, Environmental Quality, Part III. Air Chapter 1. General Provisions, section 111. Definitions-Coating, Department, Distance from Source to Property Line, Exceedance, Hydrocarbon, Leak, Miscellaneous Metal Parts and Products Coating, Nonattainment Area, Ozone Exceedance, SIP effective August 20, 1991.

(61) A revision to the Louisiana SIP to include revisions to LAC, Title 33, "Environmental Quality," Part III. Air, Chapter 21, Control of Emission of Organic Compounds, Section 2132—Stage II Vapor Recovery Systems for Control of Vehicle Refuelling Emissions at Gasoline Dispensing Facilities effective November 20, 1992, and submitted by the Governor by cover letter dated November 10, 1992.

(i) *Incorporation by reference.* (A) Revisions to LAC, Title 33, "Environmental Quality," Part III. Air, Chapter 21, Control of Emission of Organic Compounds, Section 2132—Stage II Vapor Recovery Systems for Control of Vehicle Refuelling Emissions at Gasoline Dispensing Facilities, effective November 20, 1992; and Chapter 65, Section 6523—Fee Schedule Listing, effective November 20, 1992.

(ii) *Additional materials.* (A) November 15, 1993, narrative plan addressing: Legal authority, control strategy, compliance schedules, air quality surveillance, public notice, determination of regulated universe, Louisiana Department of Environmental Quality record-keeping, facility recordkeeping, annual in-use above ground inspections, program penalties, training, and benefits.

(62) Alternative emission reduction (bubble) plan for the Dow Chemical facility located in Plaquemine, Iberville Parish, as adopted by the Louisiana Environmental Control Commission on July 28, 1983, submitted by the Governor on October 19, 1983, and amended by the Louisiana Department of Environmental Quality with permit number 1838T(M-2) issued on October 16, 1991.

(ii) *Incorporation by reference.*

(A) Permit number 1838T(M-2) as issued by the Louisiana Department of Environmental Quality on October 16, 1991.

(ii) *Additional material.* (A) Letter dated September 17, 1991, from the Administrator of the Office of Air Quality at the Louisiana Department of Environmental Quality to the Chief of the Planning Section at the Air Programs Branch of the U.S. Environmental Protection Agency—Region 6, furnishing State assurances.

(63) The State is required to implement a Small Business Stationary Source Technical and Environmental Compliance Assistance Program (PROGRAM) as specified in the plan revision submitted by the Governor on October 22, 1992. This plan submittal, as adopted by the Secretary of the Louisiana Department of Environmental Quality (LDEQ) on October 22, 1992, was developed in accordance with section 507 of the Clean Air Act (CAA).

(i) *Incorporation by reference.* (A) Enrolled House Bill No. 1319 (Act 1037, Regular Session, 1992), signed into law by the Governor on July 13, 1992, and effective upon signature, enacting Louisiana Revised Statutes (R.S.) 30:2061 and 2062 and R.S. 36:239(H). Included in Act 1037 are provisions establishing a small business stationary source compliance assistance program; creating the State Ombudsman Office for small business; creating a Compliance Advisory Panel (CAP); establishing membership of the CAP; and establishing CAP powers, duties, and functions.

(B) Louisiana R.S. 30:2060N.(6), "Toxic air pollutant emission control program", (the small business stationary source technical and environmental compliance assistance program subsection), as in effect on October 22, 1992.

Environmental Protection Agency

§ 52.999

(C) State of Louisiana Executive Order No. EWE 92-4 dated February 10, 1992, and effective upon signature, creating and establishing an Office of Permits within the Executive Department, Office of the Governor.

(D) Letter from Louisiana Governor Edwards to Mr. Kai Midboe, Secretary, LDEQ, dated February 20, 1992, designating the Governor's Office of Permits as the official State office to serve as Ombudsman for the PROGRAM per the mandate of section 507 of the Federal CAA. The Coordinator of the Office of Permits will be responsible for administering the Small Business Ombudsman portion of the PROGRAM.

(ii) *Additional material.* (A) Narrative SIP Revision entitled, "Louisiana SIP, Concerning CAA Amendments of 1990, Section 507, Small Business Stationary Source Technical and Environmental Compliance Assistance (Program); November 15, 1992."

(B) "State of Louisiana Memorandum of Understanding Between the Governor's Office of Permits and the Louisiana Department of Environmental Quality", signed (and effective) on April 7, 1992, by Mr. Kai David Midboe, Secretary, LDEQ, and Ms. Martha A. Madden, Coordinator, Governor's Office of Permits.

(C) Legal opinion letter dated October 22, 1992, from James B. Thompson, III, Assistant Secretary for Legal Affairs and Enforcement, LDEQ, to Mr. B. J. Wynne, Regional Administrator, EPA Region VI, regarding "Appointment to Small Business Advisory Panel".

(64) Revisions to the Louisiana SIP addressing VOC RACT catch-up requirements were submitted by the Governor of Louisiana by letters dated December 21, 1992, and April 14, 1993.

(i) *Incorporation by reference.* (A) Revisions to LAC, Title 33, Environmental Quality, Part III, Air; Chapter 21. Control of Emissions of Organic Compounds, Subchapter A. General; section 2103. Storage of Volatile Organic Compounds, paragraphs G., I., I.4.; section 2109. Oil/Water Separation, paragraph B.4.; Subchapter B. Organic Solvents; section 2123. Organic Solvents, paragraph D.6.; Subchapter C. Vapor Degreasers; section 2125. Vapor Degreasers, paragraph D.; Subchapter

F. Gasoline Handling; section 2131. Filling of Gasoline Storage Vessels, paragraphs D., D.1., D.3., G.; section 2135. Bulk Gasoline Terminals, paragraph A.; Subchapter H. Graphic Arts; section 2143. Graphic Arts (Printing) by Rotogravure and Flexographic Processes, paragraph B, as adopted by LDEQ on October 20, 1992.

(B) Revisions to LAC, Title 33, Environmental Quality, Part III, Air; Chapter 21. Control of Emissions of Organic Compounds, Subchapter A. General; section 2115. Waste Gas Disposal, introductory paragraph, paragraphs H., H.1., H.1.a through H.1.d, H.2, H.2.a, H.2.b, H.3, L., as adopted by LDEQ on March 20, 1993.

(ii) *Additional material.* (A) Letters dated November 10, 1992 and December 21, 1992, signed by Edwin Edwards, Governor of Louisiana.

(B) Letter dated April 14, 1993, signed by Edwin Edwards, Governor of Louisiana.

(C) Letter of negative declaration dated March 29, 1994, signed by Gustave Von Boduungen, P.E., Assistant Secretary, LDEQ.

(65) Revisions to the Louisiana Department of Environmental Quality Regulation Title 33, Part III, Chapter 9, Section 919, (February 2, 1993), and a technical correction (October 20, 1994). These revisions are for the purpose of implementing an emission statement program for stationary sources within the ozone nonattainment areas.

(i) *Incorporation by reference.* (A) Revisions to LAC, title 33, Part III, Chapter 9, *General Regulations on Control of Emissions and Emissions Standards*, Section 919, *Emission Inventory*, adopted in the *Louisiana Register*, Vol. 19, No. 2, 184-186, February 20, 1993. All subsections except B.2.a. and B.2.d.

(B) Revisions to LAC, title 33, Part III, Chapter 9, *General Regulations on Control of Emissions and Emissions standards*, Section 919, *Emission Inventory*, adopted in the *Louisiana Register*, Vol 20, No. 10, 1102, October 20, 1994. Subsections B.2.a. and B.2.d.

(66) Revisions to the Louisiana Department of Environmental Quality Regulation Title 33, Part III, Chapter 2, Section 223 and Chapter 19, Sections 1951-1973. These revisions are for the purpose of implementing a Clean Fuel

Fleet Program to satisfy the Federal requirements for a Clean Fuel Fleet Program to be part of the SIP for Louisiana.

(i) *Incorporation by reference.* (A) Revision to LAC, Title 33, Part III, Chapter 2, Rules and Regulations for the Fee System of the Air Quality Control Programs, Section 223, Fee Schedule Listing, adopted in the *Louisiana Register*, Vol. 20, No. 11, 1263, November 20, 1994.

(B) Revision to LAC, Title 33, Part III, Chapter 19, Mobile Sources, Subchapter B, Clean Fuel Fleet Program, Sections 1951-1973, adopted in the *Louisiana Register*, Vol. 20, No. 11, 1263-1268, November 20, 1994.

(67) A revision to the Louisiana State Implementation Plan for General Conformity: LAC 33:III. CHAPTER 14. SUBCHAPTER A "Determining Conformity of General Federal Actions to State or Federal Implementation Plan" as adopted by the Louisiana Department of Environmental Quality Secretary and published in the *Louisiana Register*, Vol. 20, No. 11, 1268, November 20, 1994, was submitted by the Governor on November 10, 1994.

(i) *Incorporation by reference.* (A) Louisiana General Conformity: LAC 33:III. CHAPTER 14. SUBCHAPTER A "Determining Conformity of General Federal Actions to State or Federal Implementation Plan" as adopted by the Louisiana Department of Environmental Quality Secretary and published in the *Louisiana Register*, Vol. 20, No. 11, 1268, November 20, 1994.

(68) A revision to the Louisiana SIP addressing the nonattainment NSR program for Louisiana was submitted by the Governor of Louisiana on March 3, 1993, and November 15, 1993.

(i) *Incorporation by reference.* (A) Revision to LAC, Title 33, Part III. Air, Chapter 5. Permit Procedures, by the addition of Section 504. Nonattainment New Source Review Procedures, as promulgated in the *Louisiana Register*, Volume 19, Number 2, 176-183, February 20, 1993; effective February 20, 1993, and submitted by the Governor on March 3, 1993.

(B) Revisions to LAC, Title 33, Part III. Air, Chapter 5. Permit Procedures, Section 504. Nonattainment New Source Review Procedures, Sub-

sections: A., Applicability, Paragraphs A(1), A(2), A(3), A(4); D., Nonattainment New Source Requirements, Paragraph D(4); Delete G., Permit Procedures, Public Participation and Notification; Reletter H., Definitions, to G., and revise definitions for Major Modification (paragraphs: a., c.iii, c.iv, c.v.(a)(b), c.vi, c.vii), Major Stationary Source (paragraphs: a., d.i); Delete Table 1; Renumber Table 2, Major Stationary Source/Major Modification Emission Thresholds, to Table 1, and revise Footnote 1., as promulgated in the *Louisiana Register*, Volume 19, Number 11, 1420-1421, November 20, 1993; effective November 20, 1993, and submitted by the Governor on November 4, 1993.

(ii) *Additional material.* (A) Letter dated January 7, 1994, signed by the Governor of Louisiana, which clarifies that section 504 is to be reviewed under the SIP program.

(69) The Governor of Louisiana submitted revisions to Regulation Louisiana Administrative Code on March 22, 1995 to incorporate changes in the Federal PSD permitting regulations for PM-10 increments.

(i) *Incorporation by reference.* (A) Revisions to Regulation Louisiana Administrative Code 33:III.Chapter 5, Section 509, effective February 20, 1995: Section B. Definitions: Baseline Date; Section B. Definitions: Net Emissions Increase; Section D. Ambient Air Increments; Section I.8.a.; Section K.2.; and Section P.4.

(70) The Louisiana Department of Environmental Quality submitted a redesignation request and maintenance plan for Pointe Coupee Parish on December 20, 1995. The redesignation request and maintenance plan meet the redesignation requirements in section 107(d)(3)(E) of the Act as amended in 1990. The redesignation meets the Federal requirements of section 182(a)(1) of the Clean Air Act as a revision to the Louisiana ozone State Implementation Plan for Pointe Coupee Parish. The EPA therefore approved the request for redesignation to attainment with respect to ozone for Pointe Coupee Parish on December 20, 1996.

(i) *Incorporation by reference.* Letter dated August 31, 1995, from Mr. Gustave

Von Bodungen, P.E., Assistant Secretary, Louisiana Department of Environmental Quality, transmitting a copy of the Pointe Coupee Parish maintenance plan for the EPA's approval.

(ii) *Additional material.* (A) Letter dated August 28, 1995, from Governor Edwin E. Edwards of Louisiana to Ms. Jane Saginaw, Regional Administrator, requesting the reclassification and redesignation of Pointe Coupee Parish to attainment for ozone.

(B) The ten year ozone maintenance plan, including emissions projections and contingency measures, submitted to EPA as part of the Pointe Coupee Parish redesignation request on December 20, 1995.

(71) A revision to the Louisiana SIP addressing the 15 percent rate-of-progress requirements was submitted by the Governor of Louisiana by cover letter dated December 15, 1995. This revision, submitted to satisfy the requirements of section 182(b) of the Clean Air Act (Act), will aid in ensuring that reasonable further progress is made towards attaining the national ambient air quality standard (NAAQS) for ozone.

(i) *Incorporation by reference.* (A) Revisions to LAC, Title 33, Environmental Quality, Part III. Air; Chapter 21. Control of Emissions of Organic Compounds, Subchapter A. General; section 2108. Marine Vapor Recovery, paragraphs B.1., B.2., B.3., B.3.a. through B.3.d., B.4.a., B.4.b., B.5., B.6., D.1.a., D.1.a.i., D.1.a.ii., D.1.b., D.2., D.3., D.4.a., D.4.b., D.4.c., D.4.c.i., D.4.c.ii., D.4.d., D.4.e., D.4.e.i., D.4.e.ii., D.4.f., D.4.g., E.2., E.2.a. through E.2.c., F.1., F.2., F.3., G.1., G.2., as adopted by LDEQ on October 20, 1988.

(B) Revisions to LAC, Title 33, Environmental Quality, Part III. Air; Chapter 21. Control of Emissions of Organic Compounds, Subchapter A. General; section 2108. Marine Vapor Recovery, paragraphs A., B. Definitions-Barge, Crude Oil, Gasoline, Ship, C., C.1., C.2., C.3., C.3.a. through C.3.d. (note: paragraphs B.1., B.2., B.3., and B.3.a. through B.3.d., as adopted on October 20, 1988, were moved to C.1., C.2., C.3., and C.3.a. through C.3.d. without repromulgating), C.4., C.4.a., C.4.b., C.5., C.6. (note: paragraphs B.4.a., B.4.b., B.5., and B.6., as adopted on October 20,

1988, were moved to C.4.a., C.4.b., C.5., and C.6. without repromulgating), D.1., D.1.a. through D.1.c., D.2., D.2.a. through D.2.c., D.3., E., E.1., E.1.a., E.1.a.i., E.1.a.ii., E.1.b., E.2., E.3. (note: D.1.a., D.1.a.i., D.1.a.ii., D.1.b., D.2., and D.3., as adopted October 20, 1988, were moved to E.1.a., E.1.a.i., E.1.a.ii., E.1.b., E.2., and E.3. without repromulgating), E.4., E.4.a., E.4.b., E.4.c., E.4.c.i., E.4.c.ii., E.4.d., E.4.e., E.4.e.i., E.4.e.ii., E.4.f., E.4.g. (note: D.4.a., D.4.b., D.4.c., D.4.c.i., D.4.c.ii., D.4.d., D.4.e., D.4.e.i., D.4.e.ii., D.4.f., and D.4.g. as adopted on October 20, 1988, were moved to E.4.a., E.4.b., E.4.c., E.4.c.i., E.4.c.ii., E.4.d., E.4.e., E.4.e.i., E.4.e.ii., E.4.f., and E.4.g. without repromulgating), E.5., F., F.1., F.2., F.2.a. through F.2.e. (note: E.2. and E.2.a. through E.2.c., as adopted on October 20, 1988, were moved to F.2. and F.2.a through F.2.c. without repromulgating), G., G.1., G.2., G.3. (note: F.1., F.2., and F.3., as adopted October 20, 1988, were moved to G.1., G.2., and G.3. without repromulgating), H., H.1., H.2. (note: G.1. and G.2., as adopted on October 20, 1988, were moved to H.1. and H.2. without repromulgating), as adopted by LDEQ on November 20, 1990.

(C) Revisions to LAC, Title 33, Environmental Quality, Part III. Air; Chapter 21. Control of Emissions of Organic Compounds, Subchapter A. General; section 2122. Fugitive Emission Control for Ozone Nonattainment Areas, paragraphs A., A.1. through A.5., A.6., A.6.a. through A.6.d., B. Definitions-Connector, Good Performance Level, Heavy Liquid Service, Inaccessible Valve/Connector, In Vacuum Service, Light Liquid, Light Liquid Service, Liquid Service, Process Unit, Process Unit Shutdown, Unrepairable Component, C., C.1., C.1.a. through C.1.c., C.2. through C.5., D., D.1., D.1.a., D.1.a.i., D.1.a.ii., D.1.b., D.1.b.i. through D.1.b.v., D.1.c. through D.1.e., D.2., D.2.a., D.2.b., D.2.b.i. through D.2.b.iii., D.3., D.3.a. through D.3.d., D.4., D.4.a. through D.4.k., D.5., E.1.a. through E.1.f., E.2., E.3., E.3.a., E.3.a.i. through E.3.a.v., E.3.b., E.3.b.i. through E.3.b.v., F., F.1., F.2., F.2.a. through F.2.j., F.3., G., G.1. through G.13., as adopted by LDEQ on October 20, 1994.

(D) Revisions to LAC, Title 33, Environmental Quality, Part III. Air; Chapter 21. Control of Emissions of Organic

Compounds, Subchapter A. General; section 2122. Fugitive Emission Control for Ozone Nonattainment Areas, paragraphs E., E.1., E.1.g., as adopted by LDEQ on November 20, 1994.

(E) Revisions to LAC, Title 33, Environmental Quality, Part III. Air; Chapter 21. Control of Emissions of Organic Compounds, Subchapter A. General; section 2103. Storage of Volatile Organic Compounds, paragraphs A., B., D.1., D.1.a. through D.1.d., D.2., D.2.a. through D.2.e., E., F., G., G.1. through G.4., H., H.1., H.2., H.2.a. through H.2.e., H.3., I., I.1., I.2., I.2.a. through I.2.c., I.3. through I.5., as adopted by LDEQ on December 20, 1994.

(F) Revisions to LAC, Title 33, Environmental Quality, Part III. Air;

Chapter 21. Control of Emissions of Organic Compounds, Subchapter A. General; section 2103. Storage of Volatile Organic Compounds, paragraphs C., D., D.3., as adopted by LDEQ on November 20, 1995.

(G) Revisions to LAC, Title 33, Environmental Quality, Part III. Air; Chapter 21. Control of Emissions of Organic Compounds, Subchapter A. General; section 2103. Storage of Volatile Organic Compounds, paragraph D.4., as adopted by LDEQ on December 20, 1995.

(H) Reasonable Further Progress Agreed To Order, dated December 16, 1994, issued by the Assistant Secretary of the State of Louisiana Department of Environmental Quality in the matter of BASF Corporation, Geismar, Louisiana.

(I) Reasonable Further Progress Agreed To Order, dated August 22, 1994, issued by the Assistant Secretary of the State of Louisiana Department of Environmental Quality in the matter of CosMar Company, Inc., Carville, Louisiana.

(J) Reasonable Further Progress Agreed To Order, dated September 26, 1994, issued by the Assistant Secretary of the State of Louisiana Department of Environmental Quality in the matter of Shell Chemical Company, Geismar, Louisiana.

(K) Reasonable Further Progress Agreed To Order, dated September 8, 1994, issued by the Assistant Secretary of the State of Louisiana Department of Environmental Quality in the mat-

ter of Uniroyal Chemical Company, Inc., Geismar, Louisiana.

(L) Reasonable Further Progress Agreed To Order, dated September 8, 1994, issued by the Assistant Secretary of the State of Louisiana Department of Environmental Quality in the matter of Vulcan Chemicals, Geismar, Louisiana.

(M) SIP narrative plan entitled, “Revision to the 15% Rate of Progress Plan and 1990 Emissions Inventory,” dated December 28, 1995, page 11, Section 2.2, 1996 Target Level Emissions, first paragraph; page 23, Section 5, Table 2—Reductions in Plan; page 173, Appendix G, table—Reductions from Industrial Sources through 1996 Used for the 15% Requirement, which ends on page 174.

(ii) *Additional materials.* (A) SIP narrative plan entitled, “Revision to 15% Rate of Progress Plan and 1990 Emissions Inventory,” submitted by the Governor of Louisiana on December 15, 1995, except Section 6. Contingency Measures Documentation, Appendix M. Contingency Reductions Documentation, and Appendix N. Banking Regulations.

(B) Letter dated May 3, 1996, from Gustave Von Bodungen, Louisiana Department of Environmental Quality, to Thomas Diggs, U.S. Environmental Protection Agency, transmitting supplemental documentation for the 15 Percent Rate of Progress Plan.

(72) Revisions to the Louisiana SIP addressing VOC RACT Negative Declarations. The Governor of Louisiana submitted the negative declarations for reasonably available control technology (RACT) for the Baton Rouge ozone nonattainment area on December 15, 1996. Section 172(c)(1) of the Clean Air Act requires nonattainment areas to adopt, at a minimum, RACT to reduce emissions from existing sources. Pursuant to section 182(b)(2) of the Act, for moderate and above ozone nonattainment areas, the EPA has identified 13 categories for such sources and developed the Control Technique Guidelines (CTGs) or Alternate Control Techniques (ACTs) documents to implement RACT at those sources. When no major volatile organic compound (VOC) sources for a CTG/ACT category exist in a nonattainment area, a State may submit a negative declaration for

that category. Louisiana's submittal included two negative declaration letters from Mr. Gustave Von Bodungen to Ms. Karen Alvarez dated April 6, 1994, and June 20, 1994, for the following source categories: offset lithography, plastic parts-business machines, plastic parts-others, wood furniture, aerospace coatings, autobody refinishing, and shipbuilding coatings/repair. This submittal satisfies section 182(b)(2) of the Clean Air Act Amendments of 1990 for these particular CTG/ACT source categories for the Baton Rouge ozone nonattainment area.

(i) *Incorporation by reference.* The letter dated December 15, 1995, from the Governor of Louisiana to the Regional Administrator, submitting a revision to the Louisiana SIP for VOC RACT rules, which included VOC RACT negative declarations.

(ii) *Additional material.* (A) The negative declaration letter dated April 16, 1994, from Mr. Gustave Von Bodungen to Ms. Karen Alvarez.

(B) The negative declaration letter dated June 20, 1994, from Mr. Gustave Von Bodungen to Ms. Karen Alvarez.

(73) The Louisiana Department of Environmental Quality submitted a redesignation request and maintenance plan for Calcasieu Parish on December 20, 1995. The redesignation request and maintenance plan meet the redesignation requirements in section 107(d)(3)(E) of the Act. The redesignation meets the Federal requirements of section 182(a)(1) of the Act as a revision to the Louisiana ozone State Implementation Plan for Calcasieu Parish. The EPA therefore approved the request for redesignation to attainment with respect to ozone for Calcasieu Parish on June 2, 1997.

(i) *Incorporation by reference.* Letter dated December 20, 1995, from Governor Edwin E. Edwards of Louisiana to Ms. Jane Saginaw, Regional Administrator, transmitting a copy of the Calcasieu Parish maintenance plan and requesting the redesignation of Calcasieu Parish to attainment for ozone.

(ii) *Additional material.* The ten year ozone maintenance plan, including emissions projections and contingency measures, submitted to EPA as part of the Calcasieu Parish redesignation request on December 20, 1995.

(74) Revisions to the Louisiana Department of Environmental Quality Regulation Title 33, Part III, Chapter 21, Control of Emission of Organic Compounds, submitted by the Governor on December 15, 1995.

(i) *Incorporation by reference.* (A) LAC, Title 33, Part III, Chapter 21, Section 2147, Limiting Volatile Organic Compound Emissions from Reactor Processes and Distillation Operations in the Synthetic Organic Chemical Manufacturing Industry, adopted in the Louisiana Register on April 20, 1995 (LR 21:380).

(B) LAC, Title 33, Part III, Chapter 21, Section 2149, Limiting Volatile Organic Compound Emissions from Batch Processing, adopted in the Louisiana Register on April 20, 1995 (LR 21:387).

(C) LAC, Title 33, Part III, Chapter 21, Section 2151, Limiting Volatile Organic Compound Emissions from Clean-up Solvent Processing, adopted in the Louisiana Register on April 20, 1995 (LR 21:391).

(ii) *Additional material.* (A) Letter of negative declaration for wood furniture dated January 21, 1997, from the State of Louisiana Department of Environmental Quality.

(75) A revision to the Louisiana State Implementation Plan for General Conformity: LAC 33:III. Chapter 14. Subchapter A "Determining Conformity of General Federal Actions to State or Federal Implementation Plan," Section 1405.B as adopted by the Louisiana Department of Environmental Quality Secretary and published in the Louisiana Register, Vol. 23, No. 6, 720, June 20, 1997, was submitted by the Governor on September 8, 1997.

(i) *Incorporation by reference.* (A) Louisiana General Conformity: LAC 33:III. Chapter 14. Subchapter A "Determining Conformity of General Federal Actions to State or Federal Implementation Plan", Section 1405.B as adopted by the Louisiana Department of Environmental Quality Secretary and published in the Louisiana Register, Vol. 23, No. 6, 720, June 20, 1997.

(76) [Reserved]

(77) Revisions to the Louisiana Administrative Code, Title 33, Part III, Chapter 21, Section 2149 (LAC 33:III.2149), "Limiting Volatile Organic

§§ 52.1000–52.1018

40 CFR Ch. I (7–1–25 Edition)

Compound Emissions from Batch Processing,” submitted by the Governor on March 23, 1998.

(i) *Incorporation by reference.* LAC 33:III Chapter 21, revised paragraph 2149.A.2.b; paragraphs 2149.C.2.a, b, and c become paragraphs 2149.C.2.d, e, and f respectively; and add new paragraphs 2149.C.2.a, b, and c, as adopted in the Louisiana Register on November 20, 1997 (LR 23:1507).

(ii) *Additional material.* None.

(78) [Reserved]

(79) Site-specific revision to the 15% Rate-of-Progress plan submitted by the Governor in a letter dated December 20, 1997. The revision provides for a schedule extension for installation of guide pole sliding cover gaskets on 33 external floating roof tanks located at the Baton Rouge refinery of Exxon Company U.S.A.

(i) *Incorporation by reference.* Letters dated July 17, 1997, and September 12, 1997, from the LDEQ to Exxon Company U.S.A. approving the compliance date extension; which are included in the State Implementation Plan submittal entitled, “Summary of 15%

Rate-of-Progress State Implementation Plan Revision,” dated December 20, 1997.

(ii) *Additional material.* (A) Letter from the Governor of Louisiana dated December 20, 1997, transmitting a copy of the State Implementation Plan revision.

(B) Letters dated November 13, 1996; May 14, 1997; and July 3, 1997; from Exxon Company U.S.A. to the LDEQ requesting the compliance date extension and including a list of the subject tanks, the date of the next maintenance downtime, and emissions estimates for the tanks; which are included in the State Implementation Plan submittal entitled, “Summary of 15% Rate-of-Progress State Implementation Plan Revision,” dated December 20, 1997.

A list of CFR titles, subtitles, chapters, subchapters and parts and an alphabetical list of agencies publishing in the CFR are included in the CFR Index and Finding Aids volume to the Code of Federal Regulations which is published separately and revised annually.

Table of CFR Titles and Chapters

Alphabetical List of Agencies Appearing in the CFR

List of CFR Sections Affected

Table of CFR Titles and Chapters

(Revised as of July 1, 2025)

Title 1—General Provisions

- I Administrative Committee of the Federal Register (Parts 1—49)
- II Office of the Federal Register (Parts 50—299)
- III Administrative Conference of the United States (Parts 300—399)
- IV Miscellaneous Agencies (Parts 400—599)
- VI National Capital Planning Commission (Parts 600—699)

Title 2—Federal Financial Assistance

- SUBTITLE A—OFFICE OF MANAGEMENT AND BUDGET GUIDANCE FOR
FEDERAL FINANCIAL ASSISTANCE
 - I Office of Management and Budget Governmentwide Guidance for
Grants and Agreements (Parts 2—199)
 - II Office of Management and Budget Guidance (Parts 200—299)
- SUBTITLE B—FEDERAL AGENCY REGULATIONS FOR GRANTS AND
AGREEMENTS
 - III Department of Health and Human Services (Parts 300—399)
 - IV Department of Agriculture (Parts 400—499)
 - VI Department of State (Parts 600—699)
 - VII Agency for International Development (Parts 700—799)
 - VIII Department of Veterans Affairs (Parts 800—899)
 - IX Department of Energy (Parts 900—999)
 - X Department of the Treasury (Parts 1000—1099)
 - XI Department of Defense (Parts 1100—1199)
 - XII Department of Transportation (Parts 1200—1299)
 - XIII Department of Commerce (Parts 1300—1399)
 - XIV Department of the Interior (Parts 1400—1499)
 - XV Environmental Protection Agency (Parts 1500—1599)
 - XVI U.S. International Development Finance Corporation (Parts
1600—1699)
 - XXVIII National Aeronautics and Space Administration (Parts 1800—
1899)
 - XIX U.S. Agency for Global Media (Parts 1900—1999)
 - XX United States Nuclear Regulatory Commission (Parts 2000—2099)
 - XXII Corporation for National and Community Service (Parts 2200—
2299)
 - XXIII Social Security Administration (Parts 2300—2399)

Alphabetical List of Agencies Appearing in the CFR

(Revised as of July 1, 2025)

Agency	CFR Title, Subtitle or Chapter
Administrative Conference of the United States	1, III
Advisory Council on Historic Preservation	36, VIII
Advocacy and Outreach, Office of	7, XXV
Afghanistan Reconstruction, Special Inspector General for	5, LXXXIII
African Development Foundation	22, XV
Federal Acquisition Regulation	48, 57
Agency for International Development	2, VII; 22, II
Federal Acquisition Regulation	48, 7
Agricultural Marketing Service	7, I, VIII, IX, X, XI; 9, II
Agricultural Research Service	7, V
Agriculture, Department of	2, IV; 5, LXXXIII
Advocacy and Outreach, Office of	7, XXV
Agricultural Marketing Service	7, I, VIII, IX, X, XI; 9, II
Agricultural Research Service	7, V
Animal and Plant Health Inspection Service	7, III; 9, I
Chief Financial Officer, Office of	7, XXX
Commodity Credit Corporation	7, XIV
Economic Research Service	7, XXXVII
Energy and Environmental Policy, Office of	7, XXI
Energy Policy and New Uses, Office of	2, IX; 7, XXIX
Environmental Quality, Office of	7, XXXI
Farm Service Agency	7, VII, XVIII
Federal Acquisition Regulation	48, 4
Federal Crop Insurance Corporation	7, IV
Food and Nutrition Service	7, II
Food Safety and Inspection Service	9, III
Foreign Agricultural Service	7, XV
Forest Service	36, II
Information Resources Management, Office of	7, XXVII
Inspector General, Office of	7, XXVI
National Agricultural Library	7, XLI
National Agricultural Statistics Service	7, XXXVI
National Institute of Food and Agriculture	7, XXXIV
Natural Resources Conservation Service	7, VI
Operations, Office of	7, XXVIII
Procurement and Property Management, Office of	7, XXXII
Rural Business-Cooperative Service	7, XVIII, XLII
Rural Development Administration	7, XLII
Rural Housing Service	7, XVIII, XXXV
Rural Utilities Service	7, XVII, XVIII, XLII
Secretary of Agriculture, Office of	7, Subtitle A
Transportation, Office of	7, XXXIII
World Agricultural Outlook Board	7, XXXVIII
Air Force, Department of	32, VII
Federal Acquisition Regulation Supplement	48, 53
Air Transportation Stabilization Board	14, VI
Alcohol and Tobacco Tax and Trade Bureau	27, I
Alcohol, Tobacco, Firearms, and Explosives, Bureau of	27, II
AMTRAK	49, VII
American Battle Monuments Commission	36, IV
American Indians, Office of the Special Trustee	25, VII
Animal and Plant Health Inspection Service	7, III; 9, I
Appalachian Regional Commission	5, IX

Agency	CFR Title, Subtitle or Chapter
Architectural and Transportation Barriers Compliance Board	36, XI
Arctic Research Commission	45, XXIII
Armed Forces Retirement Home	5, XI; 38, II
Army, Department of	32, V
Engineers, Corps of	33, II; 36, III
Federal Acquisition Regulation	48, 51
Benefits Review Board	20, VII
Bilingual Education and Minority Languages Affairs, Office of	34, V
Blind or Severely Disabled, Committee for Purchase from People Who Are	41, 51
Broadcasting Board of Governors	
Federal Acquisition Regulation	48, 19
Career, Technical, and Adult Education, Office of	34, IV
Census Bureau	15, I
Centers for Medicare & Medicaid Services	42, IV
Central Intelligence Agency	32, XIX
Chemical Safety and Hazard Investigation Board	40, VI
Chief Financial Officer, Office of	7, XXX
Child Support Services, Office of	45, III
Children and Families, Administration for	45, II, IV, X, XIII
Civil Rights, Commission on	5, LXVIII; 45, VII
Civil Rights, Office for	34, I
Coast Guard	33, I; 46, I; 49, IV
Coast Guard (Great Lakes Pilotage)	46, III
Commerce, Department of	2, XIII; 44, IV; 50, VI
Census Bureau	15, I
Economic Affairs, Office of the Under-Secretary for	15, XV
Economic Analysis, Bureau of	15, VIII
Economic Development Administration	13, III
Emergency Management and Assistance	44, IV
Federal Acquisition Regulation	48, 13
Foreign-Trade Zones Board	15, IV
Industry and Security, Bureau of	15, VII
International Trade Administration	15, III; 19, III
National Institute of Standards and Technology	15, II; 37, IV
National Marine Fisheries Service	50, II, IV
National Oceanic and Atmospheric Administration	15, IX; 50, II, III, IV, VI
National Technical Information Service	15, XI
National Telecommunications and Information Administration	15, XXIII; 47, III, IV
National Weather Service	15, IX
Patent and Trademark Office, United States	37, I

List of CFR Sections Affected

All changes in this volume of the Code of Federal Regulations (CFR) that were made by documents published in the FEDERAL REGISTER since January 1, 2020 are enumerated in the following list. Entries indicate the nature of the changes effected. Page numbers refer to FEDERAL REGISTER pages. The user should consult the entries for chapters, parts and subparts as well as sections for revisions.

For changes to this volume of the CFR prior to this listing, consult the annual edition of the monthly List of CFR Sections Affected (LSA). The LSA is available at *www.govinfo.gov*. For changes to this volume of the CFR prior to 2001, see the “List of CFR Sections Affected, 1949–1963, 1964–1972, 1973–1985, and 1986–2000” published in 11 separate volumes. The “List of CFR Sections Affected 1986–2000” is available at *www.govinfo.gov*.
