(590) The following new regulation was submitted on October 5, 2022 by the Governor’s designee as an attachment to a letter dated October 5, 2022.

(i) *Incorporation by reference.* (A) Eastern Kern Air Pollution Control District.

(1) Rule 210.1A, Major New and Modified Stationary Source Review (MNSR), adopted on August 4, 2022.

(2) [Reserved]

(B) [Reserved]

(ii) [Reserved]

(591) The following rules and certifications were submitted on August 3, 2021, by the Governor’s designee, as an attachment to a letter dated August 3, 2021.

(i) *Incorporation by reference.* (A) Tuolumne County Air Pollution Control District.

(1) Rule 429, Federal New Source Review, adopted on July 6, 2021.

(2) [Reserved]

(B) Butte County Air Quality Management District.

(1) Rule 432, “Federal New Source Review (FNSR),” amended on April 22, 2021.

(2) [Reserved]

(ii) *Additional materials.* (A) San Joaquin Valley Unified Air Pollution Control District.

(1) “Certification that the San Joaquin Valley Unified Air Pollution Control District’s Current Rules Address the Clean Air Act’s Clean Fuels for Boilers Requirements for the 2015 8-Hour Ozone Standard,” adopted on June 17, 2021.

(2) [Reserved]

(B) South Coast Air Quality Management District.

(1) “Final Certification of Nonattainment New Source Review and Clean Fuels for Boilers Compliance Demonstration for 2015 8-hour Ozone Standard,” excluding the “Nonattainment New Source Review Compliance Demonstration,” adopted on June 4, 2021.

(2) “Final Certification of Nonattainment New Source Review and Clean

Fuels for Boilers Compliance Demonstration for 2015 8-hour Ozone Standard,” excluding the “Clean Fuels for Boilers Compliance Demonstration,” adopted June 4, 2021.

(C) Ventura County Air Pollution Control District.

(I) “Certification of the Nonattainment New Source Review Program Compliance Demonstration for the 2015 Federal Ozone Standard,” adopted June 8, 2021.

(2) [Reserved]

(D) Imperial County Air Pollution Control District.

(I) “The Certification of the Nonattainment New Source Review Permit Program for Imperial County Applicable to the 2015 Ozone National Ambient Air Quality Standard,” adopted June 22, 2021.

(2) [Reserved]

(E) Feather River Air Quality Management District.

(I) “Nonattainment New Source Review Certification for the 2015 8-hour Ozone National Ambient Air Quality Standard (Adoption),” adopted June 7, 2021.

(2) [Reserved]

(592) The following regulation was submitted on April 23, 2020, by the Governor’s designee, as an attachment to a letter dated April 23, 2020.

(i) Incorporation by reference.

(A) San Joaquin Valley Unified Air Pollution Control District.

(I) Rule 4601, “Architectural Coatings,” amended on April 16, 2020.

(2) [Reserved]

(B) [Reserved]

(ii) [Reserved]

(593) The following plan was submitted on July 18, 2018, by the Governor’s designee, as an attachment to a letter dated July 16, 2018.

(i) [Reserved]

(ii) *Additional materials.* (A) Imperial County Air Pollution Control District.

(I) “Imperial County 2018 Annual Particulate Matter Less Than 2.5 Microns In Diameter State Implementation Plan,” adopted April 24, 2018, Chapter 3 (“Emissions Inventory”) excluding: Table 3-9a (“Direct PM_{2.5} and PM_{2.5} Precursor Emissions by Major Source Category in the Imperial County PM_{2.5} Nonattainment Area, 2019 (Annual)”)”; Table 3-9b (“Condensable and

Filterable PM_{2.5} Emissions by Major Source Category in the Imperial County PM_{2.5} Nonattainment Area, 2019 (Annual)”)”; Table 3-10a (“Direct PM_{2.5} and PM_{2.5} Precursor Emissions by Major Source Category in the Imperial County PM_{2.5} Nonattainment Area, 2021 (Annual)”)”; Table 3-10b (“Condensable and Filterable PM_{2.5} Emissions by Major Source Category in the Imperial County PM_{2.5} Nonattainment Area, 2021 (Annual)”)”; Table 3-11a (“Direct PM_{2.5} and PM_{2.5} Precursor Emissions by Major Source Category in the Imperial County PM_{2.5} Nonattainment Area, 2022 (Annual)”)”; Table 3-11b (“Condensable and Filterable PM_{2.5} Emissions by Major Source Category in the Imperial County PM_{2.5} Nonattainment Area, 2022 (Annual)”)”; and Section 3.17 (“Evaluation of Significant Precursors”).

(2) [Reserved]

(B) [Reserved]

(594) The following plan was submitted on July 30, 2020, by the Governor’s designee as an attachment to a letter dated July 23, 2020.

(i) [Reserved]

(ii) *Additional materials.* (A) Eastern Kern Air Pollution Control District.

(I) Indian Wells Valley Second 10-Year PM₁₀ Maintenance Plan, adopted on June 25, 2020.

(2) [Reserved]

(B) [Reserved]

(595) The following rules and additional materials were submitted on October 6, 2021, by the Governor’s designee as an attachment to a letter dated October 6, 2021.

(i) *Incorporation by reference.* (A) Placer County Air Pollution Control District.

(I) Rule 501, “General Permit Requirements,” amended on April 8, 2021.

(2) Rule 502, “New Source Review,” amended on August 12, 2021.

(B) [Reserved]

(ii) *Additional materials.* (A) Bay Area Air Quality Management District.

(I) “Certification that the Bay Area Air Quality Management District’s Existing NNSR Program Addresses the 2015 Ozone NAAQS SIP Requirements Rule,” adopted September 1, 2021.

(2) [Reserved]

(B) [Reserved]

Environmental Protection Agency

§ 52.220

(596) The following regulation was submitted on July 18, 2022, by the Governor's designee, as an attachment to a letter dated July 11, 2022.

(i) Incorporation by reference.

(A) Yolo-Solano Air Quality Management District.

(1) Rule 2.31, "Solvent Cleaning and Degreasing," revised on July 14, 2021.

(2) [Reserved]

(B) [Reserved]

(ii) [Reserved]

(597) The following multi-district certification was submitted on February 3, 2022, by the Governor's designee, as an attachment to a letter dated February 3, 2022.

(i) [Reserved]

(ii) *Additional materials.* (A) California Air Resources Board.

(1) "California Clean Fuels for Fleets Certification for the 70 ppb Ozone Standard," adopted on January 27, 2022.

(2) [Reserved]

(B) [Reserved]

(598) The following regulations were submitted on November 20, 2019, by the Governor's designee as an attachment to a letter dated November 15, 2019.

(i) *Incorporation by reference.* (A) San Joaquin Valley Unified Air Pollution Control District.

(1) Rule 2201, "New and Modified Stationary Source Review Rule," amended on August 15, 2019.

(2) [Reserved]

(B) [Reserved]

(ii) [Reserved]

(599) The following plan was submitted on May 5, 2017, by the Governor's designee as an attachment to a letter dated May 5, 2017.

(i) [Reserved]

(ii) *Additional Materials.*

(A) Sacramento Metropolitan Air Quality Management District.

(1) Reasonably Available Control Technology (RACT) State Implementation Plan (SIP) for the 2008 8-Hour Ozone National Ambient Air Quality Standards (NAAQS) ("Demonstration of Reasonably Available Control Technology for the 2008 Ozone NAAQS"), as adopted on March 23, 2017, except the RACT determination for non-CTG major sources of NO_x.

(2) The Reasonably Available Control Technology (RACT) determination for non-CTG major sources of NO_x as con-

tained in the RACT State Implementation Plan (SIP) for the 2008 8-Hour Ozone National Ambient Air Quality Standards (NAAQS) ("Demonstration of Reasonably Available Control Technology for the 2008 Ozone NAAQS"), as adopted on March 23, 2017.

(600) The following regulations were submitted on July 23, 2021, by the Governor's designee as an attachment to a letter dated July 22, 2021.

(i) *Incorporation by reference.* (A) Mojave Desert Air Quality Management District.

(1) Rule 219, "Equipment Not Requiring a Permit," amended on January 25, 2021.

(2) Rule 1300, "New Source Review General," amended on March 22, 2021.

(3) Rule 1301, "New Source Review Definitions," amended on March 22, 2021.

(4) Rule 1302, "New Source Review Procedure," (except subsections (C)(5) and (C)(7)(c)), amended on March 22, 2021.

(5) Rule 1303, "New Source Review Requirements," amended on March 22, 2021.

(6) Rule 1304, "New Source Review Emissions Calculations," amended on March 22, 2021.

(7) Rule 1305, "New Source Review Emission Offsets," amended on March 22, 2021.

(8) Rule 1306, "New Source Review for Electric Energy Generating Facilities," amended on March 22, 2021.

(B) [Reserved]

(ii) [Reserved]

(601) The following regulations were submitted on October 15, 2021, by the Governor's designee as an attachment to a letter dated October 14, 2021.

(i) *Incorporation by reference.* (A) Mojave Desert Air Quality Management District.

(1) Rule 206, "Posting of Permit to Operate," amended on February 22, 2021.

(2) [Reserved]

(B) Ventura County Air Pollution Control District.

(1) Rule 71, "Crude Oil and Reactive Organic Compound Liquids," revised on May 11, 2021.

(2) [Reserved]

(ii) [Reserved]

§ 52.220

40 CFR Ch. I (7–1–25 Edition)

(602) The following regulations were submitted on August 3, 2021, by the Governor’s designee as an attachment to a letter dated August 3, 2021.

(i) *Incorporation by reference.* (A) Antelope Valley Air Quality Management District.

(1) Rule 219, “Equipment Not Requiring a Permit,” amended on June 15, 2021.

(2) Rule 1300, “New Source Review General,” amended on July 20, 2021.

(3) Rule 1301, “New Source Review Definitions,” amended on July 20, 2021.

(4) Rule 1302 “New Source Review Procedure,” (except 1302(C)(5) and 1302(C)(7)(c)), amended on July 20, 2021.

(5) Rule 1303, “New Source Review Requirements,” amended on July 20, 2021.

(6) Rule 1304, “New Source Review Emissions Calculations,” amended on July 20, 2021.

(7) Rule 1305, “New Source Review Emissions Offsets,” amended on July 20, 2021.

(8) Rule 1306, “New Source Review for Electric Energy Generating Facilities,” amended on July 20, 2021.

(9) Rule 1309, “Emission Reduction Credit Banking,” amended on July 20, 2021.

(B) [Reserved]

(ii) [Reserved]

(603) The following plan was submitted electronically on October 21, 2021, by the Governor’s designee as an attachment to a letter dated October 20, 2021.

(i) [Reserved]

(ii) *Additional materials.* (A) Great Basin Unified Air Pollution Control District.

(1) Coso Junction PM₁₀ Planning Area Second 10-Year Maintenance Plan, adopted on September 23, 2021.

(B) Sacramento Metropolitan Air Quality Management District.

(1) “Second 10-Year PM₁₀ Maintenance Plan for Sacramento County,” adopted on September 23, 2021.

(2) [Reserved]

(C) [Reserved]

(604) The following regulations were submitted on March 9, 2022, by the Governor’s designee as an attachment to a letter dated March 9, 2022.

(i) *Incorporation by reference.* (A) San Diego County Air Pollution Control District.

(1) Rule 69.2.2, “Medium Boilers, Process Heaters, and Steam Generators,” adopted on September 9, 2021.

(2) Rule 19.3, “Emission Information,” adopted on December 9, 2021.

(B) El Dorado County Air Quality Management District.

(1) Rule 523–1, “Federal Non-Attainment New Source Review,” revised on December 7, 2021.

(2) [Reserved]

(ii) [Reserved]

(605) The following materials were submitted electronically on December 29, 2020, by the Governor’s designee as an attachment to a letter dated December 28, 2020.

(i) [Reserved]

(ii) *Additional materials.*

(A) California Air Resources Board.

(1) “West Mojave Desert Vehicle-Miles Traveled Offset Demonstration,” adopted on October 22, 2020.

(2) [Reserved]

(B) [Reserved]

(606) The following materials were submitted on March 17, 2022, by the Governor’s designee as an attachment to a letter dated March 16, 2022.

(i) [Reserved]

(ii) *Additional materials.* (A) San Joaquin Valley Unified Air Pollution Control District.

(1) San Joaquin Valley Unified Air Pollution Control District Resolution No. 21–11–7, In the Matter of: State Implementation Credit for Residential Wood Burning Device Change-Out Incentive Measure, adopted on November 18, 2021.

(2) [Reserved]

(B) [Reserved]

(607) The following regulations were submitted on July 5, 2022, by the Governor’s designee.

(i) *Incorporation by reference.* (A) Great Basin Unified Air Pollution Control District.

(1) Rule 222, “New Source Review Requirements for New and Modified Major Sources in Nonattainment Areas,” adopted on January 6, 2022.

(2) [Reserved]

(B) San Luis Obispo County Air Pollution Control District.

Environmental Protection Agency

§ 52.220

(1) Rule 224, “Federal Requirements for New and Modified Major Sources in Non-Attainment Areas,” adopted on January 26, 2022.

(2) [Reserved]

(C) Feather River Air Quality Management District.

(1) Rule 7.15, “Clean Air Act Non-attainment Fees,” amended on April 4, 2022.

(2) [Reserved]

(D) Tehama County Air Pollution Control District.

(1) Rule 2:20, “Emissions Statement,” adopted on March 1, 2022.

(ii) [Reserved]

(608) San Francisco Bay Area Transportation Air Quality Conformity Protocol—Conformity Procedures and Interagency Consultation Procedures was submitted electronically on May 17, 2021, by the Governor’s designee as an attachment to a letter dated May 6, 2021.

(i) [Reserved]

(ii) *Additional materials.* (A) Association of Bay Area Governments (ABAG), Bay Area Air Quality Management District (BAAQMD), and Metropolitan Transportation Commission (MTC).

(1) The San Francisco Bay Area Transportation Air Quality Conformity Protocol—Conformity Procedures (February 26, 2020) and San Francisco Bay Area Transportation Air Quality Conformity Protocol—Interagency Consultation Procedures (February 26, 2020), adopted by MTC on February 26, 2020, BAAQMD on March 4, 2020, and by ABAG on April 23, 2020.

(B) [Reserved]

(609) The following regulation was submitted electronically on March 3, 2023, by the Governor’s designee as an attachment to a letter dated March 2, 2023.

(i) *Incorporation by reference.* (A) Amador Air District.

(1) Rule 400, “NSR Requirements for New and Modified Major Sources in Nonattainment Areas,” adopted on January 17, 2023.

(2) [Reserved]

(B) [Reserved]

(ii) [Reserved]

(610) The following regulations were submitted electronically on May 11, 2023, by the Governor’s designee as an

attachment to a letter dated May 10, 2023.

(i) *Incorporation by reference.* (A) Sacramento Metropolitan Air Quality Management District.

(1) Rule 307, “Clean Air Act Penalty Fees,” amended on March 23, 2023.

(2) [Reserved]

(B) South Coast Air Quality Management District.

(1) Rule 1118, “Control of Emissions from Refinery Flares,” amended on January 6, 2023.

(2) [Reserved]

(C) San Diego County Air Pollution Control District.

(1) Rule 11, “Exemptions From Rule 10 Permit Requirements,” revision adopted on October 13, 2022.

(2) [Reserved]

(D) Mojave Desert Air Quality Management District.

(1) Rule 404, “Particulate Matter—Concentration,” readopted on July 25, 1977.

(2) Rule 405, “Solid Particulate Matter—Weight,” readopted on July 25, 1977.

(3) Rule 408, “Circumvention,” readopted on July 25, 1977.

(4) Rule 409, “Combustion Contaminants,” readopted on July 25, 1977.

(5) Rule 443, “Labeling of Solvents,” readopted on July 25, 1977.

(6) Rule 472, “Reduction of Animal Matter,” readopted on July 25, 1977.

(E) Feather River Air Quality Management District.

(1) Rule 3.0, “Visible Emissions,” adopted on August 12, 1991.

(2) Rule 3.1, “Exceptions to Rule 3.0,” (excluding paragraph D), adopted on August 12, 1991.

(3) Rule 3.2, “Particulate Matter Concentration,” adopted on August 12, 1991.

(4) Rule 3.3, “Dust and Fumes,” adopted on August 12, 1991.

(5) Rule 3.4, “Separation of Emissions,” adopted on August 12, 1991.

(6) Rule 3.5, “Combination of Emissions,” adopted on August 12, 1991.

(7) Rule 3.6, “Abrasive Blasting,” adopted on August 12, 1991.

(8) Rule 3.7, “Reduction of Animal Matter,” adopted on August 12, 1991.

(9) Rule 3.10, “Sulfur Oxides,” adopted on August 12, 1991.

(10) Rule 3.13, “Circumvention,” adopted on August 12, 1991.

(11) Rule 9.6, “Equipment Breakdown,” adopted on August 12, 1991.

NOTE 1 TO PARAGRAPH (c)(610)(i)(E): The FRAQMD rules referenced in this paragraph (c)(610)(i)(E) were initially scheduled for adoption at a June 1991 Board Meeting, but the adoption was postponed to August 1991. The FRAQMD ultimately adopted the rules in this section on August 12, 1991, but “6/91” remained as the adoption date printed on the rules. Additionally, a typographic error in Rule 3.3 was corrected and adopted by the FRAQMD on October 3, 2022, without changing the official adoption date of the rule.

(F) Tehama County Air Pollution Control District.

(1) Rule 2:3C, “New and Modified Major Sources in the Tuscan Buttes Nonattainment Areas,” adopted on February 28, 2023.

(2) [Reserved]

(ii) [Reserved]

(611) The following materials were submitted on April 26, 2023, by the Governor’s designee.

(i) [Reserved]

(ii) *Additional materials.* (A) California Air Resources Board.

(1) The San Diego County area portion of the “California Smog Check Performance Standard Modeling and Program Certification for the 70 Parts Per Billion (ppb) 8-Hour Ozone Standard,” adopted on March 23, 2023.

(2) “California Smog Check Performance Standard Modeling and Program Certification for the 70 Parts Per Billion (ppb) 8-Hour Ozone Standard,” adopted on March 23, 2023, excluding the San Diego County area portion.

(B) [Reserved]

(612) The following regulations were submitted electronically on February 14, 2024, by the Governor’s designee as an attachment to a letter dated February 9, 2024.

(i) *Incorporation by reference*

(A) Yolo-Solano Air Quality Management District.

(1) Rule 2.43, “Biomass Boilers,” amended on December 13, 2023.

(2) [Reserved]

(B) [Reserved]

(ii) [Reserved]

(613) The following plan was submitted electronically on November 13, 2023 by the Governor’s designee as an attachment to a letter of the same date.

(i) [Reserved]

(ii) *Additional Materials.*

(A) California Air Resources Board.

(1) “California Smog Check Contingency Measure State Implementation Plan Revision,” adopted on October 26, 2023.

(2) [Reserved]

(B) [Reserved]

(614) The following plan was submitted electronically on December 29, 2020, by the Governor’s designee as an attachment to a letter dated December 28, 2020.

(i) [Reserved]

(ii) *Additional materials.*

(A) South Coast Air Quality Management District.

(1) “South Coast Air Quality Management District, Final Coachella Valley Extreme Area Plan for the 1997 8-Hour Ozone Standard,” dated December 2020, except for the sections titled “Reasonable Further Progress” and “Supplemental RACT Demonstration,” pages 6-1 through 6-11.

(2) “South Coast Air Quality Management District, Final Coachella Valley Extreme Area Plan for the 1997 8-Hour Ozone Standard,” dated December 2020, the section titled “Reasonable Further Progress,” pages 6-1 through 6-7.

(615) The following regulation was submitted electronically on July 20, 2022, by the Governor’s designee as an attachment to a letter of the same date.

(i) *Incorporation by reference.*

(A) San Diego County Air Pollution Control District.

(1) Rule 45, “Federally Mandated Ozone Nonattainment Fees,” adopted on June 9, 2022.

(2) [Reserved]

(B) [Reserved]

(ii) [Reserved]

(616) The following regulation was submitted on August 13, 2021, by the Governor’s designee.

(i) *Incorporation by reference.* (A) South Coast Air Quality Management District.

(1) Rule 2305, “Warehouse Indirect Source Rule—Warehouse Actions and Investments to Reduce Emissions (WAIRE) Program,” adopted on May 7, 2021.

(2) [Reserved]

(B) [Reserved]

(621) The following regulations were submitted electronically on November 30, 2022, by the Governor’s designee as an attachment to a letter dated November 22, 2022.

(i) *Incorporation by reference.* (A) Mojave Desert Air Quality Management District.

(1) Rule 468, “Sulfur Recovery Units,” readopted on July 25, 1977.

(2) Rule 469, “Sulfur Acid Units,” readopted on July 25, 1977.

(B) [Reserved]

(ii) [Reserved]

(622) The following regulations were submitted on October 13, 2023, by the Governor’s designee.

(i) *Incorporation by reference.* (A) Mojave Desert Air Quality Management District.

(1) Rule 104, “Reporting of Source Test Data and Analyses,” amended on December 19, 1988.

(2) [Reserved]

(B) [Reserved]

(ii) [Reserved]

(623) The following plan revisions were submitted electronically on August 22, 2024, by the Governor’s designee as an attachment to a letter of the same date.

(i) [Reserved]

(ii) *Additional materials.* (A) California Air Resources Board.

(1) Selected portions titled “Amendments to the 15 µg/m³ SIP Revision and Agricultural Equipment Incentive Measure for the 1997 PM_{2.5} Standard,” and “Appendix B: 2022 Annual Demonstration Report: San Joaquin Valley Agricultural Equipment Incentive Measure Covering Projects Completed Through 12/31/2022,” of the Staff Report, “Review of the San Joaquin Valley 2024 Plan for the 2012 12 µg/m³ Annual PM_{2.5} Standard and Amendments to the Agricultural Equipment Incentive Measure and the 1997 15 µg/m³ State Implementation Plan Revision,” adopted July 25, 2024.

Environmental Protection Agency

§ 52.220a

(2) The portion of CARB Resolution 24-10, dated July 25, 2024, adopting amendments to the Valley Incentive Measure to include quantification of emissions reductions of 5.0 tpd of NO_x and 0.27 tpd of PM_{2.5} in the year 2023 from existing agricultural equipment projects and substituting the reductions from the Valley Incentive Measure to meet the aggregate emissions reduction commitment in the attainment plan for the 1997 annual PM_{2.5} NAAQS approved in 40 CFR 52.220(c)(537)(ii)(A)(9).

(B) [Reserved]

(624) The following plan was submitted electronically on March 18, 2021, by the Governor's designee as an attachment to a letter dated March 15, 2021.

(i) [Reserved]

(ii) Additional materials.

(A) California Air Resources Board.

(1) California Air Resources Board, Staff Report, "2020 Coachella Valley Vehicle Miles Traveled Emissions Offset Demonstration," Release Date: January 22, 2021.

(2) [Reserved]

(B) [Reserved]

(625) The following regulation was submitted on December 7, 2022, by the Governor's designee as an attachment to a letter dated November 30, 2022.

(i) *Incorporation by reference.*

(A) Eastern Kern Air Pollution Control District.

(1) Rule 108.2, "Emissions Statement Requirements," amended on August 4, 2022.

(2) [Reserved]

(B) [Reserved]

(ii) [Reserved]

(626) The following regulations were submitted electronically on January 10, 2024, by the Governor's designee as an attachment to a letter dated December 27, 2023.

(i) *Incorporation by reference.* (A) Mojave Desert Air Quality Management District.

(1) Rule 1157, "Boilers and Process Heaters," amended on September 25, 2023.

(2) [Reserved]

(B) [Reserved]

(ii) [Reserved]

[37 FR 10850, May 31, 1972]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.220, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

EFFECTIVE DATE NOTE: At 90 FR 23445, June 3, 2025, § 52.220 was amended, effective July 3, 2025.

§ 52.220a Identification of plan—in part.

(a) *Purpose and scope.* This section sets forth a portion of the applicable State implementation plan for the State of California under section 110 of the Clean Air Act, 42 U.S.C. 7401-7671q and 40 CFR part 51 to meet national ambient air quality standards.

(b) *Incorporation by reference.* (1) Material listed in paragraphs (c) and (d) of this section with an EPA approval date on or prior to the dates listed in this paragraph (b)(1) was approved for incorporation by reference by the Director of the FEDERAL REGISTER in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Material is incorporated as it exists on the date of the approval and notice of any change in the material will be published in the FEDERAL REGISTER. Entries in tables 1 through 39 to paragraph (c) of this section with EPA approval dates after the dates listed in this paragraph (b)(1) have been approved by the EPA for inclusion in the State implementation plan and will be incorporated by reference in the next update to the SIP compilation.

(i) *EPA-Approved Statutes and State Regulations.* Material listed in table 1 to paragraph (c) of this section was approved by EPA for inclusion in the SIP on April 1, 2016.

(ii) *EPA-Approved California Test Procedures, Test Methods, and Specifications.* Material listed in table 2 to paragraph (c) of this section was approved by EPA for inclusion in the SIP on April 1, 2016.

(iii) *EPA-Approved Local Jurisdiction Ordinances and Municipal Code: Coachella Valley Local Jurisdictions, Town of Mammoth Lakes, City of Portola.* Material listed in table 3 to paragraph (c) of this section was approved by EPA for inclusion in the SIP on April 17, 2025.

(iv) *EPA-Approved Amador Air District Regulations.* Material listed in table 4

§ 52.220a

40 CFR Ch. I (7–1–25 Edition)

to paragraph (c) of this section was approved by EPA for inclusion in the SIP on April 17, 2025.

(v) *EPA-Approved Antelope Valley Air Quality Management District Regulations; Los Angeles County Air Pollution Control District Regulations; Southern California Air Pollution Control District Regulations; South Coast Air Quality Management District Regulations (Applicable in Antelope Valley)*. Material listed in table 5 to paragraph (c) of this section was approved by EPA for inclusion in the SIP on April 17, 2025.

(vi) *EPA-Approved Bay Area Air Quality Management District Regulations*. Material listed in table 6 to paragraph (c) of this section was approved by EPA for inclusion in the SIP on April 17, 2025.

(vii) *EPA-Approved Butte County Air Quality Management District Regulations*. Material listed in table 7 to paragraph (c) of this section was approved by EPA for inclusion in the SIP on April 17, 2025.

(viii) *EPA-Approved Calaveras County Air Pollution Control District Regulations*. Material listed in table 8 to paragraph (c) of this section was approved by EPA for inclusion in the SIP on April 17, 2025.

(ix) *EPA-Approved Colusa County Air Pollution Control District Regulations*. Material listed in table 9 to paragraph (c) of this section was approved by EPA

for inclusion in the SIP on April 17, 2025.

(x) *EPA-Approved Eastern Kern Air Pollution Control District Regulations; Kern County Air Pollution Control District Regulations*. Material listed in table 10 to paragraph (c) of this section was approved by EPA for inclusion in the SIP on April 17, 2025.

(xi) *EPA-Approved El Dorado County Air Quality Management District Regulations*. Material listed in table 11 to paragraph (c) of this section was approved by EPA for inclusion in the SIP on April 17, 2025.

(2) EPA Region IX certifies that the rules/regulations provided by EPA in the SIP compilation at the addresses in paragraph (b)(3) of this section are an exact duplicate of the officially promulgated rules/regulations which have been approved as part of the State implementation plan as of the dates referenced in paragraph (b)(1) of this section.

(3) Copies of the materials incorporated by reference may be inspected at the EPA Region IX office at 75 Hawthorne Street, San Francisco, CA 94105. To obtain the material, please call (415) 947-8000. You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit www.archives.gov/federal-register/cfr/ibr-locations or email fr.inspection@nara.gov.

(c) *EPA-approved regulations.*

TABLE 1—EPA-APPROVED STATUTES AND STATE REGULATIONS ¹—Continued

State citation	Title/subject	State effective date	EPA approval date	Additional explanation
6452	Reduced Volatile Organic Compound Emissions Field Fumigation Methods.	11/1/2013	81 FR 64350, 9/20/2016	Amends previous version of rule approved at 77 FR 65294 (October 26, 2012). Amended rule adopted by the California Department of Pesticide Regulation on May 23, 2013. Submitted on February 4, 2015.
6452.1	Fumigant Volatile Organic Compound Emission Records and Reporting.	1/25/2008	10/26/2012, 77 FR 65294	Submitted on October 12, 2009. See 40 CFR 52.220(c)(413)(i)(A)(1).
6452.2	Volatile Organic Compound Emission Limits.	11/1/2013	81 FR 64350, 9/20/2016	Amends previous version of rule approved at 77 FR 65294 (October 26, 2012). Amended rule adopted by the California Department of Pesticide Regulation on May 23, 2013. Submitted on February 4, 2015.
6452.3	Field Fumigant Volatile Organic Compound Emission Allowances.	4/7/2011	10/26/2012, 77 FR 65294	Submitted on August 2, 2011. See 40 CFR 52.220(c)(414)(i)(A)(1).
Title 3 (Food and Agriculture), Division 6 (Pesticides and Pest Control Operations), Chapter 3 (Pest Control Operations), Subchapter 1 (Licensing), Article 5 (Agricultural Pest Control Adviser Licenses)				
6558	Recommendations for Use of Non-fumigants in the San Joaquin Valley Ozone Nonattainment Area.	11/1/2013	81 FR 64350, 9/20/2016	Adopted by the California Department of Pesticide Regulation on May 23, 2013. Submitted on February 4, 2015.
Title 3 (Food and Agriculture), Division 6 (Pesticides and Pest Control Operations), Chapter 3 (Pest Control Operations), Subchapter 1 (Licensing), Article 6 (Pest Control Dealer Licenses)				
6577	Sales of Non-fumigants for Use in the San Joaquin Valley Ozone Nonattainment Area.	11/1/2013	81 FR 64350, 9/20/2016	Adopted by the California Department of Pesticide Regulation on May 23, 2013. Submitted on February 4, 2015.
Title 3 (Food and Agriculture), Division 6 (Pesticides and Pest Control Operations), Chapter 3 (Pest Control Operations), Subchapter 2 (Work Requirements), Article 1 (Pest Control Operations Generally)				
6624	Pesticide Use Records.	12/20/2010	10/26/2012, 77 FR 65294	Excluding references in subsection (f) to methyl iodide and section 6446.1. Submitted on August 2, 2011. See 40 CFR 52.220(c)(414)(i)(A)(2).
6626	Pesticide Use Reports for Production Agriculture.	4/7/2011	10/26/2012, 77 FR 65294	Submitted on August 2, 2011. See 40 CFR 52.220(c)(414)(i)(A)(2).
Title 3 (Food and Agriculture), Division 6 (Pesticides and Pest Control Operations), Chapter 4 (Environmental Protection), Subchapter 2 (Air), Article 1 (Toxic Air Contaminants)				
6864	Criteria for Identifying Pesticides as Toxic Air Contaminants.	11/1/2013	81 FR 64350, 9/20/2016	Adopted by the California Department of Pesticide Regulation on May 23, 2013. Submitted on February 4, 2015.
Title 3 (Food and Agriculture), Division 6 (Pesticides and Pest Control Operations), Chapter 4 (Environmental Protection), Subchapter 2 (Air), Article 2 (Volatile Organic Compounds)				
6880	Criteria to Designate Low-Volatile Organic Compound (VOC) or High-VOC Nonfumigant Pesticide Products.	11/1/2013	9/20/2016, 81 FR 64350	Adopted by the California Department of Pesticide Regulation on May 23, 2013. Submitted on February 4, 2015.

TABLE 1—EPA-APPROVED STATUTES AND STATE REGULATIONS ¹—Continued

State citation	Title/subject	State effective date	EPA approval date	Additional explanation
6881	Annual Volatile Organic Compound Emissions Inventory Report.	11/1/2013	9/20/2016, 81 FR 64350	Amends and rennumbers previous version of rule approved at 77 FR 65294 (October 26, 2012) as 3 CCR §6452.4. Amended and renumbered rule adopted by the California Department of Pesticide Regulation on May 23, 2013. Submitted on February 4, 2015.
6883	Recommendation Requirements in the San Joaquin Valley Ozone Nonattainment Area.	11/1/2013	9/20/2016, 81 FR 64350	Adopted by the California Department of Pesticide Regulation on May 23, 2013. Submitted on February 4, 2015.
6884	San Joaquin Valley Ozone Nonattainment Area Use Prohibitions.	11/1/2013	9/20/2016, 81 FR 64350	Adopted by the California Department of Pesticide Regulation on May 23, 2013. Submitted on February 4, 2015.
6886	Dealer Responsibilities for the San Joaquin Valley Ozone Nonattainment Area.	11/1/2013	9/20/2016, 81 FR 64350	Adopted by the California Department of Pesticide Regulation on May 23, 2013. Submitted on February 4, 2015.

Title 13 (Motor Vehicles), Division 3 (Air Resources Board), Chapter 1 (Motor Vehicle Pollution Control Devices), Article 1 (General Provisions)

1900(b)(11) through (b)(17).	Definitions	11/22/1999	81 FR 39424, 6/16/2016	Definitions of “motorcycle engine,” “passenger car,” “recall,” “replacement part,” “subgroup,” and “reactivity adjustment factor.”
1900(b)(9) and (b)(22)	Definitions	8/7/2012	81 FR 39424, 6/16/2016	Definitions of “intermediate volume manufacturer” and “small volume manufacturer.”
1900(b)(22)	Definitions	12/31/2012	81 FR 39424, 6/16/2016	Definition of “small volume manufacturer.”

Title 13 (Motor Vehicles), Division 3 (Air Resources Board), Chapter 1 (Motor Vehicle Pollution Control Devices); Article 2 (Approval of Motor Vehicle Pollution Control Devices (New Vehicles))

1956.8(a)(2), (a)(5), (b), and (h).	Exhaust Emissions Standards and Test Procedures—1985 and Subsequent Model Heavy-Duty Engines and Vehicles.	11/17/2002	81 FR 39424, 6/16/2016	Exhaust emissions standards for new 2004 and subsequent model heavy-duty diesel engines, heavy-duty natural gas-fueled and LPG-fueled engines derived from diesel-cycle engines; crankcase emissions requirements; test procedures.
1956.8(b), (c)(1)(B), (d), and (h)(2) (footnotes J and K).	Exhaust Emissions Standards and Test Procedures—1985 and Subsequent Model Heavy-Duty Engines and Vehicles.	12/4/2003	81 FR 39424, 6/16/2016	Test procedures; exhaust emissions standards for new 2005 and subsequent model HD OC engines.
1956.8(a)(2)(A), (a)(6), and (b).	Exhaust Emissions Standards and Test Procedures—1985 and Subsequent Model Heavy-Duty Engines and Vehicles.	11/15/2006	81 FR 39424, 6/16/2016	Heavy-duty diesel engine idling requirements; test procedures.
1956.8	Exhaust Emissions Standards and Test Procedures—1985 and Subsequent Model Heavy-Duty Engines and Vehicles.	12/31/2008	5/12/2010, 75 FR 26653	Submitted on February 3, 2009. See 40 CFR 52.220(c)(376)(i)(A)(1).

Environmental Protection Agency

§ 52.220a

TABLE 1—EPA-APPROVED STATUTES AND STATE REGULATIONS ¹—Continued

State citation	Title/subject	State effective date	EPA approval date	Additional explanation
1956.8(b), (c)(1)(B), (c)(3), (d), (h)(2), and (h)(5).	Exhaust Emissions Standards and Test Procedures—1985 and Subsequent Model Heavy-Duty Engines and Vehicles.	8/7/2012	81 FR 39424, 6/16/2016	Test procedures; exhaust emissions standard for new 2005 and subsequent model HD OC engines; 1992 and subsequent model diesel engines used in MD low-emissions vehicles.
1956.8(b), (c)(1)(A)(3), (d), and (h)(5).	Exhaust Emissions Standards and Test Procedures—1985 and Subsequent Model Heavy-Duty Engines and Vehicles.	12/31/2012	81 FR 39424, 6/16/2016	Test procedures; exhaust emissions standard for new 2005 and subsequent model HD OC engines; 1992 and subsequent model diesel engines used in MD low-emissions vehicles.
1956.8(b)	Exhaust Emissions Standards and Test Procedures—1985 and Subsequent Model Heavy-Duty Engines and Vehicles.	12/22/2011	83 FR 23232, 5/18/2018	Updates certain test procedures.
1958(a) (excluding (a)(1)), (b)(1), (b)(2), (f), (g), and (h).	Exhaust Emissions Standards and Test Procedures—Motorcycles and Motorcycle Engines Manufactured on or after January 1, 1978.	11/22/1999	81 FR 39424, 6/16/2016	Exhaust emissions standards for HC + NO _x and for CO; different standards established for different sizes and for different models years; provisions for small volume manufacturers and for early-compliance credits; sunset review. Excluded subsection relates to an exclusion for motorcycles or motorcycle engines where the engine displacement is less than 50 cubic centimeters.
1960.1	Exhaust Emissions Standards and Test Procedures—1981 through 2006 Model Passenger Cars, Light-Duty and Medium-Duty Vehicles.	3/26/2004	5/12/2010, 75 FR 26653	Submitted on February 3, 2009. See 40 CFR 52.220(c)(376)(i)(A)(1).
1960.1(r)	Exhaust Emission Standards and Test Procedures—1981 through 2006 Model Passenger Cars, Light Duty Trucks, and Medium Duty Vehicles.	8/7/2012	81 FR 39424, 6/16/2016	4,000-mile Supplement FTP Emission Standards for LEV, ULEV, and SULEV in the PC, LDT, and MDVs.
1960.1(r)	Exhaust Emission Standards and Test Procedures—1981 through 2006 Model Passenger Cars, Light Duty Trucks, and Medium Duty Vehicles.	12/31/2012	81 FR 39424, 6/16/2016	4,000-mile Supplement FTP Emission Standards for LEV, ULEV, and SULEV in the PC, LDT, and MDVs.
1961, including Introduction, (a)(4), (a)(8), (a)(12), (a)(15); (b)(3)(B), (b)(3)(C), (b)(3)(D), (b)(3)(E); (d); and (e).	Exhaust Emission Standards and Test Procedures—2004 and Subsequent Model Passenger Cars, Light-Duty Trucks, and Medium-Duty Vehicles.	12/4/2003	81 FR 39424, 6/16/2016	50 °F Exhaust emissions standards, requirements for vehicles certified to the optional 150,000 mile standards, NMOG credit provisions, fuel-fired heater provisions, phase-in requirements for MDV manufacturers; test procedures.

TABLE 1—EPA-APPROVED STATUTES AND STATE REGULATIONS ¹—Continued

State citation	Title/subject	State effective date	EPA approval date	Additional explanation
1961(d)	Exhaust Emission Standards and Test Procedures—2004 and Subsequent Model Passenger Cars, Light-Duty Trucks, and Medium-Duty Vehicles.	2/17/2007	81 FR 39424, 6/16/2016	Test procedures.
1961	Exhaust Emissions Standards and Test Procedures—2004 and Subsequent Model Passenger Cars, Light-Duty and Medium-Duty Vehicles.	6/16/2008	5/12/2010, 75 FR 26653	Submitted on February 3, 2009. See 40 CFR 52.220(c)(376)(i)(A)(1).
1961, including Introduction, (a)(1), (a)(3), (a)(4), (a)(5), (a)(7), (a)(8)(B), (a)(14)(A); (b)(1)(A), (b)(1)(B)(1)(c.), (b)(1)(B)(3.), (b)(1)(C)(1.), (b)(1)(D), (b)(3)(A), (b)(3)(B), (b)(3)(C), (b)(3)(E); (c)(1), (c)(2)(A), (c)(3)(A), (d).	Exhaust Emission Standards and Test Procedures—2004 through 2019 Model Passenger Cars, Light-Duty Trucks, and Medium-Duty Vehicles.	8/7/2012	81 FR 39424, 6/16/2016	“LEV III” exhaust emission standards for 2004 through 2019 model PC, LDT, and MDV; test procedures.
1961, including Introduction, (a)(1), (b)(1)(A), (d).	Exhaust Emission Standards and Test Procedures—2004 through 2019 Model Passenger Cars, Light-Duty Trucks, and Medium-Duty Vehicles.	12/31/2012	81 FR 39424, 6/16/2016	“LEV III” exhaust emission standards for 2004 through 2019 model PC, LDT, and MDV; test procedures.
1961.2	Exhaust Emission Standards and Test Procedures—2015 and Subsequent Model Passenger Cars, Light-Duty Trucks, and Medium-Duty Vehicles.	8/7/2012	81 FR 39424, 6/16/2016	“LEV III” exhaust emission standards for 2015 and subsequent model year PC, LDT, and MDV.
1961.2, including Introduction, (a)(1), (a)(2)(A), (a)(2)(D), (a)(7)(A), (a)(7)(A)(2.) (through equation 2), (A)(9), (b)(1)(A), (b)(1)(A)(2.), (b)(1)(D), (b)(4)(A), (c)(1)(B), (c)(3)(B), and (d).	Exhaust Emission Standards and Test Procedures—2015 and Subsequent Model Passenger Cars, Light-Duty Trucks, and Medium-Duty Vehicles.	12/31/2012	81 FR 39424, 6/16/2016	“LEV III” exhaust emission standards for 2015 and subsequent model year PC, LDT, and MDV.
1962.1	Zero-Emission Vehicle Standards for 2009 through 2017 Model Year Passenger Cars, Light-Duty Trucks, and Medium-Duty Vehicles.	8/7/2012	81 FR 39424, 6/16/2016	ZEV standards, percentage ZEV requirements, PZEV provisions, qualification for ZEV multipliers and credits, generation and use of credits, calculation of penalties, test procedures.
1962.1(b)(2)(D)(1) and (2), (c)(3)(A), and (h)(1).	Zero-Emission Vehicle Standards for 2009 through 2017 Model Year Passenger Cars, Light-Duty Trucks, and Medium-Duty Vehicles.	12/31/2012	81 FR 39424, 6/16/2016	ZEV requirements for large volume manufacturers in model years 2012 through 2017 and PZEV allowances; test procedures, ZEV-specific definitions.

Environmental Protection Agency

§ 52.220a

TABLE 1—EPA-APPROVED STATUTES AND STATE REGULATIONS ¹—Continued

State citation	Title/subject	State effective date	EPA approval date	Additional explanation
1962.2, excluding (g)(6)(C).	Zero-Emission Vehicle Standards for 2018 and Subsequent Model Year Passenger Cars, Light-Duty Trucks, and Medium-Duty Vehicles.	8/7/2012	81 FR 39424, 6/16/2016	ZEV standards, percentage ZEV requirements, TZEZ provisions, qualification of ZEV credits, generation and use of credits, test procedures, ZEV-specific definitions; excluded provision relates to GHG-ZEV over compliance credits.
1962.2(c)(2)(B), (c)(3)(A), (c)(3)(A)(1.), (h)(1).	Zero-Emission Vehicle Standards for 2018 and Subsequent Model Year Passenger Cars, Light-Duty Trucks, and Medium-Duty Vehicles.	12/31/2012	81 FR 39424, 6/16/2016	Certain ZEV requirements in model years 2018 and subsequent model years including evaporative emission standards for TZEZs, TZEZ allowances, and test procedures.
1962.3	Electric Vehicle Charging Requirements.	8/7/2012	81 FR 39424, 6/16/2016	Applicability, definitions, requirements, alternatives.
1965	Emission Control and Smog Index Labels—1979 and Subsequent Model-Year Motor Vehicles.	11/22/1999	81 FR 39424, 6/16/2016	Emission control label requirements.
1965	Emission Control and Smog Index Labels—1979 and Subsequent Model-Year Motor Vehicles.	12/4/2003	81 FR 39424, 6/16/2016	Emission control label requirements.
1965	Emission Control, Smog Index, and Environmental Performance Labels—1979 and Subsequent Model-Year Motor Vehicles.	8/7/2012	81 FR 39424, 6/16/2016	Emission control label requirements.
1968.2(a), (c) (excluding "emission standard," "evaporative emission standards," and "exhaust emission standards"), (d)(3), (d)(4), (e)(6), (e)(15), (f)(1)–(f)(9), (f)(12), (f)(13), (f)(15), (f)(17), (h)(4), (i)(1), (i)(2), and (j)(2).	Malfunction and Diagnostic System Requirements—2004 and Subsequent Model-Year Passenger Cars, Light-Duty Trucks, and Medium-Duty Vehicles and Engines.	7/31/2013	82 FR 14446, 3/21/2017	Provisions relate to On-Board Diagnostic systems requirements (OBD II).
1968.5(a)(3) (excluding "nonconforming OBD II system"), (b)(3), (b)(6), and (c)(3).	Enforcement of Malfunction and Diagnostic System Requirements for 2004 and Subsequent Model-Year Passenger Cars, Light-Duty Trucks, and Medium-Duty Vehicles and Engines.	7/31/2013	82 FR 14446, 3/21/2017	Provisions related to enforcement of OBD II requirements.

TABLE 1—EPA-APPROVED STATUTES AND STATE REGULATIONS ¹—Continued

State citation	Title/subject	State effective date	EPA approval date	Additional explanation
1971.1, excluding the following definitions: "emission standard," "evaporative emission standards," and "exhaust emission standards" or "tailpipe emission standards").	On-Board Diagnostic System Requirements—2010 and Subsequent Model-Year Heavy-Duty Engines.	7/31/2013	82 FR 14446, 3/21/2017	Amends emission standards and other requirements for On-Board Diagnostic OBD (OBD) systems for heavy-duty vehicles.
1971.5	Enforcement of Malfunction and Diagnostic System Requirements for 2010 and Subsequent Model-Year Heavy-Duty Engines.	6/17/2010	81 FR 39424, 6/16/2016	Establishes enforcement protocol for use by CARB to assure the engines certified for sale in California are equipped with OBD systems that properly function and meet the applicable regulatory requirements.
1971.5(a)(3) (excluding amendments to the existing definition for "nonconforming OBD system"), (b)(3), (b)(6) and (d)(3).	Enforcement of Malfunction and Diagnostic System Requirements for 2010 and Subsequent Model-Year Heavy-Duty Engines.	7/31/2013	82 FR 14446, 3/21/2017	Amends certain enforcement-related provisions for the OBD systems requirements for heavy-duty vehicles.
1976(c)	Standards and Test Procedures for Motor Vehicle Fuel Evaporative Emissions.	2/17/2007	81 FR 39424, 6/16/2016	Test procedures.
1976(b)(1), (c), (f)(3) and (f)(4).	Standards and Test Procedures for Motor Vehicle Fuel Evaporative Emissions.	8/7/2012	81 FR 39424, 6/16/2016	Fuel evaporative emission standards; test procedures; definitions.
1976(b)(1), (b)(1)(G)(3), (c).	Standards and Test Procedures for Motor Vehicle Fuel Evaporative Emissions.	12/31/2012	81 FR 39424, 6/16/2016	Fuel evaporative emission standards; test procedures; definitions.
1978(a)(1), (b)	Standards and Test Procedures for Vehicle Refueling Emissions.	12/4/2003	81 FR 39424, 6/16/2016	Standards for vehicle refueling for 1998 and subsequent model passenger cars, LDT, and MDV less than 8,501 pounds.
1978(b)	Standards and Test Procedures for Vehicle Refueling Emissions.	2/17/2007	81 FR 39424, 6/16/2016	Test procedures.
1978	Standards and Test Procedures for Vehicle Refueling Emissions.	8/7/2012	81 FR 39424, 6/16/2016	Refueling emissions standards for 1998 and subsequent model gasoline-fueled, alcohol-fueled, diesel-fueled, LPG-fueled, fuel-flexible and hybrid electric PC, LDT, and MDV up to 8,501 pounds, and similarly-fueled 2015 and subsequent year MDV from 8,501 pounds to 14,000 pounds.
Title 13 (Motor Vehicles), Division 3 (Air Resources Board), Chapter 1 (Motor Vehicle Pollution Control Devices), Article 4 (Diesel Particulate Matter Control Measures)				
2020 (paragraph (b) ("Transit Agency"), only).	Purpose and Definitions of Diesel Particulate Matter Control Measures.	1/2/2010	88 FR 10049, 2/16/2023	The definition of "Transit Agency" is relied upon by CARB's Innovative Clean Transit regulation.

Environmental Protection Agency

Title 13 (Motor Vehicles), Division 3 (Air Resources Board), Chapter 1 (Motor Vehicle Pollution Control Devices), Article 4.3 (Innovative Clean Transit)				
2023	Innovative Clean Transit Regulations Applicability and Scope.	10/1/2019	88 FR 10049, 2/16/2023	Submitted on February 13, 2020.
2023.1	Zero-Emission Bus Requirements.	10/1/2019	88 FR 10049, 2/16/2023	Submitted on February 13, 2020.
2023.2	Compliance Option for Joint Zero-Emission Bus Groups.	10/1/2019	88 FR 10049, 2/16/2023	Submitted on February 13, 2020.
2023.3	Zero-Emission Bus Bonus Credits.	10/1/2019	88 FR 10049, 2/16/2023	Submitted on February 13, 2020.
2023.4	Provisions for Exemption of a Zero-Emission Bus Purchase.	10/1/2019	88 FR 10049, 2/16/2023	Submitted on February 13, 2020.
2023.5	Zero-Emission Mobility Option.	10/1/2019	88 FR 10049, 2/16/2023	Submitted on February 13, 2020.
2023.6	Low-NO _x Engine Purchase Requirements.	10/1/2019	88 FR 10049, 2/16/2023	Submitted on February 13, 2020.
2023.7	Requirements to Use Renewable Fuels.	10/1/2019	88 FR 10049, 2/16/2023	Submitted on February 13, 2020.
2023.8	Reporting Requirements for Transit Agencies.	10/1/2019	88 FR 10049, 2/16/2023	Submitted on February 13, 2020.
2023.9	Record Keeping Requirements.	10/1/2019	88 FR 10049, 2/16/2023	Submitted on February 13, 2020.
2023.10	Authority to Suspend, Revoke, or Modify.	10/1/2019	88 FR 10049, 2/16/2023	Submitted on February 13, 2020.
2023.11	Severability	10/1/2019	88 FR 10049, 2/16/2023	Submitted on February 13, 2020.
Title 13 (Motor Vehicles), Division 3 (Air Resources Board), Chapter 1 (Motor Vehicle Pollution Control Devices); Article 4.5				
2025	Regulation to Reduce Emissions of Diesel Particulate Matter, Oxides of Nitrogen and Other Criteria Pollutants, from in-Use Heavy-Duty Diesel-Fueled Vehicles.	12/14/2011	4/4/2012, 77 FR 20308	The State of California Office of Administrative Law's corresponding Notice of Approval of Regulatory Action is dated December 14, 2011. Submitted on December 15, 2011. See 40 CFR 52.220(c)(410)(i)(A)(2).
2027	In-Use on-Road Diesel-Fueled Heavy-Duty Drayage Trucks.	11/9/2011	4/4/2012, 77 FR 20308	The State of California Office of Administrative Law's corresponding Notice of Approval of Regulatory Action is dated November 9, 2011. Submitted on December 9, 2011. See 40 CFR 52.220(c)(409)(i)(A)(2).
Title 13 (Motor Vehicles), Division 3 (Air Resources Board), Chapter 1 (Motor Vehicle Pollution Control Devices), Article 6 (Emission Control Warranty System)				
2037(g)	Defects Warranty Requirements for 1990 and Subsequent Model Passenger Cars, Light-Duty Trucks, Medium-Duty Vehicles, and Motor Vehicle Engines Used in Such Vehicles.	8/7/2012	81 FR 39424, 6/16/2016	Reporting requirements.

TABLE 1—EPA-APPROVED STATUTES AND STATE REGULATIONS ¹—Continued

State citation	Title/subject	State effective date	EPA approval date	Additional explanation
2038(c)(3)	Performance Warranty Requirements for 1990 and Subsequent Model Passenger Cars, Light-Duty Trucks, and Medium-Duty Vehicles, and Motor Vehicle Engines Used in Such Vehicles.	8/7/2012	81 FR 39424, 6/16/2016	Reporting requirements.
Title 13 (Motor Vehicles), Division 3 (Air Resources Board), Chapter 2 (Enforcement of Vehicle Emission Standards and Surveillance Testing), Article 1 (Assembly-Line Testing)				
2062	Assembly-Line Procedures—1998 and Subsequent Model Years.	8/7/2012	81 FR 39424, 6/16/2016	Assembly-line test procedures.
Title 13 (Motor Vehicles), Division 3 (Air Resources Board), Chapter 2 (Enforcement of Vehicle Emission Standards and Surveillance Testing), Article 2.1 (Procedures for In-Use Vehicle Voluntary and Influenced Recalls)				
2111(a)(1)	Applicability	8/15/2007	81 FR 39424, 6/16/2016	Procedures apply to California-certified 1982 and subsequent model-year passenger cars, light-duty trucks, medium-duty vehicles, heavy-duty vehicles, motorcycles, and 1997 and subsequent model-year off-road motorcycles and all-terrain vehicles, and 2007 and subsequent model-year off-road sport vehicles, off-road utility vehicles, and sand cars.
2111(a)(4)	Applicability	8/16/2009	81 FR 39424, 6/16/2016	Procedures apply to certain California-certified 2008 model year spark-ignition sterndrive/inboard marine engines with maximum rated power less than or equal to 373 kilowatts, and all California-certified 2009 and subsequent model-year spark-ignition sterndrive/inboard marine engines.
2112(l)(12)	Definitions	8/15/2007	81 FR 39424, 6/16/2016	Definition of “useful life” for 1997 and subsequent model year off-road motorcycles, all-terrain vehicles, and for 2007 and subsequent model year off-road sport vehicles, off-road utility vehicles, sand cars, and engines used in such vehicles.
2112(l)(20), (l)(23)	Definitions	8/16/2009	81 FR 39424, 6/16/2016	Definition of “useful life” for certain types of vehicles.
2112(b), (l)(9), (l)(18)	Definitions	8/7/2012	81 FR 39424, 6/16/2016	Definition of “correlation factor,” and definition of “useful life” for certain types of vehicles.
Title 13 (Motor Vehicles), Division 3 (Air Resources Board), Chapter 2 (Enforcement of Vehicle Emission Standards and Surveillance Testing), Article 2.3 (In-Use Vehicle Enforcement Test Procedures)				
2139(h)	Testing	8/16/2009	81 FR 39424, 6/16/2016	Specifies in-use compliance tests for spark-ignition sterndrive/inboard marine engines.
2139(a), (b), (c)(2)	Testing	8/7/2012	81 FR 39424, 6/16/2016	Specifies in-use vehicle emission tests by CARB after vehicles have been accepted and restorative maintenance, if any, has been performed.

Environmental Protection Agency

§ 52.220a

TABLE 1—EPA-APPROVED STATUTES AND STATE REGULATIONS ¹—Continued

State citation	Title/subject	State effective date	EPA approval date	Additional explanation
2140(b)	Notification and Use of Test Results.	8/7/2012	81 FR 39424, 6/16/2016	Notification and use requirements once the in-use emission tests have been completed.
Title 13 (Motor Vehicles), Division 3 (Air Resources Board), Chapter 2 (Enforcement of Vehicle Emission Standards and Surveillance Testing), Article 2.4 (Procedures for Reporting Failures of Emission-Related Components)				
2145(b)(3)	Field Information Report.	8/7/2012	81 FR 39424, 6/16/2016	Reporting requirements.
2147(b)	Demonstration of Compliance with Emissions Standards.	8/16/2009	81 FR 39424, 6/16/2016	Applies the requirements to sterndrive/inboard marine engines.
2147(b)(3)	Demonstration of Compliance with Emissions Standards.	8/7/2012	81 FR 39424, 6/16/2016	Testing requirements and selection of deterioration factors.
Title 13 (Motor Vehicles), Division 3 (Air Resources Board), Chapter 3.5. (Heavy-Duty Diesel Smoke Emission Testing, and Heavy-Duty Vehicle Emission Control System Inspections)				
2180	Applicability	7/1/2019	5/10/2022, 87 FR 27949	Unless otherwise noted, this chapter applies to all diesel-powered and gasoline-powered heavy-duty vehicles operating in California.
2180.1	Definitions	7/1/2019	5/10/2022, 87 FR 27949	Definitions for applicable vehicles, opacity standards, inspections, penalties and appeals.
2181	Responsibilities of the Driver and Inspector During the Inspection Procedure.	7/1/2019	5/10/2022, 87 FR 27949	Sets forth the responsibilities of the vehicle inspector and driver during an inspection.
2182	Heavy-Duty Diesel Vehicle Smoke Opacity Standards and Test Procedures; Excessive Smoke.	7/1/2019	5/10/2022, 87 FR 27949	Sets forth opacity standards and testing procedures.
2183	Inspection of the Emission Control System on a Heavy-Duty Vehicle.	7/1/2019	5/10/2022, 87 FR 27949	Describes the inspection procedures inspector use to determine whether the emission control components on diesel vehicles have been tampered, inadequately maintained or defective.
2184	Refusal to Submit to Inspection Procedure.	7/1/2019	5/10/2022, 87 FR 27949	Describes the consequences of a refusal to submit to a vehicle inspection.
2185	Civil Penalty Schedule	7/1/2019	5/10/2022, 87 FR 27949	Sets for the civil penalties for failing a vehicle inspection.
2186	Demonstration of Correction and Post-Repair Test or Inspection.	7/1/2019	5/10/2022, 87 FR 27949	Sets for the requirements for a vehicle owner to demonstrate correction and post-inspection repair to pass an inspection.
2187	Vehicles Removed from Service.	7/1/2019	5/10/2022, 87 FR 27949	Sets for the conditions upon which a vehicle failing inspection can be removed from, and return to, service.
2188	Contesting a Citation	7/1/2019	5/10/2022, 87 FR 27949	Describes how a vehicle owner may contest a citation for failing and inspection.
2189	Severability of Provisions.	7/1/2019	5/10/2022, 87 FR 27949	Provides that in the event any portion of the chapter is held to be invalid, unenforceable or unconstitutional, the remaining portions shall remain in effect.

TABLE 1—EPA-APPROVED STATUTES AND STATE REGULATIONS ¹—Continued

State citation	Title/subject	State effective date	EPA approval date	Additional explanation
Title 13 (Motor Vehicles), Division 3 (Air Resources Board), Chapter 3.6. (Periodic Smoke Inspections of Heavy-Duty Diesel-Powered Vehicles)				
2190	Vehicles Subject to the Periodic Smoke Inspection Requirements.	7/1/2019	5/10/2022, 87 FR 27949	Defines the heavy-duty diesel-powered vehicles operating in California that are subject to periodic smoke inspection, as well as listing those that are exempt.
2191	Definitions	7/1/2019	5/10/2022, 87 FR 27949	Defines diesel vehicle fleets subject to the regulation and applicable testing procedures.
2192	Vehicle Inspection Responsibilities.	7/1/2019	5/10/2022, 87 FR 27949	Sets forth the responsibilities of diesel vehicle fleet owners to comply with the requirements of the periodic smoke inspection program.
2193	Smoke Opacity Standards, Inspection Intervals, and Test Procedures.	7/1/2019	5/10/2022, 87 FR 27949	Sets forth opacity testing standards, inspection intervals, test procedures and alternate test procedures.
2194	Record Keeping Requirements.	7/1/2019	5/10/2022, 87 FR 27949	Requires vehicle owners to maintain records of test or alternate test results and provide them to the California Air Resources Board upon request.
Title 13 (Motor Vehicles), Division 3 (Air Resources Board), Chapter 4 (Criteria for the Evaluation of Motor Vehicle Pollution Control Devices and Fuel Additives), Article 1 (Fuel Additives and Prototype Emission Control Devices)				
2208 (paragraph (c)(18) ("Low-NO _x engine"), only).	Purpose, Applicability, Definitions, and Reference Documents.	10/16/2017	88 FR 10049, 2/16/2023	The definition of "Low-NO _x engine" is relied upon by CARB's Innovative Clean Transit regulation.
Title 13 (Motor Vehicles), Division 3 (Air Resources Board), Chapter 4.4 (Specifications for Fill Pipes and Openings of Motor Vehicle Fuel Tanks)				
2235	Requirements	8/7/2012	81 FR 39424, 6/16/2016	Requirements for 1977 and subsequent model gasoline-fueled motor vehicles with respect to fill pipes and openings.
Title 13 (Motor Vehicles), Division 3 (Air Resources Board), Chapter 5 (Standards for Motor Vehicle Fuels); Article 1 (Standards for Gasoline)				
2250	Degree of Unsaturation for Gasolines Sold Before April 1, 1996.	12/16/1992	8/21/1995, 60 FR 43379	Submitted on November 15, 1994. See 40 CFR 52.220(c)(204)(i)(A)(3).
2252	Sulfur Content of Gasoline Represented as Unleaded Sold Before April 1, 1996.	8/11/1991	8/21/1995, 60 FR 43379	Submitted on November 15, 1994. See 40 CFR 52.220(c)(204)(i)(A)(3).
2253.4	Lead in Gasoline	8/12/1991	5/12/2010, 75 FR 26653	Submitted on June 15, 2004. See 40 CFR 52.220(c)(374)(i)(A)(1).
2254	Manganese Additive Content.	8/12/1991	5/12/2010, 75 FR 26653	Submitted on June 15, 2004. See 40 CFR 52.220(c)(374)(i)(A)(1).
2257	Required Additives in Gasoline.	7/16/1999	5/12/2010, 75 FR 26653	Submitted on June 15, 2004. See 40 CFR 52.220(c)(374)(i)(A)(1).
2259	Exemptions for Motor Vehicle Fuels Used in Test Programs.	2/15/1995	5/12/2010, 75 FR 26653	Submitted on June 15, 2004. See 40 CFR 52.220(c)(374)(i)(A)(1).
2260	Definitions	8/29/2008	5/12/2010, 75 FR 26653	Submitted on February 3, 2009. See 40 CFR 52.220(c)(375)(i)(A)(1).

Environmental Protection Agency

§ 52.220a

TABLE 1—EPA-APPROVED STATUTES AND STATE REGULATIONS ¹—Continued

State citation	Title/subject	State effective date	EPA approval date	Additional explanation
2261	Applicability of Standards; Additional Standards.	8/29/2008	5/12/2010, 75 FR 26653	Submitted on February 3, 2009. See 40 CFR 52.220(c)(375)(i)(A)(1).
2262	The California Reformulated Gasoline Phase 2 and Phase 3 Standards.	8/29/2008	5/12/2010, 75 FR 26653	Submitted on February 3, 2009. See 40 CFR 52.220(c)(375)(i)(A)(1).
2262.3	Compliance with the CaRFP Phase 2 and CaRFG Phase 2 Standards for Sulfur, Benzene, Aromatic Hydrocarbons, Olefins, T50 and T90.	8/29/2008	5/12/2010, 75 FR 26653	Submitted on February 3, 2009. See 40 CFR 52.220(c)(375)(i)(A)(1).
2262.4	Compliance with the CaRFP Phase 2 and CaRFG Phase 2 Standards for Reid Vapor Pressure.	8/29/2008	5/12/2010, 75 FR 26653	Submitted on February 3, 2009. See 40 CFR 52.220(c)(375)(i)(A)(1).
2262.5	Compliance with the Standards for Oxygen Content.	8/29/2008	5/12/2010, 75 FR 26653	Submitted on February 3, 2009. See 40 CFR 52.220(c)(375)(i)(A)(1).
2262.6	Prohibition of MTBE and Oxygenates Other Than Ethanol in California Gasoline Starting December 31, 2003.	4/9/2005	5/12/2010, 75 FR 26653	Submitted on February 3, 2009. See 40 CFR 52.220(c)(375)(i)(A)(1).
2262.9	Requirements Regarding Denatured Ethanol Intended for Use as a Blend Component in California Gasoline.	8/29/2008	5/12/2010, 75 FR 26653	Submitted on February 3, 2009. See 40 CFR 52.220(c)(375)(i)(A)(1).
2263	Sampling Procedures and Test Methods.	8/29/2008	5/12/2010, 75 FR 26653	Submitted on February 3, 2009. See 40 CFR 52.220(c)(375)(i)(A)(1).
2263.7	Multiple Notification Requirements.	8/29/2008	5/12/2010, 75 FR 26653	Submitted on February 3, 2009. See 40 CFR 52.220(c)(375)(i)(A)(1).
2264	Designated Alternative Limits.	8/20/2001	5/12/2010, 75 FR 26653	Submitted on February 3, 2009. See 40 CFR 52.220(c)(375)(i)(A)(1).
2264.2	Election of Applicable Limit for Gasoline Supplied From a Production or Import Facility.	8/29/2008	5/12/2010, 75 FR 26653	Submitted on February 3, 2009. See 40 CFR 52.220(c)(375)(i)(A)(1).
2265	Gasoline Subject to PM Alternative Specifications Based on the California Predictive Model.	8/29/2008	5/12/2010, 75 FR 26653	Submitted on February 3, 2009. See 40 CFR 52.220(c)(375)(i)(A)(1).
2265.1	Offsetting Emissions Associated with Higher Sulfur Levels.	8/29/2008	5/12/2010, 75 FR 26653	Submitted on February 3, 2009. See 40 CFR 52.220(c)(375)(i)(A)(1).
2265.5	Alternative Emission Reduction Plan (AERP).	8/29/2008	5/12/2010, 75 FR 26653	Submitted on February 3, 2009. See 40 CFR 52.220(c)(375)(i)(A)(1).
2266	Certified Gasoline Formulations Resulting in Equivalent Emission Reductions Based on Motor Vehicle Emission Testing.	8/29/2008	5/12/2010, 75 FR 26653	Submitted on February 3, 2009. See 40 CFR 52.220(c)(375)(i)(A)(1).

TABLE 1—EPA-APPROVED STATUTES AND STATE REGULATIONS ¹—Continued

State citation	Title/subject	State effective date	EPA approval date	Additional explanation
2266.5	Requirements Pertaining to California Reformulated Gasoline Blendstock for Oxygen Blending (CARBOB) and Downstream Blending.	8/29/2008	5/12/2010, 75 FR 26653	Submitted on February 3, 2009. See 40 CFR 52.220(c)(375)(i)(A)(1).
2267	Exemptions for Gasoline Used in Test Programs.	9/2/2000	5/12/2010, 75 FR 26653	Submitted on June 15, 2004. See 40 CFR 52.220(c)(374)(i)(A)(1).
2268	Liability of Persons Who Commit Violations Involving Gasoline That has Not Yet Been Sold or Supplied to a Motor Vehicle.	9/2/2000	5/12/2010, 75 FR 26653	Submitted on June 15, 2004. See 40 CFR 52.220(c)(374)(i)(A)(1).
2269	Submittal of Compliance Plans.	12/24/2002	5/12/2010, 75 FR 26653	Submitted on June 15, 2004. See 40 CFR 52.220(c)(374)(i)(A)(1).
2270	Testing and Record-keeping.	8/29/2008	5/12/2010, 75 FR 26653	Submitted on February 3, 2009. See 40 CFR 52.220(c)(375)(i)(A)(1).
2271	Variances	8/29/2008	5/12/2010, 75 FR 26653	Submitted on February 3, 2009. See 40 CFR 52.220(c)(375)(i)(A)(1).
2272	CaRFP Phase 3 Standards for Qualifying Small Refiners.	5/1/2003	5/12/2010, 75 FR 26653	Submitted on June 15, 2004. See 40 CFR 52.220(c)(374)(i)(A)(1).
2273	Labeling of Equipment Dispensing Gasoline Containing MTBE.	8/29/2008	5/12/2010, 75 FR 26653	Submitted on February 3, 2009. See 40 CFR 52.220(c)(375)(i)(A)(1).
2273.5	Documentation Provided with Delivery of Gasoline to Retail Outlets.	5/1/2003	5/12/2010, 75 FR 26653	Submitted on June 15, 2004. See 40 CFR 52.220(c)(374)(i)(A)(1).
Title 13 (Motor Vehicles), Division 3 (Air Resources Board), Chapter 5 (Standards for Motor Vehicle Fuels); Article 2 (Standards for Diesel Fuel)				
2281	Sulfur Content of Diesel Fuel.	8/4/2005	5/12/2010, 75 FR 26653	Submitted on February 3, 2009. See 40 CFR 52.220(c)(376)(i)(A)(1).
2282	Aromatic Hydrocarbon Content of Diesel Fuel.	8/4/2005	5/12/2010, 75 FR 26653	Submitted on February 3, 2009. See 40 CFR 52.220(c)(376)(i)(A)(1).
2284	Lubricity of Diesel Fuel.	8/4/2005	5/12/2010, 75 FR 26653	Submitted on February 3, 2009. See 40 CFR 52.220(c)(376)(i)(A)(1).
2285	Exemption from Diesel Fuel Requirements for Military Specification Fuels Used in Qualifying Military Vehicles.	8/14/2004	5/12/2010, 75 FR 26653	Submitted on February 3, 2009. See 40 CFR 52.220(c)(376)(i)(A)(1).
Title 13 (Motor Vehicles), Division 3 (Air Resources Board), Chapter 5 (Standards for Motor Vehicle Fuels); Article 4 (Sampling and Test Procedures)				
2296	Motor Fuel Sampling Procedures.	10/14/1992	8/21/1995, 60 FR 43379	Submitted on November 15, 1994. See 40 CFR 52.220(c)(204)(i)(A)(3).

Environmental Protection Agency

§ 52.220a

TABLE 1—EPA-APPROVED STATUTES AND STATE REGULATIONS ¹—Continued

State citation	Title/subject	State effective date	EPA approval date	Additional explanation
2297	Test Method for the Determination of the Reid Vapor Pressure Equivalent Using an Automated Vapor Pressure Test Instrument.	9/17/1991	8/21/1995, 60 FR 43379	Submitted on November 15, 1994. See 40 CFR 52.220(c)(204)(i)(A)(3).
Title 13 (Motor Vehicles), Division 3 (Air Resources Board), Chapter 5.1 (Standards for Fuels for Nonvehicular Sources)				
2299.3	Airborne Toxic Control Measure for Auxiliary Diesel Engines Operated on Ocean-Going Vessels At-Berth in a California Port.	1/2/2009	81 FR 39424, 6/16/2016	Requires that any person who owns, operates, container vessel, passenger vessel, or refrigerated cargo vessel that visits a California port comply with section 93118.3 relating to the operation of auxiliary diesel engines on OGV at-berth in a California port. Also applies to any person who owns or operates a port or terminal located at a California port where container, passenger or refrigerated cargo vessels visit.
Title 13 (Motor Vehicles), Division 3 (Air Resources Board), Chapter 9 (Off-Road Vehicles and Engines Pollution Control Devices), Article 1 (Small Off-Road Engines)				
2401(a)(13), (36), (41), (51), (52).	Definitions	5/5/2010	81 FR 39424, 6/16/2016	Definitions for "eight-hour work-day," "professional level," "standard battery package," "zero-emission equipment credits," and "zero-emission equipment engine family."
2403(b)(2), (b)(3), (b)(4), (d), (e)(1).	Exhaust Emission Standards and Test Procedures—Small Off-Road Engines.	5/5/2010	81 FR 39424, 6/16/2016	Low-emitting blue sky series engine requirements, evaporative emission requirements, test procedures.
2403(b)(2)(B) and (d)	Exhaust Emission Standards and Test Procedures—Small Off-Road Engines.	1/10/2013	82 FR 14446, 3/21/2017	Amends certain certification requirements and test procedures.
2404(a)	Emission Control Labels and Consumer Information—1995 and Later Small Off-Road Engines.	11/15/2006	81 FR 39424, 6/16/2016	The requirements in section 2404 recognize the certain emission-critical or emission-related parts must be properly identified and maintained in order for engines to meet the applicable emissions standards and that information regarding engines' emissions levels may influence consumer choice.
2404(m)(1), (m)(2), (m)(3).	Emission Control Labels and Consumer Information—1995 and Later Small Off-Road Engines.	5/5/2010	81 FR 39424, 6/16/2016	Zero-emission equipment label content and placement requirements.
2404(c)(4)(A)	Emission Control Labels and Consumer Information—1995 and Later Small Off-Road Engines.	1/10/2013	82 FR 14446, 3/21/2017	Amends the rule to revise certain engine label content requirements.
2405(b)(1), (b)(2), (h)(1), (h)(2).	Defects Warranty Requirements for 1995 and Later Small Off-Road Engines.	5/5/2010	81 FR 39424, 6/16/2016	Zero-emission equipment warranty requirements.
2406(b)(1), (b)(2)	Emission Control System Warranty Statement.	5/5/2010	81 FR 39424, 6/16/2016	Warranty contact requirement.

TABLE 1—EPA-APPROVED STATUTES AND STATE REGULATIONS ¹—Continued

State citation	Title/subject	State effective date	EPA approval date	Additional explanation
2407(a)(7)	New Engine Compliance and Production Line Testing—New Small Off-Road Engine Selection, Evaluation, and Enforcement Action.	1/10/2013	82 FR 14446, 3/21/2017	Specifies use of certain test procedures.
2408(b)(2), (d)(4), (f)(1), (f)(3), (f)(4), (f)(5), (g)(1)(E), (i)(3), (i)(7).	Emission Reduction Credits—Certification Averaging, Banking, and Trading Provisions.	5/5/2010	81 FR 39424, 6/16/2016	Limits on use of certification emission credits, certain reporting requirements.
2408.1	Emission Reduction Credits—Zero-Emission Equipment Credits Averaging, Banking, and Trading Provisions.	5/5/2010	81 FR 39424, 6/16/2016	Applicability; general provisions; averaging, banking, and trading provisions; credit calculation and compliance provisions; use of zero-emission equipment credit; record-keeping and reporting.
2409(a), (b)(1), (b)(2), (b)(5), (b)(6), (d)(3).	Emission Reduction Credits—Production Credit Program for New Engines.	5/5/2010	81 FR 39424, 6/16/2016	Applicability; general provisions; certain banking provisions.

Title 13 (Motor Vehicles), Division 3 (Air Resources Board), Chapter 9 (Off-Road Vehicles and Engines Pollution Control Devices), Article 3 (Off-Highway Recreational Vehicles and Engines)

2411(a)(1), (a)(13), (a)(17), (a)(18), (a)(19).	Definitions	8/15/2007	81 FR 39424, 6/16/2016	Definitions for “all-terrain vehicle,” off-highway recreational vehicle engines,” “off-road sport vehicle,” “off-road utility vehicle,” “sand car.”
2412	Emission Standards and Test Procedures—New Off-Highway Recreational Vehicles and Engines.	8/15/2007	81 FR 39424, 6/16/2016	Exhaust and evaporative emissions standards for off-highway recreational vehicles and engines used in such vehicles produced on or after January 1, 1997 that are sold, leased, used, or introduced into commerce in California; test procedures.
2412(c) and (d)(1)	Emission Standards and Test Procedures—New Off-Highway Recreational Vehicles and Engines.	1/10/2013	82 FR 14446, 3/21/2017	Updates references to test procedures.
2413	Emission Control Labels—New Off-Highway Recreational Vehicles.	8/15/2007	81 FR 39424, 6/16/2016	Provisions related to applicability, and label content and location.
2416	Applicability	4/1/2015	83 FR 23232, 5/18/2018	Sections 2416–2419.4 establish certain evaporative emission standards for off-highway recreational vehicles.
2417	Definitions	4/1/2015	83 FR 23232, 5/18/2018	Sections 2416–2419.4 establish certain evaporative emission standards for off-highway recreational vehicles.
2418	Evaporative Emission Standards and Test Procedures.	4/1/2015	83 FR 23232, 5/18/2018	Sections 2416–2419.4 establish certain evaporative emission standards for off-highway recreational vehicles.
2419	Evaporative Emission Control Labels—New Off-Highway Recreational Vehicles.	4/1/2015	83 FR 23232, 5/18/2018	Sections 2416–2419.4 establish certain evaporative emission standards for off-highway recreational vehicles.

Environmental Protection Agency

§ 52.220a

TABLE 1—EPA-APPROVED STATUTES AND STATE REGULATIONS ¹—Continued

State citation	Title/subject	State effective date	EPA approval date	Additional explanation
2419.1	Defect Warranty Requirements for Evaporative Emissions Control Systems of 2018 and Later Model Year Off-Highway Recreational Vehicles.	4/1/2015	83 FR 23232, 5/18/2018	Sections 2416–2419.4 establish certain evaporative emission standards for off-highway recreational vehicles.
2419.2	Evaporative Emissions Control System Warranty Statement.	4/1/2015	83 FR 23232, 5/18/2018	Sections 2416–2419.4 establish certain evaporative emission standards for off-highway recreational vehicles.
2419.3	New Off-Highway Recreational Vehicle Evaporative Emission Standards, Enforcement and Recall Provisions, Warranty, Quality Audit, and New Engine Testing.	4/1/2015	83 FR 23232, 5/18/2018	Sections 2416–2419.4 establish certain evaporative emission standards for off-highway recreational vehicles.
2419.4	Evaporative Emissions Control System Testing and Certification Requirement.	4/1/2015	83 FR 23232, 5/18/2018	Sections 2416–2419.4 establish certain evaporative emission standards for off-highway recreational vehicles.

Title 13 (Motor Vehicles), Division 3 (Air Resources Board), Chapter 9 (Off-Road Vehicles and Engines Pollution Control Devices), Article 4 (Off-Road Compression-Ignition Engines and Equipment)

2420	Applicability	1/6/2006	81 FR 39424, 6/16/2016	Applies to new heavy-duty off-road CI engines produced on or after January 1, 1996 and all other new 2000 model year and later off-road CI engines, except those covered by the preemption provisions in CAA section 209(e)(1). Certification required for new engines subject to 13 CCR chapter 9, article 4.
2421	Definitions	1/6/2006	81 FR 39424, 6/16/2016	Defined terms in addition to those in 13 CCR § 1900(b).
2421(a)(1)–(a)(4), (a)(15), (a)(19)–(a)(65).	Definitions	1/10/2013	82 FR 14446, 3/21/2017	Amends and adds certain defined terms.
2423	Exhaust Emission Standards and Test Procedures—Off-Road Compression-Ignition Engines.	1/6/2006	81 FR 39424, 6/16/2016	Exhaust emissions standards (tiers 1, 2, 3 and 4), upper limits for family emission limits (tiers 1, 2, 3 and 4), low-emitting blue sky series engine requirements, crankcase emissions provisions, early certification provisions, prohibition on defeat devices, test procedures, recordkeeping and compliance calculations, economic hardship provisions, allowance for production of engines, labeling requirements.
2423(a), (b) (excluding optional alternative NO _x + NMHC standards and associated family emission limits), (c), (d), (e), (f), (g), (h), (j), (k), (l) and (m).	Exhaust Emission Standards and Test Procedures—Off-Road Compression-Ignition Engines.	1/10/2013	82 FR 14446, 3/21/2017	Amends the rule to harmonize certain aspects of the California emissions requirements with the corresponding federal emissions requirements.

TABLE 1—EPA-APPROVED STATUTES AND STATE REGULATIONS ¹—Continued

State citation	Title/subject	State effective date	EPA approval date	Additional explanation
2424	Emission Control Labels—1996 and Later Off-Road Compression-Ignition Engines.	1/6/2006	81 FR 39424, 6/16/2016	Requirements on manufacturers to affix a label on each production engine (or equipment) to provide the engine or equipment owner and service mechanic with information necessary for the proper maintenance of these parts in customer use.
2424(a)	Emission Control Labels—1996 and Later Off-Road Compression-Ignition Engines.	11/15/2006	81 FR 39424, 6/16/2016	The requirements of section 2424 recognize that certain emissions-critical or emissions-related parts must be properly identified and maintained in order for engines to meet the applicable emissions standards.
2424(a), (b), (c) and (l).	Emission Control Labels—1996 and Later Off-Road Compression-Ignition Engines.	1/10/2013	82 FR 14446, 3/21/2017	Amends the rule to reflect updated test procedures and to add provisions prohibiting altering or removal of emission control information labels except under certain circumstances.
2425	Defects Warranty Requirements for 1996 and Later Off-Road Compression-Ignition Engines.	1/6/2006	81 FR 39424, 6/16/2016	Applies to new 1996–1999 model year heavy-duty off-road CI engines and new 2000 and later model year CI engines.
2425(e)	Defects Warranty Requirements for 1996 and Later Off-Road Compression-Ignition Engines.	11/15/2006	81 FR 39424, 6/16/2016	Requirement on manufacturers to furnish with each new engine written instructions for the maintenance and use of the engine by the owner.
2425(a)	Defects Warranty Requirements for 1996 and Later Off-Road Compression-Ignition Engines.	1/10/2013	82 FR 14446, 3/21/2017	Amends the rule to apply certain federal warranty-related requirements to 2011 and later model-year compression-ignition engines.
2425.1	Defect Investigation and Reporting Requirements.	1/10/2013	82 FR 14446, 3/21/2017	Amends the rule to reflect certain updated test procedures.
2426	Emission Control System Warranty Statement.	1/6/2006	81 FR 39424, 6/16/2016	Requires manufacturers to furnish a specific warranty statements with each 1996–1999 heavy-duty off-road CI engine.
2426(a) and (b)	Emission Control System Warranty Statement.	1/10/2013	82 FR 14446, 3/21/2017	Amends an existing SIP rule to make changes conforming to the changes made in 13 CCR § 2423.
2427	Production Engine Testing, Selection, Evaluation, and Enforcement Action.	1/6/2006	81 FR 39424, 6/16/2016	Compliance test procedures, quality-audit test procedures, selective enforcement audit requirements.
2427(c)	Production Engine Testing, Selection, Evaluation, and Enforcement Action.	1/10/2013	82 FR 14446, 3/21/2017	Amends an existing SIP rule to reflect updated test procedures.
Title 13 (Motor Vehicles), Division 3 (Air Resources Board), Chapter 9 (Off-Road Vehicles and Engines Pollution Control Devices), Article 4.5 (Off-Road Large Spark-Ignition Engines)				
2430	Applicability	5/12/2007	81 FR 39424, 6/16/2016	Applies to LSI off-road engines 25 horsepower or greater after 1/1/2001 and all equipment and vehicles after 1/1/2001 that use such engines. On 1/1/2007, applicability remains the same but is defined in terms of kW (<i>i.e.</i> , 19 kW and above).

Environmental Protection Agency

§ 52.220a

TABLE 1—EPA-APPROVED STATUTES AND STATE REGULATIONS ¹—Continued

State citation	Title/subject	State effective date	EPA approval date	Additional explanation
2431(a), (a)(19), (a)(28).	Definitions	5/12/2007	81 FR 39424, 6/16/2016	Definitions of "Family Emission Level or FEL" and "Off-Road Large Spark-Ignition Engines" or "LSI Engines."
2433	Emission Standards and Test Procedures—Off-Road Large Spark Ignition Engines.	5/12/2007	81 FR 39424, 6/16/2016	New off-road LSI exhaust, crankcase, and evaporative emission standards and test procedures.
2433(b)(1)(A), (b)(2), (b)(3), (b)(4), (b)(5), (c) and (d).	Emission Standards and Test Procedures—Off-Road Large Spark Ignition Engines.	10/20/2009	82 FR 14446, 3/21/2017	Amends the rule creating two new subcategories of LSI engines, establishing exhaust and evaporative emissions standards for new 2011 and subsequent model year LSI engines in each of these new subcategories, and establishing more stringent exhaust emissions standards for 2015 and subsequent model year LSI engines with engine displacement 825cc <1.0 L.
2433(c) and (d)(1)	Emission Standards and Test Procedures—Off-Road Large Spark Ignition Engines.	1/10/2013	82 FR 14446, 3/21/2017	Amends the rule to refer to updated test procedures.
2434(c)	Emission Control Labels—2001 and Later Off-Road Large Spark-Ignition Engines.	5/12/2007	81 FR 39424, 6/16/2016	Label content and location requirements.
2438(e)(7)	In-Use Compliance Program.	5/12/2007	81 FR 39424, 6/16/2016	Credit calculation.

Title 13 (Motor Vehicles), Division 3 (Air Resources Board), Chapter 9 (Off-Road Vehicles and Engines Pollution Control Devices), Article 4.7 (Spark-Ignition Marine Engines)

2440(a)(3)	Applicability	8/16/2009	81 FR 39424, 6/16/2016	Exemption for spark-ignition sterndrive/inboard marine engines used solely for competition.
2442(a)(1), (a)(2), (b), (c), (d), (e), (f), (g), (h).	Emissions Standards	8/16/2009	81 FR 39424, 6/16/2016	Model year 2001 and later model year spark-ignition personal watercraft and outboard marine engines; model year 2003 and later model year spark-ignition sterndrive/inboard marine engines; Not-to-Exceed (NTE) limits; voluntary standards; new replacement engine requirements for manufacturers; test equipment and test procedures.
2443.1(b)(1), (c)(2)(B), (c)(4)(B), (c)(4)(D), (c)(4)(G), (c)(4)(H), (d)(4)(B).	Emission Control Labels—Model Year 2001 and Later Spark-Ignition Marine Engines.	8/16/2009	81 FR 39424, 6/16/2016	Requirements related to emission control labels.
2443.2(b)(1), (c)(1), (c)(2), (e).	Consumer/Environmental Label Requirements.	8/16/2009	81 FR 39424, 6/16/2016	Label requirements for certified model year 2001 and later spark-ignition personal watercraft and outboard marine engines and certified model year 2003 and later spark-ignition sterndrive/inboard engines.

TABLE 1—EPA-APPROVED STATUTES AND STATE REGULATIONS ¹—Continued

State citation	Title/subject	State effective date	EPA approval date	Additional explanation
2444.1(a), (b)(3)(B), (b)(3)(E), (b)(3)(G), (e)(4)(A)(1. Through 10.), (e)(4)(B), (e)(4)(C)(1., 2., and 3.).	In-Use Compliance Testing and Recall Regulations—Model Year 2001 and Later Spark-Ignition Marine Engines.	8/16/2009	81 FR 39424, 6/16/2016	Recordkeeping and reporting requirements.
2444.2	On-Board Engine Malfunction Detection System Requirements—Model Year 2007 and Later Spark-Ignition Sterndrive/Inboard Marine Engines.	8/16/2009	81 FR 39424, 6/16/2016	General requirements; monitoring requirements; additional audio/visual alert device activation and diagnostic trouble code storage protocol; tampering protection; certification documentation; testing, standardization, and implementation schedule.
2445.1(a), (c)(1), (c)(2), (c)(3), (e)(10), (e)(11), (g)(2)(A).	Defects Warranty Requirements for Model Year 2001 and Later Spark-Ignition Marine Engines.	8/16/2009	81 FR 39424, 6/16/2016	Warranty requirements.
2445.2(a)	Emission Control Warranty Statements.	8/16/2009	81 FR 39424, 6/16/2016	Emission control warranty statement requirements.
2446(a), (b)(4)(B), (c)(1)(A), (c)(1)(B), (c)(2)(A), (c)(3)(D), (c)(3)(E), (d)(3)(D), (d)(5), (e).	2001 and Later Model Year Production-Line Test Procedures and Selective Enforcement Auditing Regulations for Spark-Ignition Marine Engines.	8/16/2009	81 FR 39424, 6/16/2016	Applicability provision; certain quality-audit line test procedures for 2001 and later model years; test procedures; selective enforcement auditing regulations.
2447	California Exhaust Emission Standards and Test Procedures for 2001 Model Year and Later Spark-Ignition Marine Engines.	1/10/2013	82 FR 14446, 3/21/2017	Specifies certain test procedures.

Title 13 (Motor Vehicles), Division 3 (Air Resources Board), Chapter 9 (Off-Road Vehicles and Engines Pollution Control Devices), Article 4.8 (In-Use Off-Road Diesel-Fueled Fleets)

2449, excluding (d)(2)	General Requirements for In-Use Off-Road Diesel-Fueled Fleets.	12/14/2011	81 FR 39424, 6/16/2016	Applicability, definitions, performance requirements (different requirements apply to large, medium and small fleets), compliance date extension provision, labeling requirements, reporting and recordkeeping requirements. Excluded subsection relates to idling limits.
2449.1	Performance Requirements.	12/14/2011	81 FR 39424, 6/16/2016	Establishes fleet average requirements and compliance dates, BACT provisions, credit provisions.
2449.2, excluding (f)(4).	Surplus Off-Road Opt-In for NO _x (SOON) Program.	12/14/2011	81 FR 39424, 6/16/2016	Purpose is to achieve additional reductions of NO _x from in-use off-road diesel-fueled vehicles beyond those achieved through implementation of the requirements in 13 CCR §§ 2449 and 2449.1. Applicability, definitions, requirements, SOON targets, local air district opt-in provisions.

Environmental Protection Agency

§ 52.220a

TABLE 1—EPA-APPROVED STATUTES AND STATE REGULATIONS ¹—Continued

State citation	Title/subject	State effective date	EPA approval date	Additional explanation
Title 13 (Motor Vehicles), Division 3 (Air Resources Board), Chapter 9 (Off-Road Vehicles and Engines Pollution Control Devices), Article 5 (Portable Engine and Equipment Registration)				
2451	Applicability	9/12/2007	81 FR 39424, 6/16/2016	Voluntary registration program for owners or portable engines or equipment units, with certain exceptions. If not registered under this program, the engine or equipment units shall be subject to district permitting requirements pursuant to district regulations.
2452	Definitions	9/12/2007	81 FR 39424, 6/16/2016	Definitions that apply to the portable engine and equipment registration regulations.
2453	Application Process ...	9/12/2007	81 FR 39424, 6/16/2016	To be considered for registration, portable engines or equipment units must meet the requirements in article 5, including the application-related requirements in this section.
2455, excluding (a) and (b).	General Requirements.	9/12/2007	81 FR 39424, 6/16/2016	Provisions related to operation of portable engines and equipment units during emergency events; PSD notification requirements if the registered equipment unit operates at a major stationary source. Excluded subsections relate to attainment or maintenance of ambient air quality standards, nuisance, and opacity.
2456, excluding (a), (d)(3), (d)(5), and (d)(6).	Engine Requirements	9/12/2007	81 FR 39424, 6/16/2016	Various requirements specified for different categories of engines. Excluded subsections relate to opacity limits, fuel specifications, and daily and annual mass (per engine) limits.
2458	Recordkeeping and Reporting.	9/12/2007	81 FR 39424, 6/16/2016	Recordkeeping and reporting requirements for owners of registered portable engines and equipment units.
2459	Notification	9/12/2007	81 FR 39424, 6/16/2016	In most instances, if a registered equipment unit will be at a location for more than five days, the owner or operator of that equipment must notify the district in writing.
2460	Inspections and Testing.	9/12/2007	81 FR 39424, 6/16/2016	Authorization for CARB to conduct testing both before and after registration in the program. Districts must inspect all register engines and equipment units for which the district has been designated as the home district. Test methods are specified.
2461	Fees	9/12/2007	81 FR 39424, 6/16/2016	Provisions establishing fees for registration, renewal, and associated administrative tasks.
2462	Duration of Registration.	9/12/2007	81 FR 39424, 6/16/2016	Registrations and renewal are generally valid for three years from the date of issuance.

Title 13 (Motor Vehicles), Division 3 (Air Resources Board), Chapter 9 (Off-Road Vehicles and Engines Pollution Control Devices), Article 7 (Certification Procedures for Aftermarket Parts for Off-Road Vehicles, Engines, Equipment)				
2474(e), (i)(1)	Add-On Parts and Modified Parts.	8/16/2009	81 FR 39424, 6/16/2016	Incorporation of procedures for exemptions of add-on and modified parts for off-road categories.
Title 13 (Motor Vehicles), Division 3 (Air Resources Board), Chapter 9 (Off-Road Vehicles and Engines Pollution Control Devices), Article 8 (Off-Road Airborne Toxic Control Measures)				
2477	Airborne Toxic Control Measure for In-Use Diesel-Fueled Transport Refrigeration Units (TRU) and TRU Generator Sets, and Facilities Where TRUs Operate.	10/15/2012	83 FR 23232, 5/18/2018	Sections 2477–2477.21 establish emissions standards and other requirements relating to the control of emissions from in-use diesel-fueled transport refrigeration units (TRUs), TRU generator sets, and facilities where TRUs operate.
2477.1	Purpose	10/15/2012	83 FR 23232, 5/18/2018	Sections 2477–2477.21 establish emissions standards and other requirements relating to the control of emissions from in-use diesel-fueled transport refrigeration units (TRUs), TRU generator sets, and facilities where TRUs operate.
2477.2	Applicability	10/15/2012	83 FR 23232, 5/18/2018	Sections 2477–2477.21 establish emissions standards and other requirements relating to the control of emissions from in-use diesel-fueled transport refrigeration units (TRUs), TRU generator sets, and facilities where TRUs operate.
2477.3	Exemptions	10/15/2012	83 FR 23232, 5/18/2018	Sections 2477–2477.21 establish emissions standards and other requirements relating to the control of emissions from in-use diesel-fueled transport refrigeration units (TRUs), TRU generator sets, and facilities where TRUs operate.
2477.4	Definitions	10/15/2012	83 FR 23232, 5/18/2018	Sections 2477–2477.21 establish emissions standards and other requirements relating to the control of emissions from in-use diesel-fueled transport refrigeration units (TRUs), TRU generator sets, and facilities where TRUs operate.
2477.5	Requirements for Owners or Owner/Operators.	10/15/2012	83 FR 23232, 5/18/2018	Sections 2477–2477.21 establish emissions standards and other requirements relating to the control of emissions from in-use diesel-fueled transport refrigeration units (TRUs), TRU generator sets, and facilities where TRUs operate.
2477.6	Requirements for Terminal Operators.	10/15/2012	83 FR 23232, 5/18/2018	Sections 2477–2477.21 establish emissions standards and other requirements relating to the control of emissions from in-use diesel-fueled transport refrigeration units (TRUs), TRU generator sets, and facilities where TRUs operate.

Environmental Protection Agency

2477.7	Requirements for Drivers.	10/15/2012	83 FR 23232, 5/18/2018	Sections 2477–2477.21 establish emissions standards and other requirements relating to the control of emissions from in-use diesel-fueled transport refrigeration units (TRUs), TRU generator sets, and facilities where TRUs operate.
2477.8	Requirements for Freight Brokers and Freight Forwarders.	10/15/2012	83 FR 23232, 5/18/2018	Sections 2477–2477.21 establish emissions standards and other requirements relating to the control of emissions from in-use diesel-fueled transport refrigeration units (TRUs), TRU generator sets, and facilities where TRUs operate.
2477.9	Requirements for Motor Carriers.	10/15/2012	83 FR 23232, 5/18/2018	Sections 2477–2477.21 establish emissions standards and other requirements relating to the control of emissions from in-use diesel-fueled transport refrigeration units (TRUs), TRU generator sets, and facilities where TRUs operate.
2477.10	Requirements for California-Based Shippers.	10/15/2012	83 FR 23232, 5/18/2018	Sections 2477–2477.21 establish emissions standards and other requirements relating to the control of emissions from in-use diesel-fueled transport refrigeration units (TRUs), TRU generator sets, and facilities where TRUs operate.
2477.11	Requirements for California-Based Receivers.	10/15/2012	83 FR 23232, 5/18/2018	Sections 2477–2477.21 establish emissions standards and other requirements relating to the control of emissions from in-use diesel-fueled transport refrigeration units (TRUs), TRU generator sets, and facilities where TRUs operate.
2477.12	Requirements for Lessors and Lessees.	10/15/2012	83 FR 23232, 5/18/2018	Sections 2477–2477.21 establish emissions standards and other requirements relating to the control of emissions from in-use diesel-fueled transport refrigeration units (TRUs), TRU generator sets, and facilities where TRUs operate.
2477.13	Requirements for TRU and TRU Gen Set Original Equipment Manufacturers.	10/15/2012	83 FR 23232, 5/18/2018	Sections 2477–2477.21 establish emissions standards and other requirements relating to the control of emissions from in-use diesel-fueled transport refrigeration units (TRUs), TRU generator sets, and facilities where TRUs operate.
2477.14	Requirements for TRU, TRU Gen Set, and TRU-Equipped Truck and Trailer Dealers.	10/15/2012	83 FR 23232, 5/18/2018	Sections 2477–2477.21 establish emissions standards and other requirements relating to the control of emissions from in-use diesel-fueled transport refrigeration units (TRUs), TRU generator sets, and facilities where TRUs operate.

TABLE 1—EPA-APPROVED STATUTES AND STATE REGULATIONS ¹—Continued

State citation	Title/subject	State effective date	EPA approval date	Additional explanation
2477.15	Requirements for Repair Shops Located in California that Work on TRUs or TRU Gen Sets.	10/15/2012	83 FR 23232, 5/18/2018	Sections 2477–2477.21 establish emissions standards and other requirements relating to the control of emissions from in-use diesel-fueled transport refrigeration units (TRUs), TRU generator sets, and facilities where TRUs operate.
2477.16	Requirements for Engine Rebuilders.	10/15/2012	83 FR 23232, 5/18/2018	Sections 2477–2477.21 establish emissions standards and other requirements relating to the control of emissions from in-use diesel-fueled transport refrigeration units (TRUs), TRU generator sets, and facilities where TRUs operate.
2477.17	Facility Reporting	10/15/2012	83 FR 23232, 5/18/2018	Sections 2477–2477.21 establish emissions standards and other requirements relating to the control of emissions from in-use diesel-fueled transport refrigeration units (TRUs), TRU generator sets, and facilities where TRUs operate.
2477.18	Prohibitions	10/15/2012	83 FR 23232, 5/18/2018	Sections 2477–2477.21 establish emissions standards and other requirements relating to the control of emissions from in-use diesel-fueled transport refrigeration units (TRUs), TRU generator sets, and facilities where TRUs operate.
2477.19	Penalties	10/15/2012	83 FR 23232, 5/18/2018	Sections 2477–2477.21 establish emissions standards and other requirements relating to the control of emissions from in-use diesel-fueled transport refrigeration units (TRUs), TRU generator sets, and facilities where TRUs operate.
2477.20	Authority to Request Additional Information.	10/15/2012	83 FR 23232, 5/18/2018	Sections 2477–2477.21 establish emissions standards and other requirements relating to the control of emissions from in-use diesel-fueled transport refrigeration units (TRUs), TRU generator sets, and facilities where TRUs operate.
2477.21	Severability	10/15/2012	83 FR 23232, 5/18/2018	Sections 2477–2477.21 establish emissions standards and other requirements relating to the control of emissions from in-use diesel-fueled transport refrigeration units (TRUs), TRU generator sets, and facilities where TRUs operate.

TABLE 1—EPA-APPROVED STATUTES AND STATE REGULATIONS ¹—Continued

State citation	Title/subject	State effective date	EPA approval date	Additional explanation
2479, excluding (e)(2) and (e)(4).	Regulation for Mobile Cargo Handling Equipment at Ports and Intermodal Rail Yards.	12/31/2006	81 FR 39424, 6/16/2016	Applies to any person who conducts business in California who sells, offers for sale, leases, rents, purchases, owns or operates any CI mobile cargo handling equipment that operates at any California port or intermodal rail yard. Includes exemptions, definitions, performance standards for newly purchased leased or rented yard trucks and non-yard truck cargo handling equipment, provisions for compliance extensions and alternative compliance plans, recordkeeping and reporting requirements, test methods. Excluded subsections relate to in-use performance standards for yard trucks, and fuel requirements.
2479(a), (b), (c), (d), (e)(1), (e)(3), (e)(5), (f)(1), (f)(2), (f)(3), (f)(6), (h)(1), (i), (j)(1), (j)(2), (j)(3), (k), (l), (m), (n), (o), (p), (q), (r).	Regulation for Mobile Cargo Handling Equipment at Ports and Intermodal Rail Yards.	10/14/2012	81 FR 39424, 6/16/2016	Amendments to exemptions, definitions, performance standards for newly purchased leased or rented equipment and in-use performance standards for non-yard truck mobile CHE, provisions for compliance extensions and alternative compliance plans, recordkeeping and reporting requirements, test methods.
Title 13 (Motor Vehicles), Division 3 (Air Resources Board), Chapter 10 (Mobile Source Operational Controls), Article 1 (Motor Vehicles)				
2485, excluding (c)(1)(A), (c)(1)(B), (c)(3)(B).	Airborne Toxic Control Measure to Limit Diesel-Fueled Commercial Motor Vehicle Idling.	11/15/2006	81 FR 39424, 6/16/2016	Establishes requirements to reduce emissions from idling of diesel-fueled commercial motor vehicles that operate in California with gross vehicle weight ratings greater than 10,000 pounds; exceptions; enforcement and penalty provisions; definitions. Excluded subsections relate to idling restrictions on drivers and a fuel-fired heater provision.
2485, subsections (c)(1)(A), (c)(1)(B) only.	Airborne Toxic Control Measure to Limit Diesel-Fueled Commercial Motor Vehicle Idling.	11/15/2006	82 FR 61178, 12/27/2017	Submitted December 9, 2011. Limits diesel vehicle idling to 5 minutes.
Title 13 (Motor Vehicles), Division 3 (Air Resources Board), Chapter 14 (Verification Procedures, Warranty and In-Use Compliance Requirements for In-Use Strategies to Control Emissions from Diesel Engines)				
2701	Definitions	1/1/2005	5/12/2010, 75 FR 26653	Submitted on February 3, 2009. See 40 CFR 52.220(c)(376)(i)(A)(1).

TABLE 1—EPA-APPROVED STATUTES AND STATE REGULATIONS ¹—Continued

State citation	Title/subject	State effective date	EPA approval date	Additional explanation
Title 13 (Motor Vehicles), Division 3 (Air Resources Board), Chapter 15 (Additional Off-Road Vehicles and Engines Pollution Control Requirements), Article 2 (Large Spark Ignition (LSI) Engines Fleet Requirements)				
2775	Applicability	12/14/2011	82 FR 14446, 3/21/2017	Applies to operators of certain off-road LSI engine forklifts, sweepers/scrubbers, industrial tow tractors or airport ground support equipment operated within the State of California. Exemptions provided for small fleets and certain other equipment. Includes definitions.
2775.1	Standards	12/14/2011	82 FR 14446, 3/21/2017	Establishes fleet average emission level standards with certain exceptions.
2775.2	Compliance Requirements for Fleet Operators.	12/14/2011	82 FR 14446, 3/21/2017	Compliance and recordkeeping requirements, provisions for extensions in compliance dates.
Title 13 (Motor Vehicles), Division 3 (Air Resources Board), Chapter 15 (Additional Off-Road Vehicles and Engines Pollution Control Requirements), Article 3 (Verification Procedure, Warranty, and In-Use Compliance Requirements for Retrofits to Control Emissions from Off-Road Large Spark-Ignition Engines)				
2783(d)(1)–(d)(4)	Emissions Reduction Testing Requirements.	1/10/2013	82 FR 14446, 3/21/2017	Specifies test fuels for emissions reduction testing purposes for gasoline-fueled, off-road, large spark-ignition engines.
2784(c)(1)–(c)(4)	Durability Demonstration Requirements.	1/10/2013	82 FR 14446, 3/21/2017	Specifies test fuels for durability demonstration purposes for gasoline-fueled, off-road, large spark-ignition engines.
Title 16 (Professional and Vocational Regulations), Division 33 (Bureau of Automotive Repair), Chapter 1 (Automotive Repair Dealers and Official Stations and Adjusters); Article 1 (General Provisions)				
3303.1	Public Access to License, Administrative Action, and Complaint Information.	7/20/2007	7/1/2010, 75 FR 38023	Submitted on June 5, 2009. See 40 CFR 52.220(c)(372)(i)(A)(1).
3303.2	Review of Applications for Licensure, Registration and Certification; Processing Time.	7/9/2003	7/1/2010, 75 FR 38023	Submitted on June 5, 2009. See 40 CFR 52.220(c)(372)(i)(A)(1).
Title 16 (Professional and Vocational Regulations), Division 33 (Bureau of Automotive Repair), Chapter 1 (Automotive Repair Dealers and Official Stations and Adjusters); Article 5.5 (Motor Vehicle Inspection Program)				
3340.1	Definitions	6/29/2006	7/1/2010, 75 FR 38023	Submitted on June 5, 2009. See 40 CFR 52.220(c)(372)(i)(A)(1).
3340.5	Vehicles Exempt from Inspections.	4/16/1990	1/8/1997, 62 FR 1150	Submitted on January 22, 1996. See 40 CFR 52.220(c)(234)(i)(A)(1)(iv).
3340.6	Vehicles Subject to Inspection upon Change of Ownership and Initial Registration in California.	4/16/1990	1/8/1997, 62 FR 1150	Submitted on January 22, 1996. See 40 CFR 52.220(c)(234)(i)(A)(1)(iv).
3340.7	Fee for Inspection at State Contracted Test-Only Facility.	8/17/1995	7/1/2010, 75 FR 38023	Submitted on June 5, 2009. See 40 CFR 52.220(c)(372)(i)(A)(1).
3340.9	Repair Assistance Program.	10/30/2000	7/1/2010, 75 FR 38023	Submitted on June 5, 2009. See 40 CFR 52.220(c)(372)(i)(A)(1).
3340.10	Licensing of Smog Check Stations.	7/26/1996	7/1/2010, 75 FR 38023	Submitted on June 5, 2009. See 40 CFR 52.220(c)(372)(i)(A)(1).

3340.50.4	Fleet Certificates	6/25/1998	7/1/2010, 75 FR 38023	Submitted on June 5, 2009. See 40 CFR 52.220(c)(372)(i)(A)(1).
3340.50.5	Suspension or Re-scission of Fleet Facility License.	6/25/1998	7/1/2010, 75 FR 38023	Submitted on June 5, 2009. See 40 CFR 52.220(c)(372)(i)(A)(1).
Title 16 (Professional and Vocational Regulations), Division 33 (Bureau of Automotive Repair), Chapter 1 (Automotive Repair Dealers and Official Stations and Adjusters); Article 10 (Gold Shield Program)				
3392.1	Gold Shield Program (GSP).	5/28/2003	7/1/2010, 75 FR 38023	Submitted on June 5, 2009. See 40 CFR 52.220(c)(372)(i)(A)(1).
3392.2	Responsibilities of Smog Check Stations Certified as Gold Shield.	8/1/2007	7/1/2010, 75 FR 38023	Submitted on June 5, 2009. See 40 CFR 52.220(c)(372)(i)(A)(1).
3392.3	Eligibility for Gold Shield Certification; Quality Assurance.	5/28/2003	7/1/2010, 75 FR 38023	Submitted on June 5, 2009. See 40 CFR 52.220(c)(372)(i)(A)(1).
3392.4	Gold Shield Guaranteed Repair (GSGR) Program Advertising Rights.	5/28/2003	7/1/2010, 75 FR 38023	Submitted on June 5, 2009. See 40 CFR 52.220(c)(372)(i)(A)(1).
3392.5	Causes for Invalidation of Gold Shield Station Certification.	5/28/2003	7/1/2010, 75 FR 38023	Submitted on June 5, 2009. See 40 CFR 52.220(c)(372)(i)(A)(1).
3392.6	Gold Shield Program Hearing and Determination.	5/28/2003	7/1/2010, 75 FR 38023	Submitted on June 5, 2009. See 40 CFR 52.220(c)(372)(i)(A)(1).
Title 16 (Professional and Vocational Regulations), Division 33 (Bureau of Automotive Repair), Chapter 1 (Automotive Repair Dealers and Official Stations and Adjusters); Article 11 (Consumer Assistance Program)				
3394.1	Purpose and Components of the Consumer Assistance Program.	10/30/2000	7/1/2010, 75 FR 38023	Submitted on June 5, 2009. See 40 CFR 52.220(c)(372)(i)(A)(1).
3394.2	Consumer Assistance Program Administration.	10/30/2000	7/1/2010, 75 FR 38023	Submitted on June 5, 2009. See 40 CFR 52.220(c)(372)(i)(A)(1).
3394.3	State Assistance Limits.	10/30/2000	7/1/2010, 75 FR 38023	Submitted on June 5, 2009. See 40 CFR 52.220(c)(372)(i)(A)(1).
3394.4	Eligibility Requirements.	8/12/2008	7/1/2010, 75 FR 38023	Submitted on June 5, 2009. See 40 CFR 52.220(c)(372)(i)(A)(1).
3394.5	Ineligible Vehicles	10/30/2000	7/1/2010, 75 FR 38023	Submitted on June 5, 2009. See 40 CFR 52.220(c)(372)(i)(A)(1).
3394.6	Application and Documentation Requirements.	7/3/2006	7/1/2010, 75 FR 38023	Submitted on June 5, 2009. See 40 CFR 52.220(c)(372)(i)(A)(1).
Title 17 (Public Health), Division 3 (Air Resources), Chapter 1 (Air Resources Board), Subchapter 1.5 (Air Basins and Air Quality Standards), Article 1 (Description of California Air Basins)				
60100 (paragraph (e), only).	North Coast Basin	7/5/1978	88 FR 10049, 2/16/2023	Paragraph (e) of 17 CCR 60100 defines the Sonoma County portion of the North Coast Basin and is relied upon by CARB's Innovative Clean Transit regulation.
60113	Lake Tahoe Air Basin	1/30/1976	88 FR 10049, 2/16/2023	The definition of "Lake Tahoe Air Basin" is relied upon by CARB's Innovative Clean Transit regulation.

TABLE 1—EPA-APPROVED STATUTES AND STATE REGULATIONS¹—Continued

State citation	Title/subject	State effective date	EPA approval date	Additional explanation
Title 17 (Public Health), Division 3 (Air Resources), Chapter 1 (Air Resources Board); Subchapter 7.5 (Airborne Toxic Control Measures)				
93114	Airborne Toxic Control Measure to Reduce Particulate Emissions from Diesel-Fueled Engines—Standards for Non-vehicular Diesel Fuel.	8/14/2004	5/12/2010, 75 FR 26653	Submitted on February 3, 2009. See 40 CFR 52.220(c)(376)(i)(A)(2).
93116	Purpose	3/11/2005	81 FR 39424, 6/16/2016	Purpose is to reduce diesel particulate matter emissions from portable diesel-fueled engines having a rated brake horsepower of 50 and greater.
93116.1	Applicability	3/11/2005	81 FR 39424, 6/16/2016	Applies to all portable engines having a maximum rated horse power of 50 bhp and greater and fueled with diesel unless exempted under (b).
93116.2	Definitions	3/11/2005	81 FR 39424, 6/16/2016	Defines specific terms used in the regulation.
93116.3, excluding (a)	Requirements	3/11/2005	81 FR 39424, 6/16/2016	Diesel PM standards for in-use portable diesel-fueled engines; different requirements apply to such engines not permitted or registered prior to January 1, 2006; fleet requirements (for subject engines operated in California), fleet average calculation provisions. Excluded subsection relates to fuel requirements.
93116.4	Fleet Recordkeeping and Reporting Requirements.	3/11/2005	81 FR 39424, 6/16/2016	Fleet recordkeeping and reporting requirements.
93116.5	Enforcement of Fleet Requirements.	3/11/2005	81 FR 39424, 6/16/2016	Authority to review and seek enforcement action for violation of the fleet emission standard.
93118.3	Airborne Toxic Control Measure for Auxiliary Diesel Engines Operated on Ocean-Going Vessels At-Berth in a California Port.	1/2/2009	81 FR 39424, 6/16/2016	Applicability, exemptions, definitions, vessel in-use operational requirements, calculation procedures for certain options, terminal plan requirements, reporting and recordkeeping requirements.
93118.5, excluding (e)(1).	Airborne Toxic Control Measure for Commercial Harbor Craft.	7/20/2011	83 FR 23232, 5/18/2018	Applicability, exemptions, definitions, engine emission requirements, alternative control provisions, recordkeeping and reporting requirements, test methods. Excluded subsection relates to the low sulfur fuel use requirement.
Title 17 (Public Health), Division 3 (Air Resources), Chapter 1 (Air Resources Board); Subchapter 8 (Compliance with Nonvehicular Emissions Standards)				
94000	Test Procedures for Vapor Recovery Systems—Service Stations.	10/29/1978	7/8/1982, 47 FR 29668	Submitted on April 23, 1980. See 40 CFR 52.220(c)(69)(iv).
94001	Certification of Vapor Recovery Systems—Service Stations.	10/29/1978	7/8/1982, 47 FR 29668	Submitted on April 23, 1980. See 40 CFR 52.220(c)(69)(iv).
94002	Certification of Vapor Recovery Systems—Gasoline Bulk Plants.	10/29/1978	7/8/1982, 47 FR 29668	Submitted on April 23, 1980. See 40 CFR 52.220(c)(69)(iv).

Appendix C	Test Procedure for Determining Annual Flash Emission Rate of Gaseous Compounds from Crude Oil, Condensate, and Produced Water.	3/23/2017	87 FR 59314, 9/30/2022	Submitted on December 11, 2018 as an attachment to a letter dated December 4, 2018.

¹ Table 1 lists EPA-approved California statutes and regulations incorporated by reference in the applicable SIP. Table 2 of paragraph (c) lists approved California test procedures, test methods and specifications that are cited in certain regulations listed in Table 1. Approved California statutes that are nonregulatory or quasi-regulatory are listed in paragraph (e).

TABLE 2—EPA-APPROVED CALIFORNIA TEST PROCEDURES, TEST METHODS, AND SPECIFICATIONS

Title/subject	State effective date	EPA approval date	Additional explanation
Method 2-1: Test Procedures for Determining the Efficiency of Gasoline Vapor Recovery Systems at Service Stations.	9/1/1982	5/3/1984, 49 FR 18829	Submitted on January 20, 1983. See 40 CFR 52.220(c)(149)(i)(A).
Method 2-2: Certification Procedures for Gasoline Vapor Recovery Systems at Service Stations.	8/9/1978	7/8/1982, 47 FR 29668	Submitted on April 23, 1980. See 40 CFR 52.220(c)(69)(iv).
Method 2-3: Certification and Test Procedures for Vapor Recovery Systems at Gasoline Bulk Plants.	8/9/1978	7/8/1982, 47 FR 29668	Submitted on April 23, 1980. See 40 CFR 52.220(c)(69)(iv).
Method 2-4: Certification and Test Procedures for Vapor Recovery Systems at Gasoline Terminals.	4/18/1977	7/8/1982, 47 FR 29668	Submitted on April 23, 1980. See 40 CFR 52.220(c)(69)(iv).
Certification Procedure CP-204 Certification Procedure for Vapor Recovery Systems of Cargo Tanks.	7/12/2023	2/9/2024, 89 FR 8999	Submitted on September 13, 2023, as an attachment to a letter dated September 8, 2023.
Test Procedure TP-204.1 Determination of Five Minute Static Pressure Performance of Vapor Recovery Systems of Cargo Tanks.	4/1/2015	87 FR 19631, 4/5/2022	Submitted on August 22, 2018 as an attachment to a letter dated August 16, 2018.
Test Procedure TP-204.2 Determination of One Minute Static Pressure Performance of Vapor Recovery Systems of Cargo Tanks.	4/1/2015	87 FR 19631, 4/5/2022	Submitted on August 22, 2018 as an attachment to a letter dated August 16, 2018.
Test Procedure TP-204.3 Determination of Leak(s).	4/1/2015	87 FR 19631, 4/5/2022	Submitted on August 22, 2018 as an attachment to a letter dated August 16, 2018.
Test Procedures for Gasoline Vapor Leak Detection Using Combustible Gas Detector.	9/1/1982	5/3/1984, 49 FR 18829	Submitted on January 20, 1983. See 40 CFR 52.220(c)(149)(i)(A).
California Procedures for Evaluating Alternative Specifications for Phase 2 Reformulated Gasoline Using the California Predictive Model.	12/11/1998	5/12/2010, 75 FR 26653	Submitted on June 15, 2004. See 40 CFR 52.220(c)(374)(i)(A)(2).
California Procedures for Evaluating Alternative Specifications for Gasoline Using Vehicle Emissions Testing.	4/25/2001	5/12/2010, 75 FR 26653	Submitted on June 15, 2004. See 40 CFR 52.220(c)(374)(i)(A)(4).

TABLE 2—EPA-APPROVED CALIFORNIA TEST PROCEDURES, TEST METHODS, AND SPECIFICATIONS—
Continued

Title/subject	State effective date	EPA approval date	Additional explanation
California Procedures for Evaluating Alternative Specifications for Phase 3 Reformulated Gasoline Using the California Predictive Model.	8/7/2008	5/12/2010, 75 FR 26653	Submitted on June 15, 2004. See 40 CFR 52.220(c)(375)(i)(A)(2).
Procedures for Using the California Model for California Reformulated Gasoline Blendstocks for Oxygenate Blending (CARBOB).	8/7/2008	5/12/2010, 75 FR 26653	Submitted on June 15, 2004. See 40 CFR 52.220(c)(375)(i)(A)(3).
California Exhaust Emission Standards and Test Procedures for 2001 and Subsequent Model Passenger Cars, Light-Duty Trucks and Medium-Duty Vehicles, as last amended September 5, 2003.	12/4/2003	81 FR 39424, 6/16/2016	Submitted by CARB on August 14, 2015.
California Motor Vehicle Emission Control and Smog Index Label Specifications for 1978 through 2003 Model Year Motorcycles, Light-, Medium- and Heavy-Duty Engines and Vehicles," as last amended September 5, 2003.	12/4/2003	81 FR 39424, 6/16/2016	Submitted by CARB on August 14, 2015.
California Smog Index Label Specifications for 2004 and Subsequent Model Passenger Cars and Light-Duty Trucks," adopted September 5, 2003.	12/4/2003	81 FR 39424, 6/16/2016	Submitted by CARB on August 14, 2015.
California Refueling Emission Standards and Test Procedures for 2001 and Subsequent Model Motor Vehicles, as last amended September 5, 2003.	12/4/2003	81 FR 39424, 6/16/2016	Submitted by CARB on August 14, 2015.
California Evaporative Emission Standards and Test Procedures for 2001 and Subsequent Model Motor Vehicles, as amended June 22, 2006.	2/17/2007	81 FR 39424, 6/16/2016	Submitted by CARB on August 14, 2015.
California Refueling Emission Standards and Test Procedures for 2001 and Subsequent Model Motor Vehicles, as last amended June 22, 2006.	2/17/2007	81 FR 39424, 6/16/2016	Submitted by CARB on August 14, 2015.
California Exhaust Emission Standards Test Procedures for 2001 and Subsequent Model Passenger Cars, Light-Duty Trucks, and Medium-Duty Vehicles, as last amended June 22, 2006.	2/17/2007	81 FR 39424, 6/16/2016	Submitted by CARB on August 14, 2015.
California Exhaust Emission Standards and Test Procedures for 2004 and Subsequent Model Heavy-Duty Diesel Engines and Vehicles, as last amended March 22, 2012.	8/7/2012	81 FR 39424, 6/16/2016	Submitted by CARB on August 14, 2015.
California Exhaust Emission Standards and Test Procedures for 2004 and Subsequent Model Heavy-Duty Otto-Cycle Engines, as last amended March 22, 2012.	8/7/2012	81 FR 39424, 6/16/2016	Submitted by CARB on August 14, 2015.
California Non-Methane Organic Gas Test Procedures, as last amended March 22, 2012.	8/7/2012	81 FR 39424, 6/16/2016	Submitted by CARB on August 14, 2015.
California 2001 through 2014 Model Criteria Pollutant Exhaust Emission Standards and Test Procedures and 2009 through 2016 Model Greenhouse Gas Exhaust Emission Standards and Test Procedures for Passenger Cars, Light-Duty Trucks, and Medium-Duty Vehicles, as last amended March 22, 2012, excluding GHG-related provisions.	8/7/2012	81 FR 39424, 6/16/2016	Submitted by CARB on August 14, 2015.
California Environmental Performance Label Specifications for 2009 and Subsequent Model Year Passenger Cars, Light-Duty Trucks, and Medium-Duty Passenger Vehicles, as last amended March 22, 2012.	8/7/2012	81 FR 39424, 6/16/2016	Submitted by CARB on August 14, 2015.
California Evaporative Emission Standards and Test Procedures for 2001 and Subsequent Model Motor Vehicles, as last amended March 22, 2012.	8/7/2012	81 FR 39424, 6/16/2016	Submitted by CARB on August 14, 2015.

Small Off-Road Engine and Equipment Evaporative Emissions Test Procedure (TP-901), adopted July 26, 2004.	10/20/2004	82 FR 14446, 3/21/2017	Submitted by CARB on December 7, 2016.
Small Off-Road Engine and Equipment Evaporative Emissions Test Procedure (TP-902), adopted July 26, 2004.	10/20/2004	82 FR 14446, 3/21/2017	Submitted by CARB on December 7, 2016.
Small Off-Road Engine Evaporative Emission Control System Certification Procedure (CP-901), adopted July 26, 2004.	10/20/2004	82 FR 14446, 3/21/2017	Submitted by CARB on December 7, 2016.
Small Off-Road Engine Evaporative Emission Control System Certification Procedure (CP-902), adopted July 26, 2004.	10/20/2004	82 FR 14446, 3/21/2017	Submitted by CARB on December 7, 2016.
California Exhaust Emission Standards and Test Procedures for 2005 and Later Small Off-Road Engines, as last amended February 24, 2010.	5/5/2010	81 FR 39424, 6/16/2016	Submitted by CARB on August 14, 2015.
California Exhaust Emission Standards and Test Procedures for 2005 and Later Small Off-Road Engines, as last amended October 25, 2012.	1/10/2013	82 FR 14446, 3/21/2017	Submitted by CARB on December 7, 2016.
California Exhaust Emission Standards and Test Procedures for New 2013 and Later Small Off-Road Engines, Engine-Testing Procedures (Part 1054), adopted October 25, 2012.	1/10/2013	82 FR 14446, 3/21/2017	Submitted by CARB on December 7, 2016.
California Exhaust Emission Standards and Test Procedures for New 2013 and Later Small Off-Road Engines, Engine-Testing Procedures (Part 1065), adopted October 25, 2012.	1/10/2013	82 FR 14446, 3/21/2017	Submitted by CARB on December 7, 2016.
California Exhaust Emission Standards and Test Procedures for New 2000 and Later Tier 1, Tier 2, and Tier 3 Off-Road Compression-Ignition Engines, Part I-B, adopted January 28, 2000 and as last amended October 20, 2005.	1/6/2006	81 FR 39424, 6/16/2016	Submitted by CARB on August 14, 2015.
California Exhaust Emission Standards and Test Procedures for New 1996 and Later Tier 1, Tier 2, and Tier 3 Off-Road Compression-Ignition Engines, Part II, adopted May 12, 1993 and as last amended October 20, 2005.	1/6/2006	81 FR 39424, 6/16/2016	Submitted by CARB on August 14, 2015.
California Exhaust Emission Standards and Test Procedures for New 2008 and Later Tier 4 Off-Road Compression-Ignition Engines, Part I-C, adopted October 20, 2005.	1/6/2006	81 FR 39424, 6/16/2016	Submitted by CARB on August 14, 2015.
California Exhaust Emission Standards and Test Procedures for New 2008–2010 Tier 4 Off-Road Compression-Ignition Engines, Part I-C, as last amended October 25, 2012.	1/10/2013	82 FR 14446, 3/21/2017	Submitted by CARB on December 7, 2016.
California Exhaust Emission Standards and Test Procedures for New 2011 and Later Tier 4 Off-Road Compression-Ignition Engines, Part I-D, as last amended October 25, 2012 (excluding optional alternative NO _x + NMHC standards and associated family emission limits in § 1039.102(e)).	1/10/2013	82 FR 14446, 3/21/2017	Submitted by CARB on December 7, 2016.
California Exhaust Emission Standards and Test Procedures for New 2011 and Later Tier 4 Off-Road Compression-Ignition Engines, Part I-F, as last amended October 25, 2012.	1/10/2013	82 FR 14446, 3/21/2017	Submitted by CARB on December 7, 2016.
California Exhaust Emission Standards and Test Procedures for New 2011 and Later Tier 4 Off-Road Compression-Ignition Engines, Part I-E, adopted October 25, 2012.	1/10/2013	82 FR 14446, 3/21/2017	Submitted by CARB on December 7, 2016.

TABLE 2—EPA-APPROVED CALIFORNIA TEST PROCEDURES, TEST METHODS, AND SPECIFICATIONS—
Continued

Title/subject	State effective date	EPA approval date	Additional explanation
California Exhaust Emission Standards and Test Procedures for 2001 Model Year and Later Spark-Ignition Marine Engines, as last amended June 5, 2009.	8/16/2009	81 FR 39424, 6/16/2016	Submitted by CARB on August 14, 2015.
California Exhaust Emission Standards and Test Procedures for 2001 Model Year and Later Spark-Ignition Marine Engines, as last amended October 25, 2012.	1/10/2013	82 FR 14446, 3/21/2017	Submitted by CARB on December 7, 2016.
Procedures for Exemption of Add-On and Modified Parts for Off-Road Categories, as last amended June 5, 2009.	8/16/2009	81 FR 39424, 6/16/2016	Submitted by CARB on August 14, 2015.
California Exhaust Emissions Standards and Test Procedures for 1997 and Later Off-Highway Recreational Vehicles, and Engines, as last amended August 15, 2007.	8/15/2007	81 FR 39424, 6/16/2016	Submitted by CARB on August 14, 2015.
California Exhaust Emissions Standards and Test Procedures for 1997 and Later Off-Highway Recreational Vehicles and Engines, as last amended October 25, 2012.	1/10/2013	82 FR 14446, 3/21/2017	Submitted by CARB on December 7, 2016.
Test Procedures for Determining Evaporative Emissions from Off-Highway Recreational Vehicles (TP–933), adopted November 5, 2014.	4/1/2015	83 FR 23232, 5/18/2018	Submitted by CARB on June 15, 2017.
Method 310—Determination of Volatile Organic Compounds (VOC) in Consumer Products and Reactive Organic Compounds (ROC) in Aerosol Coating Products.	5/25/2018	85 FR 57703, 9/16/2020	Submitted by CARB on June 4, 2019.

TABLE 3—EPA-APPROVED LOCAL JURISDICTION ORDINANCES AND MUNICIPAL CODE: COACHELLA VALLEY LOCAL JURISDICTIONS, TOWN OF MAMMOTH LAKES, CITY OF PORTOLA

Ordinance No. or code citation	Title/subject	State effective date	EPA approval date	Additional explanation
Coachella Valley Local Jurisdictions				
City of Cathedral City Ordinance No. 583.	An Ordinance of the City Council of the City of Cathedral City to Establish Minimum Requirements for Construction and Demolition Activities and Other Specific Sources in order to Reduce Man-Made Fugitive Dust and the Corresponding PM ₁₀ Emissions.	February 14, 2004.	November 14, 2005, 70 FR 69081.	Adopted on January 14, 2004. Submitted on November 16, 2004. See 40 CFR 52.220(c)(340)(i)(B)(1).

TABLE 3—EPA-APPROVED LOCAL JURISDICTION ORDINANCES AND MUNICIPAL CODE: COACHELLA VALLEY LOCAL JURISDICTIONS, TOWN OF MAMMOTH LAKES, CITY OF PORTOLA—Continued

Ordinance No. or code citation	Title/subject	State effective date	EPA approval date	Additional explanation
City of Coachella Ordinance No. 896.	An Ordinance of the City Council of the City of Coachella, California, Repealing Article X of Chapter 10 of the City of Coachella Municipal Code and Adding Article X to Chapter 10 to the Coachella Municipal Code to Adopt, Implement, and Enforce Fugitive Dust Control Measures in the City of Coachella.	November 8, 2003.	November 14, 2005, 70 FR 69081.	Adopted on October 8, 2003. Submitted on November 16, 2004. See 40 CFR 52.220(c)(340)(i)(B)(1).
City of Desert Hot Springs Ordinance No. 2003–16.	An Ordinance of the City Council of the City of Desert Hot Springs Approving Revised Regulations Concerning the Control of Fugitive Dust (PM ₁₀) From Man-Made and Other Specified Sources, Replacing the Existing Regulations Within Title XV of the Desert Hot Springs Municipal Code.	November 7, 2003.	November 14, 2005, 70 FR 69081.	Adopted on October 7, 2003. Submitted on November 16, 2004. See 40 CFR 52.220(c)(340)(i)(B)(1).
City of Indian Wells Ordinance No. 545.	An Ordinance of the City Council of the City of Indian Wells, California, Adding Sections 8.04.025 and 8.04.026 and Amending Chapter 8.20 of the Indian Wells Municipal Code, and Adopting the Coachella Valley Fugitive Dust Control Handbook.	December 6, 2003.	November 14, 2005, 70 FR 69081.	Adopted on November 6, 2003. Submitted on November 16, 2004. See 40 CFR 52.220(c)(340)(i)(B)(1).
City of Indio Ordinance No. 1357.	Ordinance of the City Council of the City of Indio, California, Approving Fugitive Dust Control Ordinance Which Replaces the Existing Fugitive Dust Control of the Indio Municipal Code Section 95.131A through 95.135A.	April 1, 2004	November 14, 2005, 70 FR 69081.	Adopted on December 3, 2003. Submitted on November 16, 2004. See 40 CFR 52.220(c)(340)(i)(B)(1).

TABLE 3—EPA-APPROVED LOCAL JURISDICTION ORDINANCES AND MUNICIPAL CODE: COACHELLA VALLEY LOCAL JURISDICTIONS, TOWN OF MAMMOTH LAKES, CITY OF PORTOLA—Continued

Ordinance No. or code citation	Title/subject	State effective date	EPA approval date	Additional explanation
City of La Quinta Ordinance No. 391.	An Ordinance of the City Council of the City of La Quinta, California, Repealing and Replacing Chapter 6.16 of the La Quinta Charter and Municipal Code Relating to Fugitive Dust Control.	January 2, 2004.	November 14, 2005, 70 FR 69081.	Adopted on December 2, 2003. Submitted on November 16, 2004. See 40 CFR 52.220(c)(340)(i)(B)(1).
City of Palm Desert Ordinance No. 1056.	An Ordinance of the City Council of the City of Palm Desert, California, Adding Chapter 24.12 to the Palm Desert Municipal Code, Superseding the Current Ordinance.	December 13, 2003.	November 14, 2005, 70 FR 69081.	Adopted on November 13, 2003. Submitted on November 16, 2004. See 40 CFR 52.220(c)(340)(i)(B)(1).
City of Palm Springs Ordinance No. 1639.	An Ordinance of the City of Palm Springs, California, Repealing Existing Chapter 8.50 in its Entirety and Adding Section 8.50 of the Palm Springs Municipal Code Relating to Fugitive Dust Control.	December 5, 2003.	November 14, 2005, 70 FR 69081.	Adopted on November 5, 2003. Submitted on November 16, 2004. See 40 CFR 52.220(c)(340)(i)(B)(1).
City of Rancho Mirage Ordinance No. 855.	An Ordinance of the City Council of the City of Rancho Mirage Replacing Chapter 7.01 of the Rancho Mirage Municipal Code "Control of PM ₁₀ , Fugitive Dust and Other Emissions".	January 19, 2004.	November 14, 2005, 70 FR 69081.	Fugitive dust control ordinance adopted on December 18, 2003. Submitted on November 16, 2004. See 40 CFR 52.220(c)(340)(i)(B)(1).
City of Rancho Mirage Ordinance No. 863.	An Ordinance of the City Council of the City of Rancho Mirage Amending Rancho Mirage Municipal Code Chapter 7.01, Control of PM ₁₀ Fugitive Dust and Other Emissions, Section 7.01.042(9), Construction and Demotion Activities.	May 30, 2004.	November 14, 2005, 70 FR 69081.	Adopted on April 29, 2004. Submitted on November 16, 2004. See 40 CFR 52.220(c)(340)(i)(B)(1).

Ordinance No. or code citation	Title/subject	State effective date	EPA approval date	Additional explanation
County of Riverside Ordinance No. 742.1.	An Ordinance of the County of Riverside Amending Ordinance No. 742 Relating to the Control of Fugitive Dust and the Corresponding PM ₁₀ Emission in the Coachella Valley, and also Adopting the Coachella Valley Fugitive Dust Control Handbook Produced by the Air Quality Management District (AQMD).	February 11, 2004.	November 14, 2005, 70 FR 69081.	Adopted on January 13, 2004. Submitted on November 16, 2004. See 40 CFR 52.220(c)(340)(i)(B)(1).
Town of Mammoth Lakes				
Town of Mammoth Lakes Municipal Code, Chapter 8.30 (except paragraphs 8.30.110 and 8.30.120).	Particulate Emissions Regulations.	July 5, 2014	June 30, 2017, 82 FR 29762.	Adopted through Ordinance No. 14–06 on June 4, 2014. Submitted on November 6, 2014. See 40 CFR 52.220(c)(457)(i)(1)(2).
City of Portola				
Ordinance No. 359, Portola Municipal Code, Chapter 15.10, “Wood Stove and Fireplace Ordinance and the Prohibition of the Open Burning of Yard Waste,” except paragraph 15.10.060 B., section 15.10.100, and section 15.10.110.	An Ordinance of the City of Portola, County of Plumas Amending Chapter 15.10 of the City of Portola Municipal Code Providing for Regulation of Wood Stoves and Fireplaces and the Prohibition of the Open Burning of Yard Waste.	October 9, 2020.	March 3, 2021, 86 FR 12263.	Adopted by the City of Portola on September 9, 2020. Submitted on December 29, 2020. See 40 CFR 52.220(c)(553)(i)(A)(1)(j).

Original Codification of Rules and Regulations				
Regulation II—Permits				
1	Authority to Construct.	September 14, 1971.	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
5	Exemptions	September 14, 1971.	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
6	Transfer	September 14, 1971.	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
7	Applications	September 14, 1971.	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
8	Cancellation	September 14, 1971.	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
9	Action on Application.	September 14, 1971.	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
10	Provisions of Sampling and Testing Facilities.	September 14, 1971.	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
11	Standards for Granting Applications.	September 14, 1971.	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
12	Conditional Approval.	September 14, 1971.	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
13	Denial of Application.	September 14, 1971.	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
14	Further Information.	September 14, 1971.	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
15	Applications Deemed Denied.	September 14, 1971.	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
16	Appeals	September 14, 1971.	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
Regulation V—Prohibitions				
1	Prohibitions under State Law.	September 14, 1971.	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
11, paragraph (B)	Specific Contaminants.	September 14, 1971.	September 22, 1972, 37 FR 19812.	Paragraph (B) establishes emission limit for combustion contaminants. Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
12	Prohibitions Regarding Orchard Heaters.	September 14, 1971.	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
13	Process Weight Rate.	September 14, 1971.	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).

16	Gasoline Storage.	September 14, 1971.	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
17	Organic Liquid Loading.	September 14, 1971.	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
19	Fuel Burning Equipment.	September 14, 1971.	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
Post-1975 Codification				
Regulation I—General Provisions				
101	Title	July 18, 1972 ...	June 14, 1978, 43 FR 25682.	Submitted on April 21, 1976. See 40 CFR 52.220(c)(31)(xviii)(B).
102	Definitions	October 15, 1979.	May 18, 1981, 46 FR 27115.	Submitted on October 15, 1979. See 40 CFR 52.220(c)(52)(xi)(A).
104	Penalty	April 21, 1976 ...	June 14, 1978, 43 FR 25682.	Submitted on April 21, 1976. See 40 CFR 52.220(c)(31)(xviii)(B).
106	Validity	July 18, 1972 ...	June 14, 1978, 43 FR 25682.	Submitted on April 21, 1976. See 40 CFR 52.220(c)(31)(xviii)(B).
107	Effective Date ...	October 15, 1979.	May 18, 1981, 46 FR 27115.	Submitted on October 15, 1979. See 40 CFR 52.220(c)(52)(xi)(A).
Regulation II—Prohibitions				
201	District-Wide Coverage.	April 21, 1976 ...	June 14, 1978, 43 FR 25682.	Submitted on April 21, 1976. See 40 CFR 52.220(c)(31)(xviii)(B).
202	Visible Emissions.	July 18, 1972 ...	June 14, 1978, 43 FR 25682.	Submitted on April 21, 1976. See 40 CFR 52.220(c)(31)(xviii)(B).
203 (excluding section G).	Exceptions	October 15, 1979.	May 18, 1981, 46 FR 27115.	Exceptions to Rule 202. Submitted on October 15, 1979. See 40 CFR 52.220(c)(52)(xi)(A).
204	Wet Plumes	April 21, 1976 ...	June 14, 1978, 43 FR 25682.	Submitted on April 21, 1976. See 40 CFR 52.220(c)(31)(xviii)(B).
206	Incinerator Burning.	April 21, 1976 ...	June 14, 1978, 43 FR 25682.	Submitted on April 21, 1976. See 40 CFR 52.220(c)(31)(xviii)(B).
206 (paragraph (B) only).	Pathological Incineration.	April 21, 1976 ...	May 18, 1981, 46 FR 27115.	Submitted on October 15, 1979. See 40 CFR 52.220(c)(52)(xi)(A).
207	Particulate Matter.	October 15, 1979.	May 18, 1981, 46 FR 27115.	Submitted on October 15, 1979. See 40 CFR 52.220(c)(52)(xi)(A).
207.1	Asphalt Concrete Plants.	April 21, 1976 ...	June 14, 1978, 43 FR 25682.	Submitted on April 21, 1976. See 40 CFR 52.220(c)(31)(xviii)(B).

TABLE 4—EPA-APPROVED AMADOR AIR DISTRICT REGULATIONS—Continued

District rule No.	Title/subject	State effective date	EPA approval date	Additional explanation
210 (excluding (B)(1)).	Specific Con-taminants.	October 15, 1979.	May 18, 1981, 46 FR 27115.	Excludes emission limit for wood-fired boilers and incinerators. Submitted on October 15, 1979. See 40 CFR 52.220(c)(52)(xi)(A).
213	Storage of Petroleum Prod-ucts.	October 15, 1979.	May 18, 1981, 46 FR 27115.	Submitted on October 15, 1979. See 40 CFR 52.220(c)(52)(xi)(A).
214	Reduction of Animal Matter.	April 21, 1976 ...	June 14, 1978, 43 FR 25682.	Submitted on April 21, 1976. See 40 CFR 52.220(c)(31)(xviii)(B).
215	Abrasive Blast-ing.	October 15, 1979.	May 18, 1981, 46 FR 27115.	Submitted on October 15, 1979. See 40 CFR 52.220(c)(52)(xi)(A).
216	Compliance Tests.	October 15, 1979.	May 18, 1981, 46 FR 27115.	Submitted on October 15, 1979. See 40 CFR 52.220(c)(52)(xi)(A).

Regulation III—Open Burning

301	Prohibition from Burning.	June 16, 1981 ..	April 17, 1987, 52 FR 12522.	Submitted on October 16, 1985. See 40 CFR 52.220(c)(164)(i)(A)(1).
302	Exceptions to Rule 301.	June 16, 1981 ..	April 17, 1987, 52 FR 12522.	Submitted on October 16, 1985. See 40 CFR 52.220(c)(164)(i)(A)(1).
303	Agricultural Burning.	June 16, 1981 ..	April 17, 1987, 52 FR 12522.	Submitted on October 16, 1985. See 40 CFR 52.220(c)(164)(i)(A)(1).
304	Range Improve-ment Burning.	June 16, 1981 ..	April 17, 1987, 52 FR 12522.	Submitted on October 16, 1985. See 40 CFR 52.220(c)(164)(i)(A)(1).
305	Forest Manage-ment Burning.	June 16, 1981 ..	April 17, 1987, 52 FR 12522.	Submitted on October 16, 1985. See 40 CFR 52.220(c)(164)(i)(A)(1).
306	Land Develop-ment Clearing.	June 16, 1981 ..	April 17, 1987, 52 FR 12522.	Submitted on October 16, 1985. See 40 CFR 52.220(c)(164)(i)(A)(1).
307	Ditch and Road Maintenance.	June 16, 1981 ..	April 17, 1987, 52 FR 12522.	Submitted on October 16, 1985. See 40 CFR 52.220(c)(164)(i)(A)(1).
308	Hazard Reduc-tion.	June 16, 1981 ..	April 17, 1987, 52 FR 12522.	Submitted on October 16, 1985. See 40 CFR 52.220(c)(164)(i)(A)(1).
309	Fire Suppres-sion and Training.	June 16, 1981 ..	April 17, 1987, 52 FR 12522.	Submitted on October 16, 1985. See 40 CFR 52.220(c)(164)(i)(A)(1).
310	Residential Maintenance.	June 16, 1981 ..	April 17, 1987, 52 FR 12522.	Submitted on October 16, 1985. See 40 CFR 52.220(c)(164)(i)(A)(1).
311	Recreational Ac-tivity.	June 16, 1981 ..	April 17, 1987, 52 FR 12522.	Submitted on October 16, 1985. See 40 CFR 52.220(c)(164)(i)(A)(1).
312	Required Permit	June 16, 1981 ..	April 17, 1987, 52 FR 12522.	Submitted on October 16, 1985. See 40 CFR 52.220(c)(164)(i)(A)(1).
313	No Burn Day	June 16, 1981 ..	April 17, 1987, 52 FR 12522.	Submitted on October 16, 1985. See 40 CFR 52.220(c)(164)(i)(A)(1).

314	Burning Permits	June 16, 1981 ..	April 17, 1987, 52 FR 12522.	Submitted on October 16, 1985. See 40 CFR 52.220(c)(164)(i)(A)(1).
315	Minimum Drying Times.	June 16, 1981 ..	April 17, 1987, 52 FR 12522.	Submitted on October 16, 1985. See 40 CFR 52.220(c)(164)(i)(A)(1).
316	Burning Management.	June 16, 1981 ..	April 17, 1987, 52 FR 12522.	Submitted on October 16, 1985. See 40 CFR 52.220(c)(164)(i)(A)(1).
317	Mechanized Burners.	June 16, 1981 ..	April 17, 1987, 52 FR 12522.	Submitted on October 16, 1985. See 40 CFR 52.220(c)(164)(i)(A)(1).
Regulation IV—Permit System Conditions				
400	NSR Requirements for New and Modified Major Sources in Nonattainment Areas.	January 17, 2023.	February 6, 2024, 89 FR 8078.	Submitted electronically on March 3, 2023 as an attachment to a letter dated March 2, 2023. See 40 CFR 52.220(c)(609)(i)(A)(1).
401	Responsibility ...	October 15, 1979.	May 18, 1981, 46 FR 27115.	Submitted on October 15, 1979. See 40 CFR 52.220(c)(52)(xi)(A).
403	Responsibility of Permittee.	April 21, 1976 ...	June 14, 1978, 43 FR 25682.	Submitted on April 21, 1976. See 40 CFR 52.220(c)(31)(xviii)(B).
404	Upset Condition, Breakdown and Scheduled Maintenance.	October 15, 1979.	May 18, 1981, 46 FR 27115.	Submitted on October 15, 1979. See 40 CFR 52.220(c)(52)(xi)(A).
405	Separation of Emissions.	April 21, 1976 ...	June 14, 1978, 43 FR 25682.	Submitted on April 21, 1976. See 40 CFR 52.220(c)(31)(xviii)(B).
406	Combination of Emissions.	April 21, 1976 ...	June 14, 1978, 43 FR 25682.	Submitted on April 21, 1976. See 40 CFR 52.220(c)(31)(xviii)(B).
428	Emissions Statements.	March 16, 2021	July 29, 2022, 87 FR 45657.	Submitted on June 10, 2021 as an attachment to a letter dated June 10, 2021. See 40 CFR 52.220(c)(577)(i)(A)(1).
Regulation V—Permit System Requirements				
501	Permit Required	June 16, 1981 ..	April 17, 1987, 52 FR 12522.	Submitted on October 16, 1985. See 40 CFR 52.220(c)(164)(i)(A)(1).
502	Exemptions to Rule 501.	January 8, 1980	April 17, 1987, 52 FR 12522.	Submitted on October 16, 1985. See 40 CFR 52.220(c)(164)(i)(A)(1).
503	Applications	January 8, 1980	April 17, 1987, 52 FR 12522.	Submitted on October 16, 1985. See 40 CFR 52.220(c)(164)(i)(A)(1).
505	Conditional Approval.	January 8, 1980	April 17, 1987, 52 FR 12522.	Submitted on October 16, 1985. See 40 CFR 52.220(c)(164)(i)(A)(1).
507 (paragraphs (C) and (D)).	Provisions of Sampling and Testing Facilities.	October 13, 1977.	November 7, 1978, 43 FR 51775.	Only paragraphs (C) and (D) were submitted. Submitted on October 13, 1977. See 40 CFR 52.220(c)(41)(viii)(A).

TABLE 4—EPA-APPROVED AMADOR AIR DISTRICT REGULATIONS—Continued

District rule No.	Title/subject	State effective date	EPA approval date	Additional explanation
507	Responsibility ...	January 8, 1980	April 17, 1987, 52 FR 12522.	Submitted on October 16, 1985. See 40 CFR 52.220(c)(164)(i)(A)(1).
508	Posting of Per- mit to Operate.	January 8, 1980	April 17, 1987, 52 FR 12522.	Submitted on October 16, 1985. See 40 CFR 52.220(c)(164)(i)(A)(1).
510	Separation of Emissions.	January 8, 1980	April 17, 1987, 52 FR 12522.	Submitted on October 16, 1985. See 40 CFR 52.220(c)(164)(i)(A)(1).
511	Combination of Emissions.	January 8, 1980	April 17, 1987, 52 FR 12522.	Submitted on October 16, 1985. See 40 CFR 52.220(c)(164)(i)(A)(1).
512	Circumvention ..	January 8, 1980	April 17, 1987, 52 FR 12522.	Submitted on October 16, 1985. See 40 CFR 52.220(c)(164)(i)(A)(1).
513	Source Record- keeping.	January 8, 1980	April 17, 1987, 52 FR 12522.	Submitted on October 16, 1985. See 40 CFR 52.220(c)(164)(i)(A)(1).
514	Public Records and Trade Se- crets.	January 8, 1980	April 17, 1987, 52 FR 12522.	Submitted on October 16, 1985. See 40 CFR 52.220(c)(164)(i)(A)(1).
517	Transfer	January 8, 1980	April 17, 1987, 52 FR 12522.	Submitted on October 16, 1985. See 40 CFR 52.220(c)(164)(i)(A)(1).
518	Revocation of a Permit to Op- erate.	January 8, 1980	April 17, 1987, 52 FR 12522.	Submitted on October 16, 1985. See 40 CFR 52.220(c)(164)(i)(A)(1).
521	Annual Renewal	January 8, 1980	April 17, 1987, 52 FR 12522.	Submitted on October 16, 1985. See 40 CFR 52.220(c)(164)(i)(A)(1).
Emergency Episode Plans				
Amador County Air Pollution Control District, Resolution No. 19–06.	Ozone Emer- gency Epi- sode Plan, dated August 26, 2019.	October 15, 2019.	March 30, 2021, 86 FR 16533.	Submitted on June 25, 2020 as an attachment to a letter dated June 16, 2020. See 40 CFR 52.220(c)(552)(i)(A)(1).

67	Fuel Burning Equipment.	January 7, 1971	September 22, 1972, 37 FR 19812.	Adopted by Los Angeles County APCD. Submitted by CARB on June 30, 1972. See 40 CFR 52.220(c)(6). The rescission of Rule 67 was approved at 46 FR 27116 (May 18, 1981) as to sources granted permits after June 17, 1981, but the emission limits of Rule 67 were retained for existing sources granted permits prior to that date—see 40 CFR 52.280(c).

**Recodification of Rules and Regulations
Regulation I—General Provisions**

101	Title	May 17, 2005 ...	September 2, 2008, 73 FR 51226.	Submitted by CARB on March 10, 2006. See 40 CFR 52.220(c)(344)(i)(A)(2).
102	Definition of Terms.	May 17, 2005 ...	September 2, 2008, 73 FR 51226.	Submitted by CARB on March 10, 2006. See 40 CFR 52.220(c)(344)(i)(A)(2).
103	Definition of Geographical Areas.	September 16, 1997.	December 31, 1998, 63 FR 72197.	Submitted by CARB on March 10, 1998. See 40 CFR 52.220(c)(254)(i)(E)(2).
104	Reporting of Source Test Data and Analysis.	January 9, 1976	June 14, 1978, 43 FR 25684.	Adopted by the Southern California APCD. Remains applicable in Antelope Valley portion of California SIP. Submitted by CARB on April 21, 1976. See 40 CFR 52.220(c)(31)(vi)(B).
106	Increments of Progress.	May 17, 2005 ...	September 2, 2008, 73 FR 51226.	Submitted by CARB on March 10, 2006. See 40 CFR 52.220(c)(344)(i)(A)(3).
107	Certification of Submissions and Emission Statements.	May 15, 2012 ...	April 11, 2013, 78 FR 21545.	Submitted by CARB on September 21, 2012. See 40 CFR 52.220(c)(423)(i)(D)(1).
107	Determination of Volatile Organic Compounds in Coating Material.	January 8, 1982	October 11, 1983, 48 FR 46046.	Adopted by the SCAQMD. Remains applicable in Antelope Valley portion of California SIP. Submitted by CARB on March 1, 1982. See 40 CFR 52.220(c)(121)(i)(B).
108	Alternative Emission Control Plans.	May 17, 2005 ...	September 2, 2008, 73 FR 51226.	Submitted by CARB on March 10, 2006. See 40 CFR 52.220(c)(344)(i)(A)(4).
109	Recordkeeping for Volatile Organic Compound Emissions.	April 20, 2010 ...	March 1, 2012, 77 FR 12495.	Submitted by CARB on July 20, 2010. See 40 CFR 52.220(c)(381)(i)(G)(2).

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
431.2(c)(5)	Sulfur Content of Liquid Fuels.	February 2, 1979.	September 28, 1981, 46 FR 47451.	Adopted by the SCAQMD. Remains applicable in Antelope Valley portion of California SIP. Submitted by CARB on April 23, 1980. See 40 CFR 52.220(c)(69)(ii).
431.3	Sulfur Content of Fossil Fuels.	December 2, 1977.	September 28, 1981, 46 FR 47451.	Adopted by the SCAQMD. Remains applicable in Antelope Valley portion of the SIP. Submitted by CARB on July 25, 1979. See 40 CFR 52.220(c)(65)(ii).
432	Gasoline Specifications.	May 7, 1976	June 14, 1978, 43 FR 25684.	Adopted by the Southern California APCD. Remains applicable in Antelope Valley portion of California SIP. Submitted by CARB on August 2, 1976. See 40 CFR 52.220(c)(32)(iv)(A).
442	Usage of Solvents.	November 15, 2005.	October 31, 2006, 71 FR 63696.	Submitted by CARB on March 10, 2006. See 40 CFR 52.220(c)(344)(i)(A)(1).
443	Labeling of Solvents.	January 1, 1977	June 14, 1978, 43 FR 25684.	Adopted by the Southern California APCD. Remains applicable in Antelope Valley portion of California SIP. Submitted by CARB on August 2, 1976. See 40 CFR 52.220(c)(32)(iv)(A).
444	Open Outdoor Fires.	February 19, 2008.	June 11, 2009, 74 FR 27716.	Submitted by CARB on July 18, 2008. See 40 CFR 52.220(c)(359)(i)(D)(1).
461	Gasoline Transfer and Dispensing.	October 21, 2008.	January 31, 2011, 76 FR 5277.	Submitted by CARB on April 6, 2009. See 40 CFR 52.220(c)(366)(i)(C)(1).
462	Organic Liquid Loading.	September 19, 2017.	May 3, 2019, 84 FR 19681.	Submitted by CARB on November 13, 2017. See 40 CFR 52.220(c)(516)(i)(A)(1).
463	Organic Liquid Storage.	March 11, 1994	October 23, 1996, 61 FR 54941.	Adopted by the SCAQMD. Remains applicable in Antelope Valley portion of California SIP. Submitted by CARB on May 24, 1994. See 40 CFR 52.220(c)(197)(i)(A)(2).
464	Wastewater Separators.	December 7, 1990.	February 24, 1997, 62 FR 8171.	Adopted by the SCAQMD. Remains applicable in Antelope Valley portion of California SIP. Submitted by CARB on May 13, 1991. See 40 CFR 52.220(c)(184)(i)(B)(6).

1306	New Source Review for Electric Energy Generating Facilities.	July 20, 2021 ...	July 3, 2023, 88 FR 42621.	Submitted by CARB on August 3, 2021. See 40 CFR 52.220(c)(602)(i)(A)(8).
1309	Emission Reduction Credit Banking.	July 20, 2021 ...	July 3, 2023, 88 FR 42621.	Submitted by CARB on August 3, 2021. See 40 CFR 52.220(c)(602)(i)(A)(9).

Regulation XXII—Transportation Outreach

2200	Transportation Outreach Program.	January 19, 1999.	July 7, 2017, 82 FR 31457.	Submitted by CARB on October 29, 1999. See 40 CFR 52.220(c)(270)(i)(E)(2).

TABLE 6—EPA-APPROVED BAY AREA AIR QUALITY MANAGEMENT DISTRICT REGULATIONS

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
Original Codification of Rules and Regulations				
Regulation 2, Division 14.	Nitrogen Oxides	April 19, 1972 ...	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6). The portion of section 141112 related to modified heat transfer operations has been superseded by approval of Rule 9–3–202 (“Modified Heat Transfer Operation”) at 47 FR 29231 (July 6, 1982).
Regulation 4	[no title]	June 1, 1971	May 11, 1977, 42 FR 23802, corrected at 42 FR 42219 (August 22, 1977).	Submitted on July 25, 1973. Requires installation of crankcase devices on 1955 through 1962 model year motor vehicles within the district. See 40 CFR 52.220(c)(21)(iv)(B).
Regulation 6	[no title]	December 17, 1975.	May 11, 1977, 42 FR 23802.	Provides authority to the APCO and designees to enforce the vehicle code. Submitted on February 10, 1976. See 40 CFR 52.220(c)(30)(i)(B).
Post-1979 Codification of Rules and Regulations				
Regulation 1, excluding section 1–402.	General Provisions and Definitions.	October 7, 1998	June 28, 1999, 64 FR 34558.	Submitted on February 16, 1999. The submitted rule did not include sections 1–300 and 1–600. See 40 CFR 52.220(c)(262)(i)(A)(1). Section 1–402 (“Status of Violation Notices During Variance Proceedings”) was deleted without replacement at 69 FR 67062 (November 16, 2004). Also see 69 FR 3045 (January 22, 2004).
Regulation 1, sections 1–541.	General Provisions and Definitions.	May 21, 1980 ...	July 6, 1982, 47 FR 29231.	Section 1–541 is titled “Emission excesses.” Submitted on July 10, 1980. See 40 CFR 52.220(c)(86)(i)(D).
Regulation 1, sections 1–600, 1–601, 1–603, 1–604.	General Provisions and Definitions.	January 1, 1980	July 6, 1982, 47 FR 29231.	Sections 1–600, 1–601, 1–603, and 1–604 are titled “Manual of Procedures,” “Approval of Sampling Facilities,” “Visible Emissions,” and “Opacity Measurements,” respectively. Submitted on June 2, 1980. See 40 CFR 52.220(c)(79)(ii)(B).
Regulation 1, section 1–602.	General Provisions and Definitions.	March 17, 1982	November 10, 1982, 47 FR 50864.	Section 1–602 is titled “Area and Continuous Emission Monitoring Requirements.” Submitted on August 6, 1982. See 40 CFR 52.220(c)(124)(i)(A).
Regulation 2 (“Permits”), Rule 1.	General Requirements.	December 6, 2017.	May 21, 2018, 83 FR 23372.	Submitted on December 14, 2017. See 40 CFR 52.220(c)(502)(i)(A)(1).
Regulation 2 (“Permits”), Rule 2.	New Source Review.	December 6, 2017.	May 21, 2018, 83 FR 23372.	Submitted on December 14, 2017. See 40 CFR 52.220(c)(502)(i)(A)(1).

TABLE 6—EPA-APPROVED BAY AREA AIR QUALITY MANAGEMENT DISTRICT REGULATIONS—
Continued

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
Regulation 2 ("Permits"), Rule 3.	Power Plants	January 1, 1980	March 19, 1982, 47 FR 11866.	Submitted on January 14, 1980. See 40 CFR 52.220(c)(73)(i)(A).
Regulation 2 ("Permits"), Rule 4.	Emissions Bank- ing.	December 6, 2017.	May 21, 2018, 83 FR 23372.	Submitted on December 14, 2017. See 40 CFR 52.220(c)(502)(i)(A)(1).
Regulation 2 ("Permits"), Rule 6, Sections 232, 234, 310, 311, 403, 404, 420, 421, 422, 423.	Major Facility Review.	February 1, 1995.	June 23, 1995, 60 FR 32603.	Submitted on March 31, 1995. See 40 CFR 52.220(c)(216)(i)(B)(1).
Regulation 2 ("Permits"), Rule 6, Sections 206, 207, 210, 212, 213, 214, 218, 222, 230, 231, 301, 401, 402, 602.	Major Facility Review.	November 3, 1993.	June 23, 1995, 60 FR 32606.	Submitted on February 28, 1994. See 40 CFR 52.220(c)(217)(i)(A)(1).
Regulation 4, excluding Table 1, Episode Stage Criteria.	Air Pollution Epi- sode Plan.	January 1, 1980	May 28, 1980, 45 FR 35084.	Submitted on February 14, 1980. Includes sections 4–100, 4–101, 4–300, 4–301, 4–302, 4–303, 4–304, 4–305, 4–400, 4–401, 4–402, 4–403, and 4–404. Table 1 was superseded by approval of amended table 1 at 54 FR 31833 (August 6, 1990). See 40 CFR 52.220(c)(53)(i).
Regulation 4— Table 1, Epi- sode Stage Cri- teria.	Air Pollution Epi- sode Plan.	September 7, 1988.	August 6, 1990, 54 FR 31833.	Submitted on February 7, 1989. See 40 CFR 52.220(c)(177)(i)(B)(1).
Regulation 5	Open Burning ...	November 2, 1994.	September 4, 1998, 63 FR 47179.	Submitted on March 10, 1998. See 40 CFR 52.220(c)(254)(i)(F)(1).
Regulation 6	Particulate Mat- ter and Visible Emissions.	December 19, 1990.	September 4, 1998, 63 FR 47179.	Submitted on May 13, 1991. See 40 CFR 52.220(c)(184)(i)(C)(2).
Regulation 8 ("Organic Com- pounds"), Rule 1.	General Provi- sions.	June 15, 1994 ..	March 22, 1995, 60 FR 15062.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(A)(6).
Regulation 8 ("Organic Com- pounds"), Rule 2.	Miscellaneous Operations.	June 15, 1994 ..	March 22, 1995, 60 FR 15062.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(A)(6).
Regulation 8 ("Organic Com- pounds"), Rule 3.	Architectural Coatings.	November 21, 2001.	January 2, 2004, 69 FR 34.	Submitted on June 18, 2002. See 40 CFR 52.220(c)(300)(i)(B)(1).
Regulation 8 ("Organic Com- pounds"), Rule 4.	General Solvent and Surface Coating Oper- ations.	October 16, 2002.	August 26, 2003, 68 FR 51187.	Submitted on April 1, 2003. See 40 CFR 52.220(c)(315)(i)(A)(1).

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
Regulation 8 ("Organic Compounds"), Rule 5.	Storage of Organic Liquids.	November 27, 2002.	June 5, 2003, 68 FR 33635.	Submitted on January 21, 2003. See 40 CFR 52.220(c)(312)(i)(A)(1).
Regulation 8 ("Organic Compounds"), Rule 6.	Organic Liquid Bulk Terminals and Bulk Plants.	February 2, 1994.	April 3, 1995, 60 FR 16799.	Submitted on May 24, 1994. See 40 CFR 52.220(c)(197)(i)(B)(1).
Regulation 8 ("Organic Compounds"), Rule 7.	Gasoline Dispensing Facilities.	November 6, 2002.	March 24, 2003, 68 FR 14156.	Submitted on December 12, 2002. See 40 CFR 52.220(c)(308)(i)(A)(1).
Regulation 8 ("Organic Compounds"), Rule 8.	Wastewater (Oil-Water) Separators.	June 15, 1994 ..	August 29, 1994, 59 FR 44328.	Submitted on July 13, 1994. See 40 CFR 52.220(c)(198)(i)(A)(1).
Regulation 8 ("Organic Compounds"), Rule 9.	Vacuum Processing Systems.	July 20, 1983 ...	October 3, 1984, 49 FR 39057.	Submitted on October 27, 1983. See 40 CFR 52.220(c)(148)(i)(B).
Regulation 8 ("Organic Compounds"), Rule 10.	Process Vessel Depressurization.	July 20, 1983 ...	October 3, 1984, 49 FR 39057.	Submitted on October 27, 1983. See 40 CFR 52.220(c)(148)(i)(B).
Regulation 8 ("Organic Compounds"), Rule 11.	Metal Container, Metal Closure, and Metal Coil Coating.	November 19, 1997.	September 18, 2000, 65 FR 56251.	Submitted on March 28, 2000. See 40 CFR 52.220(c)(277)(i)(C)(1).
Regulation 8 ("Organic Compounds"), Rule 12.	Paper, Fabric, and Film Coating.	December 20, 1995.	December 23, 1997, 62 FR 66998.	Submitted on July 23, 1996. See 40 CFR 52.220(c)(239)(i)(E)(2).
Regulation 8 ("Organic Compounds"), Rule 13.	Light and Medium Duty Motor Vehicle Assembly Plants.	December 20, 1995.	December 23, 1997, 62 FR 66998.	Submitted on July 23, 1996. See 40 CFR 52.220(c)(239)(i)(E)(2).
Regulation 8 ("Organic Compounds"), Rule 14.	Surface Preparation and Coating of Large Appliances and Metal Furniture.	October 16, 2002.	October 27, 2004, 69 FR 62588.	Submitted on April 1, 2003. See 40 CFR 52.220(c)(315)(i)(A)(3).
Regulation 8 ("Organic Compounds"), Rule 15.	Emulsified and Liquid Asphalts.	June 1, 1994	March 22, 1995, 60 FR 15062.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(A)(6).
Regulation 8 ("Organic Compounds"), Rule 16.	Solvent Cleaning Operations.	October 16, 2002.	August 26, 2003, 68 FR 51187.	Submitted on April 1, 2003. See 40 CFR 52.220(c)(315)(i)(A)(1).
Regulation 8 ("Organic Compounds"), Rule 17.	Petroleum Dry Cleaning Operations.	September 5, 1990.	June 23, 1994, 59 FR 32354.	Submitted on April 5, 1991. See 40 CFR 52.220(c)(183)(i)(F)(2).
Regulation 8 ("Organic Compounds"), Rule 18.	Equipment Leaks.	November 27, 2002.	June 5, 2003, 68 FR 33635.	Submitted on January 21, 2003. See 40 CFR 52.220(c)(312)(i)(A)(1).

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
Regulation 8 ("Organic Compounds"), Rule 19.	Surface Preparation and Coating of Miscellaneous Metal Parts and Products.	October 16, 2002.	October 27, 2004, 69 FR 62588.	Submitted on April 1, 2003. See 40 CFR 52.220(c)(315)(i)(A)(3).
Regulation 8 ("Organic Compounds"), Rule 20.	Graphic Arts Printing and Coating Operations.	March 3, 1999 ..	September 13, 2000, 65 FR 55201.	Submitted on March 28, 2000. See 40 CFR 52.220(c)(277)(i)(C)(2).
Regulation 8 ("Organic Compounds"), Rule 21.	Rubber Tire Manufacturing Operations.	March 17, 1980	July 6, 1982, 47 FR 29231.	Submitted on May 13, 1980. See 40 CFR 52.220(c)(83)(i)(C).
Regulation 8 ("Organic Compounds"), Rule 22.	Valves and Flanges at Chemical Plants.	June 1, 1994	February 16, 1995, 60 FR 8949.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(A)(4).
Regulation 8 ("Organic Compounds"), Rule 23.	Coating of Flat Wood Paneling and Wood Flat Stock.	December 20, 1995.	December 23, 1997, 62 FR 66998.	Submitted on July 23, 1996. See 40 CFR 52.220(c)(239)(i)(E)(2).
Regulation 8 ("Organic Compounds"), Rule 24.	Pharmaceutical and Cosmetic Manufacturing Operations.	June 15, 1994 ..	March 22, 1995, 60 FR 15062.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(A)(6).
Regulation 8 ("Organic Compounds"), Rule 26.	Magnet Wire Coating Operations.	December 20, 1995.	August 19, 1999, 64 FR 45178.	Submitted on July 23, 1996. See 40 CFR 52.220(c)(239)(i)(E)(5).
Regulation 8 ("Organic Compounds"), Rule 27.	Perchloroethylene Dry Cleaning.	March 5, 1980 ..	July 8, 1982, 47 FR 29668.	Submitted on May 13, 1980. See 40 CFR 52.220(c)(83)(i)(B).
Regulation 8 ("Organic Compounds"), Rule 28.	Episodic Releases from Pressure Relief Devices at Petroleum Refineries and Chemical Plants.	March 18, 1998	May 24, 2004, 69 FR 29451.	Submitted on March 28, 2000. See 40 CFR 52.220(c)(277)(i)(C)(8).
Regulation 8 ("Organic Compounds"), Rule 29.	Aerospace Assembly and Component Coating Operations.	December 20, 1995.	December 23, 1997, 62 FR 66998.	Submitted on July 23, 1996. See 40 CFR 52.220(c)(239)(i)(E)(2).
Regulation 8 ("Organic Compounds"), Rule 30.	Semiconductor Manufacturing Operations.	June 15, 1994 ..	March 22, 1995, 60 FR 15062.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(A)(6).
Regulation 8 ("Organic Compounds"), Rule 31.	Surface Preparation and Coating of Plastic Parts and Products.	October 16, 2002.	October 30, 2003, 68 FR 61753.	Submitted on April 1, 2003. See 40 CFR 52.220(c)(315)(i)(A)(2).

Regulation 8 ("Organic Compounds"), Rule 32.	Wood Products	December 20, 1995.	December 23, 1997, 62 FR 66998.	Submitted on July 23, 1996. See 40 CFR 52.220(c)(239)(i)(E)(2).
Regulation 8 ("Organic Compounds"), Rule 33.	Gasoline Bulk Terminals and Gasoline Delivery Vehicles.	June 1, 1994	April 3, 1995, 60 FR 16799.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(A)(5).
Regulation 8 ("Organic Compounds"), Rule 34.	Solid Waste Disposal Sites.	October 6, 1999	July 1, 2002, 67 FR 44062.	Submitted on December 11, 2000. See 40 CFR 52.220(c)(285)(i)(C)(2).
Regulation 8 ("Organic Compounds"), Rule 35.	Ink, Coating, and Adhesive Manufacturing.	June 15, 1994 ..	March 22, 1995, 60 FR 15062.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(A)(6).
Regulation 8 ("Organic Compounds"), Rule 36.	Resin Manufacturing.	June 16, 1984 ..	January 29, 1985, 50 FR 3906.	Submitted on October 19, 1984. See 40 CFR 52.220(c)(156)(i)(A).
Regulation 8 ("Organic Compounds"), Rule 37.	Natural Gas and Crude Oil Production Facilities.	October 17, 1990.	August 11, 1992, 57 FR 35758.	Submitted on May 13, 1991. See 40 CFR 52.220(c)(184)(i)(C)(1).
Regulation 8 ("Organic Compounds"), Rule 38.	Flexible and Rigid Disc Manufacturing.	December 20, 1995.	December 23, 1997, 62 FR 66998.	Submitted on July 23, 1996. See 40 CFR 52.220(c)(239)(i)(E)(2).
Regulation 8 ("Organic Compounds"), Rule 39.	Gasoline Bulk Plants and Gasoline Delivery Vehicles.	June 1, 1994	April 3, 1995, 60 FR 16799.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(A)(5).
Regulation 8 ("Organic Compounds"), Rule 40.	Aeration of Contaminated Soil and Removal of Underground Storage Tanks.	December 15, 1999.	April 19, 2001, 66 FR 20084.	Submitted on March 28, 2000. See 40 CFR 52.220(c)(277)(i)(C)(4).
Regulation 8 ("Organic Compounds"), Rule 41.	Vegetable Oil Manufacturing Operations.	June 1, 1994	March 22, 1995, 60 FR 15062.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(A)(6).
Regulation 8 ("Organic Compounds"), Rule 42.	Large Commercial Bakeries.	June 1, 1994	March 7, 1995, 60 FR 12451.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(A)(3).
Regulation 8 ("Organic Compounds"), Rule 43.	Surface Preparation and Coating of Marine Vessels.	October 16, 2002.	October 30, 2003, 68 FR 61753.	Submitted on April 1, 2003. See 40 CFR 52.220(c)(315)(i)(A)(2).
Regulation 8 ("Organic Compounds"), Rule 44.	Marine Vessel Loading Terminals.	January 4, 1989	August 30, 1993, 58 FR 45442.	Submitted on March 26, 1990. See 40 CFR 52.220(c)(179)(i)(C)(1).
Regulation 8 ("Organic Compounds"), Rule 45.	Motor Vehicle and Mobile Equipment Coating Operations.	November 6, 1996.	May 26, 2000, 65 FR 34101.	Submitted on August 1, 1997. See 40 CFR 52.220(c)(248)(i)(F)(1).

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
Regulation 8 ("Organic Compounds"), Rule 46.	Marine Tank Vessel to Marine Tank Vessel Loading.	July 12, 1989 ...	August 30, 1993, 58 FR 45442.	Submitted on December 31, 1990. See 40 CFR 52.220(c)(182)(i)(B)(3).
Regulation 8 ("Organic Compounds"), Rule 47.	Air Stripping and Soil Vapor Extraction Operations.	June 15, 1994 ..	April 26, 1995, 60 FR 20431.	Submitted on September 28, 1994. See 40 CFR 52.220(c)(199)(i)(A)(2).
Regulation 8 ("Organic Compounds"), Rule 49.	Aerosol Paint Products.	August 21, 1991	March 22, 1995, 60 FR 15062.	Submitted on September 14, 1992. See 40 CFR 52.220(c)(189)(i)(C)(1).
Regulation 8 ("Organic Compounds"), Rule 50.	Polyester Resin Operations.	December 20, 1995.	December 23, 1997, 62 FR 66998.	Submitted on July 23, 1996. See 40 CFR 52.220(c)(239)(i)(E)(2).
Regulation 8 ("Organic Compounds"), Rule 51.	Adhesive and Sealant Products.	May 2, 2001	February 26, 2002, 67 FR 8721.	Submitted on May 31, 2001. See 40 CFR 52.220(c)(282)(i)(B)(1).
Regulation 8 ("Organic Compounds"), Rule 52.	Polystyrene, Polypropylene, and Polyethylene Foam Product Manufacturing Operations.	July 7, 1999	July 17, 2001, 66 FR 37154.	Submitted on March 28, 2000. See 40 CFR 52.220(c)(277)(i)(C)(5).
Regulation 9 ("Inorganic Gaseous Pollutants"), Rule 1.	Sulfur Dioxide ...	May 20, 1992 ...	June 8, 1999, 64 FR 30396.	Submitted on September 14, 1992. See 40 CFR 52.220(c)(189)(i)(C)(2).
Regulation 9 ("Inorganic Gaseous Pollutants"), Rule 3, Section 9–3–202.	Nitrogen Oxides from Heat Transfer Operations.	December 17, 1980.	July 6, 1982, 47 FR 29231.	Section 9–3–202 is titled "Modified Heat Transfer Operation." Submitted on January 28, 1981. See 40 CFR 52.220(c)(98)(ix)(A).
Regulation 9 ("Inorganic Gaseous Pollutants"), Rule 4.	Nitrogen Oxides from Fan Type Residential Central Furnaces.	December 7, 1983.	January 7, 1986, 51 FR 600.	Submitted on April 19, 1984. See 40 CFR 52.220(c)(154)(vi)(B).
Regulation 9 ("Inorganic Gaseous Pollutants"), Rule 7.	Nitrogen Oxides and Carbon Monoxide from Industrial, Institutional, and Commercial Boilers, Steam Generators, and Process Heaters.	September 15, 1993.	April 17, 1997, 62 FR 18710.	Submitted on July 23, 1996. See 40 CFR 52.220(c)(239)(i)(E)(1).

TABLE 6—EPA-APPROVED BAY AREA AIR QUALITY MANAGEMENT DISTRICT REGULATIONS—
Continued

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
Regulation 9 ("Inorganic Gaseous Pollutants"), Rule 8.	Nitrogen Oxides and Carbon Monoxide Emissions from Stationary Internal Combustion Engines.	January 20, 1993.	April 17, 1997, 62 FR 18710.	Submitted on July 23, 1996. See 40 CFR 52.220(c)(239)(i)(E)(1).
Regulation 9 ("Inorganic Gaseous Pollutants"), Rule 9.	Nitrogen Oxides from Stationary Gas Turbines.	September 21, 1994.	April 17, 1997, 62 FR 18710.	Submitted on July 23, 1996. See 40 CFR 52.220(c)(239)(i)(E)(1).
Regulation 9 ("Inorganic Gaseous Pollutants"), Rule 10.	Nitrogen Oxides and Carbon Monoxide from Boilers, Steam Generators and Process Heaters in Petroleum Refineries.	July 17, 2002 ...	April 2, 2008, 73 FR 17896.	Submitted on August 12, 2002. See 40 CFR 52.220(c)(353)(i)(A)(1).
Regulation 9 ("Inorganic Gaseous Pollutants"), Rule 11.	Nitrogen Oxides and Carbon Monoxide from Electric Power Generating Steam Boilers.	May 17, 2000 ...	May 20, 2002, 67 FR 35434.	Submitted on December 11, 2000. See 40 CFR 52.220(c)(285)(i)(C)(1).
Regulation 9 ("Inorganic Gaseous Pollutants"), Rule 12.	Nitrogen Oxides from Glass Melting Furnaces.	January 19, 1994.	April 17, 1997, 62 FR 18710.	Submitted on July 23, 1996. See 40 CFR 52.220(c)(239)(i)(E)(1).
Regulation 11 ("Hazardous Pollutants"), Rule 1, sections 11–1–100 to 11–1–102, and 11–1–300 to 11–1–303.	Lead	January 1, 1980	September 2, 1981, 46 FR 43968.	Submitted on June 2, 1980. Approved sections relate to general provisions and standards. See 40 CFR 52.220(c)(79)(ii)(A).
Regulation 11 ("Hazardous Pollutants"), Rule 1, sections 11–1–500, 11–1–501, and 11–1–600 to 11–1–603.	Lead	January 1, 1980	July 6, 1982, 47 FR 29231.	Submitted on June 2, 1980. Approved sections relate to monitoring and records and the manual of procedures. See 40 CFR 52.220(c)(79)(ii)(B).
Regulation 12 ("Miscellaneous Standards of Performance"), Rule 2.	Rendering Plants.	January 1, 1980	September 2, 1981, 46 FR 43968.	Submitted on June 2, 1980. See 40 CFR 52.220(c)(79)(ii)(A).

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
Regulation 12 ("Miscellaneous Standards of Performance"), Rule 3.	Asphalt Air Blowing.	January 1, 1980	September 2, 1981, 46 FR 43968.	Submitted on June 2, 1980. See 40 CFR 52.220(c)(79)(ii)(A).
Regulation 12 ("Miscellaneous Standards of Performance"), Rule 4.	Sandblasting	January 1, 1980	September 2, 1981, 46 FR 43968.	Submitted on June 2, 1980. See 40 CFR 52.220(c)(79)(ii)(A).
General Conformity Regulation				
Not applicable	Federal General Conformity Regulation.	September 7, 1994.	April 23, 1999, 64 FR 19916.	Submitted on December 28, 1994. See 40 CFR 52.220(c)(205)(i)(B)(2).
Manual of Procedures				
Manual of Procedures, Volume I, excluding sections 3 and 4.	Enforcement Procedures.	January 20, 1982.	May 3, 1984, 49 FR 18822.	Submitted on May 20, 1982. See 40 CFR 52.220(c)(125)(viii)(A). Sections 3 and 4 were not included in the action—see the proposed rule at 48 FR 12108 (March 23, 1983).
Manual of Procedures, Volume I, section 5.	Enforcement Procedures.	September 16, 1993.	August 6, 2001, 66 FR 40898.	Section 5 is titled "Boiler, Steam Generator, and Process Heater Tuning Procedure." Submitted on July 23, 1996. See 40 CFR 52.220(c)(239)(i)(E)(7).
Manual of Procedures, Volume II.	Engineering Permitting Procedures.	January 1, 1980	July 6, 1982, 47 FR 29231.	Submitted on July 30, 1981. See 40 CFR 52.220(c)(101)(i)(B).
Manual of Procedures, Volume III.	Laboratory Policy and Procedures.	January 1, 1980	July 6, 1982, 47 FR 29231.	Submitted on July 30, 1981. See 40 CFR 52.220(c)(101)(i)(B).
Manual of Procedures, Volume IV.	Source Test Policy and Procedures.	January 1, 1980	July 6, 1982, 47 FR 29231.	Submitted on July 30, 1981. See 40 CFR 52.220(c)(101)(i)(B).
Manual of Procedures, Volume V.	Continuous Emission Monitoring and Procedures.	January 20, 1982.	May 3, 1984, 49 FR 18822.	Submitted on May 20, 1982. See 40 CFR 52.220(c)(125)(viii)(A).
Manual of Procedures, Volume VI, excluding sections 3 and 4.	Air Monitoring Procedures.	January 20, 1982.	May 3, 1984, 49 FR 18822.	Submitted on May 20, 1982. See 40 CFR 52.220(c)(125)(viii)(A). Sections 3 and 4 were not included in the action—see the proposed rule at 48 FR 12108 (March 23, 1983).

TABLE 7—EPA-APPROVED BUTTE COUNTY AIR QUALITY MANAGEMENT DISTRICT REGULATIONS

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
Pre-1985 Rule Codification				
2–12f	Architectural Coatings.	July 26, 1979 ...	May 3, 1982, 47 FR 18852.	Submitted on November 13, 1979. See 40 CFR 52.220(c)(91)(ii)(A).
2–13	Reduced Sulfur Emission Standards.	January 4, 1972	May 31, 1972, 37 FR 10842.	Submitted on February 21, 1972. See 40 CFR 52.220(b).
Post-1985 Rule Codification				
Regulation I—Definitions				
101	Definitions	December 14, 2017.	November 12, 2020, 85 FR 71846.	Submitted on May 23, 2018. See 40 CFR 52.220(c)(518)(i)(B)(1).
Regulation II—Prohibitions				
202	Visible Emissions.	August 6, 1985	July 12, 1990, 55 FR 28622.	Submitted on February 10, 1986. See 40 CFR 52.220(c)(168)(i)(A)(2).
203	Particulate Matter Concentration.	August 6, 1985	July 12, 1990, 55 FR 28622.	Submitted on February 10, 1986. See 40 CFR 52.220(c)(168)(i)(A)(2).
204	Exemptions to Rules 201, 202 and 203.	August 6, 1985	July 12, 1990, 55 FR 28622.	Submitted on February 10, 1986. See 40 CFR 52.220(c)(168)(i)(A)(2).
205	Process Weight Limitation.	August 6, 1985	July 12, 1990, 55 FR 28622.	Submitted on February 10, 1986. See 40 CFR 52.220(c)(168)(i)(A)(2).
207	Wood Burning Devices.	December 11, 2008.	April 11, 2013, 78 FR 21540.	Submitted on April 25, 2012. See 40 CFR 52.220(c)(419)(i)(C)(1).
210	Gasoline Transfer into Stationary Storage Containers.	August 6, 1985	July 12, 1990, 55 FR 28622.	Submitted on February 10, 1986. See 40 CFR 52.220(c)(168)(i)(A)(2).
211	Exemptions to Rule 210.	August 6, 1985	July 12, 1990, 55 FR 28622.	Submitted on February 10, 1986. See 40 CFR 52.220(c)(168)(i)(A)(2).
212	Gasoline Storage.	August 6, 1985	July 12, 1990, 55 FR 28622.	Submitted on February 10, 1986. See 40 CFR 52.220(c)(168)(i)(A)(2).
213	Bulk Facilities, Petition for Annual Exemption.	August 6, 1985	July 12, 1990, 55 FR 28622.	Submitted on February 10, 1986. See 40 CFR 52.220(c)(168)(i)(A)(2).
214	Vapor Collection and Disposal System at Loading Facilities.	August 6, 1985	July 12, 1990, 55 FR 28622.	Submitted on February 10, 1986. See 40 CFR 52.220(c)(168)(i)(A)(2).
215	Storage of Gasoline Products at Bulk Facilities.	August 6, 1985	July 12, 1990, 55 FR 28622.	Submitted on February 10, 1986. See 40 CFR 52.220(c)(168)(i)(A)(2).
220	Drycleaning	August 6, 1985	July 12, 1990, 55 FR 28622.	Submitted on February 10, 1986. See 40 CFR 52.220(c)(168)(i)(A)(2).

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
225	Solvent Storage	August 6, 1985	July 12, 1990, 55 FR 28622.	Submitted on February 10, 1986. See 40 CFR 52.220(c)(168)(i)(A)(2).
231	Sulfur Oxides Emission Standards.	August 6, 1985	July 12, 1990, 55 FR 28622.	Submitted on February 10, 1986. See 40 CFR 52.220(c)(168)(i)(A)(2).
241	Cutback and Emulsified As- phalt.	January 12, 1993.	February 5, 1996, 61 FR 4215.	Submitted on May 13, 1993. See 40 CFR 52.220(c)(193)(i)(C)(1).
250	Circumvention ..	August 6, 1985	February 3, 1987, 52 FR 3226.	Submitted on February 10, 1986. See 40 CFR 52.220(c)(168)(i)(A)(1).
260	Separation of Emissions.	August 6, 1985	February 3, 1987, 52 FR 3226.	Submitted on February 10, 1986. See 40 CFR 52.220(c)(168)(i)(A)(1).
261	Combination of Emissions.	August 6, 1985	February 3, 1987, 52 FR 3226.	Submitted on February 10, 1986. See 40 CFR 52.220(c)(168)(i)(A)(1).
270	Orchard Heaters	August 6, 1985	February 3, 1987, 52 FR 3226.	Submitted on February 10, 1986. See 40 CFR 52.220(c)(168)(i)(A)(1).
Regulation III—Open Burning				
300	Open Burning Requirements, Prohibitions, and Exemp- tions.	August 27, 2015	October 11, 2016, 81 FR 70018.	Submitted on March 11, 2016. See 40 CFR 52.220(c)(474)(i)(C)(1).
Regulation IV—Permits				
400	Permit Require- ments.	April 24, 2014 ...	December 22, 2016, 81 FR 93820.	Submitted on November 6, 2014. See 40 CFR 52.220(c)(457)(i)(C)(2).
401	Permit Exemp- tions.	April 24, 2014 ...	December 22, 2016, 81 FR 93820.	Submitted on November 6, 2014. See 40 CFR 52.220(c)(457)(i)(C)(3).
432	Federal New Source Re- view (FNSR).	April 22, 2021 ...	February 5, 2024, 89 FR 7622.	Submitted on August 3, 2021 as an attachment to a letter of the same date. See 40 CFR 52.220(c)(591)(i)(B)(1).
433	Rice Straw Emission Re- duction Cred- its.	April 24, 2014 ...	April 11, 2017, 82 FR 17380.	Submitted on November 6, 2014. See 40 CFR 52.220(c)(457)(i)(C)(5).
434	Emissions Statements.	June 25, 2020 ..	July 29, 2022, 87 FR 45657.	Submitted on July 27, 2020 as an attachment to a letter dated July 23, 2020. See 40 CFR 52.220(c)(573)(i)(A)(1).
Regulation VII—Violations				
704	Violations of Au- thority to Con- struct and Permit Condi- tions.	August 6, 1985	February 3, 1987, 52 FR 3226.	Submitted on February 10, 1986. See 40 CFR 52.220(c)(168)(i)(A)(1).

TABLE 7—EPA-APPROVED BUTTE COUNTY AIR QUALITY MANAGEMENT DISTRICT REGULATIONS—
Continued

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
Regulation IX—Miscellaneous				
901	Severability Clause.	August 6, 1985	February 3, 1987, 52 FR 3226.	Submitted on February 10, 1986. See 40 CFR 52.220(c)(168)(i)(A)(1).
Regulation XI—Federal Clean Air Act Requirements				
1103	Conformity of General Federal Actions to State Implementation Plans.	February 16, 1995.	April 23, 1999, 64 FR 19916.	Submitted on May 25, 1995. See 40 CFR 52.220(c)(221)(i)(B)(1).
1105	Request for Designated Non-Major Source Status.	February 15, 1996.	May 2, 2001, 66 FR 21875.	Submitted on May 10, 1996. See 40 CFR 52.220(c)(231)(i)(D)(1).
1107, except for the incorporation by reference of 40 CFR 52.21(b)(49)(v) into sections 3 and 4.1.	Prevention of Significant Deterioration (PSD) Permits.	June 18, 2012 ..	November 12, 2015, 80 FR 69880.	Submitted on February 6, 2013. See 40 CFR 52.220(c)(428)(i)(F)(1). Approved along with two letters from BCAQMD dated November 13, 2014 and April 8, 2015 clarifying the rule. These letters are listed in the paragraph setting forth the EPA-approved non-regulatory and quasi-regulatory measures in the California SIP.

TABLE 8—EPA-APPROVED CALAVERAS COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS

District rule No.	Title/subject	State effective date	EPA approval date	Additional explanation
Original Codification of Rules and Regulations				
Regulation I—General Provisions				
1.5	Validity	April 5, 1971	May 31, 1972, 37 FR 10842.	Submitted on February 21, 1972. See 40 CFR 52.220(b).
Regulation IV—Prohibitions				
4.1	Prohibitions under State Law.	April 5, 1971	May 31, 1972, 37 FR 10842.	Submitted on February 21, 1972. See 40 CFR 52.220(b).
April 1972 Codification of Rules and Regulations				
Regulation I—General Provisions				
101	Title	April 24, 1972 ...	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
Regulation II—Permits				
201	Permits Required.	April 24, 1972 ...	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).

TABLE 9—EPA-APPROVED COLUSA COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
Regulation I—General Provisions				
1.1	Title	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
1.2	Definitions	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
1.2(c) and (cg)—see explanatory note.	Definitions	December 11, 1972.	August 22, 1977, 42 FR 42219.	Defines the terms, “agricultural burning” and “open burning in agricultural operations in the growing of crops or raising of fowls or animals.” Submitted on July 25, 1973, and later approved, in uncodified form, as part of “Amendment Number 3.” The current (2017) APCD codification of the definitions is shown in the first column. See 40 CFR 52.220(c)(21)(x)(A).
1.3	Confidential Information.	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
1.5	Validity	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
1.7	Effective Date ...	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).

Regulation II—Registration and Permits				
2.1	Untitled, establishes registration requirement.	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
2.2	Untitled, establishes content requirements for registration.	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
2.3	Untitled, relates to service of notices.	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
2.4	Permits General Requirements.	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
2.5	Permits Required.	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
2.6	Exemptions	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
2.7A	Standards for Granting Applications.	February 13, 1980.	June 18, 1982, 57 FR 26379.	Submitted on February 25, 1980. See 40 CFR 52.220(c)(54)(x)(A).
2.7B	Conditional Approval.	February 13, 1980.	June 18, 1982, 57 FR 26379.	Submitted on February 25, 1980. See 40 CFR 52.220(c)(54)(x)(A).
Regulation IV—Prohibitions				
4.1	Prohibitions under State Law.	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
4.3	Ringelmann Chart.	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
4.4 (excluding (g)).	Exceptions	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6). Rule 4.4(g), which relates to equipment breakdown, was disapproved at 43 FR 33915 (August 2, 1978)—see 40 CFR 52.271(a)(4)(i).
4.7	Wet Plumes	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
4.8	Open Burning ...	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
4.8A	Other Open Burning.	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
4.9	Incinerator Burning.	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
4.10	Particulate Matter.	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
4.11	Dust and Condensed Fumes.	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
4.12	Specific Contaminants.	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
4.13	Prohibitions Regarding Orchard or Citrus Fruit Heaters.	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
4.14	Additional Prohibitions.	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
4.15	Reduction of Animal Matter.	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
4.16	Gasoline Storage.	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
4.17	Circumvention ..	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
4.18	Separation of Emissions.	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
4.19	Combination of Emissions.	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
4.20	Emission Control for Used Motor Vehicles.	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
Regulation VI—Agricultural Burning				
6.1	Agricultural Burning Permits.	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
6.2 (excluding (g)).	Permit Form	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6). Paragraph (g) was superseded by approval of 6.2(g) at 42 FR 42219 (August 22, 1977).
6.2(g)	Permit Form	October 22, 1974.	August 22, 1977, 42 FR 42219.	Submitted on January 10, 1975. See 40 CFR 52.220(c)(26)(vi)(A).
6.2—see explanatory note.	Advance Burning Notices.	December 11, 1972.	August 22, 1977, 42 FR 42219.	Submitted on July 25, 1973, and later approved, in uncodified form as part of the “Amendment 3.” The analogous current local APCD rule is Rule 6.2. The local APCD has amended the rule since it was approved as part of the SIP, but the version of the rule listed here remains the applicable SIP version of the rule. See 40 CFR 52.220(c)(21)(x)(A).

Environmental Protection Agency

§ 52.220a

TABLE 9—EPA-APPROVED COLUSA COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS—
Continued

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
6.3	No Burn Days ..	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
6.4 (excluding (d)(1–3)).	Preparation of Agricultural Waste.	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6). Paragraph (d)(1–3) was superseded by approval of 6.4(d)(1–2) and the “Rice Stubble and Straw Burning” rule at 42 FR 42219 (August 22, 1977).
6.4(d) (1–2)	Preparation of Agricultural Waste.	October 22, 1974.	August 22, 1977, 42 FR 42219.	Submitted on January 10, 1975. See 40 CFR 52.220(c)(26)(vi)(A).
6.5	Restricted Burning Days.	December 11, 1972.	August 22, 1977, 42 FR 42219.	Submitted on July 25, 1973. See 40 CFR 52.220(c)(21)(x)(A). Included as part of “Amendment Number 3.”
6.6	Fire Permit Agencies.	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
6.6A (paragraphs I and II.1).	Notification to Fire Department of “Burn Day” or “No Burn Day” at 8:00 a.m. Each Morning.	August 19, 1975	August 22, 1977, 42 FR 42219.	Submitted on February 10, 1976. See 40 CFR 52.220(c)(30)(iv)(A).
6.7	Exceptions	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
6.7—see explanatory note.	Rice Stubble and Straw Burning.	August 19, 1975	August 22, 1977, 42 FR 42219.	Submitted on February 10, 1976, and later approved, in uncodified form, as “Rice Stubble Burning Regulations.” Only paragraphs (a) through (f) were approved (i.e., paragraph (g) was not approved). The current (2017) codification of the rule is Rule 6.7. The local APCD has amended the rule since it was approved as part of the SIP, but the version of the rule listed here remains the applicable SIP version of the rule. See 40 CFR 52.220(c)(30)(iv)(A).
6.8	Tires	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
6.9	Fire Prevention	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
6.10	Burning on No-Burn Days.	April 4, 1972	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).

113	Separation and Combination.	May 2, 1996	June 3, 1999, 64 FR 29790.	Submitted on July 23, 1996. See 40 CFR 52.220(c)(239)(i)(C)(1).
114	Severability	May 2, 1996	June 3, 1999, 64 FR 29790.	Submitted on July 23, 1996. See 40 CFR 52.220(c)(239)(i)(C)(1).
115	Applicability of Emission Limits.	May 2, 1996	June 3, 1999, 64 FR 29790.	Submitted on July 23, 1996. See 40 CFR 52.220(c)(239)(i)(C)(1).
Regulation II—Permits				
201	Permits Required.	May 2, 1996	November 8, 2007, 72 FR 63107.	Submitted on July 23, 1996. See 40 CFR 52.220(c)(239)(i)(C)(3).
202	Permit Exemptions.	January 13, 2011.	July 14, 2015, 80 FR 40909.	Submitted on June 21, 2011. See 40 CFR 52.220(c)(391)(i)(A)(2).
202.1	Experimental Research Operations.	May 2, 1996	November 8, 2007, 72 FR 63107.	Submitted on July 23, 1996. See 40 CFR 52.220(c)(239)(i)(C)(4).
203	Transfer	April 18, 1972 ...	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
205	Permit Renewal	May 2, 1996	December 5, 2008, 73 FR 74029.	Adopted through District Resolution dated May 2, 1996. Submitted on July 23, 1996. See 40 CFR 52.220(c)(239)(i)(C)(5).
208	Standards for Granting Applications.	September 17, 1998.	April 22, 2004, 69 FR 21713.	Submitted on October 27, 1998. See 40 CFR 52.220(c)(260)(i)(C)(1).
209	Conditional Approval.	April 18, 1972 ...	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
209.1	Permit Conditions.	May 2, 1996	November 8, 2007, 72 FR 63107.	Submitted on July 23, 1996. See 40 CFR 52.220(c)(239)(i)(C)(4).
210.1 (excluding paragraph (3)(E)).	Standard for Authority to Construct.	March 6, 1980 ..	August 21, 1981, 46 FR 42450.	Submitted on April 15, 1980. See 40 CFR 52.233(a)(4)(i) and 40 CFR 52.220(c)(76)(i)(A).

TABLE 10—EPA-APPROVED EASTERN KERN AIR POLLUTION CONTROL DISTRICT REGULATIONS; KERN COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS—Continued

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
210.1A	Major New and Modified Stationary Source Review (MNSR).	August 4, 2022	December 5, 2022, 87 FR 74316.	Submitted on October 5, 2022. See 40 CFR 52.220(c)(590)(i)(A)(1).
210.2	Standards for Permits to Operate.	May 2, 1996	November 8, 2007, 72 FR 63107.	Submitted on July 23, 1996. See 40 CFR 52.220(c)(239)(i)(C)(4).
210.4	Prevention of Significant Deterioration.	February 8, 2013.	December 10, 2012, 77 FR 73316.	Adopted on January 12, 2012. Submitted on April 25, 2012. Effective upon effective date of EPA approval. Final approval of Rule 210.4 is based, in part, on the clarifications contained in: (1) Letter dated July 19, 2012 from David L. Jones, EKAPCD, to Gerardo Rios, United States Environmental Protection Agency Region 9, regarding Clarifications of District Rule 210.4 and 40 CFR 51.166; and (2) Letter dated August 21, 2012 from David L. Jones, EKAPCD, to Gerardo Rios, United States Environmental Protection Agency Region 9, regarding Clarifications of District Rule 210.4 and 40 CFR 52.21(k)(2). These letters will be listed in 40 CFR 52.220(e). See 40 CFR 52.220(c)(419)(i)(A)(1).
210.5	Visibility Protection.	May 2, 1996	November 8, 2007, 72 FR 63107.	Submitted on July 23, 1996. See 40 CFR 52.220(c)(239)(i)(C)(4).

Regulation IV—Prohibitions

401	Visible Emissions.	November 29, 1993.	July 17, 2001, 66 FR 37151.	Submitted on March 29, 1994. See 40 CFR 52.220(c)(196)(i)(F)(4).
402	Fugitive Dust	November 3, 2004.	August 13, 2009, 74 FR 40750.	Submitted on January 13, 2005. See 40 CFR 52.220(c)(335)(i)(E)(1).
404.1	Particulate Matter Concentration.	January 24, 2007.	January 17, 2008, 73 FR 3192.	Adopted by the Kern County air district through Resolution No. 2007–001–01, Reference No. Item 5, Adoption of Amendments to Rules and Regulations of the Kern County Air Pollution Control District; to Wit: Rule 404.1. Submitted on August 24, 2007. See 40 CFR 52.220(c)(351)(i)(D)(1) and 40 CFR 52.220(c)(351)(i)(D)(1)(i).
405	Particulate Matter—Emission Rate.	July 18, 1983 ...	May 3, 1984, 49 FR 18824.	Submitted on August 30, 1983. See 40 CFR 52.220(c)(140)(ii)(A).

Environmental Protection Agency

TABLE 10—EPA-APPROVED EASTERN KERN AIR POLLUTION CONTROL DISTRICT REGULATIONS; KERN COUNTY AIR POLLUTION CONTROL DISTRICT REGULATIONS—Continued

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
405	Particulate Matter—Emission Rate.	March 19, 1974	August 22, 1977, 42 FR 42219.	Submitted on July 19, 1974. See 40 CFR 52.220(c)(24)(vii)(A). Partially superseded by approval of an amended version of Rule 405 on May 3, 1984.
406.2	Process Weight—Portland Cement Kilns.	April 18, 1972 ...	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
407	Sulfur Compounds.	April 18, 1972 ...	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
407.1	Disposal of Solid or Liquid Wastes.	April 18, 1972 ...	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
409	Fuel Burning Equipment—Combustion Contaminants.	May 7, 1998	May 18, 1999, 64 FR 26876.	Submitted on June 23, 1998. See 40 CFR 52.220(c)(256)(i)(C)(2).
410	Organic Solvents.	December 17, 1974.	August 22, 1977, 42 FR 42219.	Submitted on January 10, 1975. See 40 CFR 52.220(c)(26)(xii)(A).
410.1A	Architectural Coating Controls.	January 1, 2011	July 6, 2011, 76 FR 39303.	Adopted by the Eastern Kern air district on March 11, 2010. Submitted on July 20, 2010. See 40 CFR 52.220(c)(381)(i)(B)(2).
410.2	Disposal and Evaporation of Solvents.	April 18, 1972 ...	September 22, 1972, 37 FR 19812.	Submitted on June 30, 1972. See 40 CFR 52.220(c)(6).
410.3	Organic Solvent Degreasing Operations.	May 7, 1998	April 2, 1999, 64 FR 15922.	Submitted on June 23, 1998. See 40 CFR 52.220(c)(256)(i)(C)(2).
410.4	Metal, Plastic, and Pleasure Craft Parts and Products Coating Operations.	March 13, 2014	May 17, 2016, 81 FR 30484.	Submitted on July 25, 2014. See 40 CFR 52.220(c)(447)(i)(D)(2).
410.4A	Motor Vehicle and Mobile Equipment Refinishing Operations.	March 13, 2014	July 25, 2016, 81 FR 48346.	Submitted on July 25, 2014. See 40 CFR 52.220(c)(447)(i)(D)(5).
410.5	Cutback, Slow Cure and Emulsified Asphalt, Paving and Maintenance Operations.	March 7, 1996 ..	February 6, 1998, 63 FR 6073.	Submitted on May 10, 1996. See 40 CFR 52.220(c)(231)(i)(B)(2).
410.6	Perchloroethylene Dry Cleaning Systems.	May 6, 1991	April 24, 1992, 57 FR 15026.	Submitted on May 30, 1991. See 40 CFR 52.220(c)(185)(i)(A)(1).
410.6A	Petroleum Solvent Dry Cleaning Operations.	May 6, 1991	April 24, 1992, 57 FR 15026.	Submitted on May 30, 1991. See 40 CFR 52.220(c)(185)(i)(A)(1).

Rules and Regulations (Lake Tahoe Air Basin Portion of District)				
Regulation I—General Provisions and Definitions				
101	Title	February 7, 1979.	May 18, 1981, 46 FR 27115.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xiv)(A).
102 (all definitions but LAER, stationary source, and modification).	Definitions	February 7, 1979.	May 18, 1981, 46 FR 27115.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xiv)(A).
102 (definitions for LAER, stationary source, and modifications only).	Definitions	February 7, 1979.	June 23, 1982, 47 FR 27065.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xiv)(C).
103	Validity	February 7, 1979.	May 18, 1981, 46 FR 27115.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xiv)(A).
Regulation II—Prohibitions				
201	Coverage	February 7, 1979.	May 18, 1981, 46 FR 27115.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xiv)(A).
202	Visible Emissions.	February 7, 1979.	May 18, 1981, 46 FR 27115.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xiv)(A).
203	Exceptions	February 7, 1979.	May 18, 1981, 46 FR 27115.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xiv)(A).
206A	Incinerator Burning.	February 7, 1979.	May 18, 1981, 46 FR 27115.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xiv)(A).
206B	Pathological Incineration.	February 7, 1979.	May 18, 1981, 46 FR 27115.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xiv)(A).
207	Particulate Matter.	February 7, 1979.	May 18, 1981, 46 FR 27115.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xiv)(A).
208	Fugitive Dust	February 7, 1979.	May 18, 1981, 46 FR 27115.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xiv)(A).
209	Sulfur Content of Fuels.	February 7, 1979.	May 18, 1981, 46 FR 27115.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xiv)(A).
209	Fossil Fuel-Steam Generator Facility.	February 26, 1975.	June 14, 1978, 43 FR 25674.	Submitted on April 10, 1975. See 40 CFR 52.220(c)(27)(viii)(A). Originally adopted for district-wide applicability but rule was superseded by approval of Rule 209 for the Mountain Counties Air Basin portion of the district.
210	Specific Contaminants.	February 7, 1979.	May 18, 1981, 46 FR 27115.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xiv)(A).
211	Process Weight	February 7, 1979.	May 18, 1981, 46 FR 27115.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xiv)(A).
212	Abrasive Blasting.	February 7, 1979.	May 18, 1981, 46 FR 27115.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xiv)(A).
217	Compliance Tests.	February 7, 1979.	May 18, 1981, 46 FR 27115.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xiv)(A).

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
Regulation III—Open Burning				
301	Prohibition on Open Burning.	February 7, 1979.	May 18, 1981, 46 FR 27115.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xiv)(A).
302, excluding paragraph (C).	Exceptions to Rule 301.	February 7, 1979.	May 18, 1981, 46 FR 27115.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xiv)(A).
303	Burning Permits	February 7, 1979.	May 18, 1981, 46 FR 27115.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xiv)(A).
304	Permit Validity ..	February 7, 1979.	May 18, 1981, 46 FR 27115.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xiv)(A).
305	No-Burn Days ..	February 7, 1979.	May 18, 1981, 46 FR 27115.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xiv)(A).
306	Exceptions to Rule 305.	February 7, 1979.	May 27, 1982, 47 FR 23159.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xiv)(B).
307	Agricultural Burning Reports.	February 7, 1979.	May 18, 1981, 46 FR 27115.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xiv)(A).
308	Amount Burned Daily.	February 7, 1979.	May 18, 1981, 46 FR 27115.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xiv)(A).
309	Approved Ignition Devices.	February 7, 1979.	May 18, 1981, 46 FR 27115.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xiv)(A).
310	Restricted Burning Days.	February 7, 1979.	May 18, 1981, 46 FR 27115.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xiv)(A).
312	Wind Direction ..	February 26, 1975.	June 14, 1978, 43 FR 25674.	Submitted on April 10, 1975. See 40 CFR 52.220(c)(27)(viii)(A). Originally adopted for district-wide applicability but rule was superseded by approval of Rule 316 for the Mountain Counties Air Basin portion of the district.
312	Minimum Drying Times.	February 7, 1979.	May 18, 1981, 46 FR 27115.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xiv)(A).
313	Exceptions to Rule 312.	February 7, 1979.	May 18, 1981, 46 FR 27115.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xiv)(A).
314	Preparation of Material to be Burned.	February 7, 1979.	May 18, 1981, 46 FR 27115.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xiv)(A).
315	Burning of Agricultural Waste.	February 7, 1979.	May 18, 1981, 46 FR 27115.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xiv)(A).
316	Range Improvement Burning.	February 7, 1979.	May 18, 1981, 46 FR 27115.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xiv)(A).
317	Forest Management Burning.	February 7, 1979.	May 18, 1981, 46 FR 27115.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xiv)(A).
319	Right-of-Way Clearing and Levee, Ditch and Reservoir Maintenance Burning.	February 7, 1979.	May 18, 1981, 46 FR 27115.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xiv)(A).
320	Hazard Reduction Burning.	February 7, 1979.	May 18, 1981, 46 FR 27115.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xiv)(A).
Regulation IV—Permit Systems Conditions				
404	Upset Conditions, Breakdown or Scheduled Maintenance.	February 7, 1979.	May 18, 1981, 46 FR 27115.	Submitted on May 23, 1979. See 40 CFR 52.220(c)(51)(xiv)(A).

Environmental Protection Agency

§ 52.220a

TABLE 11—EPA-APPROVED EL DORADO COUNTY AIR QUALITY MANAGEMENT DISTRICT REGULATIONS—Continued

District citation	Title/subject	State effective date	EPA approval date	Additional explanation
405	Separation of Emissions.	February 26, 1975.	June 14, 1978, 43 FR 25674.	Submitted on April 10, 1975. See 40 CFR 52.220(c)(27)(viii)(A). Originally adopted for district-wide applicability but rule was superseded by approval of Rule 510 for the Mountain Counties Air Basin portion of the district.
406	Combination of Emissions.	February 26, 1975.	June 14, 1978, 43 FR 25674.	Submitted on April 10, 1975. See 40 CFR 52.220(c)(27)(viii)(A). Originally adopted for district-wide applicability but rule was superseded by approval of Rule 511 for the Mountain Counties Air Basin portion of the district.
407	Circumvention ..	February 26, 1975.	June 14, 1978, 43 FR 25674.	Submitted on April 10, 1975. See 40 CFR 52.220(c)(27)(viii)(A). Originally adopted for district-wide applicability but rule was superseded by approval of Rule 512 for the Mountain Counties Air Basin portion of the district.
409	Public Records	December 31, 1976.	November 6, 1978, 43 FR 51632.	Submitted on November 4, 1977. See 40 CFR 52.220(c)(42)(x)(A). Originally adopted for district-wide applicability but rule was superseded by approval of Rule 514 for the Mountain Counties Air Basin portion of the district.

**Rules and Regulations (Mountain Counties Air Basin Portion of District)
Regulation II—Prohibitions**

202	Visible Emissions.	February 26, 1975.	June 14, 1978, 43 FR 25674.	Submitted on April 10, 1975. See 40 CFR 52.220(c)(27)(viii)(A). Originally adopted for district-wide applicability but rule was superseded by approval of Rule 202 for the Lake Tahoe Air Basin portion of the district.
203	Exceptions	September 13, 1982.	November 18, 1983, 48 FR 52450.	Submitted on April 11, 1983. See 40 CFR 52.220(c)(138)(ii)(A).
206	Incinerator Burning.	September 13, 1982.	November 18, 1983, 48 FR 52450.	Submitted on April 11, 1983. See 40 CFR 52.220(c)(138)(ii)(A).
207	Particulate Matter.	September 13, 1982.	November 18, 1983, 48 FR 52450.	Submitted on April 11, 1983. See 40 CFR 52.220(c)(138)(ii)(A).
209	Fossil Fuel- Steam Generating Facility.	September 13, 1982.	November 18, 1983, 48 FR 52450.	Submitted on April 11, 1983. See 40 CFR 52.220(c)(138)(ii)(A).
210	Specific Contaminants.	September 13, 1982.	November 18, 1983, 48 FR 52450.	Submitted on April 11, 1983. See 40 CFR 52.220(c)(138)(ii)(A).

§ 52.221 Classification of regions.

The California plan was evaluated on the basis of the following classifications:

TABLE 1 TO § 52.221

Air quality control region	Pollutant				
	Particulate matter	Sulfur oxides	Nitrogen dioxide	Carbon monoxide	Photochemical oxidants (hydrocarbons)
Great Basin Valley Intrastate	I	III	III	III	III
Lake County Intrastate	II	III	III	III	I
Lake Tahoe Intrastate	II	III	III	I	III
Metropolitan Los Angeles Intrastate	I	III	III	I	I
Mountain Counties Intrastate	II	III	III	I	I

TABLE 1 TO § 52.221—Continued

Air quality control region	Pollutant				
	Particulate matter	Sulfur oxides	Nitrogen dioxide	Carbon monoxide	Photochemical oxidants (hydrocarbons)
North Central Coast					
Intrastate	II	III	III	III	I
North Coast Intrastate	II	III	III	III	III
Northeast Plateau					
Intrastate	III	III	III	III	III
Sacramento Valley					
Intrastate	II	III	III	I	I
San Diego Intrastate ...	II	III	III	I	I
San Francisco Bay					
Area Intrastate	II	III	III	I	I
San Joaquin Valley					
Intrastate	II	III	III	I	I
South Central Coast					
Intrastate	III	III	III	III	I
Southeast Desert Intrastate	I	III	III	III	I

[86 FR 16537, Mar. 30, 2021]

§ 52.222 Negative declarations.

(a) The following air pollution control districts submitted negative declarations for volatile organic compound source categories to satisfy the requirements of section 182 of the Clean Air Act, as amended. The following negative declarations are approved as additional information to the State Implementation Plan.

(1) Mojave Desert Air Quality Management District.

(i) Natural Gas and Gasoline Processing Equipment and Chemical Processing and Manufacturing were submitted on July 13, 1994 and adopted on May 25, 1994.

(ii) Asphalt Air Blowing was submitted on December 20, 1994 and adopted on October 26, 1994.

(iii) Vacuum Producing Devices or Systems was submitted on December 29, 1994 and adopted on December 21, 1994.

(iv) Synthetic Organic Chemical Manufacturing Industry (SOCMI) Distillation, SOCMI Reactors, SOCMI Batch Processing, Offset Lithography, Industrial Wastewater, Plastic Parts Coating (Business Machines), Plastic Parts (Other), and Ship Building were submitted on August 7, 1995 and adopted on June 28, 1995.

(v) Pneumatic Rubber Tire Manufacturing, Large Petroleum Dry Cleaners, Surface Coating of Cans, Surface Coating of Coils, Surface Coating Fabrics, Surface Coating Operations at Automotive and Light Duty Truck Assembly Plants, Surface of Coating of Large Appliances, Surface of Coating of Magnet Wire, Vacuum Producing Devices or Systems, Leaks From Petroleum Refinery Equipment, Process Unit Turnarounds, Equipment Leaks From Natural Gas/Gasoline Processing Plants, Synthesized Pharmaceutical Products, Air Oxidation Process—SOCMI, Polymer Manufacturing SOCMI and Polymer Manufacturing Equipment Leaks, Reactor Processes and Distillation Operations in SOCMI, and Synthetic Organic Chemical Polymer and Resin Manufacturing were submitted on July 11, 2007 and adopted January 22, 2007.

(vi) Petroleum Refinery Equipment, Manufacture of High-Density Polyethylene, Polypropylene, and Polystyrene Resins, and Fugitive Emissions from Synthetic Organic Chemical Polymer and Resin Manufacturing Equipment were submitted on October 22, 2010 and adopted on August 23, 2010.

(vii) The following negative declarations for the 2008 ozone NAAQS were adopted by the District on February 23, 2015 and submitted to EPA on September 9, 2015.

CTG source category	CTG reference document
(A) Large Petroleum Dry Cleaners	EPA 450/3–82–009, 9/82 Control of VOC Emissions from Large Petroleum Dry Cleaners.
(B) Manufacture of High-Density Polyethylene, Polypropylene, and Polystyrene Resins.	EPA–450/3–83–008, 11/83 Control of Volatile Organic Compound Emissions from Manufacture of High-Density Polyethylene, Polypropylene, and Polystyrene Resins.
(C) Manufacture of Pneumatic Rubber Tires.	EPA–450/2–78–030, 12/78 Control of Volatile Organic Emissions from Manufacture of Pneumatic Rubber Tires.
(D) Surface Coating of Cans	EPA–450/2–77–008, 5/77 Control of Volatile Organic Emissions from Existing Stationary Sources—Vol. II: Surface Coating of Cans, Coils, Paper, Fabrics, Automobiles, and Light-Duty Trucks.
(E) Surface Coating of Coils	EPA–450/2–77–008, 5/77 Control of Volatile Organic Emissions from Existing Stationary Sources—Vol. II: Surface Coating of Cans, Coils, Paper, Fabrics, Automobiles, and Light-Duty Trucks.
(F) Surface Coating Operations at Automotive and Light Duty Truck Assembly Plants.	EPA 453/R–08–006, 09/08 Control Technique Guidelines for Automobile and Light-Duty Truck Assembly Coatings. EPA–450/2–77–008, 5/77 Control of Volatile Organic Emissions from Existing Stationary Sources—Vol. II: Surface Coating of Cans, Coils, Paper, Fabrics, Automobiles, and Light-Duty Trucks.
(G) Large Appliances, Surface Coatings	EPA–450/2–77–034, 12/77 Control of Volatile Organic Emissions from Existing Stationary Sources—Volume V: Surface Coating of Large Appliances. EPA 453/R–07–004, 09/07 Control Techniques Guidelines for Large Appliance Coatings.
(H) Surface Coating of Magnet Wire	EPA–450/2–77–033, 12/77 Control of Volatile Organic Emissions from Existing Stationary Sources, Volume IV: Surface Coating of Insulation of Magnet Wire.
(I) Vacuum Producing Devices or Systems	EPA–450/2–77–025, 10/77 Control of Refinery Vacuum Producing Systems, Wastewater Separators, and Process Unit Turnarounds.
(J) Leaks from Petroleum Refinery Equipment.	EPA–450/2–77–025, 10/77 Control of Refinery Vacuum Producing Systems, Wastewater Separators, and Process Unit Turnarounds.
(K) Process Unit Turnarounds	EPA–450/2–77–025, 10/77 Control of Refinery Vacuum Producing Systems, Wastewater Separators, and Process Unit Turnarounds.
(L) Equipment Leaks from Natural Gas/Gasoline Processing Plants.	EPA–450/3–83–007, 12/83 Control of Volatile Organic Compound Equipment Leaks from Natural Gas/Gasoline Processing Plants.
(M) Manufacture of Synthesized Pharmaceutical Products.	EPA–450/2–78–029, 12/78 Control of Volatile Organic Emissions from Manufacture of Synthesized Pharmaceutical Products.
(N) Air Oxidation Processes (SOCMI)	EPA–450/3–84–015, 12/84 Control of Volatile Organic Compound Emissions from Air Oxidation Process in Synthetic Organic Chemical Manufacturing Industry (SOCMI).
(O) Reactor and Distillation Processes (SOCMI).	EPA–450/4–91–031, 08/93 Control of Volatile Organic Compound Emissions from Reactor Process and Distillation Operations in SOCMI.
(P) Equipment used in Synthetic Organic Chemical Polymers and Resin Manufacturing.	EPA–450/3–83–006, 03/84 Control of Volatile Organic Compound Leaks from Synthetic Organic Chemical Polymer and Resin Manufacturing Equipment.
(Q) Leaks from Petroleum Refinery Equipment.	EPA–450/2–78–036, 06/78 Control of Volatile Organic Compound Leaks from Petroleum Refinery Equipment.
(R) Metal Furniture Coating	EPA–450/2–77–032, 12/77 Control of Volatile Organic Emissions from Existing Stationary Sources—Volume III: Surface Coating of Metal Furniture. EPA 453/R–07–005, 09/07 Control Techniques Guidelines for Metal Furniture Coatings.
(S) Flat Wood Paneling	EPA–450/2–78–032, 06/78 Control of Volatile Organic Emissions from Existing Stationary Sources—Volume VII: Factory Surface Coating of Flat Wood Paneling. EPA–453/R–06–004, 09/06 Control Techniques Guidelines for Flat Wood Paneling Coatings.

(viii) The following negative declarations for the 2008 ozone standard were adopted by the District on April 23, 2018 and submitted to EPA on July 16, 2018: Miscellaneous Metal and Plastic Parts Coatings (EPA–453/R–08–003), Table 3—Plastic Parts and Products, and Table 4—Automotive/Transportation and Business Machine Plastic Parts.

(ix) The following negative declaration for the 2008 ozone standard was adopted by the District on October 22, 2018, and submitted to EPA on Decem-

ber 7, 2018: Miscellaneous Metal and Plastic Parts Coatings (EPA–453/R–08–003), Table 6—Motor Vehicle Materials.

(x) The following negative declaration for the 2008 ozone standard and 2015 ozone standard was adopted by the District on October 28, 2019, and submitted to EPA on December 20, 2019: EPA Control Techniques Guidelines for the Oil and Natural Gas Industry (453/B–16–001).

(2) Sacramento Metropolitan Air Quality Management District.

Environmental Protection Agency

§ 52.222

(i) Plastic Parts Coating: Business Machines and Plastic Parts Coating: Other were submitted on June 6, 1996 and adopted on May 2, 1996.

(ii) Coating Operations at Aerospace Manufacturing and Rework Operations

was submitted on January 12, 2012 and adopted on October 27, 2011.

(iii) Fiberglass and Boat Manufacturing Materials and Automobile and Light-Duty Truck Assembly Coatings were submitted on July 12, 2012 and adopted on March 22, 2012.

(iv) The following negative declarations for the 1997 ozone NAAQS were adopted by the Sacramento Metropolitan Air Quality Management District.

(ii) A negative declaration for the Control Techniques Guidelines for the Oil and Natural Gas Industry, EPA 453/B-16-001, was submitted on December 7, 2018, as an attachment to a letter dated December 2, 2018, and adopted on August 6, 2018, titled: “Reasonably Available Control Technology (RACT) State Implementation Plan (SIP) Revision for the South Sutter County Portion of the Sacramento Metropolitan Non-attainment Area for 8-Hour ozone—

Negative Declaration for Control Techniques Guidelines for the Oil and Natural Gas Industry.”

(12) Imperial County Air Pollution Control District.

(i) The following negative declarations for the 1997 ozone NAAQS were adopted by the Imperial County Air Pollution Control District on July 13, 2010, and submitted to the EPA on December 21, 2010.

CTG document No.	Title
(A) Aerospace	EPA-453/R-97-004, Aerospace CTG and MACT.
(B) Automobile and Light-duty Trucks, Surface Coating of.	¹ EPA-450/2-77-008, Control of Volatile Organic Emissions from Existing Stationary Sources—Volume II: Surface Coating of Cans, Coils, Paper, Fabrics, Automobiles, and Light-Duty Trucks.

Environmental Protection Agency

§ 52.222

CTG document No.	Title
(C) Cans and Coils, Surface Coating of.	2 EPA-453/R-08-006, Control Techniques Guidelines for Automobile and Light-Duty Truck Assembly Coatings. EPA-450/2-77-008, Control of Volatile Organic Emissions from Existing Stationary Sources—Volume II: Surface Coating of Cans, Coils, Paper, Fabrics, Automobiles, and Light-Duty Trucks.
(D) Fiberglass Boat Manufacturing.	EPA-453/R-08-004, Controls Techniques Guidelines for Fiberglass Boat Manufacturing.
(E) Flat Wood Paneling, Surface Coating of.	1 EPA-450/2-78-032, Control of Volatile Organic Emissions from Existing Stationary Sources—Volume VII: Factory Surface Coating of Flat Wood Paneling. 2 EPA-453/R-06-004, Control Techniques Guidelines for Flat Wood Paneling Coatings.
(F) Flexible Packing Printing	EPA-453/R-06-003, Control Techniques Guidelines for Flexible Package Printing.
(G) Graphic Arts—Rotogravure and Flexography.	EPA-450/2-78-033, Control of Volatile Organic Emissions from Existing Stationary Sources, Volume III: Graphic Arts—Rotogravure and Flexography.
(H) Large Appliances, Surface Coating of.	1 EPA-450/2-77-034, Control of Volatile Organic Emissions from Existing Stationary Sources—Volume V: Surface Coating of Large Appliances. 2 EPA-453/R-07-004, Control Techniques Guidelines for Large Appliance Coatings.
(I) Large Petroleum Dry Cleaners.	EPA-450/3-82-009, Control of Volatile Organic Compound Emissions from Large Petroleum Dry Cleaners.
(J) Offset Lithographic Printing and Letterpress Printing.	EPA-453/R-06-002, Control Techniques Guidelines for Offset Lithographic Printing and Letterpress Printing.
(K) Magnet Wire, Surface Coating for Insulation of.	EPA-450/2-77-033, Control of Volatile Organic Emissions from Existing Stationary Sources—Volume IV: Surface Coating of Insulation of Magnet Wire.
(L) Metal Furniture Coatings	1 EPA-450/2-77-032, Control of Volatile Organic Emissions from Existing Stationary Sources—Volume III: Surface Coating of Metal Furniture. 2 EPA-453/R-07-005, Control Techniques Guidelines for Metal Furniture Coatings.
(M) Miscellaneous Metal and Plastic Parts Coatings.	EPA-453/R-08-003, Control Techniques Guidelines for Miscellaneous Metal and Plastic Parts Coatings.
(N) Miscellaneous Metal Parts and Products, Surface Coating of.	EPA-450/2-78-015, Control of Volatile Organic Emissions from Existing Stationary Sources—Volume IV: Surface Coating of Miscellaneous Metal Parts and Products.
(O) Miscellaneous Industrial Adhesives.	EPA-453/R-08-005, Control Techniques Guidelines for Miscellaneous Industrial Adhesives.
(P) Natural Gas/Gasoline Processing Plants Equipment Leaks.	EPA-450/2-83-007, Control of Volatile Organic Compound Equipment Leaks from Natural Gas/Gasoline Processing Plants.
(Q) Paper, Film and Foil Coatings.	EPA-453/R-07-003, Control Techniques Guidelines for Paper, Film and Foil Coatings.
(R) Petroleum Refineries	1 EPA-450/2-77-025, Control of Refinery Vacuum Producing Systems, Wastewater Separators, and Process Unit Turnarounds. 2 EPA-450/2-78-036, Control of Volatile Organic Compound Leaks from Petroleum Refinery Equipment.
(S) Pharmaceutical Products	EPA-450/2-78-029, Control of Volatile Organic Emissions from Manufacture of Synthesized Pharmaceutical Products.
(T) Pneumatic Rubber Tires, Manufacture of.	EPA-450/2-78-030, Control of Volatile Organic Emissions from Manufacture of Pneumatic Rubber Tires.
(U) Polyester Resin	1 EPA-450/3-83-008, Control of Volatile Organic Compound Emissions from Manufacture of High-Density Polyethylene, Polypropylene, and Polystyrene Resins. 2 EPA-450/3-83-006, Control of Volatile Organic Compound Leaks from Synthetic Organic Chemical Polymer and Resin Manufacturing Equipment.
(V) Shipbuilding/Repair	EPA-453/R-94-032, Shipbuilding/Repair.
(W) Synthetic Organic Chemical.	1 EPA-450/3-84-015, Control of Volatile Organic Compound Emissions from Air Oxidation Processes in Synthetic Organic Chemical Manufacturing Industry. 2 EPA-450/4-91-031, Control of Volatile Organic Compound Emissions from Reactor Processes and Distillation Operations in Synthetic Organic Chemical Manufacturing Industry.
(x) Wood Furniture	EPA-453/R-96-007, Wood Furniture.

(ii) The following negative declarations for the 2008 8-hour ozone NAAQS were adopted by the Imperial County

Air Pollution Control District on September 12, 2017, and submitted to the EPA on November 14, 2017.

CTG document No.	Title
(A) EPA-450/2-77-008	Control of Volatile Organic Emissions from Existing Stationary Sources—Volume II: Surface Coating of Cans, Coils, Paper, Fabrics, Automobiles, and Light-Duty Trucks.
(B) EPA-450/2-77-022	Control of Volatile Organic Emissions from Solvent Metal Cleaning.
(C) EPA-450/2-77-025	Control of Refinery Vacuum Producing Systems, Wastewater Separators, and Process Unit Turnarounds.
(D) EPA-450/2-77-032	Control of Volatile Organic Emissions from Existing Stationary Sources—Volume III: Surface Coating of Metal Furniture.

CTG document No.	Title
(E) EPA–450/2–77–033	Control of Volatile Organic Emissions from Existing Stationary Sources—Volume IV: Surface Coating of Insulation of Magnet Wire.
(F) EPA–450/2–77–034	Control of Volatile Organic Emissions from Existing Stationary Sources—Volume V: Surface Coating of Large Appliances.
(G) EPA–450/2–78–015	Control of Volatile Organic Emissions from Existing Stationary Sources—Volume VI: Surface Coating of Miscellaneous Metal Parts and Products.
(H) EPA–450/2–78–029	Control of Volatile Organic Emissions from Manufacture of Synthesized Pharmaceutical Products.
(I) EPA–450/2–78–030	Control of Volatile Organic Emissions from Manufacture of Pneumatic Rubber Tires.
(J) EPA–450/2–78–032	Control of Volatile Organic Emissions from Existing Stationary Sources—Volume VII: Factory Surface Coating of Flat Wood Paneling.
(K) EPA–450/2–78–033	Control of Volatile Organic Emissions from Existing Stationary Sources—Volume VIII: Graphic Arts—Rotogravure and Flexography.
(L) EPA–450/2–78–036	Control of Volatile Organic Compound Leaks from Petroleum Refinery Equipment.
(M) EPA–450/3–82–009	Control of Volatile Organic Compound Emissions from Large Petroleum Dry Cleaners.
(N) EPA–450/3–83–006	Control of Volatile Organic Compound Leaks from Synthetic Organic Chemical Polymer and Resin Manufacturing Equipment.
(O) EPA–450/3–83–007	Control of Volatile Organic Compound Equipment Leaks from Natural Gas/Gasoline Processing Plants.
(P) EPA–450/3–83–008	Control of Volatile Organic Compound Emissions from Manufacture of High-Density Polyethylene, Polypropylene, and Polystyrene Resins.
(Q) EPA–450/3–84–015	Control of Volatile Organic Compound Emissions from Air Oxidation Processes in Synthetic Organic Chemical Manufacturing Industry.
(R) EPA–450/4–91–031	Control of Volatile Organic Compound Emissions from Reactor Processes and Distillation Operations in Synthetic Organic Chemical Manufacturing Industry.
(S) EPA–453/R–96–007	Control of Volatile Organic Compound Emissions from Wood Furniture Manufacturing Operations.
(T) EPA–453/R–94–032, 61 FR 44050; 8/27/96.	Control Techniques Guidelines for Shipbuilding and Ship Repair Operations (Surface Coating).
(U) EPA–453/R–97–004, 59 FR 29216; 6/06/94.	Aerospace (CTG & MACT).
(V) EPA–453/R–06–001	Control Techniques Guidelines for Industrial Cleaning Solvents.
(W) EPA–453/R–06–002	Control Techniques Guidelines for Offset Lithographic Printing and Letterpress Printing.
(X) EPA–453/R–06–003	Control Techniques Guidelines for Flexible Package Printing.
(Y) EPA–453/R–06–004	Control Techniques Guidelines for Flat Wood Paneling Coatings.
(Z) EPA 453/R–07–003	Control Techniques Guidelines for Paper, Film, and Foil Coatings.
(AA) EPA 453/R–07–004	Control Techniques Guidelines for Large Appliance Coatings.
(BB) EPA 453/R–07–005	Control Techniques Guidelines for Metal Furniture Coatings.
(CC) EPA 453/R–08–003	Control Techniques Guidelines for Miscellaneous Metal and Plastic Parts Coatings, Table 2—Metal Parts and Products.
(DD) EPA 453/R–08–003	Control Techniques Guidelines for Miscellaneous Metal and Plastic Parts Coatings, Table 3—Plastic Parts and Products.
(EE) EPA 453/R–08–003	Control Techniques Guidelines for Miscellaneous Metal and Plastic Parts Coatings, Table 4—Automotive/Transportation and Business Machine Plastic Parts.
(FF) EPA 453/R–08–003	Control Techniques Guidelines for Miscellaneous Metal and Plastic Parts Coatings, Table 5—Pleasure Craft Surface Coating.
(GG) EPA 453/R–08–003	Control Techniques Guidelines for Miscellaneous Metal and Plastic Parts Coatings, Table 6—Motor Vehicle Materials.
(HH) EPA 453/R–08–004	Control Techniques Guidelines for Fiberglass Boat Manufacturing Materials.
(II) EPA 453/R–08–005	Control Techniques Guidelines for Miscellaneous Industrial Adhesives.
(JJ) EPA 453/R–08–006	Control Techniques Guidelines for Automobile and Light-Duty Truck Assembly Coatings.
(KK) EPA 453/B16–001	Control Techniques Guidelines for the Oil and Natural Gas Industry.

(13) South Coast Air Quality Management District.

(i) Negative declarations for the 2008 ozone standard: Control Techniques Guidelines for Shipbuilding and Ship Repair Operations (Surface Coating) including (published on August 27, 1996) and EPA 453/R–94–032 Alternative Control Techniques Document: Surface Coating Operations at Shipbuilding and

Ship Repair Facilities; paper coating portion of EPA 453/R–07–003 Control Techniques Guidelines for Paper, Film, and Foil Coatings.

(ii) [Reserved]

(14) Yolo-Solano Air Quality Management District.

(i) The following negative declarations are for the 1997 8-hour ozone NAAQS.

(ii) [Reserved]

(b) The following air pollution control districts submitted negative declarations for oxides of nitrogen source categories to satisfy the requirements of section 182 of the Clean Air Act, as amended. The following negative declarations are approved as additional information to the State Implementation Plan.

(1) Sacramento Metropolitan Air Quality Management District.

(i) Nitric and Adipic Acid Manufacturing Plants, Utility Boilers, Cement Manufacturing Plants, Glass Manufacturing Plants, and Iron and Steel Manufacturing Plants were submitted on March 4, 1996, and adopted on August 3, 1995.

(2) San Joaquin Valley Unified Air Pollution Control District.

(i) Nitric and Adipic Acid Manufacturing Plants, Cement Manufacturing Plants, Asphalt Batch Plants, Iron and Steel Manufacturing Plants, and Driers were submitted on October 17, 1994 and adopted on September 14, 1994.

(3) Placer County Air Pollution Control District.

(i) Nitric and Adipic Acid Manufacturing Plants, Utility Boilers, Cement Manufacturing Plants, Glass Manufacturing Plants, and Iron and Steel Manufacturing Plants were submitted on February 25, 1998 and adopted on October 9, 1997.

(4) Antelope Valley Air Pollution Control District.

§ 52.223

40 CFR Ch. I (7–1–25 Edition)

(i) Boilers and Process Heaters In Petroleum Refineries submitted on May 13, 1999 and adopted on April 21, 1998.

(ii) Cement Kilns and Glass Melting Furnaces submitted on July 23, 1999 and adopted on March 16, 1999.

(iii) Nitric Acid Units submitted on March 28, 2000 and adopted on January 18, 2000.

[60 FR 47076, Sept. 11, 1995]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.222, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

§ 52.223 Approval status.

(a) With the exceptions set forth in this subpart, the Administrator approves California's plan for the attainment and maintenance of the national standards under section 110 of the Clean Air Act.

(b) With the exceptions set forth in this subpart, the Administrator approves the plan with respect to Part D, Title I of the Clean Air Act, as amended in 1977, for the nonattainment areas listed in this paragraph. In addition, continued satisfaction of the requirements of Part D for the ozone portion of the State Implementation Plan (SIP) depends on the adoption and submittal of reasonably available control technology (RACT) requirements by July 1, 1980, for sources covered by Control Technique Guidelines (CTGs) issued between January 1978 and January 1979 and adoption and submittal by each subsequent January of additional RACT requirements for sources covered by CTGs issued by the previous January.

(1) Imperial County for O₃.

(2) North Central Coast Air Basin for O₃.

(3) South Coast Air Basin for O₃, CO, NO₂, and PM.

(4) San Diego Air Basin for O₃, CO, and TSP.

(5) San Joaquin Valley Air Basin.

(i) Kern County nonattainment area for ozone, CO, SO₂, and PM.

(ii) Kings County for O₃ and TSP.

(iii) Madera County for O₃ and TSP.

(iv) Merced County for O₃ and TSP.

(v) San Joaquin County for CO, O₃ and TSP.

(vi) Stanislaus County for CO, O₃ and TSP.

(vii) Tulare County for O₃ and TSP.

(viii) Fresno County for O₃, CO, and TSP.

(6) South Central Coast Air Basin.

(i) Santa Barbara County nonattainment area for O₃, CO and TSP.

(ii) Ventura County for O₃, CO and TSP.

(7) Sacramento Valley Air Basin.

(i) Butte County for O₃ and CO.

(ii) Sutter County for O₃.

(iii) Yuba County for O₃.

(iv) Sacramento AQMA for O₃.

(v) Sacramento County Metropolitan Area for CO.

(8) Southeast Desert Air Basin.

(i) Los Angeles County for Ozone.

(ii) San Bernardino County for Ozone.

(iii) Riverside County for Ozone.

(9) San Francisco Bay Area Air Basin for O₃, CO and TSP.

(10) Mountain Counties Air Basin.

(i) El Dorado County (Mountain Counties Air Basin portion) for O₃.

(ii) Placer County (Mid-County portion) for O₃.

(c) [Reserved]

(d) With the exceptions set forth in this subpart, the Administrator approves the plan with respect to Part D, Title I of the Clean Air Act, as amended in 1977, for the nonattainment areas listed in this paragraph.

(1) Lake Tahoe Basin for CO.

(2) EPA approves the CO plan for the Lake Tahoe Basin as meeting the requirements of Part D. This approval includes the resolution of the Lake Tahoe Regional Planning Agency banning new source construction pending the adoption of a new regional plan and ordinances. However, EPA disapproves the plan for any future time during which the Tahoe Regional Planning Agency may remove its construction ban prior to EPA approval of the new regional plan and ordinances.

(e) The Administrator approves the following portions of the 1999 Ozone Attainment Plan for the San Francisco Bay Area submitted by the California Air Resources Board on August 13, 1999: the 1995 baseline emissions inventory, the reasonable further progress demonstration, and the deletion of transportation control measures #6 and #16.

(f)(1) Insofar as the Prevention of Significant Deterioration (PSD) provisions found in North Coast Unified Air Quality Management District's approved plan apply to stationary sources of greenhouse gas (GHGs) emissions, the Administrator approves that application only to the extent that GHGs are "subject to regulation", as provided in this paragraph (b), and the Administrator takes no action on that application to the extent that GHGs are not "subject to regulation."

(2) Beginning January 2, 2011, the pollutant GHGs is subject to regulation if:

(i) The stationary source is a new major stationary source for a regulated NSR pollutant that is not GHGs, and also will emit or will have the potential to emit 75,000 tpy CO₂e or more; or

(ii) The stationary source is an existing major stationary source for a regulated NSR pollutant that is not GHGs, and also will have an emissions increase of a regulated NSR pollutant, and an emissions increase of 75,000 tpy CO₂e or more; and

(3) Beginning July 1, 2011, in addition to the provisions in paragraph (b)(2) of this section, the pollutant GHGs shall also be subject to regulation:

(i) At a new stationary source that will emit or have the potential to emit 100,000 tpy CO₂e; or

(ii) At an existing stationary source that emits or has the potential to emit 100,000 tpy CO₂e, when such stationary source undertakes a physical change or change in the method of operation that will result in an emissions increase of 75,000 tpy CO₂e or more.

(4) For purposes of this paragraph (b)—

(i) The term greenhouse gas shall mean the air pollutant defined in 40 CFR 86.1818-12(a) as the aggregate group of six greenhouse gases: Carbon dioxide, nitrous oxide, methane, hydrofluorocarbons, perfluorocarbons, and sulfur hexafluoride.

(ii) The term tpy CO₂ equivalent emissions (CO₂e) shall represent an amount of GHGs emitted, and shall be computed as follows:

(A) Multiplying the mass amount of emissions (tpy), for each of the six greenhouse gases in the pollutant GHGs, by the gas's associated global warming potential published at Table

A-1 to subpart A of 40 CFR part 98—Global Warming Potentials.

(B) Sum the resultant value from paragraph (b)(4)(ii)(A) of this section for each gas to compute a tpy CO₂e.

(iii) The term emissions increase shall mean that both a significant emissions increase (as calculated using the procedures in the EPA-approved North Coast Unified Air Quality Management District rules at R1-1-130(s2)) and a significant net emissions increase (as defined in the North Coast Unified Air Quality Management District rules at R1-1-130(n1)) occur. For the pollutant GHGs, an emissions increase shall be based on tpy CO₂e, and shall be calculated assuming the pollutant GHGs is a regulated NSR pollutant, and "significant" is defined as 75,000 tpy CO₂e instead of applying the value in the EPA-approved North Coast Unified Air Quality Management District rules at R1-1-130(s2).

(g)(1) Insofar as the Prevention of Significant Deterioration (PSD) provisions found in Northern Sonoma County Air Pollution Control District's approved plan apply to stationary sources of greenhouse gas (GHGs) emissions, the Administrator approves that application only to the extent that GHGs are "subject to regulation", as provided in this paragraph (b), and the Administrator takes no action on that application to the extent that GHGs are not "subject to regulation."

(2) Beginning January 2, 2011, the pollutant GHGs is subject to regulation if:

(i) The stationary source is a new major stationary source for a regulated NSR pollutant that is not GHGs, and also will emit or will have the potential to emit 75,000 tpy CO₂e or more; or

(ii) The stationary source is an existing major stationary source for a regulated NSR pollutant that is not GHGs, and also will have an emissions increase of a regulated NSR pollutant, and an emissions increase of 75,000 tpy CO₂e or more; and,

(3) Beginning July 1, 2011, in addition to the provisions in paragraph (b)(2) of this section, the pollutant GHGs shall also be subject to regulation:

(i) At a new stationary source that will emit or have the potential to emit 100,000 tpy CO₂e; or

(ii) At an existing stationary source that emits or has the potential to emit 100,000 tpy CO₂e, when such stationary source undertakes a physical change or change in the method of operation that will result in an emissions increase of 75,000 tpy CO₂e or more.

(4) For purposes of this paragraph (b)—

(i) The term greenhouse gas shall mean the air pollutant defined in 40 CFR 86.1818–12(a) as the aggregate group of six greenhouse gases: Carbon dioxide, nitrous oxide, methane, hydrofluorocarbons, perfluorocarbons, and sulfur hexafluoride.

(ii) The term tpy CO₂ equivalent emissions (CO₂e) shall represent an amount of GHGs emitted, and shall be computed as follows:

(A) Multiplying the mass amount of emissions (tpy), for each of the six greenhouse gases in the pollutant GHGs, by the gas's associated global warming potential published at Table A-1 to subpart A of 40 CFR part 98—Global Warming Potentials.

(B) Sum the resultant value from paragraph (b)(4)(ii)(A) of this section for each gas to compute a tpy CO₂e.

(iii) The term emissions increase shall mean that both a significant emissions increase (as calculated using the procedures in the EPA-approved Northern Sonoma County Air Pollution Control District rules at R1-1-130(s2)) and a significant net emissions increase (as defined in the Northern Sonoma County Air Pollution Control District rules at R1-1-130(n1)) occur. For the pollutant GHGs, an emissions increase shall be based on tpy CO₂e, and shall be calculated assuming the pollutant GHGs is a regulated NSR pollutant, and “significant” is defined as 75,000 tpy CO₂e instead of applying the value in the EPA-approved Northern Sonoma County Air Pollution Control District rules at R1-1-130(s2).

(h)(1) Insofar as the Prevention of Significant Deterioration (PSD) provisions found in Mendocino County Air Quality Management District's approved plan apply to stationary sources of greenhouse gas (GHGs) emissions, the Administrator approves that application only to the extent that GHGs are “subject to regulation”, as provided in this paragraph (b), and the Ad-

ministrator takes no action on that application to the extent that GHGs are not “subject to regulation.”

(2) Beginning January 2, 2011, the pollutant GHGs is subject to regulation if:

(i) The stationary source is a new major stationary source for a regulated NSR pollutant that is not GHGs, and also will emit or will have the potential to emit 75,000 tpy CO₂e or more; or

(ii) The stationary source is an existing major stationary source for a regulated NSR pollutant that is not GHGs, and also will have an emissions increase of a regulated NSR pollutant, and an emissions increase of 75,000 tpy CO₂e or more; and,

(3) Beginning July 1, 2011, in addition to the provisions in paragraph (b)(2) of this section, the pollutant GHGs shall also be subject to regulation:

(i) At a new stationary source that will emit or have the potential to emit 100,000 tpy CO₂e; or

(ii) At an existing stationary source that emits or has the potential to emit 100,000 tpy CO₂e, when such stationary source undertakes a physical change or change in the method of operation that will result in an emissions increase of 75,000 tpy CO₂e or more.

(4) For purposes of this paragraph (b)—

(i) The term greenhouse gas shall mean the air pollutant defined in 40 CFR 86.1818–12(a) as the aggregate group of six greenhouse gases: Carbon dioxide, nitrous oxide, methane, hydrofluorocarbons, perfluorocarbons, and sulfur hexafluoride.

(ii) The term tpy CO₂ equivalent emissions (CO₂e) shall represent an amount of GHGs emitted, and shall be computed as follows:

(A) Multiplying the mass amount of emissions (tpy), for each of the six greenhouse gases in the pollutant GHGs, by the gas's associated global warming potential published at Table A-1 to subpart A of 40 CFR part 98—Global Warming Potentials.

(B) Sum the resultant value from paragraph (b)(4)(ii)(A) of this section for each gas to compute a tpy CO₂e.

(iii) The term emissions increase shall mean that both a significant emissions increase (as calculated using the procedures in the EPA-approved

Mendocino County Air Quality Management District rules at R1-1-130(s2)) and a significant net emissions increase (as defined in the Mendocino County Air Quality Management District rules at R1-1-130(m1) (1982)) occur. For the pollutant GHGs, an emissions increase shall be based on tpy CO₂e, and shall be calculated assuming the pollutant GHGs is a regulated NSR pollutant, and “significant” is defined as 75,000 tpy CO₂e instead of applying the value in the EPA-approved Mendocino County Air Quality Management District rules at R1-1-130(s2).

(i) *1997 ozone NAAQS*: The 2007 Infrastructure SIP, submitted on November 16, 2007, and the 2014 Multi-pollutant Infrastructure SIP, submitted on March 6, 2014, are partially disapproved for specific requirements of Clean Air Act section 110(a)(2) for the 1997 8-hour ozone NAAQS for the Air Pollution Control Districts (APCDs), Air Quality Management Districts (AQMDs), or Air Quality Control Regions (AQCRs) listed in this paragraph.

(1)–(2) [Reserved]

(3) North Coast Unified AQMD (PSD requirements for the regulation of PM_{2.5}, PM_{2.5} precursors, condensable PM_{2.5}, PM_{2.5} increments, and NO_x as an ozone precursor, only) for sections 110(a)(2)(C), (D)(i)(II) (interfere with measures in any other state to prevent significant deterioration of air quality, only), and (J).

(4) [Reserved]

(5) All areas in California that are subject to the Federal PSD program as provided in 40 CFR 52.270 for sections 110(a)(2)(C), (D)(i)(II) (interfere with measures in any other state to prevent significant deterioration of air quality, only), and (J), except for South Coast AQMD where the Federal PSD program applies to greenhouse gases, only.

(6) All areas in California that are subject to the Federal PSD program as provided in 40 CFR 52.270 for sections 110(a)(2)(D)(ii) (with respect to section 126(a), only).

(7) [Reserved]

(j) *1997 PM_{2.5} NAAQS*: The 2007 Infrastructure SIP, submitted on November 16, 2007, and the 2014 Multi-pollutant Infrastructure SIP, submitted on March 6, 2014, are partially disapproved for specific requirements of Clean Air

Act section 110(a)(2) for the 1997 PM_{2.5} NAAQS for the Air Pollution Control Districts (APCDs), Air Quality Management Districts (AQMDs), or Air Quality Control Regions (AQCRs) listed in this paragraph.

(1) [Reserved]

(2) North Coast Unified AQMD (PSD requirements for the regulation of PM_{2.5}, PM_{2.5} precursors, condensable PM_{2.5}, PM_{2.5} increments, and NO_x as an ozone precursor, only) for sections 110(a)(2)(C), (D)(i)(II) (interfere with measures in any other state to prevent significant deterioration of air quality, only), and (J).

(3) [Reserved]

(4) All areas in California that are subject to the Federal PSD program as provided in 40 CFR 52.270 for sections 110(a)(2)(C), (D)(i)(II) (interfere with measures in any other state to prevent significant deterioration of air quality, only), and (J), except for South Coast AQMD where the Federal PSD program applies to greenhouse gases, only.

(5) All areas in California that are subject to the Federal PSD program as provided in 40 CFR 52.270 for sections 110(a)(2)(D)(ii) (with respect to section 126(a), only).

(6) San Joaquin Valley Mountain Counties AQCR for section 110(a)(2)(G).

(k) *2006 PM_{2.5} NAAQS and 2012 PM_{2.5} NAAQS*: The 2014 Multi-pollutant Infrastructure SIP, submitted on March 6, 2014, is partially disapproved for specific requirements of Clean Air Act section 110(a)(2) for the 2006 PM_{2.5} NAAQS and 2012 PM_{2.5} NAAQS for the Air Pollution Control Districts (APCDs), Air Quality Management Districts (AQMDs), or Air Quality Control Regions (AQCRs) listed in this paragraph.

(1) [Reserved]

(2) North Coast Unified AQMD (PSD requirements for the regulation of PM_{2.5}, PM_{2.5} precursors, condensable PM_{2.5}, PM_{2.5} increments, and NO_x as an ozone precursor, only) for sections 110(a)(2)(C), (D)(i)(II) (interfere with measures in any other state to prevent significant deterioration of air quality, only), and (J).

(3) [Reserved]

(4) All areas in California that are subject to the Federal PSD program as provided in 40 CFR 52.270 for sections 110(a)(2)(C), (D)(i)(II) (interfere with

measures in any other state to prevent significant deterioration of air quality, only), and (J), except for South Coast AQMD where the Federal PSD program applies to greenhouse gases, only.

(5) All areas in California that are subject to the Federal PSD program as provided in 40 CFR 52.270 for sections 110(a)(2)(D)(ii) (with respect to section 126(a), only).

(6) San Joaquin Valley Mountain Counties AQCR for section 110(a)(2)(G).

(1) *2008 ozone NAAQS*: The 2014 Multi-pollutant Infrastructure SIP, submitted on March 6, 2014, is partially disapproved for specific requirements of Clean Air Act section 110(a)(2) for the 2008 8-hour ozone NAAQS for the Air Pollution Control Districts (APCDs), Air Quality Management Districts (AQMDs), or Air Quality Control Regions (AQCRs) listed in this paragraph.

(1)–(2) [Reserved]

(3) North Coast Unified AQMD (PSD requirements for the regulation of PM_{2.5}, PM_{2.5} precursors, condensable PM_{2.5}, PM_{2.5} PSD, and NO_x as an ozone precursor, only) for sections 110(a)(2)(C), (D)(i)(II) (interfere with measures in any other state to prevent significant deterioration of air quality, only), and (J).

(4) [Reserved]

(5) All areas in California that are subject to the Federal PSD program as provided in 40 CFR 52.270 for sections 110(a)(2)(C), (D)(i)(II) (interfere with measures in any other state to prevent significant deterioration of air quality, only), and (J), except for South Coast AQMD where the Federal PSD program applies to greenhouse gases, only.

(6) All areas in California that are subject to the Federal PSD program as provided in 40 CFR 52.270 for sections 110(a)(2)(D)(ii) (with respect to section 126(a), only).

(7) [Reserved]

(m) *2008 Pb NAAQS*: The 2011 Pb Infrastructure SIP, submitted on September 22, 2011, and the 2014 Multi-pollutant Infrastructure SIP, submitted on March 6, 2014, are partially disapproved for specific requirements of Clean Air Act section 110(a)(2) for the 2008 Pb NAAQS for the Air Pollution Control Districts (APCDs), Air Quality Management Districts (AQMDs), or Air

Quality Control Regions (AQCRs) listed in this paragraph.

(1) [Reserved]

(2) North Coast Unified AQMD (PSD requirements for the regulation of PM_{2.5}, PM_{2.5} precursors, condensable PM_{2.5}, PM_{2.5} increments, and NO_x as an ozone precursor, only) for sections 110(a)(2)(C), (D)(i)(II) (interfere with measures in any other state to prevent significant deterioration of air quality, only), and (J).

(3) [Reserved]

(4) All areas in California that are subject to the Federal PSD program as provided in 40 CFR 52.270 for sections 110(a)(2)(C), (D)(i)(II) (interfere with measures in any other state to prevent significant deterioration of air quality, only), and (J), except for South Coast AQMD where the Federal PSD program applies to greenhouse gases, only.

(5) All areas in California that are subject to the Federal PSD program as provided in 40 CFR 52.270 for sections 110(a)(2)(D)(ii) (with respect to section 126(a), only).

(n) *2010 NO₂ NAAQS*: The 2012 NO₂ Infrastructure SIP, submitted on November 15, 2012, and the 2014 Multi-pollutant Infrastructure SIP, submitted on March 6, 2014, are partially disapproved for specific requirements of Clean Air Act section 110(a)(2) for the 2010 NO₂ NAAQS for the Air Pollution Control Districts (APCDs), Air Quality Management Districts (AQMDs), or Air Quality Control Regions (AQCRs) listed in this paragraph.

(1) [Reserved]

(2) North Coast Unified AQMD (PSD requirements for the regulation of PM_{2.5}, PM_{2.5} precursors, condensable PM_{2.5}, PM_{2.5} increments, and NO_x as an ozone precursor, only) for sections 110(a)(2)(C), (D)(i)(II) (interfere with measures in any other state to prevent significant deterioration of air quality, only), and (J).

(3) [Reserved]

(4) All areas in California that are subject to the Federal PSD program as provided in 40 CFR 52.270 for sections 110(a)(2)(C), (D)(i)(II) (interfere with measures in any other state to prevent significant deterioration of air quality, only), and (J), except for South Coast AQMD where the Federal PSD program applies to greenhouse gases, only.

(5) All areas in California that are subject to the Federal PSD program as provided in 40 CFR 52.270 for sections 110(a)(2)(D)(ii) (with respect to section 126(a), only).

(o) *2010 SO₂ NAAQS*: The 2014 Multi-pollutant Infrastructure SIP, submitted on March 6, 2014, is partially disapproved for specific requirements of Clean Air Act section 110(a)(2) for the 2010 SO₂ NAAQS for the Air Pollution Control Districts (APCDs), Air Quality Management Districts (AQMDs), or Air Quality Control Regions (AQCRs) listed in this paragraph.

(1) [Reserved]

(2) North Coast Unified AQMD (PSD requirements for the regulation of PM_{2.5}, PM_{2.5} precursors, condensable PM_{2.5}, PM_{2.5} increments, and NO_x as an ozone precursor, only) for sections 110(a)(2)(C), (D)(i)(II) (interfere with measures in any other state to prevent significant deterioration of air quality, only), and (J).

(3) [Reserved]

(4) All areas in California that are subject to the Federal PSD program as provided in 40 CFR 52.270 for sections 110(a)(2)(C), (D)(i)(II) (interfere with measures in any other state to prevent significant deterioration of air quality, only), and (J), except for South Coast AQMD where the Federal PSD program applies to greenhouse gases, only.

(5) All areas in California that are subject to the Federal PSD program as provided in 40 CFR 52.270 for sections 110(a)(2)(D)(ii) (with respect to section 126(a), only).

(p) *2015 ozone NAAQS*: The 2018 Infrastructure SIP, submitted on October 1, 2018, is partially disapproved for specific requirements of Clean Air Act section 110(a)(2) for the 2015 8-hour ozone NAAQS for the air pollution control districts (APCDs), air quality management districts (AQMDs), or air quality control regions (AQCRs) listed in this paragraph.

(1) Mendocino County AQMD (for sources subject to a FIP, including cogeneration and resource recovery projects, projects with stack heights greater than 65 meters or that use “dispersion techniques” as defined in 51.100 (which are major sources or major modifications under 52.21), and sources for which the EPA has issued

permits under 52.21 for which applications were received by July 31, 1985, only) for sections 110(a)(2)(C), (D)(i)(II) (interfere with measures in any other state to prevent significant deterioration of air quality, only), and (J).

(2) North Coast Unified AQMD (PSD requirements for the regulation of PM_{2.5}, PM_{2.5} precursors, condensable PM_{2.5}, PM_{2.5} increments, and NO_x as an ozone precursor, only) for sections 110(a)(2)(C), (D)(i)(II) (interfere with measures in any other state to prevent significant deterioration of air quality, only), and (J).

(3) Northern Sonoma County APCD (for sources subject to a FIP, including cogeneration and resource recovery projects, projects with stack heights greater than 65 meters or that use “dispersion techniques” as defined in 51.100 (which are major sources or major modifications under 52.21), and sources for which the EPA has issued permits under 52.21 for which applications were received by July 31, 1985, only) for sections 110(a)(2)(C), (D)(i)(II) (interfere with measures in any other state to prevent significant deterioration of air quality, only), and (J).

(4) Sacramento Metro AQMD (for sources subject to a FIP, including cogeneration and resource recovery projects, projects with stack heights greater than 65 meters or that use “dispersion techniques” as defined in 51.100 (which are major sources or major modifications under 52.21), and sources for which the EPA has issued permits under 52.21 for which applications were received by July 31, 1985, only) for sections 110(a)(2)(C), (D)(i)(II) (interfere with measures in any other state to prevent significant deterioration of air quality, only), and (J).

(5) All areas in California that are subject to the federal PSD program as provided in 40 CFR 52.270 for sections 110(a)(2)(C), (D)(i)(II) (interfere with measures in any other state to prevent significant deterioration of air quality, only), and (J), except for South Coast AQMD where the federal PSD program applies to all pollutants except greenhouse gases.

(6) All areas in California that are subject to the federal PSD program as provided in 40 CFR 52.270 for sections

110(a)(2)(D)(ii) (with respect to section 126(a), only).

(7) The interstate transport requirements for Significant Contribution to Nonattainment (Prong 1) and Interstate Transport—Interference with Maintenance (Prong 2) of Clean Air Act (CAA) section 110(a)(2)(D)(i)(I).

[45 FR 74484, Nov. 11, 1980]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.223, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

§ 52.224 General requirements.

(a) The requirements of § 51.116(c) of this chapter are not met except in certain Air Pollution Control Districts (APCD) as indicated in this paragraph since the plan does not provide procedures by which emission data, as correlated with applicable emission limitations, will be made available to the public.

(1) The following APCD's meet the requirements of § 51.116(c) of this chapter:

- (i) Siskiyou County APCD.
- (ii) San Diego County APCD.
- (iii) Great Basin Unified APCD.
- (iv) Del Norte County APCD.
- (v) Humboldt County APCD.
- (vi) Mendocino County APCD.
- (vii) Northern Sonoma County APCD.
- (viii) Trinity County APCD.
- (ix) Amador County APCD.

(2) The following APCD's do not provide for the correlation of emission data with applicable emission limitations as required by § 51.116(c) of this chapter. In these APCD's, only the requirements of § 52.224(b)(4) are in effect:

- (i) Merced County APCD.
- (ii) Stanislaus County APCD.
- (iii) Fresno County APCD.
- (iv) Calaveras County APCD.
- (v) Tuolumne County APCD.
- (vi) San Joaquin County APCD.
- (vii) Mariposa County APCD.
- (viii) Tulare County APCD.
- (ix) Kern County APCD.
- (x) Madera County APCD.
- (xi) Yolo-Solano APCD.
- (xii) Sutter County APCD.
- (xiii) Glenn County APCD.
- (xiv) Tehama County APCD.
- (xv) Sierra County APCD.
- (xvi) Shasta County APCD.

(xvii) Sacramento County APCD.

(xviii)–(xix) [Reserved]

(xx) Lake County APCD.

(xxi) Imperial County APCD.

(xxii) [Reserved]

(xxiii) Ventura County APCD.

(xxiv) Monterey Bay Unified APCD.

(xxv) [Reserved]

(xxvi) San Luis Obispo County APCD.

(xxvii) Kings County APCD.

(xxviii) Plumas County APCD.

(xxix) Nevada County APCD.

(b) *Regulation for public availability of emission data.* (1) Any person who cannot obtain emission data from the Agency responsible for making emission data available to the public, as specified in the applicable plan, except for those APCD's specified in paragraph (a) of this section, concerning emissions from any source subject to emission limitations which are part of the approved plan may request that the appropriate Regional Administrator obtain and make public such data. Within 30 days after receipt of any such written request, the Regional Administrator shall require the owner or operator of any such source to submit information within 30 days on the nature and amounts of emissions from such source and any other information as may be deemed necessary by the Regional Administrator to determine whether such source is in compliance with applicable emission limitations or other control measures that are part of the applicable plan.

(2) Commencing after the initial notification by the Regional Administrator pursuant to paragraph (b)(1) of this section, the owner or operator of the source shall maintain records of the nature and amounts of emissions from such source and any other information as may be deemed necessary by the Regional Administrator to determine whether such source is in compliance with applicable emission limitations or other control measures that are part of the plan. The information recorded shall be summarized and reported to the Regional Administrator, on forms furnished by the Regional Administrator, and shall be submitted within 45 days after the end of the reporting period. Reporting periods are January 1 to June 30 and July 1 to December 31.

(3) Information recorded by the owner or operator and copies of this summarizing report submitted to the Regional Administrator shall be retained by the owner or operator for 2 years after the date on which the pertinent report is submitted.

(4) Emission data obtained from owners or operators of stationary sources will be correlated with applicable emission limitations and other control measures that are part of the applicable plan and will be available at the appropriate regional office and at other locations in the state designated by the Regional Administrator.

(c) The deletion of the following rules or portions of rules is disapproved, since these regulations are necessary to fulfill the requirements of 40 CFR 51.116(c).

(1) Northcoast intrastate region:

(i) Lake County APCD.

(A) Section 49a, *Public Records*, and Section 49b, *Record*, of Part III, *Definitions*; and Part II, *Authorization and Disclosure*, submitted on October 23, 1974 and previously approved under 40 CFR 52.223, are retained.

[40 FR 55328, Nov. 28, 1975]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.224, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

§ 52.225 Legal authority.

(a) [Reserved]

(b) The requirements of § 51.230(f) of this chapter are not met since authority to make emission data available to the public inadequate. Such release is precluded under certain circumstances.

[37 FR 10852, May 31, 1972, as amended at 51 FR 40676, Nov. 7, 1986; 81 FR 18780, Apr. 1, 2016]

§ 52.226 Control strategy and regulations: Particulate matter, San Joaquin Valley and Mountain Counties Intrastate Regions.

(a) [Reserved]

(b) The following regulatory changes represent a relaxation of previously submitted regulations and an adequate control strategy has not been submitted showing that the relaxation will not interfere with attainment and maintenance of the National Ambient

Air Quality Standards for particulate matter:

(1) Kings County APCD.

(i) Rule 405, Process Weight, submitted on July 25, 1973 is disapproved; and Rule 405, submitted on June 30, 1972, and previously approved in 40 CFR 52.223 is retained.

(ii) Rule 407.1, *Disposal of Solid and Liquid Wastes*, submitted on November 4, 1977, is disapproved; and Rule 407.1, *Disposal of Solid and Liquid Wastes*, submitted on June 30, 1972, and previously approved under 40 CFR 52.223 is retained.

(2) Calaveras County APCD.

(i) The revocation of Rule 407(b), Combustion Contaminants, is disapproved; and Rule 407(b), submitted on June 30, 1972, and previously approved in 40 CFR 52.223 is retained.

(ii) The revocation of Rule 408, Fuel Burning Equipment, is disapproved; and Rule 408, submitted on June 30, 1972, and previously approved in 40 CFR 52.223 is retained.

(iii) The addition of Rule 209, Fossil Fuel-Steam Generator Facility, is disapproved; and Rule 408, submitted on June 30, 1972 and previously approved in 40 CFR 52.223 is retained.

(3) Tuolumne County APCD.

(i) Rule 207, Particulate Matter, submitted on July 22, 1975, is disapproved; and Rules 404 and 407(b), submitted on June 30, 1972 and previously approved in 40 CFR 52.223 are retained.

(ii) Rule 209, Fossil Fuel-Steam Generator Facility, submitted on July 22, 1975, is disapproved; and Rule 408, submitted on June 30, 1972, and previously approved in 40 CFR 52.223 is retained.

(iii) Rule 207, Particulate Matter, submitted on February 10, 1977, is disapproved and the previously approved Rules 404 and 407(b), submitted on June 30, 1972, remain in effect.

(iv) Rule 209, Fossil Fuel-Steam Generator Facility, submitted on February 10, 1977, is disapproved and the previously approved Rule 408, submitted on June 30, 1972, remains in effect.

(4) Fresno County APCD.

(i) Rule 407, Disposal of Solid or Liquid Wastes, submitted on February 10, 1976, is disapproved; and Rule 407.1, submitted on June 30, 1972, and previously approved in 40 CFR 52.223 is retained.

(ii) Rule 407, Disposal of Solid or Liquid Wastes, submitted on November 10, 1976, is disapproved; and Rule 407.1, submitted on June 30, 1972 and previously approved in 40 CFR 52.223 is retained.

(5) San Joaquin County APCD.

(i) Rule 407.1, Disposal of Solid or Liquid Wastes, submitted on February 10, 1976, is disapproved; and Rule 407.1, submitted on June 30, 1972 and previously approved in 40 CFR 52.223 is retained.

(6) Mariposa County APCD.

(i) Rule 209, Fossil Fuel-Steam Generator Facility, submitted on January 10, 1975, is disapproved; and Rule 6.4, submitted on June 30, 1972 and previously approved in 40 CFR 52.223 is retained.

(7) Kern County APCD.

(i) Rule 407.1, Disposal of Solid or Liquid Wastes, submitted on July 22, 1975, is disapproved; and Rule 407.1, submitted on June 30, 1972 and previously approved in 40 CFR 52.223 is retained.

(8) Madera County APCD.

(i) Rule 405, Process Weight, submitted on January 10, 1975 is disapproved; and Rule 405, submitted on June 30, 1972 and previously approved in 40 CFR 52.223 is retained.

(9) Tulare County APCD.

(i) Paragraph b. of Rule 407.1.

(10) Merced County APCD.

(i) Rule 407.1, Disposal of Solid or Liquid Wastes, submitted on August 2, 1976 is disapproved; and Rule 407.1 submitted on June 30, 1972 and previously approved in 40 CFR 52.223 is retained.

[37 FR 10850, May 31, 1972]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.226, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

§ 52.227 Control strategy and regulations: Particulate matter, Metropolitan Los Angeles Intrastate Region.

(a) The requirements of Subpart G of this chapter are not met since the plan does not provide for attainment and maintenance of the secondary standards for particulate matter in the Metropolitan Los Angeles Intrastate Region.

(b) The following regulations are disapproved since they are not part of the approved control strategy and do not

provide for the degree of control needed for the attainment and maintenance of the primary standards for particulate matter in the Metropolitan Los Angeles Intrastate Region.

(1) Los Angeles County Air Pollution Control District:

(i) Regulation IV, Rule 68.1.

(2) Riverside County Air Pollution Control District:

(i) Regulation IV, Rule 54 for process sources with a process weight rate in excess of 62,000 lbs. per hour. Rule 54 is approved for process sources with a process weight of 62,000 lbs. per hour or less.

(3) Southern California APCD:

(i) Regulation IV, Rule 404 Particulate Matter—Concentration, submitted on August 2, 1976.

(ii) Regulation IV, Rule 473 Disposal of Solid and Liquid Wastes, submitted on August 2, 1976.

(4) South Coast AQMD.

(i) Rule 401(b) submitted on August 15, 1980.

(c) The rescission by the Southern California APCD of the following rules, which were previously approved in the May 31, 1972 (37 FR 10850) and September 22, 1972 (37 FR 19813) FEDERAL REGISTER issues, is disapproved since adequate replacement rules have not been submitted and no analysis has been presented to show that this rescission will not interfere with the attainment and maintenance of the NAAQS for particulate matter as required by section 110 of the Clean Air Act. In addition, the following rules, as submitted in June 1972 and approved for the SIP, remain federally enforceable:

(1) Los Angeles County APCD.

(i) Regulation IV, Rule 52 Particulate Matter—Concentration.

(ii) Regulation IV, Rule 58 Disposal of Solid and Liquid Wastes.

(2) San Bernardino County APCD.

(i) Regulation IV, Rule 52A Particulate Matter—Concentration.

(ii) Regulation IV, Rule 58A Disposal of Solid and Liquid Wastes.

(3) Riverside County APCD.

(i) Regulation IV, Rule 52 Particulate Matter—Concentration.

(ii) Regulation IV, Rule 58 Disposal of Solid and Liquid Wastes.

(4) Orange County APCD.

Environmental Protection Agency

§ 52.229

(i) Regulation IV, Rule 52 Particulate Matter—Concentration.

(ii) Regulation IV, Rule 58 Disposal of Solid and Liquid Wastes.

[37 FR 10850, May 31, 1972, as amended at 37 FR 19813, Sept. 22, 1972; 43 FR 25687, June 14, 1978; 49 FR 18824, May 3, 1984; 51 FR 40676, Nov. 7, 1986]

§ 52.228 Regulations: Particulate matter, Southeast Desert Intrastate Region.

(a) The following regulations are disapproved since they are not part of the approved control strategy and do not provide for the degree of control needed for the attainment and maintenance of the national standards for particulate matter in the Southeast Desert Intrastate Region.

(1) Imperial County Air Pollution Control District:

(i) Rule 114A.

(ii) Rule 116B.

(2) Los Angeles County Air Pollution Control District:

(i) Regulation IV, Rule 68.1.

(3) Riverside County Air Pollution Control District:

(i) Regulation IV, Rule 54 for process sources with a process weight rate in excess of 160,000 lbs. per hour. Rule 54 is approved for process sources with a process weight of 160,000 lbs. per hour or less.

(b) The following regulatory changes represent a relaxation of previously submitted regulations, and an adequate control strategy has not been submitted showing that the relaxation will not interfere with the attainment and maintenance of the national ambient air quality standards for particulate matter:

(1) Southeast Desert Intrastate Region:

(i) Imperial County APCD.

(A) Rule 406, Disposal of Solid and Liquid Wastes submitted on November 4, 1977 is disapproved; and Rule 116 C, Specific Contaminants submitted on June 30, 1972 and previously approved under 40 CFR 52.223 is retained.

(ii) Los Angeles County Air Pollution Control District.

(A) Regulation IV, Rule 404 Particulate Matter-Concentration, and Rule 473, Disposal of Solid and Liquid Wastes, submitted on June 6, 1977 are

disapproved. Rules 52 and 58, titled as above, respectively, and submitted on June 30, 1972 and previously approved under 40 CFR 52.223 are retained.

(iii) Riverside County Air Pollution Control District.

(A) Regulation IV, Rules 404 Particulate Matter-Concentration, 405 Particulate Matter-Weight, and Rule 473, Disposal of Solid and Liquid Wastes, submitted on June 6, 1977 are disapproved. Rules 52, Particulate Matter-Weight, 54, Dust and Fumes, and 58, Disposal of Solid and Liquid Wastes, submitted in 1972 and approved under 40 CFR 52.223, are retained.

[37 FR 10850, May 31, 1972, as amended at 37 FR 19813, Sept. 22, 1972; 43 FR 35695, Aug. 11, 1978; 43 FR 40014, Sept. 8, 1978; 64 FR 49400, Sept. 13, 1999]

§ 52.229 Control strategy and regulations: Photochemical oxidants (hydrocarbons), Metropolitan Los Angeles Intrastate Region.

(a) [Reserved]

(b) The following rules are disapproved because they would result in a relaxation of control requirements contained in the presently approved State Implementation Plan, and no analysis has been presented to show that this relaxation will not interfere with the attainment and maintenance of NAAQS for photochemical oxidants (hydrocarbons) as required by section 110 of the Clean Air Act.

(1) Southern California APCD.

(i) Regulation IV, Rule 465 Vacuum Producing Devices or Systems, submitted on August 2, 1976.

(2) South Coast Air Quality Management District.

(i) Regulation IV, Rule 461 Gasoline Transfer and Dispensing, submitted on June 6, 1977. The version of this rule by the same number and title submitted on April 21, 1976 and approved under 40 CFR 52.223 is retained.

(ii) Rule 1115, Automotive Coatings, adopted on March 16, 1984 by the District and submitted by the state to EPA on July 10, 1984.

(iii) Rule 1113, Architectural Coatings, adopted on August 2, 1985 and submitted to EPA on November 12, 1985. The version of this rule by the same number and title submitted on July 10,

§ 52.230

1984 and approved by EPA on January 24, 1985 is retained.

(c) The rescission by the Southern California APCD of the following rules, which were previously approved in the September 22, 1972 (37 FR 19813) FEDERAL REGISTER issue, is disapproved since adequate replacement rules have not been submitted and no analysis has been presented to show that this rescission will not interfere with the attainment and maintenance of the NAAQS for photochemical oxidants (hydrocarbons) as required by section 110 of the Clean Air Act. In addition, the following rules, as submitted in June 1972 and approved for the SIP, remain federally enforceable:

(1) Los Angeles County APCD, Regulation IV, Rule 69, Vacuum Producing Devices or Systems.

(2) San Bernardino County APCD, Regulation IV, Rule 69, Vacuum Producing Devices or Systems.

(3) Riverside County APCD, Regulation IV, Rule 74, Vacuum Producing Devices or Systems.

(4) Orange County APCD, Regulation IV, Rule 69, Vacuum Producing Devices or Systems.

[37 FR 10850, May 31, 1972, as amended at 43 FR 25687, June 14, 1978; 43 FR 40014, Sept. 8, 1978; 46 FR 5978, Jan. 21, 1981; 54 FR 5237, Feb. 2, 1989; 54 FR 34515, Aug. 21, 1989]

§ 52.230 Control strategy and regulations: Nitrogen dioxide.

(a) The requirements of § 52.14(c)(3) of this chapter as of September 22, 1972 (47 FR 1983), are not met since the plan does not provide for the degree of nitrogen oxides emission reduction attainable through application of reasonably available control technology in the Metropolitan Los Angeles Intra-state Region. Therefore, Rule 68.b of the Orange County Air Pollution Control District is disapproved.

(b) The following rules are disapproved since they are not part of the approved control strategy and do not provide for the degree of control necessary for the attainment and maintenance of NAAQS for nitrogen dioxide in the Metropolitan Los Angeles Intra-state AQCR:

(1) Orange County APCD, Regulation IV, Rule 474, Fuel Burning Equip-

40 CFR Ch. I (7-1-25 Edition)

ment—Oxides of Nitrogen, submitted on February 10, 1977.

(c) The rescission by the Southern California APCD of the following rules is disapproved since adequate replacement rules have not been submitted and no analysis has been presented to show that this rescission will not interfere with the attainment and maintenance of the National Ambient Air Quality Standards as required by section 110 of the Clean Air Act. In addition, the following rules, as submitted in June 1972 and approved for the SIP, remain federally enforceable:

(1) Orange County APCD, Regulation IV, Rule 68, Fuel Burning Equipment—NO_x.

(2) Orange County APCD, Regulation IV, Rule 67.1, Fuel Burning Equipment.

[43 FR 25687, June 14, 1978, as amended at 46 FR 3884, Jan. 16, 1981; 51 FR 40677, Nov. 7, 1986]

§ 52.231 Regulations: Sulfur oxides.

(a) [Reserved]

(b) The deletion of the following rules or portions of rules is disapproved, since an adequate control strategy demonstration has not been submitted indicating that the deletions of the control requirements contained in those rules would not interfere with the attainment or maintenance of the National Ambient Air Quality Standard for Sulfur Oxides.

(1) Lake County Intrastate Region.

(i) Lake County, APCD.

(A) Section 3(F), *Sulfur* of Part V, *Prohibitions and Standards*, submitted on October 23, 1974 and previously approved under 40 CFR 52.223, is retained as applicable to sources other than sulfur recovery units.

[43 FR 34464, 34466, Aug. 4, 1978, as amended at 46 FR 3884, Jan. 16, 1981; 46 FR 42461, Aug. 21, 1981]

§ 52.232 Part D conditional approval.

(a) The following portions of the California SIP contain deficiencies with respect to Part D of the Clean Air Act which must be corrected by meeting the indicated conditions of Part D plan approval.

(1) [Reserved]

(2) North Central Coast Air Basin for ozone.

(i) By May 7, 1981, the NSR rules must be revised and submitted as an SIP revision. The rules must satisfy section 173 and 40 CFR 51.18, "Review of new sources and modifications." In revising the Monterey Bay Unified APCD's NSR rules, the State/APCD must address (a) any new requirements in EPA's amended regulations for NSR under section 173 of the Clean Air Act (August 7, 1980, 45 FR 52676) which the APCD rules do not now satisfy and (b) those deficiencies with respect to the September 5, 1979 notice cited in EPA's Evaluation Report Addendum (contained in Document File NAP-CA-14 at the EPA Library in Washington, DC and the Region IX office).

(ii) By March 4, 1981, one of the following must be submitted as an SIP revision: (a) Adequate justification that the cutback asphalt rule represents RACT, (b) amendment of the cutback asphalt rule to conform with the controls recommended in the CTG document for cutback asphalt, or (c) adequate documentation that the cutback asphalt rule will result in emission reductions which are within 5 percent of the reductions achievable with the controls recommended in the cutback asphalt CTG document.

(3) South Coast Air Basin.

(i)(A) By May 7, 1981, the NSR rules must be revised and submitted as an SIP revision. The rules must satisfy section 173 of the Clean Air Act and 40 CFR 51.18, "Review of new sources and modifications." In revising the South Coast AQMD's NSR rules, the State/AQMD must address (1) any new requirements in EPA's amended regulations for NSR (45 FR 31307, May 13, 1980 and 45 FR 52676, August 7, 1980) which the AQMD rules do not currently satisfy and (2) those deficiencies cited in EPA's Evaluation Report Addendum which still apply despite EPA's new NSR requirements (contained in Document File NAP-CA-9 at the EPA Library in Washington, DC and the Regional Office).

(4) San Diego Air Basin.

(i) For ozone, CO, TSP, and NO₂:

(A) By May 7, 1981, the NSR rules submitted on March 17, 1980 must be revised and submitted as an SIP revision. In revising the NSR rules, the State/APCD must address (1) any new re-

quirements in EPA's amended regulations for NSR under section 173 of the Clean Air Act (May 13, 1980, 45 FR 31307; and August 7, 1980, 45 FR 52676) which the APCD rules do not currently satisfy and (2) the deficiencies cited in EPA's *Evaluation Report Addendum* which still apply despite EPA's new NSR requirements. The *Evaluation Report Addendum* is contained in document file NAP-CA-19 and available at the EPA Region IX Office and the EPA Library in Washington, DC

(5) The Kern County APCD.

(i) For PM:

(A) By November 19, 1981, the NSR rules must be revised and submitted as an SIP revision. The rules must satisfy section 173 of the Clean Air Act and 40 CFR Subpart I, "Review of new sources and modifications." In revising Kern County's NSR rules, the State/APCD must address all the requirements in EPA's amended regulations for NSR (45 FR 31307, May 13, 1980 and 45 FR 52676, August 7, 1980) which the APCD rules do not currently satisfy including those deficiencies cited in EPA's Evaluation Report Addendum which still apply despite EPA's new NSR requirements (contained in document File NAP-CA-07 at the EPA Library in Washington, DC and the Regional Office).

(ii) [Reserved]

(6) [Reserved]

(7) San Francisco Bay Area Air Basin.

(i) For ozone and CO:

(A) By June 17, 1982, submittal of implementation commitments and schedules and additional commitments to provide annually the financial and personnel resources necessary to carry out the plan for transportation sources.

(8) [Reserved]

(9) The Santa Barbara County non-attainment areas.

(i) For O₃, TSP, and CO by (90 days from the date of publication of this notice).

(A) The new source review (NSR) rules must be revised to meet the requirements in EPA's amended regulations for NSR under section 173 of the Clean Air Act (45 FR 31307, May 13, 1980 and 45 FR 52676, August 7, 1980) and submitted as an SIP revision.

§ 52.233

40 CFR Ch. I (7-1-25 Edition)

(ii) For O₃ by (90 days from the date of publication of this notice), a revised cutback asphalt paving materials rule which does not allow for indefinite compliance date extensions and submitted as an SIP revision.

(10)–(11) [Reserved]

(12) Butte, Sutter and Yuba County APCDs.

(i) For Ozone:

(A) By August 2, 1982, the NSR rules for the counties discussed in this notice must be revised to meet the requirements in EPA's amended regulations for NSR under section 173 of the Clean Air Act (May 13, 1980, 45 FR 31307 and August 7, 1980, 45 FR 52676).

(13) Los Angeles and Riverside portions of the Southeast Desert Air Basin.

(i) For Ozone:

(A) By August 9, 1982, the new source review rules for the three county areas must be revised to meet the requirements in EPA's amended regulations under section 173 (May 13, 1980, (45 FR 31307), August 7, 1980, (45 FR 52676), and October 14, 1981, (46 FR 50766)).

(B) By August 9, 1982, the State must provide adopted regulations for degreasing operations in the Los Angeles County portion of the SEDAB which represent RACT.

(14)–(15) [Reserved]

(16) San Bernardino County portion of the Southeast Desert Air Basin.

(i) For ozone:

(A) By October 30, 1985, the NSR rules must be revised to meet the requirements in EPA's amended regulations for NSR under section 173 of the Clean Air Act (May 13, 1980 (45 FR 31307), August 7, 1980 (45 FR 52676), and October 14, 1981 (46 FR 50766)).

(17) Yolo and Solano Counties.

(i) For ozone and CO in those portions of Yolo and Solano Counties that are part of the Sacramento Metropolitan Area:

(A) By October 30, 1985, the NSR rules must be revised to meet the requirements in EPA's amended regulations for NSR under section 173 of the Clean Air Act (May 13, 1980 (45 FR 31307), August 7, 1980 (45 FR 52676), and October 14, 1981 (46 FR 50766)).

(ii) For ozone:

By November 1, 1982, the State must provide either (A) an adequate dem-

onstration that the following regulations represent RACT, (B) amend the regulations so that they are consistent with the CTG, or (C) demonstrate that the regulations will result in VOC emission reductions which are within five percent of the reductions which would be achieved through the implementation of the CTG recommendations:

Yolo-Solano County APCD

Rule 2.24, "Solvent Cleaning Operations (Degreasing)."

[45 FR 74485, Nov. 10, 1980]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.232, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

§ 52.233 Review of new sources and modifications.

(a) The following regulations are disapproved because they are not consistent with Clean Air Act requirements.

(1) [Reserved]

(2) Monterey Bay Unified APCD.

(i) Subparagraph B.5. of Rule 207, *Standards for Permit to Construct*, submitted March 17, 1980.

(3) South Coast AQMD.

(i) In Rule 1306(a)(i), submitted on April 3, 1980, sentence 3 is disapproved.

(ii) In Rule 1306(d)(1)(B)(ii), submitted on April 3, 1980, the following portion of the rule is disapproved: "Which have occurred during the highest three years of the last five year period, divided by three, provided the applicant demonstrates that such permit units have been operated at least 90 days during each of such three years."

(iii) In Rule 1307(a) submitted on April 3, 1980, the following portion of the rule is disapproved: "Greater than 68 kilograms (150 pounds) per day except carbon monoxide, for which the value is an increase greater than 340 kilograms (750 pounds) per day."

(4) Kern County APCD.

(i) Those portions of paragraph (3)(E) of Rule 210.1, submitted on April 15, 1980, which allow new sources and modifications to be exempt from LAER.

(b) [Reserved]

(c) The requirements of § 51.160(a) of this chapter are not met in the following Air Pollution Control Districts since the regulations of the APCD's do not provide the means to prevent construction of sources which would violate applicable portions of the control strategy or would interfere with the attainment or maintenance of a national standard.

(1) Mariposa County APCD.

(2) Santa Barbara County APCD.

(d) The requirements of § 51.160(a) of this chapter are not met in the following Air Pollution Control Districts since the regulations of the APCD's do not include a means to prevent construction or modification if such construction or modification would interfere with the attainment or maintenance of a national standard.

(1) Amador County APCD.

(2) Calaveras County APCD.

(3) El Dorado County APCD (Mountain Counties Intrastate portion).

(4) [Reserved]

(5) Glenn County APCD.

(6) Humboldt County APCD.

(7)-(8) [Reserved]

(9) Lake County APCD.

(10) Lassen County APCD.

(11) [Reserved]

(12) [Reserved]

(13) [Reserved]

(14) Modoc County APCD.

(15) Monterey Bay Unified APCD.

(16) Nevada County APCD.

(17) [Reserved]

(18) [Reserved]

(19) Plumas County APCD.

(20) [Reserved]

(21) Shasta County APCD.

(22) Sierra County APCD.

(23) Siskiyou County APCD.

(24) [Reserved]

(25) Sutter County APCD.

(26) [Reserved]

(27) Tuolumne County APCD.

(e) [Reserved]

(f) *Regulation for review of new sources and modifications.* (1) The requirements of this paragraph are applicable to:

(i) Any stationary source in the APCD's listed below, the construction or modification of which is commenced after the effective date of this regulation.

(a) Mariposa County APCD.

(b) [Reserved]

(c) Santa Barbara County APCD.

(ii) Any stationary source subject to the requirements of §§ 52.226(c), 52.227(c), 52.228(b), or 52.230(b), the construction or modification of which is commenced after the effective date of this regulation.

(2) No owner or operator shall commence construction or modification of a stationary source after the effective date of this regulation without first obtaining approval from the Administrator of the location and design of such source.

(i) Application for approval to construct or modify shall be made on forms furnished by the Administrator, or by other means prescribed by the Administrator.

(ii) A separate application is required for each source.

(iii) Each application shall be signed by the applicant.

(iv) Each application shall be accompanied by site information, plans, descriptions, specifications, and drawings showing the design of the source, the nature and amount of emissions, and the manner in which it will be operated and controlled.

(v) Any additional information, plans, specifications, evidence, or documentation that the Administrator may require shall be furnished upon request.

(3) No approval to construct or modify will be granted unless the applicant shows to the satisfaction of the Administrator that:

(i) The source will be operated without causing a violation of any local, State, or Federal regulations which are part of the applicable plan.

(ii) The source will not prevent or interfere with attainment or maintenance of any national standard.

(4) (i) Within twenty (20) days after receipt of an application to construct, or any addition to such application, the Administrator shall advise the owner or operator of any deficiency in the information submitted in support of the application. In the event of such a deficiency, the date of receipt of the application for the purpose of paragraph (f)(4)(ii) of this section, shall be the date on which all required information is received by the Administrator.

(ii) Within thirty (30) days after receipt of a complete application, the Administrator shall:

(a) Make a preliminary determination whether the source should be approved, approved with conditions, or disapproved.

(b) Make available in at least one location in each region in which the proposed source would be constructed, a copy of all materials submitted by the owner or operator, a copy of the Administrator's preliminary determination and a copy or summary of other materials, if any, considered by the Administrator in making his preliminary determination; and

(c) Notify the public, by prominent advertisement in a newspaper of general circulation in each region in which the proposed source would be constructed, of the opportunity for written public comment on the information submitted by the owner or operator and the Administrator's preliminary determination on the approvability of the source.

(iii) A copy of the notice required pursuant to this paragraph shall be sent to the applicant and to state and local air pollution control agencies, having cognizance over the location where the source will be situated.

(iv) Public comments submitted in writing within thirty (30) days after the date such information is made available shall be considered by the Administrator in making his final decision on the application. No later than ten (10) days after the close of the public comment period, the applicant may submit a written response to any comment submitted by the public. The Administrator shall consider the applicant's response in making his final decision. All comments shall be made available for public inspection in at least one location in the region in which the source would be located.

(v) The Administrator shall take final action on the application within thirty (30) days after the close of the public comment period. The Administrator shall notify the applicant in writing of his approval, conditional approval, or denial of the application, and shall set forth his reasons for conditional approval or denial. Such notification shall be made available for pub-

lic inspection in at least one location in the region in which the source would be located.

(vi) The Administrator may extend each of the time periods specified in paragraph (f)(4)(ii), (iv) or (v) of this section by no more than 30 days, or such other period as agreed to by the applicant and the Administrator.

(5) The Administrator may impose any reasonable conditions upon an approval, including conditions requiring the source to be provided with:

(i) Sampling ports of a size, number, and location as the Administrator may require,

(ii) Safe access to each port,

(iii) Instrumentation to monitor and record emission data, and

(iv) Any other sampling and testing facilities.

(6) The Administrator may cancel an approval if the construction is not begun within 2 years from the date of issuance, or if during the construction, work is suspended for 1 year.

(7) Any owner or operator subject to the provisions of this regulation shall furnish the Administrator written notification as follows:

(i) A notification of the anticipated date or initial startup of the source not more than 60 days or less than 30 days prior to such date.

(ii) A notification of the actual date of initial startup of the source within 15 days after such date.

(8) Within 60 days after achieving the maximum production rate at which the source will be operated but not later than 180 days after initial startup of such source the owner or operator of such source shall conduct a performance test(s) in accordance with methods and under operating conditions approved by the Administrator and furnish the Administrator a written report of the results of such performance test.

(i) Such test shall be at the expense of the owner or operator.

(ii) The Administrator may monitor such test and may also conduct performance tests.

(iii) The owner or operator of a source shall provide the Administrator 15 days prior notice of the performance test to afford the Administrator the

Environmental Protection Agency

§ 52.233

opportunity to have an observer present.

(iv) The Administrator may waive the requirement for performance tests if the owner or operator of a source has demonstrated by other means to the Administrator's satisfaction that the source is being operated in compliance with all local, State and Federal regulations which are part of the applicable plan.

(9) Approval to construct or modify shall not be required for:

(i) The installation or alteration of an air pollutant detector, air pollutants recorder, combustion controller, or combustion shutoff.

(ii) Air-conditioning or ventilating systems not designed to remove air pollutants generated by or released from equipment.

(iii) Fuel burning equipment, other than smokehouse generators which has a heat input of not more than 250 MBtu/h (62.5 billion g-cal/h) and burns only gaseous fuel containing not more than 0.5 grain H₂ S per 100 stdft³ (5.7 g/100 stdm³); has a heat input of not more than 1 MBtu/h (250 Mg-cal/h) and burns only distillate oil; or has a heat input of not more than 350,000 Btu/h (88.2 Mg-cal/h) and burns any other fuel.

(iv) Mobile internal combustion engines.

(v) Laboratory equipment used exclusively for chemical or physical analyses.

(vi) Other sources of minor significance specified by the Administrator.

(10) Approval to construct or modify shall not relieve any person of the responsibility to comply with any local, State, or Federal regulation which is part of the applicable plan.

(11) Any owner or operator who constructs, modifies, or operates a stationary source not in accordance with the application, as approved and conditioned by the Administrator, or any owner or operator of a stationary source subject to this paragraph who commences construction or modification without applying for any receiving approval hereunder, shall be subject to enforcement action under section 113 of the Act.

(g) *Regulation for review of new sources and modifications.* (1) The requirements of this paragraph are applicable to any

stationary source in the APCD's listed below, the construction or modification of which is commenced after the effective date of this regulation.

(i) Amador County APCD.

(ii) Calaveras County APCD.

(iii) El Dorado County APCD (Mountain Counties Intrastate portion).

(iv) [Reserved]

(v) Glenn County APCD.

(vi) Humboldt County APCD.

(vii)-(viii) [Reserved]

(ix) Lassen County APCD.

(x) Madera County APCD.

(xi) Mendocino County APCD.

(xii) Merced County APCD.

(xiii) Modoc County APCD.

(xiv) Monterey Bay Unified APCD.

(xv) Nevada County APCD.

(xvi) [Reserved]

(xvii) Plumas County APCD.

(xviii) San Joaquin County APCD.

(xix) Shasta County APCD.

(xx) Sierra County APCD.

(xxi) Siskiyou County APCD.

(xxii) Stanislaus County APCD.

(xxiii) Sutter County APCD.

(xxiv) Tulare County APCD.

(xxv) Tuolumne County APCD.

(2) No owner or operator shall commence construction or modification of any new source after the effective date of this regulation without first obtaining approval from the Administrator of the location of such source.

(i) Application for approval to construct or modify shall be made on forms furnished by the Administrator, or by other means prescribed by the Administrator.

(ii) A separate application is required for each source.

(iii) Each application shall be signed by the applicant.

(iv) Each application shall be accompanied by site information, stack data, and the nature and amount of emissions. Such information shall be sufficient to enable the Administrator to make any determination pursuant to paragraph (g)(3) of this section.

(v) Any additional information, plans, specifications, evidence, or documentation that the Administrator may require shall be furnished upon request.

(3) No approval to construct or modify will be granted unless the applicant

shows to the satisfaction of the Administrator that the source will not prevent or interfere with attainment or maintenance of any national standard.

(4) (i) Within twenty (20) days after receipt of an application to construct, or any addition to such application, the Administrator shall advise the owner or operator of any deficiency in the information submitted in support of the application. In the event of such a deficiency, the date of receipt of the application for the purpose of paragraph (g)(4)(ii) of this section, shall be the date on which all required information is received by the Administrator.

(ii) Within thirty (30) days after receipt of a complete application, the Administrator shall:

(a) Make a preliminary determination whether the source should be approved, approved with conditions, or disapproved.

(b) Make available in at least one location in each region in which the proposed source would be constructed, a copy of all materials submitted by the owner or operator, a copy of the Administrator's preliminary determination and a copy or summary of other materials, if any, considered by the Administrator in making his preliminary determination; and

(c) Notify the public, by prominent advertisement in a newspaper of general circulation in each region in which the proposed source would be constructed, of the opportunity for written public comment on the information submitted by the owner or operator and the Administrator's preliminary determination on the approvability of the source.

(iii) A copy of the notice required pursuant to this subparagraph shall be sent to the applicant and to state and local air pollution control agencies, having cognizance over the location where the source will be situated.

(iv) Public comments submitted in writing within thirty (30) days after the date such information is made available shall be considered by the Administrator in making his final decision on the application. No later than ten (10) days after the close of the public comment period, the applicant may submit a written response to any comment submitted by the public. The Ad-

ministrator shall consider the applicant's response in making his final decision. All comments shall be made available for public inspection in at least one location in the region in which the source would be located.

(v) The Administrator shall take final action on an application within thirty (30) days after the close of the public comment period. The Administrator shall notify the applicant in writing of his approval, conditional approval, or denial of the application, and shall set forth his reasons for conditional approval or denial. Such notification shall be made available for public inspection in at least one location in the region in which the source would be located.

(vi) The Administrator may extend each of the time periods specified in paragraph (g)(4) (ii), (iv) or (v) of this section by no more than 30 days, or such other period as agreed to by the applicant and the Administrator.

(5) The Administrator may cancel an approval if the construction is not begun within 2 years from the date of issuance, or if during the construction, work is suspended for 1 year.

(6) Approval to construct or modify shall not relieve any owner or operator of the responsibility to comply with any local, State, or Federal regulation which is part of the applicable plan.

(7) Approval to construct or modify shall not be required for:

(i) The installation or alteration of an air pollutant detector, air pollutants recorder, combustion controller, or combustion shutoff.

(ii) Air-conditioning or ventilating systems not designed to remove air pollutants generated by or released from equipment.

(iii) Fuel burning equipment, other than smokehouse generators, which has a heat input of not more than 250 MBtu/h (62.5 billion g-cal/h) and burns only gaseous fuel containing not more than 20.0 grain H₂ S per 100 stdft³ (54.8 g/100 stdm³); has a heat input of not more than 1 MBtu/h (250 Mg-cal/h) and burns only distillate oil; or has a heat input of not more than 350,000 Btu/h (88.2 Mg-cal/h) and burns any other fuel.

(iv) Mobile internal combustion engines.

Environmental Protection Agency

§ 52.233

(v) Laboratory equipment used exclusively for chemical or physical analyses.

(vi) Other sources of minor significance specified by the Administrator.

(8) Any owner or operator who constructs, modifies, or operates a stationary source not in accordance with the application, as approved and conditioned by the Administrator, or any owner or operator of a stationary source subject to this paragraph who commences construction or modification without applying for and receiving approval hereunder, shall be subject to enforcement action under section 113 of the Act.

(h)-(i) [Reserved]

(j) *Delegation of authority.* (1) The Administrator shall have the authority to delegate responsibility for implementing the procedures for conducting source review pursuant to this section in accordance with paragraphs (j) (2), (3), and (4) of this section.

(2) Where the Administrator delegates the responsibility for implementing the procedures for conducting source review pursuant to this section to any Agency, other than a Regional Office of the Environmental Protection Agency, a copy of the notice pursuant to paragraphs (f)(4)(iii) and (g)(4)(iii) of this section shall be sent to the Administrator through the appropriate Regional Office.

(3) In accordance with Executive Order 11752, the Administrator's authority for implementing the procedures for conducting source review pursuant to this section shall not be delegated, other than to a Regional Office of the Environmental Protection Agency; except that, with respect to the latter category, where new or modified sources are constructed or operated on Federal lands pursuant to leasing or other Federal agreements, the Federal Land Manager may at his discretion, to the extent permissible under applicable statutes and regulations, require the lessee or permittee to be subject to new source review requirements which have been delegated to a state or local agency pursuant to this paragraph.

(4) The Administrator's authority for implementing the procedures for conducting source review pursuant to this section shall not be redelegated, other

than to a Regional Office of the Environmental Protection Agency, for new or modified sources which are located in Indian reservations except where the State has assumed jurisdiction over such land under other laws, in which case the Administrator may delegate his authority to the States in accordance with paragraphs (j) (2), (3), and (4) of this section.

(k) *Conditions on steam production.* (1) Notwithstanding any provisions to the contrary in the California State Implementation Plan, the Watson petroleum refinery owned by Atlantic Richfield Company, located at 1801 East Sepulveda Boulevard, Carson, California, shall operate under the following conditions listed in paragraphs (k)(2) through (6) of this section.

(2) The total steam load comprised of the steam purchased from Watson Energy Systems and the amount generated by boilers #31, #32, #33, #42, #51, and #52 at the ARCO Watson Refinery shall not exceed 1,355,000 pounds per hour at 680 °F, 600 psig.

(3) Continuous written records of steam purchased from Watson Energy Systems and of the steam produced by boilers #31, #32, #42, #51, or #52 at the ARCO Watson Refinery, during receipt of steam from Watson Energy Systems, shall be maintained and made available for inspection by the EPA and the South Coast Air Quality Management District. These records shall be kept in terms of pounds per hour of steam at 680 °F, 600 psig.

(4) The steam purchased from the Watson Energy Systems facility shall be used as a "first-on, last-off" source of steam for the ARCO Watson Refinery, except for steam produced by waste heat or as part of the refining process, or as required to maintain fired boilers in service for emergency use.

(5) Any proposed changes in equipment or fuel that would increase the oil fired steam generating capacity or decrease oil fired steam generating efficiency of boilers #31, #32, #33, #42, #51, and #52 at the ARCO Watson Refinery must be reviewed and approved by the EPA prior to implementation of the proposed changes.

(6) ARCO shall maintain written records of oil consumption at boilers

#31, #32, #33, #42, #51, and #52 during receipt of steam from Watson Energy Systems. These records shall be available for inspection by the South Coast Air Quality Management District and the EPA. The total oil consumption of these boilers shall not exceed a monthly average of 226,000 gallons per day when receiving steam from the Watson Energy systems plant at a rate of 350,000 pounds per hour. When receiving steam at a lower rate, ARCO shall be allowed to increase its boiler fuel oil consumption to achieve a total steam load not to exceed the limit of condition two (2).

(l) The following rules and regulations are disapproved because they do not meet the requirements of sections 110, 172, and 173 of the Clean Air Act, since they exempt certain source categories from the offset requirements of the Act:

(1) South Coast Air Quality Management District.

(i) Rule 1304(e), Resource Conservation and Energy Projects, submitted on April 3, 1980, but only with respect to projects whose application for a permit is complete after January 1, 1986,

(ii) Rule 1304(b)(2), Resource and Energy Conservation Projects, submitted on November 8, 1982, but only with respect to projects whose application for a permit is complete after January 1, 1986,

(m) Revised South Coast Regulation XIII, submitted on November 8, 1982, is not approved inasmuch as action on it is temporarily deferred.

[37 FR 19813, Sept. 22, 1972]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.233, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

§ 52.234 Source surveillance.

(a) Except in the Air Pollution Control Districts (APCDs) listed in this paragraph, the requirements of § 51.211 of this chapter are not met since the plan does not provide for recordkeeping and periodic reporting of emission data by sources.

- (1) Amador County APCD.
- (2) Bay Area AQMD.
- (3) Calaveras County APCD.
- (4) Del Norte County APCD.

- (5) El Dorado County APCD.
- (6) Humboldt County APCD.
- (7) Imperial County APCD.
- (8) Lake County APCD.
- (9) Mariposa County APCD.
- (10) Mendocino County APCD.
- (11) Nevada County APCD.
- (12) Northern Sonoma County APCD.
- (13) Placer County APCD.
- (14) Plumas County APCD.
- (15) Sierra County APCD.
- (16) Trinity County APCD.
- (17) Ventura County APCD.

(b) The requirements of § 51.212 of this chapter are not met since the plan does not adequately provide for periodic testing and inspection of stationary sources within the Bay Area Air Pollution Control District portion of the San Francisco Bay Area Intrastate Region.

(c) The requirements of § 51.212 of this chapter are not met since the system for detecting violations through enforcement of visible emission regulations and complaint handling is not adequately described.

(d) *Regulation for source recordkeeping and reporting.* (1) The owner or operator of any stationary source in the State of California, except for those APCD's specified in paragraph (a) of this section, shall, upon notification from the Administrator, maintain records of the nature and amounts of emissions from such source and/or any other information as may be deemed necessary by the Administrator to determine whether such source is in compliance with applicable emission limitations or other control measures.

(2) The information recorded shall be summarized and reported to the Administrator, on forms furnished by the Administrator, and shall be submitted within 45 days after the end of the reporting period. Reporting periods are January 1 to June 30 and July 1 to December 31, except that the initial reporting period shall commence on the date the Administrator issues notification of the recordkeeping requirements.

(3) Information recorded by the owner or operator and copies of the summarizing reports submitted to the Administrator shall be retained by the owner or operator for 2 years after the

Environmental Protection Agency

§ 52.236

date on which the pertinent report is submitted.

(e) The requirements of § 51.214 of this chapter are not met in the following air pollution control districts (APCD's) since all of the applicable requirements of Appendix P of part 51 are not included in the district regulations.

- (1) Amador County APCD.
- (2) Bay Area AQMD
- (3) Calaveras County APCD.
- (4) El Dorado County APCD.
- (5) Imperial County APCD.
- (6) Kern County APCD.
- (7) Kings County APCD.
- (8) Los Angeles County APCD.
- (9) Mariposa County APCD.
- (10) Monterey Bay Unified APCD.
- (11) Nevada County APCD.
- (12) Placer County APCD.
- (13) Plumas County APCD.
- (14) San Bernardino County Desert APCD.
- (15) San Diego County APCD.
- (16) San Joaquin County APCD.
- (17) San Luis Obispo County APCD.
- (18) Santa Barbara County APCD.
- (19) Sierra County APCD.
- (20) South Coast AQMD.
- (21) Stanislaus County APCD.
- (22) Tulare County APCD.
- (23) Ventura County APCD.

[37 FR 10850, May 31, 1972]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.234, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

§ 52.235 Control strategy for ozone: Oxides of nitrogen.

EPA is approving an exemption request submitted by the Monterey Bay Unified Air Pollution Control District on April 26, 1994 for the Monterey Bay ozone nonattainment area from the NO_x RACT requirements contained in section 182(f) of the Clean Air Act. This approval exempts the area from implementing the oxides of nitrogen (NO_x) requirements for reasonably available control technology (RACT), new source review (NSR), the related requirements of general and transportation conformity regulations, and applicable inspection and maintenance (I/M). The exemption is based on ambient air monitoring data and lasts for only as long as the area's monitoring efforts

continue to demonstrate attainment without NO_x reductions from major stationary sources.

[60 FR 20237, Apr. 25, 1995]

§ 52.236 Rules and regulations.

(a) Since the following Air Pollution Control District (APCD) rules do not define the term "agricultural operations," the rules are disapproved because they could render certain emission limitations rules unenforceable.

- (1) Imperial County APCD.
 - (i) Rule 114.5, submitted on November 10, 1976.
 - (ii) Rule 148.D(3), submitted on November 10, 1976.
- (b) The following Air Pollution Control District (APCD) rules are disapproved because they contain the term "agricultural operations" and/or the term "other equipment in agricultural operations," both of which are either undefined or inadequately defined, thus rendering certain emission control rules unenforceable:
 - (1) San Luis Obispo County APCD.
 - (i) Rules 401(B)(4) and 401(B)(6), submitted on November 10, 1976.
 - (2) Sacramento County APCD.
 - (i) Rule 7(b)(5), submitted on November 4, 1977.
 - (3) Glenn County APCD.
 - (i) Section 77(e), submitted on June 30, 1972, and previously approved under 40 CFR 52.223 (37 FR 19812).
 - (4) Mariposa County APCD.
 - (i) Rule 203(G), submitted on June 6, 1977.
 - (5) Kern County APCD.
 - (i) Rules 402(c) and 402(e), submitted on; November 10, 1976.
 - (6) Fresno County APCD.
 - (i) Rules 402(c) and 402(e), submitted on October 23, 1974.
 - (ii) Rules 402(c) and 402(e), submitted on June 30, 1972, and previously approved under 40 CFR 52.223 (37 FR 19812).
 - (7) Tulare County APCD.
 - (i) Section 402(c), submitted on November 10, 1976, and previously approved under 40 CFR 52.223 (42 FR 47556).
 - (8) Madera County APCD.
 - (i) Rules 402(c) and 402(e), submitted on January 10, 1975, and previously approved under 40 CFR 52.223 (42 FR 42219).

- (9) Amador County APCD.
- (i) Rules 203(G), submitted on October 15, 1979, and 205(G), submitted on June 30, 1972.
- (c) Since the following Air Pollution Control Districts have deleted definitions which could allow a relaxation of emission limitations, the deletions are disapproved:
 - (1) Merced County APCD.
 - (i) Rule 102(hh), submitted on June 30, 1972, previously approved under 40 CFR 52.223, and deleted by the August 2, 1976 submittal, is retained.
 - (2) El Dorado County APCD.
 - (i) Rule 102(LL), submitted on November 4, 1977, previously approved at 43 FR 51632, and deleted by the May 23, 1979 submittal, is retained.
- (d) The following rules or portions of rules are disapproved since they contain provisions which are inconsistent with 40 CFR part 58, Ambient Air Quality Surveillance.
 - (1) Lake County APCD.
 - (i) Section 224, *Equivalent Method*, and Table V, *Table of Standards, Applicable Statewide*, submitted on February 10, 1977.
 - (ii) Table V, *Concentrations and Methods*, submitted on January 2, 1979, and Table V, submitted on February 10, 1976 and previously approved at 42 FR 42224.
 - (e) Since the following air pollution control districts have revised definitions so as to render the associated emission control requirements less stringent without a control strategy demonstration, the revisions are disapproved.
 - (1) Mendocino County APCD.
 - (i) Rule 130(p4), submitted on November 10, 1976. (Part III–49, previously submitted on February 21, 1972, and approved in 40 CFR 52.223, is retained).
 - (ii) Rule 130(s3), submitted on November 10, 1976. (Part III–55, previously submitted on February 21, 1972, and approved in 40 CFR 52.233, is retained).
 - (2) Shasta County APCD.
 - (i) The definition of “modification” in Rule 1:2, *Definitions*, submitted on October 13, 1977, is disapproved.
 - (3) San Bernardino County Desert APCD.
 - (i) Rule 103, *Definition of Terms*, submitted on November 4, 1977, is disapproved with respect to the deletion of the following terms: “Distilling type

- heater”, “Noncomplying orchard heater”, “Pipe line systems”, and “Return stack heater”. (Rule 2, *Definitions*, submitted on February 21, 1972 and approved in 40 CFR 52.223, is retained for the above terms.)
- (4) Southeast Desert Intrastate Region.
 - (i) San Bernardino County Desert APCD.
 - (A) Rule 102, *Definition of Terms*, submitted November 4, 1977 is disapproved with respect to the deletion of the following terms: Distilling type heater, Non-complying orchard heater, Pipe line systems, and Return stack heater. Rule 2, *Definitions*, submitted February 21, 1972 and approved in 40 CFR 52.223, is retained for the above terms.
 - (f) The following APCD rules are disapproved because they exempt some portions of the districts from the existing air pollution control regulations without setting forth substitute rules for the exempted areas.
 - (1) El Dorado County APCD.
 - (i) Rule 201, submitted on November 4, 1977, is disapproved. (The previously approved Rule 49, submitted on June 30, 1972, is retained for Federal enforcement purposes.)
 - (g) The following Air Pollution Control District (APCD) rules are disapproved pursuant to section 110(a)(2)(K) of the Clean Air Act because they could allow recovery of legal expenses associated with permit enforcement actions.
 - (1) Monterey Bay Unified APCD.
 - (i) Rule 300 (i)(1), *Permit Fee*, submitted on December 17, 1979.
 - (2) El Dorado County APCD.
 - (i) Rule 104, submitted on May 23, 1979.

[42 FR 39664, Aug. 5, 1977]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.236, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

§ 52.237 Part D disapproval.

 - (a) The following portions of the California SIP are disapproved because they do not meet the requirements of Part D of the Clean Air Act.
 - (1) The ozone and CO attainment demonstrations for the South Coast Air Basin. No major stationary source,

or major modification of a stationary source, of carbon monoxide or volatile organic compounds may be constructed in the South Coast Air Basin unless the construction permit application is complete on or before August 30, 1988.

(2) The ozone attainment demonstration for Ventura County. No major stationary source, or major modification of a stationary source, of volatile organic compounds may be constructed in the Ventura County nonattainment area unless the construction permit application is complete on or before November 4, 1988.

(3) The ozone attainment demonstration for the Sacramento AQMA. No major stationary source, or major modification of a stationary source, of volatile organic compounds may be constructed in the Sacramento nonattainment area unless the construction permit application is complete on or before January 3, 1989.

(4) The ozone attainment demonstration for the Fresno County APCD.

(5) The ozone attainment demonstration for the Kern County APCD.

(6) The attainment assessment, motor vehicle emissions budgets, and Reasonably Available Control Measure (RACM) portions of the San Francisco Bay Area Ozone Attainment Plan for the 1-Hour National Ozone Standard, June 1999.

(7) [Reserved]

(8) The contingency measure portion of the 2008 PM_{2.5} Plan for attainment of the 1997 PM_{2.5} standards in the San Joaquin Valley (June 2013).

(9) [Reserved]

(10) [Reserved]

(11) [Reserved]

(12) The contingency measures portion of the 2018 Plan for the 1997, 2006, and 2012 PM_{2.5} Standards ("2018 PM_{2.5} Plan"), adopted November 15, 2018, for San Joaquin Valley with respect to the 1997 24-hour PM_{2.5} NAAQS.

(13) The contingency measures element of the "2016 Ozone Plan for 2008 8-Hour Ozone Standard," adopted June 16, 2016, as modified by the "2018 Updates to the California State Implementation Plan," adopted October 25, 2018, for San Joaquin Valley with respect to the 2008 ozone NAAQS, with the exception of CARB's Enhanced En-

forcement Activities Program measure.

(14) The contingency measures element of the "Sacramento Regional 2008 NAAQS 8-hour Ozone Attainment and Reasonable Further Progress Plan," adopted November 16, 2017, as modified by the "2018 Updates to the California State Implementation Plan," adopted October 25, 2018, for the Sacramento Metro area with respect to the 2008 ozone NAAQS.

(b) The following Reasonably Available Control Technology (RACT) determinations are disapproved because they do not meet the requirements of Part D of the Clean Air Act.

(1) Sacramento Air Quality Management District.

(i) [Reserved]

(ii) RACT Determinations for the source category Control Techniques Guidelines for the Oil and Natural Gas Industry (EPA-453/B-16-001) for the 2008 and 2015 ozone NAAQS, as contained in the submittal titled "California Greenhouse Gas Emission Standards for Crude Oil and Natural Gas Facilities," dated December 4, 2018, as adopted March 23, 2017 and submitted on December 11, 2018.

(iii) [Reserved]

(2) [Reserved]

(3) San Joaquin Valley Air Pollution Control District.

(i) RACT Determinations for the source category Control Techniques Guidelines for the Oil and Natural Gas Industry (EPA-453/B-16-001) for the 2008 and 2015 ozone NAAQS, as contained in the submittal titled "California Greenhouse Gas Emission Standards for Crude Oil and Natural Gas Facilities," dated December 4, 2018, as adopted March 23, 2017 and submitted on December 11, 2018.

(ii) [Reserved]

(4) South Coast Air Quality Management District.

(i) RACT Determinations for the source category Control Techniques Guidelines for the Oil and Natural Gas Industry (EPA-453/B-16-001) for the 2008 and 2015 ozone NAAQS, as contained in the submittal titled "California Greenhouse Gas Emission Standards for Crude Oil and Natural Gas Facilities," dated December 4, 2018, as adopted

March 23, 2017 and submitted on December 11, 2018.

(ii) [Reserved]

(5) Ventura County Air Pollution Control District.

(i) RACT Determinations for the source category Control Techniques Guidelines for the Oil and Natural Gas Industry (EPA-453/B-16-001) for the 2008 and 2015 ozone NAAQS, as contained in the submittal titled “California Greenhouse Gas Emission Standards for Crude Oil and Natural Gas Facilities,” dated December 4, 2018, as adopted March 23, 2017 and submitted on December 11, 2018.

(ii) [Reserved]

(6) Yolo-Solano Air Quality Management District.

(i) RACT Determinations for the source category Control Techniques Guidelines for the Oil and Natural Gas Industry (EPA-453/B-16-001) for the 2008 and 2015 ozone NAAQS, as contained in the submittal titled “California Greenhouse Gas Emission Standards for Crude Oil and Natural Gas Facilities,” dated December 4, 2018, as adopted March 23, 2017 and submitted on December 11, 2018.

(ii) [Reserved]

(c) The following Clean Air Act section 185 fee rules, and the section 185 program plan element for the specified NAAQS, are disapproved because they do not meet the requirements of Part D of the Clean Air Act.

(1) Antelope Valley Air Quality Management District.

(i) Rule 315, “Federal Clean Air Act Section 185 Penalty,” amended on October 18, 2011, and submitted on December 14, 2011, for the 1979 1-hour ozone NAAQS.

(ii) [Reserved]

(2) Mojave Desert Air Quality Management District.

(i) Rule 315, “Federal Clean Air Act Section 185 Penalty,” amended on October 24, 2011, and submitted on December 14, 2011, for the 1979 1-hour ozone NAAQS.

(ii) [Reserved]

[46 FR 5979, Jan. 21, 1981, as amended at 48 FR 53118, Nov. 25, 1983; 50 FR 35798; Sept. 4, 1985; 53 FR 1781, Jan. 22, 1988; 53 FR 39088, Oct. 5, 1988; 53 FR 48537, Dec. 1, 1988; 55 FR 9878, 9880, Mar. 16, 1990; 56 FR 2853, Jan. 25, 1991; 66 FR 48347, Sept. 20, 2001; 81 FR 22032, Apr. 14, 2016; 81 FR 29501, May 12, 2016; 81 FR 53283, Aug. 12, 2016; 83 FR 5927, Feb. 12, 2018; 85 FR 77999, Dec. 3, 2020; 86 FR 49482, Sept. 3, 2021; 86 FR 67343, 67349, Nov. 26, 2021; 87 FR 4507, Jan. 28, 2022; 87 FR 38668, June 29, 2022; 87 FR 59024, Sept. 29, 2022; 87 FR 59320, Sept. 30, 2022; 87 FR 59692, Oct. 3, 2022; 88 FR 2541, Jan. 17, 2023; 88 FR 39182, June 15, 2023; 88 FR 42252, 42258, June 30, 2023; 88 FR 86608, Dec. 14, 2023; 89 FR 18547, Mar. 14, 2024; 89 FR 78258, Sept. 25, 2024; 89 FR 80766, Oct. 4, 2024]

§ 52.238 Commitment to undertake rulemaking.

(a) The Administrator shall undertake rulemaking, after the South Coast mobile source public consultative process, to promulgate any VOC and NO_x mobile source controls which are determined to be appropriate for EPA and needed for ozone attainment in the Los Angeles-South Coast Air Basin Area.

(b) [Reserved]

[62 FR 1187, Jan. 8, 1997]

§ 52.239 Alternate compliance plans.

(a) Alternative compliance plans (bubble plans) developed under the District rules listed below must be submitted to EPA by the State of California as SIP revisions. The emission limits contained in the District rule will continue to be enforceable by EPA and private citizens under sections 113 and 304(a) of the Act until the alternative compliance plans are approved by EPA for inclusion in the SIP.

(1) Bay Area AQMD.

(i) Rule 4 of Regulation 8, submitted on February 7, 1980.

(b) Alternative compliance plans (bubble plans) developed under the District rules listed below are considered the applicable requirements in the SIP which are enforceable by EPA and private citizens under section 113 and 304(a) of the Act. Alternative compliance plans must be submitted to EPA after their approval by the District. The District rules do not apply to or supersede the conditions that a source must meet under nonattainment or

PSD permit programs, new source performance standards, or national emission standards for hazardous air pollutants.

(1) Bay Area AQMD.

(i) Rules 11, 13 and 19 of Regulation 8, submitted on February 7, 1980.

[47 FR 11870, Mar. 19, 1982]

§ 52.240 Compliance schedules.

(a) The requirements of § 51.262(a) of this chapter are not met in the following Air Pollution Control Districts since the regulations cited do not provide increments to progress toward compliance.

(1) Rules 50-A, 52-A, 53-A(a), 53-A(b), 53-A(c), 53.2, 53.3, 54.A, 58.A, 62.1, 68, 69, 70, and 71 of the San Bernardino County APCD.

(2) Rules 53, 72.1, and 72.2 of the Riverside County APCD.

(3) Rules 53, 66.c, and 68.a of the Orange County APCD.

(4) Rule 39.1 of the Santa Barbara County APCD.

(5) Rule 59 of the Ventura County APCD.

(6) Rule 66(c) of the Los Angeles County APCD.

(7) Rule 4.5 of the Siskiyou County APCD.

(8) Rule 64(c) of the Northern Sonoma County APCD.

(9) Rule 409 of the Tulare County APCD.

(b) The requirements of § 51.261 are not met since Rule 68.a of the Orange County Air Pollution Control District does not provide for compliance within 3 years after the Administrator's approval of the plan.

(c) Federal compliance schedule. (1) Except as provided in paragraph (c)(2) of this section, the owner or operator of any stationary source subject to Rule 68.a of the Orange County Air Pollution Control District shall comply with such rule or regulation on or before January 31, 1974.

(i) Any owner or operator in compliance with this rule on the effective date of this regulation shall certify such compliance to the Administrator no later than 120 days following the effective date of this paragraph.

(ii) Any owner or operator who achieves compliance with such rule or regulation after the effective date of

this regulation shall certify such compliance to the Administrator within 5 days of the date compliance is achieved.

(2) Any owner or operator of a stationary source subject to paragraph (c)(1) of this section may, not later than 120 days following the effective date of this paragraph, submit to the Administrator for approval a proposed compliance schedule that demonstrates compliance with the rules and regulations specified in paragraph (c)(1) of this section as expeditiously as practicable but no later than July 31, 1975. The compliance schedule shall provide for increments of progress toward compliance. The dates for achievement of such increments of progress shall be specified. Increments of progress shall include, but not be limited to: Submittal of final control plan to the Administrator; letting of necessary contracts for construction or process changes or issuance of orders for the purchase of component parts to accomplish emission control or process modification; initiation of onsite construction or installation of emission control equipment or process modification; completion of onsite construction or installation of emission control equipment or process modification; and final compliance.

(3) Any owner or operator who submits a compliance schedule pursuant to this paragraph shall, within 5 days after the deadline for each increment of progress, certify to the Administrator whether or not the required increment of the approved compliance schedule has been met.

(d) Regulation for increments of progress. (1) The requirements of this paragraph are applicable to any stationary source in the following Air Pollution Control Districts subject to the indicated regulations.

(i) Rules 50-A, 52-A, 53-A(a), 53-A(b), 53-A(c), 53.2, 53.3, 54.A, 58.A, 62.1, 68, 69, 70, and 71 of the San Bernardino County APCD.

(ii) Rules 53, 72.1, and 72.2 of the Riverside County APCD.

(iii) Rules 53 and 66.c of the Orange County APCD.

(iv) Rule 39.1 of the Santa Barbara County APCD.

§ 52.241

40 CFR Ch. I (7–1–25 Edition)

(v) Rule 59 of the Ventura County APCD.

(vi) Rules 66(c) and 68 of the Los Angeles County APCD.

(vii) Rule 4.5 of the Siskiyou County APCD.

(viii) Rule 64(c) of the Northern Sonoma County APCD.

(ix) Rule 409 of the Tulare County APCD.

(2) Except as provided in paragraph (3) of this section, the owner or operator of any stationary source shall, no later than 120 days following the effective date of this paragraph, submit to the Administrator for approval, a proposed compliance schedule that demonstrates compliance with the applicable regulations as expeditiously as practicable but no later than the final compliance date specified by such applicable regulation. The compliance schedule shall provide for periodic increments of progress toward compliance. The dates for achievement of such increments shall be specified. Increments of progress shall include, but not be limited to: Submittal of final control plan to the Administrator; letting of necessary contracts for construction or process changes or issuance of orders for the purchase of component parts to accomplish emission control or process modification; initiation of onsite construction or installation of emission control equip-

ment or process modification; completion of onsite construction or installation of emission control equipment or process modification; and final compliance.

(3) Where any such owner or operator demonstrates to the satisfaction of the Administrator that compliance with the applicable regulations will be achieved on or before January 31, 1974, no compliance schedule shall be required.

(4) Any owner or operator who submits a compliance schedule pursuant to this paragraph shall, within 5 days after the deadline for each increment of progress, certify to the Administrator whether or not the required increment of the approved compliance schedule has been met.

(5) Any compliance schedule adopted by the State and approved by the Administrator shall satisfy the requirements of this paragraph for the affected source.

(e) [Reserved]

(f) State compliance schedules. (1) [Reserved]

(2) The compliance schedules for the sources identified below are disapproved as not meeting the requirements of Subpart N of this chapter. All regulations cited are air pollution control regulations of the county in which the source is located, unless otherwise indicated.

Source	Location (county)	Rule or regulation involved	Date of adoption	Effective date	Final compliance date
Simpson Lee Paper Co. (Order No. 72–V–7)	Shasta ..	3.2	Oct. 31, 1973.	Immediately	Jan. 15, 1976.
Monolith Portland Cement Co. (Order No. 73–6 as amended Mar. 11, 1974).	Kern	401(b), 404.1, 406 ..	Dec. 31, 1973.	do	July 1, 1976.

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.240, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

§ 52.241 Inspection and maintenance program.

(a) [Reserved]

(b) *Approval.* On June 5, 2009, the California Air Resources Board submitted a revision to the California Motor Vehicle Inspection and Maintenance Program (2009 I/M Revision) to satisfy the requirements for basic and

enhanced motor vehicle inspection and maintenance (I/M) in applicable ozone nonattainment areas. On October 28, 2009, the California Air Resources Board amended the 2009 I/M Revision to include revised enhanced performance program evaluations for six nonattainment areas. Approved elements of the

Environmental Protection Agency

§ 52.243

2009 I/M Revision, as amended on October 28, 2009, include a discussion of each of the required design elements of the I/M program; description of the current geographic coverage of the program; I/M-related statutes and regulations; enhanced I/M performance standard evaluations for the urbanized areas within six California ozone nonattainment areas (South Coast Air Basin, San Joaquin Valley, Sacramento Metro, Coachella Valley, Ventura County, and Western Mojave Desert); basic I/M performance standard evaluation for the urbanized area within the San Francisco Bay Area ozone nonattainment area; and emission analyzer specifications and test procedures, including BAR-97 specifications. The 2009 I/M Revision, as amended on October 28, 2009, meets the requirements of sections 182(a)(2)(B) and 182(c)(3) of the Clean Air Act, as amended in 1990, and 40 CFR part 51, subpart S and is approved as a revision to the California State Implementation Plan.

[75 FR 38026, July 1, 2010]

§ 52.242 Disapproved rules and regulations.

(a) The following Air Pollution Control District rules are disapproved because they do not meet the requirements of section 110 of the Clean Air Act.

(1) South Coast Air Quality Management District.

(i) Rule 1623, Credits for Lawn and Garden Equipment, submitted on August 28, 1996 and adopted on May 10, 1996.

(ii) Rule 118, Emergencies, submitted on May 21, 1998.

(iii) Rule 1175, "Control of Emissions from the Manufacturing of Polymeric Cellular (Foam) Products," submitted on March 7, 2008 and adopted on September 7, 2007.

(iv) Rule 511.1, "Subpoenas," submitted on February 7, 1989.

(v) Rule 503.1, "Ex Parte Petitions for Variances," submitted on February 7, 1989.

(vi) Rule 504, "Rules from which Variances Are Not Allowed," submitted on May 13, 1991.

(vii) Rule 1610, "Old-Vehicle Scrapping," submitted on June 3, 1997.

(viii) Rule 2202, "On-Road Motor Vehicle Mitigation Options," submitted on June 3, 1999.

(2) Antelope Valley Air Pollution Control District.

(i) Rule 118, Emergencies, submitted on March 10, 1998.

(3) Imperial County Air Pollution Control District.

(i) Rule 401, Opacity of Emissions submitted on May 26, 2000. Rule 401 submitted on June 9, 1987, is retained.

(4) San Joaquin Valley Unified Air Pollution Control District.

(i) Rule 4101, Visible Emissions, submitted on December 6, 2001 and adopted on November 15, 2001.

(5) Kern County Air Pollution Control District.

(i) Rule 203, Transfer, submitted on July 23, 1996 and amended on May 2, 1996. Rule 203, submitted on June 30, 1972, is retained.

(6) Monterey Bay Unified Air Pollution Control District

(i) Rule 400, Visible Emissions, submitted on March 7, 2008. Rule 400 submitted on January 15, 2004, is retained.

[65 FR 10717, Feb. 29, 2000, as amended at 66 FR 49297, Sept. 27, 2001; 67 FR 62385, Oct. 7, 2002; 69 FR 1273, Jan. 8, 2004; 72 FR 63110, Nov. 8, 2007; 75 FR 25778, May 10, 2010; 75 FR 37730, June 30, 2010; 81 FR 4891, Jan. 28, 2016]

§ 52.243 Interim approval of the Carbon Monoxide plan for the South Coast.

The Carbon Monoxide plan for the Los Angeles-South Coast Air Basin is approved as meeting the provisions of sections 171(1), 172(c)(2), and 187(a)(7) for quantitative milestones and reasonable further progress, and the provisions of section 187(a)(7) for attainment demonstration. This approval expires on August 7, 1998, or earlier if by such earlier date the State has submitted as a SIP revision a demonstration that the carbon monoxide emission reduction credits for the enhanced motor vehicle inspection and maintenance program are appropriate and that the program is otherwise in compliance with the Clean Air Act and EPA takes final action approving that revision, as provided by section 348(c) of the National Highway System Designation Act (Public Law 104-59).

[63 FR 19662, Apr. 21, 1998]

§ 52.244 Motor vehicle emissions budgets.

(a) Approval of the motor vehicle emissions budgets for the following ozone rate-of-progress and attainment SIPs will apply for transportation conformity purposes only until new budgets based on updated planning data and models have been submitted and EPA has found the budgets to be adequate for conformity purposes.

- (1) Antelope Valley, approved January 8, 1997;
- (2) Coachella, approved January 8, 1997;
- (3) Kern, approved January 8, 1997;
- (4) Mojave, approved January 8, 1997;
- (5) Sacramento, approved January 8, 1997;
- (6) South Coast, approved April 10, 2000;
- (7) Ventura, approved January 8, 1997.
- (8) South Coast, approved October 31, 2019.
- (9) Ventura County, approved March 30, 2020.
- (10) Imperial, approved March 30, 2020.
- (11) Coachella Valley, approved October 16, 2020.
- (12) Nevada County (Western part), approved June 21, 2021.
- (13) West Mojave Desert, approved October 27, 2021.

(b) Approval of the motor vehicle emissions budgets for the following ozone maintenance SIP will apply for transportation conformity purposes only until new budgets based on updated planning data and models have been submitted and EPA has found the budgets to be adequate for conformity purposes.

- (1) Monterey, approved January 17, 1997.

(2) [Reserved]

(c) Approval of the motor vehicle emissions budgets for the following carbon monoxide maintenance SIPs will apply for transportation conformity purposes only until new budgets based on updated planning data and models have been submitted and EPA has found the budgets to be adequate for conformity purposes.

- (1) Bakersfield, approved March 31, 1998;
- (2) Chico, approved March 31, 1998;
- (3) Fresno, approved March 31, 1998;

- (4) Lake Tahoe-North, approved March 31, 1998;

- (5) Lake Tahoe-South, approved March 31, 1998;

- (6) Modesto, approved March 31, 1998;

- (7) Sacramento, approved March 31, 1998;

- (8) San Diego, approved March 31, 1998;

- (9) San Francisco Bay Area, approved March 31, 1998;

- (10) Stockton, approved March 31, 1998.

(d) Approval of the motor vehicle emissions budgets for the following nitrogen dioxide maintenance SIP will apply for transportation conformity purposes only until new budgets based on updated planning data and models have been submitted and EPA has found the budgets to be adequate for conformity purposes.

- (1) South Coast, approved on July 24, 1998.

(2) [Reserved]

(e) Approval of the motor vehicle emissions budgets for the following PM₁₀ reasonable further progress and attainment SIPs will apply for transportation conformity purposes only until new budgets based on updated planning data and models have been submitted and EPA has found the budgets to be adequate for conformity purposes.

- (1) South Coast, approved April 18, 2003.

- (2) Coachella Valley, approved April 18, 2003.

(f) Approval of the motor vehicle emissions budgets for the following PM_{2.5} reasonable further progress or attainment SIPs will apply for transportation conformity purposes only until new budgets based on updated planning data and models have been submitted and EPA has found the budgets to be adequate for conformity purposes.

- (1) San Joaquin Valley, for the 2006 PM_{2.5} NAAQS only (but excluding 2026 budgets), approved August 21, 2020.

- (2) San Joaquin Valley, for the 2012 PM_{2.5} NAAQS only (Year 2022 budgets only), approved December 27, 2021.

- (3) San Joaquin Valley, for the 1997 24-hour PM_{2.5} NAAQS only (years 2017 and 2020 budgets only), approved February 28, 2022.

(4) San Joaquin Valley, for the 1997 annual PM_{2.5} NAAQS only (years 2020 and 2023 budgets only), approved January 16, 2024.

[67 FR 69146, Nov. 15, 2002, as amended at 68 FR 19317, 19319, Apr. 18, 2003; 84 FR 52015, Oct. 1, 2019; 85 FR 11817, 11822, Feb. 27, 2020; 85 FR 44206, July 22, 2020; 85 FR 57721, Sept. 16, 2020; 86 FR 27531, May 21, 2021; 86 FR 53228, Sept. 27, 2021; 86 FR 67349, Nov. 26, 2021; 87 FR 4508, Jan. 28, 2022; 88 FR 86608, Dec. 14, 2023]

§ 52.245 New Source Review rules.

(a) Approval of the New Source Review rules for the San Joaquin Valley Unified Air Pollution Control District Rules 2020 and 2201 as approved on May 17, 2004 in § 52.220(c)(311)(i)(B)(I), and in effect for Federal purposes from June 16, 2004 through June 10, 2010, is limited, as it relates to agricultural sources, to the extent that the permit requirements apply:

(1) To agricultural sources with potential emissions at or above a major source applicability threshold; and

(2) To agricultural sources with actual emissions at or above 50 percent of a major source applicability threshold.

(b) Approval of the New Source Review rules for the San Joaquin Valley Unified Air Pollution Control District Rules 2020 and 2201 as approved on May 17, 2004 in § 52.220(c)(311)(i)(B)(I), and in effect for Federal purposes from June 16, 2004 through June 10, 2010, is limited, as it relates to agricultural sources, to the extent that the emission offset requirements apply to major agricultural sources and major modifications of such sources.

(c) By May 7, 2016, the New Source Review rules for PM_{2.5} for the San Joaquin Valley Unified Air Pollution Control District must be revised and submitted as a SIP revision. The rules must satisfy the requirements of sections 189(b)(3) and 189(e) and all other applicable requirements of the Clean Air Act for implementation of the 1997 PM_{2.5} NAAQS.

(d) By August 14, 2017, the New Source Review rules for PM_{2.5} for the South Coast Air Quality Management District must be revised and submitted as a SIP revision. The rules must satisfy the requirements of sections 189(b)(3) and 189(e) and all other applicable requirements of the Clean Air

Act for implementation of the 2006 PM_{2.5} NAAQS.

(e) By February 21, 2017, the New Source Review rules for PM_{2.5} for the San Joaquin Valley Unified Air Pollution Control District must be revised and submitted as a SIP revision. The rules must satisfy the requirements of sections 189(b)(3) and 189(e) and all other applicable requirements of the Clean Air Act for implementation of the 2006 PM_{2.5} NAAQS.

(f) Within 18 months after the effective date of the reclassification of the San Joaquin Valley nonattainment area from Moderate to Serious for the 2012 PM_{2.5} NAAQS, the New Source Review rules for PM_{2.5} for the San Joaquin Valley Unified Air Pollution Control District must be revised and submitted as a SIP revision. The rules must satisfy the requirements of sections 189(b)(3) and 189(e) and all other applicable requirements of the Clean Air Act for implementation of the 2012 PM_{2.5} NAAQS in nonattainment areas classified as Serious.

[78 FR 46514, Aug. 1, 2013, as amended at 80 FR 18533, Apr. 7, 2015; 81 FR 1520, Jan. 13, 2016; 81 FR 3000, Jan. 20, 2016; 86 FR 67349, Nov. 26, 2021]

§ 52.246 Control of dry cleaning solvent vapor losses.

(a) For the purpose of this section, “dry cleaning operation” means that process by which an organic solvent is used in the commercial cleaning of garments and other fabric materials.

(b) This section is applicable in the Metropolitan Los Angeles, Sacramento Valley, and San Joaquin Valley Intrastate Air Quality Control Regions (the “Regions”), as described in 40 CFR part 81, dated July 1, 1979, except as follows:

(1) In the following portions of the Sacramento Valley Region, this section is rescinded:

(i) Sacramento County APCD.

(ii) Placer County APCD (Mountain Counties Air Basin portion).

(iii) Yuba County APCD.

(iv) Sutter County APCD.

(2) In the following portions of the Metropolitan Los Angeles Intrastate Region, this section is rescinded:

(i) Ventura County APCD.

(3) In the following portions of the San Joaquin Valley Intrastate Region, this section is rescinded:

- (i) San Joaquin County APCD.
- (ii) Stanislaus County APCD.
- (iii) Tulare County APCD.
- (iv) Fresno County APCD.

(c) Any dry cleaning establishment that uses solvents containing 4 percent or more by volume of any reactive organic material listed under paragraphs (k) (1), (2), and (3) of § 52.254 except perchloroethylene or any saturated halogenated hydrocarbon shall reduce the emissions of the discharged organics by 90 percent by use of activated carbon adsorption, or other appropriate means, not later than January 1, 1975.

(d) If incineration is used as a control technique, 90 percent or more of the carbon in the organic compounds being incinerated must be oxidized to carbon dioxide.

[38 FR 31246, Nov. 12, 1973, as amended at 42 FR 41122, Aug. 15, 1977; 42 FR 42226, Aug. 22, 1977; 47 FR 15586, Apr. 12, 1982; 47 FR 18856, May 3, 1982; 47 FR 26385, June 18, 1982; 47 FR 28622, July 1, 1982; 47 FR 29670, July 8, 1982; 47 FR 50865, Nov. 10, 1982]

§ 52.247 Control Strategy and regulations: Fine Particle Matter.

(a) *Determination of Attainment:* Effective February 8, 2013, EPA has determined that, based on 2009 to 2011 ambient air quality data, the San Francisco Bay Area PM_{2.5} nonattainment area has attained the 2006 24-hour PM_{2.5} NAAQS. This determination suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment for as long as this area continues to attain the 2006 24-hour PM_{2.5} NAAQS. If EPA determines, after notice-and-comment rulemaking, that this area no longer meets the 2006 PM_{2.5} NAAQS, the corresponding determination of attainment for that area shall be withdrawn.

(b) *Determination of Attainment:* Effective February 11, 2013, EPA has determined that, based on 2009 to 2011 ambient air quality data, the Yuba City-Marysville PM_{2.5} nonattainment area

has attained the 2006 24-hour PM_{2.5} NAAQS. This determination suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment for as long as this area continues to attain the 2006 24-hour PM_{2.5} NAAQS. If EPA determines, after notice-and-comment rulemaking, that this area no longer meets the 2006 PM_{2.5} NAAQS, the corresponding determination of attainment for that area shall be withdrawn.

(c) *Determination of Attainment:* Effective August 14, 2013, EPA has determined that, based on 2010 to 2012 ambient air quality data, the Sacramento PM_{2.5} nonattainment area has attained the 2006 24-hour PM_{2.5} NAAQS. This determination suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment for as long as this area continues to attain the 2006 24-hour PM_{2.5} NAAQS. If EPA determines, after notice-and-comment rulemaking, that this area no longer meets the 2006 24-hour PM_{2.5} NAAQS, the corresponding determination of attainment for that area shall be withdrawn.

(d) *Determination of Attainment:* Effective October 10, 2013, EPA has determined that, based on 2010 to 2012 ambient air quality data, the Chico PM_{2.5} nonattainment area has attained the 2006 24-hour PM_{2.5} NAAQS. This determination suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment for as long as this area continues to attain the 2006 24-hour PM_{2.5} NAAQS. If EPA determines, after notice-and-comment rulemaking, that this area no longer meets the 2006 24-hour PM_{2.5} NAAQS, the corresponding determination of attainment for that area shall be withdrawn.

(e) By August 14, 2017, California must adopt and submit a Serious Area plan to provide for attainment of the

2006 PM_{2.5} NAAQS in the South Coast PM_{2.5} nonattainment area. The Serious Area plan must include emissions inventories, an attainment demonstration, best available control measures, a reasonable further progress plan, quantitative milestones, contingency measures, and such other measures as may be necessary or appropriate to provide for attainment of the 2006 PM_{2.5} NAAQS by the applicable attainment date, in accordance with the requirements of subparts 1 and 4 of part D, title I of the Clean Air Act.

(f) [Reserved]

(g) *Determination of Attainment:* Effective August 24, 2016, the EPA has determined that, based on 2011 to 2013 ambient air quality data, the South Coast PM_{2.5} nonattainment area has attained the 1997 annual and 24-hour PM_{2.5} NAAQS. This determination suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures and other planning SIPs related to attainment for as long as this area continues to attain the 1997 annual and 24-hour PM_{2.5} NAAQS. If the EPA determines, after notice-and-comment rulemaking, that this area no longer meets the 1997 PM_{2.5} NAAQS, the corresponding determination of attainment for the area shall be withdrawn.

(h) *Determination of Failure to Attain:* Effective December 23, 2016, the EPA has determined that the San Joaquin Valley Serious PM_{2.5} nonattainment area failed to attain the 1997 annual and 24-hour PM_{2.5} NAAQS by the applicable attainment date of December 31, 2015. This determination triggers the requirements of CAA sections 179(d) and 189(d) for the State of California to submit a revision to the California SIP for the San Joaquin Valley to the EPA by December 31, 2016. The SIP revision must, among other elements, demonstrate expeditious attainment of the 1997 PM_{2.5} NAAQS within the time period provided under CAA section 179(d) and that provides for annual reduction in the emissions of direct PM_{2.5} or a PM_{2.5} plan precursor pollutant within the area of not less than five percent until attainment.

(i) *Determination of attainment.* Effective May 12, 2017, EPA has determined that, based on 2013 to 2015 ambient air quality data, the Imperial County PM_{2.5} nonattainment area has attained the 2006 24-hour PM_{2.5} NAAQS. Under the provisions of EPA's PM_{2.5} implementation rule (see 40 CFR 51.1015), this determination suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment for as long as this area continues to attain the 2006 24-hour PM_{2.5} NAAQS. If EPA determines, after notice-and-comment rulemaking, that this area no longer meets the 2006 24-hour PM_{2.5} NAAQS, the corresponding determination of attainment for that area shall be withdrawn.

(j) *Determination of attainment.* Effective June 9, 2017, the EPA has determined that, based on 2013 to 2015 ambient air quality data, the Chico, CA PM_{2.5} nonattainment area has attained the 2006 24-hour PM_{2.5} NAAQS by the applicable attainment date of December 31, 2015. Therefore, the EPA has met the requirement pursuant to CAA section 188(b)(2) to determine whether the area attained the standard. The EPA also has determined that the Chico, CA nonattainment area will not be reclassified for failure to attain by its applicable attainment date under section 188(b)(2).

(k) *Determination of attainment.* Effective June 9, 2017, the EPA has determined that, based on 2013 to 2015 ambient air quality data, the Imperial County, CA PM_{2.5} nonattainment area has attained the 2006 24-hour PM_{2.5} NAAQS by the applicable attainment date of December 31, 2015. Therefore, the EPA has met the requirement pursuant to CAA section 188(b)(2) to determine whether the area attained the standard. The EPA also has determined that the Imperial County, CA nonattainment area will not be reclassified for failure to attain by its applicable attainment date under section 188(b)(2).

(l) *Determination of attainment.* Effective June 9, 2017, the EPA has determined that, based on 2013 to 2015 ambient air quality data, the Sacramento,

CA PM_{2.5} nonattainment area has attained the 2006 24-hour PM_{2.5} NAAQS by the applicable attainment date of December 31, 2015. Therefore, the EPA has met the requirement pursuant to CAA section 188(b)(2) to determine whether the area attained the standard. The EPA also has determined that the Sacramento, CA nonattainment area will not be reclassified for failure to attain by its applicable attainment date under section 188(b)(2).

(m) *Determination of attainment.* Effective June 9, 2017, the EPA has determined that, based on 2013 to 2015 ambient air quality data, the San Francisco Bay, CA PM_{2.5} nonattainment area has attained the 2006 24-hour PM_{2.5} NAAQS by the applicable attainment date of December 31, 2015. Therefore, the EPA has met the requirement pursuant to CAA section 188(b)(2) to determine whether the area attained the standard. The EPA also has determined that the San Francisco Bay, CA nonattainment area will not be reclassified for failure to attain by its applicable attainment date under section 188(b)(2).

(n) *Determination of Failure to Attain.* Effective October 16, 2020, the EPA has determined that the Los Angeles-South Coast Air Basin Serious PM_{2.5} nonattainment area failed to attain the 2006 24-hour PM_{2.5} NAAQS by the applicable attainment date of December 31, 2019. This determination triggers the requirements of CAA sections 179(d) and 189(d) for the State of California to submit a revision to the California SIP for the Los Angeles-South Coast Air Basin to the EPA by December 31, 2020. The SIP revision must, among other elements, demonstrate expeditious attainment of the 2006 24-hour PM_{2.5} NAAQS within the time period provided under CAA section 179(d) and that provides for annual reduction in the emissions of direct PM_{2.5} or a PM_{2.5} plan precursor pollutant within the area of not less than five percent until attainment.

(o) Within 18 months after the effective date of the reclassification of the San Joaquin Valley nonattainment area from Moderate to Serious for the 2012 PM_{2.5} NAAQS, California must adopt and submit an emissions inventory and provisions to assure that BACM shall be

implemented no later than four years after the date of reclassification. Also, by December 31, 2023, California must adopt and submit a Serious area plan that includes an attainment demonstration, a reasonable further progress plan, quantitative milestones, contingency measures, and such other measures as may be necessary or appropriate to provide for attainment of the 2012 PM_{2.5} NAAQS by the applicable attainment date, in accordance with the requirements of subparts 1 and 4 of part D, title I of the Clean Air Act.

(p) *Determination of Attainment.* Effective February 28, 2022, the EPA has determined that, based on 2018 to 2020 ambient air quality data, the San Joaquin Valley PM_{2.5} nonattainment area has attained the 1997 24-hour PM_{2.5} NAAQS by the applicable attainment date of December 31, 2020. Therefore, the EPA has met the requirement pursuant to CAA sections 179(c)(1) and 188(b)(2) to determine whether the area attained the standard. The EPA has also determined that, based on the determination of attainment by the applicable attainment date, the requirement of CAA section 172(c)(9) to provide for contingency measures no longer applies to the San Joaquin Valley area for the 1997 24-hour PM_{2.5} NAAQS.

(q) *Determination of attainment.* Effective February 10, 2023, the EPA has determined that, based on 2019 to 2021 ambient air quality data, the Imperial County PM_{2.5} nonattainment area has attained the 2012 annual PM_{2.5} NAAQS. Under the provisions of the EPA's PM_{2.5} implementation rule (see 40 CFR 51.1015), this determination suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment for as long as this area continues to attain the 2012 annual PM_{2.5} NAAQS. If the EPA determines, after notice-and-comment rulemaking, that this area no longer meets the 2012 annual PM_{2.5} NAAQS, the corresponding

determination of attainment for that area shall be withdrawn.

[78 FR 1761, Jan. 9, 2013, as amended at 78 FR 2213, Jan. 10, 2013; 78 FR 42021, July 15, 2013; 78 FR 55228, Sept. 10, 2013; 81 FR 1520, Jan. 13, 2016; 81 FR 42264, June 29, 2016; 81 FR 48355, July 25, 2016; 81 FR 84483, Nov. 23, 2016; 82 FR 13398, Mar. 13, 2017; 82 FR 21715, May 10, 2017; 85 FR 57735, Sept. 16, 2020; 86 FR 67350, Nov. 26, 2021; 87 FR 4508, Jan. 28, 2022; 88 FR 1517, Jan. 11, 2023]

EFFECTIVE DATE NOTE: At 90 FR 23445, June 3, 2025, § 52.247 was amended, effective July 3, 2025.

§ 52.248 Identification of plan—conditional approval.

(a) The EPA is conditionally approving a California State Implementation Plan (SIP) revision submitted on November 13, 2015 updating the motor vehicle emissions budgets for nitrogen oxides (NO_x) and coarse particulate matter (PM₁₀) for the 1987 24-hour PM₁₀ standard for the San Joaquin Valley PM₁₀ maintenance area. The conditional approval is based on a commitment from the State to submit a SIP revision that demonstrates full implementation of the contingency provisions of the 2007 PM₁₀ Maintenance Plan and Request for Redesignation (September 20, 2007). If the State fails to meet its commitment by June 1, 2017, the approval is treated as a disapproval.

(b)–(c) [Reserved]

(d)(1) The EPA is conditionally approving portions of the California SIP revisions submitted on July 11, 2007 and September 9, 2015, demonstrating control measures in the Mojave Desert portion of the Los Angeles-San Bernardino Counties (West Mojave Desert) nonattainment area implement RACT for the 1997 and 2008 ozone standards. The conditional approval is based on a commitment from the state to submit new or revised rules that will correct deficiencies in the following rules for the Mojave Desert Air Quality Management District:

(i)–(vii) [Reserved]

(viii) Rule 1160, *Internal Combustion Engines*;

(ix)–(x) [Reserved]

(2) If the State fails to meet its commitment by January 31, 2019, the conditional approval is treated as a disapproval.

(e)–(g) [Reserved]

(h) The EPA is conditionally approving the California State Implementation Plan (SIP) for the South Coast for the 2008 ozone NAAQS with respect to the reasonable further progress (RFP) contingency measure requirements of CAA sections 172(c)(9) and 182(c)(9). The conditional approval is based on a commitment from the South Coast Air Quality Management District (District) in a letter dated January 29, 2019, and clarified in a letter dated May 2, 2019, to adopt specific rule revisions, and a commitment from the California Air Resources Board (CARB) dated February 13, 2019 to submit the amended District rule or rules to the EPA within 12 months of the effective date of the final conditional approval. If the District or CARB fail to meet their commitments within one year of the effective date of the final conditional approval, the conditional approval is treated as a disapproval.

(i)–(k) [Reserved]

(l) The EPA is conditionally approving the California State Implementation Plan (SIP) for Nevada County (Western part) for the 2008 ozone NAAQS with respect to the contingency measures requirements of CAA sections 172(c)(9) and 182(c)(9). The conditional approval is based on a commitment from the Northern Sierra Air Quality Management District (District) in a letter dated October 26, 2020, to adopt a specific rule revision, and a commitment from the California Air Resources Board (CARB) dated November 16, 2020, to submit the amended District rule to the EPA within 12 months of the effective date of the final conditional approval. If the District or CARB fail to meet their commitments within one year of the effective date of the final conditional approval, the conditional approval is treated as a disapproval.

(m) The EPA is conditionally approving the California State Implementation Plan (SIP) for Eastern Kern for the 2008 ozone NAAQS with respect to the contingency measures requirements of CAA sections 172(c)(9) and 182(c)(9). The conditional approval is based on a commitment from the Eastern Kern Air Pollution Control District (District) in a letter dated September

§§ 52.249–52.251

1, 2020, to adopt a specific rule revision or revisions, and a commitment from the California Air Resources Board (CARB) dated September 18, 2020, to submit the amended District rule or rules to the EPA within 12 months of the final conditional approval. If the District or CARB fail to meet their commitments within one year of the final conditional approval, the conditional approval is treated as a disapproval.

[82 FR 46926, Oct. 10, 2017, as amended at 82 FR 57135, Dec. 4, 2017; 83 FR 5923, Feb. 12, 2018; 83 FR 23374, May 21, 2018; 83 FR 50010, Oct. 4, 2018; 83 FR 61552, Nov. 30, 2018; 84 FR 11207, Mar. 25, 2019; 84 FR 19682, May 3, 2019; 84 FR 31684, 31686, July 2, 2019; 84 FR 52015, Oct. 1, 2019; 85 FR 8185, Feb. 13, 2020; 85 FR 11814, Feb. 27, 2020; 85 FR 25295, May 1, 2020; 85 FR 38086, June 25, 2020; 85 FR 57729, Sept. 16, 2020; 85 FR 71269, Nov. 9, 2020; 86 FR 27532, May 21, 2021; 86 FR 33539, June 25, 2021; 86 FR 58593, Oct. 22, 2021; 87 FR 12869, Mar. 8, 2022; 87 FR 24063, Apr. 22, 2022; 87 FR 59692, Oct. 3, 2022; 88 FR 36251, June 2, 2023; 88 FR 39368, June 16, 2023; 88 FR 75236, Nov. 2, 2023]

§§ 52.249–52.251 [Reserved]

§ 52.252 Control of degreasing operations.

(a) “Degreasing” means any operation using an organic solvent as a surface cleaning agent prior to fabricating, surface coating, electroplating, or any other process.

(b) This section is applicable in the Sacramento Valley, San Joaquin Valley, and San Francisco Bay Area Intrastate Air Quality Control Regions (the “Regions”), as described in 40 CFR part 81, dated July 1, 1979, except as follows:

(1) In the following portions of the Sacramento Valley Region, this section is rescinded:

- (i) Sacramento County APCD.
- (ii) Placer County APCD (Mountain Counties Air Basin portion).
- (iii) Yuba County APCD.
- (iv) Sutter County APCD.

(c) Any organic emissions discharged from degreasing operations must either be reduced by at least 85 percent, or the degreasing solvent must be classified as non-photochemically reactive as defined by paragraph (k) of § 52.254 not later than January 1, 1975. This regulation shall not be construed as lessening any emission control requirement specified under EPA approved

40 CFR Ch. I (7–1–25 Edition)

regulations or § 52.254. Degreasing operations using perchloroethylene or saturated halogenated hydrocarbons shall be exempt from the requirements of this section.

[38 FR 31249, Nov. 12, 1973, as amended at 42 FR 42226, Aug. 22, 1977; 47 FR 15586, Apr. 12, 1982; 47 FR 18856, May 3, 1982; 47 FR 19332, May 5, 1982; 47 FR 28622, July 1, 1982]

§ 52.253 Metal surface coating thinner and reducer.

(a) All terms defined in § 52.254 are used herein with the meanings so defined.

(b) This section is applicable in the Metropolitan Los Angeles, San Diego, Sacramento Valley, San Joaquin Valley, and San Francisco Bay Area Intrastate Air Quality Control Regions (the “Regions”), as described in 40 CFR part 81, dated July 1, 1979, except as follows:

(1) In the following portions of the Sacramento Valley Intrastate Region, this section is either fully rescinded or partially rescinded subject to the conditions specified as follows:

- (i) Sacramento County APCD.
- (ii) Placer County APCD (Mountain Counties Air Basin portion).
- (iii) This section is rescinded for metal parts and products coaters which are subject to and in full compliance with Yolo-Solano County Rule 2.25 submitted on February 25, 1980.
- (iv) Yuba County APCD.
- (v) Sutter County APCD.

(2) In the following portions of the Metropolitan Los Angeles Intrastate Region, this section is either fully rescinded or partially rescinded subject to the conditions specified as follows:

- (i) This section is fully rescinded for the Ventura County APCD.
- (ii) This section is rescinded for magnet wire insulators, can and coil coaters, metal parts coaters, and auto assembly line coaters which are subject to and in full compliance with Rules 1107, 1115, 1125, and 1126 in the South Coast AQMD.
- (iii) This section is rescinded for metal parts coaters that are subject to and in full compliance with Rule 330 submitted on October 18, 1979, in the Santa Barbara County APCD.

(3) In the following portions of the San Joaquin Valley Intrastate Region, this section is rescinded for certain

Environmental Protection Agency

§ 52.254

sources subject to the conditions specified:

(i) This section is rescinded for metal parts and products coaters which are subject to and in full compliance with Kern County Rule 410.4, submitted on October 15, 1979.

(ii) This section is rescinded for metal parts and products coaters which are subject to and in full compliance with Madera County APCD's Rule 410.4 submitted on October 10, 1980.

(iii) This section is rescinded for metal parts and products coaters which are subject to and in full compliance with Merced County Rule 409.4 submitted on October 10, 1980.

(iv) This section is rescinded for metal parts and products coaters which are subject to and in full compliance with San Joaquin County Rule 409.4 submitted on October 10, 1980.

(v) This section is rescinded for metal parts and products coaters which are subject to and in full compliance with Stanislaus County Rule 410.4 submitted on October 10, 1980.

(vi) This section is rescinded for metal parts and products coaters which are subject to and in full compliance with Tulare County Rule 410.4 submitted on October 10, 1980.

(vii) This section is rescinded for metal parts and products coaters which are subject to and in full compliance with Kings County Rule 410.4 submitted on October 10, 1980.

(viii) This section is rescinded for metal parts and products coaters which are subject to and in full compliance with Fresno County Rule 409.4 submitted on October 15, 1979.

(4) In the San Francisco Bay Area Intrastate Region this section is rescinded for certain operations, subject to the conditions specified below:

(i) This section is rescinded for metal container, closure and coil coating operations, light and medium-duty motor vehicle assembly plants, large appliance and metal furniture coaters, and miscellaneous metal parts and products coating operations, which are subject to and in full compliance with Rules 11, 13, 14, and 19 of Regulation 8 in the Bay Area AQMD.

(5) In the San Diego Intrastate Region, this section is rescinded:

(i) This section is rescinded for metal parts and products coaters which are subject to and in full compliance with San Diego APCD Rule 67.3, submitted on October 25, 1979.

(c) The composition of the organics in all metal surface coating thinners and reducers that are manufactured after January 1, 1975, and are used in the Regions, shall conform to paragraph (k) of § 52.254 so as to be defined as a nonphotochemically reactive solvent.

(d) After July 1975, the composition of the organics in all metal surface coating thinners and reducers that are used in the Regions, shall conform to paragraph (k) of § 52.254 so as to be defined as a non-photochemically reactive solvent.

(e) If there is an inadequate supply of necessary solvent ingredients needed in the manufacture of metal surface coating thinners and reducers for the purpose of meeting the composition requirements of this section in the time constraint required by this section; then evidence of such a supply inadequacy must be presented to the Administrator by the manufacturers of the metal surface coating thinners and reducers, so that the Administrator may grant to the industry an appropriate implementation time extension for meeting the requirements of this section, if and as warranted by the evidence presented.

[38 FR 31249, Nov. 12, 1973, as amended at 42 FR 28123, June 2, 1977; 46 FR 5979, Jan. 21, 1981; 46 FR 42461, Aug. 21, 1981; 47 FR 11870, Mar. 19, 1982; 47 FR 15586, Apr. 12, 1982; 47 FR 18856, May 3, 1982; 47 FR 19332, May 5, 1982; 47 FR 19698, May 7, 1982; 47 FR 24308, June 4, 1982; 47 FR 28622, July 1, 1982]

§ 52.254 Organic solvent usage.

(a) This section is applicable in the Sacramento Valley, San Francisco Bay Area, and San Joaquin Valley Intrastate Air Quality Control Regions (the "Regions"), as described in 40 CFR part 81, dated July 1, 1979, except as follows:

(1) In the following portions of the San Joaquin Valley Region, only the hourly emission limitations contained in paragraphs (b), (c), and (d) of this section are in effect; the following paragraphs, needed for interpretation are also in effect: Paragraphs (e)

through (l) and (o) through (q) of this section. In addition, this section is entirely rescinded for specific operations for some of the counties noted below:

(i) This section is rescinded entirely for metal parts and products coaters which are subject to and in full compliance with Rule 409.4 for the Fresno County APCD, Rule 410.4 for the Kings County APCD, Rule 410.4 for the Madera County APCD, Rule 409.4 for the Merced County APCD, Rule 409.4 for the San Joaquin County APCD, Rule 409.4 for the Stanislaus County APCD, and Rule 410.4 for the Tulare County APCD.

(ii) Kern County APCD. This section is rescinded entirely for metal parts and product coaters which are subject to and in full compliance with Rule 410.4.

(iii) Fresno County APCD.

(iv) San Joaquin County APCD.

(v) Madera County APCD.

(vi) Merced County APCD.

(2) In the following portions of the San Joaquin Valley Region, only the hourly emission limitations contained in paragraphs (b), (c), and (d) of this section and the architectural coatings and solvent disposal emission limitations contained in paragraphs (m) and (n) of this section are in effect; the following paragraphs, needed for interpretation and enforcement of these emission limitations, are also in effect: Paragraphs (e) through (l) and (o) through (q) of this section.

(i) Kings County APCD.

(3) In the following portions of the Sacramento Valley Region, this section is rescinded:

(i) Sacramento County APCD.

(ii) Yolo-Solano APCD.

(iii) Shasta County APCD.

(iv) Placer County APCD (Mountain Counties Air Basin portion).

(v) Yuba County APCD.

(vi) Sutter County APCD.

(vii) El Dorado County (Mountain Counties Air Basin portion).

(4) This section is rescinded for the San Francisco Bay Area Intrastate Region except for paragraph (d), which is retained until December 31, 1982 for sources constructed prior to October 2, 1974. The following paragraphs, needed for interpretation and enforcement of paragraph (d) are also in effect: Para-

graphs (e) through (l) and (o) through (q) of this section.

(5) In the following portions of the Sacramento Valley Intrastate Region, paragraph (m) of this section is rescinded.

(i) Butte County APCD.

(ii) Sutter County APCD.

(b) No person shall discharge into the atmosphere more than 15 pounds of organic materials in any 1 day or more than 3 pounds in any 1 hour from any article, machine, equipment, or other contrivance in which any organic solvent or any material containing organic solvent comes into contact with flame or is baked, heat-cured, or heat-polymerized in the presence of oxygen, unless said discharge has been reduced by at least 85 percent. Those portions of any series of articles, machines, equipment, or other contrivances designed for processing continuous web, strip, or wire that emit organic materials in the course of using operations described in this section shall be collectively subject to compliance with this section.

(c) A person shall not discharge to the atmosphere more than 40 pounds of organic materials in any 1 day or more than 8 pounds in any 1 hour from any article, machine, equipment, or other contrivance used under conditions other than those described in paragraph (b) of this section for employing or applying any photochemically reactive solvent, as defined in paragraph (k) of this section, or material containing such photochemically reactive solvent, unless said discharge has been reduced by at least 85 percent. Emissions of organic materials into the atmosphere resulting from air- or heated-drying of products for the first 12 hours after their removal from any article, machine, or other contrivance described in this section shall be included in determining compliance with this paragraph. Emissions resulting from baking, heat-curing, or heat-polymerizing as described in paragraph (b) of this section shall be excluded from determination of compliance with this section. Those portions of any series of articles, machines, equipment, or other contrivances designed for processing a continuous web, strip, or wire that emit organic materials in the course of

using operations described in this section shall be collectively subject to compliance with this section.

(d) A person shall not, after August 31, 1976, discharge into the atmosphere more than 3,000 pounds of organic materials in any 1 day or more than 450 pounds in any 1 hour from any article, machine, equipment, or other contrivance in which any non-photochemically reactive organic solvent or any material containing such a solvent is employed or applied, unless said discharge has been reduced by at least 85 percent. Emissions of organic materials into the atmosphere resulting from air- or heated-drying of products for the first 12 hours after their removal from any article, machine, equipment, or other contrivance described in this section shall be included in determining compliance with this section. Emissions resulting from baking, heat-curing, or heat-polymerizing as described in paragraph (b) of this section shall be excluded from determination of compliance with this section. Those portions of any series of articles, machines, equipment, or other contrivances designed for processing a continuous web, strip, or wire that emit organic materials in the course of using operations described in this section shall be collectively subject to compliance with this section.

(e) Emissions of organic materials to the atmosphere from the cleaning with photochemically reactive solvent, as defined in paragraph (k) of this section, of any article, machine, equipment, or other contrivance described in paragraph (b), (c), or (d) of this section, shall be included with the other emissions of organic materials for determining compliance with this rule.

(f) Emissions of organic materials into the atmosphere required to be controlled by paragraph (b), (c), or (d) of this section, shall be reduced by:

(1) Incineration, provided that 90 percent or more of the carbon in the organic material being incinerated is oxidized to carbon dioxide, or

(2) Adsorption, or

(3) Processing in a manner determined by the Administrator to be not less effective than the methods outlined in paragraph (f) (1) or (2) of this section.

(g) A person incinerating, adsorbing, or otherwise processing organic materials pursuant to this section shall provide, properly install and maintain in calibration, in good working order and in operation, devices as specified in the authority to construct or permit to operate, or as specified by the Administrator, for indicating temperatures, pressures, rates of flow, or other operating conditions necessary to determine the degree and effectiveness of air pollution control.

(h) Any person using organic solvents or any materials containing organic solvents shall supply the Administrator upon request and in the manner and form prescribed by him, written evidence of the chemical composition, physical properties, and amount consumed for each organic solvent used.

(i) The provisions of this section shall not apply to:

(1) The manufacture of organic solvents, or the transport or storage of organic solvents or materials containing organic solvents.

(2) The use of equipment for which other requirements are specified by rules or which are exempted from air pollution control requirements by applicable rules affecting the storage of petroleum products, effluent oil-water separators, and the transfer of gasoline.

(3) The spraying or other employment of insecticides, pesticides, or herbicides.

(4) The employment, application, evaporation, or drying of saturated halogenated hydrocarbons or perchloroethylene.

(5) The use of any material in any article, machine, equipment, or other contrivance described in paragraph (b), (c), (d), or (e) of this section, if:

(i) The volatile content of such materials consists only of water and organic solvent, and

(ii) The organic solvents comprise not more than 20 percent by volume of said volatile content, and

(iii) The volatile content is not photochemically reactive as defined in paragraph (k) of this section, and

(iv) The organic solvent or any material containing organic solvent does not come into contact with flame.

This last stipulation applies only for those articles, machines, equipment, or contrivances that are constructed or modified after the effective date of this section.

(6) The use of any material in any article, machine, equipment or other contrivance described in paragraph (b), (c), (d), or (e) of this section, if:

(i) The organic solvent content of such material does not exceed 30 percent by volume of said material; this to be effective until January 1, 1977. After January 1, 1977, the organic solvent content of such material must not exceed 20 percent by volume of said material.

(ii) The volatile content is not photochemically reactive as defined in paragraph (k) of this section, and

(iii) The organic solvent or any material containing organic solvent does not come into contact with flame. This last stipulation applies only for those articles, machines, equipment, or contrivances that are constructed or modified after the effective date of this section.

(j) For the purposes of this section, organic solvents include diluents, thinners, and reducers and are defined as organic materials that are liquids at standard conditions and are used as dissolvers, viscosity reducers, or cleaning agents, except that such materials exhibiting a boiling point higher than 220 °F at 0.5 millimeter mercury absolute pressure or having an equivalent vapor pressure shall not be considered to be solvents unless exposed to temperatures exceeding 220 °F.

(k) For the purpose of this section, a photochemically reactive solvent is any solvent with an aggregate of more than 20 percent of its total volume composed of the chemical compounds classified below or which exceeds any of the following individual percentage composition limitations, referred to the total volume of solvent:

(1) A combination of hydrocarbons, alcohols, aldehydes, esters, ethers, or ketones having an olefinic or cycloolefinic type of unsaturation; 5 percent;

(2) A combination of aromatic compounds with 8 or more carbon atoms to the molecule except ethylbenzene,

phenyl acetate, and methyl benzoate; 8 percent;

(3) A combination of ethylbenzene, ketones having branched hydrocarbon structures, trichloroethylene or toluene; 20 percent.

Whenever any organic solvent or any constituent of an organic solvent may be classified from its chemical structure into more than one of the above groups of organic compounds, it shall be considered as a member of the most reactive chemical group, that is, that group having the least allowable percent of the total volume of solvents.

(l) For the purpose of this section, organic materials are defined as chemical compounds of carbon excluding carbon monoxide, carbon dioxide, carbonic acid, metallic carbonates, and ammonium carbonate.

(m) Architectural coatings and their use shall conform to the following requirements, on or before January 1, 1975:

(1) A person shall not sell or offer for sale or use in the areas in which this section applies, in containers of 1-quart capacity or larger, any architectural coating containing photochemically reactive solvent, as defined in paragraph (k) of this section.

(2) A person shall not employ, apply, evaporate, or dry in the areas in which this section applies, any architectural coating purchased in containers of 1-quart capacity or larger containing photochemically reactive solvent, as defined in paragraph (k) of this section.

(3) A person shall not thin or dilute any architectural coating with a photochemically reactive solvent, as defined in paragraph (k) of this section.

(4) For the purpose of this section, an architectural coating is defined as a coating used for residential or commercial buildings and their appurtenances, or for industrial buildings.

(n) A person shall not during any one day dispose of a total of more than 1.5 gallons of any photochemically reactive solvent as defined in paragraph (k) of this section, or of any material containing more than 1.5 gallons of any such photochemically reactive solvent by any means that will permit the evaporation of such solvent into the atmosphere.

(o) *Compliance schedule.* (1) Except where other final compliance dates are provided in this section, the owner or operator of any stationary source subject to this section shall comply with this section on or before March 31, 1974. In any event:

(i) Any owner or operator in compliance with this section on the effective date of this section shall certify such compliance to the Administrator no later than 120 days following the effective date of this section.

(ii) Any owner or operator who achieves compliance with this section after the effective date of this section shall certify such compliance to the Administrator within 5 days of the date compliance is achieved.

(p) Any owner or operator of a stationary source subject to paragraph (o)(1) of this section may, not later than 120 days following the effective date of this section, submit to the Administrator for approval a proposed compliance schedule that demonstrates compliance with the provisions in paragraph (o)(1) of this section as expeditiously as practicable but no later than July 31, 1975. The compliance schedule shall provide for increments of progress toward compliance. The dates for achievement of such increments of progress shall be specified. Increments of progress shall include, but not be limited to:

Submittal of a final control plan to the Administrator; letting of necessary contracts for construction or process changes or issuance of orders for the purchase of component parts to accomplish emission control or process modification; initiation of onsite construction or installation of emission control equipment or process modification; completion of onsite construction or installation of emission control equipment or process modification and final compliance.

(q) Any owner or operator who submits a compliance schedule pursuant to this section shall, within 5 days after the deadline for each increment of progress, certify to the Administrator whether or not the required increment of the approved compliance schedule has been met.

[38 FR 31249, Nov. 12, 1973]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.254, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

§ 52.255 Gasoline transfer vapor control.

(a) "Gasoline" means any petroleum distillate having a Reid vapor pressure of 4 pounds or greater.

(b) This section is applicable in the Metropolitan Los Angeles and Sacramento Valley Intrastate Air Quality Control Regions, as described in 40 CFR part 81, dated July 1, 1979, with the following exceptions:

(1) The control requirements of this section are limited to facilities with a total throughput less than 20,000 gallons per day, the refilling of delivery vessels at these facilities, and storage containers serviced by these facilities for those air pollution control districts identified below.

(i) Ventura County APCD.

(2) The control requirements of this section are rescinded in the following air pollution control districts.

(i) South Coast AQMD.

(ii) Santa Barbara County APCD.

(iii) Placer County APCD (Mountain Counties Air Basin portion).

(iv) Sacramento County APCD.

(v) Yolo-Solano County APCD.

(vi) Butte County APCD.

(vii) Glenn County APCD.

(viii) El Dorado County APCD (Mountain Counties Air Basin portion).

(3) The control requirements of this section are rescinded in the following air pollution control districts:

(i) South Coast AQMD.

(ii)-(viii) [Reserved]

(ix) Santa Barbara County APCD.

(x) Placer County APCD (Mountain Counties Air Basin portion).

(xi) Sacramento County APCD.

(xii) Yolo-Solano County APCD.

(xiii) Butte County APCD.

(xiv) Glenn County APCD.

(c) No person shall transfer gasoline from any delivery vessel into any stationary storage container with a capacity greater than 250 gallons unless such container is equipped with a submerged fill pipe and unless the displaced vapors from the storage container are processed by a system that prevents release to the atmosphere of no less than

§ 52.255

40 CFR Ch. I (7-1-25 Edition)

90 percent by weight of organic compounds in said vapors displaced from the stationary container location.

(1) The vapor recovery portion of the system shall include one or more of the following:

(i) A vapor-tight return line from the storage container to the delivery vessel and a system that will ensure that the vapor return line is connected before gasoline can be transferred into the container.

(ii) Refrigeration-condensation system or equivalent designed to recover no less than 90 percent by weight of the organic compounds in the displaced vapor.

(2) If a "vapor-tight vapor return" system is used to meet the requirements of this section, the system shall be so constructed as to be readily adapted to retrofit with an adsorption system, refrigeration-condensation system, or equivalent vapor removal system, and so constructed as to anticipate compliance with § 52.256.

(3) The vapor-laden delivery vessel shall be subject to the following conditions:

(i) The delivery vessel must be so designed and maintained as to be vapor-tight at all times.

(ii) The vapor-laden delivery vessel may be refilled only at facilities equipped with a vapor recovery system or the equivalent, which can recover at least 90 percent by weight of the organic compounds in the vapors displaced from the delivery vessel during refilling.

(iii) Facilities that do not have more than a 20,000 gallon per day throughput, and distribute less than 10% of daily volume to delivery vehicles that in turn service storage tanks that are required to have a vapor return or balance system, will not be required to comply with the provisions of paragraph (c) of this section before May 31, 1977. Facilities that service delivery vehicles that in turn deliver not more than 500,000 gallons per year to storage tanks that are required to comply with the provisions of paragraph (c) of this section will not be required to comply with the provisions of paragraph (c) of this section before January 1, 1977. Facilities that exclusively service storage tanks that do not have a required

vapor return or balance system, will not be required to have a vapor recovery system.

(iv) Gasoline storage compartments of 1,000 gallons or less in gasoline delivery vehicles presently in use on the promulgation date of this regulation will not be required to be retrofitted with a vapor return system until May 31, 1977.

(v) Storage containers served by delivery vessels filled at distribution facilities with extended compliance dates will not be required to comply with the provisions of paragraph (c) of this section until May 31, 1977.

(d) The provisions of paragraph (c) of this section shall not apply to the following:

(1) Storage containers used primarily for the fueling of implements of husbandry, if such container is equipped by May 31, 1977 with a permanent submerged fill pipe, or at the time of installation for containers installed after this date.

(2) Any storage container having a capacity of 2,000 gallons or less and installed prior to July 1, 1975, if such container is equipped with a permanent submerged fill pipe by May 31, 1977.

(3) Transfer made to storage tanks equipped with floating roofs or their equivalent.

(4) Storage containers installed after July 1, 1975 in Kings County.

(5) Storage containers installed after January 1, 1975 in Madera County.

(e) Compliance schedule:

(1) June 1, 1974—Submit to the Administrator a final control plan, which describes at a minimum the steps that will be taken by the source to achieve compliance with the provisions of paragraph (c) of this section.

(2) March 1, 1975—Negotiate and sign all necessary contracts for emission control systems, or issue orders for the purchase of component parts to accomplish emission control.

(3) May 1, 1975—Initiate on-site construction or installation of emission control equipment.

(4) February 1, 1976—Complete on-site construction or installation of emission control equipment.

(5) July 1, 1976—Assure final compliance with the provisions of paragraph (c) of this section.

(6) Any owner or operator of sources subject to the compliance schedule in this paragraph shall certify to the Administrator, within 5 days after the deadline for each increment of progress, whether or not the required increment of progress has been met.

(f) Paragraph (e) of this section shall not apply:

(1) To a source which is presently in compliance with the provisions of paragraph (c) of this section and which has certified such compliance to the Administrator by June 1, 1974. The Administrator may request whatever supporting information he considers necessary for proper certification.

(2) To a source for which a compliance schedule is adopted by the State and approved by the Administrator.

(3) To a source whose owner or operator submits to the Administrator, by June 1, 1974, a proposed alternative schedule. No such schedule may provide for compliance after March 1, 1976. If promulgated by the Administrator, such schedule shall satisfy the requirements of this section for the affected source.

(g) Nothing in this section shall preclude the Administrator from promulgating a separate schedule for any source to which the application of the compliance schedule in paragraph (e) of this section fails to satisfy the requirements of §§ 51.261 and 51.262(a) of this chapter.

(h) Any gasoline-dispensing facility subject to this section that installs a storage tank after the effective date of this section shall comply with the requirements of paragraph (c) of this section by March 1, 1976 and prior to that date shall comply with paragraph (e) of this section as far as possible. Any facility subject to this section that installs a storage tank after March 1, 1976, shall comply with the requirements of paragraph (c) of this section at the time of installation.

[38 FR 31251, Nov. 12, 1973]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.255, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

§ 52.256 Control of evaporative losses from the filling of vehicular tanks.

(a) "Gasoline" means any petroleum distillate having a Reid vapor pressure of 4 pounds or greater.

(b) This section is applicable in the Metropolitan Los Angeles and Sacramento Valley Intrastate Air Quality Control Regions, except as follows:

(1) In the following portions of the Metropolitan Los Angeles Intrastate Region, this section is rescinded.

(i) South Coast AQMD.

(ii) Santa Barbara County APCD.

(2) In the following portions of the San Joaquin Valley Intrastate Region, this section is rescinded.

(i) Kings County APCD.

(3) In the following portion of the Sacramento Valley Intrastate Region, this section is rescinded.

(i) Sacramento County APCD.

(ii) El Dorado County APCD (Mountain Counties Air Basin portion).

(iii) Placer County APCD (Mountain Counties Air Basin portion).

(c) A person shall not transfer gasoline to an automotive fuel tank from a gasoline dispensing system unless the transfer is made through a fill nozzle designed to:

(1) Prevent discharge of hydrocarbon vapors to the atmosphere from either the vehicle filler neck or dispensing nozzle;

(2) Direct vapor displaced from the automotive fuel tank to a system wherein at least 90 percent by weight of the organic compounds in displaced vapors are recovered; and

(3) Prevent automotive fuel tank overfills or spillage on fill nozzle disconnect.

(d) The system referred to in paragraph (c) of this section can consist of a vapor-tight vapor return line from the fill nozzle/filler neck interface to the dispensing tank or to an adsorption, absorption, incineration, refrigeration-condensation system or its equivalent.

(e) Components of the systems required by paragraph (c) of § 52.255 can be used for compliance with paragraph (c) of this section.

(f) If it is demonstrated to the satisfaction of the Administrator that it is impractical to comply with the provisions of paragraph (c) of this section as

a result of vehicle fill neck configuration, location, or other design features for a class of vehicles, the provisions of this paragraph shall not apply to such vehicles. However, in no case shall such configuration exempt any gasoline dispensing facility from installing and using in the most effective manner a system required by paragraph (c) of this section.

(g) Compliance schedule:

(1) January 1, 1975—Submit to the Administrator a final control plan, which describes at a minimum the steps that will be taken by the source to achieve compliance with the provisions of paragraph (c) of this section.

(2) March 1, 1975—Negotiate and sign all necessary contracts for emission control systems, or issue orders for the purchase of component parts to accomplish emission control.

(3) May 1, 1975—Initiate on-site construction or installation of emission control equipment. Compliance with the requirements of paragraph (c) of this section shall be as soon as practicable, but no later than specified in paragraphs (g) (4) and (5) of this section.

(4) May 1, 1977—Complete on-site construction or installation of emission control equipment or process modification.

(5) May 31, 1977—Assure final compliance with the provisions of paragraph (c) of this section.

(6) Any owner or operator of sources subject to the compliance schedule in this paragraph (g) shall certify to the Administrator, within 5 days after the deadline for each increment of progress, whether or not the required increment of progress has been met.

(h) Paragraph (g) of this section shall not apply:

(1) To a source which is presently in compliance with the provisions of paragraph (c) of this section and which has certified such compliance to the Administrator by January 1, 1975. The Administrator may request whatever supporting information he considers necessary for proper certification.

(2) To a source for which a compliance schedule is adopted by the State and approved by the Administrator.

(3) To a source whose owner or operator submits to the Administrator, by June 1, 1974, a proposed alternative

schedule. No such schedule may provide for compliance after May 31, 1977. If promulgated by the Administrator, such schedule shall satisfy the requirements of this section for the affected source.

(i) Nothing in this section shall preclude the Administrator from promulgating a separate schedule for any source to which the application of the compliance schedule in paragraph (g) of this section fails to satisfy the requirements of §§ 51.261 and 51.262(a) of this chapter.

(j) Any gasoline dispensing facility subject to this section that installs a gasoline dispensing system after the effective date of this section shall comply with the requirements of paragraph (c) of this section by May 31, 1977, and prior to that date shall comply with paragraph (g) of this section as far as possible. Any facility subject to this section that installs a gasoline dispensing system after May 31, 1977, shall comply with the requirements of paragraph (c) of this section at the time of installation.

[38 FR 31251, Nov. 12, 1973, as amended at 39 FR 4881, Feb. 8, 1974; 39 FR 21053, June 18, 1974; 46 FR 5979, Jan. 21, 1981; 46 FR 60203, Dec. 9, 1981; 47 FR 19332, May 5, 1982; 47 FR 19698, May 7, 1982; 47 FR 28622, July 1, 1982; 47 FR 29538, July 7, 1982; 51 FR 40676, Nov. 7, 1986]

§§ 52.257–52.262 [Reserved]

§ 52.263 Priority treatment for buses and carpools—Los Angeles Region.

(a) *Definitions:*

(1) “Carpool” means a vehicle containing three or more persons.

(2) “Bus/carpool lane” means a lane on a street or highway open only to buses (or to buses and carpools), whether constructed especially for that purpose or converted from existing lanes.

(3) “Preferential treatment” for any class of vehicles, means either the setting aside of one traffic lane for the exclusive use of such vehicles or other measures (for example, access metering or setting aside the entire street), which the Administrator finds would be at least equal in VMT reduction effect to the establishment of such a lane.

(b) This regulation is applicable in the Metropolitan Los Angeles Intra-state Air Quality Control Region (the "Region").

(c) On or before May 31, 1974, the State of California, through the State Department of Transportation or through other agencies to which legal authority has been delegated, shall establish the following system of bus/carpool lanes.

(1) Ventura/Hollywood Corridor—a concurrent flow exclusive bus/carpool lane from Topanga Canyon Boulevard, Woodland Hills (U.S. 101) to junction of the Hollywood Freeway, and contraflow on the Hollywood Freeway (U.S. 101) from the junction with Ventura Freeway in North Hollywood to Vermont Avenue, and bus preferential treatment on arterial surface streets from Vermont Avenue to the Los Angeles central business district (CBD).

(2) Harbor Freeway Corridor—contraflow on Harbor Freeway (California 11) from vicinity of Pacific Coast Highway, in Wilmington, to junction of Santa Monica Freeway (I-10), then by surface street preferential treatment to LA/CBD.

(3) Wilshire Corridor—surface street preferential bus treatment from vicinity of San Vincente Boulevard, to LA/CBD.

(4) San Bernardino Freeway Corridor—Bus/carpool lane, either contraflow, or concurrent flow on San Bernardino Freeway from El Monte terminus of existing San Bernardino Freeway bus lane (I-10), to vicinity of Ontario Airport.

(5) Priority Treatment in CBD—provide preferential treatment in CBD on surface streets to connect Wilshire and San Bernardino corridors.

(d) On or before May 31, 1976, the State of California, through the State Department of Transportation or other agencies to which legal authority has been delegated, shall establish the following system of bus and bus/carpool lanes:

(1) Contraflow lane on the Golden State Freeway (I-5) from junction of Ventura Freeway (California 134) in Los Angeles to San Bernardino Freeway (I-10).

(2) Contraflow on Pasadena Freeway (California 11) from terminus in City of

Pasadena to Hollywood Freeway (U.S. 101).

(3) Contraflow on Pomona Freeway from San Gabriel Freeway (I-605) to Santa Ana Freeway (I-5).

(4) Concurrent flow in San Diego Freeway (I-405) from Ventura Freeway (U.S. 101) in Sherman Oaks to Newport Freeway (California 55), Costa Mesa.

(5) Concurrent flow on Long Beach Freeway (California 7) from Santa Ana Freeway (I-5), City of Commerce to San Diego Freeway (I-405), Long Beach.

(6) Artesia Freeway (California 91) from Santa Ana Freeway (I-5) to Long Beach Freeway (California 7), Long Beach.

(e) State III will include specific routes in other portions of the Region.

(f) On or before December 31, 1973, the State of California shall submit to the Administrator a compliance schedule showing the steps it will take to establish the system of bus/carpool lanes required by paragraphs (c) and (d) of this section, with each schedule to include the following:

(1) A schedule for the establishment of the lanes. The schedule for the lanes required by paragraph (d) of this section shall provide for the first such lane to be set aside no later than June 1, 1974.

(2) Bus/carpool lanes must be prominently indicated by overhead signs at appropriate intervals and at each intersection of entry ramps.

(3) Bus/carpool lanes must be prominently indicated by distinctive painted, pylon, or physical barriers.

(4) Vehicles using a bus/carpool lane shall have the right of way when crossing other portions of the road to enter or leave such lanes.

(5) At a minimum, the bus/carpool lanes so set aside shall operate from 6:30 a.m. to 9:30 a.m. and from 3:30 to 6:30 a.m. each weekday.

(g) No deviation from the system of bus/carpool lanes required under paragraphs (c) and (d) of this section shall be permitted except upon application made by the State of California to the Administrator at the time of submittal of compliance schedules and approved

by him, which application must contain a satisfactory designation of alternate routes for the establishment of such lanes.

[38 FR 31254, Nov. 12, 1973]

§§ 52.264–52.268 [Reserved]

§ 52.269 Control strategy and regulations: Photochemical oxidants (hydrocarbons) and carbon monoxide.

(a) The requirements of subpart G of this chapter are not met because the plan does not provide for attainment and maintenance of the national standards for photochemical oxidants (hydrocarbons) and carbon monoxide in the San Francisco Bay Area, San Diego, Sacramento Valley, San Joaquin Valley, and Southeast Desert Intrastate Regions by May 31, 1975.

(b) The following regulatory changes represent a relaxation of previously submitted regulations, and an adequate control strategy demonstration has not been submitted showing that the relaxation would not interfere with the attainment and maintenance of the national standards for photochemical oxidants.

(1) Mountain Counties Intrastate Region.

(i) Calaveras County APCD.

(A) The revocation of Rule 412, Organic Liquid Loading, is disapproved. Rule 412 submitted on June 30, 1972 and previously approved in 40 CFR 52.223 is retained.

(B) The revocation of Rule 413, Effluent Oil Water Separators, is disapproved; and Rule 413 submitted on June 30, 1972 and previously approved in 40 CFR 52.223 is retained.

(ii) Tuolumne County APCD.

(A) The revocation of Rule 413, Organic Liquid Loading, is disapproved; and Rule 413 submitted on June 30, 1972 and previously approved in 40 CFR 52.223 is retained.

(B) The revocation of Rule 414, Effluent Oil Water Separators, is disapproved; and Rule 414 submitted on June 30, 1972 and previously approved in 40 CFR 52.223 is retained.

(C) The revocation of Rule 413, Organic Liquid Loadings, submitted February 10, 1977, is disapproved; and the previously approved Rule 413 submitted on June 30, 1972 remains in effect.

(D) The revocation of Rule 414, Effluent Oil Water Separators, submitted on February 10, 1977, is disapproved; and the previously approved Rule 414 submitted on June 30, 1972, remains in effect.

(1–1) San Joaquin Valley Intrastate Region.

(i) Stanislaus County APCD.

(A) Rule 411.1, submitted on November 4, 1977, is disapproved. Rule 411.1 submitted on April 21, 1976 remains in effect.

(ii) Merced County APCD.

(A) Rule 411.1, submitted on November 4, 1977, is disapproved. Rule 411.1, submitted on August 2, 1976, remains in effect.

(iii) Fresno County APCD.

(A) Rules 411.1, Gasoline Transfer Into Vehicle Fuel Tanks, submitted on November 4, 1977, is disapproved; and Rule 411.1 submitted on April 21, 1976, and previously approved under 40 CFR 52.223, is retained.

(iv) Tulare County APCD.

(A) Section 412.1, Transfer of Gasoline Into Vehicle Fuel Tanks, submitted on October 13, 1977, is disapproved; and Section 412.1, submitted on April 21, 1976, and previously approved under 40 CFR 52.223, is retained.

(v) Madera County APCD.

(A) Rule 412.1, Transfer of Gasoline Into Stationary Storage Containers, submitted on October 13, 1977, is disapproved; and Rules 411, Gasoline Storage and 411.1, Transfer of Gasoline Into Stationary Storage Containers, submitted on June 30, 1972, and April 10, 1976, respectively, and previously approved under 40 CFR 52.223 are retained.

(vi) San Joaquin County APCD.

(A) Rule 411.2, Transfer of Gasoline Into Vehicle Fuel Tanks, submitted on November 4, 1977, is disapproved; and rule 411.2, submitted on February 10, 1976 and previously approved under 40 CFR 52.223, is retained.

(2) Sacramento Valley intrastate region:

(i) Sacramento County APCD.

(A) Rule 13 submitted on November 4, 1977, is disapproved.

(ii) Placer County APCD.

(A) Rule 218, Architectural Coatings, adopted on May 20, 1985 and submitted

Environmental Protection Agency

§ 52.270

to EPA on February 10, 1986 is disapproved. The version of this rule by the same number and title submitted on July 19, 1983 and approved by EPA on May 3, 1984 is retained.

(iii) Sutter County APCD.

(A) Rule 3.15, Architectural Coatings, adopted on October 15, 1985 and submitted to EPA on February 10, 1986 is disapproved. The version of this rule by the same number and title submitted on January 1, 1981 and approved by EPA on May 3, 1982 is retained.

(3) Southeast Desert Intrastate AQCR.

(i) Los Angeles County APCD.

(A) Regulation IV, rule 465, Vacuum Producing Devices or Systems, submitted on June 6, 1977, is disapproved. Rule 74 with the same title, submitted on June 6, 1977, is disapproved. Rule 69 with the same title, submitted on June 30, 1972 and approved under 40 CFR 52.223, is retained.

(ii) Riverside County APCD.

(A) Regulation IV, rule 465, Vacuum Producing Devices or Systems, submitted on June 6, 1977, is disapproved. Rule 74 with the same title, submitted on June 30, 1972 and approved under 40 CFR 52.223, is retained.

(B) Rule 461, Gasoline Transfer and Dispensing, submitted November 4, 1977, is disapproved. The version of this rule submitted on April 21, 1977 (same number and title), which was previously approved in 40 CFR 52.223, is retained.

(iii) Antelope Valley APCD.

(A) Rule 461, Gasoline Transfer and Dispensing, submitted on May 13, 1999, is disapproved. The version of this rule submitted on January 31, 1996 (same title and number), which was previously approved in 40 CFR 52.220, is retained.

(4) Great Basin Valleys Intrastate Region.

(i) Great Basin Unified APCD.

(A) Rule 418 submitted on November 4, 1977, is disapproved. Rule 418 submitted on April 21, 1976 remains in effect.

(B) Rule 419, Gasoline Loading into Stationary Tanks, submitted on June 22, 1978, is disapproved, and rule 419, submitted April 21, 1976, and previously approved in 40 CFR 52.223, is retained.

(c) The following rules and regulations are disapproved because they represent a relaxation of promulgated EPA regulations, and an adequate control strategy demonstration has not been submitted showing that the relaxation would not interfere with the attainment and maintenance of the national standards for photochemical oxidants:

(1) Sacramento Valley Intrastate AQCR.

(i) Yolo-Solano APCD.

(A) Rules 2.21(b)(1), 2.21(b)(2), 2.21(b)(4), 2.21(b)(5) and 2.21(b)(6), submitted on June 6, 1977.

(d) Imperial County APCD Rule 415, Gasoline Loading from Tank Trucks and Trailers, submitted by the State on November 4, 1977 is approved as applicable to facilities installed after July 1, 1977. District Rule 125, Gasoline Loading into Tank Trucks and Trailers and Rule 129, Gasoline loading into Tanks, submitted on February 21, 1972 and previously approved under 40 CFR 52.223 are retained as part of the State implementation plan, as applicable to facilities installed prior to July 1, 1977.

(e) The emission reduction credits for the following control measures contained in Ventura County's 1982 Ozone nonattainment area plan, submitted by the Governor's designee on December 31, 1982, are disapproved since the control measures are of an intermittent and voluntary nature and are therefore not approvable under Sections 110(a)(2)(F)(v) and 123 of the Clean Air Act: R-38/N-16, "No Use Day"; R-39/N-17, "No Drive Day"; R-40, "No Spray Day"; R-41/N-18 "Stationary Source Curtailments."

[38 FR 16564, June 22, 1973. Redesignated at 40 FR 3767, Jan. 24, 1975]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.269, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

§ 52.270 Significant deterioration of air quality.

(a) With the exception of the areas listed in paragraph (b) of this section:

(1) The requirements of Sections 160 through 165 of the Clean Air Act are not met in California.

§ 52.270

40 CFR Ch. I (7–1–25 Edition)

(2) The plan does not include approvable procedures for preventing the significant deterioration of air quality.

(3) The provisions of § 52.21 except paragraph (a)(1) are hereby incorporated and made a part of the applicable State plan for the State of California.

(b) *District PSD Plans.* (1) The PSD rules for Sacramento County Air Pollution Control District are approved under Part C, Subpart 1, of the Clean Air Act. However, EPA is retaining authority to apply § 52.21 in certain cases. The provisions of § 52.21 except paragraph (a)(1) are therefore incorporated and made a part of the State plan for California for the Sacramento County Air Pollution Control District for:

(i) Those cogeneration and resource recovery projects which are major stationary sources or major modifications under § 52.21 and which would cause violations of PSD increments.

(ii) Those projects which are major stationary sources or major modifications under § 52.21 and which would either have stacks taller than 65 meters or would use “dispersion techniques” as defined in § 51.1.

(iii) Sources for which EPA has issued permits under § 52.21, including the following permit and any others for which applications are received by June 19, 1985.

Procter & Gamble, SAC 83–01, 5/6/83.

(2) The PSD rules for North Coast Unified Air Quality Management District are approved under Part C, Subpart 1, of the Clean Air Act. However, EPA is retaining authority to apply § 52.21 in certain cases. The provisions of § 52.21 except paragraph (a)(1) are therefore incorporated and made a part of the State plan for California for the North Coast Unified Air Quality Management District for:

(i) Those cogeneration and resource recovery projects which are major stationary sources or major modifications under § 52.21 and which would cause violations of PSD increments.

(ii) Those projects which are major stationary sources of major modifications under § 52.21 and which would either have stacks taller than 65 meters or would use “dispersion techniques” as defined in § 51.1.

(iii) Sources for which EPA has issued permits under § 52.21, including the following permits and any others for which applications are received by July 31, 1985;

(A) Arcata Lumber Co. (NC 78–01; November 8, 1979),

(B) Northcoast Paving (NC 79–03; July 5, 1979),

(C) PG&E Buhne Pt. (NC 77–05).

(iv) Those projects which are major stationary sources or major modifications for nitrogen oxides as precursors to ozone under § 52.21.

(v) Those projects that are major stationary sources or major modifications for emissions of PM_{2.5} or its precursors under § 52.21, and those projects that are major stationary sources under § 52.21 with the potential to emit PM_{2.5} or its precursors at a rate that would meet or exceed the rates specified at § 52.21(b)(23)(i).

(3) The PSD program for Mendocino County Air Quality Management District, as incorporated by reference in § 52.220(c)(489) and (c)(555) is approved under Part C, Subpart 1, of the Clean Air Act. However, EPA is retaining authority to apply § 52.21 in certain cases. The provisions of § 52.21 except for paragraph (a)(1) are therefore incorporated and made a part of the State plan for California for the Mendocino County Air Quality Management District for:

(i) Those cogeneration and resource recovery projects which are major stationary sources or major modifications under § 52.21 and which would cause violations of PSD increments.

(ii) Those projects which are major stationary sources or major modifications under § 52.21 and which would either have stacks taller than 65 meters or would use “dispersion techniques” as defined in § 51.1.

(iii) Any sources for which EPA has issued permits under § 52.21, including any permits for which applications are received by July 31, 1985.

(4) The PSD program for Northern Sonoma County Air Pollution Control District, as incorporated by reference in § 52.220(c)(481) is approved under Part C, Subpart 1, of the Clean Air Act. The provisions of § 52.21 except paragraph (a)(1) are therefore incorporated and

made a part of the State plan for California for the Northern Sonoma County Air Pollution Control District for:

(i) Those cogeneration and resource recovery projects which are major stationary sources or major modifications under § 52.21 and which would cause violations of PSD increments.

(ii) Those projects which are major stationary sources or major modifications under § 52.21 and which would either have stacks taller than 65 meters or would use “dispersion techniques” as defined in § 51.1.

(iii) Any sources for which EPA has issued permits under § 52.21, including any permits for which applications are received by July 31, 1985.

(5) Rule 2410, “Prevention of Significant Deterioration,” adopted on June 16, 2011, for the San Joaquin Valley Unified Air Pollution Control District (SJVUAPCD) is approved under Part C, Subpart 1, of the Clean Air Act, based, in part, on the clarifications provided in a May 18, 2012 letter from the San Joaquin Valley Unified Air Pollution Control District described in § 52.220(c)(415). For PSD permits previously issued by EPA pursuant to § 52.21 to sources located in the SJVUAPCD, this approval includes the authority for the SJVUAPCD to conduct general administration of these existing permits, authority to process and issue any and all subsequent permit actions relating to such permits, and authority to enforce such permits, except for:

(i) Those specific sources within the SJVUAPCD that have submitted PSD permit applications to EPA and for which EPA has issued a proposed PSD permit decision, but for which final agency action and/or the exhaustion of all administrative and judicial appeals processes (including any associated remand actions) have not yet been concluded or completed by November 26, 2012. The SJVUAPCD will assume full responsibility for the administration and implementation of such PSD permits immediately upon notification from EPA to the SJVUAPCD that any and all administrative and judicial appeals processes (and any associated remand actions) have been completed or concluded for any such permit decision. Prior to the date of such notification,

EPA is retaining authority to apply § 52.21 for such permit decisions, and the provisions of § 52.21, except paragraph (a)(1), are therefore incorporated and made a part of the State plan for California for the SJVUAPCD for such permit decisions during the identified time period.

(ii) [Reserved]

(6) The PSD program for the Placer County Air Pollution Control District (PCAPCD), as incorporated by reference in § 52.220(c)(497)(i)(B)(2), is approved under part C, subpart 1, of the Clean Air Act. For PSD permits previously issued by EPA pursuant to § 52.21 to sources located in the PCAPCD, this approval includes the authority for the PCAPCD to conduct general administration of these existing permits, authority to process and issue any and all subsequent permit actions relating to such permits, and authority to enforce such permits.

(7) The PSD program for the Imperial County Air Pollution Control District, as incorporated by reference in § 52.220(c)(411), is approved under part C, Subpart 1, of the Clean Air Act.

(8) The PSD program for the Eastern Kern Air Pollution Control District (EKAPCD), as incorporated by reference in § 52.220(c)(419), is approved under part C, Subpart 1, of the Clean Air Act. For PSD permits previously issued by EPA pursuant to § 52.21 to sources located in the EKAPCD, this approval includes the authority for the EKAPCD to conduct general administration of these existing permits, authority to process and issue any and all subsequent permit actions relating to such permits, and authority to enforce such permits.

(9) The PSD program for the Yolo-Solano Air Quality Management District, as incorporated by reference in § 52.220(c)(420), is approved under part C, Subpart 1, of the Clean Air Act.

(10) The PSD program for greenhouse gases (GHGs) in Rule 1714 for the South Coast Air Quality Management District (SCAQMD), as incorporated by reference in § 52.220(c)(421), is approved under part C, Subpart 1, of the Clean Air Act. This approval is limited to sources subject to the PSD program for GHGs. The provisions of § 52.21 (except paragraph (a)(1)) continue to apply to

the SCAQMD for all pollutants subject to regulation, as defined in § 52.21, except for GHGs.

(11) The PSD program for the Great Basin Unified Air Pollution Control District (GBUAPCD), as incorporated by reference in § 52.220(c)(428), is approved under Part C, Subpart 1, of the Clean Air Act. For PSD permits previously issued by EPA pursuant to § 52.21 to sources located in the GBUAPCD, this approval includes the authority for the GBUAPCD to conduct general administration of these existing permits, authority to process and issue any and all subsequent permit actions relating to such permits, and authority to enforce such permits.

(12) The PSD program for the Butte County Air Quality Management District (BCAQMD), as incorporated by reference in § 52.220(c)(428), is approved under Part C, Subpart 1, of the Clean Air Act. For PSD permits previously issued by EPA pursuant to § 52.21 to sources located in the BCAQMD, this approval includes the authority for the BCAQMD to conduct general administration of these existing permits, authority to process and issue any and all subsequent permit actions relating to such permits, and authority to enforce such permits.

(13) The PSD program for the Feather River Air Quality Management District (FRAQMD), as incorporated by reference in § 52.220(c)(429), is approved under Part C, Subpart 1, of the Clean Air Act. For PSD permits previously issued by EPA pursuant to § 52.21 to sources located in the FRAQMD, this approval includes the authority for the FRAQMD to conduct general administration of these existing permits, authority to process and issue any and all subsequent permit actions relating to such permits, and authority to enforce such permits.

(14) The PSD program for the San Luis Obispo County Air Pollution Control District (SLOAPCD), as incorporated by reference in § 52.220(c)(441), is approved under Part C, Subpart 1, of the Clean Air Act.

(15) The PSD program for the Santa Barbara County Air Pollution Control District (SBAPCD), as incorporated by reference in § 52.220(c)(442), is approved under Part C, Subpart 1, of the Clean

Air Act. For PSD permits previously issued by EPA pursuant to § 52.21 to sources located in the SBAPCD, this approval includes the authority for the SBAPCD to conduct general administration of these existing permits, authority to process and issue any and all subsequent permit actions relating to such permits, and authority to enforce such permits.

(16) The PSD program for the Bay Area Air Quality Management District (BAAQMD), as incorporated by reference in § 52.220(c)(429)(i)(E)(2), is approved under part C, subpart 1, of the Clean Air Act. For PSD permits previously issued by EPA pursuant to § 52.21 to sources located in the BAAQMD, this approval includes the authority for the BAAQMD to conduct general administration of these existing permits, authority to process and issue any and all subsequent permit actions relating to such permits, and authority to enforce such permits.

(17) The PSD program for the Ventura County Air Pollution Control District (VCAPCD), as incorporated by reference in § 52.220(c)(474)(i)(D)(I), is approved under part C, subpart 1, of the Clean Air Act. For PSD permits previously issued by EPA pursuant to § 52.21 to sources located in the VCAPCD, this approval includes the authority for the VCAPCD to conduct general administration of these existing permits, authority to process and issue any and all subsequent permit actions relating to such permits, and authority to enforce such permits.

[50 FR 25419, June 19, 1985, as amended at 50 FR 30943, July 31, 1985; 68 FR 11322, Mar. 10, 2003; 68 FR 74488, Dec. 24, 2003; 76 FR 48008, Aug. 8, 2011; 77 FR 65310, Oct. 26, 2012; 77 FR 73322, Dec. 10, 2012; 77 FR 73320, Dec. 10, 2012; 80 FR 69882, Nov. 12, 2015; 81 FR 50342, Aug. 1, 2016; 81 FR 69392, Oct. 6, 2016; 82 FR 13245, Mar. 10, 2017; 82 FR 14611, Mar. 22, 2017; 82 FR 30773, July 3, 2017; 83 FR 43766, Aug. 28, 2018; 86 FR 33541, June 25, 2021]

§ 52.271 Malfunction, startup, and shutdown regulations.

(a) The following regulations are disapproved because they would permit the exemption of sources from the applicable emission limitations and therefore do not satisfy the enforcement imperatives of section 110 of the Clean Air Act.

Environmental Protection Agency

§ 52.271

- (1) Amador County APCD.
 - (i) Rule 404, submitted on April 21, 1976.
 - (ii) Rule 4f, submitted on June 30, 1972, and previously approved under 40 CFR 52.223 (37 FR 19812).
- (2) Bay Area APCD.
 - (i) Regulation 2, Section 3212, and Regulation 3, Section 3203, submitted on April 21, 1976.
 - (ii) Regulation 2, Section 3212, submitted on February 21, 1972, and previously approved under 40 CFR 52.223 (37 FR 10842).
- (3) Calaveras County APCD.
 - (i) Rules 110 and 402(f), submitted on July 25, 1973.
 - (ii) Rule 404, submitted on October 13, 1977.
- (4) Colusa County APCD.
 - (i) Rule 4.4g, submitted on July 25, 1973, and Rule 4.4g, submitted on June 30, 1972, and previously approved under 40 CFR 52.223 (37 FR 19812).
- (5) Del Norte County APCD.
 - (i) Rule 540, submitted on November 10, 1976.
 - (ii) Rule 45, submitted on February 21, 1972, and previously approved under 40 CFR 52.223 (37 FR 10842).
- (6) Fresno County APCD.
 - (i) Rule 110, submitted on June 30, 1972, and previously approved under 40 CFR 52.223.
 - (ii) Rules 110 and 402(f), submitted on October 23, 1974.
- (7) Glenn County APCD.
 - (i) Rules 95.2 and 95.3, submitted on January 10, 1975.
- (8) Great Basin Unified APCD.
 - (i) Rule 403, submitted on June 6, 1977.
 - (ii) Rule 617, submitted on November 4, 1977.
- (9) Humboldt County APCD.
 - (i) Rule 540, Submitted on November, 10, 1976.
 - (ii) Rule 59, Submitted on February 21, 1972 and previously approved under 40 CFR 52.223 (37 FR 10842).
- (10) Kern County APCD.
 - (i) Rule 111, submitted on July 19, 1974.
 - (ii) Rule 111, submitted on July 25, 1973, and Rule 111, submitted on July 30, 1972, and previously approved under 40 CFR 52.223.
- (11) Kings County APDC.
 - (i) Rule 111, submitted on July 25, 1973, and Rule 111, submitted on July 30, 1972, and previously approved under 40 CFR 52.223.
- (12) Lake County APCD.
 - (i) Chapter III, Article I, Section 500, and Article II, Sections 510 and 511, submitted on February 10, 1977.
 - (ii) Part VI, Sections 1 and 2, submitted on June 30, 1972, and previously approved under 40 CFR 52.223.
- (13) Los Angeles County APCD.
 - (i) Rule 430, submitted on June 6, 1977.
- (14) Madera County APCD.
 - (i) Rule 402(f), submitted on January 10, 1975, and Rule 110, submitted on June 30, 1972, and previously approved under 40 CFR 52.223.
 - (ii) Rule 110, submitted on January 10, 1975.
- (15) Mariposa County APCD.
 - (i) Rule 203(j), submitted on January 10, 1975, and Rule 4.3(g), submitted on February 21, 1972, and previously approved under 40 CFR 52.223.
 - (ii) Rule 404, submitted on June 6, 1977.
- (16) Mendocino County APCD.
 - (i) Rule 540, submitted on November 10, 1976.
 - (ii) Sections 1 and 2 of Part VI, submitted on February 21, 1972, and previously approved under 40 CFR 52.223 (37 FR 10842).
- (17) Merced County APCD.
 - (i) Rule 109, submitted on August 2, 1976.
 - (ii) Rule 109, submitted on June 30, 1972, and previously approved under 40 CFR 52.223 (37 FR 19812).
- (18) Nevada County APCD.
 - (i) Rule 55(f), submitted on February 21, 1972, and previously approved under 40 CFR 52.223 (37 FR 10842).
- (19) Northern Sonoma County APCD.
 - (i) Rule 540, submitted on November 10, 1976.
- (20) Placer County APCD.
 - (i) Rule 55(f), submitted on February 21, 1972, and previously approved under 40 CFR 52.223 (37 FR 10842).
 - (ii) Rule 404, submitted on October 13, 1977.
- (21) Plumas County APCD.
 - (i) Rule 203(j), submitted on January 10, 1975.
 - (ii) Rule 404, submitted on June 6, 1977.
- (22) Riverside County APCD.

§ 52.271

- (i) Rule 430, submitted on June 6, 1977.
- (23) San Bernardino County APCD.
 - (i) Rule 430, submitted on June 6, 1977.
 - (ii) Rule 55, submitted on February 21, 1972, and previously approved under 40 CFR 52.223 (37 FR 10842).
- (24) San Joaquin County APCD.
 - (i) Rule 110, submitted on October 23, 1974, and Rule 110, submitted on June 30, 1972, and previously approved under 40 CFR 52.223 (37 FR 19812).
- (25) San Luis Obispo County APCD.
 - (i) Rule 107, submitted on November 10, 1976.
 - (ii) Rule 102, submitted on February 21, 1972, and previously approved under 40 CFR 52.223 (37 FR 10842).
- (26) Shasta County APCD.
 - (i) Rule 3:10, submitted on July 19, 1974.
 - (ii) Rule 3:10, submitted on June 30, 1972, and previously approved under 40 CFR 52.223 (37 FR 19812).
- (27) Sierra County APCD.
 - (i) Rule 51, submitted on June 30, 1972, and previously approved under 40 CFR 52.223 (37 FR 19812), and Rule 203(j), submitted on January 10, 1975, and previously approved under 40 CFR 52.223 (42 FR 23805).
 - (ii) Rule 404, submitted on June 6, 1977.
- (28) Southern California APCD.
 - (i) Rule 430, submitted on February 10, 1977.
- (29) Stanislaus County APCD.
 - (i) Rule 110, submitted on June 30, 1972, and previously approved under 40 CFR 52.223 (37 FR 19812), and Rule 110, submitted on July 19, 1974.
- (30) Tehama County APCD.
 - (i) Rule 417, submitted on July 19, 1974.
 - (ii) Rule 4:1g, submitted on June 30, 1972, and previously approved under 40 CFR 52.223 (37 FR 19812).
- (31) Trinity County APCD.
 - (i) Rule 540, submitted on November 10, 1976.
 - (ii) Rule 44, submitted on June 30, 1972, and previously approved under 40 CFR 52.223 (37 FR 19812).
- (32) Tulare County APCD.
 - (i) Rules 111 and 402(f), submitted on November 10, 1976.
- (33) Tuolumne County APCD.

40 CFR Ch. I (7-1-25 Edition)

- (i) Rule 404, submitted on February 10, 1977, and Rule 402(f), submitted on June 30, 1972, and previously approved under 40 CFR 52.223.
- (34) Ventura County APCD.
 - (i) Rule 32, submitted on July 19, 1974.
 - (ii) Rule 32, submitted on June 30, 1972, and previously approved under 40 CFR 52.223 (37 FR 19812).
- (35) Yuba County APCD.
 - (i) Rule 4.5, submitted on July 25, 1973.
 - (b) The following regulations are disapproved since they lack explicit provisions to assure that that NAAQS will not be exceeded while equipment breakdown periods are in effect.
 - (1) Fresno County APCD.
 - (i) Rules 110(B), *Variance Required*, and 519, *Emergency Variance*, submitted on January 2, 1979.
 - (2) Kern County APCD.
 - (i) Rules 111 (b), *Equipment Breakdown*, and 519, *Emergency Variance*, submitted on January 2, 1979.
 - (3) Modoc County APCD.
 - (i) Rule 2:15, *Breakdown Conditions; Emergency Variances*, submitted on May 7, 1979.
 - (4) Imperial County APCD.
 - (i) Rule 111 (B), *Equipment Breakdown*, submitted on December 24, 1979.
 - (ii) Rule 517, *Emergency Variance*, submitted on December 24, 1979.
 - (5) Butte County AQMD.
 - (i) Rule 275, *Reporting Procedures for Excess Emissions*, submitted on May 10, 1996.
 - (6) Shasta County AQMD.
 - (i) Rule 3:10, *Excess Emissions*, submitted on May 10, 1996.
 - (7) Monterey Bay Unified Air Pollution Control District.
 - (i) Rule 214, *Breakdown Condition*, submitted on October 30, 2001.
 - (c) The following regulations are disapproved because they exempt sources from applicable emissions limitations during malfunctions and/or fail to sufficiently limit startup and shutdown exemptions to those periods where it is technically infeasible to meet emissions limitations.
 - (1) South Coast Air Quality Management District.
 - (i) Rule 429, submitted on January 28, 1992.
 - (d) The following regulations are disapproved because they merely describe

Environmental Protection Agency

§ 52.273

how state agencies intend to apply their enforcement discretion and thus, if approved, the regulations would have no effect on the State Implementation Plan.

(1) Antelope Valley AQMD.

(i) Rule 430, Breakdown Provisions, submitted on February 16, 1999.

(2) Kern County APCD.

(i) Rule 111, Equipment Breakdown, submitted on July 23, 1996.

(3) Mojave Desert AQMD.

(i) Rule 430, Breakdown Provisions, submitted on January 24, 1995.

[43 FR 3277, Jan. 24, 1978]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.271, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

§ 52.272 Research operations exemptions.

(a) The requirements of § 51.281 of this chapter are not met because the following regulations allow exemptions to be granted from the applicable emission limitations, thereby potentially rendering the applicable limitations unenforceable. Furthermore, the regulations are inconsistent with the Clean Air Act, because the regulations could permit violations of the National Ambient Air Quality Standards under some circumstances. Therefore, the following regulations are disapproved:

(1) Bay Area APCD.

(i) Regulation 2, Division 1, sections 1214 to 1214.3, submitted on July 25, 1973.

(ii) Regulation 3, Division 1, sections 1205 to 1205.3, submitted on July 25, 1973.

(2) El Dorado County APCD.

(i) Rule 203(D), submitted on November 4, 1977.

(3) Great Basin Unified APCD.

(i) Rule 423, submitted on November 4, 1977.

(4) Los Angeles County APCD.

(i) Rule 441, submitted on June 6, 1977.

(5) Placer County APCD.

(i) Rule 203(D), submitted on October 13, 1977.

(6) Riverside County APCD.

(i) Rule 441, submitted on June 6, 1977.

(7) Sacramento County APCD.

(i) Rule 30, submitted on January 22, 1974.

(8) San Bernardino County APCD.

(i) Rule 441, submitted on June 6, 1977.

(9) Southern California APCD.

(i) Rule 441, submitted on August 2, 1976.

[42 FR 42226, Aug. 22, 1977]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.272, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

§ 52.273 Open burning.

(a) The following rules or portions of rules are disapproved because they contain exemptions to open burning (including open agricultural burning) prohibitions, that do not satisfy the requirements of section 110 of the Clean Air Act:

(1) Amador County APCD.

(i) Rules 308 and 312, submitted on April 21, 1976.

(ii) Rule 304, submitted on October 13, 1977.

(iii) Rules 302(G) and 322, submitted on October 15, 1979.

(2) Calaveras County APCD.

(i) Rules 304 and 322, submitted on October 13, 1977.

(3) Del Norte County APCD.

(i) Rule 410(c)(2) and the following portions of Regulation 2: General prohibitions (all of page 1), paragraph (f) of Article I, paragraphs (f) and (g) of Article V, and paragraph (f) of Article VI, submitted on November 10, 1976.

(4) El Dorado County APCD.

(i) Rules 302(C), 304, 307, 319, and 322, submitted on November 4, 1977.

(ii) Rules 302 (C), 318, and 321, submitted on May 23, 1979.

(5) Fresno County APCD.

(i) Rules 416.1(e)(1), (e)(3), and (e)(4), submitted on October 23, 1974.

(ii) Rule 416.1(c)(1), submitted on June 30, 1972, and previously approved under 40 CFR 52.223 (37 FR 19812).

(6) Humboldt County APCD.

(i) Rule 410(c)(2) and the following portions of Regulation 2: General prohibitions (all of page 1), paragraph (f) of Article I, paragraphs (f) and (g) of Article V, and paragraph (f) of Article VI, submitted on November 10, 1976.

(ii) (A)–(C) [Reserved]

§ 52.273

 - (iii) Rules 416.1(D)(1) and (D)(2), submitted on October 23, 1974.
- (19) Santa Barbara County APCD.
 - (i) Rules 40(4)(a) and 40(4)(1), submitted on July 25, 1973. (The analogous Rules 40(4)(a) and 40(4)(g), previously approved in the February 21, 1972 submittal, are retained.) Rule 40(4)(c), submitted on July 25, 1973, is also disapproved.
 - (ii) Rule 22, submitted on January 22, 1974. (The analogous Rule 22, previously approved in the February 21, 1972 submittal, is retained.) Rules 24.1 and 24.2, submitted on January 22, 1974, are also disapproved.
 - (iii) Rules 312 (B) and (C), and 401 (D.1) and (D.2).
- (20) Shasta County APCD.
 - (i) Rule 2:6, sections (1)(b)(iii) (a, b, and d), (1)(c)(viii), 2(c), 3(f), 4(e), 5(c), and 5(d). (Previously approved Rule 2:6, sections (2)(c), (3)(f), and (4)(e), submitted on July 19, 1974, are retained.)
- (21) Sierra County APCD.
 - (i) Rules 302(C), 319, and 322, submitted on June 6, 1977.
- (22) Trinity County APCD.
 - (i) Rule 410(c)(2) and the following portions of Regulation 2: General prohibitions (all of page 1), paragraph (f) of Article I, paragraphs (f) and (g) of Article V, and paragraph (f) of Article VI, submitted on November 10, 1976.
- (23) Tulare County APCD.
 - (i) Rule 402(e), submitted on November 10, 1976.
 - (ii) Section 417(III)(A), submitted on June 30, 1972, and previously approved under 40 CFR 52.223 (37 FR 19812).
 - (iii) Section 417.1(e)(1), (e)(3), and (e)(4), submitted on January 10, 1975.
- (24) Tuolumne County APCD.
 - (i) Rule 322, submitted on February 10, 1977.
- (25) Yolo-Solano APCD.
 - (i) Rules 2.8(c) (4) and (5), 6.3, and 6.5(a), submitted on July 25, 1973.

Environmental Protection Agency

§ 52.273

(ii) Rules 6.1(a), (e)(6), and (g), submitted on January 10, 1975. (Rules 4.1(a) and (g), submitted on February 21, 1972, and previously approved under 40 CFR 52.223, are retained.)

(b) The following rules or portions of rules are disapproved because they relax the control on open burning (including agricultural burning) without accompanying analyses demonstrating that these relaxations will not interfere with the attainment and maintenance of the National Ambient Air Quality Standards:

(1) Del Norte County APCD.

(i) Regulation 2, Article I, paragraph (e), submitted on November 10, 1976.

(ii) Rule 410(c)(2), submitted on May 7, 1979.

(2) Fresno County APCD.

(i) Rule 416.1(c)(1), submitted on October 23, 1974.

(ii) Rule 416.1(g), submitted on November 4, 1977.

(3) Humboldt County APCD.

(i) Regulation 2, Article I, paragraph (e), submitted on November 10, 1976.

(ii) Rule 410(c)(2), submitted on May 7, 1979.

(4) Imperial County APCD.

(i) Rule 422, submitted on November 4, 1977. (The requirements of Rule 115, submitted on February 21, 1972, and previously approved under 40 CFR 52.223, are retained as applicable to the burning of wood waste.)

(ii) Regulation VII (Rules 701 to 706), submitted on November 4, 1977. (Regulation VII (Rules 200 to 206), submitted on July 25, 1973 and previously approved under 40 CFR 52.223, is retained.)

(5) Kings County APCD.

(i) Rules 416.1 and 417.1, submitted on November 4, 1977.

(6) Lake County APCD.

(i) Sections 435, 436, 1003, and 1200(A), submitted on February 10, 1977.

(ii) Section 435, submitted on January 2, 1979.

(7) Los Angeles County APCD.

(i) Rule 444, submitted on June 6, 1977. (Rules 57.1, 57.2, 57.3, and 57.4, submitted on June 30, 1972, and previously approved under 40 CFR 52.223, are retained.)

(8) Madera County APCD.

(i) Rule 416.1(c)(1), submitted on January 10, 1975.

(9) Mendocino County APCD.

(i) Regulation 2, Article I, paragraph (e), submitted on November 10, 1976.

(ii) Rule 410(c)(2), submitted on May 7, 1979.

(10) Merced County APCD.

(i) Rule 416.1(I)(A)(2), submitted on August 2, 1976.

(11) Northern Sonoma County APCD.

(i) Regulation 2, Article I, paragraph (e), submitted on November 10, 1976.

(ii) Rule 410(c)(2), submitted on May 7, 1979.

(12) San Bernardino County Desert APCD.

(i) Rule 444 and the definition of "Agricultural Burning" in Rule 102, submitted on November 4, 1977. (Rule 57, submitted on February 21, 1972, and previously approved under 40 CFR 52.223, is retained.)

(13) San Diego County APCD.

(i) Rules 102(e) and 103(g), submitted on October 13, 1977.

(14) San Luis Obispo County APCD.

(i) Rule 501(B), submitted on November 10, 1976, and Rule 501(A)(7), submitted on November 4, 1977. (Previously approved Rule 115(2), submitted on February 21, 1972, is retained.)

(15) Santa Barbara County APCD.

(i) Rules 2(b), 40(3), and 40(4)(e), submitted on July 25, 1973. (Analogous Rules 2(b), 40(3), and 40(4)(c), submitted on February 21, 1972, and previously approved, are retained.)

(16) Shasta County APCD.

(i) Rule 2:8, submitted on October 13, 1977. (Rule 2:8, submitted on July 19, 1974, and July 22, 1975, and previously approved, is retained.)

(17) Siskiyou County APCD.

(i) Rule 4.3(2), submitted on January 2, 1979.

(18) Trinity County APCD.

(i) Regulation 2, Article I, paragraph (e), submitted on November 10, 1976.

(ii) Rule 410(c)(2), submitted on May 7, 1979.

(19) Placer County APCD.

(i) Rule 316, submitted on August 21, 1979.

(ii) Rules 318 and 323, submitted on October 15, 1979.

[42 FR 41122, Aug. 15, 1977]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.273, see the List of CFR Sections Affected, which appears in the

Finding Aids section of the printed volume and at *www.govinfo.gov*.

§ 52.274 California air pollution emergency plan.

(a) Since the California Air Pollution Emergency Plan does not provide complete, implementable provisions for taking emission control actions necessary to prevent ambient pollutant concentrations from reaching significant harm levels, the requirements of subpart H of this chapter for Priority I and II areas are not met, except in the following areas:

- (1) South Coast Air Quality Management District (SCAQMD).
- (2) Sacramento County Air Pollution Control District.
- (3) Monterey Bay Unified APCD (MBUAPCD).
- (4) Santa Barbara Air Quality Management Area portion of the Santa Barbara County Air Pollution Control District.
- (5) Bay Area Air Quality Management District.
- (6) Ventura County Air Pollution Control District.
- (7) San Diego County APCD.
- (8) Los Angeles County Air Pollution Control District.
- (9) Riverside County Air Pollution Control District.
- (10) San Bernardino County Desert Air Pollution Control District.
- (11) Imperial County Air Pollution Control District.
- (12) Fresno County Air Pollution Control District.
- (13) Kern County Air Pollution Control District.

(b) The requirements of subpart H of this chapter are met in the SCAQMD with the following exceptions: SCAQMD Regulation VII has no schedule to assure that the emission control actions are fully implementable; does not provide specific emission control actions for interdistrict coordination; has no provisions for nitrogen dioxide, particulate matter, and sulfur dioxide and particulate matter combined episodes; has no criteria or provisions to protect the eight-hour averaged carbon monoxide significant harm level; and has no provisions for implementation of abatement plans for stage 2 or 3 carbon monoxide or oxidant episodes that are attained without being predicted.

(c) Regulation for prevention of air pollution emergency episodes—plan scheduling, interdistrict coordination, episode criteria, and declaration.

(1) The requirements of this paragraph are applicable in the SCAQMD.

(2) The owner or operator of any governmental, industrial, business, or commercial activity listed in Rules 708.1 and 708.3 of Regulation VII of the SCAQMD, as revised on May 6, 1977, shall submit a Stationary Source Curtailment Plan and/or Traffic Abatement Plan to the Administrator within sixty days after the effective date of this paragraph.

(3) The plans submitted pursuant to the requirements of this paragraph, shall be reviewed by the Administrator for approval or disapproval according to the following schedule:

(i) For sources with emissions of hydrocarbons (HC) or nitrogen oxides (NO_x) greater than or equal to 454 metric tons (500 tons) per year, or for establishments employing 400 or more employees per shift, within 45 days after receipt.

(ii) For sources with emissions of HC or NO_x greater than or equal to 91 metric tons (100 tons) per year and less than 454 metric tons (500 tons) per year, or for establishments employing more than 200 and less than 400 employees per shift, within 90 days after receipt.

(iii) For sources or establishments other than those addressed in paragraphs (c)(3) (i) through (ii) of this section, within 180 days after receipt.

(4) The owner or operator of an industrial, business, governmental or commercial establishment required to submit a plan by this paragraph shall be notified by the Administrator within thirty days after the plan has been evaluated if the plan is disapproved. Any plan disapproved by the Administrator shall be modified to overcome the disapproval and resubmitted to the Administrator within 30 days of the receipt of the notice of disapproval.

(5) In the event specific sources or source areas within the SCAQMD are determined to significantly contribute to a declared air pollution episode in a nearby Air Pollution Control District, emission control actions specified in Regulation VII of the SCAQMD, as revised on May 6, 1977, for that declared

Environmental Protection Agency

§ 52.274

episode stage shall be taken in the SCAQMD to abate that episode.

(6) For the purposes of this paragraph, the following episode criteria shall apply to carbon monoxide concentrations averaged over eight hours:

- (i) For stage 1, 15 parts per million.
- (ii) For stage 2, 30 parts per million.
- (iii) For stage 3, 40 parts per million.

(7) The provisions of SCAQMD Regulation VII, as revised on May 6, 1977, relating to carbon monoxide episodes averaged over 12 hours shall apply to carbon monoxide episodes averaged over 8 hours except that the Administrator shall provide for declaration, notification, source inspections, and termination of the episodes.

(8) Whenever the Administrator has determined that the stage 2 or 3 episode level for oxidant or carbon monoxide as specified in Rule 703 of Regulation VII of the SCAQMD, as amended May 6, 1977, is being attained or has been attained, and is predicted to remain at such level for 12 or more hours, or increase, or in the case of oxidant to reoccur within the next 24 hours, unless control actions are taken, the existence of the appropriate episode level and the location of the source-receptor areas shall be declared, and the actions specified in Rules 710(b)(1), 710(b)(2), 711(b)(1), or 711(b)(2) shall be taken by the Administrator.

(d) Regulation for prevention of air pollution emergency episodes—nitrogen dioxide, particulate matter, and sulfur dioxide and particulate matter combined.

(1) The requirements of this paragraph are applicable in the SCAQMD.

(2) For the purposes of this regulation the following definitions apply:

(i) "Ppm" means parts per million by volume.

(ii) "COH" means coefficient of haze.

(iii) "Ugm³" means micrograms per cubic meter.

(iv) "Administrator" means the Administrator of the Environmental Protection Agency or his authorized representative.

(v) "Major National Holiday" means a holiday such as Christmas, New Year's Day, or Independence Day.

(vi) "Source/Receptor Areas" are defined for each episode occurrence based on air monitoring, geographical, and meteorological factors: Source area is that area in which contaminants are discharged and a receptor area is that area in which the contaminants accumulate and are measured.

(vii) "Air Contaminants" means nitrogen dioxide, particulate matter, and/or sulfur dioxide and particulate matter combined.

(3) For the purposes of this regulation, the following episode criteria shall apply:

Contaminants	Averaging time (hours)	Stage 1	Stage 2	Stage 3
Nitrogen dioxide	1	0.6 ppm	1.2 ppm	1.6 ppm.
	24	0.15 ppm	0.3 ppm	0.4 ppm.
Particulate matter	24	3.0 COH	5.0 COH	7.0 COH.
	24	375 ugm ⁻³	625 ugm ⁻³	875 ugm ⁻³ .
Sulfur dioxide and particulate matter combined	24	0.2 ¹	0.8 ¹	1.2 ¹ .
	24	65,000 ²	261,000 ²	393,000 ² .

¹ Product of sulfur dioxide (ppm) and particulate matter (COH).

² Product of sulfur dioxide (ugm⁻³) and particulate matter (ugm⁻³).

(4) Whenever the Administrator has determined that any episode level specified in paragraph (d)(3) of this section is being attained or has been attained, and is predicted to remain at such level for 12 or more hours, or increase, unless control actions are taken, the existence of the appropriate episode level and the location of the source-receptor areas shall be declared.

(5) Whenever the available scientific and meteorological data indicate that any episode level declared by paragraph (d)(4) of this section is no longer occurring and is not predicted to immediately increase again to episode levels, such episode shall be declared terminated.

(6) The following shall be notified by the Administrator whenever an episode is predicted, attained or terminated: (i)

Public officials; (ii) persons operating any facility or activity named in paragraph (d)(8) of this section; (iii) public health, safety, and emergency agencies; (iv) news media.

(7) Upon request of the Administrator, persons operating any facility or activity named in paragraph (d)(8) of this section shall install, properly maintain, and operate radio-receiving equipment with decoding device capable of receiving broadcasts of the declaration and termination of episodes required under this paragraph and instructions as to the actions to be taken.

(8) Stationary source curtailment plans and traffic abatement plans shall be prepared by industrial, business, commercial, and governmental establishments as follows:

(i) The owner or operator of any industrial, business, commercial, or governmental activity listed below shall submit to the Administrator plans to curtail operations causing stationary source air contaminants in such activity:

(A) Petroleum refinery emitting 23 metric tons (25 tons) or more per year of air contaminants.

(B) Metal-melting plant requiring molten metal temperatures in excess of 540 °C (1,000 °F) or metal-refining plant or metal-smelting plant, in which a total of 1,135 kilograms (2,500 pounds) or more of metal are in a molten state at any one time or are poured in any 1 hour.

(C) Fossil fuel-fired electric generating facility having a total rated capacity of 50 megawatts or more.

(D) Any facility or plant emitting 91 metric tons (100 tons) or more per year of air contaminants.

(ii) The plans required by paragraph (d)(8)(i) of this section shall include the following:

(A) A list of equipment which emits nitrogen oxides, particulate matter, and/or sulfur dioxide, including the SCAQMD permit number, the daily amount of air contaminants emitted, and a statement of the minimum time and recommended time to implement the abatement actions for each episode stage for the equipment listed and the percent reduction in emissions at each episode stage.

(B) The total number of employees at the facility during each shift on a normal weekday and on a major national holiday.

(C) The normal amount of electricity used on a normal weekday and on a major national holiday.

(D) The actions to inform employees of the procedures to be taken in the event of an episode declaration.

(E) The name and telephone numbers of the facility's episode action coordinator and alternate, who are responsible for implementation of the plan.

(F) For stage 1 episodes:

(1) The measures to voluntarily curtail equipment emitting air contaminants.

(2) The measures to curtail or postpone electrically intensive industrial operations, where feasible.

(3) The measures for electric utilities to import power from outside the basin to the extent feasible.

(G) For stage 2 episodes:

(1) The measures to curtail as much as possible, without upsetting production, equipment operations which emit air contaminants.

(2) The measures to postpone operations which can be postponed until after the episode.

(3) For fossil fuel-fired combustion sources, including electric utilities, with a heat input greater than 50 million BTU per hour:

(i) The measures to burn natural gas.

(ii) To the extent that natural gas is not available, the measures to burn fuel oil with a sulfur content of not more than 0.25 percent by weight or the measures to reduce air contaminant emissions to equivalent discharge. Any combustion source may be exempt from the provisions of this paragraph upon demonstration that fuel oil with the specified sulfur content is not available.

(4) For electric utilities the measures, in addition to those in paragraph (d)(8)(ii)(F)(3) of this section, to:

(i) Shift oil burning power generation to non-source areas to the maximum extent consistent with the public health, safety, and welfare.

(ii) Shift oil burning power generation to combined cycle gas turbine generating equipment burning fuel oil containing less than 0.15 percent sulfur to

the maximum extent consistent with the public health, safety, and welfare.

(5) For refineries and chemical plants the measures to be taken to reduce air contaminant emissions by 20 percent without jeopardizing the public health or safety, without causing an increase in the emissions of other air contaminants, without damaging the equipment or without reducing production by more than 20 percent.

(6) The measures in paragraph (d)(8)(ii)(F) of this section.

(H) For stage 3 nitrogen dioxide episodes:

(1) The measures for petroleum refineries to reduce emissions of nitrogen dioxide by 33 percent, without damaging the equipment or increasing the emissions of other air contaminants.

(2) The measures in paragraph (d)(8)(ii)(G) of this section.

(3) A list of equipment and the permit numbers of such equipment not operated on a major national holiday.

(4) A statement as to whether or not the facility operates on a major national holiday.

(I) For stage 3 particulate matter episodes:

(1) The measures for petroleum refineries to reduce emissions of particulate matter by 33 percent, without damaging the equipment or increasing the emissions of other air contaminants.

(2) The measures described in paragraph (d)(8)(ii)(G) of this section.

(3) The measures for any facility or plant, except electrical generating facilities and petroleum refineries, normally emitting 91 metric tons (100 tons) or more per year of particulate matter to eliminate such emissions by starting no new batches, by ceasing feed of new materials, and by phasing down as rapidly as possible without damage to the equipment.

(4) The measures for metal melting, refining, or smelting plants to eliminate emissions of particulate matter by starting no new batches, by ceasing feed of new materials, and by phasing down as rapidly as possible without damage to the equipment.

(J) For stage 3 sulfur dioxide and particulate matter combined episodes:

(1) The measures described in paragraphs (d)(8)(ii) (G) and (I) of this section.

(2) The measures for petroleum refineries to reduce emissions of sulfur dioxide by 33 percent, without damaging the equipment or increasing the emissions of other air contaminants.

(3) The measures for any facility or plant, except electrical generating facilities and petroleum refineries, normally emitting 91 metric tons (100 tons) or more per year of sulfur dioxide to eliminate such emissions by starting no new batches, by ceasing feed of new materials, and by phasing down as rapidly as possible without damage to the equipment.

(K) An estimate of the resultant reduction in air contaminant emissions.

(iii) The owner or operator of any industrial, business, commercial, or governmental activity listed below shall submit to the Administrator plans to curtail or cease operations causing air contaminants from vehicle use:

(A) Operators of 50 or more fleet vehicles.

(B) Industrial, business, commercial, or governmental establishments employing more than 100 persons per shift at one business address.

(iv) The plans required by paragraph (d)(8)(iii) of this paragraph shall include the following:

(A) The total number of employees at the facility during each shift on a normal weekday and on a major national holiday.

(B) The number of motor vehicles and vehicle miles traveled for motor vehicles operated:

(1) By the company on company business on a normal weekday and on a major national holiday.

(2) By employees commuting from home to the place of business on a normal weekday and on a major national holiday.

(C) The number of parking spaces used on a normal weekday and on a major national holiday.

(D) The minimum number of motor vehicles to be operated that are necessary to protect public health or safety.

(E) The actions to inform employees of the procedures to be taken in the event of an episode declaration.

(F) The name and telephone numbers of the facility's episode action coordinator and alternate, who are responsible for implementation of the plan.

(G) For stage 1 episodes, the methods by which employers will encourage the utilization of car pools or otherwise reduce employee motor vehicle travel.

(H) For stage 2 and 3 episodes, the measures within the reasonable control of the employer to reduce the number of vehicle miles driven by employees in commuting to and from work.

(I) An estimate of the reduction in vehicle miles traveled as a result of the measures in this paragraph.

(v) Each owner or operator required to submit a plan by this paragraph shall submit to the Administrator such plan within 60 days of the effective date of this paragraph.

(vi) The plans submitted in accordance with the provisions of this paragraph shall be approved or disapproved by the Administrator according to the following schedule:

(A) For sources with emissions of air contaminants greater than or equal to 454 metric tons (500 tons) per year, or for establishments employing 400 or more employees per shift, within 45 days after receipt.

(B) For sources with emissions of air contaminants greater than or equal to 91 metric tons (100 tons) per year and less than 454 metric tons (500 tons) per year, or for establishments employing more than 200 and less than 400 employees per shift, within 90 days after receipt.

(C) For sources with emissions of air contaminants less than 91 metric tons (100 tons) per year, or for establishments employing 100 to 200 employees per shift, within 180 days after receipt.

(vii) The owner or operator required to submit a plan by this paragraph shall be notified by the Administrator within 30 days after the plan has been evaluated if the plan is disapproved. Any plan disapproved by the Administrator shall be modified to

(viii) A copy of the plan approved in accordance with the provisions of this paragraph shall be on file and readily available on the premises to any person authorized to enforce the provisions of this section.

(9) The following actions shall be taken in the source and receptor areas upon declaration of a stage 1 episode:

(i) The notifications required by paragraph (d)(6) of this section.

(ii) The Administrator shall advise the public that those individuals with special health problems should follow the precautions recommended by their physicians and health officials.

(iii) The Administrator shall advise school officials to cancel, postpone, or reschedule programs which require outdoor physical activity.

(iv) The Administrator shall request the public to stop all unnecessary driving.

(v) The Administrator shall request the public to operate all privately owned vehicles on a pool basis.

(vi) Persons operating any facility or activity named in paragraph (d)(8) of this section shall implement the appropriate plans specified in paragraph (8) for the declared stage 1 episode and air contaminant(s).

(10) The following actions shall be taken in the source and receptor areas upon declaration of a stage 2 episode:

(i) The actions described in paragraphs (d)(9) (i) through (v) of this section.

(ii) The Administrator shall request suspension of programs that involve physical exertion by participants using public parks or public recreational facilities located in receptor areas.

(iii) The burning of combustible refuse shall be postponed until the episode has been terminated.

(iv) The Administrator shall request the public to reduce the use of electricity by 10 percent.

(v) Persons operating any facility or activity named in paragraph (d)(8) of this section shall implement the appropriate plans specified in paragraph (d)(8) of this section for the declared stage 2 episode and air contaminant(s).

(11) The following actions shall be taken in the source and receptor areas upon declaration of a stage 3 episode:

(i) The actions described in paragraphs (d)(10) (i) through (iii) of this section.

(ii) The Administrator shall request the public to reduce the use of electricity by 40 percent.

Environmental Protection Agency

§ 52.274

(iii) Persons operating any facility or activity named in paragraph (d)(8) of this section shall implement the appropriate plans specified in paragraph (d)(8) of this section for the declared stage 3 episode and air contaminant(s).

(iv) For nitrogen dioxide, the general public, schools, industrial, business, commercial, and governmental activities throughout the District shall operate as though the day were a major national holiday.

(v) For particulate matter and/or sulfur dioxide and particulate matter combined, the Administrator shall request the public to reduce as much as possible activities causing dust emissions including agricultural operations, off-road vehicle use, and driving on unpaved roads. Construction and demolition operation shall be postponed until the episode has been terminated.

(12) In the event specific sources or source areas within the SCAQMD are determined to significantly contribute to a declared air pollution episode in a nearby Air Pollution Control District, emission control actions specified in this paragraph for that declared episode stage shall be taken in the SCAQMD to abate that episode.

(13) A source inspection plan shall be implemented by the Administrator upon the declaration of any episode stage.

(14) The Administrator shall provide for daily acquisition of forecasts of atmospheric stagnation conditions during any episode stage and updating of such forecasts at least every 12 hours.

(15) Any source that violates any requirement of this section shall be subject to enforcement action under section 113 of the Act.

(16) All submittals or notifications required to be submitted to the Administrator by this section shall be sent to:

Environmental Protection Agency, Air and Hazardous Materials Division (A-4),
Attn: Air Programs Branch, 215 Fremont Street, San Francisco, Calif. 94105.

(e) The requirements of subpart H of this chapter are met in the Sacramento County Air Pollution Control District with the following exceptions: There are no episode criteria levels, declaration procedures, notification procedures, source inspections, emission

control actions or episode termination procedures for carbon monoxide episodes based on 4- and 8-hour averaging times; communication procedures for transmitting status reports and orders as to emission control actions to be taken during an episode stage are not provided for; there are no provisions for the inspection of those sources covered under Rule 122; there is no time schedule for the Air Pollution Control Officer to initiate the call for the submittal of individual abatement plans; the requirements for the content of the abatement plans are not sufficiently specific to ensure that adequate plans are submitted; no provisions exist for the daily acquisition of atmospheric stagnation conditions; a Priority II particulate matter episode contingency plan is not provided for in the regulation.

(f) Regulation for prevention of air pollution emergency episodes—4- and 8-hour carbon monoxide criteria levels, public announcement, source inspections, preplanned abatement strategies, acquisition of atmospheric stagnation forecasts.

(1) The requirements of this paragraph are applicable in the Sacramento County Air Pollution Control District.

(2) For the purposes of this regulation the following definitions apply:

(i) "Administrator" means the Administrator of the Environmental Protection Agency or his authorized representative.

(ii) "ppm" means parts per million by volume.

(iii) "ug/m³" means micrograms per cubic meter.

(3) For the purposes of this paragraph, the following episode criteria shall apply:

Pollutant	Averaging time (hours)	Stage 1	Stage 2	Stage 3
Carbon monoxide	4 8	¹ 25 ¹ 15	¹ 45 ¹ 30	¹ 60 ¹ 40

¹ Parts per million by volume.

(4) The provisions of the Sacramento County Air Pollution Control District's Regulation IX, as submitted on November 4, 1977, relating to carbon monoxide episodes averaged over 1 hour shall apply to carbon monoxide episodes averaged over 4 and 8 hours except that

the Administrator shall insure that declaration, notification, source inspections, and termination of such episodes will occur.

(5) Stationary source curtailment plans shall be prepared by business, commercial, industrial, and governmental establishments as follows:

(i) The owner or operator of any business, commercial, industrial, or governmental facility or activity listed below shall submit to the Administrator plans to curtail or cease operations causing stationary source air contaminants in such activity:

(A) Stationary sources which can be expected to emit 100 tons or more per year of hydrocarbons or carbon monoxide.

(ii) The plans required by paragraph (f)(5)(i)(A) of this section shall include the following information:

(A) The information requested by Regulation IX, Rule 125, section d, as submitted to the EPA on November 4, 1977.

(B) The total number of employees at the facility during each shift on a normal weekday.

(C) The amount of energy (gas, fuel oil, and electricity) used on a normal weekday.

(D) For first-stage episodes, the measures to voluntarily curtail equipment emitting air pollutants.

(E) For second-stage episodes:

(1) The measures to curtail, as much as possible, equipment operations that emit air pollutants specific to the type of episode and, in the case of oxidant episodes, the equipment operations that emit hydrocarbons.

(2) The measures to postpone operations which can be postponed until after the episode.

(F) For third-stage episodes:

(1) A list of equipment, with permit numbers if applicable, which can be shut down without jeopardizing the public health or safety, and an estimate of the resultant reductions in air contaminant emissions.

(2) A list of all equipment, with permit numbers if applicable, which must be operated to protect the public health or safety, and an estimate of the air contaminant emissions from such equipment.

(iii) Copies of the stationary source curtailment plans approved in accordance with the provisions of this paragraph shall be on file and readily available on the premises to any person authorized to enforce the provisions of this paragraph.

(6) The owner or operator of any governmental, business, commercial, or industrial activity or facility listed in paragraph (f)(5) of this section shall submit a stationary source curtailment plan to the Administrator within 60 days after promulgation of final rule-making.

(7) The plans submitted pursuant to the requirements of this paragraph shall be reviewed by the Administrator for approval or disapproval according to the following schedule:

(i) For sources with emissions of hydrocarbons and carbon monoxide greater than or equal to 454 metric tons (500 tons) per year, within 45 days after receipt.

(ii) For sources with emissions of hydrocarbons and carbon monoxide greater than or equal to 91 metric tons (100 tons) per year and less than 454 metric tons (500 tons) per year, within 90 days after receipt.

(iii) For sources with emissions of hydrocarbons and carbon monoxide less than 91 metric tons (100 tons) per year, within 180 days after receipt.

(8) The owner or operator of any industrial, business, governmental, or commercial establishment required to submit a plan by this paragraph shall be notified by the Administrator within 30 days after the plan has been evaluated. Any plan disapproved by the Administrator shall be modified to overcome the disapproval and resubmitted to the Administrator within 30 days of receipt of the notice of disapproval.

(9) A source inspection plan shall be implemented by the Administrator upon the declaration of any episode stage, and the following facilities shall be inspected to ensure compliance:

(i) Those sources covered under Rule 122, as submitted to the EPA on November 4, 1977, as appropriate.

(10) The Administrator shall insure that forecasts of atmospheric stagnation conditions during any episode stage and updating of such forecasts are acquired.

Environmental Protection Agency

§ 52.274

(11) Any source that violates any requirement of this regulation shall be subject to enforcement action under section 113 of the Clean Air Act.

(12) All submittals or notifications required to be submitted to the Administrator by this regulation shall be sent to: Regional Administrator, Attn: Air and Hazardous Materials Division, Air Technical Branch, Technical Analysis Section (A-4-3) Environmental Protection Agency, 215 Fremont Street, San Francisco, CA 94105.

(g) Regulation for the prevention of air pollution emergency episodes—Priority II particulate matter emergency episode contingency plan.

(1) The requirements of this paragraph are applicable in the Sacramento County Air Pollution Control District.

(2) For the purposes of this paragraph the following episode criteria shall apply:

Pollutant	Averaging time (hours)	Stage 1	Stage 2	Stage 3
Particulate matter	24	¹ 375	¹ 625	¹ 875

¹ Micrograms per cubic meter.

(3) Whenever it is determined that any episode level specified in paragraph (g)(2) of this section is predicted to be attained, is being attained, or has been attained and is expected to remain at such levels for 12 or more hours, the appropriate episode level shall be declared.

(4) Whenever the available scientific and meteorological data indicate that any episode level specified in paragraph (g)(2) of this section is no longer being attained and is not predicted to increase again to episode levels, such episode shall be declared terminated.

(5) The following shall be notified whenever an episode is predicted, attained, or terminated:

(i) Public officials.

(ii) Public health, safety, and emergency agencies.

(iii) News media.

(h) The requirements of Subpart H of this chapter are met in the MBUAPCD which the following exceptions: There is no time schedule to assure that stationary source and traffic curtailment plans are submitted and reviewed in a timely manner; curtailment plans are not sufficiently specific; there are no

provisions for the acquisition of forecasts of atmospheric stagnation conditions; and adequate mandatory emission control actions are not specified for Third-Stage oxidant episodes.

(i) Regulation for prevention of oxidant air pollution emergency episodes within the MBUAPCD.

(1) The requirements of this paragraph are applicable in the MBUAPCD.

(2) For the purposes of this regulation the following definitions apply:

(i) "Administrator" means the Administrator of the Environmental Protection Agency or his authorized representative.

(ii) "Major national holiday" means a holiday such as Christmas, New Year's Day or Independence Day.

(iii) "Regulation VII" in this paragraph means Regulation VII, "Emergencies", of the MBUAPCD, adopted May 25, 1977, and submitted to the Environmental Protection Agency as a revision to the California State Implementation Plan by the California Air Resources Board on November 4, 1977.

(3) The plans required by Rule 705(a) of Regulation VII shall include the following information in addition to that required in Rule 705(b) of Regulation VII, and shall be submitted and processed as follows:

(i) Stationary sources.

(A) The total number of employees at the facility during each shift:

(1) On a normal weekday.

(2) On a major national holiday.

(B) The amount and type of fuel used:

(1) On a normal weekday.

(2) On a major national holiday.

(C) For Third-Stage episodes:

(1) A list of equipment and the permit numbers of such equipment not operated on a major national holiday.

(2) A statement as to whether or not the facility operates on a major national holiday.

(ii) Indirect sources.

(A) The total number of employees at the facility during each shift:

(1) On a normal weekday.

(2) On a major national holiday.

(B) The number of motor vehicles and vehicle miles traveled for motor vehicles operated:

(1) By the company, on company business, on a normal weekday and on a major national holiday.

(2) By employees commuting between home and the place of business on a normal weekday and on a major national holiday.

(C) The number of parking spaces:

(1) Available.

(2) Normally used on a weekday.

(3) Normally used on a major national holiday.

(D) The minimum number of motor vehicles to be operated that are necessary to protect the public health or safety.

(E) For Third-Stage episodes, a statement as to whether or not the facility operates on a major national holiday.

(iii) Each owner or operator required to submit a plan as specified under Rule 705(a) of Regulation VII shall submit such plans within 60 days after promulgation of the final rulemaking.

(iv) The plans submitted in accordance with the provisions of this paragraph shall be approved or disapproved by the Administrator within 120 days after receipt.

(v) Each owner or operator required to submit a plan as specified under Rule 705(a) of Regulation VII shall be notified within 90 days after the Administrator's decision.

(vi) Any plan disapproved by the Administrator shall be modified to overcome this disapproval and resubmitted to the Administrator within 30 days of the notice of disapproval.

(vii) A copy of the plan approved in accordance with the provisions of this paragraph shall be on file and readily available on the premises to any person authorized to enforce the provisions of this section.

(4) The following actions shall be implemented by the Administrator upon declaration of a Third-Stage oxidant episode: the general public, schools, industrial, business, commercial, and governmental activities throughout the MBUAPCD shall operate as though the day were a major national holiday.

(5) The Administrator shall ensure the acquisition of forecasts of atmospheric stagnation conditions during any episode stage and updating of such forecasts.

(j)-(o) [Reserved]

(p) Regulation for prevention of air pollution emergency episodes—requirements for stationary source curtail-

ment plans and particulate matter episodes.

(1) The requirements of this paragraph are applicable in the Los Angeles County, Riverside County, San Bernardino County Desert and Imperial County Air Pollution Control Districts.

(2) For the purposes of this regulation, the following definitions apply:

(i) "Administrator" means the Administrator of the Environmental Protection Agency or his authorized representative.

(ii) "ug/m³" means micrograms per cubic meter.

(iii) "Major national holiday" means a holiday such as Christmas or New Year's Day.

(3) Stationary source curtailment plans shall be prepared by major stationary sources, as defined by section 169(1) of the Act:

(i) The plans required by this paragraph shall include the following information:

(A) The information requested in the California Air Resources Board's Criteria for Approval of Air Pollution Emergency Abatement Plans (Executive Order G-63).

(B) The total number of employees at the facility during each work shift on a normal weekday and on a major national holiday.

(C) The amount of energy (gas, fuel oil, and electricity) used on a normal weekday and on a major national holiday.

(D) For first-stage episodes:

(1) The measures to voluntarily curtail equipment emitting air pollutants.

(E) For second-stage episodes:

(1) The measures to curtail, as much as possible, equipment operations that emit air pollutants specific to the type of episode and, in the case of oxidant episodes, the equipment operations that emit hydrocarbons and nitrogen oxides.

(2) The measures to postpone operations which can be postponed until after the episode.

(F) For third-stage episodes:

(1) A list of equipment, with permit numbers if applicable, which can be shut down without jeopardizing the

Environmental Protection Agency

§ 52.274

public health or safety, and an estimate of the resultant reductions in hydrocarbons, nitrogen oxides, and particulate matter emissions.

(2) A list of all equipment, with permit numbers if applicable, which must be operated to protect the public health or safety, and an estimate of the hydrocarbons, nitrogen oxides and particulate matter emissions from such equipment.

(4) A copy of the stationary source curtailment plan approved in accordance with the provisions of this paragraph shall be on file and readily available on the premises to any person authorized to enforce the provisions of this paragraph.

(5) The owner or operator of any governmental, business, commercial, or industrial activity or facility listed in paragraph (p)(3) of this section shall submit a stationary source curtailment plan to the Administrator within 60 days after promulgation of final rule-making.

(6) The plans submitted pursuant to the requirements of this paragraph shall be reviewed by the Administrator within 90 days.

(7) The owner or operator of any major stationary source required to submit a plan by this paragraph shall be notified by the Administrator within 30 days after the plan has been evaluated as to whether the plan has been approved or disapproved. Any plan disapproved by the Administrator shall be modified to overcome the disapproval and resubmitted to the Administrator within 30 days of receipt of the notice of disapproval.

(8) All submittals or notifications required to be submitted to the Administrator by this regulation shall be sent to:

Regional Administrator, Attn: Air and Hazardous Materials Division, Air Technical Branch, Technical Analysis Section (A-4-3), Environmental Protection Agency, 215 Fremont Street, San Francisco CA 94105.

(9) Any source that violates any requirement of this regulation shall be subject to enforcement action under section 113 of the Act.

(10) For the purposes of this regulation the following episode criteria shall apply to particulate matter episodes:

Pollutant	Averaging time (hours)	µg/m ³		
		Stage 1	Stage 2	Stage 3
Particulate matter	24	375	625	875

(q) The requirements of Subpart H of this chapter are met in the Fresno County Air Pollution Control District, with the following exceptions: There are no episode criteria levels, declaration procedures, notification procedures, source inspection procedures, emission control actions, or episode termination procedures for carbon monoxide episodes based on 4- and 8-hour averaging times, or for particulate matter emergency episodes based on 24-hour averaging times; there is no time schedule to initiate the call for the submittal of individual abatement plans; the requirements for the content of the abatement plans are not sufficiently specific to ensure the adequate plans are submitted; there are no provisions for requiring abatement plans from operations which attract large numbers of motor vehicles with their related emissions; the Stage 3 photochemical oxidants (ozone) criterion level equals the Federal significant harm level; there are no provisions for adequate mandatory emission control actions.

(r) Regulation for prevention of air pollution emergency episodes—4- and 8-hour carbon monoxide criteria levels, mandatory emission control actions, preplanned abatement strategies, and a Priority I particulate matter emergency episode contingency plan.

(1) The requirements of this paragraph are applicable in the Fresno County Air Pollution Control District.

(2) For the purposes of this regulation the following definitions apply:

(i) “Administrator” means the Administrator of the Environmental Protection Agency or his authorized representative.

(ii) “ppm” means parts per million by volume.

(iii) “µg/m³” means micrograms per cubic meter.

(iv) “Major national holiday” means a holiday such as Christmas or New Year’s Day.

(3) For the purposes of this regulation, the following episode criteria

§ 52.274

40 CFR Ch. I (7-1-25 Edition)

shall apply to carbon monoxide episodes:

Pollutant	Averaging time (hours)	Stage 1 (ppm)	Stage 2 (ppm)	Stage 3 (ppm)
Carbon monoxide	4 8	25 15	45 30	60 40

(4) The provisions of the Fresno County Air Pollution Control District's Regulation VI, as submitted on October 23, 1974, relating to carbon monoxide episodes averaged over 1 hour shall apply to carbon monoxide episodes averaged over 4 and 8 hours except that the Administrator shall insure that declaration procedures, notification procedures, source inspections, and termination of such episodes occur.

(5) Stationary source curtailment plans and traffic abatement plans shall be prepared by business, commercial, industrial, and governmental establishments in Fresno County as follows:

(i) The owner or operator of any business, commercial, industrial, or governmental stationary source which can be expected to emit 100 tons or more per year of carbon monoxide, hydrocarbons, or particulate matter shall submit to the Administrator plans to curtail or cease operations causing stationary source air contaminants in such activity:

(ii) The plans required by paragraph (r)(5)(i) of this section shall include the following information:

(A) The information requested in the California Air Resources Board's "Criteria for Approval of Air Pollution Emergency Abatement Plans" (Executive Order G-63).

(B) The total number of employees at the facility during each shift on a normal weekday and on a major national holiday.

(C) The amount of energy (gas, fuel oil, and electricity) used on a normal weekday and on a major national holiday.

(D) For first-stage episodes, the measures to voluntarily curtail equipment emitting air pollutants.

(E) For second-stage episodes:

(1) The measures to curtail, as much as possible, equipment operations that emit air pollutants specific to the type of episode and, in the case of oxidant

episodes, the equipment operations that emit hydrocarbons or nitrogen oxides.

(2) The measures to postpone operations which can be postponed until after the episode.

(F) For third-stage episodes:

(1) A list of equipment, with permit numbers if applicable, which can be shut down without jeopardizing the public health or safety, and an estimate of the resultant reductions in carbon monoxide, hydrocarbons, nitrogen oxides, and particulate matter emissions.

(2) A list of all equipment, with permit numbers if applicable, which must be operated to protect the public health or safety, and an estimate of the carbon monoxide, hydrocarbons, nitrogen oxides, and particulate matter emissions from such equipment.

(iii) The owner or operator of any industrial, business, commercial, or governmental facility or activity employing more than 100 persons per shift at any one business address shall submit to the Administrator plans to curtail or cease operations causing air contaminants from vehicle use.

(iv) The plans required by paragraph (r)(5)(iii) of this section shall include the following information:

(A) The information requested in the California Air Resources Board's "Criteria for Approval of Air Pollution Emergency Abatement Plans" (Executive Order G-63).

(B) The total number of employees at the facility during each shift.

(C) The total number of motor vehicles and vehicle miles traveled for motor vehicles operated:

(1) By the company on company business on a normal weekday and a major national holiday.

(2) By employees commuting between home and the place of business on a normal weekday and a major national holiday.

(3) The minimum number of motor vehicles to be operated that are necessary to protect public health or safety.

(6) A copy of the stationary source curtailment and/or traffic abatement plans approved in accordance with the provisions of this paragraph shall be on

Environmental Protection Agency

§ 52.275

file and readily available on the premises to any person authorized to enforce the provisions of this paragraph.

(7) The owner or operator of any governmental, business, commercial, or industrial activity or facility listed in paragraph (r)(5) of this section shall submit a stationary source curtailment plan and/or traffic abatement plan to the Administrator within 60 days after promulgation of final rulemaking.

(8) The plans submitted pursuant to the requirements of this paragraph shall be reviewed by the Administrator for approval or disapproval according to the following schedule:

(i) For sources with emissions of hydrocarbons, carbon monoxide, or particulate matter greater than or equal to 454 metric tons (500 tons) per year, or for establishments employing 400 or more employees per shift, within 45 days after receipt.

(ii) For sources with emissions of hydrocarbons, carbon monoxide, or particulate matter greater than or equal to 91 metric tons (100 tons) per year and less than 454 metric tons (500 tons) per year, or for establishments employing more than 200 and less than 400 employees per shift, within 90 days after receipt.

(iii) For establishments employing 100 to 200 employees per shift, within 180 days after receipt.

(9) The owner or operator of any industrial, business, governmental or commercial establishment required to submit a plan by this paragraph shall be notified by the Administrator within 30 days after the plan has been evaluated as to whether the plan has been approved or disapproved. Any plan disapproved by the Administrator shall be modified to overcome the disapproval and resubmitted to the Administrator within 30 days of receipt of the notice of disapproval.

(10) Any source that violates any requirement of this regulation shall be subject to enforcement action under section 113 of the Act.

(11) All submittals or notifications required to be submitted to the Administrator by this regulation shall be sent to:

Regional Administrator, ATTN: Air and Hazardous Materials Division, Air Technical Branch, Technical Analysis Section (A-4-3),

Environmental Protection Agency, 215 Fremont Street, San Francisco, CA 94105.

(12) For the purposes of this regulation the following episode criteria shall apply to particulate matter episodes and Stage 3 photochemical oxidants episodes:

Pollutant	Averaging time (hours)	µg/m ³		
		Stage 1	Stage 2	Stage 3
Particulate matter	24	375	625	875
Photochemical oxidants ...	1			¹ 0.5

¹ Parts per million.

(13) The Fresno County Air Pollution Control District's Regulation VI, as submitted on October 23, 1974, relating to episodes for carbon monoxide and photochemical oxidants averaged over 1 hour, shall apply to particular matter episodes averaged over 24 hours, except that the Administrator shall insure that declaration procedures, notification procedures, source inspections, and termination of such episodes occur.

(14) The Administrator shall insure that the following actions will be taken in the source and receptor areas on the declaration of a Stage 1, Stage 2 or Stage 3 episode:

(i) For a Stage 1 or Stage 2 episode:

(A) Persons operating any facility or activity named in paragraph (r)(5) of this section shall implement the appropriate plans submitted in accordance with subparagraph (5) of the declared Stage 1 or Stage 2 episode for the appropriate air contaminant(s).

(ii) For a Stage 3 episode:

(A) The general public, schools, industrial, business, commercial, and governmental activities throughout Fresno County shall operate as though the day were a major national holiday.

[43 FR 22721, May 26, 1978]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.274, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

§ 52.275 Particulate matter control.

(a) The following rules or portions of rules are retained because they control emissions of particulate matter, and because there is no demonstration that their deletion would not interfere with the attainment and maintenance of the

national standards for particulate matter:

- (1) Lake County APCD.
 - (i) Part III-50 and Part V-1B, submitted on October 23, 1974, and previously approved under 40 CFR 52.223.
- (2) San Luis Obispo County APCD.
 - (i) Rule 113, submitted on February 21, 1972, and previously approved under 40 CFR 52.223.
 - (b) The following regulations are disapproved because they relax the control on particulate matter emissions without any accompanying analyses demonstrating that these relaxations will not interfere with the attainment and maintenance of the National Ambient Air Quality Standards.
 - (1) Amador County APCD.
 - (i) Rules 211 and 212, submitted on April 21, 1976. (Regulation V, Rules 13 and 14, submitted on June 30, 1972, and previously approved, are retained.)
 - (ii) Rules 207 and 212, submitted on October 13, 1977. (The analogous Rules 10 and 14 of Regulation V, submitted on June 30, 1972, and previously approved, are retained and shall remain in effect for Federal enforcement purposes.)
 - (2) Calaveras County APCD.
 - (i) Rule 211, submitted on October 13, 1977. (Rule 211, submitted on July 22, 1975, and previously approved, is retained and shall remain in effect for Federal enforcement purposes.)
 - (3) Del Norte County APCD.
 - (i) Rules 410(c)(7) and 420(e), submitted on November 10, 1976.
 - (ii) Rules 420(e) and (f), submitted on November 4, 1977.
 - (4) El Dorado County APCD.
 - (i) Rule 212, submitted on April 10, 1975, and Rule 211, submitted on August 2, 1976. (The analogous Rule 55, submitted on February 21, 1972, and previously approved, is retained and shall remain in effect for Federal enforcement purposes.)
 - (5) Humboldt County APCD.
 - (i) Rules 410(c)(7) and 420(e), submitted on November 10, 1976.
 - (ii) Rules 420(e) and (f), submitted on November 4, 1977.
 - (6) Mariposa County APCD.
 - (i) Rule 211, submitted on June 6, 1977. (Rule 211, submitted on January 10, 1975, and previously approved, is retained and shall remain in effect for Federal enforcement purposes.)

- (7) Mendocino County APCD.
 - (i) Rule 410(c)(7), submitted on November 10, 1976.
 - (ii) Rules 420(e) and (f), submitted on November 4, 1977.
- (8) Nevada County APCD.
 - (i) Rule 212, submitted on April 10, 1975, and Rule 211, submitted on April 21, 1976. (Rule 52.1, submitted on June 30, 1972, and previously approved, is retained and shall remain in effect for Federal enforcement purposes.)
- (9) Northern Sonoma County APCD.
 - (i) Rule 420(e), submitted on November 10, 1976.
 - (ii) Rules 420(e) and (f), submitted on October 13, 1977.
- (10) Placer County APCD.
 - (i) Rule 211, submitted on October 13, 1977. (The analogous Rule 61, submitted on June 30, 1972, and previously approved, is retained and shall remain in effect for Federal enforcement purposes.)
 - (ii) Rules 202, 207, and 211, submitted on October 15, 1979; and Section 61, and Rules 202 and 207, previously approved in the June 30, 1972, January 10, 1975, and October 13, 1977 submittals, are retained.
- (11) Plumas County APCD.
 - (i) Rule 211, submitted on June 6, 1977. (The analogous Rule 211, submitted on January 10, 1975, and previously approved, is retained and shall remain in effect for Federal enforcement purposes.)
- (12) San Luis Obispo County APCD.
 - (i) Rule 403, submitted on November 10, 1976.
- (13) Sierra County APCD.
 - (i) Rule 211, submitted on June 6, 1977. (The analogous Rule 211, submitted on January 10, 1975, and previously approved, is retained and shall remain in effect for Federal enforcement purposes.)
- (14) Trinity County APCD.
 - (i) Rules 410(c)(7) and 420(e), submitted on November 10, 1976.
 - (ii) Rules 420(e) and (f), submitted on November 4, 1977.
 - (c) The following regulations are disapproved because they relax the control on visible emissions without any accompanying analyses demonstrating that these relaxations will not interfere with the attainment and maintenance of the National Ambient Air

Quality Standards or any other applicable requirement of the Clean Air Act.

(1) South Coast Air Quality Management District.

(i) Rule 401, submitted on January 12, 1999.

[43 FR 25675, June 14, 1978]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.275, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

§ 52.276 Sulfur content of fuels.

(a) The following rules or portions of rules are disapproved since they represent a relaxation of previously submitted regulations and an adequate control strategy demonstration has not been submitted showing that the relaxation will not interfere with the attainment and maintenance of the National Ambient Air Quality Standards:

(1) North Central Coast Intrastate Region:

(i) Monterey Bay Unified APCD.

(A) Rule 412(a)(8), *Sulfur Content of Fuels*, submitted on October 23, 1974.

(b) The deletion of the following rules from the State implementation plan is disapproved since their deletion represents a relaxation of the control strategy, and an adequate demonstration showing that the relaxation will not interfere with the attainment and maintenance of the national ambient air quality standards has not been submitted:

(1) Southeast Desert Intrastate Region:

(i) Imperial County APCD.

(A) Rule 126, *Sulfur Contents of Fuels*, submitted on June 30, 1972 and previously approved under 40 CFR 52.223.

[42 FR 56606, Oct. 27, 1977, as amended at 43 FR 35695, Aug. 11, 1978]

§ 52.277 Oxides of nitrogen, combustion gas concentration limitations.

(a) The following rules are being retained to the extent that the new rules are less stringent than the previously approved rules:

(1) North Central Coast Intrastate Region:

(i) Monterey Bay Unified APCD.

(A) Rule 404(c) submitted on February 21, 1972 by the Monterey-Santa

Cruz Unified APCD and previously approved as part of the SIP, is being retained for sources combusting gaseous fuels. Rule 404(c) will be in effect for Monterey and Santa Cruz Counties only. Rule 404(c), submitted on November 10, 1976 by the Monterey Bay Unified APCD, will only be in effect for sources combusting liquid or solid fuels with heat input rates greater than 1½ billion BTU per hour in the Monterey and Santa Cruz portions of the Unified APCD.

(B) Rule 408(b), submitted on February 21, 1972 by the San Benito County APCD and previously approved as part of the SIP, is being retained for sources combusting liquid, solid, or gaseous fuels with heat input rates less than 1½ billion BTU per hour. Rule 408(b) will be in effect for San Benito County only. Rule 404(c), submitted on November 10, 1976 by the Monterey Bay unified APCD, will only be in effect for sources combusting liquid, solid, or gaseous fuels with heat input rates greater than 1½ billion BTU per hour in the San Benito County portion of the Unified APCD.

[42 FR 56606, Oct. 27, 1977]

§ 52.278 Oxides of nitrogen control.

(a) The following regulations are disapproved because they relax the control of nitrogen oxides emissions without an accompanying analysis demonstrating that this relaxation will not interfere with the attainment and maintenance of the National Ambient Air Quality Standards.

(1) South central coast intrastate AQCR.

(i) San Luis Obispo County APCD.

(A) Rule 405(A)(1), *Nitrogen Oxides Emission Standards Limitations and Prohibitions* submitted on November 10, 1976, is disapproved; and Rule 114(4), *Gaseous Contaminants Oxides of Nitrogen* submitted on February 21, 1972 and previously approved in 40 CFR 52.223, is retained.

[43 FR 34467, Aug. 4, 1978]

§ 52.279 Food processing facilities.

(a) The following regulations are disapproved because they conflict with the requirements of 40 CFR Subpart I [formerly § 51.18], "Review of new

sources and modifications,” and relax the control on emissions from food processing facilities without any accompanying analyses demonstrating that these relaxations will not interfere with the attainment and maintenance of the National Ambient Air Quality Standards.

(1) Merced County APCD Rules 210.1-II-J, 210.1-VII-F, 408-C (new sentences two and three), adopted on August 21, 1984, and submitted on October 5, 1984.

(2) Bay Area Air Quality Management District sections 2-2-119, 2-2-120. Adopted on September 19, 1984, and submitted on October 5, 1984.

[52 FR 3646, Feb. 5, 1987, as amended at 55 FR 31835, Aug. 6, 1990]

§ 52.280 Fuel burning equipment.

(a) The following rules and regulations are disapproved because they relax the control on emissions from fuel burning equipment without any accompanying analyses demonstrating that these relaxations will not interfere with the attainment and maintenance of the National Ambient Air Quality Standards.

(1) Mountain Counties Intrastate AQCR:

(i) Amador County APCD.

(A) Rules 209, submitted on April 21, 1976 and October 15, 1979, are disapproved; and Regulation V, Rule 19, previously approved in the June 30, 1972 submittal, is retained.

(B) Rule 210(B)(1), submitted on October 15, 1979, is disapproved; and Rules 11 and 210, previously approved in the June 30, 1972 and April 21, 1976 submittals, are retained.

(ii) Calaveras County APCD.

(A) Rule 209, Fossil Fuel-Steam Generator Facility, submitted on October 13, 1977, is disapproved; and Rule 408, Fuel Burning Equipment, previously approved in the June 30, 1972, submittal, is retained and shall remain in effect for Federal enforcement purposes.

(iii) Tuolumne County APCD.

(A) Rule 210, submitted on October 15, 1979, is disapproved; and Rule 407, previously approved in the June 30, 1972 submittal, is retained.

(iv) Placer County APCD.

(A) Rule 210, submitted on October 15, 1979, is disapproved, and Rule 210,

previously approved in the October 13, 1977 submittal, is retained.

(2) Sacramento Valley Intrastate AQCR:

(i) Yolo-Solano APCD.

(A) Rule 2.16, *Fuel Burning Heat or Power Generators*, submitted on July 19, 1974 is disapproved; and Rule 2.16, *Fuel Burning Equipment*, submitted on June 30, 1972 and previously approved as part of the SIP in 40 CFR 52.223, is retained.

(3) Southeast Desert Intrastate AQCR.

(i) San Bernardino County Desert APCD.

(A) Rule 474, *Fuel Burning Equipment—Oxides of Nitrogen*, submitted November 4, 1977, is disapproved. Rule 68 (same title) submitted June 30, 1972 and approved in 40 CFR 52.223 is retained.

(b) The deletion of the following rules or portions of rules from the State implementation plan is disapproved since their deletion represents a relaxation of the control strategy and an adequate demonstration showing that the relaxation will not interfere with the attainment and maintenance of the national ambient air quality standards has not been submitted:

(1) Southeast Desert Intrastate Region:

(i) Imperial County APCD.

(A) Rule 131, Fuel Burning Equipment, submitted on February 21, 1972 and previously approved under 40 CFR 52.223.

(ii) San Bernardino County.

(A) Rule 67, Fuel Burning Equipment as applied to new sources. The emission limit of Rule 67 is retained and is applicable only to existing sources already granted a permit.

(c) The emission limits of Rules 67 and 72 are partially retained, applicable only to (existing) sources granted permits prior to June 17, 1981.

(1) South Coast Air Quality Management District.

(i) Rules 67, *Fuel Burning Equipment*, and 72, *Fuel Burning Equipment*, submitted on November 19, 1979.

[43 FR 25677, 25684 June 14, 1978, as amended at 43 FR 35696, Aug. 11, 1978; 43 FR 51774, Nov. 7, 1978; 43 FR 59490, Dec. 21, 1978; 44 FR 5664, Jan. 29, 1979; 46 FR 3889, Jan. 16, 1981; 46 FR 27116, 27118, May 18, 1981; 47 FR 25016, June 9, 1982]

§ 52.281 Visibility protection.

(a) The requirements of section 169A of the Clean Air Act are not met, because the plan does not include approvable procedures for protection of visibility in mandatory Class I Federal areas.

(b) [Reserved]

(c) Regulations for visibility new source review. The provisions of § 52.27 are hereby incorporated and made part of the applicable plan for the State of California only with respect to:

(1) Mendocino County air pollution control district,

(2) Monterey County air pollution control district,

(3) North Coast Unified air quality management district,

(4) Northern Sonoma County air pollution control district, and

(5) Sacramento County air pollution control district.

(d) *Plan provisions.* The provisions of § 52.28 are hereby incorporated and made part of the applicable plan for the State of California, except for the air pollution control districts listed in this paragraph (d). The provisions of § 52.28 remain the applicable plan for any Indian reservation lands, and any other area of Indian country where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction, located within the State of California, including any such areas located in the air pollution control districts listed in this paragraph (d).

(1) Monterey County Air Pollution Control District.

(2) Sacramento County Air Pollution Control District.

(3) Calaveras County Air Pollution Control District.

(4) Mariposa County Air Pollution Control District.

(5) Northern Sierra Air Pollution Control District.

(6) San Diego County Air Pollution Control District.

(7) Eastern Kern Air Pollution Control District.

(8) Tuolumne County Air Pollution Control District.

(9) Mojave Desert Air Quality Management District.

(10) Antelope Valley Air Quality Management District.

(11) El Dorado County Air Quality Management District.

(12) Placer County Air Pollution Control District.

(13) Great Basin Unified Air Pollution Control District.

(14) Amador Air District.

(15) San Luis Obispo County Air Pollution Control District.

(16) Tehama County Air Pollution Control District.

(e) [Reserved]

(f) *Approval.* On March 16, 2009, the California Air Resources Board submitted the “California Regional Haze Plan” (“CRHP”). The CRHP, as amended and supplemented on September 8, 2009 and June 9, 2010, meets the requirements of Clean Air Act section 169B and the Regional Haze Rule in 40 CFR 51.308.

(g) *Approval.* On June 16, 2014, the California Air Resources Board submitted the “California Regional Haze Plan 2014 Progress Report” (“Progress Report”). The Progress Report meets the requirements of Clean Air Act sections 169A and 169B and the Regional Haze Rule in 40 CFR 51.308.

[50 FR 28553, July 12, 1985, as amended at 52 FR 45138, Nov. 24, 1987; 76 FR 34611, June 14, 2011; 80 FR 17331, Apr. 1, 2015; 82 FR 3129, Jan. 10, 2017; 85 FR 73636, Nov. 19, 2020; 85 FR 74265, Nov. 20, 2020; 87 FR 58732, Sept. 28, 2022; 87 FR 74319, Dec. 5, 2022; 88 FR 7879, Feb. 7, 2023; 88 FR 42271, June 30, 2023; 88 FR 42640, July 3, 2023; 88 FR 63033, Sept. 14, 2023; 88 FR 65819, Sept. 26, 2023; 88 FR 88257, Dec. 21, 2023; 89 FR 8080, Feb. 6, 2024; 89 FR 42810, May 16, 2024; 90 FR 19428, May 8, 2025]

§ 52.282 Control strategy and regulations: Ozone.

(a) *Attainment determination.* EPA has determined that the Ventura County severe 1-hour ozone nonattainment area attained the 1-hour ozone NAAQS by the applicable attainment date of November 15, 2005. EPA also has determined that the Ventura County severe 1-hour ozone nonattainment area is not subject to the requirements of section 185 of the Clean Air Act (CAA) for the 1-hour standard and that the State is not required to submit a SIP under Section 182(d)(3) of the CAA to implement a section 185 program for the 1-hour standard in this area. In addition, the requirements of section 172(c)(9)

(contingency measures) for the 1-hour standard do not apply to the area.

(b) *Approval.* On December 19, 2007, the California Air Resources Board submitted a maintenance plan for the 1997 8-hour ozone NAAQS for the Monterey Bay Area as required by section 110(a)(1) of the Clean Air Act, as amended in 1990, and 40 CFR 51.905(a)(4). Elements of the section 110(a)(1) maintenance plan for ozone include a base year (2002) attainment emissions inventory for ozone, a demonstration of maintenance of the ozone NAAQS with projected emissions inventories through the year 2014 for ozone, a plan to verify continued attainment, and a contingency plan. The maintenance plan meets the Federal requirements of Clean Air Act section 110(a)(1) and 40 CFR 51.905(a)(4) and is approved as a revision to the California State Implementation Plan for the above mentioned area.

(c) *Determination of attainment.* Effective January 4, 2010, EPA is determining that the Imperial County, California 8-hour ozone nonattainment area has attained the 1997 8-hour ozone standard. Under the provisions of EPA's ozone implementation rule (see 40 CFR 51.918), this determination suspends the reasonable further progress and attainment demonstration requirements of section 182(b)(1) and related requirements of section 172(c)(9) of the Clean Air Act for as long as the area does not monitor any violations of the 8-hour ozone standard. If a violation of the 1997 ozone NAAQS is monitored in the Imperial County, California 8-hour ozone nonattainment area, this determination shall no longer apply.

(d) *Determinations that Certain Areas Did Not Attain the 1-Hour Ozone NAAQS.* EPA has determined that the Los Angeles-South Coast Air Basin Area and the San Joaquin Valley Area extreme 1-hour ozone nonattainment areas did not attain the 1-hour ozone NAAQS by the applicable attainment date of November 15, 2010 and that the Southeast Desert Modified Air Quality Maintenance Area severe-17 1-hour ozone nonattainment area did not attain the 1-hour ozone NAAQS by the applicable attainment date of November 15, 2007. These determinations bear on the areas' obligations with respect to the

one-hour ozone standard anti-backsliding requirements whose implementation is triggered by a determination of failure to attain by the applicable attainment date: section 172(c)(9) contingency measures for failure to attain and sections 182(d)(3) and 185 major stationary source fee programs.

(e) *Determinations of attainment.* Effective June 3, 2016.

(1) *Approval of applications for extensions of applicable attainment dates.* Under section 181(a)(5) of the Clean Air Act, the EPA is approving the applications submitted by the California Air Resources Board dated June 1, 2015, referencing the District's letter of May 19, 2015, for extensions of the applicable attainment date for the San Luis Obispo (Eastern San Luis Obispo), CA 2008 8-hour ozone nonattainment areas from July 20, 2015 to July 20, 2016.

(2) *Determinations of attainment.* The EPA has determined that the Calaveras County, Chico (Butte County), San Francisco Bay Area and Tuscan Buttes 2008 8-hour ozone nonattainment areas in California have attained the 2008 8-hour ozone standard by the July 20, 2015 applicable attainment date, based upon complete quality-assured data for 2012–2014. Therefore, the EPA has met its obligation pursuant to CAA section 181(b)(2)(A) to determine, based on the area's air quality data as of the attainment date, whether the area attained the standard. As a result of these determinations, the Calaveras County, Chico (Butte County), San Francisco Bay Area and Tuscan Buttes 2008 8-hour ozone nonattainment areas in California will not be reclassified for failure to attain by their July 20, 2015, applicable attainment date under section 181(b)(2)(A).

(3) *Determinations of attainment.* EPA is determining that the Amador and Calaveras Counties, Chico, Kern County, Mariposa and Tuolumne Counties, Nevada County, Sutter County and Ventura County 8-hour ozone nonattainment areas have attained the 1997 8-hour ozone standard, based upon complete quality-assured data for 2009–2011. Under the provisions of EPA's ozone implementation rule (see 40 CFR 51.918), these determinations suspend the attainment demonstrations and associated reasonably available control

measures, reasonable further progress plans, contingency measures, and other planning SIPs related to attainment for as long as the areas continue to attain the 1997 8-hour ozone standard. If EPA determines, after notice-and-comment rulemaking, that any of these areas no longer meets the 1997 ozone NAAQS, the corresponding determination of attainment for that area shall be withdrawn.

(f) *Determination of attainment.* EPA has determined that, as of November 19, 2012, the Sacramento Metro 1-hour ozone nonattainment area has attained the 1-hour ozone standard, based upon complete, quality-assured and certified ambient air quality monitoring data for 2007–2009.

(g) *Determination of attainment.* EPA has determined that, as of May 15, 2015, the Southeast Desert 1-hour ozone nonattainment area has attained the 1-hour ozone standard, based upon complete, quality-assured and certified ambient air quality monitoring data for 2011–2013.

(h) *Determination of attainment.* EPA has determined that, as of August 17, 2016, the San Joaquin Valley 1-hour ozone nonattainment area has attained the 1-hour ozone standard, based upon sufficient, quality-assured and certified ambient air quality monitoring data for 2012–2014.

(i) *Determination of attainment.* The EPA has determined that, as of January 20, 2017, the San Luis Obispo (Eastern San Luis Obispo) 2008 8-hour ozone nonattainment area in California has attained the 2008 ozone standard by the July 20, 2016 applicable attainment date, based upon complete, quality-assured and certified data for 2013–2015. Therefore, the EPA has met its obligation pursuant to CAA section 181(b)(2)(A) to determine, based on the area's air quality data as of the attainment date, whether the area attained the standard. As a result of this determination, the San Luis Obispo (Eastern San Luis Obispo) 2008 ozone nonattainment area in California will not be reclassified for failure to attain by the July 20, 2016 applicable attainment date under section 181(b)(2)(A).

(j) *Determination of attainment.* The EPA has determined that, as of February 21, 2017, the Mariposa County

2008 8-hour ozone nonattainment area in California has attained the 2008 ozone standard, based upon complete, quality-assured and certified data for 2013–2015. Under the provisions of the EPA's ozone implementation rule (see 40 CFR 51.1118), this determination suspends the requirements for the area to submit attainment demonstrations and associated reasonably available control measures, reasonable further progress plans, contingency measures for failure to attain or make reasonable further progress and other planning SIPs related to attainment of the 2008 ozone standard for as long as the area continues to attain the 2008 ozone standard. If the EPA determines, after notice-and-comment rulemaking, that the Mariposa County ozone nonattainment area no longer meets the 2008 ozone standard, the corresponding determination of attainment for this area shall be withdrawn.

(k) *Determination of attainment by the attainment date.* Effective September 23, 2019, The EPA has determined that the Mariposa County Moderate nonattainment area in California attained the 2008 8-hour ozone National Ambient Air Quality Standards (NAAQS) by the applicable attainment date of July 20, 2018, based upon complete quality-assured and certified data for the calendar years 2015–2017.

(l) *Determination of attainment by the attainment date.* Effective August 30, 2021, On February 21, 2019, the EPA determined that San Francisco Bay Area, CA, attained the revoked 1997 8-hour ozone National Ambient Air Quality Standards (NAAQS) by the applicable attainment date of June 15, 2007. The determination was based upon complete quality-assured and certified data for the 3 calendar years 2004–2006. Further, the EPA determined that the Ventura County, CA, area attained the standards for the revoked 1997 8-hour NAAQS by the applicable attainment date of June 15, 2013. The determination was based upon complete quality-assured and certified data for the 3 calendar years 2010–2012.

(m) *Determinations of attainment by the attainment date.* Effective November 7, 2022, The EPA has determined that the Amador County and San Francisco Bay Marginal nonattainment areas in

California attained the 2015 8-hour ozone National Ambient Air Quality Standards (NAAQS) by the applicable attainment date of August 3, 2021, based upon complete quality-assured and certified data for the calendar years 2018–2020.

(n) *Determinations of attainment by the attainment date.* Effective November 21, 2022.

(1) *Determinations of attainment by the attainment date.* The EPA has determined that the Nevada County (Western part) and Ventura County Serious nonattainment areas in California attained the 2008 8-hour ozone National Ambient Air Quality Standards (NAAQS) by the applicable attainment date of July 20, 2021, based upon complete, quality-assured and certified data for the calendar years 2018–2020.

(2) *Determinations of attainment by the attainment date.* The EPA has determined that the Butte County, Calaveras County, San Luis Obispo (Eastern part), Sutter Buttes, Tuolumne County, and Tuscan Buttes Marginal nonattainment areas in California attained the 2015 8-hour ozone National Ambient Air Quality Standards (NAAQS) by the applicable attainment date of August 3, 2021, based upon complete, quality-assured and certified data for the calendar years 2018–2020.

[74 FR 25156, May 27, 2009, as amended at 74 FR 66921, Dec. 17, 2009; 74 FR 63310, Dec. 3, 2009; 76 FR 82146, Dec. 30, 2011; 77 FR 64039, Oct. 18, 2012; 77 FR 71555, Dec. 3, 2012; 80 FR 20167, Apr. 15, 2015; 81 FR 26708, May 4, 2016; 81 FR 46612, July 18, 2016; 81 FR 93621, 93627, Dec. 21, 2016; 84 FR 44249, Aug. 23, 2019; 86 FR 40787, July 29, 2021; 87 FR 60913, Oct. 7, 2022; 87 FR 63701, Oct. 20, 2022]

§ 52.283 Interstate Transport.

(a) *Approval.* On November 16, 2007, the California Air Resources Board submitted the “Interstate Transport State Implementation Plan (SIP) for the 1997 8-hour Ozone Standard and PM_{2.5} to satisfy the Requirements of Clean Air Act section 110(a)(2)(D)(i) for the State of California (September 21, 2007)” (“2007 Transport SIP”). The 2007 Transport SIP and the additional plan elements listed below meet the following specific requirements of Clean Air Act section 110(a)(2)(D)(i) for the 1997 8-hour ozone and 1997 PM_{2.5} NAAQS (“1997 standards”).

(1) The requirements of section 110(a)(2)(D)(i)(II) regarding interference with other states’ measures to protect visibility for the 1997 standards are met by chapter 3 (Emissions Inventory), chapter 4 (California 2018 Progress Strategy), and chapter 8 (Consultation) of the “California Regional Haze Plan,” adopted January 22, 2009.

(2) The requirements of CAA section 110(a)(2)(D)(i)(I) regarding significant contribution to nonattainment of the 1997 standards in any other State and interference with maintenance of the 1997 standards by any other State.

(3) The requirements of section 110(a)(2)(D)(i)(II) regarding interference with any other state’s measures required under title I, part C of the Clean Air Act to prevent significant deterioration of air quality, except that these requirements are not fully met in the Air Pollution Control Districts (APCDs) or Air Quality Management Districts (AQMDs) listed in this paragraph.

- (i) Amador County APCD
- (ii) Butte County AQMD
- (iii) Calaveras County APCD
- (iv) Feather River AQMD
- (v) Northern Sierra AQMD
- (vi) Mariposa County APCD
- (vii) Tuolumne County APCD
- (viii) North Coast Unified AQMD

(ix) All other areas in California that are subject to the Federal PSD program as provided in 40 CFR 52.270.

(b) [Reserved]

(c) *2006 PM_{2.5} NAAQS and 2012 PM_{2.5} NAAQS:* The 2014 Multi-pollutant Infrastructure SIP, submitted on March 6, 2014, and the additional plan elements listed below meet the following specific requirements of Clean Air Act section 110(a)(2)(D)(i) for the 2006 PM_{2.5} NAAQS and 2012 PM_{2.5} NAAQS.

(1) The requirements of section 110(a)(2)(D)(i)(II) regarding interference with any other state’s measures required under title I, part C of the Clean Air Act to prevent significant deterioration of air quality, except that these requirements are not fully met in the Air Pollution Control Districts (APCDs) or Air Quality Management Districts (AQMDs) listed in this paragraph.

(i) [Reserved]

(ii) North Coast APCD (PSD requirements for the regulation of $PM_{2.5}$, $PM_{2.5}$ precursors, condensable $PM_{2.5}$, $PM_{2.5}$ increments, and NO_x as an ozone precursor, only)

(iii) [Reserved]

(iv) South Coast AQMD (PSD requirements for the NAAQS, only).

(v) All other areas in California that are subject to the Federal PSD program as provided in 40 CFR 52.270.

(2) The requirements of section 110(a)(2)(D)(i)(II) regarding interference with other states' measures to protect visibility are met by chapter 3 (Emissions Inventory), chapter 4 (California 2018 Progress Strategy), and chapter 8 (Consultation) of the "California Regional Haze Plan," adopted January 22, 2009.

(3) The requirements of CAA section 110(a)(2)(D)(i)(I) regarding significant contribution to nonattainment of the 2006 $PM_{2.5}$ NAAQS and 2012 $PM_{2.5}$ NAAQS in any other state and interference with maintenance of the 2006 $PM_{2.5}$ NAAQS and 2012 $PM_{2.5}$ NAAQS by any other state.

(d) *2008 ozone NAAQS*: The 2014 Multi-pollutant Infrastructure SIP, submitted on March 6, 2014, and the additional plan elements listed below meet the following specific requirements of Clean Air Act section 110(a)(2)(D)(i) for the 2008 ozone NAAQS.

(1) The requirements of section 110(a)(2)(D)(i)(II) regarding interference with any other state's measures required under title I, part C of the Clean Air Act to prevent significant deterioration of air quality, except that these requirements are not fully met in the Air Pollution Control Districts (APCDs) or Air Quality Management Districts (AQMDs) listed in this paragraph.

(i) [Reserved]

(ii) North Coast APCD (PSD requirements for the regulation of $PM_{2.5}$, $PM_{2.5}$ precursors, condensable $PM_{2.5}$, $PM_{2.5}$ increments, and NO_x as an ozone precursor, only)

(iii) [Reserved]

(iv) South Coast AQMD (PSD requirements for the NAAQS, only).

(v) All other areas in California that are subject to the Federal PSD program as provided in 40 CFR 52.270.

(2) The requirements of section 110(a)(2)(D)(i)(II) regarding interference with other states' measures to protect visibility are met by chapter 3 (Emissions Inventory), chapter 4 (California 2018 Progress Strategy), and chapter 8 (Consultation) of the "California Regional Haze Plan," adopted January 22, 2009.

(3) The requirements of CAA section 110(a)(2)(D)(i)(I) regarding significant contribution to nonattainment of the 2008 ozone NAAQS in any other State and interference with maintenance of the 2010 ozone NAAQS by any other State.

(e) *2008 Pb NAAQS*: The 2011 Pb Infrastructure SIP, submitted on September 22, 2011, and the 2014 Multi-pollutant Infrastructure SIP, submitted on March 6, 2014, and the additional plan elements listed below meet the following specific requirements of Clean Air Act section 110(a)(2)(D)(i) for the 2008 Pb NAAQS.

(1) The requirements of CAA section 110(a)(2)(D)(i)(I) regarding significant contribution to nonattainment of the 2008 Pb NAAQS in any other State and interference with maintenance of the 2008 Pb NAAQS by any other State.

(2) The requirements of section 110(a)(2)(D)(i)(II) regarding interference with any other state's measures required under title I, part C of the Clean Air Act to prevent significant deterioration of air quality, except that these requirements are not fully met in the Air Pollution Control Districts (APCDs) or Air Quality Management Districts (AQMDs) listed in this paragraph.

(i) [Reserved]

(ii) North Coast APCD (PSD requirements for the regulation of $PM_{2.5}$, $PM_{2.5}$ precursors, condensable $PM_{2.5}$, $PM_{2.5}$ increments, and NO_x as an ozone precursor, only)

(iii) [Reserved]

(iv) South Coast AQMD (PSD requirements for the NAAQS, only).

(v) All other areas in California that are subject to the Federal PSD program as provided in 40 CFR 52.270.

(3) The requirements of section 110(a)(2)(D)(i)(II) regarding interference with other states' measures to protect visibility are met by chapter 3 (Emissions Inventory), chapter 4 (California

2018 Progress Strategy), and chapter 8 (Consultation) of the “California Regional Haze Plan,” adopted January 22, 2009.

(f) *2010 NO₂ NAAQS*: The 2012 NO₂ Infrastructure SIP, submitted on November 15, 2012, and the 2014 Multi-pollutant Infrastructure SIP, submitted on March 6, 2014, and the additional plan elements listed below meet the following specific requirements of Clean Air Act section 110(a)(2)(D)(i) for the 2010 NO₂ NAAQS.

(1) The requirements of CAA section 110(a)(2)(D)(i)(I) regarding significant contribution to nonattainment of the 2010 NO₂ NAAQS in any other State and interference with maintenance of the 2010 NO₂ NAAQS by any other State.

(2) The requirements of section 110(a)(2)(D)(i)(II) regarding interference with any other state’s measures required under title I, part C of the Clean Air Act to prevent significant deterioration of air quality, except that these requirements are not fully met in the Air Pollution Control Districts (APCDs) or Air Quality Management Districts (AQMDs) listed in this paragraph.

(i) [Reserved]

(ii) North Coast APCD (PSD requirements for the regulation of PM_{2.5}, PM_{2.5} precursors, condensable PM_{2.5}, PM_{2.5} increments, and NO_x as an ozone precursor, only)

(iii) [Reserved]

(iv) South Coast AQMD (PSD requirements for the NAAQS, only).

(v) All other areas in California that are subject to the Federal PSD program as provided in 40 CFR 52.270.

(3) The requirements of section 110(a)(2)(D)(i)(II) regarding interference with other states’ measures to protect visibility are met by chapter 3 (Emissions Inventory), chapter 4 (California 2018 Progress Strategy), and chapter 8 (Consultation) of the “California Regional Haze Plan,” adopted January 22, 2009.

(g) *2010 SO₂ NAAQS*: The 2014 Multi-pollutant Infrastructure SIP, submitted on March 6, 2014, and the additional plan elements listed below meet the following specific requirements of Clean Air Act section 110(a)(2)(D)(i) for the 2010 SO₂ NAAQS.

(1) The requirements of section 110(a)(2)(D)(i)(II) regarding interference with any other state’s measures required under title I, part C of the Clean Air Act to prevent significant deterioration of air quality, except that these requirements are not fully met in the Air Pollution Control Districts (APCDs) or Air Quality Management Districts (AQMDs) listed in this paragraph.

(i) [Reserved]

(ii) North Coast APCD (PSD requirements for the regulation of PM_{2.5}, PM_{2.5} precursors, condensable PM_{2.5}, PM_{2.5} increments, and NO_x as an ozone precursor, only)

(iii) [Reserved]

(iv) South Coast AQMD (PSD requirements for the NAAQS, only).

(v) All other areas in California that are subject to the Federal PSD program as provided in 40 CFR 52.270.

(2) The requirements of section 110(a)(2)(D)(i)(II) regarding interference with other states’ measures to protect visibility are met by chapter 3 (Emissions Inventory), chapter 4 (California 2018 Progress Strategy), and chapter 8 (Consultation) of the “California Regional Haze Plan,” adopted January 22, 2009.

(3) The requirements of CAA section 110(a)(2)(D)(i)(I) regarding significant contribution to nonattainment of the 2010 SO₂ NAAQS in any other State and interference with maintenance of the 2010 SO₂ NAAQS by any other State.

(h) *2015 ozone NAAQS*. The 2018 Infrastructure SIP Revision, submitted on October 1, 2018, does not meet the following specific requirements of Clean Air Act section 110(a)(2)(D)(i)(I) for the 2015 ozone national ambient air quality standards (NAAQS).

(1) The requirements of CAA section 110(a)(2)(D)(i)(I) regarding significant contribution to nonattainment of the 2015 ozone NAAQS in any other State and interference with maintenance of the 2015 ozone NAAQS by any other State.

(2) [Reserved]

[76 FR 34611, June 14, 2011, as amended at 76 FR 34876, June 15, 2011; 76 FR 48006, Aug. 8, 2011; 81 FR 18780, Apr. 1, 2016; 81 FR 69392, Oct. 6, 2016; 82 FR 30773, July 3, 2017; 83 FR 14756, Apr. 6, 2018; 83 FR 65101, Dec. 19, 2018; 88 FR 9381, Feb. 13, 2023]

§ 52.284 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of nitrogen oxides?

(a) The owner and operator of each source located in the State of California and Indian country within the borders of the State and for which requirements are set forth in § 52.40 and § 52.41, § 52.42, § 52.43, § 52.44, § 52.45, or § 52.46 must comply with such requirements with regard to emissions occurring in 2026 and each subsequent year.

(b) Notwithstanding any other provision of this part, the effectiveness of paragraph (a) of this section is stayed.

[88 FR 36890, June 5, 2023, as amended at 89 FR 87969, Nov. 6, 2024]

§ 52.285 Review of new sources and modifications—Mojave Desert Air Quality Management District.

(a) *Plan overview*—(1) *What is the purpose of the Federal Implementation Plan (FIP or “plan”)?*

(i) The FIP has the following purposes: It establishes the Federal preconstruction permitting requirements for new major sources and major modifications located in nonattainment areas within the Mojave Desert Air Quality Management District (MDAQMD or “District”) that are major for a nonattainment pollutant.

(ii) The plan serves as the Federal nonattainment new source review (NNSR or “nonattainment major NSR”) plan for the area described in paragraph (a)(1)(i) of this section, which the EPA has determined does not meet all of the Clean Air Act (CAA or “Act”) title I part D requirements for NNSR programs. Sources subject to the plan must comply with the provisions and requirements of 40 CFR part 51, appendix S. The FIP also sets forth the criteria and procedures that the reviewing authority (as defined in paragraph (b)(1)(v) of this section) must use to issue permits under the plan. For the purposes of the plan, the term *SIP* means any EPA-approved implementation plan for the area administered by the MDAQMD.

(iii) Paragraph (f)(3) of this section sets forth procedures for appealing a permit decision issued under the plan.

(iv) The plan does not apply in Indian country, as defined in 18 U.S.C. 1151 and

40 CFR 49.167, located within the MDAQMD.

(2) *Where does the plan apply?* (i) The provisions of the plan apply to the proposed construction of any new major stationary source or major modification in the MDAQMD that is major for a nonattainment pollutant, if the stationary source or modification is located anywhere in the designated nonattainment area.

(3) *What general provisions apply under the plan?* The following general provisions apply to you as an owner or operator of a source:

(i) If you propose to construct a new major source or a major modification in a nonattainment area in the MDAQMD, you must obtain a Federal NNSR permit (“permit”) under the plan before beginning actual construction. You may not begin actual construction after the effective date of the plan without applying for and receiving a Federal NNSR permit that authorizes construction pursuant to the plan.

(ii) You must construct and operate your source or modification in accordance with the terms of your permit issued under the plan.

(iii) Issuance of a permit under the plan does not relieve you of the responsibility to fully comply with applicable provisions of any EPA-approved implementation plan or FIP, and any other requirements under applicable law. This includes obligations to comply with any EPA-approved SIP provisions that satisfy Federal new source review (NSR) requirements.

(b) *Definitions.* For the purposes of the plan, the definitions in 40 CFR part 51, appendix S, paragraph II.A, and 40 CFR 51.100 apply, except for paragraphs (b)(1) through (6) of this section, which replace the corresponding definitions found in part 51, appendix S:

(1) *Actual emissions* means the actual rate of emissions of a regulated NSR pollutant from an emissions unit, as determined in accordance with paragraphs (b)(1)(i) and (ii) of this section, except that this paragraph (b)(1) shall not apply for calculating whether a significant emissions increase has occurred, or for establishing a PAL under

paragraph IV.K of 40 CFR part 51, appendix S. Instead, 40 CFR part 51, appendix S, paragraphs II.A.24 and 30, shall apply for those purposes.

(i) In general, actual emissions as of a particular date shall equal the average rate, in tons per year, at which the unit actually emitted the pollutant during a consecutive 24-month period that precedes the particular date and that is representative of normal source operation. The reviewing authority shall allow the use of a different time period upon a determination that it is more representative of normal source operation. Actual emissions shall be calculated using the unit's actual operating hours, production rates, and types of materials processed, stored, or combusted during the selected time period.

(ii) For any emissions unit that has not begun normal operations on the particular date, actual emissions shall equal the potential to emit of the unit on that date.

(2) *Enforceable as a practical matter* means that an emission limitation or other standard is both legally and practically enforceable as follows:

(i) An emission limitation or other standard is legally enforceable if the reviewing authority has the legal power to enforce it.

(ii) Practical enforceability for an emission limitation or for other standards (design standards, equipment standards, work practices, operational standards, pollution prevention techniques) in a permit for a source is achieved if the permit's provisions specify:

(A) A limitation or standard and the emissions units or activities at the source subject to the limitation or standard;

(B) The time period for the limitation or standard (*e.g.*, hourly, daily, monthly and/or annual limits such as rolling annual limits); and

(C) The method to determine compliance, including appropriate monitoring, recordkeeping, reporting, and testing.

(3) *Environmental Appeals Board* means the Board within the EPA described in 40 CFR 1.25(e).

(4) *Nonattainment pollutant* means any regulated NSR pollutant for which the

MDAQMD, or portion of the MDAQMD, has been designated as nonattainment, as codified in 40 CFR 81.305, as well as any precursor of such regulated NSR pollutant specified in 40 CFR part 51, appendix S, paragraph II.A.31(ii)(b).

(5) *Reviewing authority* means the Administrator of EPA Region IX, but it may include the MDAQMD if the Administrator delegates the power to administer the FIP under paragraph (g) of this section.

(6) *Significant* means, in reference to an emissions increase or a net emissions increase, and notwithstanding the definition of "significant" in 40 CFR part 51, appendix S, paragraph II.A.10, any increase in actual emissions of volatile organic compounds or oxides of nitrogen that would result from any physical change in, or change in the method of operation of, a major stationary source locating in a serious or severe ozone nonattainment area if such emissions increase of volatile organic compounds or oxides of nitrogen exceeds 25 tons per year when aggregated with all other net emissions increases from the source over any period of 5 consecutive calendar years that includes the calendar year in which such increase occurred.

(c) *Does the plan apply to me?* (1) In any MDAQMD nonattainment area, the requirements of the plan apply to you under the following circumstances:

(i) If you propose to construct a new major stationary source and your source is a major source of nonattainment pollutant(s).

(ii) If you own or operate a major stationary source and propose to construct a major modification, where your source is a major source of nonattainment pollutant(s) and the proposed modification is a major modification for the nonattainment pollutant.

(2) At such time that a particular source or modification becomes a major stationary source or major modification solely by virtue of a relaxation in any enforceable limitation that was established after August 7, 1980, on the capacity of the source or modification otherwise to emit a pollutant, such as a restriction on hours of operation, then the requirements of the plan shall apply to the source or modification as though construction

had not yet commenced on the source or modification.

(d) *Permit approval criteria*—(1) *What are the general criteria for permit approval?* The criteria for approval of applications for permits submitted pursuant to the plan are provided in part D of title I of the Act and in 40 CFR 51.160 through 51.165 and 40 CFR part 51, appendix S.

(2) *What are the plan-specific criteria for permit approval?* Consistent with the requirements in 40 CFR part 51, appendix S, the reviewing authority shall not approve a permit application unless it meets the following criteria:

(i) The lowest achievable emission rate (LAER) requirement for any NSR pollutant subject to the plan and monitoring, recordkeeping, reporting, and testing as necessary to assure compliance with LAER.

(ii) Certification that all existing major sources owned or operated by the applicant in California are in compliance or, on a schedule for compliance, with all applicable emission limitations and standards under the Act.

(iii) Any source or modification subject to the plan must obtain emission reductions (offsets) from existing sources in the area of the proposed source (whether or not under the same ownership) such that there will be reasonable progress toward attainment of the applicable NAAQS. Notwithstanding 40 CFR part 51, appendix S, paragraph IV.G.5, interprecursor offsetting is not permitted between precursors of ozone. A demonstration of reasonable progress toward attainment shall include:

(A) A demonstration that the emission offsets will provide a net air quality benefit in the affected area, as required under 40 CFR part 51, appendix S, paragraph IV.A, Condition 4.

(B) A demonstration that emissions reductions otherwise required by the Act are not credited for purposes of satisfying the offset requirements in this paragraph (d)(2)(iii) and part D of title I of the Act.

(iv) An analysis of alternative sites, sizes, production processes and environmental control techniques for such proposed major source or major modification that demonstrates that the benefits of the proposed major source

or major modification significantly outweigh the environmental and social costs imposed as a result of its location, construction, or modification.

(3) *What are the application requirements?* The owner or operator of any proposed new major stationary source or major modification shall submit a complete application using EPA Region IX's electronic system, which is described in paragraph (d)(3)(ii) of this section. The application must include the information listed in this paragraph (d)(3) as well as the demonstrations to show compliance with paragraphs (d)(2)(i) through (iv) of this section. The reviewing authority's designation that an application is complete for purposes of permit processing does not preclude the reviewing authority from requesting or accepting any additional information.

(i) *Application content requirements.*

(A) Identification of the permit applicant, including contact information.

(B) Address and location of the new or modified source.

(C) Identification and description of all emission points, including information regarding all nonattainment pollutants emitted by all emissions units included in the new source or modification.

(D) A process description of all activities, including design capacity, that may generate emissions of nonattainment pollutants, in sufficient detail to establish the basis for the applicability of standards.

(E) A projected schedule for commencing construction and operation for all emissions units included in the new source or modification.

(F) A projected operating schedule for each emissions unit included in the new source or modification.

(G) A determination as to whether the new source or modification will result in any secondary emissions.

(H) The emission rates of all regulated NSR pollutants, including fugitive and secondary emission rates, if applicable. The emission rates must be described in tons per year (tpy). If necessary, shorter-term rates must be described to allow for compliance using the applicable standard reference test method or other methodology specified

(i.e., grams/liter, parts per million volume (ppmv) or parts per million weight (ppmw), lbs/MMBtu).

(I) The calculations on which the emission rate information is based, including fuel specifications, if applicable, and any other assumptions used to determine the emission rates (e.g., higher heating value (HHV), sulfur content of natural gas, VOC content).

(J) The calculations, pursuant to 40 CFR part 51, appendix S, paragraph IV.I and IV.J, that are used to determine applicability of the plan, including the emission calculations (increases or decreases) for each project that occurred during the contemporaneous period, as applicable.

(K) The calculations, pursuant to 40 CFR part 51, appendix S, paragraph IV.A, used to determine the quantity of offsets required for the new source or modification.

(L) Identification of actual emission reductions that meet the offset integrity criteria of being real, surplus, quantifiable, permanent and federally enforceable.

(M) If applicable, a description of how performance testing will be conducted, including test methods and a general description of testing protocols.

(N) Information necessary to determine whether issuance of such permit:

(1) May adversely affect federally-listed threatened or endangered species or the designated critical habitat of such species; or

(2) Has the potential to cause adverse effects on historic properties.

(ii) *Application process requirements.* To submit an application required under the plan, applicants may submit electronically through the Central Data Exchange (CDX)/Compliance and Emissions Data Reporting Interface (CEDRI) or submit by mail.

(A) CDX/CEDRI is accessed through <https://cdx.epa.gov>. First-time users will need to register with CDX. The CDX platform will also be used for any permit reporting requirements.

(B) Applicants that do not apply using CDX/CEDRI shall mail a signed application using certified mail (do not request signature) to: Air and Radiation Division, Permits Office (Air-3-1),

U.S. EPA, Region 9, 75 Hawthorne Street, San Francisco, CA 94105.

(C) Applicants that apply using certified mail must email a copy of the application and the certified mail tracking number to provide notification of delivery receipt to R9AirPermits@epa.gov.

(4) *What are the requirements for monitoring, recordkeeping, and reporting?* The reviewing authority shall require in the conditions of a permit such monitoring, recordkeeping, and reporting as necessary to facilitate compliance with the terms of a permit and to make them enforceable as a practical matter.

(e) *Public participation requirements—*

(1) *What permit information will be publicly available?* With the exception of any confidential information as defined in 40 CFR part 2, subpart B, the reviewing authority must make available for public inspection the documents listed in paragraphs (e)(1)(i) through (iv) of this section. The reviewing authority must make such information available for public inspection at the appropriate EPA Regional Office and in at least one location in the area affected by the source, such as the MDAQMD headquarters location or a local library.

(i) All information submitted as part of your permit application as required under paragraph (d)(3) of this section.

(ii) Any additional information requested by the reviewing authority.

(iii) The reviewing authority's analysis of the application and any additional information submitted by you, including the LAER analysis and, where applicable, the analysis of your emissions reductions (offsets), your demonstration of a net air quality benefit in the affected area and your analysis of alternative sites, sizes, production processes and environmental control techniques.

(iv) A copy of the draft permit or the draft decision to deny the permit with the justification for denial.

(2) *How will the public be notified and participate?* (i) Before issuing a permit under the plan, the reviewing authority must prepare a draft permit and provide adequate public notice to ensure that the affected community and the general public have reasonable access to the application and draft permit information, as set out in this

paragraph (e)(2)(i) and paragraph (e)(2)(ii) of this section. The public notice must provide an opportunity for public comment and notice of a public hearing, if any, on the draft permit.

(A) The reviewing authority must mail a copy of the notice to you (the permit applicant), the MDAQMD (or the EPA if there is a delegation under paragraph (g) of this section), and the California Air Resources Board (CARB).

(B) The reviewing authority must comply with the methods listed in paragraph (e)(2)(i)(B)(1) or (2) of this section:

(1) The reviewing authority must post the notice on its website.

(2) The reviewing authority must publish the notice in a newspaper of general circulation in the area affected by the source.

(3) The reviewing authority may also include other forms of notice as appropriate. This may include posting copies of the notice at one or more locations in the area affected by the source, such as at post offices, libraries, community centers or other gathering places in the community.

(ii) The notices required pursuant to paragraph (c)(2)(i) of this section must include the following information at a minimum:

(A) Identifying information, including the name and address of the permit applicant (and the plant name and address if different);

(B) The name and address of the reviewing authority processing the permit application;

(C) The regulated NSR pollutants to be emitted, and identification of the emissions unit(s) whose emissions of a regulated NSR pollutant could be affected by the project, including any emission limitations for these emissions unit(s);

(D) The emissions change involved in the permit action;

(E) Instructions for requesting a public hearing;

(F) The name, address and telephone number of a contact person in the reviewing authority's office from whom additional information may be obtained;

(G) Locations and times of availability of the information, listed in

paragraph (e)(1) of this section, for public inspection; and

(H) A statement that any person may submit written comments, a written request for a public hearing or both, on the draft permit action. The reviewing authority must provide a period of at least 30 days from the date of the public notice for comments and for requests for a public hearing.

(3) *How will the public comment and will there be a public hearing?* (i) Any person may submit written comments on the draft permit and may request a public hearing. The comments must raise any reasonably ascertainable issue with supporting arguments by the close of the public comment period (including any public hearing). The reviewing authority must consider all comments in making the final decision. The reviewing authority must keep a record of the commenters and of the issues raised during the public participation process, and such records must be available to the public.

(ii) The reviewing authority must extend the public comment period under paragraph (e)(2) of this section to the close of any public hearing under this section. The hearing officer may also extend the comment period by so stating at the hearing.

(iii) A request for a public hearing must be in writing and must state the nature of the issues proposed to be raised at the hearing.

(iv) If requested, the reviewing authority may hold a public hearing at its discretion to give interested persons an opportunity for the oral presentation of data, views, or arguments, in addition to an opportunity to make written statements. The reviewing authority may also hold a public hearing at its discretion, whenever, for instance, such a hearing might clarify one or more issues involved in the permit decision. The reviewing authority must provide notice of any public hearing at least 30 days prior to the date of the hearing. Public notice of the hearing may be concurrent with that of the draft permit, and the two notices may be combined. Reasonable limits may be set upon the time allowed for oral statements at the hearing.

(v) The reviewing authority must make the written transcript of any hearing available to the public.

(f) *Final permit issuance and administrative and judicial review*—(1) *How will final action occur and when will my Federal NNSR permit become effective?* After making a decision on a permit application, the reviewing authority must notify you, the permit applicant, of the decision in writing, and, if the permit is denied, provide the reasons for such denial and the procedures for appeal. If the reviewing authority issues a final permit to you, it must make a copy of the permit available at any location where the draft permit was made available. In addition, the reviewing authority must provide adequate public notice of the final permit decision to ensure that the affected community, the general public and any individuals who commented on the draft permit have reasonable access to the decision and supporting materials. A final permit becomes effective 30 days after service of the final permit decision, unless:

(i) A later effective date is specified in the permit;

(ii) Review of the final permit is requested under paragraph (f)(3) of this section; or

(iii) No comments requested a change in the draft permit or a denial of the permit, in which case the reviewing authority may make the permit effective immediately upon issuance.

(2) *What is the administrative record for each final permit?* (i) The reviewing authority must base final permit decisions on an administrative record consisting of:

(A) All comments received during any public comment period, including any extension or reopening;

(B) The tape or transcript of any hearing(s) held;

(C) Any written material submitted at such a hearing;

(D) Any new materials placed in the record as a result of the reviewing authority's evaluation of public comments;

(E) Other documents in the supporting files for the permit that were relied upon in the decision-making;

(F) The final Federal NNSR permit;

(G) The application and any supporting data furnished by you, the permit applicant;

(H) The draft permit or notice of intent to deny the application or to terminate the permit; and

(I) Other documents in the supporting files for the draft permit that were relied upon in the decision-making.

(ii) The additional documents required under paragraph (f)(2)(i) of this section should be added to the record as soon as possible after their receipt or publication by the reviewing authority. The record must be complete on the date the final permit is issued.

(iii) Material readily available or published materials that are generally available and that are included in the administrative record under the standards of paragraph (f)(2)(i) of this section need not be physically included in the same file as the rest of the record as long as it is specifically referred to in that file.

(3) *Can permit decisions be appealed?* (i) Permit decisions may be appealed under the permit appeal procedures of 40 CFR 124.19, and the provisions of that section applicable to prevention of significant deterioration (PSD) permits shall apply to permit decisions under the FIP. A petition for review must be filed with the Clerk of the Environmental Appeals Board within 30 days after the reviewing authority serves notice of the issuance of a final permit decision under the plan, in accordance with 40 CFR 124.19.

(ii) An appeal under paragraph (f)(3)(i) of this section is, under section 307(b) of the Act, a prerequisite to seeking judicial review of the final agency action.

(4) *Can my permit be reopened?* The reviewing authority may reopen an existing, currently-in-effect permit for cause on its own initiative, such as if it contains a material mistake or fails to assure compliance with requirements in this section. However, except for those permit reopenings that do not increase the emission limitations in the permit, such as permit reopenings that correct typographical, calculation and other errors, all other permit reopenings shall be carried out after the

opportunity for public notice and comment and in accordance with one or more of the public participation requirements under paragraph (e)(2) of this section.

(5) *Can my permit be rescinded?* (i) Any permit issued under this section, or a prior version of this section, shall remain in effect until it is rescinded under this paragraph (f)(5).

(ii) An owner or operator of a stationary source or modification who holds a permit issued under this section for the construction of a new source or modification that meets the requirement in paragraph (f)(5)(iii) of this section may request that the reviewing authority rescind the permit or a particular portion of the permit.

(iii) The reviewing authority may grant an application for rescission if the application shows that the provisions of the plan would not apply to the source or modification.

(iv) If the reviewing authority rescinds a permit under this paragraph (f), the public shall be given adequate notice of the rescission determination in accordance with paragraph (e)(2)(i)(B) of this section.

(g) *Administration and delegation of the Federal nonattainment major NSR plan in the MDAQMD*—(1) *Who administers the FIP in the MDAQMD?* (i) The Administrator is the reviewing authority and will directly administer all aspects of the FIP in the MDAQMD under Federal authority.

(ii) The Administrator may delegate Federal authority to administer specific portions of the FIP to the MDAQMD upon request, in accordance with the provisions of paragraph (g)(2) of this section. If the MDAQMD has been granted such delegation, it will be the reviewing authority for purposes of the provisions for which it has been granted delegation.

(2) *Delegation of administration of the FIP to the MDAQMD.* This paragraph (g)(2) establishes the process by which the Administrator may delegate authority to the MDAQMD in accordance with the provisions in paragraphs (g)(2)(i) through (iv) of this section. Any Federal requirements under the plan that are administered by the delegate MDAQMD are enforceable by the EPA under Federal law.

(i) *Information to be included in the Administrative Delegation Request.* To be delegated authority to administer the FIP or specific portions of it, the MDAQMD must submit a request to the Administrator.

(ii) *Delegation Agreement.* A Delegation Agreement will set forth the terms and conditions of the delegation, will specify the provisions that the delegate MDAQMD will be authorized to implement on behalf of the EPA and will be entered into by the Administrator and the MDAQMD. The Agreement will become effective upon the date that both the Administrator and the MDAQMD have signed the Agreement or as otherwise stated in the Agreement. Once the delegation becomes effective, the MDAQMD will be responsible, to the extent specified in the Agreement, for administration of the provisions of the FIP that are subject to the Agreement.

(iii) *Publication of notice of the Agreement.* The Administrator will publish a notice in the FEDERAL REGISTER informing the public of any Delegation Agreement. The Administrator also will publish the notice in a newspaper of general circulation in the MDAQMD. In addition, the Administrator will mail a copy of the notice to persons on a mailing list developed by the Administrator consisting of those persons who have requested to be placed on such a mailing list.

(iv) *Revision or revocation of an Agreement.* A Delegation Agreement may be modified, amended or revoked, in part or in whole, by the Administrator after consultation with the MDAQMD.

[89 FR 106354, Dec. 30, 2024]

Subpart G—Colorado

§ 52.319 Conditional approval.

(a) The EPA is making a limited conditional approval and limited disapproval of revisions committed to correcting deficiencies identified with submissions made on May 31, 2017, and May 10, 2019. The conditional approval is based upon the October 13, 2022 commitment from the State to submit a SIP revision consisting of rule revisions that will cure the identified deficiencies within twelve months after

§ 52.320

40 CFR Ch. I (7–1–25 Edition)

the EPA’s conditional approval. If the State fails to meet its commitment, the conditional approval will be treated as a disapproval with respect to the rules and CTG category for which the corrections are not met. The following rules are conditionally approved, except as they relate to periodic reporting requirements to the state for which we are disapproving, because we have determined that the rules strengthen the SIP and are largely consistent with the relevant CAA requirements:

(1) Regulation number 7 (Reg. 7), Part C, section I.P. and Reg. 7, Part E, section II.A.4. RACT requirements for the Colorado ozone SIP for the “Control Techniques Guidelines for Miscellaneous Metal and Plastic Parts Coatings,” Tables 5 and 7, EPA453/R08003, September 2008 and glass melting furnaces.

(2) [Reserved]

(b) [Reserved]

[87 FR 29231, May 13, 2022, as amended at 88 FR 29833, May 9, 2023]

§ 52.320 Identification of plan.

(a) *Purpose and scope.* This section sets forth the applicable State Implementation Plan for Colorado under section 110 of the Clean Air Act, 42 U.S.C. 7410 and 40 CFR part 51 to meet national ambient air quality standards or other requirements under the Clean Air Act.

(b) *Incorporation by reference.* (1) Material listed in paragraphs (c) and (d) of this section with an EPA approval date prior to June 1, 2015, was approved for incorporation by reference by the Director of the Federal Register in ac-

cordance with 5 U.S.C. 552(a) and 1 CFR part 51. Material is incorporated as submitted by the state to EPA, and notice of any change in the material will be published in the FEDERAL REGISTER. Entries for paragraphs (c) and (d) of this section with EPA approval dates after June 1, 2015, will be incorporated by reference in the next update to the SIP compilation.

(2) EPA Region 8 certifies that the rules/regulations provided by EPA in the SIP compilation at the addresses in paragraph (b)(3) of this section are an exact duplicate of the officially promulgated state rules/regulations which have been approved as part of the State Implementation Plan as of June 1, 2015.

(3) Copies of the materials incorporated by reference may be inspected at the Environmental Protection Agency, Region 8, 1595 Wynkoop Street, Denver, Colorado, 80202-1129; Air and Radiation Docket and Information Center, U.S. Environmental Protection Agency, West Building, 1301 Constitution Ave. NW., Washington, DC 20460; and, the National Archives and Records Administration (NARA). For information on the availability of materials from the docket in the EPA Headquarters Library, please call the Office of Air and Radiation (OAR) at (202) 566-1742. For information on the availability of this material at NARA, call (202) 741-6030, or go to <http://www.archives.gov/federal-register/cfr/ibr-locations.html>. Copies of the Colorado regulations we have approved are also available at <http://www.epa.gov/region8/air/sip.html>.

VIII. Restrictions on the Use of Oil as a Backup Fuel.	10/2/2005	2/17/2012	77 FR 2466, 1/18/2012	
IX. Emission Regulations Concerning Areas Which Are Nonattainment for Carbon Monoxide—Refinery Fluid Bed Catalytic Cracking Units:	10/2/2005	2/17/2012	77 FR 2466, 1/18/2012	
Appendix A, Method of Measuring Opacity from Fugitive Particulate Emission Sources.	5/30/1982	1/2/1987	51 FR 43609, 12/3/1986	
Appendix B, Method of Measurement of Off-Property Transport of Fugitive Particulate Emissions.	5/30/1982	1/2/1987	51 FR 43609, 12/3/1986	
5 CCR 1001–05, Regulation Number 3, Part A, Concerning General Provisions Applicable to Reporting and Permitting				
I. Applicability	2/14/2023	8/21/2024	89 FR 59000, 7/22/2024	
II. Air Pollution Emission Notice (APEN) Requirements.	2/14/2023	8/21/2024	89 FR 59000, 7/22/2024	
III. Administrative Permit Amendment Procedures.	4/30/2008	3/17/2014	79 FR 8632, 2/13/2014	
IV. Operational Flexibility	4/30/2008	3/17/2014	79 FR 8632, 2/13/2014	
V. Certification and Trading of Emission Reduction Credits Offset and Netting Transactions.	10/15/2014	6/3/2019	84 FR 18991, 5/3/2019	
VI. Fees	11/30/2018	10/16/2020	85 FR 57696, 9/16/2020	
VII. Confidential Information or Data Contained in Air Pollutant Emission Notices, Permit Applications, or Reports Submitted Pursuant to Part C, Section V.C.6.	4/30/2008	3/17/2014	79 FR 8632, 2/13/2014	
VIII. Technical Modeling and Monitoring Requirements.	12/15/2010	2/24/2016	81 FR 3963, 1/25/2016	
Appendix A, Method for Determining De Minimis Levels For Non-Criteria Reportable Pollutants.	10/15/2014	11/13/2017	82 FR 47380, 10/12/2017	
Appendix B, Non-criteria Reportable Pollutants (Sorted by BIN).	12/15/2010 2/15/2013	2/24/2016	81 FR 3963, 1/25/2016	
5 CCR 1001–05, Regulation Number 3, Part B, Concerning Construction Permits				
I. Applicability	4/30/2008	3/17/2014	79 FR 8632, 2/13/2014	
II. General Requirements for Construction Permits.	2/14/2020	12/22/2022	87 FR 71258, 11/22/2022	
III. Construction Permit Review Procedures.	2/14/2021	4/26/2023	88 FR 18054, 3/27/2023	

Title	State effective date	EPA Effective date	Final rule citation/date	Comments
5 CCR 1001–05, Regulation Number 3, Part D, Concerning Major Stationary Source New Source Review and Prevention of Significant Deterioration				
I. Applicability	10/15/2014	6/3/2019	84 FR 18991, 5/3/2019	
II. Definitions	2/14/2021	4/26/2023	88 FR 18054, 3/27/2023	
III. Permit Review Procedures	12/15/2011	2/24/2016	81 FR 3963, 1/25/2016	
IV. Public Comment and Hearing Requirements.	2/14/2021	4/26/2023	88 FR 18054, 3/27/2023	
V. Requirements Applicable to Nonattainment Areas.	10/15/2014	6/3/2019	84 FR 18991, 5/3/2019	
VI. Requirements applicable to attainment and unclassifiable areas and pollutants implemented under Section 110 of the Federal Act (Prevention of Significant Deterioration Program).	10/15/2014	6/3/2019	84 FR 18991, 5/3/2019	
VII. Negligibly Reactive Volatile Organic Compounds (NRVOCs).	4/30/2008	3/17/2014	79 FR 8632, 2/13/2014	
VIII. Area Classifications	4/30/2008	3/17/2014	79 FR 8632, 2/13/2014	
IX. Redesignation	4/30/2008	3/17/2014	79 FR 8632, 2/13/2014	
X. Air Quality Limitations	12/15/2011	2/24/2016	81 FR 3963, 1/25/2016	
XI. Exclusions From Increment Consumption.	4/30/2008	3/17/2014	79 FR 8632, 2/13/2014	
XII. Innovative Control Technology	4/30/2008	3/17/2014	79 FR 8632, 2/13/2014	
XIII. Federal Class I Areas	12/15/2011	2/24/2016	81 FR 3963, 1/25/2016	
XIV. Visibility	12/15/2010	2/24/2016	81 FR 3963, 1/25/2016	
XV. Actual PALs	10/15/2014	6/3/2019	84 FR 18991, 5/3/2019	
5 CCR 1001–05, Regulation Number 3, Part F, Regional Haze Limits—Best Available Retrofit Technology (BART) and Reasonable Progress (RP)				
VI. Regional Haze Determinations	2/14/2017	8/6/2018	83 FR 31332, 7/5/2018	
VII. Monitoring, Recordkeeping, and Reporting for Regional Haze Limits.	2/14/2011	1/30/2013	77 FR 76871, 12/31/2012	
5 CCR 1001–06, Regulation Number 4, Sale and Installation of Wood-Burning Appliances and Use of Certain Wood Burning Appliances During High Pollution Days				
I. Definitions	1/14/2016	8/16/2019	84 FR 34063, 7/17/2019	Previous SIP approval 4/17/1997.
II. Limitation on the Sale and Installation of Wood-Burning Stoves.	4/30/2017	8/16/2019	84 FR 34063, 7/17/2019	Previous SIP approval 4/17/1997.
III. Approval Procedure for Pellet Stoves	1/14/2016	8/16/2019	84 FR 34063, 7/17/2019	Previous SIP approval 4/17/1997.
V. Enforcement	1/14/2016	8/16/2019	84 FR 34063, 7/17/2019	Previous SIP approval 4/17/1997.
VI. List of Approved-Wood Burning Appliances.	1/14/2016	8/16/2019	84 FR 34063, 7/17/2019	Previous SIP approval 4/17/1997.
VII. High Pollution Days	1/14/2016	8/16/2019	84 FR 34063, 7/17/2019	Previous SIP approval 4/17/1997.
VIII. Requirements for Installation of Fireplaces.	4/30/2017	8/16/2019	84 FR 34063, 7/17/2019	Previous SIP approval 4/17/1997.
IX. Implementation of Local Controls	1/14/2016	8/16/2019	84 FR 34063, 7/17/2019	Previous SIP approval 4/17/1997.
X. References	1/14/2016	8/16/2019	84 FR 34063, 7/17/2019	Previous SIP approval 4/17/1997.
5 CCR 1001–08, Regulation Number 6, Standards of Performance for New Stationary Sources				
IV. Standards of Performance for New Sources of Sulfur Dioxide.	3/30/1981	1/6/1982	46 FR 59536, 12/7/1981	
5 CCR 1001–09, Regulation Number 7, Control of Ozone Via Ozone Precursors and Hydrocarbons via Oil and Gas Emissions, (Emissions of Volatile Organic Compounds and Nitrogen Oxides), Part A, Applicability and General Provisions				
I. Applicability	2/14/2020	12/6/2021	86 FR 61071, 11/5/2021	Previous SIP approval 8/5/11 except for I.A.1.b, I.B.1.b, I.B.2.b, and I.B.2.d; nonsubstantive changes approved 7/3/2018, 2/24/2021, and 11/5/2021.

Environmental Protection Agency

§ 52.320

Title	State effective date	EPA Effective date	Final rule citation/date	Comments
II. General Provisions	2/14/2020	12/6/2021	86 FR 61071, 11/5/2021	Previous SIP approval 8/5/2011 except for II.A.12, II.C.1, and the repeal of previously approved II.D; non-substantive changes to II.D approved 7/3/2018; nonsubstantive changes approved 2/24/2021 and 11/5/2021.
5 CCR 1001-09, Regulation Number 7, Control of Ozone Via Ozone Precursors and Hydrocarbons via Oil and Gas Emissions, (Emissions of Volatile Organic Compounds and Nitrogen Oxides), Part B, Storage, Transfer, and Disposal of Volatile Organic Compounds and Petroleum Liquids and Petroleum Processing and Refining				
I. General Requirements for Storage and Transfer of Volatile Organic Compounds.	2/14/2020	12/6/2021	86 FR 61071, 11/5/2021	Previous SIP approval 8/5/2011. nonsubstantive changes approved 2/24/2021 and 11/5/2021.
II. Storage of Highly Volatile Organic Compounds.	2/14/2020	12/6/2021	86 FR 61071, 11/5/2021	Previous SIP approval 8/5/2011. nonsubstantive changes approved 11/5/2021.
III. Disposal of Volatile Organic Compounds.	2/14/2020	12/6/2021	86 FR 61071, 11/5/2021	Previous SIP approvals 8/5/2011 and 2/24/2021; nonsubstantive changes approved 11/5/2021.
IV. Storage and Transfer of Petroleum Liquid.	2/14/2020	12/6/2021	86 FR 61071, 11/5/2021	Previous SIP approval 8/5/2011; nonsubstantive changes to approved 7/3/2018 and 2/24/2021. Substantive changes approved 11/5/2021.
V. Crude Oil	2/14/2020	12/6/2021	86 FR 61071, 11/5/2021	Previous SIP approval 8/5/2011; nonsubstantive approved 7/3/2018, 2/24/2021, and 11/5/2021.
VI. Petroleum Processing and Refining	2/14/2020	12/6/2021	86 FR 61071, 11/5/2021	Previous SIP approval 8/5/2011; nonsubstantive changes approved 7/3/2018, 2/24/2021, and 11/5/2021.
VII. Control of Volatile Organic Compound Leaks from Vapor Collection Systems and Vapor Control Systems Located at Gasoline Terminals, Gasoline Bulk Plants, and Gasoline Dispensing Facilities.	2/14/2020	12/6/2021	86 FR 61071, 11/5/2021	Previous SIP approval 8/5/2011; nonsubstantive changes approved 2/24/2021, substantive changes made to VII.-VII.B.2.b approved 11/5/2021.
Appendix B Criteria for Control of Vapors from Gasoline Transfer to Storage Tanks.	2/14/2020	12/6/2021	86 FR 61071, 11/5/2021	Previous approval 5/30/95. Substantive changes approved 11/5/2021

Title	State effective date	EPA Effective date	Final rule citation/date	Comments
Appendix C Criteria for Control of Vapors from Gasoline Transfer at Bulk Plants.	2/14/2020	12/6/2021	86 FR 61071, 11/5/2021	Previous approval 3/13/81. Nonsubstantive changes approved 11/5/2021.
5 CCR 1001–09, Regulation Number 7, Control of Ozone Via Ozone Precursors and Hydrocarbons via Oil and Gas Emissions, (Emissions of Volatile Organic Compounds and Nitrogen Oxides), Part C, Surface Coating, Solvents, Asphalt, Graphic Arts and Printing, and Pharmaceuticals				
I. Surface Coating Operations	2/14/2021	6/8/2023	88 FR 29827, 5/9/2023	Previous SIP approval 8/5/2011; nonsubstantive changes approved 7/3/2018; substantive changes approved 2/24/2021; nonsubstantive changes approved 11/5/2021. Substantive changes limited approval/disapproval 5/9/2023.
II. Solvent Use	2/14/2020	12/6/2021	86 FR 61071, 11/5/2021	Previous SIP approval 8/5/2011; substantive changes approved 2/24/2021 and 11/5/2021.
III. Use of Cutback Asphalt	2/14/2020	12/6/2021	86 FR 61071, 11/5/2021	Previous SIP approval 8/5/2011; nonsubstantive changes approved 2/24/2021 and 11/5/2021.
IV. Graphic Arts and Printing	2/14/2020	12/6/2021	86 FR 61071, 11/5/2021	Previous SIP approval 8/5/2011. Substantive changes made in 7/3/2018 rule-making. IBR correction approved 2/24/2021. Nonsubstantive changes approved 11/5/2021.
V. Pharmaceutical Synthesis	2/14/2020	12/6/2021	86 FR 61071, 11/5/2021	Previous SIP approval 8/5/2011; nonsubstantive changes approved 2/24/2021 and 86 FR 61071.
Appendix D Minimum Cooling Capacities for Refrigerated Freeboard Chillers on Vapor Degreasers.	2/14/2020	12/6/2021	86 FR 61071, 11/5/2021	Previous SIP approval 5/30/95. Nonsubstantive changes approved 11/5/2021.
Appendix E Emissions Limit Conversion Procedure.	2/14/2020	12/6/2021	86 FR 61071, 11/5/2021	Previous SIP approval 5/30/95. Nonsubstantive changes approved 11/5/2021.
5 CCR 1001–09, Regulation Number 7, Control of Ozone Via Ozone Precursors and Hydrocarbons via Oil and Gas Emissions, (Emissions of Volatile Organic Compounds and Nitrogen Oxides), Part D, Oil and Natural Gas Operations				

Environmental Protection Agency

§ 52.320

Title	State effective date	EPA Effective date	Final rule citation/date	Comments
I. Volatile Organic Compound Emissions from Oil and Gas Operations.	1/30/2022	6/8/2023	88 FR 29827, 5/9/2023	Previous SIP approval 2/13/2008. Substantive changes to section XII; state-only provisions excluded, approved 7/3/2018. Substantive changes approved 11/25/2021 except no action on sections I.D., I.E., I.F. and I.J.1. Conditional approval of sections I.D., I.E., I.F., and I.J.1. 5/13/2022. Limited approval/disapproval section I.D., I.E., I.F., and I.J.1 5/9/2023.
II. Statewide Controls for Oil and Gas Operations.	2/14/2020	12/6/2021	86 FR 61071, 11/5/2021	Substantive changes to II.C., II.C.1., II.C.1.b.(ii)-(B), and II.F approved 11/5/2021.
III. Natural Gas-Actuated Pneumatic Controllers Associated with Oil and Gas Operations.	2/14/2020	6/8/2023	88 FR 29827, 5/9/2023	Substantive changes to III.–III.B.3., III.B.5., III.B.7.–III.C.2.c.(ii), III.D.–III.D.2.b., III.D.3.b., and III.E.–III.E.2.c. approved 11/5/2021. Revisions to definitions for pneumatic controls approved 5/9/2–23.

5 CCR 1001–09, Regulation Number 7, Control of Ozone Via Ozone Precursors and Hydrocarbons via Oil and Gas Emissions, (Emissions of Volatile Organic Compounds and Nitrogen Oxides), Part E, Combustion Equipment and Major Source RACT

I. Control of Emissions from Engines	11/14/2020	6/8/2023	88 FR 29827, 5/9/2023	Previous SIP approval 8/19/2005 and 12/31/2012; nonsubstantive changes to sections XVI.A.–C. 7/3/2018; substantive changes approved 2/24/2021, except sections XVI.D.4.b.(i) and XVI.D.4.d. section XVII.E.3.a. from the Regional Haze SIP approved in SIP. Previous SIP approval 12/31/2012; nonsubstantive changes approved 2/24/2021 and 11/5/2021. Limited approval/disapproval 5/9/2023.

Title	State effective date	EPA Effective date	Final rule citation/date	Comments
II. Control of Emissions from Stationary and Portable Engines and Other Combustion Equipment in the 8-Hour Ozone Control Area.	2/14/2020	6/8/2023	88 FR 29827, 5/9/2023	Previous SIP approvals 8/19/2005 and 12/31/2012; non-substantive changes to approved 7/3/2018; substantive changes approved 2/24/2021 except sections XVI.D.4.b.(i) and XVI.D.4.d. Substantive changes approved 11/5/2021. Limited approval/disapproval 5/9/2023 except NO _x emission limits for refinery fuel heaters in II.A.4.g.
III. Control of Emissions from Specific Major Sources of VOC and/or NO _x in the 8-Hour Ozone Control Area.	2/14/2020	12/6/2021	86 FR 61071, 11/5/2021	New section approved in SIP 2/24/2021. Substantive changes approved 11/5/2021.
IV. Control of Emissions from Breweries in the 8-hour Ozone Control Area.	2/14/2020	12/6/2021	86 FR 61071, 11/5/2021	New section approved in SIP 2/24/2021. Nonsubstantive changes approved 11/5/2021.

5 CCR 1001–12, Regulation Number 10, Criteria for Analysis of Transportation Conformity

I. Requirement to Comply with the Federal Rule.	1/30/2012	4/3/2014	79 FR 12079, 3/4/2014	
II. Definitions	3/30/2016	5/7/2018	83 FR 14757, 4/6/2018	
III. Interagency Consultation	3/30/2016	5/7/2018	83 FR 14757, 4/6/2018	
IV. Emission reduction credit for certain control measures.	1/30/2012	4/3/2014	79 FR 12079, 3/4/2014	
V. Enforceability of design concept and scope and project-level mitigation and control measures.	1/30/2012	4/3/2014	79 FR 12079, 3/4/2014	

5 CCR 1001–13, Regulation Number 11, Motor Vehicle Emissions Inspection Program—Part A, General Provisions, Area of Applicability, Schedules for Obtaining Certification of Emissions Control, Definitions, Exemptions, and Clean Screening/Remote Sensing

I. Applicability	2/15/2013 12/30/2013	11/21/2016	81 FR 72720, 10/21/2016	
II. Definitions	11/30/2014	3/11/2019	84 FR 2449, 2/7/2019	
III. Exemption from Section 42–4–314, C.R.S. for Department of Defense Personnel Participating in the Privately Owned Vehicle Import Control Program.	5/31/2004	9/19/2005	70 FR 48652, 8/19/2005	
IV. Clean Screen/Remote Emissions Sensing.	2/15/2013	11/21/2016	81 FR 72720, 10/21/2016	
V. Expansion of the Enhanced Emissions Program to the North Front Range Area.	1/14/2017	8/2/2018	83 FR 31068, 7/3/2018	

5 CCR 1001–13, Regulation Number 11, Motor Vehicle Emissions Inspection Program—Part B, Standards and Procedures for the Approval, Operation, Gas Span Adjustment, Calibration and Certification of the Division Approved Test Analyzer Systems for Use in the Basic and Enhanced Areas and Test Analyzer Systems for Licensed Dealers in the Enhanced Area

I. Approval of the Colo '94 Test Analyzer Systems.	5/31/2004	9/19/2005	70 FR 48652, 8/19/2005	
II. Application for Approval of Colo '94 Test Analyzer Systems Equipment Manufacturers.	5/31/2004	9/19/2005	70 FR 48652, 8/19/2005	
III. Performance and Design Specification for the Colo '94 Exhaust Gas Analyzers.	5/31/2004	9/19/2005	70 FR 48652, 8/19/2005

[37 FR 10855, May 31, 1972, as amended at 39 FR 16346, May 8, 1974; 44 FR 57409, Oct. 5, 1979; 74 FR 47891, Sept. 18, 2009]

§ 52.322 Extensions.

The Administrator, by authority delegated under section 188(d) of the Clean Air Act, as amended in 1990, extends for one year (until December 31, 1995) the attainment date for the Denver, Colorado, PM-10 nonattainment area.

[60 FR 52315, Oct. 6, 1995]

§ 52.323 Approval status.

(a) With the exceptions set forth in this subpart, the Administrator approves Colorado's plan for the attainment and maintenance of the national

standards under section 110 of the Clean Air Act. Furthermore, the Administrator finds that the plan satisfies all requirements of Part D, Title 1, of the Clean Air Act as amended in 1977, except as noted below.

(b)(1) Insofar as the Prevention of Significant Deterioration (PSD) provisions found in this subpart apply to stationary sources of greenhouse gas (GHGs) emissions, the Administrator approves that application only to the extent that GHGs are "subject to regulation", as provided in this paragraph

§ 52.324

40 CFR Ch. I (7–1–25 Edition)

(b), and the Administrator takes no action on that application to the extent that GHGs are not “subject to regulation.”

(2) Beginning January 2, 2011, the pollutant GHGs is subject to regulation if:

(i) The stationary source is a new major stationary source for a regulated NSR pollutant that is not GHGs, and also will emit or will have the potential to emit 75,000 tpy CO₂e or more; or

(ii) The stationary source is an existing major stationary source for a regulated NSR pollutant that is not GHGs, and also will have an emissions increase of a regulated NSR pollutant, and an emissions increase of 75,000 tpy CO₂e or more; and

(3) Beginning July 1, 2011, in addition to the provisions in paragraph (b)(2) of this section, the pollutant GHGs shall also be subject to regulation:

(i) At a new stationary source that will emit or have the potential to emit 100,000 tpy CO₂e; or

(ii) At an existing stationary source that emits or has the potential to emit 100,000 tpy CO₂e, when such stationary source undertakes a physical change or change in the method of operation that will result in an emissions increase of 75,000 tpy CO₂e or more.

(4) For purposes of this paragraph (b)—

(i) the term greenhouse gas shall mean the air pollutant defined in 40 CFR 86.1818–12(a) as the aggregate group of six greenhouse gases: Carbon dioxide, nitrous oxide, methane, hydrofluorocarbons, perfluorocarbons, and sulfur hexafluoride.

(ii) the term tpy CO₂ equivalent emissions (CO₂e) shall represent an amount of GHGs emitted, and shall be computed as follows:

(A) Multiplying the mass amount of emissions (tpy), for each of the six greenhouse gases in the pollutant GHGs, by the gas’s associated global warming potential published at Table A–1 to subpart A of 40 CFR part 98—Global Warming Potentials.

(B) Sum the resultant value from paragraph (b)(4)(ii)(A) of this section for each gas to compute a tpy CO₂e.

(iii) the term emissions increase shall mean that both a significant emissions increase (as calculated using the procedures in paragraphs I.A.2.

through I.A.3, and I.B of Part D of Colorado’s Air Quality Commission’s Regulation Number 3) and a significant net emissions increase (as defined in paragraphs II.A.26 and II.A.42.a of Part D of Colorado’s Air Quality Commission’s Regulation Number 3) occur. For the pollutant GHGs, an emissions increase shall be based on tpy CO₂e, and shall be calculated assuming the pollutant GHGs is a regulated NSR pollutant, and “significant” is defined as 75,000 tpy CO₂e instead of applying the value in paragraph II.A.42.b of Part D of Colorado’s Air Quality Commission’s Regulation Number 3.

[75 FR 82553, Dec. 30, 2010]

§ 52.324 Legal authority.

(a) The requirements of § 51.230(f) of this chapter are not met since the State lacks the authority to require owners or operators of stationary sources to install, maintain, and use emission monitoring devices and to make periodic reports to the State on the nature and amounts of emissions from such stationary sources.

(b) Delegation of authority: Pursuant to section 114 of the Act, Colorado requested a delegation of authority to enable it to require sources to install and maintain monitoring equipment and to report periodically on the nature and amount of their emissions. The Administrator has determined that Colorado is qualified to receive a delegation of the authority it requested. Accordingly, the Administrator delegates to Colorado his authority under section 114(a)(1)(B) and (C) of the Act, i.e., authority to require sources within the State of Colorado to install and maintain monitoring equipment and to report periodically on the nature and amount of their emissions.

[37 FR 10855, May 31, 1972, as amended at 46 FR 24182, Apr. 30, 1981; 51 FR 40676, Nov. 7, 1986; 62 FR 2914, Jan. 21, 1997]

§ 52.325 [Reserved]

§ 52.326 Area-wide nitrogen oxides (NO_x) exemptions.

The Denver Regional Council of Governments (DRCOG) submitted a NO_x exemption petition to the EPA on May 25, 1994 and submitted supporting documentation via a letter dated August 1,

1994. This petition requested that the Denver metropolitan area, a transitional ozone nonattainment area, be exempted from the requirement to meet the NO_x provisions of the Federal transportation and general conformity rule with respect to ozone. The exemption request was based on monitoring data which demonstrated that the National Ambient Air Quality Standard for ozone had been attained in this area for the 3 years prior to the petition. The EPA approved this exemption request on July 28, 1995.

[60 FR 40291, Aug. 8, 1995]

§§ 52.327–52.328 [Reserved]

§ 52.329 Rules and regulations.

(a) On January 14, 1993, the Governor of Colorado submitted revisions to the State's nonattainment new source review permitting regulations to bring the State's regulations up to date with the 1990 Amendments to the Clean Air Act. With these revisions, the State's regulations satisfy the part D new source review permitting requirements for the following nonattainment areas: the Canon City, Lamar, Pagosa Springs, Aspen, Telluride, and Steamboat Springs moderate PM₁₀ nonattainment areas, the Denver/Metro Boulder, Longmont, Colorado Springs, and Fort Collins moderate carbon monoxide nonattainment areas, the Greeley not classified carbon monoxide nonattainment area, and the Denver transitional ozone nonattainment area.

(b) On January 14, 1993 and on August 25, 1994, the Governor of Colorado submitted revisions to the State's nonattainment new source review permitting regulations to bring the State's regulations up to date with the 1990 Amendments to the Clean Air Act. With these revisions, the State's regulations satisfy the part D new source review permitting requirements for the Denver metropolitan moderate PM-10 nonattainment area.

(c) A revision to the State Implementation Plan was submitted by the State of Colorado on July 31, 2002. The submittal revises the Common Provisions regulation by adding affirmative defense provisions for source owners and operators for excess emissions during periods of startup and shutdown. The

affirmative defense provisions are contained in section II.J. As indicated in 40 CFR 52.320(c)(109), EPA approved the affirmative defense provisions contained in sections II.J.1 through II.J.4 of the Common Provisions regulation, adopted August 16, 2001 and effective September 30, 2001. Section II.J.5 of the Common Provisions regulation, adopted August 16, 2001 and effective September 30, 2001, is disapproved.

(d) On August 7, 2007, the Colorado submitted two packages with revisions to Colorado's Regulation 3 Regulation, 5 CCR 1001-5, Part A. One change adopts language to treat nitrogen dioxide as an ozone precursor. The State also adopted an increase in fees used to pay for the State's increased workload from the processing of Air Pollutant Emission Notices (APENs) and permits. Annual and permit processing fees shall be \$16.54 for regulated pollutants and \$114.96 for Hazardous Air Pollutants. One grammatical change was made to the text of Part A, Section 1.B.9.d:

(1) Regulation 3, 5 CCR 1001-5, Air Contaminant Emissions Notices, Part A, Concerning General Provisions Applicable to Reporting and Permitting, Section I, Applicability, Section I.B.9.d, Applicable Requirement, effective October 2006: Any standard or other requirement under section 112 of the Federal Act (hazardous air pollutants, including any requirement concerning accident prevention under section 112(r)(7) of the Federal Act) (Regulation No. 8) but not including the contents of any risk management plan required under section 112(r) of the Federal Act.

(2) Regulation 3, 5 CCR 1001-5, Air Contaminant Emissions Notices, Part A, Concerning General Provisions Applicable to Reporting and Permitting, Section I, Applicability, Section I.B.16, Criteria Pollutants, effective October 2006:

(i) Those pollutants for which the U.S. EPA has established national ambient air quality standards, including: carbon monoxide, nitrogen dioxide (direct emissions and as a precursor to ozone), sulfur dioxide, PM₁₀, total suspended particulate matter, ozone, volatile organic compounds (as a precursor to ozone), and lead.

(ii) For the purpose of Air Pollutant Emission Notice reporting, criteria pollutants shall also include nitrogen oxides, fluorides, sulfuric acid mist, hydrogen sulfide, total reduced sulfur, reduced sulfur compounds, municipal waste combustor organics, municipal waste combustor metals, and municipal waste combustor acid gases.

(3) Regulation 3, 5 CCR 1001–5, Air Contaminant Emissions Notices, Part A, Concerning General Provisions Applicable to Reporting and Permitting, Section VI.D.1, Fee Schedule, effective February 2007: Annual and permit processing fees shall be charged in accordance with and in the amounts specified in the provisions of Colorado Revised Statutes section 25–7–114.7. Annual fees for regulated pollutants shall be \$16.54. Annual fees for hazardous air pollutants shall be \$114.96.

(e) The State of Colorado submitted revisions on September 16, 1997, June 20, 2003, July 11, 2005, August 8, 2006 and August 1, 2007 to Colorado's 5 CCR 1001–5 Regulation Number 3, Part A, Section II. One of the revisions deleted two provisions from Section II and moved them to Section I of Regulation Number 3, Part A. The revised regulatory provisions read as follows:

(1) 5 CCR 1001–5, Regulation 3, *Stationary Source Permitting and Air Pollutant Emission Notice Requirements*, Part A, *Concerning General Provisions Applicable to Reporting and Permitting*, Section I, *Applicability*, Section I.B.16, *Criteria Pollutants*,; effective June 30, 2004:

(i) Those pollutants for which the U.S. EPA has established national ambient air quality standards, including: carbon monoxide, nitrogen dioxide, sulfur dioxide, PM₁₀, total suspended particulate matter, ozone, volatile organic compounds (as a precursor to ozone), and lead. For the purposes of Air Pollutant Emission Notice reporting, criteria pollutants shall also include nitrogen oxides, fluorides, sulfuric acid mist, hydrogen sulfide, total reduced sulfur, reduced sulfur compounds, municipal waste combustor organics, municipal waste combustor metals, and municipal waste combustor acid gases.

(2) 5 CCR 1001–5, Regulation 3, *Stationary Source Permitting and Air Pollutant Emission Notice Requirements*, Part

A, *Concerning General Provisions Applicable to Reporting and Permitting*, Section I, *Applicability*, Section I.B.43, *Uncontrolled Actual Emissions*; effective June 30, 2004:

(i) The annual emission rate corresponding to the annual process rate listed on the Air Pollutant Emission Notice form, without consideration of any emission control equipment or procedures. The division may allow a source to forego calculating or estimating its uncontrolled actual emissions of hazardous air pollutants upon a showing by the source and a determination by the division that the creation of such data is unreasonably costly, technically impractical or not reasonably related to information necessary for making regulatory decisions with respect to that source. The division's final determination may be appealed to the commission by the source.

(f) On August 8, 2006, Dennis E. Ellis, Executive Director of the Colorado Department of Public Health and Environment, and on behalf of the Governor, submitted revisions to 5 CCR 1001–13, Colorado's Regulation Number 11—Motor Vehicle Emissions Inspection Program, part F, section III.A.2. These revisions removed from Colorado's Regulation Number 11 the light duty vehicle emission testing limits that went into effect on January 1, 2006 for 1996 and newer model year vehicles. These revisions were adopted on November 17, 2005, and became state-effective on January 30, 2006. The revised version of section III.A.2, as approved by EPA, reads as follows:

(1) The following emissions standards shall apply to those tests performed on model year 1996 and newer vehicles, on and after January 1, of the dates specified:

Calendar year	HC	CO	NO _x
2002	1.2	20	3.0
2003	1.2	20	3.0

[59 FR 64336, Dec. 14, 1994, as amended at 62 FR 2914, Jan. 21, 1997; 62 FR 68195, Dec. 31, 1997; 71 FR 8961, Feb. 22, 2006; 76 FR 51905, Aug. 19, 2011; 76 FR 61056, Oct. 3, 2011; 77 FR 75390, Dec. 20, 2012]

§ 52.330 Control strategy: Total suspended particulates.

(a) *Part D—Conditional Approval:* The Pueblo plan is approved assuming the State demonstrates by December 31, 1981, through air quality modeling, attainment of the 24-hour and annual standards, while considering emissions from all sources in the nonattainment area. In addition, the State must re-promulgate Regulation No. 1 to satisfy reasonably available control technology requirements in accordance with the following schedule:

(1) The Commission will consider and adopt for public hearing any changes or additions to Regulation No. 1 by February 15, 1981.

(2) The proposed regulations will be published in the Colorado Register by March 10, 1981.

(3) Public hearing will be held by May 14, 1981.

(4) Regulations will be approved with an effective date no later than July 1, 1981, and submitted to EPA by the same date.

[46 FR 26302, May 12, 1981]

§ 52.331 Committal SIP for the Colorado Group II PM₁₀ areas.

On April 14, 1989, the Governor submitted a Committal SIP for the Colorado Group II PM₁₀ areas. The SIP commits the State to continue to monitor for PM₁₀, report data and to submit a full SIP if a violation of the PM₁₀ National Ambient Air Quality Standards is detected.

[54 FR 43178, Oct. 23, 1989]

§ 52.332 Control strategy: Particulate matter.

(a) On April 9, 1992, the Governor of Colorado submitted the moderate PM-10 nonattainment area plan for the Canon City area. The submittal was made to satisfy those moderate PM-10 nonattainment area SIP requirements which were due for Canon City on November 15, 1991.

(b)(1) On February 24, 1992, and December 9, 1993, the Governor of Colorado submitted the moderate PM-10 nonattainment area plan for the Pagosa Springs area. The submittal was made to satisfy those moderate PM-10 nonattainment area SIP re-

quirements which were due for Pagosa Springs on November 15, 1991.

(2) On August 2, 1996, the Governor of Colorado submitted minor revisions to the Pagosa Springs Element of the Colorado PM-10 SIP.

(c) On May 27, 1993, the Governor of Colorado submitted the moderate PM-10 nonattainment area plan for the Lamar area. The submittal was made to satisfy those moderate PM-10 nonattainment area SIP requirements which were due for Lamar on November 15, 1991.

(d) On December 9, 1993, the Governor of Colorado submitted PM₁₀ contingency measures for the moderate PM₁₀ nonattainment areas of Canon City, Lamar, and Pagosa Springs. The submittal was made to satisfy the moderate PM₁₀ nonattainment area requirements for contingency measures due for Canon City, Lamar, and Pagosa Springs on November 15, 1993.

(e)(1) On January 15, 1992, March 17, 1993, and December 9, 1993, the Governor of Colorado submitted the moderate PM-10 nonattainment area plan for the Aspen area. The submittals were made to satisfy those moderate PM-10 nonattainment area SIP requirements which were due for Aspen on November 15, 1991. The December 9, 1993 submittal was also made to satisfy the PM-10 contingency measure requirements which were due for Aspen on November 15, 1993.

(2) On March 13, 1995, the Governor of Colorado submitted minor revisions to the Aspen Element of the Colorado PM-10 SIP.

(f) On March 30, 1995, and November 17, 1995, the Governor of Colorado submitted the moderate PM₁₀ nonattainment area plan for the Denver area. The March 30, 1995 submittal was made to satisfy those moderate PM₁₀ nonattainment area SIP requirements due for the Denver PM₁₀ nonattainment area on November 15, 1991. The November 17, 1995 submittal was also made to satisfy the PM₁₀ contingency measure requirements which were due for Denver on November 15, 1993.

(g) On March 17, 1993, December 9, 1993, and April 22, 1996, the Governor of Colorado submitted the moderate PM₁₀ nonattainment area plan for Telluride. The submittals were made to satisfy

those moderate PM₁₀ nonattainment area SIP requirements which were due for Telluride on November 15, 1991. The December 9, 1993 submittal was also made to satisfy the PM₁₀ contingency measure requirements which were due for Telluride on November 15, 1993.

(h) On September 16, 1997 the Governor of Colorado submitted the moderate PM₁₀ nonattainment area plan for Steamboat Springs. The submittal was made to satisfy those moderate PM₁₀ nonattainment area SIP requirements which were due for Steamboat Springs on July 20, 1995.

(i) On September 22, 1997, the State of Colorado submitted a maintenance plan for the Canon City PM₁₀ nonattainment area and requested that the area be redesignated to attainment for the PM₁₀ National Ambient Air Quality Standards. An April 24, 2000 letter from Margie Perkins, Director, Colorado Air Pollution Control Division, to Richard Long, Director, EPA Region VIII Air and Radiation Program, was sent to clarify the requirements of the contingency plan section of the Canon City maintenance plan. The redesignation request and maintenance plan satisfy all applicable requirements of the Clean Air Act.

(j) On May 10, 2000, the State of Colorado submitted maintenance plans for the Telluride and Pagosa Springs PM₁₀ nonattainment areas and requested that these areas be redesignated to attainment for the PM₁₀ National Ambient Air Quality Standards. The redesignation requests and maintenance plans satisfy all applicable requirements of the Clean Air Act.

(k) *Determination*—EPA has determined that the Steamboat Springs PM₁₀ “moderate” nonattainment area attained the PM₁₀ national ambient air quality standard by December 31, 2000. This determination is based on air quality monitoring data from 1998, 1999, and 2000.

(l) On July 30, 2001, the State of Colorado submitted a maintenance plan for the Denver PM₁₀ nonattainment area (“PM-10 Redesignation Request and Maintenance Plan For the Denver Metropolitan Area,” Chapter 4: “Maintenance Plan,” adopted April 19, 2001 by the Colorado Air Quality Control Commission and effective April 19, 2001) and

requested that the area be redesignated to attainment for the PM₁₀ National Ambient Air Quality Standards. The redesignation request and maintenance plan satisfy all applicable requirements of the Clean Air Act.

(m) On November 9, 2001, the State of Colorado submitted a maintenance plan for the Aspen PM₁₀ nonattainment area and requested that this area be redesignated to attainment for the PM₁₀ National Ambient Air Quality Standards. The redesignation request and maintenance plan satisfy all applicable requirements of the Clean Air Act.

(n) On July 31, 2002, the State of Colorado submitted a maintenance plan for the Steamboat Springs PM₁₀ nonattainment area and requested that this area be redesignated to attainment for the PM₁₀ National Ambient Air Quality Standards. The redesignation request and maintenance plan satisfies all applicable requirements of the Clean Air Act.

(o) On July 31, 2002, the State of Colorado submitted a maintenance plan for the Lamar PM₁₀ nonattainment area and requested that this area be redesignated to attainment for the PM₁₀ National Ambient Air Quality Standards. The redesignation request and maintenance plan satisfy all applicable requirements of the Clean Air Act.

(p) *Revisions to the Colorado State Implementation Plan*, PM₁₀ Revised Maintenance Plan for Denver, as adopted by the Colorado Air Quality Control Commission on December 15, 2005, State effective on March 2, 2006, and submitted by the Governor’s designee on September 25, 2006. The revised maintenance plan satisfies all applicable requirements of the Clean Air Act.

(q) *Revisions to the Colorado State Implementation Plan*, PM₁₀ Revised Maintenance Plan for Cañon City, as adopted by the Colorado Air Quality Control Commission on November 20, 2008, State effective on December 30, 2008, and submitted by the Governor’s designee on June 18, 2009. The revised maintenance plan satisfies all applicable requirements of the Clean Air Act.

(r) *Revisions to the Colorado State Implementation Plan*, PM₁₀ Revised Maintenance Plan for Aspen, as adopted by the Colorado Air Quality Control Commission on December 16, 2010,

State effective on March 1, 2011, and submitted by the Governor's designee on May 25, 2011. The revised maintenance plan satisfies all applicable requirements of the Clean Air Act.

(s) Revisions to the Colorado State Implementation Plan, PM₁₀ Revised Maintenance Plan for Telluride, as adopted by the Colorado Air Quality Control Commission on November 19, 2009, State effective on December 30, 2009, and submitted by the Governor's designee on March 31, 2010. The revised maintenance plan satisfies all applicable requirements of the Clean Air Act.

(t) Revisions to the Colorado State Implementation Plan, Final Revised PM₁₀ Maintenance Plan for the Pagosa Springs Attainment/Maintenance Area, as adopted by the Colorado Air Quality Control Commission on November 19, 2009, and submitted by the Governor's designee on March 31, 2010. The revised maintenance plan satisfies all applicable requirements of the Clean Air Act.

(u) Revisions to the Colorado State Implementation Plan, PM₁₀ Revised Maintenance Plan for Steamboat Springs, as adopted by the Colorado Air Quality Control Commission on December 15, 2011, State effective on January 30, 2012, and submitted by the Governor's designee on May 11, 2012. The revised maintenance plan satisfies all applicable requirements of the Clean Air Act.

[58 FR 68038, Dec. 23, 1993]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.332, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

§§ 52.333–52.342 [Reserved]

§ 52.343 Significant deterioration of air quality.

(a) The requirements of sections 160 through 165 of the Clean Air Act are not met for the following categories of sources for preventing the significant deterioration of air quality:

- (1) Sources locating on Indian lands.
- (2) Sources locating on Indian Reservations.

(3) Sources which constructed prior to September 2, 1986 and which have not otherwise subjected themselves to Colorado's PSD permitting regulations

after September 2, 1986, either through application to Colorado for a PSD permit (in the case of those sources which improperly constructed without obtaining a PSD permit) or through application to Colorado for a major modification to the source.

(b) Regulations for preventing significant deterioration of air quality. The provisions of § 52.21 except paragraph (a)(1) are hereby incorporated and made a part of the applicable State plan for the State of Colorado for the sources identified in paragraph (a) of this section as not meeting the requirements of sections 160–165 of the Clean Air Act.

(c) The State of Colorado has clarified the generalized language contained in the Colorado Air Quality Control Regulations on the use of “applicable air quality models.” In a letter to Douglas M. Skie, EPA, dated May 19, 1989, Bradley J. Beckham, Director of the Air Pollution Control Division stated:

*** All PSD permits reviewed by the Division will use the revised modeling guideline mentioned above [Guideline on Air Quality Models (Revised), EPA 450/2-78-027R including Supplement A (July 1987)] for determining if the air quality models, data bases, and other requirements are generally approved by EPA. Any future revisions (including appendices or supplement) will be incorporated into the Division's protocol for reviewing modeling for PSD permits.

[51 FR 31126, Sept. 2, 1986, and 52 FR 4622, Feb. 13, 1987, as amended at 52 FR 22638, June 15, 1987; 54 FR 27881, July 3, 1989; 57 FR 27000, June 17, 1992; 59 FR 42506, Aug. 18, 1994; 62 FR 2914, Jan. 21, 1997; 62 FR 13336, Mar. 20, 1997; 68 FR 11322, Mar. 10, 2003; 68 FR 74488, Dec. 24, 2003]

§ 52.344 Visibility protection.

(a) A revision to the SIP was submitted by the Governor on December 21, 1987, for visibility general plan requirements, monitoring, and long-term strategies.

(b) The Visibility NSR regulations are approved for industrial source categories regulated by the NSR and PSD regulations which have previously been approved by EPA. However, Colorado's NSR and PSD regulations have been disapproved for certain sources as listed in 40 CFR 52.343(a)(1). The provisions of 40 CFR 52.28 are hereby incorporated

§ 52.345

and made a part of the applicable plan for the State of Colorado for these sources.

[50 FR 28553, July 12, 1985, as amended at 52 FR 45137, Nov. 24, 1987; 53 FR 30431, Aug. 12, 1988; 53 FR 48539, Dec. 1, 1988; 59 FR 51379, Oct. 11, 1994; 82 FR 3129, Jan. 10, 2017]

§ 52.345 Stack height regulations.

The State of Colorado has committed to revise its stack height regulations should EPA complete rulemaking to respond to the decision in *NRDC v. Thomas*, 838 F.2d 1224 (DC Cir. 1988). In a letter to Mr. Douglas M. Skie, EPA, dated May 9, 1988, Bradley J. Beckham, Director of the Colorado Air Pollution Control Division stated:

* * * We are submitting this letter to allow EPA to continue to process our current SIP submittal with the understanding that if EPA's response to the NRDC remand modified the July 8, 1985, regulations, EPA will notify the state of the rules that must be changed to comply with the EPA's modified requirements. The State of Colorado agrees to make appropriate changes.

[54 FR 24340, June 7, 1989]

§ 52.346 Air quality monitoring requirements.

In a letter and submittal dated July 7, 1993, from the Governor of Colorado to the EPA Region VIII Administrator, the State submitted a revised Air Quality Monitoring State Implementation Plan. The plan was adopted by the State on March 18, 1993, and completely replaces the previous version of the Air Quality Monitoring plan as identified at 40 CFR 52.320 (c)(17). The revisions updated the plan to bring it into conformance with the Federal requirements for air quality monitoring as found in 40 CFR part 58. The State commits to meet these Federal requirements.

[58 FR 49435, Sept. 23, 1993]

§ 52.347 [Reserved]

§ 52.348 Emission inventories.

(a) The Governor of the State of Colorado submitted the 1990 carbon monoxide base year emission inventories for the Colorado Springs, Denver/Longmont, and Fort Collins nonattainment areas on December 31, 1992, as a revision to the State Implementation

40 CFR Ch. I (7–1–25 Edition)

Plan (SIP). The Governor submitted revisions to the Colorado Springs and Fort Collins inventories by a letter dated March 23, 1995. The Governor submitted revisions to the Denver/Longmont inventory by letters dated July 11, 1994, and October 21, 1994. The inventories address emissions from point, area, on-road mobile, and non-road sources. These 1990 base year carbon monoxide inventories satisfy the requirements of section 187(a)(1) of the Clean Air Act for each of these non-attainment areas.

(b) On September 16, 1997, the Governor of Colorado submitted the 1993 Carbon Monoxide Periodic Emission Inventories for Colorado Springs, Denver, Fort Collins, and Longmont as revisions to the Colorado State Implementation Plan. These inventories address carbon monoxide emissions from stationary point, area, non-road mobile, and on-road mobile sources.

(c) On September 16, 1997, the Governor of Colorado submitted the 1990 Carbon Monoxide Base Year Emission Inventory for Greeley as a revision to the Colorado State Implementation Plan. This inventory addresses carbon monoxide emissions from stationary point, area, non-road, and on-road mobile sources.

(d) On May 10, 2000, the Governor of Colorado submitted the 1996 Carbon Monoxide Periodic Emission Inventories for Denver and Fort Collins, as a revision to the Colorado State Implementation Plan. The inventories address carbon monoxide emissions from stationary point, area, non-road mobile, and on-road mobile sources.

[61 FR 67469, Dec. 23, 1996, as amended at 63 FR 38089, July 15, 1998; 64 FR 11782, Mar. 10, 1999; 65 FR 63548, Oct. 24, 2000]

§ 52.349 Control strategy: Carbon monoxide.

(a) Revisions to the Colorado State Implementation Plan, Carbon Monoxide Redesignation Request and Maintenance Plan for Greeley, as adopted by the Colorado Air Quality Control Commission on September 19, 1996, State effective November 30, 1996, and submitted by the Governor on September 16, 1997.

(b) On June 25, 1996, the Governor of Colorado submitted a revision to the

Colorado Springs element of the carbon monoxide (CO) portion of the Colorado State Implementation Plan (SIP). The revision to the Colorado Springs element was submitted to satisfy certain requirements of part D and section 110 of the Clean Air Act (CAA) as amended 1990. The revision substitutes Colorado's oxygenated gasoline program for the Colorado Springs bus purchase program as a source of emissions reductions credits in the Colorado Springs CO element of the SIP. This revision removes the bus purchase program from the EPA-approved SIP. EPA originally approved the bus purchase program as part of the Colorado Springs CO element of the SIP on December 12, 1983 (48 FR 55284).

(c) Revisions to the Colorado State Implementation Plan, Carbon Monoxide Redesignation Request and Maintenance Plan for Colorado Springs, as adopted by the Colorado Air Quality Control Commission on January 15, 1998, State effective March 30, 1998, and submitted by the Governor on August 19, 1998. The Maintenance Plan removes the Clean Air Campaign from the SIP. The Clean Air Campaign was approved into the SIP at 40 CFR 52.320(c)(43)(i)(A).

(d) Revisions to the Colorado State Implementation Plan, Carbon Monoxide Redesignation Request and Maintenance Plan for Longmont, as adopted by the Colorado Air Quality Control Commission on December 18, 1997, State effective March 2, 1998, and submitted by the Governor on August 19, 1998.

(e) Revisions to the Colorado State Implementation Plan, Carbon Monoxide Revised Maintenance Plan for Colorado Springs, as adopted by the Colorado Air Quality Control Commission on February 17, 2000, State effective April 30, 2000, and submitted by the Governor on May 10, 2000.

(f) *Determination.* EPA has determined that the Denver carbon monoxide "serious" nonattainment area attained the carbon monoxide national ambient air quality standard by December 31, 2000. This determination is based on air quality monitoring data from 1998, 1999, and 2000.

(g) Revisions to the Colorado State Implementation Plan, carbon mon-

oxide NAAQS Redesignation Request and Maintenance Plan for Denver entitled "Carbon Monoxide Redesignation Request and Maintenance Plan for the Denver Metropolitan Area," excluding Chapter 1, Chapter 2, and Appendix C, as adopted by the Colorado Air Quality Control Commission on January 10, 2000, State effective March 1, 2000, and submitted by the Governor on May 10, 2000.

(h) Revisions to the Colorado State Implementation Plan, carbon monoxide NAAQS Redesignation Request and Maintenance Plan for Fort Collins entitled "Carbon Monoxide Redesignation Request and Maintenance Plan for the Fort Collins Area," excluding Part I—Chapter 1 and Part I—Chapter 2, as adopted by the Colorado Air Quality Control Commission on July 18, 2002, State effective September 30, 2002, and submitted by the Governor on August 9, 2002.

(i) Revisions to the Colorado State Implementation Plan, revised Carbon Monoxide Maintenance Plan for Denver, as adopted by the Colorado Air Quality Control Commission on June 19, 2003, State effective on August 30, 2003, and submitted by the Governor on October 15, 2003.

(j) Revisions to the Colorado State Implementation Plan, carbon monoxide NAAQS, revised maintenance plan for Colorado Springs entitled "Revised Carbon Monoxide Maintenance Plan for the Colorado Springs Attainment/Maintenance Area", as adopted by the Colorado Air Quality Control Commission on December 18, 2003, State effective March 1, 2004, and submitted by the Governor on April 12, 2004.

(k) Revisions to the Colorado State Implementation Plan, carbon monoxide NAAQS, revised maintenance plan for Longmont entitled "Revised Carbon Monoxide Maintenance Plan for the Longmont Attainment/Maintenance Area", as adopted by the Colorado Air Quality Control Commission on December 18, 2003, State effective March 1, 2004, and submitted by the Governor on April 12, 2004.

(l) Revisions to the Colorado State Implementation Plan entitled "Revised Carbon Monoxide Maintenance Plan for the Greeley Attainment/Maintenance

Area,” as adopted by the Colorado Air Quality Control Commission on December 19, 2002, and submitted by the Governor on June 20, 2003.

(m) Revisions to the Colorado State Implementation Plan, revised Carbon Monoxide Maintenance Plan for Denver, as adopted by the Colorado Air Quality Control Commission on December 15, 2005, State effective on March 2, 2006, and submitted by the Governor’s designee on September 25, 2006.

(n) Revisions to the Colorado State Implementation Plan, revised Carbon Monoxide Maintenance Plan for Longmont, as adopted by the Colorado Air Quality Control Commission on December 15, 2005, State effective on March 2, 2006, and submitted by the Governor’s designee on September 25, 2006.

(o) Revisions to the Colorado State Implementation Plan, revised Carbon Monoxide Maintenance Plan for Colorado Springs, as adopted by the Colorado Air Quality Control Commission on December 17, 2009 and submitted by the Governor’s designee on March 31, 2010.

(p) Revisions to the Colorado State Implementation Plan, revised Carbon Monoxide Maintenance Plan for Greeley, as adopted by the Colorado Air Quality Control Commission on December 17, 2009 and submitted by the Governor’s designee on March 31, 2010.

(q) Revisions to the Colorado State Implementation Plan, revised Carbon Monoxide Maintenance Plan for Fort Collins, as adopted by the Colorado Air Quality Control Commission on December 16, 2010 and submitted by the Governor’s designee on May 25, 2011.

[64 FR 11782, Mar. 10, 1999]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.349, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

§ 52.350 Control strategy: Ozone.

(a) Revisions to the Colorado State Implementation Plan, 1-hour ozone NAAQS Redesignation Request and Maintenance Plan for Denver entitled “Ozone Redesignation Request and Maintenance Plan for the Denver Metropolitan Area,” excluding Chapter 1

and Appendix B, as adopted by the Colorado Air Quality Control Commission on January 11, 2001, State effective March 4, 2001, and submitted by the Governor on May 7, 2001.

(b) Revisions to the Colorado State Implementation Plan, 8-hour ozone NAAQS Early Action Compact plan for the metropolitan Denver area entitled “Early Action Compact Ozone Action Plan,” excluding sections entitled “Introduction” and “Ozone Monitoring Information,” as adopted by the Colorado Air Quality Control Commission on March 12, 2004, and submitted by the Governor to us on July 21, 2004.

(c) Revisions to the Colorado State Implementation Plan for the 1997 8-hour ozone NAAQS entitled “Denver Metro Area & North Front Range 8-Hour Ozone Attainment Plan,” excluding the last paragraph on page IV–1, the first paragraph on page IV–2, the words “federally enforceable” in the second to last paragraph on page V–6, and the reference to Attachment A in the Table of Contents and on page IV–3, as adopted by the Colorado Air Quality Control Commission on December 12, 2008, and submitted by the Governor to EPA on June 18, 2009.

(d) Determination of attainment by the attainment date for the revoked 1997 8-hour ozone National Ambient Air Quality Standards (NAAQS). Effective August 30, 2021. On November 13, 2020, the EPA determined that Denver-Boulder-Greeley-Ft. Collins-Loveland, CO, attained the revoked 1997 8-hour ozone NAAQS by the applicable attainment date of November 20, 2010. The determination was based upon complete quality-assured and certified data for the three calendar years 2007–2009.

[66 FR 47092, Sept. 11, 2001, as amended at 70 FR 48654, Aug. 19, 2005; 76 FR 47451, Aug. 5, 2011; 86 FR 40787, July 29, 2021]

§ 52.351 United States Postal Service substitute Clean Fuel Fleet Program.

Revisions to the Colorado State Implementation Plan, carbon monoxide NAAQS, United States Postal Service substitute clean-fuel vehicle program, as allowed under section 182(c)(4)(B) of the Clean Air Act, to address the requirements of section 246 of the Clean Air Act for the Denver Metropolitan

carbon monoxide nonattainment area. The revisions were adopted by the Colorado Air Quality Control Commission on March 16, 2000, State effective May 30, 2000, and submitted by the Governor on May 7, 2001. Administrative corrections to the Governor's May 7, 2001, submittal were submitted by the Colorado Attorney General's office on May 30, 2001.

[66 FR 64758, Dec. 14, 2001]

§ 52.352 Interstate transport.

(a) Addition to the Colorado State Implementation Plan of the Colorado Interstate Transport regarding the 1997 8-Hour Ozone Standard for the "significant contribution," the "interference with maintenance" requirements, and the addition of "interference with visibility protection" requirements regarding the 1997 8-Hour Ozone and PM_{2.5} Standards, submitted by the Governor's designee on June 18, 2009 and March 31, 2010.

(b) Addition to the Colorado State Implementation Plan of the Colorado Interstate Transport SIP regarding the 1997 8-Hour Ozone and 1997 PM_{2.5} Standards for the "interference with prevention of significant deterioration" requirement, and the addition of the "significant contribution" and "interference with maintenance" requirements regarding the 1997 PM_{2.5} Standards, submitted by the Governor's designee on March 31, 2010.

(c) Addition to the Colorado State Implementation Plan of the Colorado Interstate Transport SIP regarding 2006 PM_{2.5} Standards for all four of the CAA section 110(a)(2)(D)(i) requirements submitted by the Governor's designee on May 11, 2012.

(d) Addition to the Colorado State Implementation Plan of the Colorado Interstate Transport SIP regarding 2008 Ozone Standards for both of the CAA section 110(a)(2)(D)(i)(I) requirements submitted to EPA on December 31, 2012.

(e) Addition to the Colorado State Implementation Plan of the Colorado Interstate Transport SIP regarding 2012 PM_{2.5} Standards, submitted to EPA on December 1, 2015, for both elements of CAA section 110(a)(2)(D)(i)(I) for the 2012 PM_{2.5} NAAQS.

(f) Addition to the Colorado State Implementation Plan of the Colorado Interstate Transport SIP regarding 2010 Standards, submitted to EPA on July 17, 2013, and February 16, 2018, for both elements of CAA section 110(a)(2)(D)(i)(I) for the 2010 SO₂ NAAQS.

[77 FR 1039, Jan. 9, 2012, as amended at 80 FR 47864, Aug. 10, 2015; 81 FR 7708, Feb. 16, 2016; 83 FR 31329, July 5, 2018; 83 FR 44503, Aug. 31, 2018]

§ 52.353 Section 110(a)(2) infrastructure requirements.

(a) On January 7, 2008, James B. Martin, Executive Director of the Colorado Department of Public Health and Environment for the state of Colorado, submitted a certification letter which provides the state of Colorado's SIP provisions for meeting the requirements of CAA Section 110(a)(1) and (2) relevant to the 1997 8-hour ozone NAAQS. The State's 1997 Ozone Infrastructure SIP is approved with respect to the requirements of the following elements of section 110(a)(2) of the CAA for the 1997 8-hour ozone NAAQS: (A), (B), (C), (D)(ii), (E), (F), (G), (H), (J), (K), (L), and (M).

(b) On April 4, 2008 James B. Martin, Executive Director, Colorado Department of Public Health and Environment, provided a submission to meet the infrastructure requirements for the State of Colorado for the 1997 PM_{2.5} NAAQS. On June 4, 2010, Martha E. Rudolph, Executive Director, Colorado Department of Public Health and Environment, provided a submission to meet the infrastructure requirements for the State of Colorado for the 2006 PM_{2.5} NAAQS. The State's Infrastructure SIP is approved with respect to the 1997 and 2006 PM_{2.5} NAAQS with respect to section (110)(a)(1) and the following elements of section (110)(a)(2): (A), (B), (C) with respect to PSD and minor NSR requirements, (E), (F), (G), (H), (J) with respect to PSD requirements and the requirements of sections 121 and 127 of the Act, (K), (L), and (M).

(c) The Colorado Department of Public Health and Environment provided submissions to meet infrastructure requirements for the State of Colorado for the 2008 ozone, 2008 lead, and 2010 NO₂ NAAQS were received on December 31, 2012, July 26, 2012, and March 7, 2013,

respectively. The State's Infrastructure SIP is approved with respect to the 2008 ozone, 2008 lead, and 2010 NO₂ NAAQS with respect to section (110)(a)(1) and the following elements of section (110)(a)(2): (A), (C) with respect to minor NSR and PSD requirements, (D)(i)(II) elements 3 and 4, (D)(ii), (E), (F), (G), (H), (J), (K), (L), and (M); (B) for the 2008 Pb and 2008 ozone NAAQS and conditional approval of (B) for the 2010 NO₂ NAAQS; and D(i)(I) elements 1 and 2 for the 2008 Pb and 2010 NO₂ NAAQS.

(d) The Colorado Department of Public Health and Environment provided submissions to meet infrastructure requirements for the State of Colorado for the 2010 SO₂ and 2012 PM_{2.5} NAAQS were received on July 10, 2013 and December 1, 2015, respectively. The State's Infrastructure SIP for the 2010 SO₂ and 2012 PM_{2.5} NAAQS is approved with respect to section (110)(a)(1) and the following elements of section (110)(a)(2): (A), (B), (C) with respect to minor NSR and PSD requirements, (D)(i)(II), (D)(ii), (E), (F), (G), (H), (J), (K), (L), and (M).

(e) The Colorado Department of Environmental Quality submitted certification of Colorado's infrastructure SIP for the 2015 O₃ NAAQS on September 17, 2018. Colorado's infrastructure certification demonstrates how the State, where applicable, has plans in place that meet the requirements of section 110 for the 2015 O₃ NAAQS. The State's Infrastructure SIP for 2015 O₃ NAAQS is approved with respect to CAA section 110(a)(1) and (2).

[77 FR 21452, Apr. 10, 2012, as amended at 78 FR 58188, Sept. 23, 2013; 80 FR 50206, Aug. 19, 2015; 82 FR 39031, Aug. 17, 2017; 85 FR 20178, Apr. 10, 2020]

§ 52.354 Original identification of plan.

(a) This section identifies the original "Air Implementation Plan for the State of Colorado" and all revisions submitted by Colorado that were federally approved prior to June 1, 2015.

(b) The plan was officially submitted on January 26, 1972.

(c) The plan revisions listed below were submitted on the dates specified.

(1) Request for legal authority submitted February 14, 1972, by the Governor.

(2) Request for 110(e) extensions submitted March 20, 1972, by the Governor.

(3) Statements by State Air Pollution Control Commission (APCC) related to public inspection of emission data, emergency episodes, and transportation control submitted May 1, 1972, by the APCC. (Non-regulatory)

(4) List of sources under compliance schedules submitted May 1, 1972, by the State Department of Health.

(5) Transportation Control Plans submitted June 4, 1973, by the Governor.

(6) Statements relating to transportation control plans submitted July 16, 1973, by the Governor. (Non-regulatory)

(7) Plan revisions submitted November 21, 1973, by the Governor which delete Section III of Regulation No. 1 only as it relates to existing sources in Appendix P concerning SO₂.

(8) On June 7, 1974, the Governor submitted five Air Quality Maintenance Area designations.

(9) Supplemental information about the Air Quality Maintenance Areas was submitted by the Governor on January 29, 1975.

(10) Procedural rules for all proceedings before the Air Pollution Control Commission, submitted May 5, 1977, by the Governor.

(11) On January 2, 1979, the Governor submitted the nonattainment area plan for all areas designated nonattainment as of March 3, 1978. EPA is taking no action on areas for which the Governor has requested redesignations (Larimer-Weld TSP and ozone; El Paso County ozone).

(i) Regulation 9, "Trip Reduction," previously approved on October 5, 1979, and now deleted without replacement.

(12) Extension request for attainment of CO and O₃ was submitted by the Governor on January 5, 1979.

(13) On July 5, 1979, the governor submitted the Air Pollution Control Commission's final comment on our May 11, 1979, proposal. This included a clarification that the "No-Drive Day" was not part of the State Implementation Plan and transportation control measures schedules for Larimer-Weld.

(14) On July 18, 1979, the Commission committed to revising Regulation 7.

(15) On July 23, 1979, the Governor submitted House Bill 1090 and Senate Bill 1 as part of the plan.

(16) On July 27, 1979, the Governor submitted the Denver Regional Council of Governments schedules for implementing the transportation control strategies, and clarified that the Transportation Development Plan was part of the plan.

(17) On March 4, 1980, the Governor submitted a plan revision to meet the requirements of Air Quality Monitoring 40 CFR part 58, subpart C, § 58.20.

(18) On May 29, 1980, the Governor submitted written evidence of the State's legal authority to implement and enforce an automobile emissions control program as well as schedules for implementing that program and a demonstration that it will achieve a 25% reduction in exhaust emissions by 1987.

(19) On January 22 and February 6, 1980 the Governor submitted schedules for the implementation of transportation control measures for Denver and Larimer-Weld elements of the State Implementation Plan, respectively.

(20) On April 21, 1980, the Governor submitted a plan revision to meet the data reporting requirements of section 127 of the Clean Air Act.

(21) On June 22, 1980, the Governor submitted the following amended rules:

REPEAL AND REPROMULGATION OF REGULATION NO. 3 "A Regulation Requiring Air Pollutant Emission Notice, Emission Permits and Fees."

REVISIONS TO COMMON PROVISIONS REGULATION as they relate to changes in Regulation No. 3.

(22) On June 5, 1980, the Governor submitted the following rules:

REPEAL AND REPROMULGATION OF REGULATION NO. 7 "A Regulations to Control Emissions of Volatile Organic Compounds" and revisions to the Common Provisions Regulations as they relate to changes in Regulation No. 7.

(23) On August 25, 1980, the Governor of Colorado submitted a site specific revision to the State Implementation Plan for Coors Container Corporation, Paper Packaging Division, in regard to alternative volatile organic compound emissions reduction for its printing presses.

(24) Provisions to meet the requirements of sections 110 and 172 of the Clean Air Act, as amended in 1977, regarding control of Group II VOC

sources were submitted on January 6, 1981, and the supplemental information received on August 20, 1981.

(25) On December 29, 1980, the Governor submitted the following rule: Regulation No. 11, covering procedures for garage licensing (including mechanic testing and licensing), equipment requirements (including standards and specifications for exhaust gas analyzers), requirements for inspections, and emission standards as part of the Colorado motor vehicle inspection program.

(26) On March 23, 1981, the Governor submitted revised regulations limiting sulfur dioxide emissions from certain oil shale production facilities.

(27) On April 12, 1982, the Governor submitted the plan revisions to show attainment of the lead National Ambient Air Quality Standard.

(28) Regulation Number 7 is part of the plan.

(29) Provisions to meet the requirements of Part D of the Clean Air Act for carbon monoxide in Colorado Springs, Fort Collins, and Greeley and ozone in Denver were submitted on June 24, 1982, and supplemented by information submitted on May 4, 1983, by the Colorado Air Quality Control Commission.

(30) Revisions to Air Pollution Control Commission Regulation No. 1 related to fugitive particulate emissions, were submitted by the Governor on June 22, 1982; on December 6, 1982; and on March 23, 1983, with a technical clarification dated August 5, 1982. Included is approval of requirements for continuous emission monitoring (CEM) of sulfur dioxide on fossil fuel fired steam generator with greater than 250 million BTU per hour heat input. Also addressed is the reinstatement of the 40% opacity limitation for wigwam waste-wood burners into Regulation No. 1. With this is the addition of operation and maintenance (O&M) requirements to promote improved operation of the wigwam burners.

(i) *Incorporation by reference.* (A) Emission Control Regulations for Particulates, Smokes and Sulfur Oxides for the State of Colorado, Regulation No. 1.II (Smoke and Opacity); III (Particulates); IV (Continuous Emission Monitoring Requirements for Existing

Sources; VII (Statements of Basis and Purpose); and Appendices A and B; which were effective on May 30, 1982.

(B) Colorado Air Quality Control Commission Common Provisions Regulation which was effective on May 30, 1982.

(C) Letter of August 5, 1982, from the State of Colorado to EPA. Clarification of the SIP Re: Continuous Emission Requirements for Oxides of Sulfur from Fossil Fueled Steam Generators.

(31) Revisions to Air Pollution Control Commission Regulation No. 11 related to the Colorado Inspection and Maintenance (I/M) program for exhaust emission inspection of motor vehicles, submitted by the Governor on December 10, 1984.

(32) Revisions to Air Pollution Control Commission Regulation No. 1, section II.A.6 and III.C.2 (a) and (b), submitted by the Governor on April 9, 1985.

(i) *Incorporation by reference.* (A) Revisions to Air Pollution Control Commission Regulation No. 1, "Emission Control Regulation for Particulates, Smokes, and Sulfur Oxides for the State of Colorado," sections II.A.6 and III.C.2 (a) and (b), effective March 2, 1985.

(33) A revision to Regulation No. 4, "Regulation on the Sale of New Woodstoves", to control emissions from new woodstoves was submitted by the Governor on October 24, 1986.

(i) *Incorporation by reference.* (A) Colorado Air Quality Control Commission Regulation No. 4, "Regulation on the Sale of New Woodstoves" (Section III.A., E., F., G. and Section VI.B. and C.) adopted June 27, 1985.

(34) [Reserved]

(35) Colorado Air Pollution Control Commission Regulation No. 4, "Regulation on the Sale of New Wood Stoves", submitted by the Governor on July 18, 1985.

(i) *Incorporation by reference.* (A) Colorado Air Quality Control Commission Regulation No. 4., "Regulation on the Sale of New Wood Stoves", adopted June 27, 1985.

(36) "Revisions to Colorado Regulation No. 3 Requiring Air Contaminant Emission Notices, Emission Permits and Fees as it Relates to the Prevention of Significant Deterioration" and "Revisions to Common Provision Regu-

lation as Related to Regulation 3." Changes submitted April 18, 1983, by the Governor.

(37) Supplemental information submitted on December 16, 1985, by the Colorado Department of Health concerning compliance with EPA's stack height regulations in issuing PSD permits.

(i) *Incorporation by reference.* (A) Revisions to Regulation 3 and Common Provisions Regulation adopted March 10, 1983, by the Colorado Air Quality Control Commission.

(B) Supplemental information submitted on December 16, 1985, by the Colorado Department of Health concerning compliance with EPA's stack height regulation in issuing PSD permits.

(38) Revisions to Regulation 1 to control emissions from alfalfa dehydrators were submitted by the Governor on July 29, 1987.

(i) *Incorporation by reference.* (A) Section II.A.6 and introductory text of Section III.C.2.a of Regulation 1 adopted by the Colorado Air Quality Control Commission on January 15, 1987, effective on March 2, 1987.

(39) Regulation 12, to control emissions from diesel fleets with nine or more vehicles over 7,500 pounds empty weight, registered in the AIR Program area (the Colorado I/M program), was submitted by the Governor on December 21, 1987.

(i) *Incorporation by reference.* (A) Colorado Air Quality Control Commission, Regulation No. 12, adopted December 18, 1986, and effective January 30, 1987.

(40) A revision to the Colorado SIP was submitted by the Governor on May 8, 1986, for Visibility New Source Review.

(i) *Incorporation by reference.* (A) Revision to the Colorado State Implementation Plan regarding Revision to Regulation No. 3, Section XIV was submitted by the Governor on April 18, 1983, and was adopted on March 10, 1983.

(B) Revision to the Colorado State Implementation Plan regarding Revision to Regulation No. 3, Section IV was submitted by the Governor on May 8, 1986, and was adopted on March 20, 1986.

(41) A revision to the SIP was submitted by the Governor on December

21, 1987, for visibility general plan requirements, monitoring, and long-term strategies.

(i) *Incorporation by reference.* (A) Letter dated December 21, 1987, from Governor Roy Romer submitting the Colorado Visibility SIP revision.

(B) The visibility SIP revision, Regulation No. 3, "Regulation requiring an air contaminant emission notice, Emission Permit Fees", section XV, adopted by the Colorado Air Quality Control Commission on November 19, 1987.

(42) Revisions to Air Pollution Control Regulation No. 1, requiring reasonably available control technology RACT for carbon monoxide control on petroleum refinery catalytic cracking units were submitted by the Governor on May 8, 1986.

(i) *Incorporation by reference.* (A) Revisions to Section IV., paragraphs IV.A., IV.D.2. and IV.E., and Section VII., Regulation No. 1, emission control regulations for particulates, smokes, carbon monoxide, and sulfur oxides for the State of Colorado requiring CEM and RACT on petroleum refinery catalytic cracking units in the metro Denver area effective on April 30, 1986.

(43) On June 15, 1988, the Governor submitted revisions to the CO SIP for Colorado Springs. The revisions contain a new measure, the Clean Air Campaign. EPA considers all other aspects of the submittal to be surplus.

(i) *Incorporation by reference.* (A) Clean Air Campaign portion of the Carbon Monoxide State Implementation Plan for the Colorado Springs urbanized area, revised August 12, 1987.

(44) A revision to Regulation No. 4 of the Colorado SIP which exempts certain woodburning devices from the certification requirements of Regulation No. 4 was submitted by the Governor of Colorado on September 10, 1988.

(i) *Incorporation by reference.* (A) In a letter dated September 10, 1988, Roy Romer, Governor of Colorado, submitted a revision to Regulation No. 4 of the Colorado SIP.

(B) Paragraph (I)(A)(10)-(13) and (II)(C), revisions to Regulation No. 4, "Regulation on the Sale of New Woodstoves," of the Colorado SIP became effective on June 30, 1988.

(45) In a letter dated May 8, 1986, the Governor submitted revisions to the Colorado Regulation No. 3 (Regulation Requiring an Air Contaminant Emission Notice, Emission Permit Fees) of the Colorado SIP modifying stack evaluations. The changes consisted of (1) new definitions of dispersion techniques, good engineering practice, nearby, and excessive concentrations (Section XII.D.) and (2) rules clarifying technical modeling and monitoring requirements (Section XII.C.).

(i) *Incorporation by reference.* (A) Revisions to the Colorado Regulation No. 3 (Regulation Requiring an Air Contaminant Emission Notice, Emission Permit Fees), Section XII, adopted March 20, 1986, by the Colorado Air Quality Control Commission.

(46) On July 29, 1987, the Governor submitted:

(1) Amendments to Colorado Regulation No. 11 (Inspection/Maintenance (I/M) program) and

(2) Regulation No. 13 (oxygenated fuels program).

(i) *Incorporation by reference.* (A) Regulation No. 11, revised January 15, 1987, effective March 2, 1987.

(B) Regulation No. 13, adopted June 29, 1987, effective July 30, 1987.

(47) In a letter dated October 23, 1985, the Director of the Air Pollution Control Division submitted the stack height demonstration analysis. Supplemental information was submitted on June 20, 1986, December 4, 1986, February 3, 1987, March 3, 1988, March 15, 1988, July 6, 1988 and August 16, 1988.

(i) *Incorporation by reference.* Stack height demonstration analyses submitted by the State on October 23, 1985, June 20, 1986, December 4, 1986, February 3, 1987, March 3, 1988, March 15, 1988, July 6, 1988 and August 16, 1988.

(48) [Reserved]

(49) A revision to Regulation No. 4 of the Colorado SIP submitted on June 29, 1990, prohibits persons from operating a wood-burning stove or fireplace during a high pollution day in specified areas.

(i) *Incorporation by reference.* (A) Revisions to Regulation No. 4, "Regulation on the Sale of New Woodstoves," effective on June 30, 1990.

(50) [Reserved]

(51) On June 29, 1990, the Governor of Colorado submitted revisions to the

plan. The revisions include amendments to the Common Provisions Regulation and Regulation No. 3 for emission permit fees and prevention of significant deterioration of air quality (PSD) regulations to incorporate the nitrogen dioxide (NO₂) increments.

(i) *Incorporation by reference.* (A) Revisions to the Colorado Air Quality Control Regulations, Common Provisions Regulation and Regulation No. 3, which were effective on June 30, 1990.

(ii) *Additional material.* (A) October 22, 1990 letter from Douglas Skie, EPA, to Bradley Beckham, Director, Air Pollution Control Division.

(B) November 5, 1990 letter from Bradley Beckham, Director, Air Pollution Control Division, to Douglas Skie, EPA.

(52) [Reserved]

(53) Revisions to the Colorado State Implementation Plan were submitted by the Governor of Colorado on July 13, 1990. The revision adds a voluntary educational Better Air Campaign to the Ft. Collins Carbon Monoxide element of the Colorado SIP.

(i) *Incorporation by reference.* (A) The Fort Collins Better Air Campaign as defined in Exhibit "A" and adopted on September 5, 1989, through Resolution 89-161.

(54) On November 17, 1988 the Governor submitted revisions to Regulation No. 3 and the Common Provisions Regulation which included:

Provisions for the review of new sources to protect the PM-10 national ambient air quality standards (NAAQS) and for consistency with EPA requirements;

Amendments to address deficiencies and previous EPA disapprovals as identified in the May 26, 1988 SIP Call;

Provisions for the certification and trading of emission offset credits; and

Amendments to increase permit processing and annual fees.

(i) *Incorporation by reference.* (A) Regulation No. 3: Sections I.B.2.c.(i)-(vi), I.B.3.a., II.B.1.d & e, II.B.3.c., II.C.1.h., II.C.3., III.A.1., IV.C.4.e., IV.C.4.f.(i) & (iv)-(v), IV.C.6-10, IV.D.1.e., IV.D.2.a.(iv), IV.D.2.b., IV.D.2.c.(i) & (ii), IV.D.3.a.(vi), IV.D.3.b.(i)(D), IV.D.3.b.(iii)(A)(3), (5), (7), & (11), IV.D.3.d.(ii), IV.D.3.e., IV.G.3., IV.H.7., V.C-I, VI.A.2., VI.C.1., VI.D., VII.A.,

VIII.D., IX.K., XIII.B., XIV.B.1, XIV.B.4.c.; and the Common Provisions Regulation: Section I.G., definitions of "Best Available Control Technology," "Complete," "Construction," "Enforceable," "Fixed Capital Cost," "Lowest Achievable Emission Rate (LAER)," "Modification," Net Emissions Increase," "Particulate Matter," "Particulate Matter Emissions," "PM10," "PM10 Emissions," "Reconstruction," "Significant," "Total Suspended Particulate;" revised August 18, 1988, effective September 30, 1988.

(ii) *Additional material.* (A) Letter dated April 29, 1991 from the Colorado Air Pollution Control Division to EPA.

(55) [Reserved]

(56) Revisions to the Colorado State Implementation Plan were submitted by the Governor in letters dated October 25, 1989, and October 30, 1991. The revisions consist of amendments to Regulation No. 12, "Reduction of Diesel Vehicle Emissions."

(i) *Incorporation by reference.* (A) Regulation No. 12 revisions adopted on July 20, 1989, and effective on August 30, 1989, as follows: Part A (Diesel Fleet Self-Certification Program): I.B.2.; I.C.1.; I.D.; II.A.2.b., c.; all of IV. except those sections noted below; and add new Parts B (Diesel Opacity Inspection Program) and C (Standards for Visible Pollutants from Diesel Engine Powered Vehicles—Operating on Roads, Streets and Highways), except those sections noted below. Regulation No. 12 revisions adopted on September 19, 1991, and effective on October 30, 1991, as follows: Part A: I.A.; I.B.3-18.; I.C.2.; II.A.1.; II.A.2.d., f., g., III.A.; IV.A.2.; IV.C.1.c., g.; IV.C.2.c., h.; IV.C.3.f., i.; IV.C.4.k.; IV.C.5.a.iv.; IV.C.5.b.; V.; VI.; VII.; VIII.; Part B: I.B.2., 7., 19., 30.-37., 40., 50., 51.; I.C.2.; I.D.; I.E.3.; II.C.1.b.iv.; II.E.2.c., e.; II.E.8.; III.A.; III.B.4.; III.C.4.b.viii.-ix.; III.D.3.b.vi., xi.; III.D.3.c.viii., xiii.; V.; VI.; and Part C: A.-F.

(57) Revision to the State Implementation Plan for Carbon Monoxide: Greeley Element.

(i) *Incorporation by reference.* (A) Letter and submittal dated November 25, 1987, from the Governor of Colorado to the EPA Region VIII Administrator, to revise the SIP to include the Greeley

Element. The revision was adopted by the State on September 17, 1987.

(58) On November 17, 1988, the Governor submitted an amendment to Colorado Regulation No. 1, Section II.A.9., to exempt the destruction of Pershing missiles under the Intermediate-Range Nuclear Forces (INF) Treaty from meeting the opacity limits.

(i) *Incorporation by reference.* (A) Regulation No. 1, Section II.A.9., adopted September 15, 1988, effective October 30, 1988.

(59) Revisions to the State's new source review and prevention of significant deterioration permitting rules in the Common Provisions Regulation and Regulation No. 3, which were submitted by the Governor on April 9, 1992.

(i) *Incorporation by reference.* (A) Regulation No. 3: Sections I.A., I.B.2.c. through e., I.B.3.e. and f., II.B.1., II.B.2., II.C., III.A.1., III.B., III.D., IV.B.2., IV.C.4., IV.C.7., IV.C.9, IV.D.1., IV.D.2.a.(ii) and (iv), IV.D.2.b.(i), IV.D.3.a.(iii) and (vi), IV.D.3.b.(iv), IV.H., IV.I., V.A., V.C.1., V.C.3., V.D.1., V.D.2., V.D.4., V.D.5., V.D.11., V.E.1., V.E.5., V.F.10., V.F.11., V.F.13., V.G.7., V.G.8., V.H.3., V.H.7. and 8., V.I.3., VI.A.1., VI.C.2., IX.D., XII.D., XIII.B.4., XIII.B.6., and XV.D.2.; and the Common Provisions Regulation: Sections I.D.2., I.F., II.C.1., II.C.4., IV., and Section I.G.- definitions of "best available control technology," "commenced construction," "complete," "federally enforceable," "modification," "potential to emit," "reasonable further progress," and "stationary source;" revised October 17, 1991, effective November 30, 1991.

(ii) Common Provisions Regulation, 5 CCR 1001-2, Section III., Smoking Gasoline Powered Motor Vehicle Control Region, is deleted without replacement, effective September 30, 2002, as described in (c)(118) below.

(60) Revisions to the Long-Term Strategy of the Colorado State Implementation Plan for Class I Visibility Protection were submitted by the Governor in a letter dated November 18, 1992. The submittal completely replaces the previous version of the Long-Term Strategy and includes amendments to Air Quality Control Commission Regulation No. 3, "Air Contaminant Emissions Notices."

(i) *Incorporation by reference.* (A) Revisions to the Visibility Chapter of Regulation No. 3 as follows: XV.F.1.c. as adopted on August 20, 1992, and effective on September 30, 1992.

(61) The Governor of Colorado submitted a portion of the requirements for the moderate nonattainment area PM₁₀ State Implementation Plan (SIP) for Denver, Colorado with a letter dated June 7, 1993, and subsequent submittals dated September 3, 1993, and October 20, 1993, fulfilling most of the commitments made in the June 7, 1993, letter. The submittals were made to satisfy those moderate PM₁₀ nonattainment area SIP requirements due for the Denver PM₁₀ nonattainment area on November 15, 1991. EPA is approving, for the limited purpose of strengthening the SIP, the control measures contained in the SIP revisions identified above. (EPA is not approving, at this time, the control measures limiting the emissions from Purina Mills and Electron Corporation.)

(i) *Incorporation by reference.* (A) Revisions to Regulation No. 4, "Regulation on the Sale of New Woodstoves and the Use of Certain Woodburning Appliances During High Pollution Days," as adopted by the Air Quality Control Commission on June 24, 1993, effective August 30, 1993, as follows: insert new Section VIII and recodification of References Section. This revision pertains to local jurisdiction implementation and enforcement of ordinances and resolutions restricting wood burning on high pollution days.

(B) Regulation No. 16, "Concerning Material Specifications for, Use of, and Clean-up of Street Sanding Material," as adopted by the Air Quality Control Commission on June 24, 1993, effective August 30, 1993, as follows: recodification of Regulation and addition of Sections II and III, which regulate emissions from street sanding and sweeping in the Denver PM₁₀ nonattainment area.

(C) Revisions to Regulation No. 1, "Emission Control Regulations for Particulates, Smokes, Carbon Monoxide, and Sulfur Oxides for the State of Colorado," as adopted by the Air Quality Control Commission on August 19, 1993, effective October 30, 1993, as follows: insert new Sections VII and

VIII and recodification of the two following Sections, “Emission Regulations Concerning Areas Which are Nonattainment for Carbon Monoxide—Refinery Fluid Bed Catalytic Cracking Units”, and “Statements of Basis and Purpose” Sections. The revisions pertain to restrictions on the use of oil as a back-up fuel for certain sources and set new emission limits at the following Public Service Company Power Plants: Cherokee, Arapahoe, and Valmont.

(D) Coors Glass Plant allowable emission limitations on three furnaces.

1. Permit 92JE129-1, effective date January 19, 1993, regulating emissions at the KTG glass melting furnace #1.

2. Permit 92JE129-2, effective date January 19, 1993, regulating emissions at the KTG glass melting furnace #2.

3. Permit 92JE129-3, effective date January 19, 1993, regulating emissions at the KTG glass melting furnace #3.

(E) Conoco Refinery allowable emission limitations from the refinery.

1. Permit 90AD524, effective date March 20, 1991, regulating a Tulsa natural gas fired 20MMbtu/hour heater equipped with low-Nox burners.

2. Permit 90AD053, effective date March 20, 1991, regulating process heaters H-10, H-11 and H-27 and process boilers B4, B6, and B8 all burning fuel gas only.

3. Permit 91AD180-3, effective December 28, 1992, regulating the three stage Claus sulfur recovery unit with tail gas recovery unit.

(ii) *Additional material.* (A) Regional Air Quality Council, “Guidelines for Reducing Air Pollution from Street Sanding” sets voluntary guidelines for public works departments to follow to reduce the amount of street sand applied, and includes recommendations for increasing the effectiveness of street cleaning operations.

(B) Adolph Coors Company Brewery permit emission limitations on five boilers. Permits: C-12386-1&2, C-12386-3, C-10660, C-11199, and C-11305.

(62) On February 24, 1993, and December 9, 1993, the Governor of Colorado submitted revisions to the Colorado State implementation plan (SIP) to satisfy those moderate PM-10 nonattainment area SIP requirements for Pagosa Springs, Colorado due to be

submitted by November 15, 1991. Included in the December 9, 1993 submittal were PM-10 contingency measures for Pagosa Springs to satisfy the requirements of section 172(c)(9) of the Act due to be submitted by November 15, 1993.

(i) *Incorporation by reference.* (A) Colorado Air Quality Control Commission Nonattainment Areas regulation, section I. “Pagosa Springs Nonattainment Area,” adopted on November 19, 1992, effective on December 30, 1992, with revisions adopted on November 12, 1993, effective on December 30, 1993.

(63) On November 18, 1992, the Governor of Colorado submitted a plan for the establishment and implementation of a Small Business Assistance Program to be incorporated into the Colorado State Implementation Plan as required by section 507 of the Clean Air Act.

(i) *Incorporation by reference.* (A) Colorado Revised Statutes, Sections 25-7-109.2 and 25-7-114.7, to establish and fund a small business stationary source technical and environmental compliance assistance program, effective July 1, 1992.

(ii) *Additional materials.* (A) November 18, 1992 letter from the Governor of Colorado submitting a Small Business Assistance Program plan to EPA.

(B) The State of Colorado plan for the establishment and implementation of a Small Business Assistance Program, adopted by the Colorado Air Quality Control Commission on October 15, 1992, effective October 15, 1992.

(64) On December 9, 1993, the Governor of Colorado submitted PM₁₀ contingency measures for the moderate nonattainment PM₁₀ areas of Canon City and Lamar, Colorado. The submittal was made to satisfy the moderate PM₁₀ nonattainment area requirements for contingency measures due for Canon City and Lamar on November 15, 1993.

(i) *Incorporation by reference.* (A) Colorado Air Quality Control Commission Nonattainment Area Regulation, Section IV. “Lamar Nonattainment Area,” and Section V. “Canon City Nonattainment Area—PM-10,” adopted on November 12, 1993, and effective December 30, 1993.

(65) On January 15, 1992, March 17, 1993, and December 9, 1993, the Governor of Colorado submitted revisions to the Colorado State implementation plan (SIP) to satisfy those moderate PM-10 nonattainment area SIP requirements for Aspen, Colorado due to be submitted by November 15, 1991. Included in the December 9, 1993 submittal were PM-10 contingency measures for Aspen to satisfy the requirements of section 172(c)(9) of the Act due to be submitted by November 15, 1993.

(i) *Incorporation by reference.* (A) Colorado Air Quality Control Commission Nonattainment Areas regulation, all of Section III. "Aspen/Pitkin County PM-10 Nonattainment Area" except Section III.C.6., adopted on January 21, 1993 effective on March 2, 1993, with revisions adopted on November 12, 1993, effective on December 30, 1993.

(66) On January 14, 1993, the Governor of Colorado submitted revisions to the new source review and prevention of significant deterioration requirements in the Common Provisions Regulation and Regulation No. 3, as well as a revision to Regulation No. 7 pertaining to volatile organic compounds of negligible photochemical reactivity.

(i) *Incorporation by reference.* (A) Air Quality Control Commission Common Provisions Regulation, Section I.C. and Section I.G., definitions of "adverse environmental effect," "air pollutant," "best available control technology," "federal act," "federally enforceable," "hazardous air pollutant," paragraph h. in "net emissions increase," "ozone depleting compound," and "significant;" revised 11/19/92, effective 12/30/92.

(B) Air Quality Control Commission Regulation No. 3 Air Contaminant Emission Notices, Sections I.B.1., I.B.2.c-e., I.B.3.e-f., IV.B.3-5, IV.D.2.a.(iii), IV.D.2.c., IV.D.3., IV.D.4., IV.E., IV.F., IV.H., V.E.9., VI.B.1., VI.B.4., VI.B.5., VI.C., VII.C., VIII.A., VIII.C.1., XI.A., and XIII.A. and B.; revised 11/19/92, effective 12/30/92.

(C) Air Quality Control Commission Regulation No. 7 Emissions of Volatile Organic Compounds, Section II.B.; revised 11/19/92, effective 12/30/92.

(67) On November 27, 1992, the Governor of Colorado, submitted a revision to the Colorado SIP. This revision replaces previous versions of Regulation

No. 13 with the amended Regulation No. 13 (oxygenated gasoline program) adopted September 17, 1992. Regulation No. 13 requires the oxygenated gasoline programs to be implemented in the Fort Collins-Loveland, Colorado Springs, and Boulder-Denver Metropolitan Statistical Areas (MSA) as required by Section 211(m) of the Clean Air Act Amendments of 1990.

(i) *Incorporation by reference.* (A) Revision to Regulation No. 13, "Oxygenated Gasoline Program," as adopted by the Colorado Air Quality Control Commission on September 17, 1992, effective October 10, 1992, as follows: entire Regulation revision. This regulation supersedes and replaces all previous revisions to Regulation No. 13, (40 CFR, 52.320(46)(2)).

(68) The Governor of Colorado submitted a portion of the requirements for the moderate nonattainment area PM₁₀ State Implementation Plan (SIP) for Telluride, Colorado with a letter dated March 17, 1993. The submittal was made to satisfy those moderate PM₁₀ nonattainment area SIP requirements due for Telluride on November 15, 1991; however, the submittal did not contain quantitative milestones to provide for maintenance of the PM₁₀ National Ambient Air Quality Standards through December 1997. The Governor of Colorado submitted moderate PM₁₀ nonattainment area contingency measures for Telluride with a letter dated December 9, 1993. This submittal was intended to satisfy the requirements of section 172(c)(9) of the Clean Air Act due on November 15, 1993.

(i) *Incorporation by reference.* (A) Colorado Air Quality Control Commission Nonattainment Areas regulation, Section II., Telluride Nonattainment Area, adopted January 21, 1993 and effective on March 2, 1993, with revisions adopted November 12, 1993 and effective December 30, 1993.

(ii) *Additional material.* (A) The commitment and schedule for the adoption and implementation of PM₁₀ control measures that are necessary to demonstrate maintenance of the 24-hour PM₁₀ standard in Telluride, which were submitted in an April 21, 1994 letter from Thomas Getz, Air Pollution Control Division, to Douglas M. Skie, EPA.

(69) On January 14, 1994 and on June 24, 1994, Roy Romer, the Governor of Colorado, submitted SIP revisions to the Implementation Plan for the Control of Air Pollution. This revision establishes and requires the implementation of an enhanced motor vehicle inspection and maintenance program in the Denver and Boulder urbanized areas as required by section 187(a)(6) of the Clean Air Act Amendments of 1990. This material is being incorporated by reference for the enforcement of Colorado's enhanced I/M program only.

(i) *Incorporation by reference.* (A) Colo. Rev. Stat. Sections 42-4-306.5-42-4-316 adopted June 8, 1993 as House Bill 93-1340, effective July 1, 1993.

(B) Regulation No. 11 (Inspection/Maintenance Program) as adopted by the Colorado Air Quality Control Commission (AQCC) on March 17, 1994.

(ii) *Additional materials.* (A) SIP narrative and technical appendices 1-20 as corrected and approved by the AQCC on June 21, 1994. The narrative is entitled "State of Colorado Motor Vehicle Inspection and Maintenance State Implementation Plan", dated December 16, 1993 with technical corrections.

(70) Revisions to the Colorado State Implementation Plan were submitted by the Governor on September 27, 1989, and August 30, 1990. The revisions consist of amendments to the Ozone provisions in Regulation No. 7, "Regulation To Control Emissions of Volatile Organic Compounds."

(i) *Incorporation by reference.* (A) Revisions to Regulation No. 7, Sections 7.I (Applicability), 7.II (General Provisions), 7.III (General Requirements for Storage and Transfer of Volatile Organic Compounds), 7.IV (Storage of Highly Volatile Organic Compounds), 7.V (Disposal of Volatile Organic Compounds), 7.VI (Storage and Transfer of Petroleum Liquid), 7.VIII (Petroleum Processing and Refining), 7.IX (Surface Coating Operations), 7.X (Use of Solvents for Degreasing and Cleaning), 7.XI (Use of Cutback Asphalt), 7.XII (Control of VOC Emissions from Dry Cleaning Facilities Using Perchloroethylene as a Solvent), 7.XIII (Graphic Arts), 7.XIV (Pharmaceutical Synthesis), 7.XV (Control of Volatile Organic Compound Leaks from Vapor Collection Systems Located at Gasoline

Terminals, Bulk Plants, and Gasoline Dispensing Facilities), and Appendices A (Criteria for Control of Vapors from Gasoline Transfer to Storage Tanks), B (Criteria for Control of Vapors from Gasoline Transfer at Bulk Plants-Vapor Balance System), and D (Test Procedures for Annual Pressure/Vacuum Testing of Gasoline Transport Trucks). The following new emission sources and appendices were added to Regulation No. 7: 7.IX.A.7 (Fugitive Emission Control), 7.IX.M (Flat Wood Paneling Coating), 7.IX.N (Manufacture of Pneumatic Rubber Tires), and Appendix E (Emission Limit Conversion Procedure). These revisions became effective on October 30, 1989, and August 30, 1990.

(ii) *Additional material.* (A) February 5, 1992, letter from John Leary, Acting Director, Colorado Air Pollution Control Division, to Douglas Skie, EPA. This letter contained the State's commitment to conduct capture efficiency testing using the most recent EPA capture efficiency protocols, and the commitment to adopt federal capture efficiency test methods after they are officially promulgated by EPA.

(71) The Governor of Colorado submitted carbon monoxide contingency measures for Colorado Springs and Fort Collins with a letter dated February 18, 1994. This submittal was intended to satisfy the requirements of section 172(c)(9) of the Clean Air Act for contingency measures which were due on November 15, 1993.

(i) *Incorporation by reference.* (A) Colorado Air Quality Control Commission Nonattainment Areas regulation, 5 CCR 1001-20, Section VI, City of Fort Collins Nonattainment Area, and Section VII, Colorado Springs Nonattainment Area, adopted on November 12, 1993, effective on December 30, 1993.

(72) On November 12, 1993, August 25, 1994, September 29, 1994, November 17, 1994, and January 29, 1996, the Governor of Colorado submitted revisions to the State's construction permitting requirements in Regulation No. 3 and the Common Provisions Regulation. These revisions included nonattainment new source review permitting requirements for new and modified major sources of PM-10 precursors locating in the Denver moderate PM-10 nonattainment

area, changing from the dual source definition to the plantwide definition of source in nonattainment new source review permitting, other changes to Regulation No. 3 to make the construction permitting program more compatible with the State's title V operating permit program, and correction of deficiencies. In addition, the Governor submitted revisions to the Common Provisions Regulation on April 9, 1992 and January 14, 1993.

(i) *Incorporation by reference.* (A) Common Provisions Regulation, 5 CCR 1001-2, Section I.G., definitions of "baseline area" and "reconstruction;" adopted 10/17/91, effective 11/30/91.

(B) Common Provisions Regulation, 5 CCR 1001-2, Section I.G., definitions of "net emissions increase" and "stationary source;" adopted 8/20/92, effective 9/30/92.

(C) Common Provisions Regulation, 5 CCR 1001-2, Section I.A. and Section I.G., definitions of "emission control regulation" and "volatile organic compound;" adopted 11/19/92, effective 12/30/92.

(D) Regulation No. 3, Air Contaminant Emissions Notices, 5 CCR 1001-5, revisions adopted 8/18/94, effective 9/30/94, as follows: Part A (with the exception of the last sentence in the definition of "Federally enforceable" in Section I.B.22 and with the exception of Section IV.C.) and Part B (with the exception of Sections V.B. and VII.A.5.). This version of Regulation No. 3, as incorporated by reference here, supersedes and replaces all versions of Regulation No. 3 approved by EPA in previous actions.

(E) Regulation No. 3, Air Contaminant Emissions Notices, 5 CCR 1001-5, revisions adopted on 3/16/95, effective 5/30/95, as follows: Part A: Sections I.B.12., I.B.31., I.B.32., I.B.35.B., I.B.36., I.B.37., I.B.41., I.B.50., I.B.57., I.B.66., II.D.5.c., II.D.5.d., V.B., V.C.6., V.C.10., V.E.1.c., V.E.1.d., V.H.4. through V.H.8., V.I.1., VI.C.1.f., and VII.A.; Part B: Sections III.D.2., III.D.3., IV.B.4., IV.C.1., IV.D.1.a., IV.D.2.c.(i)(E), IV.D.4.a., and IV.J.

(F) Previously approved in paragraph (c)(72)(i)(D) under Regulation No. 3, Air Contaminant Emissions Notices, 5 CCR 1001-5. These sections are now deleted without replacement: II.B.7., II.B.8.,

II.B.9., II.B.10., and II.D.7, effective October 30, 2006.

(G) 1001-5, Colorado Regulation No. 3, Air Contaminant Emissions Notices, Part A, Concerning General Provisions Applicable to Reporting and Permitting, Sections II.D.1.m, II.D.1.ee, II.D.1.uu, II.D.1.ddd, and II.D.1.eeee, previously approved in paragraph (c)(72)(i)(D) of this section, were repealed by the State of Colorado effective January 30, 2009 and are removed without replacement.

(ii) *Additional material.* (A) July 3, 1995 letter from Martha E. Rudolph, First Assistant Attorney General, Colorado Office of the Attorney General, to Jonah Staller, EPA.

(73) On January 14, 1994 and on June 24, 1994, Roy Romer, the Governor of Colorado, submitted SIP revisions to the State Implementation Plan for the Control of Air Pollution. This revisions requires the implementation of a basic motor vehicle inspection and maintenance program in the urbanized areas of El Paso (Colorado Springs), Larimer (Fort Collins), and Weld (Greeley) Counties meeting the requirements of the Clean Air Act Amendments of 1990. This material is being incorporated by reference for the enforcement of Colorado's basic I/M program only.

(i) *Incorporation by reference.* (A) Colo. Rev. Stat. §§42-4-306.5—42-4-316 adopted June 8, 1993 as House Bill 93-1340, effective July 1, 1993.

(B) Regulation No. 11 (Inspection/Maintenance Program) as adopted by the Colorado Air Quality Control Commission (AQCC) on March 17, 1994, effective April 30, 1994.

(74) The Governor of Colorado submitted PM₁₀ contingency measures for Denver, Colorado in a letter dated November 17, 1995.

(i) *Incorporation by reference.* (A) Section IV. of Regulation No. 16, Street Sanding Emissions, adopted March 16, 1995, effective May 30, 1995.

(75) The Governor of Colorado submitted revisions to the PM₁₀ moderate nonattainment area State Implementation Plan (SIP) for Telluride, Colorado with a letter dated April 22, 1996. The submittal was made to satisfy the State's commitment to adopt additional control measures necessary to demonstrate continued maintenance of

the PM₁₀ National Ambient Air Quality Standards through 1997. Due to the satisfaction of this commitment, the SIP now adequately meets the quantitative milestone requirement.

(i) *Incorporation by reference.* (A) Colorado Air Quality Control Commission State Implementation Plan-Specific Regulation for Nonattainment Areas, 5 CCR 1001-20, Section II.C., Telluride Nonattainment Area Street Sanding Requirements, adopted August 17, 1995 and effective October 30, 1995.

(76) The Governor of Colorado submitted the moderate nonattainment area PM₁₀ State Implementation Plan (SIP) for Steamboat Springs, Colorado with a letter dated September 16, 1997. The submittal was made to satisfy those moderate PM₁₀ nonattainment area SIP requirements due for Steamboat Springs on July 20, 1995, including among other things, control measures, technical analyses, quantitative milestones, and contingency measures. The September 16, 1997 submittal also included the Steamboat Springs emergency episode plan.

(i) *Incorporation by reference.* (A) Colorado Air Quality Control Commission Nonattainment Areas, 5 CCR 1001-20, Section VIII., Steamboat Springs PM₁₀ Nonattainment Area, adopted October 17, 1996 and effective on December 30, 1996.

(ii) *Additional material.* (A) An October 29, 1997 letter from Margie M. Perkins, APCD, to Richard R. Long, EPA, clarifying that the regulation entitled "Ambient Air Quality Standards for the State of Colorado" was included in the September 16, 1997 Steamboat Springs SIP submittal for informational purposes only.

(77) On September 29, 1995, Roy Romer, the Governor of Colorado, submitted a SIP revision to the State Implementation Plan for the Control of Air Pollution. This revision provides a replacement Regulation No. 11, Inspection/Maintenance Program which limits dealer self-testing. This material is being incorporated by reference for the enforcement of Colorado's I/M program.

(i) *Incorporation by reference.* (A) Department of Health, Air Quality Control Commission, Regulation No. 11 (Motor Vehicle Emissions Inspection

Program) as adopted by the Colorado Air Quality Control Commission (AQCC) on September 22, 1994, effective November 30, 1994.

(78) Revisions to the Colorado State Implementation Plan were submitted by the Governor of the State of Colorado on August 25, 1995, and October 16, 1995. The revisions consist of amendments to Regulation No. 3, "Air Contaminant Emissions Notices" and to Regulation No. 7, "Regulation To Control Emissions of Volatile Organic Compounds." These revisions involve source-specific State Implementation Plan requirements for emission trading for Pioneer Metal Finishing Inc. and crossline averaging for Lexmark International Inc.

(i) *Incorporation by reference.* (A) Revisions to Regulation No. 3, 5 CCR 1001-5, sections V.A. (Purpose), V.C.1, V.C.3, V.C.5 (Definitions), V.D.6, V.D.7, V.D.9 (Procedure for Certification of Emissions Reductions and Approval of Transactions), V.E. (Criteria for Certification of Emissions Reductions), V.F., V.F.5, V.F.7, V.F.8.1, V.F.14, and V.F.15 (Criteria for Approval of all Transactions) and Revisions to Regulation No. 7, 5 CCR 1001-9, section II.D.1.a (Alternative Control Plans and Test Methods) became effective on December 30, 1994. The new section IX.L.2.c through IX.L.2.c.xv (Manufactured Metal Parts and Metal Products) to Regulation No. 7, 5 CCR 1001-9, applicable to Pioneer Metal Finishing Inc., became effective on April 30, 1995. The new section IX.A.12 through IX.A.12.a.(xi) (General Provisions) to Regulation No. 7, 5 CCR 1001-9, applicable to Lexmark International Inc., became effective July 30, 1995.

(79) On August 23, 1996, the Governor of Colorado submitted a revision to the long-term strategy portion of Colorado's State Implementation Plan (SIP) for Class I Visibility Protection. The revision was made to incorporate into the SIP, among other things, emissions reduction requirements for the Hayden Station (a coal-fired steam generating plant located near the town of Hayden, Colorado) that are based on a consent decree addressing numerous air pollution violations at the plant. This SIP revision replaces the previous existing impairment portion of the

long-term strategy as it relates to the Mt. Zirkel Wilderness Area.

(i) *Incorporation by reference.* (A) Long-Term Strategy Review and Revision of Colorado's State Implementation Plan for Class I Visibility Protection Part I: Hayden Station Requirements, as follows: Section VI., effective on August 15, 1996.

(80) On July 11, 1994, July 13, 1994, September 29, 1995, and December 22, 1995, the Governor of Colorado submitted revisions to the Colorado State Implementation Plan (SIP) to satisfy those CO nonattainment area SIP requirements for Denver and Longmont, Colorado due to be submitted by November 15, 1992, and further revisions to the SIP to shorten the effective period of the oxygenated fuels program. EPA is not taking action on the SIP provision submitted on July 11, 1994 that calls for a prohibition of the re-registration of abandoned and impounded vehicles.

(i) *Incorporation by reference.* (A) Regulation No. 11, Motor Vehicle Emissions Inspection Program, 5 CCR 1001-13, as adopted on September 22, 1994, effective November 30, 1994. Regulation No. 13, Oxygenated Fuels Program, 5 CCR 1001-16, as adopted on October 19, 1995, effective December 20, 1995.

(81) On August 1, 1996, the Governor of Colorado submitted revisions to the prevention of significant deterioration regulations in Regulation No. 3 to incorporate changes in the Federal PSD permitting regulations for PM-10 increments and to make other minor administrative revisions.

(i) *Incorporation by reference.* (A) Regulation No. 3, Air Contaminant Emissions Notices, 5 CCR 1001-5, revisions adopted 8/17/95, effective 10/30/95, as follows: Part A, Section I.B., as follows: the definition of "baseline area" in subsection 10, the definition of "minor source baseline date" in subsection 35, and the definition of "net emissions increase" in subsection 37; Part A: Sections IV.B., V.C.1., and V.D.11.c.; Part B: Sections IV.D.3.b.(v), VII.A.1., and X.D.

(82) The Governor of Colorado submitted the Denver moderate nonattainment area PM₁₀ State Implementation Plan (SIP) with a letter dated March 30, 1995. The Governor submitted revisions

to Regulation No. 13, one of the control measures relied on in the PM₁₀ SIP, on December 22, 1995. These submittals as well as support documentation submittals made on June 8, 1993, June 10, 1993, June 25, 1993, July 19, 1993, August 5, 1993, September 3, 1993, September 21, 1993, October 20, 1993, December 12, 1993, January 19, 1994, December 23, 1994, March 3, 1995, and November 8, 1995 satisfy those moderate PM₁₀ nonattainment area SIP requirements due for the Denver PM₁₀ nonattainment area on November 15, 1991. EPA is approving the SIP. This approval replaces the previous limited approval at 40 CFR 52.320(c)(61).

(i) *Incorporation by reference.* (A) Regulation No. 4, "Regulation on the Sale of New Woodstoves and the Use of Certain Woodburning Appliances During High Pollution Days," 5 CCR 1001-6, as adopted by the Air Quality Control Commission on June 24, 1993, effective August 30, 1993.

(B) Local woodburning ordinances and resolutions.

(1) Arvada, Colorado. Ordinance number 2451, effective November 2, 1987, regarding woodburning restrictions.

(2) Aurora, Colorado. Ordinance numbers 87-118 and 92-14, effective May 22, 1987 and May 22, 1992, respectively, regarding woodburning restrictions.

(3) Boulder, Colorado. Ordinance numbers 5007 and 5445, adopted November 25, 1986 and April 21, 1992, respectively, regarding woodburning restrictions.

(4) Broomfield, Colorado. Ordinance number 794, effective November 24, 1988, regarding woodburning restrictions.

(5) Denver, Colorado. Ordinance numbers 293 and 1018, approved May 30, 1990 and December 16, 1993, respectively, regarding woodburning restrictions.

(6) Douglas County, Colorado. Resolution number 991-128, adopted November 14, 1991, regarding woodburning restrictions.

(7) Englewood, Colorado. Ordinance numbers 31 and 39, passed on July 20, 1992, regarding woodburning restrictions.

(8) Federal Heights, Colorado. Ordinance number 565, adopted January 5, 1988, regarding woodburning restrictions.

(9) Glendale, Colorado. Ordinance numbers 2 and 14, adopted January 5, 1988 and effective on October 20, 1992, respectively, regarding woodburning restrictions.

(10) Greenwood Village, Colorado. Ordinance numbers 17 and 9, effective July 9, 1988 and March 25, 1992, respectively, regarding woodburning restrictions.

(11) Jefferson County, Colorado. Resolution numbers CC89-873 and CC90-617, dated December 29, 1989 and August 7, 1990, respectively, regarding woodburning restrictions.

(12) Lafayette, Colorado. Ordinance number 24; series 1988, effective November 15, 1988, regarding woodburning prohibitions.

(13) Lakewood, Colorado. Ordinance numbers 0-86-113 and 0-92-61, effective December 1, 1986 and November 28, 1992, respectively, regarding woodburning restrictions.

(14) Littleton, Colorado. Ordinance numbers 51 and 26, passed on December 6, 1988 and August 18, 1992, respectively, regarding woodburning restrictions.

(15) Longmont, Colorado. Ordinance number 0-89-1, adopted December 27, 1988, regarding woodburning restrictions.

(16) Mountain View, Colorado. Ordinance number 90-5, approved on January 7, 1991, regarding woodburning restrictions.

(17) Sheridan, Colorado. Ordinance numbers 22 and 1, approved October 25, 1988 and February 9, 1993, respectively, regarding woodburning restrictions.

(18) Thornton, Colorado. Ordinance numbers 2120 and 2194, adopted October 28, 1991 and September 28, 1992, respectively, regarding woodburning restrictions.

(19) Westminster, Colorado. Ordinance numbers 1742 and 2092, enacted on November 9, 1987 and December 28, 1992, respectively, regarding woodburning restrictions.

(C) Regulation No. 16, "Concerning Material Specifications for, Use of, and Clean-up of Street Sanding Material," 5 CCR 1001-18, as adopted by the Air Quality Control Commission on September 22, 1994, effective November 30, 1994.

(D) Regulation No. 1, "Emission Control Regulations for Particulates,

Smokes, Carbon Monoxide, and Sulfur Oxides for the State of Colorado," 5 CCR 1001-3, Sections I-IV and VI-IX, and Appendices A and B, as adopted by the Air Quality Control Commission on August 19, 1993, effective October 20, 1993; with revisions to Sections VII and VIII, adopted by the Air Quality Control Commission on September 22, 1994, effective November 30, 1994.

(E) Public Service Company Cherokee facility SO₂ emission limitations for the power facility.

(1) Permit 86AD352(1), effective date November 13, 1986, regulates SO₂ emissions at Unit #1.

(2) Permit 86AD352-2, effective date April 30, 1992, regulates SO₂ emissions at Unit #4.

(F) Purina Mills Inc. total PM₁₀ emissions limitations at the animal feed manufacturing facility.

(1) Permit 93AD1008-1, effective date October 19, 1993, regulating emissions at the finished product loadout facility.

(2) Permit 93AD1008-2, effective date October 19, 1993, regulating emissions at the grain receiving facility.

(G) Electron Corporation total PM₁₀ emission limitations at the gray iron foundry.

(1) Permit 93AR1363-1, effective date January 12, 1994, regulating emissions at the Table shot blaster and associated baghouse.

(2) Permit 93AR1363-2, effective date January 12, 1994, regulating emissions at the five grinding booths-stand and associated baghouse.

(3) Permit 93AR1363-3, effective date January 12, 1994, regulating emissions at the five grinding booths-hand and associated baghouse.

(4) Permit 93AR1363-4, effective date January 12, 1994, regulating emissions at the Muller-25 sand system and associated baghouse.

(5) Permit 93AR1363-5, effective date January 12, 1994, regulating emissions at the Coleman core oven-sand.

(6) Permit 93AR1363-6, effective date January 12, 1994, regulating emissions at the Spinner wheelabrator and associated baghouse.

(7) Permit 93AR1363-7, effective date January 12, 1994, regulating emissions at the Sand sile-core room and associated baghouse.

(8) Permit 93AR1363-8, effective date January 12, 1994, regulating emissions from pouring of molten iron (casting) and castings cooling.

(9) Permit 93AR1363-9 effective date January 12, 1994, regulating emissions at three tumble blast machines and associated baghouse.

(10) Permit 93AR1363-10, effective date January 12, 1994, regulating emissions at two mullers-80A and associated baghouse.

(11) Permit 93AR1363-11, effective date January 12, 1994, regulating emissions at the Casting shakeout hood and associated baghouse.

(12) Permit 93AR1363-12, effective date January 12, 1994, regulating emissions at the Casting-disamatic mold and associated baghouse.

(13) Permit 93AR1363-13, effective date January 12, 1994, regulating emissions at the Sand silo-disamatic and associated baghouse.

(14) Permit 93AR1363-14, effective date January 12, 1994, regulating emissions at the Sand silo-air set room and associated baghouse.

(15) Permit 93AR1363-15, effective date January 12, 1994, regulating emissions at two electric induction furnaces and associated baghouse.

(16) Permit 93AR1363-16, effective date January 12, 1994, regulating emissions at two Inducto-Therm electric induction furnaces model #2000/4, serial nos. 40102 and 40103, and associated baghouse.

(17) Permit 93AR1363-17, effective date January 12, 1994, regulating emissions from chemicals used in core making process.

(18) Permit 93AR1363-18, effective date January 12, 1994, regulating emissions at the Loop shakeout and associated baghouse.

(19) Permit 93AR1363-19, effective date January 12, 1994, regulating emissions at the Floor shakeout and associated baghouse.

(20) Permit 93AR1363-20, effective date January 12, 1994, regulating emissions at the Reclaim sand and associated baghouse.

(21) Permit 93AR1363-21 effective date January 12, 1994, regulating emissions at the Sand heater/cooler and associated baghouse.

(22) Permit 93AR1363-22, effective date January 12, 1994, regulating emissions at the Paint spray booth.

(H) TRIGEN-Colorado Energy Corporation permit emissions limitations at two boilers.

(1) Permit 10JE660, effective date February 25, 1997, regulating emissions at the #4 boiler: tangential fired cogeneration steam boiler.

(2) Permit 11JE305-1, effective date February 19, 1997, regulating emissions at the #5 boiler: tangential fired cogeneration steam boiler.

(I) Rocky Mountain Bottle Company emission limitations on three furnaces.

(1) Permit 92JE129-1, effective date June 29, 1995, regulating emissions at the KTG glass melting furnaces #1, #2 and #3.

(J) Conoco Refinery allowable emission limitations from the refinery.

(1) Permit 90AD524, effective date March 20, 1991, regulating a Tulsa natural gas fired 20MMbtu/hour heater equipped with low-NO_x burners.

(2) Permit 90AD053, effective date March 20, 1991, regulating process heaters H-10, H-11 and H-27 and process boilers B4, B6, and B8 all burning fuel gas only.

(3) Permit 91AD180-3, effective December 28, 1992, regulating the three stage Claus sulfur recovery unit with tail gas recovery unit.

(ii) *Additional material.* (A) Regional Air Quality Council, "Guidelines for Reducing Air Pollution from Street Sanding" sets voluntary guidelines for public works departments to follow to reduce the amount of street sand applied, and includes recommendations for increasing the effectiveness of street cleaning operations.

(83) A revision to the Colorado State Implementation Plan was submitted by the Governor of the State of Colorado on April 22, 1996. The revision consists of an amendment to Colorado Air Quality Control Commission Regulation No. 7, "Regulation To Control Emissions of Volatile Organic Compounds," to provide an exemption for beer production and associated beer container storage and transfer operations involving volatile organic compounds under 1.5 psia from certain bottom or submerged filling requirements that Regulation No. 7

otherwise imposes. The revision consists of the addition of paragraph C to section III, "General Requirements for Storage and Transfer of Volatile Organic Compounds," of Regulation No. 7.

(i) *Incorporation by reference.* (A) Colorado Air Quality Control Commission Regulation No. 7, 5 CCR 1001-9, section III, paragraph C, adopted by the Colorado Air Quality Control Commission on March 16, 1995, State effective May 30, 1995.

(84) The Governor of Colorado submitted the Denver PM₁₀ mobile source emissions budget State Implementation Plan (SIP) with a letter dated July 18, 1995. The Governor submitted the Denver NO_x mobile source emissions budget State Implementation Plan (SIP) with a letter dated April 22, 1996. The PM₁₀ and NO_x mobile source emissions budgets and other provisions in these SIP submittals are used to assess conformity of transportation plans, transportation improvement programs, and transportation projects.

(i) *Incorporation by reference.* (A) Colorado Air Quality Control Commission, "Ambient Air Quality Standards" regulation 5CCR 1001-14, Section A.1. Budgets for the Denver Nonattainment Area (Modeling Domain) PM₁₀, Sections A.2. and A.3., and Sections B and C, adopted on February 16, 1995, effective April 30, 1995, as amended by the Colorado General Assembly through enactment of Colorado Senate Bill 95-110, which Bill was enacted on May 5, 1995 and signed by the Governor of Colorado on May 31, 1995. (See paragraph (c)(84)(i)(B) of this section).

(B) Colo. Rev. Stat. section 25-7-105(1)(a)(III), enacted by the Colorado General Assembly on May 5, 1995 as part of Colorado Senate Bill 95-110 and signed by the Governor of Colorado on May 31, 1995.

(C) Colorado Air Quality Control Commission "Ambient Air Quality Standards" regulation 5CCR 1001-14, Section A.1. Budgets for the Denver Nonattainment Area (Modeling Domain) Nitrogen Oxides, as adopted June 15, 1995, effective August 30, 1995.

(85) On September 16, 1997, the Governor of Colorado submitted revisions to Regulation No. 10 "Criteria for Analysis of Conformity" that incor-

porate the General Conformity requirements of 40 CFR part 51, Subpart W into State regulation.

(i) *Incorporation by reference.* (A) Regulation No. 10 "Criteria for Analysis of Conformity", 5 CCR 1001-12, as adopted on October 17, 1996, effective December 30, 1996.

(86) On October 1, 1998, the Governor of Colorado submitted revisions to Regulation No. 13 "Oxygenated Fuels Program" that shortened the effective time period of the oxygenated fuels program for Denver/Boulder, Colorado Springs, Fort Collins, and Longmont carbon monoxide nonattainment areas and also reduced the required oxygen content during certain periods.

(i) *Incorporation by reference.* (A) Regulation No. 13 "Oxygenated Fuels Program", 5 CCR 1001-16, as adopted on January 16, 1998, effective March 30, 1998.

(87) On September 16, 1997, the Governor of Colorado submitted revisions to Regulations No. 3 and 7 and the Common Provisions Regulation to update the State's list of negligibly reactive volatile organic compounds (VOCs) and to consolidate the list of negligibly reactive VOCs from Regulations No. 3 and 7 into the Common Provisions Regulation. The Governor also submitted revisions to Parts A and B of Regulation No. 3 on September 16, 1997 to amend the definition of "applicable requirement" and to correct typographical errors. On August 19, 1998, the Governor submitted revisions to the Common Provisions Regulation to update its list of negligibly reactive VOCs. The Governor also submitted revisions to Regulation No. 7 to repeal the requirements for control of VOC emissions from dry cleaning facilities using perchloroethylene as a solvent.

(i) *Incorporation by reference.* (A) Common Provisions Regulation, 5 CCR 1001-2, Section I.G., definition of "negligibly reactive VOCs (NRVOCs)" and subsection h. of the definition of "net emissions increase," adopted 12/21/95, effective 3/1/96.

(B) Regulation No. 3, "Air Contaminant Emission Notices," 5 CCR 1001-5, adopted 12/21/95, effective 3/1/96, as follows: Part A, subsection h. of the definition of "net emissions increase" in

Section I.B.37.; and Part B, Section IV.D.4.

(C) Regulation No. 7, “Emissions of Volatile Organic Compounds,” 5 CCR 1001-9, Section II.B., adopted 12/21/95, effective 3/1/96.

(D) Regulation No. 3, “Air Contaminant Emission Notices,” 5 CCR 1001-5, adopted 6/20/96, effective 8/30/96, as follows: Part A, definition of “applicable requirement” in Section I.B.9., definition of “major source (for the purposes of Part C—operating permits)” in Section I.B.59., and Section V.C.12; and Part B, Section III.D.2.

(E) Common Provisions Regulation, 5 CCR 1001-2, Section I.G., definition of “negligibly reactive VOCs (NRVOCs)” adopted 11/21/96, effective 1/30/97.

(F) Regulation No. 7, “Emissions of Volatile Organic Compounds,” 5 CCR 1001-9, Section XII., adopted 11/21/96, effective 1/30/97.

(88) On April 26, 1996, the Governor of Colorado submitted revisions to Regulation No. 3 to allow a source to voluntarily request a permit to limit potential to emit and to require that such permits be subject to public participation.

(i) *Incorporation by reference.* (A) Regulation No. 3, “Air Contaminant Emissions Notices,” 5 CCR 1001-5, revisions adopted 5/18/95, effective 7/30/95, as follows: part B, sections III.A.4, III.A.7, and IV.C.4.

(89) On May 10, 2000, the Governor of Colorado submitted revisions to Regulation No. 13 “Oxygenated Fuels Program” that eliminated the Oxygenated Fuels Program for El Paso County and the Colorado Springs CO attainment/maintenance area.

(i) *Incorporation by reference.* (A) Regulation No. 13 “Oxygenated Fuels Program”, 5 CCR 1001-16, as adopted on February 17, 2000, effective April 30, 2000, as follows: Sections I.D.19, II.A, II.A.1, II.A.2, II.C.1.a, II.C.1.b., and II.C.1.c.

(90) On May 10, 2000, the State of Colorado submitted maintenance plans for the Telluride and Pagosa Springs PM₁₀ nonattainment areas and requested that these areas be redesignated to attainment for the PM₁₀ National Ambient Air Quality Standards. The redesignation requests and maintenance plans

satisfy all applicable requirements of the Clean Air Act.

(i) *Incorporation by reference.* (A) Colorado Air Quality Control Commission, “State Implementation Plan Specific Regulations for Nonattainment—Attainment/Maintenance Areas (Local Elements),” 5 CCR 1001-20, revisions adopted 3/16/00, effective 5/30/00, as follows: Section I., Pagosa Springs Attainment/Maintenance Area and Section II., Telluride Attainment/Maintenance Area.

(ii) *Additional material.* (A) January 24, 2001 letter from Margie Perkins, Director, Colorado Air Pollution Control Division, to Richard Long, Director, EPA Region VIII Air and Radiation Program, clarifying the commitments of the Verification of Continued Attainment section of the Telluride and Pagosa Springs maintenance plans.

(91) On May 10, 2000, the Governor of Colorado submitted revisions to the Colorado State Implementation Plan consisting of: Revisions to Regulation 12 to remove the “Reduction of Diesel Vehicle Emissions” program from areas outside the Denver PM₁₀ non-attainment area, and Regulation 9 “Trip Reduction,” effective on January 30, 1979, is rescinded.

(i) *Incorporation by reference.* (A) Revisions to Colorado Air Quality Control Commission Regulation No. 12, 5 CCR 1001-15, adopted by the Colorado Air Quality Control Commission on March 16, 2000, State effective May 30, 2000.

(92) On May 11, 2012, Colorado submitted a revision to its State Implementation Plan (SIP) that addresses updates to Colorado’s Regulation Number 10, *Criteria for Analysis of Conformity*, of the Colorado SIP. EPA is approving the May 11, 2012 revisions to Regulation No. 10 that update sections I, II, III, IV, and V so as to meet federal transportation conformity consultation requirements. EPA is also approving the removal of former Part A, *Determining Conformity of General Federal Actions to State or Federal Implementation Plans*, from the SIP.

(i) *Incorporation by reference.*

(A) Colorado’s Regulation Number 10, *Criteria for Analysis of Conformity*, except section VI, *Statements of Basis, Specific Statutory Authority, and Purpose*, as adopted by the Colorado Air

Quality Control Commission on December 15, 2011 and state effective on January 30, 2012.

(93) On June 7, 2001, the Governor of Colorado submitted a revision to the long-term strategy portion of Colorado's State Implementation Plan (SIP) for Class I Visibility Protection. The revision was made to incorporate into the SIP emissions reduction requirements for the Craig Station (a coal-fired steam generating plant located near the town of Craig, Colorado). This SIP revision is expected to remedy Craig Station's contribution to visibility impairment in the Mt. Zirkel Wilderness Area.

(i) *Incorporation by reference.* (A) Revision of Colorado's State Implementation Plan for Class I Visibility Protection: Craig Station Units 1 and 2 Requirements, Section III, effective on April 19, 2001.

(94) On August 8, 1996, the Governor of Colorado submitted revisions to Regulation No. 3, "Air Contaminant Emissions Notices," that exempt gasoline stations located in ozone attainment areas from construction permit requirements, with the exception of those gasoline stations located in the Denver Metro ozone attainment maintenance area. The Governor also submitted revisions to Regulation No. 7, "Emissions of Volatile Organic Compounds," that state the provisions of Regulation No. 7 shall apply only to ozone nonattainment areas and the Denver Metro Attainment Maintenance Area with the exception of Section V, Paragraphs VI.B.1 and 2., and Subsection VII.C., which shall apply statewide.

(i) *Incorporation by reference.* (A) Part B, section III. D.1.f of Regulation No. 3 "Air Contaminant Emissions Notices", 5 CCR 1001-5, as adopted on March 21, 1996, effective May 30, 1996.

(B) Section I.A.1 of Regulation No. 7 "Emissions of Volatile Organic Compounds", 5 CCR 1001-9, as adopted on March 21, 1996, effective May 30, 1996.

(95) On July 30, 2001, the State of Colorado submitted a maintenance plan for the Denver PM₁₀ nonattainment area and requested that the area be redesignated to attainment for the PM₁₀ National Ambient Air Quality Standards. The maintenance plan deletes

from the SIP Regulation No. 12, "Diesel Inspection/Maintenance Program" and permits for six stationary sources incorporated by reference in paragraphs (c)(91)(i)(A) and (c)(82)(i)(E) through (J), of this section respectively. In conjunction with the maintenance plan, Colorado revised previously approved regulations and requirements to control particulate matter (Regulation No. 1 and Regulation No. 16.) Among other changes, the revision to Regulation No. 1 includes the deletion of section VII.B of Regulation No. 1 from the SIP. Among other changes, the revision to Regulation No. 16 includes the deletion of sections III and IV of Regulation No. 16 from the SIP. The redesignation request, maintenance plan, and revisions to Regulations Nos. 1 and 16 satisfy all applicable requirements of the Clean Air Act.

(i) *Incorporation by reference.* (A) Section VII and VIII.A of Regulation No. 1, "Emission Control for Particulates, Smokes, Carbon Monoxide, & Sulfur Oxides," 5 CCR 1001-3, as adopted August 16, 2001 and effective September 30, 2001. (See paragraph (c)(95)(ii)(I) of this section regarding clerical error in section VIII.A of Regulation No. 1.)

(B) Sections I and II, Regulation No. 16, "Street Sanding Emissions," 5 CCR 1001-18, as adopted April 19, 2001, effective June 30, 2001.

(ii) *Additional material.* (A) Letter dated September 5, 2001 from Casey Shpall, Colorado Office of the Attorney General to Cindy Rosenberg, EPA Region 8, clarifying that public notice was given of the proposed changes and transmitting the appropriate documentation.

(B) Fax dated September 6, 2001 from Doug Lempke, Colorado Department of Public Health and Environment, to Cindy Rosenberg, EPA Region 8, submitting Colorado Attorney General's opinion concerning revisions to Regulation No. 16.

(C) Letter dated September 10, 2001 from Kevin Briggs, Colorado Department of Public Health and Environment, to Kevin Golden, EPA Region 8, transmitting model input files for maintenance demonstration.

(D) Letter dated September 13, 2001 from Casey Shpall, Colorado Office of

the Attorney General to Cindy Rosenberg, EPA Region 8, explaining that an error occurred in the publication of Colorado Regulation No. 1.

(E) Letter dated November 27, 2001 from Margie Perkins, Colorado Department of Public Health and Environment, to Richard Long, EPA Region 8, transmitting the justification for the revised street sweeping credits used in the PM₁₀ maintenance plan.

(F) Letter dated April 5, 2002 from Margie Perkins, Colorado Department of Public Health and Environment, to Richard Long, EPA Region 8, transmitting a supplement to the Technical Support Documentation correcting the emission rates used in the PM₁₀ maintenance plan for Conoco and Ultramar Diamond Shamrock.

(G) Complaint and Consent Decree in *United States v. Conoco Inc.*, entered by the United States District Court for the Southern District of Texas on April 29, 2002.

(H) July 31, 2002 memorandum from Cindy Rosenberg, EPA Region 8, to the Denver PM₁₀ Redesignation and Maintenance Plan Docket, regarding the August 16, 2001 version of Regulation No. 1, "Emission Control for Particulates, Smokes, Carbon Monoxide, & Sulfur Oxides."

(I) Letter dated July 31, 2002 from Frank R. Johnson, Assistant Attorney General, Colorado Department of Law, to Jonah Staller, EPA Region 8, explaining a clerical error in the version of Regulation No. 1 referenced in paragraph (c)(95)(i)(A) of this section, assuring the continued enforceability of section VIII.A of Regulation No. 1 regardless of the air quality classification of the Denver area, and indicating that the clerical error will be promptly remedied.

(96) On May 10, 2000, the Governor of Colorado submitted SIP revisions to Colorado's Regulation No. 11 "Motor Vehicle Emissions Inspection Program" that supersede and replace all earlier versions of the Regulation (except Appendices A and B of Regulation No. 11 as approved in paragraph (c)(80)) and make several changes to the motor vehicle inspection and maintenance requirements including the implementation of a remote sensing device (RSD) program for the Denver metropolitan

area. On May 10, 2000, the Governor also submitted SIP revisions to Colorado's Regulation No. 13: "Oxygenated Fuels Program" that supersede and replace all earlier versions of the Regulation and modify the oxygenated fuel requirements for the Denver metropolitan area.

(i) *Incorporation by reference.* (A) Regulation No. 11 "Motor Vehicle Emissions Inspection Program", 5 CCR 1001-13, as adopted on January 10, 2000, effective March 1, 2000, as follows: Part A, Part B, Part C, Part D, Part E, and Part F.

(B) Regulation No. 13 "Oxygenated Fuels Program", 5 CCR 1001-16, as adopted on January 10, 2000, effective March 1, 2000, as follows: Sections I.A., I.B., I.C., I.D., I.E., II.A., II.B., II.C., II.D., II.E., II.F., II.G., and II.H.

(97) On November 9, 2001, the State of Colorado submitted a maintenance plan for the Aspen PM₁₀ nonattainment area and requested that this area be redesignated to attainment for the PM₁₀ National Ambient Air Quality Standards. The redesignation request and maintenance plan satisfy all applicable requirements of the Clean Air Act.

(i) *Incorporation by reference.* (A) Colorado Air Pollution Control Division, "State Implementation Plan—Specific Regulations for Nonattainment—Attainment/Maintenance Areas (Local Areas)," 5 CCR 1001-20, revisions adopted January 11, 2001, effective February 28, 2001 as follows: Section III, which is titled "Aspen/Pitkin County PM₁₀ Attainment/Maintenance Area," and which supersedes and replaces all prior versions of Section III.

(98) On November 5, 1999 the Governor of Colorado submitted a revision to Regulation No. 1, "Emission Control for Particulates, Smokes, Carbon Monoxide and Sulfur Dioxide." The November 5, 1999 submittal exempts military training exercises at the United States Army Installation Fort Carson and United States Army Pinon Canon Maneuver Site (PCMS) from opacity limits. A new subsection D to Regulation No. 1, section II, has been approved into the SIP.

(i) *Incorporation by reference.* (A) Colorado Regulation No. 1, section II, subsection D effective September 30, 1998.

(99) On August 9, 2002, the Governor of Colorado submitted SIP revisions to Colorado's Regulation No. 11 "Motor Vehicle Emissions Inspection Program" that eliminate the requirement in the SIP for the implementation of a motor vehicle inspection and maintenance program in Larimer County (which includes the Fort Collins area) after January 1, 2004. On August 9, 2002, the Governor also submitted SIP revisions to Colorado's Regulation No. 13 "Oxygenated Fuels Program" that eliminate the oxygenated fuel requirements for Larimer County (which includes the Fort Collins area) after January 1, 2004, and make changes to sections I.D., II.A., II.B., II.C., II.D., II.E., II.F., II.G., and II.H. On August 9, 2002, the Governor also submitted SIP revisions to Colorado's State Implementation Plan Specific Regulations for Nonattainment and Attainment/Maintenance Areas (Local Elements) that eliminate Clean Air Act section 172(c)(9) carbon monoxide contingency measures for the Fort Collins area. We originally approved these contingency measures on December 23, 1997, and our approval was codified in paragraph (c)(71) of this section.

(i) *Incorporation by reference.* (A) Regulation No. 11 "Motor Vehicle Emissions Inspection Program", 5 CCR 1001–13, Part A.I, as adopted on July 18, 2002, and effective September 30, 2002.

(B) Regulation No. 13 "Oxygenated Fuels Program", 5 CCR 1001–16, except for section III, the last sentence in Section II.C.1.c.v., "This Section II.C.1.c.v. is repealed effective February 1, 2019 and is replaced by the requirements in Section II.C.1.c.vi. below beginning November 1, 2019," and Section II.C.1.c.vi., as adopted on July 18, 2002, effective September 30, 2002, which supersedes and replaces all prior versions of Regulation No. 13.

(100) EPA is approving a SIP revision submitted by the Governor of Colorado on July 31, 2002, concerning the use of credible evidence for determining compliance and establishing violations. The July 31, 2002 submittal revises Colorado Air Quality Control Commission (AQCC) Common Provisions Regulation by adding Section II.I, Compliance Certifications. Section II.I of Colorado

AQCC Common Provisions Regulation is approved into the SIP.

(i) *Incorporation by reference.* (A) Colorado Air Quality Control Commission Common Provisions Regulation, Section II.I, effective September 30, 2001.

(101) On July 31, 2002, the State of Colorado submitted a maintenance plan for the Steamboat Springs PM₁₀ nonattainment area and requested that this area be redesignated to attainment for the PM₁₀ National Ambient Air Quality Standards. The redesignation request and maintenance plan satisfies all applicable requirements of the Clean Air Act.

(i) *Incorporation by reference.* (A) Colorado Air Quality Control Commission, "State Implementation Plan—Specific Regulations for Nonattainment—Attainment/Maintenance Areas (Local Elements)," 5 CCR 1001–20, revisions adopted November 15, 2001, effective December 30, 2001 as follows: Section VIII., titled "Steamboat Springs PM₁₀ Attainment/Maintenance Area" and supersedes and replaces all prior versions of Section VIII.

(102) [Reserved]

(103) On April 12, 2004, the Governor of Colorado submitted revisions to Regulation No. 11 "Motor Vehicle Emissions Inspection Program" that eliminated the Federal applicability of the Basic I/M program for El Paso County and the Colorado Springs CO attainment/maintenance area.

(i) *Incorporation by reference.* (A) Regulation No. 11 "Motor Vehicle Emissions Inspection Program", 5 CCR 1001–13, as adopted on December 18, 2003, effective March 1, 2004, as follows: Part A.I., "Applicability," final sentence of paragraph 2.

(104) On June 20, 2003, the Governor of Colorado submitted SIP revisions to Colorado's Regulation No. 11 "Motor Vehicle Emissions Inspection Program" that eliminate the requirement in the SIP to implement a motor vehicle inspection and maintenance program in Weld County (which includes the Greeley area) after January 1, 2004. On June 20, 2003, the Governor also submitted SIP revisions to Colorado's Regulation No. 13 "Oxygenated Fuels Program" that eliminate the oxygenated fuel requirements for Weld County

(which includes the Greeley area) after January 1, 2004.

(i) *Incorporation by reference.* (A) Regulation No. 11 “Motor Vehicle Emissions Inspection Program”, 5 CCR 1001-13, Part A.I, second sentence that reads, “The provisions of this regulation applicable to Larimer and Weld counties shall not be included in the state implementation plan after January 1, 2004.”, as adopted on December 19, 2002, and effective March 2, 2003.

(B) Regulation No. 13 “Reduction of Carbon Monoxide Emissions from Gasoline Powered Motor Vehicles through the use of Oxygenated Gasolines,” 5 CCR 1001-16, Part I.D.15, Part II.A, Part II.C, as adopted on December 19, 2002, and effective March 2, 2003.

(105) Revisions to the Long-Term Strategy of Colorado’s State Implementation Plan for Class I Visibility Protection (Visibility SIP), as submitted by the Governor on April 12, 2004. The revisions update strategies, activities, and plans that constitute reasonable progress toward the National visibility goal.

(i) *Incorporation by reference.* (A) “Revision of the Long-Term Strategy,” (Part II of the January 31, 2002 document entitled “Long-Term Strategy Review and Revision of Colorado’s State Implementation Plan for Class I Visibility Protection,”) effective on February 21, 2002.

(106) On July 31, 2002, the State of Colorado submitted a maintenance plan for the Lamar PM₁₀ nonattainment area and requested that this area be redesignated to attainment for the PM₁₀ National Ambient Air Quality Standards. The redesignation request and maintenance plan satisfy all applicable requirements of the Clean Air Act.

(i) *Incorporation by reference.* (A) Colorado Air Quality Control Commission, “State Implementation Plan—Specific Regulations for Nonattainment—Attainment/Maintenance Areas (Local Elements),” 5 CCR 1001-20, revisions adopted November 15, 2001, effective December 30, 2001 as follows: Section IV, titled “Lamar Attainment/Maintenance Area,” and which supersedes and replaces all prior versions of Section IV.

(ii) *Additional material.* (A) Colorado Department of Public Health and Environment, “Natural Events Action Plan for High Wind Events, Lamar, Colorado,” submitted to EPA on February 9, 1998 and subsequently approved by EPA, June 5, 1998 and Lamar’s revised 2003 “Natural Events Action Plan for High Wind Events, Lamar, Colorado,” submitted to EPA on April 16, 2003 and subsequently approved by EPA, February 9, 2004.

(107) On July 21, 2004, the Governor submitted revisions to the Colorado State Implementation Plan for Colorado’s Common Provisions Regulation that contained a definition for condensate. On July 21, 2004, and on March 24, 2005, the Governor also submitted revisions to the Colorado State Implementation Plan for Colorado’s Regulation No. 7 “Emissions of Volatile Organic Compounds” that made several changes and additions to sections I.A., I.B., II.A and added new sections XII and XVI. The March 24, 2005 version of Regulation No. 7 superseded and replaced portions of the July 21, 2004 version of Regulation No. 7. On June 20, 2003, April 12 2004, and July 21, 2004, the Governor of Colorado submitted revisions to the Colorado State Implementation Plan for Colorado’s Regulation No. 11 “Motor Vehicle Emissions Inspection Program.”

(i) *Incorporation by reference.* (A) Common Provisions Regulation, 5 CCR 1001-2, as adopted on March 12, 2004, effective on May 30, 2004, as follows: Section I.G, definition of “Condensate.”

(B) Regulation No. 7 “Emissions of Volatile Organic Compounds,” 5 CCR 1001-9, as adopted on March 12, 2004, effective on May 31, 2004, as follows: Sections I.A.1, I.A.1.a, I.A.1.b, I.A.1.c, I.B.1.b, and I.B.2.f. As adopted on December 16, 2004, effective March 2, 2005, as follows: Sections I.A.2, II.A.16, II.A.17, XII, and XVI.

(C) Regulation No. 11 “Motor Vehicle Emissions Inspection Program,” 5 CCR 1001-13, with changes most recently adopted on March 12, 2004, effective May 31, 2004, as follows: Part A, Part B, Part C, Part D, Part E, Part F, and Appendices A and B, except for the following sentence in Part A.I, which is being acted on separately: “The provisions of this regulation applicable to

Larimer and Weld counties shall not be included in the state implementation plan after January 1, 2004.” On August 8, 2006, Colorado submitted revisions to Colorado’s Regulation Number 11—Motor Vehicle Emissions Inspection Program, part F, section III.A.2, that EPA approved and that superseded the version of section III.A.2 that EPA incorporated by reference in this paragraph. See § 52.329(f).

(ii) *Additional material.* (A) March 22, 2005, letter from Margie Perkins, Director, Air Pollution Control Division, Colorado Department of Public Health and Environment, to Richard Long, Director, Air and Radiation Program, EPA Region VIII. This letter contained commitments from the State to adhere to and address the continuing planning process requirements contained in the “Maintenance for Growth” provisions of EPA’s “Protocol for Early Action Compacts Designed to Achieve and Maintain the 8-Hour Ozone Standards.”

(108) Revisions to the Long-Term Strategy of Colorado’s State Implementation Plan for Class I Visibility Protection (Visibility SIP), as submitted by the Governor on March 24, 2005. The revisions update strategies, activities, and monitoring plans that constitute reasonable progress toward the National visibility goal.

(i) *Incorporation by reference.* (A) “Revision of the Long-Term Strategy,” Part II of the November 18, 2004 document entitled “Long-Term Strategy Review and Revision of Colorado’s State Implementation Plan for Class I Visibility Protection,” effective November 18, 2004.

(B) Colorado Air Quality Control Commission Regulation No. 3, “Stationary Source Permitting and Air Pollutant Emission Notice Requirements,” 5 CCR 1001–5, Part D, Section XIV, Visibility, Subsections A through F, effective April 16, 2004.

(C) Colorado Air Quality Control Commission, Regulation Number 3, 5 CCR 1001–5, *Stationary Source Permitting and Air Pollutant Emission Notice Requirements*, Part D, *Concerning Major Stationary Source New Source Review and Prevention of Significant Deterioration*, Section XIV.F, *Long Term Strategy*, subsection XIV.F.1. introductory

text and XIV.F.1.c; adopted January 7, 2011; effective February 14, 2011.

(109) A revision to the State Implementation Plan was submitted by the State of Colorado on July 31, 2002. The submittal revises the Common Provisions regulation by adding affirmative defense provisions for source owners and operators for excess emissions during periods of startup and shutdown.

(i) Incorporation by reference.

(A) Common Provisions Regulation, 5 CCR 1001–2, sections II.J.1 through II.J.4, adopted August 16, 2001, effective September 30, 2001.

(110) A Revision to the State Implementation Plan was submitted by the State of Colorado on April 12, 2004. The revision corrects a clerical error in Section VIII.A of Regulation No. 1.

(i) Incorporation by reference.

(A) Colorado Regulation No. 1, 5CCR 1001–3, Section VIII.A, adopted June 19, 2003, effective August 31, 2003.

(111) On August 8, 2006, the Governor of Colorado submitted SIP revisions to Colorado’s Regulation No. 11 “Motor Vehicle Emissions Inspection Program” that repeals the basic vehicle emissions inspection program in the Fort Collins and Greeley areas.

(i) Incorporation by reference.

(A) Regulation No. 11 “Motor Vehicle Emissions Inspection Program,” 5CCR1001–13, Part A.1 and Part A.IV, as adopted on November 17, 2005, and effective January 30, 2006.

(112) On August 3, 2007, the Governor of Colorado submitted revisions to the Colorado’s Regulation No. 7 “Emissions of Volatile Organic Compounds” that made several changes and additions to Section XII, “Volatile Organic Compound Emissions From Oil and Gas Operations.”

(i) Incorporation by reference.

(A) Regulation No. 7 “Emissions of Volatile Organic Compounds,” 5 CCR 1001–9, Section XII, “Volatile Organic Compound Emissions From Oil and Gas Operations,” effective on March 4, 2007.

(113) On August 1, 2007, the State of Colorado submitted revisions to Colorado’s Common Provisions Regulation, 5 CCR 1001–2, that made changes and additions to Section I, “Definitions,

Statement of Intent, and General Provisions Applicable to All Emission Control Regulations Adopted by the Colorado Air Quality Control Commission,” and Section II, “General.”

(i) Incorporation by reference.

(A) Common Provisions Regulation, 5 CCR 1001-2, Section I.G, “Definitions,” effective on March 4, 2007.

(I) The submittal revises Section I.G by removing the definition of “upset conditions” and replacing it with the definition of “malfunction.”

(B) Common Provisions Regulation, 5 CCR 1001-2, Section II.E, “Affirmative Defense Provision for Excess Emissions During Malfunctions,” effective on March 4, 2007.

(2) The submittal revises Section II.E by removing language which provided an exemption for excess emissions during upset conditions and breakdowns and replacing it with an affirmative defense provision for source owners and operators for excess emissions during malfunctions.

(114) On August 1, 2007, the State of Colorado submitted revisions to Colorado Regulation Number 1 to be incorporated into the Colorado SIP. The submittal revised Section III.B.2. by adding “and air curtain destructors subject to 40 CFR 60” to the first sentence of Section III.B.2.

(i) Incorporation by reference.

(A) 5 CCR 1001-3, Code of Colorado Regulations, Regulation Number 1, Emission Control for Particulates, Smokes, Carbon Monoxide and Sulfur Oxides, PARTICULATE MATTER, Section III.B.2, “Incinerators,” effective on November 30, 2006, published in Colorado Register, Volume 29, Number 11.

(115) On July 31, 2003, the State of Colorado submitted revisions to Colorado’s 5 CCR 1001-3, Regulation 1, that deleted Sections II.A.6, A.7, A.9 and C.3, regarding, respectively, alfalfa dehydrating plant drum dryers, wigwam burners, the static firing of Pershing missiles and a notice regarding waste materials. The State also deleted emission limitations for alfalfa plant drum dryers by removing Section III.C.2. Colorado’s deletion of Sections II. A.6, A.7 and A.9 and Section III.C.2 will cause a numbering change of subsequent paragraphs within Sections II.A and III.C. EPA is adopting the new

numbering scheme for sections II.A. and III C. Section II.C.2.d. regarding agricultural open burning is modified to include the burning of diseased animal carcasses to prevent a public health emergency. Section III.A.1.d is modified for incorporation of new State’s method for calculating emissions from multiple fuel burning units ducted to a common stack. Section V is added regarding emission standards for electric arc furnaces, except for the director’s discretion provision provided for in Section V.A.2. Sections VI.A.3.e, VI.A.3.f, VI.B.4.e, and VI.B.4.g(ii) are modified regarding the methods used for the averaging of emissions over a 24 hour period.

(i) Incorporation by reference.

(A) 5 CCR 1001-3, Regulation 1, Emission Control for Particulates, Smokes, Carbon Monoxide and Sulfur Oxides, Section II, Smoke and Opacity, Section II.C.2.d, effective March 2, 2002.

(B) 5 CCR 1001-3, Regulation 1, Emission Control for Particulates, Smokes, Carbon Monoxide and Sulfur Oxides, Section III, Particulate Matter, Fuel Burning Equipment, Section III.A.1.d, effective September 30, 2001.

(C) 5 CCR 1001-3, Regulation 1, Emission Control for Particulates, Smokes, Carbon Monoxide and Sulfur Oxides, Section V, Emission Standard for Existing Iron and Steel Plant Operations, effective September 30, 2001.

(I) The submittal contains Section V.A.2 with the language:

“Emissions from gas-cleaning device shall not exceed a mass emission rate of 0.00520 gr/dscf of filterable particulates maximum two-hour average, as measured by EPA Methods 1-4 and the front half of Method 5 (40 CFR 60.275, and Appendix A, Part 60), or by other credible method approved by the Division. This particulate emissions standard does not include condensable emissions, or the back half emissions of Method 5”. The language “or by other credible method approved by the Division” is disapproved. The language “Appendix A, Part 60” is changed to “appendices A1 through A3, Part 60” in order to comply with the current nomenclature of Part 60.

(D) 5 CCR 1001-3, Regulation 1, Emission Control for Particulates, Smokes, Carbon Monoxide and Sulfur Oxides,

Section VI, Sulfur Dioxide Emission Regulations, Sections VI.A.3.e, VI.A.3.f, VI.B.4.e, and VI.B.4.g(ii), effective September 30, 2001.

(I) Sections VI.B.4.e and VI.B.4.g(ii) list an emission rate of 0.7 lbs. sulfur dioxide, for the sum of all SO₂ emissions from a given refinery per barrel of oil processed, per day. This emission rate is disapproved. The emission rate remains unchanged at 0.3 lbs. All remaining language within Sections VI.B.4.e and VI.B.4.g(ii) is approved.

(116) On June 20, 2003, the State of Colorado submitted revisions to Colorado's Regulation 3 Regulation, 5 CCR 1001-5, that place restrictions on increment consumption, add innovative control technology as an alternative to BACT requirements, and changed or deleted numerous definitions in Part A. The State in Part B revised construction permit review requirements regarding RACT for minor sources in attainment/maintenance areas. The State made the restrictions on maximum allowable increases of sulfur dioxide concentrations over baseline concentrations in Class I areas also applicable to certain Class II areas, such as certain National Monuments that are not Class I areas. Increment consumption restrictions were added to limit major stationary sources from consuming more than 75 percent of an applicable increment. The State added the use of innovative control technology by a source in lieu of BACT requirements in order to encourage the use of such technology. The revisions to both Parts A and B also included minor changes designed to fix ambiguous language, to make the definitions more readable or to delete obsolete or duplicative definitions. On April 12, 2004, the State of Colorado submitted a minor revision to Part A, Section I.A regarding the availability of material incorporated by reference.

(i) Incorporation by reference.

(A) Regulation 3, 5 CCR 1001-5, AIR CONTAMINANT EMISSIONS NOTICES, Part A, Concerning General Provisions Applicable to Construction Permits and Operating Permits, effective December 2002 and April 2003 with the following exceptions:

(I) Section I.B.36.b.(iii)(G) provisions related to Pollution Control Projects

(2) Section I.B.40.c.(ii) Submittal of an application for a nonroad engine permit, State-only requirement

(3) Section IV. C., Emissions Trading under Permit Caps

(4) Section V.F.5, Criteria for Approval of all Transactions, deleting the requirement that trading transactions may not be used inconsistently with or to circumvent requirements of LAER

(B) Regulation 3, 5 CCR 1001-5, AIR CONTAMINANT EMISSIONS NOTICES, Part B, Concerning Construction Permits including Regulations for the Prevention of Significant Deterioration (PSD), Area Classifications, Part B, Section V.B., effective December 2002 with the following exceptions:

(I) Section III.D.1.c.(iii), Exemption from Construction Permit Requirements, Uncontrolled Emissions

(2) Section IV.B.2, Application for a Construction Permit, and Section IV.H.8, Application for a Final Permit, regarding operating and maintenance plans and recordkeeping formats.

(117) On June 18, 2009, the State of Colorado submitted an 8-Hour Ozone Attainment Plan for the Denver Metro Area/North Front Range area to meet the requirements of 40 CFR 81.300(e)(3)(ii)(D) for the 1997 8-hour ozone NAAQS. On the same date, the State of Colorado also submitted revisions to portions of Part A, "Concerning General Provisions Applicable to Reporting and Permitting," and Part B, "Concerning Construction Permits," of Colorado's Regulation No. 3, "Air Contaminant Emissions Notices," and to Sections I through XVI of Colorado's Regulation No. 7, "Control of Ozone Via Ozone Precursors (Emissions of Volatile Organic Compounds and Nitrogen Oxides)." EPA is approving the Ozone Attainment Plan except for the last paragraph on page IV-1 and the first paragraph on page IV-2, the words "federally enforceable" in the second to last paragraph on page V-6, and the reference to Attachment A in the Table of Contents and on page IV-3. EPA is disapproving the excepted language from the Ozone Attainment Plan. EPA is approving the revisions to portions of Parts A and B of Colorado's Regulation No. 3. For purposes of this action,

Colorado Regulation No. 3, Part B, Sections II.D.1.k, l, m, and n, as incorporated below, should be considered an addition to and as immediately following Colorado Regulation Number 3, Part B, Sections III.D.1.a through j, as previously approved by EPA. EPA is approving the revisions to Sections I through XI and XIII through XVI of Colorado's Regulation No. 7, except for Colorado's repeal of section II.D. EPA is disapproving Colorado's repeal of Section II.D and Colorado's revisions to Section XII of Regulation No. 7. EPA is not acting on the provisions in Regulation No. 7 that are designated "State Only."

(i) *Incorporation by reference.*

(A) 5 CCR 1001-5, Colorado Regulation No. 3, "Air Contaminant Emissions Notices," Part A, "Concerning General Provisions Applicable to Reporting and Permitting," Sections II.D.1.m, II.D.1.ee, II.D.1.uu, II.D.1.ccc, II.D.1.ddd, II.D.1.uuu, and II.D.1.eeee, effective January 30, 2009.

(B) 5 CCR 1001-5, Colorado Regulation No. 3, "Air Contaminant Emissions Notices," Part B, "Concerning Construction Permits," Sections II.D.1.k, l, m, and n, effective January 30, 2009.

(C) Letter dated November 18, 2009 from the Office of the Colorado Attorney General, signed by Jerry Goad, to Candy Herring, Office of the Colorado Secretary of State, regarding clerical errors in Regulation No. 7, and those portions of 5 CCR 1001-9, Colorado Regulation No. 7, "Control of Ozone Via Ozone Precursors (Emissions of Volatile Organic Compounds and Nitrogen Oxides)," Section II.C.1 that accompanied such letter, except for the following: the parenthetical phrase "(State Only: Located in any Ozone Nonattainment Area or Attainment Maintenance Area)" at II.C.1; Section II.C.1.a(v); Section II.C.1.c; and Section II.C.1.d.

(D) 5 CCR 1001-9, Colorado Regulation No. 7, "Control of Ozone Via Ozone Precursors (Emissions of Volatile Organic Compounds and Nitrogen Oxides)," Sections I through XI and XIII through XVI, effective January 30, 2009, except for the following: Section I.A.1.b; Section I.B.1.b; Section I.B.2.b; Section I.B.2.d; Section II.A.12; Section II.C.1; and the repeal of Section II.D.

(118) On June 20, 2003, the State of Colorado submitted revisions to Colorado's Common Provisions Regulation, 5 CCR 1001-2, that revised the definitions of continuous monitoring system, emergency power generator, enforceable, federally enforceable, manufacturing process or process equipment, and volatile organic compounds. Deleted definitions included but were not limited to actual emissions, Best Available Control Technology (BACT), Lowest Achievable Emission Rate (LAER), and what conditions determine the modification of a source. These definitions were deleted in the Common Provisions because they appear in Colorado's Regulation 3. The State clarified that fuel burning equipment emissions are considered a part of the manufacturing process emissions when the emissions are vented through a common stack.

However, fuel burning equipment emissions vented from a separate stack are subject to regulations unique to fuel burning equipment. In addition, the State deleted and reserved Section III of the Common Provisions regarding smoking gasoline powered motor vehicles. The provisions regarding smoking gasoline powered motor vehicles were considered by the State to be obsolete. The revisions to the Common Provisions also included minor changes designed to fix ambiguous language, to make the definitions more readable or to delete obsolete or duplicative definitions.

(i) *Incorporation by reference.*

(A) 5 CCR 1001-2, COMMON PROVISIONS REGULATION, Section 1., Definitions, Statement of Intent, and General Provisions Applicable to all Emission Control Regulations Adopted by the Colorado Air Quality Control Commission, except I.G, the definitions for "Construction" and "Day"; Section II, General, except II.E, II.I, and II.J; effective on September 30, 2002.

(119) The State of Colorado submitted revisions on September 16, 1997, June 20, 2003, July 11, 2005, August 8, 2006 and August 1, 2007 to Colorado's 5 CCR 1001-5 Regulation Number 3, Part A, Section II. The August 1, 2007 submittal included a renumbering of sections in

II.B and II.D. The incorporation by reference in (c)(119)(i)(A) reflects the renumbered provisions as of the August 1, 2007 submittal. Additionally, the State of Colorado deleted sections II.B.7., II.B.8., II.B.9., II.B.10., and II.D.7. without replacement. The deletion of these provisions has been incorporated by reference at (c)(72)(i)(F) of this section, the paragraph containing the original incorporation by reference of the provisions.

(i) Incorporation by reference.

(A) 5 CCR 1001–5, Regulation 3, *Stationary Source Permitting and Air Pollutant Emission Notice Requirements*, Part A, *Concerning General Provisions Applicable to Reporting and Permitting*, Section II, *Air Pollutant Emission Notice (APEN) Requirements*, Sections II.A, *Air Pollutant Emission Notices for New, Modified, and Existing Sources*; II. B, *General*; II.B.1, *Emission Estimate*; II.B.1.b, *Other engineering calculations*; II.B.2, *Air Pollutant Emission Notice Term*; II.B.3, *APEN Applicability*; II.B.3.a, *Criteria Pollutants*; II.B.4.a; II.B.4.b; II.B.4.c; II.B.4.d; II.B.4.e; II.B.4.f; the undesignated text immediately following II.B.4.f and preceding II.B.5; II.B.5; II.B.6; II.C, *Revised Air Pollutant Emission Notices*; II.C.1; II.C.1.a; II.C.1.h; II.C.2; II.C.2.b; II.C.3; II.D, *Exemptions from Air Pollutant Emission Notice Requirements*; II.D.1; the undesignated text immediately following II.D.1 and preceding II.D.1.a; II.D.1.a; II.D.1.f; II.D.1.g; II.D.1.h; II.D.1.i (excluding subprovisions); II.D.1.j; II.D.1.k; II.D.1.n; II.D.1.x; II.D.1.y; II.D.1.aa; II.D.1.bb; II.D.1.kk; II.D.1.nn; II.D.1.oo; II.D.1.aaa; II.D.1.bbb; II.D.1.ccc; II.D.1.fff; II.D.1.ggg; II.D.1.lll; the undesignated text immediately following II.D.1.lll and preceding II.D.1.mmm; II.D.1.nnn., II.D.1.ooo; II.D.1.ppp; II.D.1.qqq; II.D.1.rrr; II.D.1.vvv; II.D.1.www; II.D.1.yyy; II.D.1.zzz; II.D.1.aaaa; II.D.1.bbbb; II.D.1.cccc; II.D.1.dddd; II.D.2; II.D.3; II.D.4; II.D.5; II.D.6; effective October 30, 2006.

(120) The State of Colorado submitted revisions on October 25, 2005 and August 1, 2007 to Colorado's 5 CCR 1001–5 Regulation Number 3, Part D. The October 25, 2005 submittal included a renumbering of Regulation Number 3. The incorporation by reference in paragraph (c)(120)(i)(A) on this section re-

flects the renumbered sections as of the October 25, 2005 submittal. Sections were removed from Part D between the October 25, 2005 and August 1, 2007 submittal. The incorporation by reference in paragraph (c)(120)(i)(B) of this section reflects the numbering of the sections as of the August 1, 2007 submittal.

(i) Incorporation by reference.

(A) 5 CCR 1001–5, Regulation 3, *Stationary Source Permitting and Air Pollutant Emission Notice Requirements*, Part D, *Concerning Major Stationary Source New Source Review and Prevention of Significant Deterioration*, adopted April 16, 2004 and effective June 30, 2004:

(1) Section I, *Applicability*, Sections I.A., *General Applicability*; I.A.1;

(2) Section II, *Definitions*,

(i) II.A;

(ii) II.A.1, *Actual Emissions*; II.A.1.a (only the language that appears in plain or underlined text and not the language that appears as italicized text); II.A.1.b; II.A.1.c; II.A.1.e;

(iii) II.A.3, *Air Quality Related Value*;

(iv) II.A.5, *Baseline Area*;

(v) II.A.6, *Baseline Concentration*;

(vi) II.A.8, *Best Available Control Technology (BACT)* (the language that appears in plain or underlined text but not language that appears as italicized text, with the following exception—EPA is incorporating italicized text and is not incorporating underlined text when the combined effect of that action is to replace the phrase “air pollutant regulated under the Federal Act” (or an equivalent phrase) with the term “regulated NSR pollutant”);

(vii) II.A.12, *Complete*;

(viii) II.A.16, *Federal Land Manager (FLM)*;

(ix) II.A.19, *Innovative Control Technology*;

(x) II.A.21, *Lowest Achievable Emission Rate (LAER)*; II.A.21.a; II.A.21.b (only the language that appears in plain or underlined text and not the language that appears as italicized text);

(xi) II.A.23, *Major Modification* (the language that appears in plain or underlined text but not language that appears as italicized text, with the following exception—EPA is incorporating italicized text and is not incorporating underlined text when the

combined effect of that action is to replace the phrase “air pollutant regulated under the Federal Act” (or an equivalent phrase) with the term “regulated NSR pollutant”; II.A.23.b; II.A.23.c; II.A.23.d; II.A.23.d(i); II.A.23.d(ii); II.A.23.d(iv); II.A.23.d(v); II.A.23.d(vi); II.A.23.d(vii); II.A.23.d(ix); II.A.23.f;

(xii) II.A.24, *Major Source Baseline Date*;

(xiii) II.A.25, *Major Stationary Source*; II.A.25.a; II.A.25.c; II.A.25.e; II.A.25.f;

(xiv) II.A.26, *Minor Source Baseline Date*;

(xv) II.A.27, *Net Emissions Increase*; II.A.27.a; (the language that appears in plain or underlined text and the addition of the italicized phrase “With respect to any regulated NSR pollutant emitted by any major stationary source”); II.A.27.a.(i) (only the language that appears in plain or underlined text and not the language that appears as italicized text); II.A.27.a.(ii) (only the language that appears in plain or underlined text and not the language that appears as italicized text); II.A.27.b (only the language that appears in plain or underlined text and not the language that appears as italicized text); II.A.27.c; II.A.27.c.(i); II.A.27.c.(ii); II.A.27.c.(iii); II.A.27.d; II.A.27.e; II.A.27.f; II.A.27.g; II.A.27.g.(i); II.A.27.g.(ii); II.A.27.g.(iii) (only the language that appears in plain or underlined text and not the language that appears as italicized text); II.A.27.g.(iv); II.A.27.h; II.A.27.j; II.A.27.k, *Creditable Decreases for Fuel Switching*;

(xvi) II.A.40, *Regulated NSR Pollutant*; II.A.40.a; II.A.40.b; II.A.40.d; II.A.40.e;

(xvii) II.A.43, *Secondary Emissions* (only the language that appears in plain or underlined text and not the language that appears as italicized text);

(xviii) II.A.44, *Significant*; II.A.44.b; II.A.44.c;

(xix) II.A.45, *Significant Emissions Increase*;

(3) Section III, *Permit Review Procedures*;

(4) Section IV, *Public Comment Requirements*;

(5) Section V, *Requirements Applicable to Nonattainment Areas*, Sections V.A, *Major Stationary Sources*; V.A.1; V.A.2;

V.A.3; V.A.3.d; V.A.4; V.A.5; V.A.6; V.A.7, *Applicability of Certain Nonattainment Area Requirements*; V.A.7.a; V.A.7.b; V.A.8, *Exemptions from certain nonattainment area requirements*;

(6) Section VI, *Requirements applicable to attainment and unclassifiable areas and pollutants implemented under section 110 of the Federal Act (Prevention of Significant Deterioration Program)*, Sections VI.A, *Major Stationary Sources and Major Modifications*; VI.A.1, *Control Technology Review*; VI.A.1.a; VI.A.1.b; VI.A.1.c (only the language that appears in plain or underlined text and not the language that appears as italicized text); VI.A.2, *Source Impact Analysis*; VI.A.3, *Pre-construction Monitoring and Analysis*; VI.A.4, *Post-Construction Monitoring*; VI.A.5, *Operation of Monitoring Stations*; VI.A.6, *Additional Impact Analysis* (only the language that appears in plain or underlined text and not the language that appears as italicized text); VI.B, *Applicability of Certain PSD Requirements*; VI.B.1 through VI.B.4; VI.B.7; VI.C, *Notice to the U.S. EPA*; VI.D, *Major Stationary Sources in attainment areas affecting nonattainment areas*;

(7) Section VII, *Negligibly Reactive Volatile Organic Compounds (NRVOCs)*;

(8) Section VIII, *Area Classifications*, Sections VIII.A; VIII.C; VIII.D;

(9) Section IX, *Redesignation*;

(10) Section X, *Air Quality Limitations*, Sections X.A, *Ambient Air Increments*; X.A.1, X.A.2; X.A.3; X.A.4, *Periodic Review*;

(11) Section XI, *Exclusions From Increment Consumption*;

(12) Section XII, *Innovative Control Technology*;

(13) Section XIII, *Federal Class I Areas*; adopted April 16, 2004 and effective June 30, 2004.

(B) Regulation 3, *Stationary Source Permitting and Air Pollutant Emission Notice Requirements*, Part D, *Concerning Major Stationary Source New Source Review and Prevention of Significant Deterioration*, Section II, *Definitions*; Sections II.A; II.A.22.a; II.A.24.d; II.A.38.c; II.A.42.a; adopted August 17, 2006 and effective October 30, 2006.

(121) On August 8, 2006, the State of Colorado submitted revisions to Colorado’s 5 CCR 1001-3, Regulation 1, that allows for the use of obscurants during

military exercises at the Fort Carson Military Base and Pinón Canyon Maneuver Site in Colorado while precautionary steps are taken during the exercise to maintain air quality. The State modified the equipment requirements and work practices (abatement and control measures) in Regulation 1 intended to control the emissions of particulates, smokes and SO₂ from new and existing stationary sources. Consistent with its use of the term elsewhere, the State added the attainment/maintenance nomenclature. The revision also provides a new numbering scheme for each section of the regulation.

The State adopted EPA test method 9 (part 60 of this title, Appendix A-4) as it is applied to Standards of Performance for Steel Plants (§60.275a of this title). The State revised manufacturing process emission rates, to clarify that the applicability of the section is to process equipment with a design rate of 30 tons per hour or less. The averaging time for emission standards of all existing sources of SO₂ shall be a three hour rolling average. New sources of SO₂ not specifically regulated within Regulation 1 are limited to two tons per day and are subject to BACT.

(i) Incorporation by reference.

(A) 5 CCR 1001–3, Regulation 1, Emission Control for Particulate Matter, Smoke, Carbon Monoxide, and Sulfur Oxides, Section I., *Applicability: Referenced Federal Regulations*; Section II., *Smoke and Opacity*; Section III., *Particulate Matter* (except Subsection III.A.1.d.); Section IV., *Continuous Emission Monitoring Requirements for New or Existing Sources*; Section V., *Emission Standards for Existing Iron and Steel Plant Operations*; Section VI., *Sulfur Dioxide Emission Regulations*; Section VII., *Emission Regulations for Certain Electric Generating Stations Owned and Operated by the Public Service Company of Colorado*; Section VIII., *Restrictions On The Use of Oil as a Backup Fuel*; effective October 2, 2005.

(122) The State of Colorado submitted revisions October 25, 2005 to Colorado's 5 CCR 1001–5 Regulation Number 3, Part A and Colorado's 5 CCR 1001–5 Regulation Number 3, Part D. The October 25, 2005 submittal included language changes and renumbering of Reg-

ulation Number 3. The incorporation by reference in ((i)(A) and (i)(B) reflects the renumbered sections and language changes as of the October 25, 2005 submittal.

(i) Incorporation by reference.

(A) 5 CCR 1001–5, Regulation 3, *Stationary Source Permitting and Air Contaminant Emission Notice Requirements*, Part A, *Concerning General Provisions Applicable to Reporting and Permitting*, adopted April 16, 2004 and effective June 30, 2004:

Section I, *Applicability*, Sections I.B, *Definitions*; I.B.7, *Allowable Emissions*; I.B.13, *Continuous Emissions Monitoring System (CEMS)*; I.B.14, *Continuous Emissions Rate Monitoring Systems (CERMS)*; I.B.15, *Continuous Parameter Monitoring System (CPMS)*; I.B.33, *Pollution Prevention*; I.B.35, *Potential to Emit*; I.B.36, *Predictive Emissions Monitoring System (PEMS)*; adopted April 16, 2004 and effective June 30, 2004.

(B) 5 CCR 1001–5, Regulation 3, *Stationary Source Permitting and Air Contaminant Emission Notice Requirements*, Part D, *Concerning Major Stationary Source New Source Review and Prevention of Significant Deterioration*, adopted April 16, 2004 and effective June 30, 2004:

(1) Section I, *Applicability*,

(i) I.A., *General Applicability*; I.A.2; I.A.3;

(ii) I.B, *Applicability Tests*; I.B.1; I.B.2; I.B.4 (except the final sentence beginning, "For example"); I.B.5;

(iii) I.C;

(2) Section II, *Definitions*,

(i) II.A;

(ii) II.A; II.A.1, *Actual Emissions*; II.A.1.a (only the language that appears as plain or italicized text); II.A.1.c (only the language that appears as plain text); II.A.1.d;

(iii) II.A.2, *Actuals PAL*;

(iv) II.A.4, *Baseline Actual Emissions*;

(v) II.A.7, *Begin Actual Construction*;

(vi) II.A.9, *Clean Coal Technology*;

(vii) II.A.10, *Clean Coal Technology Demonstration Project*;

(viii) II.A.13, *Construction*;

(ix) II.A.14, *Emissions Unit*;

(x) II.A.15, *Electric Utility Steam Generating Unit*;

(xi) II.A.17, *High Terrain*;

(xii) II.A.18, *Hydrocarbon Combustion Flare*;

- (xiii) II.A.20, *Low Terrain*;

- (xxviii) II.A.38, *Projected Actual Emissions*;
- (xxvix) II.A.39, *Reactivation of Very Clean Coal-fired Electric Utility Steam Generating Unit*;
- (xxx) II.A.41, *Replacement Unit*;
- (xxxi) II.A.42, *Repowering*;
- (xxxii) II.A.43, *Secondary Emissions*;
- (xxxiii) II.A.46, *Significant Emissions Unit*;
- (xxxiv) II.A.47, *Small Emissions Unit*;
- (xxxv) II.A.48, *Temporary Clean Coal Technology Demonstration Project*;

(3) Section V, *Requirements Applicable to Nonattainment Areas*, V.A.7.c (except for the phrases, “a Clean Unit or at”, “a reasonable possibility that”, and “may result in a significant emissions increase”); V.A.7.d;

(4) Section VI, *Requirements applicable to attainment and unclassifiable areas and pollutants implemented under section 110 of the Federal Act (Prevention of Significant Deterioration Program)*, Sections VI.A.1.c (only the language that appears as plain or italicized text); VI.B.5 (except for the phrases, “a Clean Unit or at”, “a reasonable possibility that”,

and “may result in a significant emissions increase”); VI.B.6;

(5) Section XVII, *Actuals PALs*; adopted April 16, 2004 and effective June 30, 2004.

(123) Colorado adopted revisions to its procedural rules on January 16, 1998 and submitted part of the revised procedural rules to EPA on November 5, 1999. Colorado’s procedural rules govern all procedures and hearings before the Air Quality Control Commission (Commission) and certain procedures and hearings before the Air Pollution Control Division within the Colorado Department of Public Health and Environment. The revision to the Commission’s procedural rules was intended to bring the Commission current with all applicable procedural requirements for their official actions. The submitted portion of the revision consisted of changes to Section 1.11.0 of the procedural rules. The section addresses requirements under section 128 of the CAA regarding the composition of the Commission and disclosure by its members of potential conflicts of interest.

(i) Incorporation by reference.

(A) Department of Public Health and Environment, Air Quality Control Commission, Procedural Rules, 5 CCR 1001–1, Section 1.11.0, *State Implementation Plan*, adopted on January 16, 1998 and effective on March 30, 1998.

(ii) [Reserved]

(124) On May 25, 2011 the State of Colorado submitted revisions to its State Implementation Plan to address the requirements of EPA’s regional haze rule. On December 31, 2012, EPA issued a final rule approving this submittal and responding to public comments. On May 26, 2015 EPA reissued the final rule with respect to the nitrogen oxides (NO_x) best available retrofit technology (BART) determination for the Comanche Generating Station to provide additional responses to public comments.

(i) Incorporation by reference.

(A) Colorado Air Quality Control Commission, Regulation Number 3, 5 CCR 1001–5, *Stationary Source Permitting and Air Pollutant Emission Notice Requirements*, Part F, *Regional Haze Limits—Best Available Retrofit Technology (BART) and Reasonable Progress (RP)*,

Section VI, *Regional Haze Determinations*, and Section VII, *Monitoring, Recordkeeping, and Reporting for Regional Haze Limits*; adopted January 7, 2011; effective February 14, 2011.

(B) Colorado Air Quality Control Commission, Regulation Number 7, 5 CCR 1001–9, *Control of Ozone via Ozone Precursors (Emissions of Volatile Organic Compounds and Nitrogen Oxides)*, Section XVII, *(State Only, except Section XVII.E.3.a. which was submitted as part of the Regional Haze SIP) Statewide Controls for Oil and Gas Operations and Natural Gas-Fired Reciprocating Internal Combustion Engines*, subsection E.3.a, *(Regional Haze SIP) Rich Burn Reciprocating Internal Combustion Engines*; adopted January 7, 2011; effective February 14, 2011.

(125) On August 21, 2006, the State of Colorado submitted revisions to 5 CCR 1001–5, Regulation Number 3, *Air Pollution Emission Notice and Permitting Requirements*. The August 21, 2006, submittal included renumbering and deletions of Regulation Number 3. The incorporation by reference in paragraphs (c)(125)(i)(A) and (B) of this section reflect the renumbered sections, deletions and reference changes as of the August 21, 2006, submittal.

(i) Incorporation by reference

(A) 5 CCR 1001–5, Regulation Number 3, *Stationary Source Permitting and Air Contaminant Emission Notice Requirements*, Part C, *Concerning Operating Permits*, Section I, *Applicability*, I.A., *Definitions*; I.A.7.j., adopted December 15, 2005 and effective March 2, 2006.

(B) 5 CCR 1001–5, Regulation Number 3, *Stationary Source Permitting and Air Contaminant Emission Notice Requirements*, Part D, *Concerning Major Stationary Source New Source Review and Prevention of Significant Deterioration*, adopted December 15, 2005 and effective March 2, 2006:

(1) Section I, *Applicability*, I.A., *General Applicability*; I.A.2., I.B., *Applicability Tests*; I.B.3., I.B.4.

(2) Section II, *Definitions*; II.A.; II.A.1., *Actual Emissions*; II.A.1.d.; II.A.11., *Complete*; II.A.12., *Construction*; II.A.13., *Emissions Unit*; II.A.14., *Electric Utility Steam Generating Unit*; II.A.15., *Federal Land Manager (FLM)*; II.A.16., *High Terrain*; II.A.17., *Hydrocarbon combustion flare*; II.A.18., *Innovative Control*

Technology; II.A.19., *Low Terrain*; II.A.20., *Lowest Achievable Emission Rates (LAER)* (excluding underlined text); II.A.21., *Major Emissions Unit*; II.A.22., *Major Modification* (excluding II.A.22.a. and underlined text); II.A.23., *Major Source Baseline Date*; II.A.24., *Major Stationary Source* (excluding II.A.24.d. and underlined text); II.A.25., *Minor Source Baseline Date*; II.A.26., *Net Emissions Increase* (excluding underlined text); II.A.27., *Nonattainment Major New Source Review (NSR) Program*; II.A.28., *PAL Effective Date*; II.A.29., *PAL Effective Period*; II.A.30., *PAL Major Modification*; II.A.31., *PAL Permit*; II.A.32., *PAL Pollutant*; II.A.33., *Plantwide Applicability Limitation (PAL)*; II.A.34., *Prevention of Significant Deterioration (PSD) Permit*; II.A.35., *Project*; II.A.36., *Projected Actual Emissions*; II.A.37., *Reactivation of Very Clean Coal-fired Electric Utility Steam Generating Unit*; II.A.38., *Regulated NSR Pollutant* (excluding II.A.38.c.); II.A.39., *Replacement Unit*; II.A.40., *Repowering* (excluding underlined text); II.A.41., *Secondary Emissions*; II.A.42., *Significant* (excluding II.A.42.a.); II.A.43., *Significant Emissions Increase*; II.A.44., *Significant Emissions Unit*; II.A.45., *Small Emissions Unit*; II.A.46., *Temporary Clean Coal Technology Demonstration Project*; XV., *Actual PALs*.

(ii) Additional material.

(A) Notice of Final Adoption, dated 12/15/2005, signed by Douglas A. Lempke, Administrator, for revisions made to Regulation Number 3, *Air Pollution Emission Notice and Permitting Requirements*.

(126) On May 11, 2012 and May 13, 2013 the State of Colorado submitted revisions to the State Implementation Plan that incorporate the required elements of the 2008 PM_{2.5} NSR Implementation Rule and the 2010 PM_{2.5} Increment Rule.

(i) Incorporation by reference

(A) 5 CCR 1001–5, Regulation Number 3, *Stationary Source Permitting and Air Pollutant Emission Notice Requirements*, Part D, *Concerning Major Stationary Source New Source Review and Prevention of Significant Deterioration*, Section II, *Definitions*, Section II.A.5, *Baseline Area*, II.A.5.a. and II.A.5.b.; Section II.A.23., *Major Source Baseline Date*, II.A.23.a. and II.A.23.b.; II.A.25., *Minor*

Source Baseline Date, II.A.25.a., II.A.25.b. introductory text, and II.A.25.b.(i); II.A.38, *Regulated NSR Pollutant*, II.A.38.c., II.A.38.g.; II.A.42., *Significant*, II.A.42.a.; Section X, *Air Quality Limitations*, X.A., *Ambient Air Increments*, X.A.1., effective on 12/15/11.

(B) 5 CCR 1001-5, Regulation Number 3, *Stationary Source Permitting and Air Pollutant Emission Notice Requirements*, Part D, *Concerning Major Stationary Source New Source Review and Prevention of Significant Deterioration*, Section II, *Definitions*, II.A.23., *Major Source Baseline Date*, II.A.23.c., effective on 2/15/13.

(127) On June 11, 2008, June 18, 2009, and May 25, 2011 the State of Colorado submitted revisions to 5 CCR 1001-5, Regulation 3, Parts A, B, and D. The June 11, 2008 and June 18, 2009 submissions incorporated changes to fee amounts which the State charges for the processing and annual renewal of air emission permits. These fees support Colorado's construction and operating permit programs. EPA is approving fees submitted by the State on June 18, 2009, which superseded changes submitted on June 11, 2008, to the extent that the fees support the construction permit program. EPA is also approving revisions made to 5 CCR 1001-5, Regulation 3, Parts A, B, and D submitted by the State on May 25, 2011 for Parts A, B and D.

(i) Incorporation by reference.

(A) 5 CCR 1001-5, Regulation Number 3, *Stationary Source Permitting and Air Pollutant Emission Notice Requirements*, Part A, *Concerning General Provisions Applicable to Reporting and Permitting*, VI. *Fees*, VI.D. *Fee Schedule*, VI.D.1.; adopted September 18, 2008 and effective October 30, 2008.

(B) 5 CCR 1001-5, Regulation Number 3, *Stationary Source Permitting and Air Pollutant Emission Notice Requirements*, Part A, *Concerning General Provisions Applicable to Reporting and Permitting*, except Section II., *Air Pollutant Emission Notice (APEN) Requirements*, II.D., *Exemptions from Air Pollutant Emission Notice Requirements*, Section II.D.1.sss, II.D.1.ttt, II.D.1.xxx, and II.D.1.fff; and Section VI., *Fees*, VI.D., *Fee Schedule*, VI.D.1., adopted February 21, 2008 and effective April 30, 2008.

(C) 5 CCR 1001-5, Regulation Number 3, *Stationary Source Permitting and Air Pollutant Emission Notice Requirements*, Part B, *Concerning Construction Permits*; adopted February 21, 2008 and effective April 30, 2008.

(D) 5 CCR 1001-5, Regulation Number 3, *Stationary Source Permitting and Air Pollutant Emission Notice Requirements*, Part D, *Concerning Major Stationary Source New Source Review and Prevention of Significant Deterioration*; adopted February 21, 2008 and effective April 30, 2008:

(1) Excluding underlined text in Section II, *Definitions*, Section II.A.1., *Actual Emissions*, II.A.1.a., II.A.1.c., and II.A.1.e.; II.A.8., *Best Available Control Technology (BACT)*, first paragraph; II.A.20., *Lowest Achievable Emissions Rate (LAER)*, II.A.20.b.; II.A.22., *Major Modification*, introductory paragraph; II.A.24., *Major Stationary Source*, II.A.24.b.; II.A.26., *Net Emissions Increase*, II.A.26.a.(i) and II.A.26.g.(iii); II.A.40.5, *Representative Actual Annual Emissions*, introductory paragraph and II.A.40.5(a); and, VI. *Requirements applicable to attainment and unclassifiable areas and pollutants implemented under Section 110 of the Federal Act (Prevention of Significant Deterioration Program)*, VI.A. *Major Stationary Sources and Major Modifications*, VI.A.1., *Control Technology Review*, VI.A.1.c.; and

(2) With the following exceptions: Section II, *Definitions*, Section II.A.5., *Baseline Area*, II.A.5.a. and II.A.5.b.; Section II.A.23., *Major Source Baseline Date*; II.A.25., *Minor Source Baseline Date*, II.A.25.a., II.A.25.b., introductory text, and II.A.25.b(i); II.A.38, *Regulated NSR Pollutant*, II.A.38.c.; II.A.42., *Significant*, II.A.42.a.; Section X, *Air Quality Limitations*, X.A., *Ambient Air Increments*, X.A.1.

(128) On May 25, 2011, the State of Colorado submitted revisions to 5 CCR 1001-5, Regulation 3, *Stationary Source Permitting and Air Pollutant Emission Notice Requirements*, parts A, B, and D. The May 25, 2011 submittal addresses the permitting of sources of greenhouse gases (GHGs). The revisions to portions of parts A, B, and D incorporate the provisions of the Prevention of Significant Deterioration (PSD) and Title V

Greenhouse Gas Tailoring Rule. The revisions establish thresholds for determining which new stationary sources and modifications to existing stationary sources become subject to Colorado's PSD permitting requirements for their GHG emissions. These revisions are consistent with federal requirements for PSD permitting.

(i) Incorporation by reference.

(A) 5 CCR 1001–5, Regulation Number 3, *Stationary Source Permitting and Air Pollutant Emission Notice Requirements*, Part A, *Concerning General Provisions Applicable to Reporting and Permitting*, I.B., *Definitions*, I.B.10, *Carbon Dioxide Equivalent (CO₂e)*; I.B.23., *Greenhouse Gas (GHG)*; I.B.25., *Major Source*, I.B.25b; and I.B.44., *Subject to Regulation*; VI., *Fees*, VI.D., *Fee Schedule*; Part B, *Concerning Construction Permits*, II.A.4. and II.A.7; Part D, *Concerning Major Stationary Source New Source Review and Prevention of Significant Deterioration*, II., *Definitions*, II.A., introductory paragraph, II.A.8, *Best Available Control Technology (BACT)*; II.A.22., *Major Modification*; II.A.24., *Major Stationary Source*; II.A.24.a., introductory paragraph, II.A.24.a.(ii); II.A.24.b.; II.A.38., *Regulated NSR Pollutant*, II.A.38.e. and II.A.38.f.; adopted October 21, 2010 and effective December 15, 2010.

[37 FR 10855, May 31, 1972. Redesignated and amended at 80 FR 58209, Sept. 28, 2015]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.354, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

Subpart H—Connecticut

§ 52.369 [Reserved]

§ 52.370 Identification of plan.

(a) Title of plan: “State of Connecticut Air Implementation Plan.”

(b) The plan was officially submitted on March 3, 1972.

(c) The plan revisions listed below were submitted on the dates specified.

(1) Miscellaneous non-regulatory addition to the plan and addition of amendment to Chapter 360 of General Statutes which provides authority for delegation of enforcement authority submitted on March 21, 1972, by the

Connecticut Department of Environmental Protection.

(2) Miscellaneous non-regulatory additions to the plan submitted on April 6, 1972, by the Connecticut Department of Environmental Protection.

(3) Attainment dates submitted on August 10, 1972, by the Connecticut Department of Environmental Protection.

(4) Regulation 19–508–100 requiring a review of indirect sources submitted on January 9, 1974, by the Connecticut Department of Environmental Protection.

(5) AQMA identification material submitted on April 15, 1974, by the Connecticut Department of Environmental Protection.

(6) Indirect Source Review Regulation 19–508–100 resubmitted on August 26, 1974, by the Connecticut Department of Environmental Protection.

(7) [Reserved]

(8) Revision to Chapter 8, Air Quality Surveillance, submitted on June 30, 1977, by the Governor.

(9) Revision to Indirect Source Review Regulation 19–508–100 submitted on June 13, 1977, by the Connecticut Department of Environmental Protection.

(10) A revision to Regulation 19–508–19(a)(2)(i) submitted by the Commissioner of the Connecticut Department of Environmental Protection on April 16, 1979, granting a variance until April 1, 1981, to Northeast Utilities.

(11) State Implementation Plan revisions to meet the requirements of part D of the Clean Air Act, as amended in 1977, were submitted on June 22, 1979, and received on June 27, 1979; submitted on December 18, 1979 and received on December 28, 1979; submitted on January 28, 1980, and received on February 1, 1980; submitted and received on May 1, 1980; submitted and received on June 5, 1980; submitted on September 2, 1980, and received on September 8, 1980; and submitted and received on November 12, 1980. Included are plans to attain: The primary TSP standard in Greenwich and Waterbury and the carbon monoxide and ozone standards statewide. A program was also submitted for the review of construction and operation of new and modified major stationary sources of

Environmental Protection Agency

§ 52.370

pollution in non-attainment areas. Certain miscellaneous provisions are also included.

(12) A revision to Regulation 19-508-19(a)(2)(i), submitted by the Commissioner of the Connecticut Department of Environmental Protection on September 8, 1980, granting a variance until March 27, 1983, to the Federal Paperboard Company, Inc.

(13) A comprehensive air quality monitoring plan, intended to meet requirements of 40 CFR part 58, was submitted by the Connecticut Department of Environmental Protection Commission on June 9, 1980, and November 17, 1980.

(14) Non-regulatory additions to the plan which were submitted on December 19, 1980, and amended on March 11, 1981, by the Connecticut Department of Environmental Protection amending the sulfur control strategy to include an "Air Pollution Control/Energy Trade Option" except for submittal attachments #1 and #2, "Sulfur Dioxide" and "Transport of Sulfur Dioxide" and the section of attachment #3 "Control of Sulfur Oxides" entitled "Sample Analysis of a Btu Bubble Application".

(15) Non-regulatory addition to the plan of the state *New Source Ambient Impact Analysis Guideline*, for use in State program actions, submitted on December 19, 1980, and amended on March 11, 1981, and July 15, 1981.

(16) Revisions to regulation 19-508-4 (source monitoring requirements) and regulation 19-508-5 (stack emissions testing) submitted on November 7, 1977, by the Commissioner of the Connecticut Department of Environmental Protection.

(17) A revision to Regulation 19-508-19(a)(2)(i), submitted by the Commissioner of the Connecticut Department of Environmental Protection on June 23, 1981, granting a temporary variance to Uniroyal Chemical, Division of Uniroyal, Inc.

(18) Revisions to Regulation 19-508-19 (Control of Sulfur Compound Emissions), Regulation 19-508-24 (Connecticut Primary and Secondary Standards), and accompanying narrative submitted by the Commissioner of the Connecticut Department of Environmental Protection on October 23, 1981, and November 4, 1981.

(19) Revisions submitted by the Commissioner of the Connecticut Department of Environmental Protection on November 16, 1981. These provisions supersede portions of the revisions identified under paragraph (c)(18).

(20) Revisions to meet the requirements of part D and certain other sections of the Clean Air Act, as amended, were submitted on December 15, 1980, May 29, 1981, and May 5, 1982. Included are changes to the State Ozone Control Plan involving adoption of Regulation 19-508-20(k) controlling the use of cut-back asphalt, the approval of the RFP demonstration for ozone attainment, a refined inventory of miscellaneous stationary sources of Volatile Organic Compounds, changes to Regulation 19-508-3(1) dealing with review of new and modified stationary sources, and an amendment to the State's Smoke and Opacity monitoring requirements.

(21) [Reserved]

(22) Revisions to the narrative and State Regulation 19-508-18, subparts (d), f(1), f(2), and part of f(3), governing total suspended particulate emissions, submitted by the Commissioner of the Connecticut Department of Environmental Protection on April 8, 1982.

(23) Regulation 19-508-20(cc), Alternative Emission Reductions as it applies to Regulation 19-508-20: (m), can coating; (n), coil coating; (o), fabric and vinyl coating; (p), metal furniture coating; (q), paper coating; (r), wire coating; (s), miscellaneous metal parts; (t), manufacture of synthesized pharmaceutical products and (v), graphic arts—rotogravure and flexography, was submitted on December 15, 1980, and January 11, 1982, by the Commissioner of the Department of Environmental Protection.

(24) Revision for Sikorsky Aircraft Division of United Technologies received from the Commissioner of the Connecticut Department of Environmental Protection on June 2 and July 16, 1982. This provision supersedes a portion of the revisions identified under (c)(18).

(25) Revisions to meet ozone attainment requirements of Part D (Group II CTG regulations), the adoption of a lead standard and the revision of the ozone standard, submitted on December 15, 1980, are approved as follows:

Regulations 19-508-20 (s), (t), (v), (w), (aa), (bb), and (dd), Regulation 19-508-8 and Regulation 19-508-24(i)(1).

(26) Revision for Dow Chemical U.S.A. in Gale's Ferry submitted by the Commissioner of the Connecticut Department of Environmental Protection on December 20, 1982, including state order 7002B signed on May 27, 1982. This provision supersedes a portion of the revisions identified under paragraph (c)(18).

(27) Revision for Lydall and Foulds Division of Lydall, Inc., submitted by the Commissioner of the Connecticut Department of Environmental Protection on December 17, 1982, and January 5, 1983, allowing the facility to burn higher sulfur oil under the State Energy Trade Program.

(28) Revision for Simkins Industries, Inc., in New Haven submitted by the Commissioner of the Connecticut Department of Environmental Protection on January 19, 1983, allowing the facility to burn higher sulfur oil under the Sulfur Energy Trade Program.

(29) Attainment plan revisions to meet the requirements of Part D for ozone were submitted by the Department of Environmental Protection on December 10, 1982, and May 19, 1983. These revisions control volatile organic compound (VOC) emissions from solvent metal cleaners through emission limitations contained in Regulation 19-508-20(I) and supporting narrative committing the DEP to implement an educational program for automobile repair facilities. Approval of these revisions allowed EPA to rescind the moratorium on construction and modification of major sources of VOCs which had been in effect since October 1982.

(30) Revision for Loomis Institute in Windsor, submitted by the Commissioner of the Connecticut Department of Environmental Protection on March 30 and July 13, 1983, allowing the facility to burn 2.0 percent sulfur oil under the Sulfur Energy Trade Program.

(31) Revisions demonstrating the attainment and maintenance of the lead standard were submitted on October 18, 1983.

(32) Attainment plan revisions to meet the requirements of part D for ozone and carbon monoxide were sub-

mitted by the Department of Environmental Protection on December 10, 1982, January 7, 1983, January 21, 1983, May 19, 1983, June 15, 1983, September 19, 1983, and December 15, 1983. The revisions control volatile organic compound (VOC) and carbon monoxide emissions through a mix of stationary and mobile source controls. EPA approval includes the following regulatory provisions:

(i) Regulation 22a-174-20(ee) limiting emissions from major nonCTG source categories, and

(ii) Regulations 22a-174-27 and 14-164c describing the requirements for Connecticut's motor vehicle Inspection and Maintenance Program.

(33) Revision to Regulation 19-508-20(cc), "Alternative Emission Reductions" [made part of the SIP under paragraph (c)(23) of this section] to add Regulation 19-508-20(ee) to the list of VOC regulations that may be met by bubbling under Connecticut's generic rule after source-specific RACT determinations have been made part of the SIP. Revisions requiring sources subject to Regulation 19-508-20(ee) to comply with 19-508-20 (aa), (bb), and (dd). These revisions were submitted by the Connecticut Department of Environmental Protection on September 20, 1983.

(34) Revisions to the Ozone Attainment Plan were submitted by the Commissioner of the Connecticut Department of Environmental Protection on April 22, 1985.

(i) *Incorporation by reference.* (A) Amendments to Regulation 22a-174-1, Definitions; Regulation 22a-174-20(a), Storage of Volatile Organic Compounds; Regulation 22a-174-20(b), Loading of Gasoline and Other Volatile Organic Compounds; and Regulation 22a-174-20(k), Restrictions on Cutback Asphalt, effective December 17, 1984.

(ii) *Additional material.* (A) *Source Test Guidelines and Procedures.*

(B) *Workshop Manual for Gasoline Tank Truck Certification.*

(C) Appendix B of *Control of Volatile Organic Compound Leaks from Gasoline Tank Trucks and Vapor Collection Systems* (EPA-450/2-78-051).

(35) Revisions to the State Implementation Plan were submitted December

15, 1980, and May 16, 1985, by the Commissioner of the Department of Environmental Protection.

(i) *Incorporation by reference.* (A) Amendments to Department of Environmental Protection Regulation 19-508-24(a)(4), "Acceptable Method" adopted by the State on October 8, 1980.

(ii) *Additional material.* (A) A letter dated May 16, 1985, certifying that an "Acceptable Method" shall be interpreted to mean that any monitoring method used to collect ambient air pollution data used for attainment status evaluation or designation must be approved by EPA.

(36) Revision to the State Implementation Plan submitted on April 18, 1986, by the Commissioner of the Department of Environmental Protection.

(i) *Incorporated by reference.* (A) State Order No. 943 for Connecticut Charcoal Co., effective April 18, 1986, establishing and requiring reasonably available control technology for the control of volatile organic compounds from this facility.

(37) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on April 18, 1986, and February 3, 1987.

(i) *Incorporation by reference.* (A) State Order No. 944 for King Industries, Inc. dated April 18, 1986, which establishes and requires reasonably available control technology for the control of volatile organic compounds from this facility.

(B) A letter from the Connecticut Department of Environmental Protection dated February 3, 1987, which states that the effective date of State Order No. 944 is May 28, 1986.

(38) Revisions to the State Implementation Plan were submitted by the Connecticut Department of Environmental Protection (DEP) on April 14, 1987.

(i) *Incorporation by reference.* (A) Letter dated April 14, 1987, from the Connecticut Department of Environmental Protection submitting revisions to the State Implementation Plan for EPA approval.

(B) Letter dated April 1, 1987, from the Secretary of State of Connecticut to EPA.

(C) Section 22a-174-20(x) of Connecticut's Regulations for the Abatement of

Air Pollution titled, "Control of Volatile Organic Compound Leaks from Synthetic Organic Chemical & Polymer Manufacturing Equipment," effective April 1, 1987.

(D) Section 22a-174-20(y) of Connecticut's Regulations for the Abatement of Air Pollution titled, "Manufacture of Polystyrene Resins," effective April 1, 1987.

(E) Amendments to subsection 22a-174-20(bb) of Connecticut's Regulations for the Abatement of Air Pollution titled, "Compliance Methods," effective April 1, 1987.

(ii) *Additional material.* (A) Letter from the Connecticut DEP dated July 3, 1986, committing the Connecticut DEP to use only EPA approved test methods when requiring the testing of sources emitting volatile organic compound emissions.

(B) Letter from the Connecticut DEP dated May 29, 1987, certifying that there are no polypropylene or high-density polyethylene manufacturers in the State of Connecticut.

(39) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on August 24, 1987.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated August 24, 1987, submitting a revision to the Connecticut State Implementation Plan.

(B) State Order No. 8007 for Belding Corticelli Thread Company dated July 13, 1987.

(40) [Reserved]

(41) Revision to the Connecticut State Implementation Plan submitted by the Commissioner of the Department of Environmental Protection on February 3, 1987.

(i) *Incorporation by reference.* (A) A letter from the Connecticut Department of Environmental Protection dated February 3, 1987, which states that the effective date of State Order No. 943, approved previously, for Connecticut Charcoal Co. is May 28, 1986.

(42) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on October 27, 1987.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department

of Environmental Protection dated October 27, 1987, submitting a revision to the Connecticut State Implementation Plan.

(B) State Order No. 8013 and attached Compliance Timetable for Raymark Industries, Incorporated in Stratford, Connecticut effective on September 24, 1987.

(ii) *Additional material.* (A) Technical Support Document prepared by the Connecticut Department of Environmental Protection providing a complete description of the reasonably available control technology determination imposed on the facility.

(43) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on February 5, 1988.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated February 5, 1988, submitting a revision to the Connecticut State Implementation Plan.

(B) State Order No. 8012 and attached Compliance Timetable, Appendix A (allowable limits on small, uncontrolled vents), and Appendix B (fugitive leak detection program) for American Cyanamid Company in Wallingford, Connecticut. State Order No. 8012 was effective on January 6, 1988.

(ii) *Additional material.* (A) Technical Support Document prepared by the Connecticut Department of Environmental Protection providing a complete description of the reasonably available control technology determination imposed on the facility.

(44) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on August 31, 1987.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated August 31, 1987, submitting a revision to the Connecticut State Implementation Plan.

(B) State Order No. 8008 and attached Compliance Timetable and Appendix A (allowable limits by product classification) for Spongex International, Ltd. in Shelton, Connecticut. State Order No. 8008 was effective on August 21, 1987.

(ii) *Additional materials.* (A) Technical Support Document prepared by the

Connecticut Department of Environmental Protection providing a complete description of the reasonably available control technology determination imposed on the facility.

(45) [Reserved]

(46) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on July 26, 1988.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated July 26, 1988, submitting a revision to the Connecticut State Implementation Plan.

(B) State Order No. 8023 and attached Compliance Timetable for New Departure Hyatt, Division of General Motors Corporation in Bristol, Connecticut. State Order No. 8023 was effective on July 8, 1988.

(ii) *Additional material.* (A) Technical Support Document prepared by the Connecticut Department of Environmental Protection providing a complete description of the reasonably available control technology determination imposed on the facility.

(47) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on November 5, 1987.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated November 5, 1987, submitting a revision to the Connecticut State Implementation Plan.

(B) State Order No. 8001 and attached Compliance Timetable for Frismar, Incorporated in Clinton, Connecticut. State Order No. 8001 was effective on October 20, 1987.

(ii) *Additional material.* (A) Technical Support Document prepared by the Connecticut Department of Environmental Protection providing a complete description of the alternative reasonably available control technology determination imposed on the facility.

(48) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on December 5, 1988.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated December 5, 1988, submitting a revision to

Environmental Protection Agency

§ 52.370

the Connecticut State Implementation Plan.

(B) State Order No. 8011 and attached Compliance Timetable and Appendix A (allowable limits by product classification) for Dow Chemical, U.S.A. in Gales Ferry, Connecticut. State Order No. 8011 was effective on October 27, 1988.

(C) State Order No. 8011, which was approved in paragraph (c)(48)(i)(B), is removed without replacement; see paragraph (c)(115)(i)(C).

(ii) *Additional material.* (A) Technical Support Document prepared by the Connecticut Department of Environmental Protection providing a complete description of the reasonable available control technology determination imposed on the facility.

(49) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on January 11, 1989.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated January 11, 1989, submitting a revision to the Connecticut State Implementation Plan.

(B) State Order No. 8010 and attached Compliance Timetable for Stanadyne, Incorporated in Windsor, Connecticut. State Order No. 8018 was effective on January 3, 1989.

(ii) *Additional material.* (A) Technical Support Document prepared by the Connecticut Department of Environmental Protection providing a complete description of the reasonably available control technology determination imposed on the facility.

(50) Revisions to federally approved section 22a-174-20(a) of the Regulations of Connecticut State Agencies, submitted on January 27, 1989, by the Department of Environmental Protection, limiting the volatility of gasoline from May 1 through September 15, beginning 1989 and continuing every year thereafter, including any waivers to such limitations that Connecticut may grant. In 1989, the control period will begin on June 30.

(51) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection (DEP) on April 7, 1989.

(i) *Incorporation by reference.* (A) Letter from the Connecticut DEP dated

April 7, 1989, submitting a revision to the Connecticut State Implementation Plan.

(B) State Order No. 8014 and attached Compliance Timetable for Pratt & Whitney Division of United Technologies Corporation in East Hartford, Connecticut. State Order No. 8014 was effective on March 22, 1989.

(C) State Order No. 8027 and attached Compliance Timetable for Pratt & Whitney Division of United Technologies Corporation in North Haven, Connecticut. State Order No. 8027 was effective on March 31, 1989.

(D) State Order No. 8014, which was approved in paragraph (c)(51)(i)(B), is removed without replacement; see paragraph (c)(115)(i)(D).

(ii) *Additional material.* (A) Technical Support Document prepared by the Connecticut DEP providing a complete description of the reasonably available control technology determination imposed on Pratt and Whitney's East Hartford facility.

(B) Technical Support Document prepared by the Connecticut DEP providing a complete description of the reasonably available control technology determination imposed on Pratt and Whitney's North Haven facility.

(52) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on February 7 and August 30, 1989.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated February 7, 1989, submitting a revision to the Connecticut State Implementation Plan.

(B) State Order No. 8021 and attached Compliance Timetable, and Appendix A (allowable limits on small, uncontrolled vents and allowable outlet gas temperatures for surface condensers) for Pfizer, Incorporated in Groton, Connecticut. State Order No. 8021, Compliance Timetable and Appendix A were effective on December 2, 1988.

(C) Letter from the Connecticut Department of Environmental Protection dated August 30, 1989, and reorganized Appendix C (fugitive leak detection program) and Appendix D (operation and maintenance program for pollution abatement equipment) to State Order

No. 8021. Appendices C and D were effective on December 2, 1988.

(D) State Order No. 8021, which was approved in paragraph (c)(52)(i)(B), and appendices C and D to State Order No. 8021, which were approved in paragraph (c)(52)(C), are removed without replacement; see paragraph (c)(115)(i)(E).

(ii) *Additional material.* (A) Technical Support Document prepared by the Connecticut Department of Environmental Protection providing a complete description of the reasonably available control technology determination imposed on the facility.

(53) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on September 8, 1989.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated September 8, 1989, submitting a revision to the Connecticut State Implementation Plan.

(B) State Order No. 8009 and attached Compliance Timetable, Appendix A, Appendix B, and Appendix C for Uniroyal Chemical Company, Inc. in Naugatuck, Connecticut. State Order No. 8009 was effective on September 5, 1989.

(C) State Order No. 8009, which was approved in paragraph (c)(53)(i)(B), is removed without replacement; see paragraph (c)(115)(i)(F).

(ii) *Additional material.* (A) Technical Support Document prepared by the Connecticut Department of Environmental Protection providing a complete description of the reasonably available control technology determination imposed on the facility.

(54) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on December 22, 1989.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated December 22, 1989, submitting a revision to the Connecticut State Implementation Plan.

(B) State Order No. 8029, attached Compliance Timetable, and Tables A through I for Hamilton Standard Division of United Technologies Corporation in Windsor Locks, Connecticut.

State Order No. 8029 was effective on November 29, 1989.

(ii) *Additional material.* (A) Technical Support Document prepared by the Connecticut DEP providing a complete description of the reasonably available control technology determination imposed on Hamilton Standard.

(55) Revision to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on January 10, 1990.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated January 10, 1990, submitting a revision to the Connecticut State Implementation Plan.

(B) State Order No. 8032 and attached Compliance Timetable for the Heminway & Bartlett Manufacturing Company in Watertown, Connecticut. State Order No. 8032 was effective on November 29, 1989.

(C) State Order No. 8032, which was approved in paragraph (c)(55)(i)(B), is removed without replacement; see paragraph (c)(115)(i)(G).

(ii) *Additional material.* (A) Technical Support Document prepared by the Connecticut DEP providing a complete description of the reasonably available control technology determination imposed on The Heminway & Bartlett Manufacturing Company.

(56) Revisions of the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on January 19, 1989, July 28, 1989, and January 26, 1990 (with attached letter of November 28, 1989).

(i) *Incorporation by reference.* (A) Letters from the Connecticut Department of Environmental Protection dated January 19, 1989, July 28, 1989, and January 26, 1990, (with attached letter of November 28, 1989) submitting revisions to the Connecticut State Implementation Plan.

(B) Section 22a-174-1 of the Regulations of the Connecticut State Agencies Concerning Abatement of Air Pollution entitled "Definitions," effective in the State of Connecticut on October 3, 1989.

(C) Subsection 22a-174-3(k) of the Regulations of the Connecticut State Agencies Concerning Abatement of Air Pollution entitled "Requirements for

Environmental Protection Agency

§ 52.370

the Prevention of Significant Deterioration (PSD) Program," effective in the State of Connecticut on October 3, 1989.

(D) Section 22a-174-2, subsections 22a-174-3(a) through (j) and (l), subsection 22a-174-8(c), subsection 22a-174-20(ee), and subsection 22a-174-4(d) of the Regulations of the Connecticut State Agencies Concerning Abatement of Air Pollution entitled "Permits to Construct and Permits to Operate Stationary Sources or Modifications," effective in the State of Connecticut on February 1, 1989.

(E) Connecticut's Ambient Impact Analysis Guideline dated July 1989 as revised by letter on January 26, 1990.

(ii) *Additional materials.* (A) State Implementation Plan narrative entitled "New Source Review."

(B) Letter from the Connecticut Department of Environmental Protection regarding implementation of BACT.

(C) Nonregulatory portions of the State Submittal.

(57) [Reserved]

(58) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on November 9, 1989, and September 12, 1991.

(i) *Incorporation by reference.* (A) Letters from the Connecticut Department of Environmental Protection dated November 9, 1989, and September 12, 1991, submitting revisions to the Connecticut State Implementation Plan.

(B) Section 22a-174-20 of the Regulations of the Connecticut Department of Environmental Protection Concerning Abatement of Air Pollution, effective October 31, 1989, except for the last sentence of 22a-174-20(aa)(7).

(59) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on March 24 and April 23, 1992.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated April 14, 1992, submitting a revision to the Connecticut State Implementation Plan.

(B) State Order No. 1073B and attached compliance timetable for the Stone Connecticut Paperboard Corporation of Uncasville, CT. State Order

No. 1073B was effective on February 14, 1992.

(C) Letter from the Connecticut Department of Environmental Protection dated March 24, 1992, submitting a revision to the Connecticut State Implementation Plan.

(D) State Order No. 7016A and attached compliance timetable for the Hartford Hospital of Hartford, CT. State Order No. 7016A was effective on February 5, 1992.

(ii) *Additional materials.* (A) Memorandum dated August 17, 1989, approving the modeling analysis for the Stone Container Co.

(B) Modeling Study dated August 9, 1989, for the Stone Container Co.

(C) State Order No 1073A, dated June 12, 1990, and effective July 9, 1990.

(D) Memorandum dated January 3, 1990, approving the modeling analysis for the Hartford Hospital.

(E) Modeling study dated December 28, 1989, for the Hartford Hospital.

(60) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on February 16, 1996.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated February 16, 1996, submitting a revision to the Connecticut State Implementation Plan.

(B) State Order No. 8010 dated October 25, 1989 for Sikorsky Aircraft Corporation, effective on January 29, 1990, as well as Addendum A and Addendum B to Order No. 8010, effective on February 7, 1996 and September 29, 1995, respectively. The State order and two addenda define and impose RACT on certain VOC emissions at Sikorsky Aircraft Corporation in Stratford, Connecticut

(C) State Order No. 8010, which was approved in paragraph (c)(60)(i)(B), is removed without replacement; see paragraph (c)(115)(i)(H).

(61) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on February 28, 1991.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated February 28, 1991, submitting a revision

to the Connecticut State Implementation Plan.

(B) State Order No. 7017 and attached compliance timetable for the Connecticut Light and Power Company of Montville, Connecticut. State Order No. 7017 was effective on February 25, 1991.

(ii) *Additional materials.* (A) Memorandum dated September 14, 1990, approving the modeling analysis for Connecticut Light and Power.

(B) Letter dated April 23, 1991, confirming that the revised configuration approved by State Order No. 7017 will not lead to violations.

(C) Modeling Study dated January 26, 1990, for Connecticut Light and Power.

(62) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on January 12, 1993.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection, dated January 12, 1993, submitting a revision to the Connecticut State Implementation Plan.

(B) Section 22a-174-30 of the Connecticut Regulations for the Abatement of Air Pollution, entitled "Dispensing of Gasoline/Stage II Vapor Recovery," dated November 1992.

(C) Letter from the Connecticut Secretary of State's office indicating that the regulation entitled "Dispensing of Gasoline/Stage II Vapor Recovery" became effective on November 24, 1992.

(ii) *Additional materials.* (A) Non-regulatory portions of the submittal.

(B) Connecticut Department of Environmental Protection document entitled "Narrative of SIP Revision: Stage II Vapor Recovery," dated January 1993.

(63) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on March 11, 1993.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated March 11, 1993, submitting a revision to the Connecticut State Implementation Plan.

(B) Connecticut State Order No 7019 dated March 11, 1993, and effective in the State of Connecticut on February 19, 1993.

(ii) *Additional materials.* (A) Air Quality Modeling Analysis to Demonstrate SO₂ CAAQS/NAAQS Compliance at the Hamilton Standard Division of United Technologies Corporation Windsor Locks CT; June 1991.

(64) [Reserved]

(65) Revisions to the State Implementation Plan establishing a Small Business Stationary Source Technical and Environmental Compliance Assistance Program were submitted by the Connecticut Department of Environmental Protection on January 12 and August 9, 1993.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated January 12, 1993, submitting a revision to the Connecticut State Implementation Plan.

(B) Revisions to the State Implementation Plan for the Small Business Stationary Source Technical and Environmental Compliance Assistance Program dated January 1993 and effective on January 12, 1993.

(C) Letter from the Connecticut Department of Environmental Protection dated August 9, 1993, clarifying and updating the January 12, 1993, submittal.

(ii) *Additional materials.* (A) Letter from the Connecticut Department of Environmental Protection dated April 6, 1994, clarifying the January 12, 1993, submittal.

(B) Other non-regulatory portions of the State's submittal.

(66) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on January 12, 1993.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated January 12, 1993 submitting a revision to the Connecticut State Implementation Plan.

(B) Section 22a-174-4(c)(1) of Connecticut Regulations for the Abatement of Air Pollution, under the section entitled "Recordkeeping and Reporting." Section 22a-174-4(c)(1) was previously numbered as 19-508-4(c)(1) in Connecticut's SIP. 19-508-4(c)(1) in Connecticut's SIP. 19-508-4 became effective in the State of Connecticut on October 31, 1977. Connecticut developed an emission statement program using the

Environmental Protection Agency

§ 52.370

existing regulatory authority given by section 22a-174-4(c)(1) under the section entitled "Reporting and Record-keeping".

(ii) *Additional information.* (A) State implementation Plan narrative entitled "Revision to State Implementation Plan for Air Quality Emission Statements" which addresses emission statement requirements not discussed specifically in Section 22a-174-4(c)(1).

(B) Nonregulatory portions of the submittal.

(67) [Reserved]

(68) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on March 24, 1994, May 20, 1994, and March 4, 1994.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated March 24, 1994 submitting a revision to the Connecticut State Implementation Plan.

(B) Letter from the Connecticut Department of Environmental Protection dated May 20, 1994 submitting a supplemental revision to the Connecticut State Implementation Plan.

(C) State Order No. 8073: State of Connecticut vs. City of New Haven (effective September 24, 1993) and attached plan titled "Remedial Action Plan for Prevention of Airborne Particulate Matter and Fugitive Discharge of Visible Emissions in the Alabama Street/East Shore Parkway Area of New Haven."

(D) State Order No. 8074: State of Connecticut vs. Waterfront Enterprises, Inc. (effective November 5, 1993) and attached plan titled "Proposed Operation Plan in Response to Unilateral Order (September 20, 1993)."

(E) State Order No. 8075: State of Connecticut vs. Laydon Construction, (effective September 21, 1993) and attached plan titled "Plan for Control of Fugitive Emissions of PM10 (September 21, 1993)."

(F) State Order No. 8076: State of Connecticut vs. United Illuminating Company (effective December 2, 1993) and attached plan titled "Remediation Plan for Fugitive Emissions: Alabama Street and Connecticut Avenue, New Haven, Connecticut (November 19, 1993)."

(G) State Order No. 8076c: State of Connecticut vs. M. J. Metals, Inc. (effective June 18, 1993).

(H) State Order No. 8078: State of Connecticut vs. New Haven Terminal, Inc. (effective November 15, 1993) and attached plan titled "Fugitive Dust Control Plan (Revised January 19, 1994)."

(I) State Order No. 8079: State of Connecticut vs. Yankee Gas Services Company (effective September 24, 1993) and attached plan titled "Revised Compliance Plan for Consent Order No. 8079 (August 31, 1993)."

(J) Letter from the Connecticut Department of Environmental Protection dated March 4, 1994 (received March 16, 1995) submitting two amendments to the Regulations of Connecticut State Agencies concerning abatement of air pollution: amended Sections 22a-174-24(f) and -24(g) "Connecticut primary and secondary ambient air quality standards for particulate matter" and amended Sections 22a-174-6(a) and -6(b) "'Air Pollution' emergency episode procedures" (both effective July 7, 1993).

(K) Amended Regulations of Connecticut State Agencies: amended Sections 22a-174-24(f) and -24(g) "Connecticut primary and secondary ambient air quality standards for particulate matter" and amended Sections 22a-174-6(a) and -6(b) "'Air Pollution' emergency episode procedures" (both effective July 7, 1993).

(ii) *Additional materials.* (A) An attainment plan and demonstration which outlines Connecticut's control strategy and for attainment and maintenance of the PM10 NAAQS, implements and meets RACM and RACT requirements, and provides contingency measures for New Haven.

(B) Nonregulatory portions of the submittal.

(69) Connecticut submitted the Oxygenated Gasoline Program and revisions on January 11, 1993, January 12, 1993, January 14, 1993, and August 1, 1995. This submittal satisfied the requirements of section 211(m) of the Clean Air Act, as amended.

(i) *Incorporation by reference.* (A) Letters dated January 11, 1993 and January 12, 1993 which included the oxygenated

gasoline program, Regulations of Connecticut State Agencies (RCSA) Section 22a-174-28, with an effective date of November 2, 1992.

(B) A letter dated January 14, 1993 requesting that the RCSA Section 22a-174-28, as submitted on January 11, 1993 and January 12, 1993, be adopted as part of Connecticut's SIP.

(C) A letter dated August 1, 1995, requesting that a revision to RCSA Section 22a-174-28(a), with an effective date of July 26, 1995, be approved and adopted as part of Connecticut's SIP.

(ii) *Additional materials.* (A) The Technical Support Document for the Redesignation of the Hartford Area as Attainment for Carbon Monoxide submitted on September 30, 1994.

(B) Nonregulatory portions of submittals.

(70) Revision to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on January 13, 1995.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated January 13, 1995 submitting a revision to the Connecticut State Implementation Plan.

(B) Amended Regulation of Connecticut State Agencies: amended Subsection 22a-174-3(k) "Abatement of air pollution—New Source Review" (effective December 2, 1994).

(ii) *Additional materials.* (A) Nonregulatory portions of the submittal.

(71) Revisions to the Connecticut State Implementation Plan (SIP) for carbon monoxide concerning the control of carbon monoxide from mobile sources, dated January 12, 1993, January 14, 1993, April 7, 1994, and August 1, 1995 submitted by the Connecticut Department of Environmental Protection (CT DEP).

(i) *Incorporation by reference.* (A) Letter dated August 1, 1995 which included the amendments and revisions to the Regulation of Connecticut State Agencies (RCSA), Section 22a-174-28(a) regarding the definition for the Southwestern Control Area and that portion of the definition of "control period" that applies to the Southwestern Control Area with an effective date of July 26, 1995.

(ii) *Additional materials.* (A) January 12, 1993 and April 7, 1994, VMT forecasts beginning with the year 1993 and including all subsequent years up to the year of attainment (1995).

(B) January 12, 1993 and April 7, 1994, Carbon Monoxide Attainment Demonstration and Contingency Measures.

(72) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on: May 18, 1995; August 21, 1995; January 17, 1996; January 30, 1996; January 30, 1996; January 30, 1996; January 30, 1996; June 17, 1996; June 20, 1996; June 24, 1996; July 9, 1996; July 11, 1996; February 18, 1997; March 20, 1997; March 24, 1997; March 24, 1997; March 24, 1997; March 24, 1997; March 24, 1997; April 22, 1997; April 22, 1997; May 19, 1997; May 19, 1997; and May 20, 1997.

(i) *Incorporation by reference.* (A) Twenty-four letters from the Connecticut Department of Environmental Protection dated: May 18, 1995; August 21, 1995; January 17, 1996; June 24, 1996; January 30, 1996; January 30, 1996; January 30, 1996; January 30, 1996; June 20, 1996; June 17, 1996; July 11, 1996; July 9, 1996; March 24, 1997; May 19, 1997; March 24, 1997; March 20, 1997; March 24, 1997; February 18, 1997; May 19, 1997; March 24, 1997; March 24, 1997; May 20, 1997; April 22, 1997; and April 22, 1997; submitting revisions to the Connecticut State Implementation Plan.

(B) Connecticut Trading Agreement and Order no. 8092 issued to United Illuminating Company's Station #3 in Bridgeport, effective on May 18, 1995.

(C) Connecticut Trading Agreement and No. 8095 issued to American Ref-Fuel Company of Southeastern Connecticut in Preston, effective on June 2, 1995.

(D) Connecticut Trading Agreement and Order no. 8093 issued to Pfizer, Inc., in Groton, effective on July 19, 1995.

(E) Connecticut Trading Agreement and Order no. 8096 issued to Food Ingredients Company in New Milford, effective on August 25, 1995.

(F) Connecticut Trading Agreement and Order no. 8106 issued to Connecticut Light and Power Company in Middletown, effective on October 10, 1995.

(G) Connecticut Trading Agreement and Order no. 8107 issued to Northeast

Environmental Protection Agency

§ 52.370

Nuclear Energy Company in Waterford, effective on October 13, 1995.

(H) Connecticut Trading Agreement and Order no. 8105 issued to Electric Boat Division of General Dynamics in Groton, effective on October 31, 1995.

(I) Connecticut Trading Agreement and Order no. 8100 issued to Bridgeport RESCO Company in Bridgeport, effective on November 2, 1995.

(J) Connecticut Trading Agreement and Order no. 8102 issued to United Illuminating's auxiliary boiler in New Haven, effective on December 15, 1995.

(K) Connecticut Trading Agreement and Order no. 8103 issued to United Illuminating Company's Station #4 in New Haven, effective on February 14, 1996.

(L) Connecticut Trading Agreement and Order no. 8119 issued to the City of Norwich, Department of Public Utilities, effective on March 4, 1996.

(M) Connecticut Trading Agreement and Order no. 8118 issued to South Norwalk Electric Works, South Norwalk, effective on March 19, 1996.

(N) Connecticut Trading Agreement and Order no. 8101 issued to the State of Connecticut Department of Mental Health and Addiction Services, effective on July 16, 1996.

(O) Connecticut Trading Agreement and Order no. 8110 issued to Yale University, effective on July 29, 1996.

(P) Connecticut Trading Agreement and Order no. 8132 issued to Bridgeport Hospital, effective on September 10, 1996.

(Q) Connecticut Trading Agreement and Order no. 1494 issued to Connecticut Light and Power, involving Branford, Cos Cob, Devon, Franklin Drive, Montville, Middletown, South Meadow, Torrington, Tunnel Road, and Norwalk Harbor Stations, effective on October 15, 1996.

(R) Connecticut Trading Agreement and Order no. 8130 issued to the State of Connecticut Department of Public Works, effective on October 18, 1996.

(S) Connecticut Trading Agreement and Order no. 8115 issued to the University of Connecticut in Storrs, effective on November 19, 1996.

(T) Connecticut Trading Agreement and Order no. 8113 issued to Simkins Industries, effective on November 19, 1996.

(U) Connecticut Trading Agreement and Order no. 8135 issued to Bridgeport Hydraulic Company, effective on December 24, 1996.

(V) Connecticut Trading Agreement and Order no. 8141 issued to the Town of Wallingford Department of Public Utilities, effective on December 27, 1996.

(W) Regulations 22a-174-22 "Control of Nitrogen Oxides Emissions," adopted on January 23, 1997, which establishes reasonably available control technology requirements for major stationary sources of nitrogen oxides.

(X) Connecticut Trading Agreement and Order no. 8123 issued to the Algonquin Gas Transmission Company, effective on April 18, 1997.

(Y) Connecticut Trading Agreement and Order no. 8116 issued to the Connecticut Resource Recovery Authority, effective on April 22, 1997.

(ii) *Additional materials.* (A) Letter, dated June 18, 1996, from Carmine DiBattista, Chief of the Bureau of Air Management for the Connecticut DEP, to Susan Studlien, Deputy Director of the Office of Ecosystem Protection at U.S. EPA, Region I.

(B) SIP narrative materials, dated May 1995, submitted with Connecticut Trading Agreement and Order no. 8092 for United Illuminating Company's Station #3 in New Haven.

(C) SIP narrative materials, dated August 3, 1995, submitted with Connecticut Trading Agreement and Order no. 8095 for American Ref-Fuel Company of Southeastern Connecticut in Preston.

(D) SIP narrative materials, dated December 1995, submitted with Connecticut Trading Agreement and Order no. 8093 issued to Pfizer, Inc., in Groton.

(E) SIP narrative materials, dated November 1995, submitted with Connecticut Trading Agreement and Order no. 8096 issued to Food Ingredients Company in New Milford.

(F) SIP narrative materials, dated November 1995, submitted with Connecticut Trading Agreement and Order no. 8106 issued to Connecticut Light and Power Company in Middletown.

(G) SIP narrative materials, dated November 1995, submitted with Connecticut Trading Agreement and Order

no. 8107 issued to Northeast Nuclear Energy Company in Waterford.

(H) SIP narrative materials, dated October 6, 1995, submitted with Connecticut Trading Agreement and Order no. 8105 issued to Electric Boat Division of General Dynamics in Groton.

(I) SIP narrative materials, dated September 29, 1995, submitted with Connecticut Trading Agreement and Order no. 8100 issued to Bridgeport RESCO Company in Bridgeport.

(J) SIP narrative materials, dated December 1995, submitted with Connecticut Trading Agreement and Order no. 8102 issued to United Illuminating's auxiliary boiler in New Haven.

(K) SIP narrative materials, dated March 1996, submitted with Connecticut Trading Agreement and Order no. 8103 issued to United Illuminating Company's Station #4 in Bridgeport.

(L) SIP narrative materials, dated May 31, 1995, submitted with Connecticut Trading Agreement and Order no. 8119 issued to the City of Norwich, Department of Public Utilities.

(M) SIP narrative materials, dated May 31, 1995, submitted with Connecticut Trading Agreement and Order no. 8118 issued to South Norwalk Electric Works, South Norwalk.

(N) SIP narrative materials, dated March 1997, submitted with Connecticut Trading Agreement and Order no. 8101 issued to the State of Connecticut Department of Mental Health and Addiction Services.

(O) SIP narrative materials, dated May 1997, submitted with Connecticut Trading Agreement and Order no. 8110 issued to Yale University.

(P) SIP narrative materials, dated March 1997, submitted with Connecticut Trading Agreement and Order no. 8132 issued to Bridgeport Hospital.

(Q) SIP narrative materials, dated March 1997, submitted with Connecticut Trading Agreement and Order no. 1494 issued to Connecticut Light and Power, involving Branford, Cos Cob, Devon, Franklin Drive, Montville, Middletown, South Meadow, Torrington, Tunnel Road, and Norwalk Harbor Stations.

(R) SIP narrative materials, dated March 1997, submitted with Connecticut Trading Agreement and Order

no. 8130 issued to the State of Connecticut Department of Public Works.

(S) SIP narrative materials, dated February 1996, submitted with Connecticut Trading Agreement and Order no. 8115 issued to the University of Connecticut in Storrs.

(T) SIP narrative materials, dated May 1997, submitted with Connecticut Trading Agreement and Order no. 8113 issued to Simkins Industries.

(U) SIP narrative materials, dated March 1997, submitted with Connecticut Trading Agreement and Order no. 8135 issued to Bridgeport Hydraulic Company.

(V) SIP narrative materials, dated March 1997, submitted with Connecticut Trading Agreement and Order no. 8141 issued to the Town of Wallingford Department of Public Utilities.

(W) SIP narrative materials, dated April 1997, submitted with Connecticut Trading Agreement and Order no. 8123 issued to the Algonquin Gas Transmission Company.

(X) SIP narrative materials, dated April 1997, submitted with Connecticut Trading Agreement and Order no. 8116 issued to the Connecticut Resource Recovery Authority.

(73) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on June 3, 1996.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated June 3, 1996, submitting a revision to the Connecticut State Implementation Plan.

(B) State Order No. 8036, dated May 6, 1996, for Risdon Corporation, effective on that date. The State order define and impose alternative RACT on certain VOC emissions at Risdon Corporation in Danbury, Connecticut.

(74) A revision to the Connecticut SIP regarding ozone monitoring. Connecticut will modify its SLAMS and its NAMS monitoring systems to include a PAMS network design and establish monitoring sites. Connecticut's SIP revision satisfies 40 CFR 58.20(f) PAMS requirements.

(i) *Incorporation by reference.* (A) PAMS SIP Commitment Narrative, which incorporates PAMS into the ambient air quality monitoring network

Environmental Protection Agency

§ 52.370

of State or Local Air Monitoring Stations (SLAMS) and National Air Monitoring Stations (NAMS).

(ii) *Additional material.* (A) Letter from the Connecticut Department of Environmental Protection dated March 2, 1995 submitting a revision to the Connecticut State Implementation Plan.

(75) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on January 5, 1994.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated January 5, 1994 submitting a revision to the Connecticut State Implementation Plan.

(B) Regulations sections 22a-174-20(s), "Miscellaneous Metal Parts and Products," sections 22a-174-20(v), "Graphic Arts Rotogravures and Flexography," sections 22a-174-20(ee), "Reasonably Available Control Technology for Large Sources," adopted and effective on November 18, 1993, which establish reasonably available control technology requirements for major stationary sources of volatile organic compounds.

(76) Revision to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on January 5, 1994.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated January 5, 1994 submitting a revision to the Connecticut State Implementation Plan.

(B) Regulation section 22a-174-32, "Reasonably Available Control Technology for Volatile Organic Compounds," adopted and effective on November 18, 1993, which establishes reasonably available control technology requirements for major stationary sources of volatile organic compounds.

(ii) *Additional materials.* (A) Letter from Connecticut dated June 27, 1994 clarifying language in section 22a-174-32(A).

(77) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on December 30, 1994, and May 8, 1998. This revision is for the purpose of satisfying the rate-of-progress

requirement of section 182(b) and the contingency measure requirements of sections 172(c)(9) and 182(c)(9) of the Clean Air Act, for the Greater Hartford serious ozone nonattainment area, and the Connecticut portion of the NY-NJ-CT severe ozone nonattainment area.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated December 30, 1994, submitting a revision to the Connecticut State Implementation Plan.

(B) Letter from the Connecticut Department of Environmental Protection dated May 8, 1998, submitting a revision to the Connecticut State Implementation Plan.

(78) Revision to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on June 24, 1998.

(i) *Incorporation by reference.* (A) State of Connecticut Regulation of Department of Environmental Protection Section 22a-174-27, Emission Standards for Periodic Motor Vehicle Inspection and Maintenance as revised on March 26, 1998.

(B) State of Connecticut Regulation of Department of Motor Vehicles Concerning Periodic Motor Vehicle Emissions Inspection and Maintenance Section 14-164c as revised on April 7, 1998.

(ii) *Additional materials.* (A) Letter from the Connecticut Department of Environmental Protection dated June 24, 1998 submitting a revision to the Connecticut State Implementation Plan.

(B) Letter from Connecticut Department of Environmental Protection dated November 13, 1998, submitting a revision to the Connecticut State Implementation Plan.

(79) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on February 7, 1996 and February 18, 1999.

(i) *Incorporation by reference.* (A) Connecticut regulation section 22a-174-36, entitled "Low Emission Vehicles" as dated and effective by determination of the Secretary of State on December 23, 1994.

(B) Connecticut regulation section 22a-174-36(g), entitled "Alternative Means of Compliance via the National

Low Emission Vehicle (LEV) Program” as dated and effective by determination of the Secretary of State on January 29, 1999.

(ii) *Additional material.* (A) Letter from the Connecticut Department of Environmental Protection dated February 7, 1996 submitting a revision to the Connecticut State Implementation Plan for the Low Emission Vehicle program.

(B) Letter from the Connecticut Department of Environmental Protection dated February 18, 1999 submitting a revision to the Connecticut State Implementation Plan for the National Low Emission Vehicle program to be a compliance option under the State’s Low Emission Vehicle Program.

(80) Revision to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on March 26, 1999.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated March 26, 1999, submitting a revision to the Connecticut State Implementation Plan.

(B) Regulation section 22a-174-22a, “The Nitrogen Oxides (NO_x) Budget Program” adopted on December 15, 1998, and effective on March 3, 1999. As of January 24, 2008, Section 22a-174-22a is superseded and shall have no prospective effect. Violations of Section 22a-174-22a that occur prior to January 24, 2008 shall continue to be subject to enforcement, including on or after January 24, 2008, in accordance with applicable law.

(ii) *Additional materials.* (A) Non-regulatory portions of the submittals.

(81) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on May 12, 1994.

(i) *Incorporation by reference.* (A) “Clean Fuel Fleet Substitute Plan,” prepared by the Connecticut Department of Environmental Protection, dated May 12, 1994.

(ii) *Additional materials.* (A) Letter from the Connecticut Department of Environmental Protection dated May 12, 1994 submitting a revision to the Connecticut State Implementation Plan.

(82) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on July 11, 1997, September 12, 1997, and December 8, 1997.

(i) *Incorporation by reference.* (A) Letters from the Connecticut Department of Environmental Protection dated July 11, 1997, September 12, 1997, and December 8, 1997, submitting revisions to the Connecticut State Implementation Plan.

(B) Trading Agreement and Order Number 8137 issued to AlliedSignal, Inc., and U.S. Army Tank-Automotive and Armaments Command in Stratford, effective on November 19, 1996.

(C) Trading Agreement and Order Number 8138 issued to Connecticut Natural Gas Corporation in Rocky Hill, effective on November 19, 1996.

(D) Trading Agreement and Order Number 8114 issued to Cytotec Industries, Inc., in Wallingford, effective on December 20, 1996.

(E) Modification to Trading Agreement and Order Number 8138 issued to Connecticut Natural Gas Corporation effective June 25, 1997.

(F) Modification to Trading Agreement and Order Number 8137 issued to AlliedSignal, Inc., and U.S. Army Tank-Automotive and Armaments Command in Stratford, effective July 8, 1997.

(G) Trading Agreement and Order Number 8094 issued to Ogden Martin Systems of Bristol, Inc., in Bristol, effective on July 23, 1997.

(ii) *Additional materials.* (A) Non-regulatory portions of the submittals.

(B) Policy materials concerning the use of emission credits from New Jersey at Connecticut sources.

(83) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on October 7, 1999 to discontinue the oxygenated gasoline program in the Connecticut portion of the New York—N. New Jersey—Long Island Area.

(i) *Incorporation by reference.* (A) CTDEP; “Abatement of Air Pollution: Oxygenated Gasoline.”

State Regulation 22a-174-28.

(ii) *Additional materials.* (A) Letter from the Connecticut Department of

Environmental Protection Agency

§ 52.370

Environmental Protection dated October 7, 1999 submitting a revision to the Connecticut State Implementation Plan.

(84) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on April 15, 1997, April 20, 1998, and September 2, 1999.

(i) *Incorporation by reference.* (A) Section 22a-174-1(97) of the Regulation of the Connecticut State Agencies, definition of the term "Volatile organic compound" or "VOC," effective in the State of Connecticut on December 22, 1997.

(B) Section 22a-174-20(b) of the Regulation of the Connecticut State Agencies, entitled "Loading of gasoline and other volatile organic compounds," effective in the State of Connecticut on April 1, 1998.

(C) Section 22a-174-20(1) of the Regulation of the Connecticut State Agencies, entitled "Metal cleaning," effective in the State of Connecticut on August 23, 1996.

(D) Section 22a-174-20(s) of the Regulation of the Connecticut State Agencies, "Miscellaneous metal parts and products," effective in the State of Connecticut on March 1, 1995.

(E) Section 22a-174-32 of the Regulation of the Connecticut State Agencies, entitled "Reasonably Available Control Technology (RACT) for volatile organic compounds," effective in the State of Connecticut on August 27, 1999.

(ii) *Additional materials.* (A) Letters from the Connecticut Department of Environmental Protection dated April 15, 1997, April 20, 1998, and September 2, 1999 submitting revisions to the Connecticut State Implementation Plan.

(85) [Reserved]

(86) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on September 30, 1999.

(i) *Incorporation by reference.* (A) Regulations of Connecticut State Agencies, Section 22a-174-22b, State of Connecticut Regulation of Department of Environmental Protection Concerning The Post-2002 Nitrogen Oxides (NO_x) Budget Program, which became effective on September 29, 1999.

(ii) *Additional materials.* (A) Letter from Connecticut Department of Environmental Protection dated September 30, 1999 submitting Regulations of Connecticut State Agencies, Section 22a-174-22b and associated administrative materials as a revision to the Connecticut State Implementation Plan.

(B) The SIP narrative "Connecticut State Implementation Plan Revision to Implement the NO_x SIP Call," dated September 30, 1999.

(C) Letter from Connecticut Department of Environmental Protection dated August 1, 2002.

(D) The SIP narrative "Connecticut State Implementation Plan Revision to Revise the State's NO_x Emissions Budget," dated July 22, 2002.

(iii) Section 22a-174-22b, State of Connecticut Regulation of Department of Environmental Protection Concerning The Post-2002 Nitrogen Oxides (NO_x) Budget Program, is fully enforceable up to and including April 30, 2010. As of May 1, 2010, Section 22a-174-22b is superseded and shall have no prospective effect. Violations of Section 22a-174-22b that occur prior to May 1, 2010 shall be subject to enforcement, including on or after May 1, 2010, in accordance with applicable law.

(87) [Reserved]

(88) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on May 19, 2000.

(i) *Incorporation by reference.* (A) Connecticut Trading Agreement and Order No. 8177 issued to Wisvest Bridgeport Harbor's Unit No. 3 in Bridgeport on May 31, 2000.

(B) Connecticut Trading Agreement and Order No. 8187 issued to Wisvest Bridgeport Harbor's Unit No. 2 on January 12, 2000.

(C) Connecticut Trading Agreement and Order No. 8094, Modification No. 2, issued to Ogden Martin Systems of Bristol, Inc. on May 22, 2000.

(D) Connecticut Trading Agreement and Order No. 8095, Modification No. 2, issued to American Ref-Fuel Company of Southeastern Connecticut in Preston on May 22, 2000.

(E) Connecticut Trading Agreement and Order No. 8100, Modification No. 2, issued to Bridgeport Resco Company,

Limited Partnership in Bridgeport on May 22, 2000.

(F) Connecticut Trading Agreement and Order No. 8116, Modification No. 2, issued to the Connecticut Resources Recovery Authority in Hartford on May 22, 2000.

(G) Connecticut Trading Agreement and Order No. 8178 issued to Wisvest's New Haven Harbor's auxiliary boiler in New Haven on May 22, 2000.

(H) Connecticut Trading Agreement and Order No. 8179 issued to Wisvest's Bridgeport Harbor's Unit No. 4 on May 22, 2000.

(I) Connecticut Trading Agreement and Order No. 8176, issued to Wisvest's New Haven Harbor Station's Unit No. 1 in New Haven on May 31, 2000.

(ii) *Additional materials.* (A) Letter from the Connecticut Department of Environmental Protection dated May 19, 2000, submitting a revision to the Connecticut State Implementation Plan.

(B) SIP narrative materials, dated December 1999, submitted with Connecticut Trading Agreement and Order Nos. 8176, 8177, 8178, 8179, and 8187.

(89) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on November 16, 1999.

(i) *Incorporation by reference.* (A) Subsection (b) of Section 14–164c–11a of the Regulations of Connecticut State Agencies Concerning Emissions Repairs Expenditure Requirement to Receive Waiver, adopted and effective June 24, 1999.

(ii) *Additional materials.* (A) Letter from Connecticut Department of Environmental Protection dated November 19, 1999 submitting a revision to the Connecticut State Implementation Plan.

(B) Narrative portion of the Revision to State Implementation Plan for Enhanced Motor Vehicle Inspection and Maintenance Program, dated October 7, 1999.

(90) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on October 15, 2001, to incorporate the nitrogen oxide limits and related regulatory provisions of regulation 22a–174–38, Municipal Waste Combustors.

(i) *Incorporation by reference.* (A) The nitrogen oxide emission limits and related regulatory provisions of State of Connecticut Regulation of Department of Environmental Protection Section 22a–174–38, Municipal Waste Combustors effective October 26, 2000, included in sections 22a–174–38 (a), (b), (c), (d), (i), (j), (k), (l), and (m).

(B) Section 22a–174–38, subsections (a), (c), (d), (i), (j), (k), and (l) were revised as published in the Connecticut Law Journal, volume 78, no. 17, on October 25, 2016. Subsection (d) is removed from the SIP without replacement. See paragraph (116)(i)(A).

(ii) *Additional material.* (A) Letter from the Connecticut Department of Environmental Protection dated October 15, 2001, submitting a revision to the Connecticut State Implementation Plan.

(91) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on June 14, 2002.

(i) *Incorporation by reference.* (A) Connecticut's amendments to Section 22a–174–1, *Definitions* except for the following sections: (4), (18), (20), (29), (44), (45), (60), (111), (112) and, (117). These regulations are effective in the state of Connecticut on March 15, 2002.

(B) Connecticut's new Section 22a–174–2a, *Procedural Requirements for New Source Review and Title V Permitting* except for the following sections: (a)(1) through (6); (b)(1) through (4); introduction to (b)(5); (b)(5)(D), (F) and, the last sentence of (G); (b)(9); (c)(2); clause after first comma “ * * * or order pursuant to section 22a–174–33(d) of regulations of Connecticut State Agency * * * ” in the introduction to (c)(6); (c)(6)(B) and (C); clause after first comma “ * * * or order pursuant to section 22a–174–33(d) of Regulations of Connecticut State Agencies * * * ” in (c)(9); reference to “Title V” in title of (d); (d)(4)(A) through (D); (d)(7)(A) through (D); (d)(8)(A) and (B); reference to “Title V” in title of (e); (e)(2)(A) and (B); (e)(3)(D); (e)(5)(A) through (F); reference to “Title V permit” in (e)(6); reference to “22a–174–33” in first clause of introduction to (f)(2); (f)(2)(F); (f)(5); (f)(6); (g)(1) and (2); (h)(1) through (3)

and; (i)(1) through (3). These regulations are effective in the state of Connecticut on March 15, 2002.

(C) Connecticut's new Section 22a-174-3a, *Permit to Construct and Operate Stationary Sources* except for the following sections: (a)(1)(C); (c)(1)(H); (d)(3)(J) and (M); references to "Dioxin," "PCDDs" and, "PCDFs" in Table 3a(i)-1 of (i)(1) and; (m)(1) through (8). These regulations are effective in the state of Connecticut on March 15, 2002.

(ii) *Additional materials.* (A) Letter from the Connecticut Department of Environmental Protection dated June 14, 2002 submitting a revision to the Connecticut State Implementation Plan.

(92)-(94) [Reserved]

(95) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on December 1, 2004 and April 4, 2006.

(i) *Incorporation by reference.* (A) Section 22a-174-30 of the Connecticut Regulations for the Abatement of Air Pollution, entitled "Dispensing of Gasoline/Stage I and Stage II Vapor Recovery," effective in the State of Connecticut on May 10, 2004, with the exception of subsection (c)(5), which Connecticut did not submit as part of the SIP revision.

(B) Section 22a-174-3b of the Connecticut Regulations for the Abatement of Air Pollution, entitled "Exemptions from Permitting for Construction and Operation of External Combustion Units, Automotive Refinishing Operations, Emergency Engines, Nonmetallic Mineral Processing Equipment and Surface Coating Operations," effective in the State of Connecticut on April 4, 2006, except for the following subsections which Connecticut did not submit as part of the SIP revision: (a)(1), (5), (6), (7), (10), (11), (12), (15), (17); (b)(1) for an external combustion unit, nonmetallic mineral processing equipment, an emergency engine or a surface coating operation; (b)(2) for an external combustion unit, nonmetallic mineral processing equipment, an emergency engine or a surface coating operation; (c) External combustion unit; (e) Emergency engine; (f) Non-metallic mineral processing equip-

ment; (g) Surface coating operation; and (h) Fuel sulfur content.

(C) [Reserved]

(D) Regulation 22a-174-30, which was approved in paragraph (c)(95)(i)(A), is removed and replaced by Regulation 22a-174-30a, see paragraph (c)(117)(i)(B).

(ii) *Additional materials.* (A) Pressure Vacuum Vent Cap Test Procedures

(B) Table 1 showing the emission reductions resulting from the measures Connecticut adopted to meet the shortfall identified in the Connecticut one-hour ozone attainment demonstration.

(C) Nonregulatory portions of the submittal.

(96) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on April 30, 2002, and October 17, 2002.

(i) *Incorporation by reference.* (A) Consent Order No. 8229A issued by the Connecticut Department of Environmental Protection to Hitchcock Chair Company, Ltd., on April 15, 2002.

(B) Consent Order No. 8190 issued by the Connecticut Department of Environmental Protection to Kimberly Clark Corporation on April 23, 2002.

(C) Consent Order No. 8200 issued by the Connecticut Department of Environmental Protection to Watson Laboratories, Inc., on October 3, 2002.

(D) Consent Order No. 8237 issued by the Connecticut Department of Environmental Protection to Ross & Roberts, Inc., on October 4, 2002.

(E) State Order No. 8200, which was approved in paragraph (c)(96)(i)(C), is removed without replacement; see paragraph (c)(115)(i)(I).

(ii) *Additional materials.* (A) Nonregulatory portions of the submittal.

(97) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on April 26, 2007 and September 12, 2007.

(i) *Incorporation by reference.* (A) Regulations of Connecticut State Agencies (RCSA) section 22a-174-22c entitled "The Clean Air Interstate Rule (CAIR) Nitrogen Oxides (NO_x) Ozone Season Trading Program," effective in the State of Connecticut on September 4, 2007.

(B) Section 22a-174-22c, subsection (g)(3) is removed from the SIP without

replacement effective December 22, 2016. See paragraph (116)(i)(B).

(98) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on December 19, 2007.

(i) *Incorporation by reference.* (A)(1) Connecticut Department of Environmental Protection Regulations entitled “Emission standards and on-board diagnostic II test requirements for periodic motor vehicle inspection and maintenance” at section 22a–174–27 (effective in the State of Connecticut on August 25, 2004).

(2) In revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on January 22, 2010 section 22a–174–27 (e) was repealed by the State of Connecticut effective August 10, 2009. Section 22a–174–27 (e), which was approved in paragraph (c)(98)(i)(A)(1), is removed from the SIP without replacement; see paragraph (c)(105)(i)(B) of this section.

(B) Connecticut Department of Motor Vehicles Regulation entitled “Periodic Motor Vehicle Emissions Inspection and Maintenance” at section 14–164c–1a to Section 14–164c–18a (effective in the State of Connecticut on May 28, 2004).

(99) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on February 9, 2011.

(i) *Incorporation by reference.* (A) The additions of subsections (21) and (49) to Section 22a–174–1, effective January 28, 2011.

(B) The revisions to Sections 22a–174–3a(a)(1)(H) through (J), Sections 22a–174–3a(d)(3)(H), Sections 22a–174–3a(j)(1)(E) through (I), Sections 22a–174–3a(k)(1) through (k)(2), and Sections 22a–174–3a(k)(4), effective January 28, 2011.

(100) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on February 1, 2008 and January 8, 2009.

(i) *Incorporation by reference.* (A) State of Connecticut Regulation, Section 22a–174–20(k), Restrictions on VOC Emissions from Cutback and Emulsified Asphalt (excluding the text that appears in brackets), effective in

the state of Connecticut on January 1, 2009.

(B) A letter from Barbara Sladeck, RLS Assistant Coordinator, Office of the Secretary of the State, State of Connecticut, to Hon. Gina McCarthy, Commissioner, Department of Environmental Protection, dated July 26, 2007, stating that the effective date of the Amendment of Section 22a–174–20(1), Metal Cleaning, and Adoption of Section 22a–174–41, pertaining to Architectural and Industrial Maintenance Products, is July 26, 2007.

(C) State of Connecticut Regulation, Section 22a–174–20(1), Metal Cleaning, effective in the state of Connecticut on July 26, 2007, revisions to the following provisions (including the text that appears in underline and excluding the text that appears in brackets): Sections 22a–174–20(1)(1)(A) through (C) and (J) through (L), Sections 22a–174–20(1)(3), (A) through (D), (F) through (H), and (J) through (L), Sections 22a–174–20(1)(5) introductory text, (B), (E), and (M), and Section 22a–174–20(1)(6); and addition of Sections 22a–174–20(1)(7) through (9).

(D) State of Connecticut Regulation, Section 22a–174–41, Architectural and Industrial Maintenance Products, effective in the state of Connecticut on July 26, 2007.

(101) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on July 20, 2007, consisting of orders establishing reasonably available control technology for volatile organic compound emissions for Sumitomo Bakelite North America, Cyro Industries, and Curtis Packaging.

(i) *Incorporation by reference.* (A) State of Connecticut vs. Sumitomo Bakelite North America, Inc., Consent Order No. 8245, issued as a final order on October 11, 2006.

(B) State of Connecticut and Cyro Industries, Consent Order No. 8268, issued as a final order on February 28, 2007.

(C) State of Connecticut vs. Curtis Packaging Corporation, Consent Order No. 8270, issued as a final order on May 1, 2007.

(102) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental

Environmental Protection Agency

§ 52.370

Protection on November 18, 2008, April 29, 2010, and November 21, 2012.

(i) *Incorporation by reference.* (A) Regulations of Connecticut State Agencies (RCSA) Section 22a-174-20, as published in the Connecticut Law Journal on May 18, 2010, effective April 6, 2010:

(1) The amendment of subdivision (f)(9);

(2) The withdrawal of subsection (g);

(3) The amendment of subdivisions (1)(1) and (1)(2);

(4) The amendment of subsections (p) Metal furniture coatings, (q) Paper, film, and foil coating;

(5) The amendment of subparagraph (s)(2)(B);

(6) The amendment of subsection (ee) Reasonably available control technology for large sources;

(7) The addition of subsection (ff) Flexible package printing, with the exception of the phrases “or other method approved by the commissioner” in subparagraph (ff)(1)(K) and “or alternative method as approved by the commissioner” in clause (ff)(5)(B)(vi);

(8) The addition of subsection (gg) Offset lithographic printing and letterpress printing, with the exception of the phrases “or other method approved by the commissioner” in subparagraph (gg)(1)(O) and “or alternative method as approved by the commissioner” in clause (gg)(7)(B)(vi);

(9) The addition of subsection (hh) Large appliance coatings, with the exception of the phrases “or other method approved by the commissioner” in subparagraph (hh)(1)(CC) and “or alternative method as approved by the commissioner” in clause (hh)(7)(B)(vi);

(10) The addition of (ii) Industrial solvent cleaning, with the exception of the phrases “or other method approved by the commissioner” in subparagraph (ii)(1)(I) and “or alternative method as approved by the commissioner” in clause (ii)(6)(B)(vi); and

(11) The addition of (jj) Spray application equipment cleaning, with the exception of the phrase “or other method approved by the commissioner” in subparagraph (jj)(1)(H), the exception of subparagraph (jj)(3)(D), and the exception of the phrase “or alternative method as approved by the commissioner” in clause (JJ)(6)(B)(vii).

(B) Regulations of Connecticut State Agencies (RCSA) Section 22a-174-20, as published in the Connecticut Law Journal on December 4, 2012, effective October 31, 2012:

(1) The amendment of subsection(s) Miscellaneous metal parts and products;

(2) The amendment of subdivisions (aa)(1), (cc)(2), and (cc)(3);

(3) The amendment of subparagraph (ii)(3)(A); and

(4) The addition of subdivision (kk) Pleasure craft coatings.

(C) Regulations of Connecticut State Agencies (RCSA) Section 22a-174-40 entitled “Consumer Products,” with the exception of subdivisions (4) through (7) in subsection (c) and the exception of subparagraphs (C) and (D) in subdivision (f)(2), effective July 26, 2007.

(D) Regulations of Connecticut State Agencies (RCSA) section 22a-174-44, entitled “Adhesives and Sealants,” effective October 3, 2008.

(103) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on November 18, 2009, and Connecticut Department of Energy and Environmental Protection on March 12, 2012.

(i) *Incorporation by reference.* (A) Regulations of Connecticut State Department of Environmental Protection Section 22a-174, effective December 28, 2000; as published in the Connecticut Law Journal on January 23, 2001.

(1) Section 22a-174-19a, “Control of sulfur dioxide emissions from power plants and other large stationary sources of air pollution,” with the following exceptions which Connecticut did not submit as part of the SIP revision because they are not applicable to the Connecticut Alternative to Best Available Retrofit Technology (BART) program:

(i) Section 22a-174-19a(a)(5);

(ii) Section 22a-174-19a(a)(8);

(iii) Section 22a-174-19a(a)(11);

(iv) In Section 22a-174-19a(a)(13); the sentence “Early reduction credits shall qualify as SO₂ DERCs.”;

(v) Section 22a-174-19a(d);

(vi) Section 22a-174-19a(e)(4);

(vii) Section 22a-174-19a(f) through 19a(h); and

(viii) In Section 22a-174-19a(i)(2), the reference to “or (e)(4).”

(2) Section 22a-174-19a(c) which was approved in paragraph (c)(103)(i)(A)(1), is removed without replacement; see paragraph (c)(111)(i)(B).

(3) Section 22a-174-22, “Control of nitrogen oxide emissions,” subsection (e)(3).

(B) Connecticut General Statute, Title 16a “Planning and Energy Policy,” Chapter 296 “Operation of Fuel Supply Business,” Section 16a-21a, “Sulfur content of home heating oil and off-road diesel fuel. Suspension of requirements for emergency,” effective June 2, 2008, as published in the State of Connecticut General Statutes, Revision of 1958, Revised to 2009.

(C) Connecticut General Statute Section 16a-21a, which was approved in paragraph (c)(103)(i)(B) of this section, is removed and replaced by Connecticut General Statute 16a-21a, see paragraph (c)(118)(i)(A) of this section.

(ii) *Additional materials.* (A) The Connecticut Department of Environmental Protection document, “Connecticut Regional Haze SIP Revision, Final, November 2009.”

(B) The Connecticut Department of Energy and Environmental Protection letter “Clarification of Connecticut’s 2008 PM_{2.5} Attainment Demonstration,” dated March 12, 2012, signed by Anne Gobin.

(C) The Connecticut Department of Energy and Environmental Protection letter “Regional Haze State Implementation Plan,” dated February 24, 2012, signed by Anne Gobin.

(D) The Connecticut Department of Energy and Environmental Protection letter “Withdrawal of Request for Parallel Processing,” dated November 23, 2012, signed by Anne R. Gobin.

(104) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on December 1, 2004.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated December 1, 2004 submitting a revision to the Connecticut State Implementation Plan.

(B) Regulations of Connecticut State Agencies, Section 22a-174, Abatement

of Air Pollution Regulations, amended April 1, 2004:

(1) Section 22a-174-4 “Source monitoring, recordkeeping and reporting.”

(2) Section 22a-174-7 “Air pollution control equipment and monitoring equipment operation.”

(3) Section 22a-174-18 “Control of particulate matter and visible emissions,” with the exception of the phrase “or malfunction” in Section 22a-174-18(j)(1) and all of Section 22a-174-18(j)(2), which CT DEEP withdrew from the SIP submittal.

(4) Previously approved on July 16, 2014 in paragraph (c)(104)(B)(I) of this section and now deleted with replacement in paragraph (c)(131)(i)(A) of this section, as regulation 22a-174-4a.

(ii) *Additional materials.* (A) Letter from CT DEEP dated January 14, 2013, entitled “Information to Support EPA’s Approval of Connecticut’s Requirements for Opacity.”

(B) Letter from CT DEEP dated July 8, 2013, withdrawing from CT DEEP’s December 1, 2004 SIP revision the phrase “and malfunction” from Subsection (j)(1) of RCSA Section 22a-174-18.

(C) Letter from CT DEEP dated March 27, 2014, withdrawing from CT DEEP’s December 1, 2004 SIP revision Section 22a-174-18(j)(2).

(105) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on January 22, 2010.

(i) *Incorporation by reference.* (A) Regulations of Connecticut State Agencies (RCSA) section 22a-174-36b entitled “Low Emission Vehicles II Program,”

(1) Regulations of Connecticut State Agencies (RCSA) section 22a-174-36b entitled “Low Emission Vehicles II Program,” effective December 22, 2005, revisions to the following provisions (including the text that appears in underline): Sections 22a-174-36b (a), (b), (d), (f) through (j), (l), (m), (n), and (o).

(2) Regulations of Connecticut State Agencies (RCSA) section 22a-174-36b entitled “Low Emission Vehicles II Program,” effective August 10, 2009, revisions to the following provisions: Sections 22a-174-36b (c), (e), and (k), as published in the Connecticut Law Journal on September 8, 2009.

(B) Regulations of Connecticut State Agencies (RCSA) section 22a-174-27 entitled "Emission standards and on-board diagnostic II test requirements for periodic motor vehicle inspection and maintenance," effective August 10, 2009, revisions to Section 22a-174-27 (b), as published in the Connecticut Law Journal on September 8, 2009.

(106) Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on April 22, 2014.

(i) *Incorporation by reference.* (A) Regulations of Connecticut State Agencies Section 22a-174-1(10) and (88), as published in the Connecticut Law Journal on July 1, 2014, effective April 15, 2014.

(B) Regulations of Connecticut State Agencies Section 22a-174-3a(k)(5), as published in the Connecticut Law Journal on July 1, 2014, effective April 15, 2014.

(C) Regulations of Connecticut State Agencies Section 22a-174-24, "Connecticut primary and secondary ambient air quality standards," with the exceptions of subsections (a), (c), (g), (j), and (m), as published in the Connecticut Law Journal on July 1, 2014, effective April 15, 2014.

(D) Regulations of Connecticut State Agencies (RCSA) Section 22a-174-28 (a)(5), as published in the Connecticut Law Journal on July 1, 2014, effective April 15, 2014.

(107) Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on September 27, 2012.

(i) *Incorporation by reference.* (A) Regulations of Connecticut State Agencies Section 22a-174-2a(b)(5) introductory text and Section 22a-174-2a(b)(5)(E), as published in the Connecticut Law Journal on October 23, 2012, effective September 10, 2012.

(B) Regulations of Connecticut State Agencies Section 22a-174-2a(b)(6), as published in the Connecticut Law Journal on October 23, 2012, effective September 10, 2012.

(108) Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on October 9, 2012.

(i) *Incorporation by reference.* (A) Regulations of Connecticut State Agencies Section 22a-174-1(62), as published in the Connecticut Law Journal on October 16, 2012, effective September 10, 2012.

(B) Regulations of Connecticut State Agencies Section 22a-174-3a(i), Table 3a(i)-1, published in the Connecticut Law Journal on October 16, 2012, effective September 10, 2012.

(C) Regulations of Connecticut State Agencies revisions to Section 22a-174-3a(k), Table 3a(k)-1, published in the Connecticut Law Journal on October 16, 2012, effective September 10, 2012.

(D) Regulations of Connecticut State Agencies revisions to Section 22a-174-3a(k), Table 3a(k)-2, published in the Connecticut Law Journal on October 16, 2012, effective September 10, 2012.

(E) Regulations of Connecticut State Agencies revisions to Section 22a-174-3a (l)(1), published in the Connecticut Law Journal on October 16, 2012, effective September 10, 2012.

(F) Regulations of Connecticut State Agencies revisions to Section 22a-174-3a(l)(4)(B) introductory text and Section 22a-174-3a(l)(4)(B)(iv), published in the Connecticut Law Journal on October 16, 2012, effective September 10, 2012.

(109) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on October 31, 2012.

(i) *Incorporation by reference.* (A) Connecticut Trading Agreement and Order No. 8187, Modification 1 issued to PSEG Power Connecticut LLC on July 16, 2012.

(B) Connecticut Trading Agreement and Order No. 8242, Modification 1 issued to PSEG Power Connecticut LLC on July 16, 2012.

(110) Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on April 8, 2014.

(i) *Incorporation by reference.* (A) Regulations of Connecticut State Agencies, revisions to Section 22a-174-20(a), as published in the Connecticut Law Journal on May 6, 2014, effective March 7, 2014:

(1) 22a-174-20(a);

(2) 22a–174–20(b)(2), (b)(3), (b)(4), and (b)(17);

(3) 22a–174–20(c); and

(4) 22a–174–20(x)(12).

(B) Regulations of Connecticut State Agencies, Subsection (b)(1) of Section 22a–174–20 is removed without replacement, as published in the Connecticut Law Journal on May 6, 2014, effective March 7, 2014.

(11) Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on April 22, 2014.

(i) *Incorporation by reference.* (A) Amendments to Regulations of Connecticut State Agencies (RCSA) as published in the Connecticut Law Journal on June 24, 2014, effective April 15, 2014.

(1) Revised Section 22a–174–19.

(2) Revised Section 22a–174–19a(e).

(3) Revised Section 22a–174–19a(i).

(4) Section 22a–174–19b with the exception of subsection (e), which was not submitted by the State.

(5) Revised Section 22a–174–5(b)(1).

(B) RCSA Section 22a–174–19a(c) which was approved in paragraph (c)(103)(i)(A)(1), is removed without replacement.

(ii) *Additional materials.* [Reserved]

(12) Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on December 28, 2007; September 4, 2008; September 18, 2009; October 13, 2011; December 28, 2012; January 2, 2013; and May 30, 2013.

(i) [Reserved]

(ii) *Additional materials.* (A) The Connecticut Department of Energy and Environmental Protection document, “Adequacy Determination of the Connecticut State Implementation Plan with Regard to Clean Air Act Section 110(a)(1) and (2) for the 8-Hour Ozone National Ambient Air Quality Standard Program Infrastructure,” Final, December 28, 2007.

(B) The Connecticut Department of Energy and Environmental Protection document, “Adequacy Determination of the Connecticut State Implementation Plan for Clean Air Act Section 110(a) Infrastructure Elements: 1997 National Ambient Air Quality Standard for Fine Particulate Matter,” Final, September 4, 2008.

(C) The Connecticut Department of Energy and Environmental Protection document, “Adequacy Determination of the Connecticut State Implementation Plan with Regard to Clean Air Act Section 110(a)(1) and (2) for the 2006 Fine Particulate Matter National Ambient Air Quality Standard,” Final, September 18, 2009.

(D) The Connecticut Department of Energy and Environmental Protection document, “Request to Withdraw a Portion of Connecticut’s PM_{2.5} Infrastructure Adequacy Determination,” January 7, 2011.

(E) The Connecticut Department of Energy and Environmental Protection document, “Addendum to the CAA §110(a)(2)(D)(i)(I) Portion of Connecticut’s Infrastructure Submittal for the 2006 PM_{2.5} NAAQS,” August 19, 2011.

(F) The Connecticut Department of Energy and Environmental Protection document, “Adequacy Determination of the Connecticut State Implementation Plan with Regard to Clean Air Act Section 110(a)(1) and

(2) for the 2008 Lead National Ambient Air Quality Standard,” Final, October 13, 2011.

(G) The Connecticut Department of Energy and Environmental Protection document, “Update to Connecticut PM_{2.5} Infrastructure Submittals,” June 15, 2012.

(H) The Connecticut Department of Energy and Environmental Protection document, “Connecticut State Implementation Plan with Regard to the Infrastructure Requirements of Clean Air Act Section 110(a)(1) and 110(s)(2) for the 2008 Ozone National Ambient Air Quality Standards, Final, December 28, 2012.

(I) The Connecticut Department of Energy and Environmental Protection document, “Connecticut State Implementation Plan with Regard to the Infrastructure Requirements of Clean Air Act Section 110(a)(1) and 110(a)(2) for the 2010 Nitrogen Dioxide National Ambient Air Quality Standards, Final, January 2, 2013.

(J) The Connecticut Department of Energy and Environmental Protection document, “Connecticut State Implementation Plan for Clean Air Act Section 110(a) Infrastructure Elements: 2010 Sulfur Dioxide National Ambient

Environmental Protection Agency

§ 52.370

Air Quality Standard, Final, May 30, 2013.

(K) The Connecticut Department of Energy and Environmental Protection letter, "Supplement to Infrastructure State Implementation Plan (SIP) Revisions," August 5, 2015.

(113) Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on November 19, 2012 and December 14, 2015.

(i) *Incorporation by reference.* (A) Section 19-508-17, "Control of Open Burning," which was approved in the March 1972 plan (see paragraph (b)) is removed and replaced with the following:

(1) Connecticut General Statute, Title 22A "Environmental Protection," Chapter 446c "Air Pollution Control," Section 22a-174 "(Formerly Sec. 19-508). Powers of the commissioner. Regulations. Fees. Exemptions. General permits. Appeal of commissioner's action re permit applications," paragraph (f), effective March 30, 2000, as published in the General Statutes of Connecticut, revision of 1958, revised to January 1, 2015, volume 8.

(2) Regulations of Connecticut State Agencies (RCSA) section 22a-174-1 entitled "Definitions," revisions to Section 22a-174-1(19), as published in the Connecticut Law Journal on July 1, 2014.

(B) [Reserved]

(ii) *Additional materials.* [Reserved]

(114) [Reserved]

(115) Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on July 1, 2004, January 13, 2006, November 15, 2011, and July 15, 2016.

(i) *Incorporation by reference.* (A) State of Connecticut vs. Mallace Industries Corporation, Consent Order No. 8258, issued as a final order on September 13, 2005.

(B) State of Connecticut vs. Hamilton Sundstrand, a United Technologies Company, Order No. 8029A, issued as a final order on September 3, 2009.

(C) State Order No. 8011, and attached Compliance Timetable and Appendix A (allowable limits by product classification) for Dow Chemical, U.S.A. in Gales Ferry, Connecticut, issued as State Order No. 8011, effective

on October 27, 1988, and approved in paragraph (c)(48)(i)(B) is removed without replacement.

(D) State Order No. 8014, and attached Compliance Timetable for Pratt & Whitney Division of United Technologies Corporation in East Hartford, Connecticut, issued as State Order No. 8014, effective on March 22, 1989, and approved in paragraph (c)(51)(i)(B) is removed without replacement.

(E) State Order No. 8021, and attached Compliance Timetable, and Appendix A (allowable limits on small, uncontrolled vents and allowable outlet gas temperatures for surface condensers) for Pfizer, Incorporated in Groton, Connecticut, issued as State Order No. 8021, effective on December 2, 1988, and approved in paragraph (c)(52)(i)(B) is removed without replacement.

(F) State Order No. 8009, and attached Compliance Timetable, Appendix A, Appendix B, and Appendix C for Uniroyal Chemical Company, Inc. in Naugatuck, Connecticut, issued as State Order No. 8009, effective on September 5, 1989, and approved in paragraph (c)(53)(i)(B), is removed without replacement.

(G) State Order No. 8032, and attached Compliance Timetable for the Heminway & Bartlett Manufacturing Company in Watertown, Connecticut, issued as State Order No. 8032, effective on November 29, 1989, and approved in paragraph (c)(55)(i)(B), is removed without replacement.

(H) State Order No. 8010, for Sikorsky Aircraft Corporation, effective on January 29, 1990, as well as Addendum A and Addendum B to Order No. 8010, effective on February 7, 1996 and September 29, 1995, respectively, issued as State Order No. 8010, and two addenda, define and impose RACT on certain VOC emissions at Sikorsky Aircraft Corporation in Stratford, Connecticut, and approved in paragraph (c)(60)(i)(B) is removed without replacement.

(I) State Order No. 8200, issued by the Connecticut Department of Environmental Protection to Watson Laboratories, Inc., effective October 3, 2002, and approved in paragraph (c)(96)(i)(C) is removed without replacement.

(ii) *Additional materials.* [Reserved]

(116) Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on September 16, 2016, and January 24, 2017.

(i) *Incorporation by reference.* (A) Regulations of Connecticut State Agencies, Administrative Regulation of the Department of Energy and Environmental Protection, Municipal Waste Combustors, revisions to section 22a-174-38 as published in the Connecticut Law Journal, volume 78, no. 17, on October 25, 2016.

(1) Subsection (c), subdivision (8);

(2) Subsection (c), subdivisions (16), and (17);

(3) Subsection (d);

(4) Subsection (i), subdivisions (4)(E) and (J);

(5) Subsection (i), subdivision (5);

(6) Subsection (j), subdivision (4);

(7) Subsection (k), subdivision (9) with the exceptions of the phrase “particulate matter, opacity, cadmium, lead, mercury, dioxin/furan emissions, hydrogen chloride, fugitive ash and” and the sentence “The maximum demonstrated municipal waste combustor unit load and maximum demonstrated particulate matter control device temperature shall be recorded for the initial performance test for dioxin/furan emissions for each particulate matter control device.”; and subdivision (10), with the exceptions of the phrase “for particulate matter, cadmium, lead, mercury, dioxin/furan emissions, hydrogen chloride, fugitive ash and” and the sentence “The maximum demonstrated municipal waste combustor unit load and maximum demonstrated particulate matter control device temperature (for each particulate matter control device) shall be recorded for the initial performance test for dioxin/furan emissions.”

(8) Subsection (l), subdivision (3)(A)(i) with the exception of the phrase “particulate matter, opacity, cadmium, lead, mercury, dioxin/furan emissions, hydrogen chloride, fugitive ash and”; (3)(A)(ii), with the exceptions of the term “sulfur dioxide” and the phrase “carbon monoxide, municipal waste combustor unit load, particulate matter control device inlet temperature and”; (3)(A)(iv); (3)(A)(v), with the exceptions of the term “sulfur dioxide”

the phrase “carbon monoxide, municipal waste combustor unit load, particulate matter control device temperature and” and the phrase “carbon mass feed rate and”; (3)(A)(vi), with the exceptions of the term “sulfur dioxide” the phrase “carbon monoxide, municipal waste combustor unit load, particulate matter control device temperature and” and the phrase “carbon mass feed rate and”; (B), with the exception of the phrase “and (A)(iii)”; and (C).

(9) Subsection (l), subdivision (6), with the exceptions of the phrase “particulate matter, opacity, cadmium, lead, mercury, dioxin/furan emissions, hydrogen chloride” and the term “or fugitive ash”.

(10) Subsection (a).

(B) Regulation of the Department of Energy and Environmental Protection Concerning NO_x Emissions from Fuel-Burning Emission Units, effective December 22, 2016.

(1) Section 22a-174-22e, Control of nitrogen oxides emissions from fuel-burning equipment at major stationary sources of nitrogen oxides, with the exception of, within paragraph (1)(7), the phrase “or under procedures in RCSA section 22a-174-5(d).”;

(2) Section 22a-174-22f, High daily NO_x emitting units at non-major sources of NO_x;

(3) Section 22a-174-18,, revised subsection (j)(6);

(4), Section 22a-174-8(b)(2);

(5) Section 22a-174-22c, subsection (g)(3);

(6) Section 22a-174-38, revised subsections (b)(1) through (6).

(117) Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on September 14, 2015.

(i) *Incorporation by reference.* (A) “Control of Organic Compound Emissions,” Regulation 22a-174-20, the sections listed below, effective July 8, 2015, as published in the Connecticut Law Journal on November 24, 2015.

(1) Section 20(a)(7);

(2) Section (b)(10);

(3) Sections (b)(12) through (b)(16);

(4) Section (20)(ee)

(B) “Control of Organic Compound Emissions,” Regulation 22a-174-30a “Stage I Vapor Recovery,” effective

Environmental Protection Agency

§ 52.370

July 8, 2015, as published in the Connecticut Law Journal on November 24, 2015.

(C) “Control of Organic Compound Emissions,” Regulation 22a-174-32(b)(3), effective July 8, 2015, as published in the Connecticut Law Journal on November 24, 2015.

(D) House Bill No. 6534, Public Act No. 13-120, “An Act Concerning Gasoline Vapor Recovery Systems,” approved June 18, 2013.

(ii) Additional materials.

(A) Letter from the Connecticut Department of Energy and Environmental Protection, dated September 14, 2015, submitting a revision to the Connecticut State Implementation Plan.

(118) Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on August 19, 2011, December 14, 2015, and October 18, 2017.

(i) *Incorporation by reference.* (A) “Definitions,” Regulation 22a-174-1(71), the definition of “Minor source base-line date,” amended October 5, 2017.

(B) “Permit to Construct and Operate Stationary Sources,” Regulation 22a-174-3a(k)(1)(C), amended October 5, 2017.

(C) Connecticut General Statute, Title 16a, “Planning and Energy Policy,” Chapter 296, “Operation of Fuel Supply Business,” Section 16a-21a, “Sulfur content of home heating oil and off-road diesel fuel. Suspension of requirements for emergency. Enforcement,” effective July 1, 2015, as published in the State of Connecticut General Statutes, Revision of 1958, Revised to January 1, 2017.

(ii) *Additional materials.* (A) The Connecticut Department of Energy and Environmental Protection document, “Addendum to the CAA § 110(a)(2)(D)(i)(I) Portion of Connecticut’s Infrastructure Submittal for the 2006 PM_{2.5} NAAQS,” August 19, 2011.

(B) The Connecticut Department of Energy and Environmental Protection document, “Connecticut State Implementation Plan for Clean Air Act Section 110(a) Infrastructure Elements: 2012 PM_{2.5} NAAQS,” December 14, 2015.

(C) The Connecticut Department of Energy and Environmental Protection document, State Implementation Plan

Revision Concerning the Consumer Products, Architectural and Industrial Maintenance Coatings and Prevention of Significant Deterioration Permit Programs,” October 18, 2017.

(119) Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on October 18, 2017.

(i) *Incorporation by reference.* (A) Regulations of Connecticut State Agencies Section 22a-174-40, entitled “Consumer Products,” effective Oct 5, 2017.

(B) Regulations of Connecticut State Agencies Section 22a-174-41, entitled “Architectural and Industrial Maintenance Products—Phase 1,” effective Oct 5, 2017.

(C) Regulations of Connecticut State Agencies Section 22a-174-41a, entitled “Architectural and Industrial Maintenance Products—Phase 2,” effective Oct 5, 2017.

(120) Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on February 28, 2018.

(i) *Incorporation by reference.* (A) Regulations of Connecticut State Agencies, Section 22a-174-3a, “Permit to Construct and Operate Stationary Sources,” amended February 8, 2018:

(1) 22a-174-3a(a)(1), “Applicability and Exemptions,” except (a)(1)(C) and (G);

(2) 22a-174-3a(j)(1), “Best Available Control Technology (BACT);” and

(3) 22a-174-3a(k)(1) and (2), “Permit Requirements for Attainment Areas: Prevention of Significant Deterioration of Air Quality (PSD) Program.”

(121) Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on June 30, 2015.

(i) [Reserved]

(ii) *Additional materials.* (A) The Connecticut Department of Energy and Environmental Protection document “Regional Haze 5-Year Progress Report,” Final July 8, 2015.

(B) [Reserved]

(122) Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on June 15, 2015.

(i) [Reserved]

(ii) *Additional materials.* (A) The Connecticut Department of Energy and Environmental Protection document, “Demonstration that Connecticut Complies with the Good Neighbor Requirements of Clean Air Act Section 110(a)(2)(D)(i)(I) for the 2008 Ozone National Ambient Air Quality Standard” Final, June 11, 2015.

(B) [Reserved]

(123) Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on September 7, 2018.

(i) [Reserved]

(ii) *Additional materials.* (A) The Connecticut Department of Energy and Environmental Protection document, “Connecticut State Implementation Plan—Clean Air Act Section 110(a) Infrastructure Elements for the 2015 Ozone National Ambient Air Quality Standards,” Final, September 7, 2018.

(B) [Reserved]

(124) Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on October 19, 2018.

(i) *Incorporation by reference.* (A) Regulations of Connecticut State Agencies Section 22a–174–18, entitled “Control of Particulate Matter and Visible Emissions,” as amended August 3, 2018, as follows:

(1) 22a–174–18(c) Control of airborne particulate matter and fugitive particulate matter;

(2) 22a–174–18(f) Process industries—general; and

(3) 22a–174–18(j)(1).

(B) [Reserved]

(ii) [Reserved]

(125) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on December 20, 2019.

(i) *Incorporation by reference.* (A) Regulations of Connecticut State Agencies Section 22a–174–22e, entitled “Control of nitrogen oxide emissions from fuel-burning equipment at major stationary

sources of nitrogen oxides,” as amended October 8, 2019, as follows:

(1) 22a–174–22e (a), Definitions; (12) “emergency” and (13) “emergency engine.”

(2) 22a–174–22e (g), Compliance options; (4) and (6).

(B) [Reserved]

(ii) [Reserved]

(126) Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on December 6, 2018.

(i) [Reserved]

(ii) *Additional materials.* (A) The Connecticut Department of Energy and Environmental Protection document, “Connecticut Good Neighbor SIP for the 2015 Ozone National Ambient Air Quality Standard.” Final, December 6, 2018.

(B) [Reserved]

(127) Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on October 26, 2020, supplemented on January 12, 2022.

(i) *Incorporation by reference.* (A) Regulations of Connecticut State Agencies section 22a–174–33a, Limit on Premises-wide Actual Emissions Below 50% of Title V Thresholds, effective September 24, 2002.

(B) Regulations of Connecticut State Agencies section 22a–174–33b, Limit on Premises-wide Actual Emissions Below 80% of Title V Thresholds, effective September 24, 2020, excluding section (d)(6).

(ii) *Additional materials.* (A) Letter from the Connecticut Department of Energy and Environmental Protection dated October 26, 2020, submitting a revision to the Connecticut State Implementation Plan.

(B) Letter from the Connecticut Department of Energy and Environmental Protection dated January 12, 2022, withdrawing Regulations of Connecticut State Agencies section 22a–174–33b(d)(6) from its SIP submittal.

(128) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on December 20, 2021 and amended on May 3, 2022.

(i) *Incorporation by reference.* (A) State of Connecticut, Department of

Environmental Protection Agency

§ 52.370

Energy and Environmental Protection, Consent Order # 8377, Modification 1, issued to Middletown Power LLC, Montville Power LLC, Connecticut Jet Power LLC, and Devon Power LLC, May 3, 2022.

(B) [Reserved]

(ii) [Reserved]

(129) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on December 15, 2020, and supplemented on February 14, 2023.

(i) *Incorporation by reference.* (A) Regulations of Connecticut State Agencies Section 22a-174-2a “Procedural Requirements for New Source Review and Title V Permitting,” 22a-174-2a(c)(3), 22a-174-2a(d)(9), 22a-174-2a(e)(3)(C), 22a-174-2a(e)(3)(E), 22a-174-2a(e)(7), 22a-174-2a(f)(2), and 22a-174-2a(f)(2)(G), amended by the State of Connecticut on November 18, 2020.

(B) Regulations of Connecticut State Agencies Section 22a-174-3a, “Permit to Construct and Operate Stationary Sources,” at 22a-174-3a(a)(2)(A)(ii) through (v), 22a-174-3a(a)(5), 22a-174-3a(d)(3)(B) and (C), 22a-174-3a(i) Table 3a(i)-1, 22a-174-3a(i)(2), 22a-174-3a(j)(1)(B), 22a-174-3a(j)(8)(A), 22a-174-3a(k)(3) and (4), 22a-174-3a(k)(6)(A), 22a-174-3a(k)(7) Table 3a(k)-1, and 22a-174-3a(l)(1), amended by the State of Connecticut on November 18, 2020.

(C) Regulations of Connecticut State Agencies Section 22a-174-20, “Control of Organic Compound Emissions,” at 22a-174-20(gg)(8), amended by the State of Connecticut on November 18, 2020.

(ii) *Additional materials.*

(A) Letter from CT DEEP submitted to EPA on December 15, 2020, entitled “State Implementation Plan Revision Concerning the New Source Review Permit Program Update.”

(B) Letter from CT DEEP submitted to EPA on February 14, 2023, entitled “Re: Supplement to the State Implementation Plan Revision Concerning the NSR Program Update.”

(130) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on November 30, 2023.

(i) *Incorporation by reference.*

(A) Regulations of Connecticut State Agencies Section 22a-174-1, “Defini-

tions,” (106), definition of “Severe non-attainment area for ozone.”

(B) Reserved.

(ii) *Additional materials.*

(A) Letter from CT DEEP submitted to EPA on November 30, 2023, entitled “State Implementation Plan Revision Concerning the Definition of Severe Non-Attainment Area for Ozone.”

(B) Reserved.

(131) Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on November 17, 2022, and supplemented on December 19, 2022 and February 27, 2023.

(i) *Incorporation by reference.* (A) Regulations of Connecticut State Agencies Section 22a-174-4a, entitled “Source monitoring, record keeping, and reporting,” effective October 28, 2022.

(B) Regulations of Connecticut State Agencies Section 22a-174-20, entitled “Control of organic compound emissions,” specifically 22a-174-20(a)(12), amended by the State of Connecticut on October 28, 2022.

(C) Regulations of Connecticut State Agencies Section 22a-174-22e, entitled “Control of nitrogen oxides emissions from fuel-burning equipment at major stationary sources of nitrogen oxides,” specifically 22a-174-22e(m)(1) and (m)(4), amended by the State of Connecticut on October 28, 2022.

(ii) *Additional materials.* (A) Letter from the Connecticut Department of Energy and Environmental Protection dated November 17, 2022, submitting a revision to the Connecticut State Implementation Plan.

(B) Letter from the Connecticut Department of Energy and Environmental Protection dated December 19, 2022, supplementing a revision to the Connecticut State Implementation Plan.

(C) Letter from the Connecticut Department of Energy and Environmental Protection dated February 27, 2023, clarifying a revision to the Connecticut State Implementation Plan.

(132) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on December 14, 2015.

(i) *Incorporation by reference.*

(A) Regulations of Connecticut State Agencies, Regulation 22a-174-36b, “Low

§ 52.371

40 CFR Ch. I (7–1–25 Edition)

emission vehicles II program,” amended August 1, 2013.

(B) Regulations of Connecticut State Agencies, Regulation 22a–174–36c, “Low Emission Vehicle III Program,” effective August 1, 2013.

[37 FR 10855, May 31, 1972]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.370, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

§ 52.371 Classification of regions.

The Connecticut plan was evaluated on the basis of the following classifications:

Environmental Protection Agency

§ 52.374

Air quality control region	Pollutant				
	Particulate matter	Sulfur oxides	Nitrogen dioxide	Carbon monoxide	Ozone
New Jersey-New York-Connecticut Interstate	I	I	I	I	I
Hartford-New Haven-Springfield Interstate	I	I	III	I	I
Northwestern Intrastate	III	III	III	III	III
Eastern Intrastate	II	III	III	III	III

[37 FR 10855, May 31, 1972, as amended at 39 FR 16346, May 8, 1974; 45 FR 84787, Dec. 23, 1980]

§ 52.372 Extensions.

(a) [Reserved]

(b) The Administrator hereby extends until December 31, 1996, the attainment date for particulate matter for the New Haven PM10 nonattainment area, as requested by the State of Connecticut on March 22, 1996 and based on monitored air quality data for the national ambient air quality standard for PM10 during the years 1993–95.

[61 FR 56900, Nov. 5, 1996, as amended at 62 FR 14331, Mar. 26, 1997; 64 FR 67192, Dec. 1, 1999]

§ 52.373 Approval status.

(a) The Administrator approves the general procedures of the state's sulfur control regulations (19–508–19) and accompanying narrative submitted on

October 23, 1981, and November 4, 1981 and identified under § 52.370(c)(18), provided that any individual source approvals granted by the state under the Air Pollution Control/Energy Trade Option and solid fuel burning permitting system are submitted to EPA as SIP revisions.

(b) The Administrator approves the total suspended particulate regulation for foundry sand processes as submitted and identified under paragraph (c)(22) of this section. This includes only the requirement to remove ninety percent of the particulate matter and not the requirement to emit not more than 0.75 pounds of particulate per ton of material cast, a provision which may be found in state regulation 19–508–18(f)(3).

[61 FR 38576, July 25, 1996]

§ 52.374 Attainment dates for national standards.

The following table presents the latest dates by which the national standards are to be attained. The dates reflect the information presented in Connecticut's plan.

Air quality control region	Pollutant					
	SO ₂		PM ₁₀	NO ₂	CO	O ₃
	Primary	Secondary				
AQCR 41: Eastern Connecticut Intrastate (See 40 CFR 81.183)	(a)	(b)	(a)	(a)	(a)	(d)
AQCR 42: Hartford-New Haven-Springfield Interstate Area (See 40 CFR 81.26).						
All portions except City of New Haven	(a)	(b)	(a)	(a)	(a)	(d)
City of New Haven	(a)	(b)	(c)	(a)	(a)	(d)
AQCR 43: New Jersey-New York-Connecticut Interstate Area (See 40 CFR 81.13)	(a)	(a)	(a)	(a)	(a)	(d)
AQCR 44: Northwestern Connecticut Intrastate (See 40 CFR 81.184)	(a)	(b)	(a)	(a)	(a)	(d)

- a. Air quality levels presently below primary standards or area is unclassifiable.
b. Air quality levels presently below secondary standards or area is unclassifiable.
c. December 31, 1996 (two 1-year extensions granted).
d. November 15, 2007.

[45 FR 84787, Dec. 23, 1980, as amended at 61 FR 38576, July 25, 1996; 62 FR 14331, Mar. 26, 1997; 64 FR 12013, Mar. 10, 1999; 66 FR 663, Jan. 3, 2001]

§ 52.375 Certification of no sources.

The State of Connecticut has certified to the satisfaction of EPA that no sources are located in the state which are covered by the following Control Technique Guidelines:

- (a) Large Petroleum Dry Cleaners.
- (b) In its December 8, 2006 submittal to EPA pertaining to reasonably available control technology requirements for the 1997 8-hour ozone standard, the State of Connecticut certified to the satisfaction of EPA that no sources are located in the state that are covered by the following Control Technique Guidelines:
 - (1) Automobile Coatings;
 - (2) Large Petroleum Dry Cleaners;
 - (3) Large Appliance Coating;
 - (4) Natural Gas and Gas Processing Plants;
 - (5) Flat Wood Paneling Coatings; and
 - (6) Control of VOC Leaks from Petroleum Refineries.
- (c) Air Oxidation Processes/SOCMI.
- (d) Manufacturers of High-density Polyethylene and Polypropylene Resins.
- (e) Synthetic organic chemical manufacturing industry (SOCMI) distillation.
- (f) Synthetic organic chemical manufacturing industry (SOCMI) reactor vessels.
- (g) In its April 29, 2010 submittal to EPA pertaining to reasonably available control technology requirements for the 1997 8-hour ozone standard, the State of Connecticut certified to the satisfaction of EPA that no sources are located in the state that are covered by the following Control Technique Guidelines:

- (1) Flat wood paneling coating;
- (2) Fiberglass boat manufacturing; and
- (3) Automobile and light duty truck assembly coating.

(h) In its July 18, 2014 submittal to EPA pertaining to reasonably available control technology requirements for the 2008 8-hour ozone standard, the State of Connecticut certified to the satisfaction of EPA that no sources are located in the state that are covered by the following Control Technique Guidelines:

- (1) Automobile coatings;
- (2) Large petroleum dry cleaners;

- (3) Fiberglass boat manufacturing;
- (4) Equipment leaks from natural gas and gasoline processing plants;
- (5) Petroleum refineries;
- (6) Control of refinery vacuum producing systems;
- (7) Wastewater separators and process unit turnarounds; and
- (8) Flatwood paneling coatings.
- (i) In its December 21, 2020, submittal to EPA pertaining to reasonably available control technology requirements as a serious area for the 2008 ozone standard and for the 2015 ozone standard as a state containing a moderate nonattainment area and a marginal nonattainment area that is part of the Ozone Transport Region, the State of Connecticut certified to the satisfaction of EPA that no sources located in the State are covered by the following Control Technique Guidelines:

- (1) Automobile and Light-Duty Truck Assembly Coatings.
- (2) Control of VOC Emissions from Large Petroleum Dry Cleaners.
- (3) Fiberglass Boat Manufacturing Materials.
- (4) Control of VOC Equipment Leaks from Natural Gas/Gasoline Processing Plants.
- (5) Control of Refinery Vacuum Producing Systems, Wastewater Separators, and Process Unit Turnarounds.
- (6) Control of Volatile Organic Compound Leaks from Petroleum Refinery Equipment.
- (7) Flatwood Paneling Coatings.
- (8) The Oil and Natural Gas Industry.

[50 FR 37178, Sept. 12, 1985, as amended at 53 FR 17936, May 19, 1988; 65 FR 62623, Oct. 19, 2000; 78 FR 38591, June 27, 2013; 79 FR 32875, June 9, 2014; 82 FR 35456, July 31, 2017; 87 FR 38285, June 28, 2022]

§ 52.376 Control strategy: Carbon monoxide.

(a) Approval—On January 12, 1993, the Connecticut Department of Environmental Protection submitted a revision to the carbon monoxide State Implementation Plan for the 1990 base year emission inventory. The inventory was submitted by the State of Connecticut to satisfy Federal requirements under sections 172(c)(3) and 187(a)(1) of the Clean Air Act as amended in 1990, as a revision to the carbon monoxide State Implementation Plan

for the Hartford/New Britain/Middletown carbon monoxide nonattainment area, the New Haven/Meriden/Waterbury carbon monoxide nonattainment area, and the Connecticut Portion of the New York-N. New Jersey-Long Island carbon monoxide nonattainment area.

(b) Approval—On September 30, 1994, the Connecticut Department of Environmental Protection submitted a request to redesignate the Hartford/New Britain/Middletown Area carbon monoxide nonattainment area to attainment for carbon monoxide. The redesignation request and the 1995-2005 initial ten-year maintenance plan meet the redesignation requirements in sections 107(d)(3)(E) and 175A of the Act as amended in 1990, respectively.

(c) Approval—On January 12, 1993 and April 7, 1994, the Connecticut Department of Environmental Protection submitted revisions to the carbon monoxide State Implementation Plan for VMT forecasts, contingency measures, and attainment demonstration for CO. These VMT forecasts, contingency measures, and attainment demonstration were submitted by Connecticut to satisfy Federal requirements under sections 187(a)(2)(A), 187(a)(3) and 187(a)(7) of the Clean Air Act, as amended in 1990, as revisions to the carbon monoxide State Implementation Plan.

(d) Approval—On January 17, 1997, the Connecticut Department of Environmental Protection submitted a request to redesignate the New Haven/Meriden/Waterbury carbon monoxide nonattainment area to attainment for carbon monoxide. The redesignation request and the 1998-2008 initial ten-year maintenance plan meet the redesignation requirements in sections 107(d)(3)(E) and 175A of the Act as amended in 1990, respectively.

(e) Approval—In December, 1996, the Connecticut Department of Environmental Protection submitted a revision to the carbon monoxide State Implementation Plan for the 1993 periodic emission inventory. The inventory was submitted by the State of Connecticut to satisfy Federal requirements under section 187(a)(5) of the Clean Air Act as amended in 1990, as a revision to the carbon monoxide State Implementation Plan.

(f) Approval—On May 29, 1998, the Connecticut Department of Environmental Protection submitted a request to redesignate the Connecticut portion of the New York-N. New Jersey-Long Island carbon monoxide nonattainment area to attainment for carbon monoxide. The redesignation request and the 2000-2010 initial ten-year maintenance plan meet the redesignation requirements in sections 107(d)(3)(E) and 175A of the Act as amended in 1990, respectively.

(g) Approval—On October 7, 1999, the Connecticut Department of Environmental Protection submitted a revision to the carbon monoxide State Implementation Plan that removes the oxygenated fuel requirement for the Connecticut portion of the New York-N. New Jersey-Long Island area and converts the program to a contingency measure. If a violation of the carbon monoxide ambient air quality standard were to occur, the State would be required to reimplement the program.

(h) Approval—On June 28, 2004, the Connecticut Department of Environmental Protection (CT DEP) submitted a request to establish limited maintenance plans for the Hartford-New Britain-Middletown Connecticut carbon monoxide attainment area, the New Haven-Meriden-Waterbury Connecticut carbon monoxide attainment area, and the Connecticut portion of the New York-Northern New Jersey-Long Island carbon monoxide attainment area for the remainder of the individual area's initial ten-year maintenance plan. As part of the maintenance plan request, CT DEP also requested approval of a second follow-on ten-year carbon monoxide maintenance plan for the Hartford-New Britain-Middletown carbon monoxide attainment area (period 2006 to 2015), for the New Haven-Meriden-Waterbury carbon monoxide attainment area (period 2009 to 2018), and for the Connecticut portion of the New York-Northern New Jersey-Long Island carbon monoxide attainment area (period 2011 to 2020). The State of Connecticut has committed to: maintain a continuous carbon monoxide monitoring network in each carbon monoxide maintenance area; implement contingency measures in the event of an exceedance of the carbon monoxide

National Ambient Air Quality Standard (NAAQS) in any of the three maintenance areas; coordinate with EPA in the event the carbon monoxide design value(s) in any maintenance area(s) exceed 7.65 ppm, to verify the validity of the data and, if warranted based on the data review, develop a full maintenance plan(s) for the affected maintenance area(s); and, ensure that project-level carbon monoxide evaluations of transportation projects in each area are carried out as part of environmental reviews or Connecticut's indirect source permitting program. The limited maintenance plans satisfy all applicable requirements of section 175A of the Clean Air Act. Approval of a Limited Maintenance Plan is conditioned on maintaining levels of ambient carbon monoxide levels below the required limited maintenance plan 8-hour carbon monoxide design value criterion of 7.65 parts per million. If the Limited Maintenance Plan criterion is no longer satisfied, Connecticut must develop a full maintenance plan to meet Clean Air Act requirements.

[60 FR 55320, Oct. 31, 1995, as amended at 61 FR 38577, July 25, 1996; 63 FR 53286, Oct. 5, 1998; 64 FR 12014, Mar. 10, 1999; 64 FR 67192, Dec. 1, 1999; 69 FR 50073, Aug. 13, 2004]

§ 52.377 Control strategy: Ozone.

(a) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on December 30, 1997 and January 7, 1998. These revisions are for the purpose of satisfying the rate of progress requirement of section 182(c)(2) through 1999, and the contingency measure requirements of sections 172(c)(9) and 182(c)(9) of the Clean Air Act, for the Greater Hartford serious ozone nonattainment area, and the Connecticut portion of the NY-NJ-CT severe ozone nonattainment area.

(b) Approval—Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on September 16, 1998, February 8, 2000 and June 17, 2003. The revisions are for the purpose of satisfying the attainment demonstration requirements of section 182(c)(2)(A) of the Clean Air Act for the Greater Connecticut serious ozone nonattainment area. The revision estab-

lishes an attainment date of November 15, 2007 for the Greater Connecticut serious ozone nonattainment area. Connecticut commits to conduct a mid-course review to assess modeling and monitoring progress achieved toward the goal of attainment by 2007, and submit the results to EPA by December 31, 2004. The June 17, 2003 revision establishes MOBILE6-based motor vehicle emissions budgets for 2007 of 51.9 tons per day of volatile organic compounds (VOC) and 98.4 tons per day of nitrogen oxides (NO_x) to be used in transportation conformity in the Greater Connecticut serious ozone nonattainment area.

(c) Approval—Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on October 15, 2001 and June 17, 2003. These revisions are for the purpose of satisfying the rate of progress requirement of section 182(c)(2)(B) through 2007, and the contingency measure requirements of section 182(c)(9) of the Clean Air Act, for the Connecticut portion of the NY-NJ-CT severe ozone nonattainment area. The October 15, 2001 revision establishes motor vehicle emissions budgets for 2002 of 15.20 tons per day of VOC and 38.39 tons per day of NO_x to be used in transportation conformity in the Connecticut portion of the NY-NJ-CT severe ozone nonattainment area. The June 17, 2003 revision establishes motor vehicle emissions budgets for 2005 of 19.5 tons per day of VOC and 36.8 tons per day of NO_x to be used in transportation conformity in the Connecticut portion of the NY-NJ-CT severe ozone nonattainment area.

(d) Approval—Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on September 16, 1998, February 8, 2000, October 15, 2001 and June 17, 2003. The revisions are for the purpose of satisfying the attainment demonstration requirements of section 182(c)(2)(A) of the Clean Air Act for the Connecticut portion of the NY-NJ-CT severe ozone nonattainment area. The June 17, 2003 revision establishes MOBILE6-based motor vehicle emissions budgets for 2007 of 16.4 tons per day of VOC and 29.7 tons per day of

NO_x to be used in transportation conformity in the Connecticut portion of the NY-NJ-CT severe ozone nonattainment area. Connecticut commits to adopt and submit by October 31, 2001, additional necessary regional control measures to offset the emission reduction shortfall in order to attain the one-hour ozone standard by November 2007. Connecticut commits to adopt and submit by October 31, 2001, additional necessary intrastate control measures to offset the emission reduction shortfall in order to attain the one-hour ozone standard by November 2007. Connecticut commits to adopt and submit additional restrictions on VOC emissions from mobile equipment and repair operations; and requirements to reduce VOC emissions from certain consumer products. Connecticut also commits to conduct a mid-course review to assess modeling and monitoring progress achieved toward the goal of attainment by 2007, and submit the results to EPA by December 31, 2004.

(e) Commitment Fulfillment—Connecticut has fulfilled the commitment in section 52.377(d), to adopt additional NO_x and VOC control measures to meet the emission reduction shortfall in its 1-hour severe ozone nonattainment area.

(f) Determination of Attainment. Effective September 30, 2010, EPA is determining that the Greater Connecticut 8-hour ozone nonattainment area has attained the 1997 8-hour ozone standard. Under the provisions of EPA's ozone implementation rule (*see* 40 CFR 51.918), this determination suspends the reasonable further progress and attainment demonstration requirements of section 182(b)(1) and related requirements of section 172(c)(9) of the Clean Air Act for as long as the area does not monitor any violations of the 1997 8-hour ozone standard. If a violation of the 1997 ozone NAAQS is monitored in the Greater Connecticut 8-hour ozone nonattainment area, this determination shall no longer apply. In addition, this area met its June 15, 2010 attainment deadline for the 1997 ozone standard.

(g) Approval—Submittal from the Connecticut Department of Environmental Protection, dated December 28,

2007, to address the Clean Air Act (CAA) infrastructure requirements for the 1997 ozone National Ambient Air Quality Standard (NAAQS). This submittal satisfies the requirements of CAA sections 110(a)(2)(A), (B), (C), (E), (F), (G), (H), (J), (K), (L), and (M).

(h) Conditional Approval—Submittal from the Connecticut Department of Environmental Protection, dated December 28, 2007, to address the Clean Air Act (CAA) infrastructure requirements for the 1997 ozone National Ambient Air Quality Standard (NAAQS). On May 2, 2011, the State of Connecticut supplemented this submittal with a commitment to address the requirements of section 110(a)(2)(D)(ii) of the CAA that requires notification of affected states for Prevention of Significant Deterioration purposes. EPA is conditionally approving Connecticut's submittal with respect to CAA section 110(a)(2)(D)(ii).

(i) Determination of Attainment for the One-Hour Ozone Standard. Effective April 16, 2012, EPA is determining that the Greater Connecticut one-hour ozone nonattainment area did not meet its applicable one-hour ozone attainment date of November 15, 2007, based on 2005–2007 complete, quality-assured ozone monitoring data. Separate from and independent of this determination, EPA is determining that the Greater Connecticut one-hour ozone nonattainment area met the one-hour ozone standard, based on 2008–2010 complete, quality-assured ozone monitoring data at all monitoring sites in the area. EPA's review of the ozone data shows that the area began attaining the one-hour ozone standard during the 2006–2008 monitoring period, and has continued attaining the one-hour standard through the 2007–2009 and 2008–2010 monitoring periods.

(j) Determination of Attainment for the One-Hour Ozone Standard. Effective July 18, 2012, EPA is determining that the New York-Northern New Jersey-Long Island (NY-NJ-CT) one-hour ozone nonattainment area did not meet its applicable one-hour ozone attainment date of November 15, 2007, based on 2005–2007 complete, quality-assured and certified ozone monitoring data. Separate from and independent of this determination, EPA is determining

that the New York-Northern New Jersey-Long Island (NY-NJ-CT) one-hour ozone nonattainment area has attained the one-hour ozone standard, based on 2008–2010 complete, quality-assured and certified ozone monitoring data at all monitoring sites in the area and data showing the area continued to attain through 2011.

(k) Determination of Attainment for the Eight-Hour Ozone Standard. Effective July 18, 2012 EPA is determining, that complete, quality-assured and certified ozone monitoring data for 2007–2009 show the NY-NJ-CT eight-hour ozone nonattainment area attained the 1997 eight-hour ozone standard by its June 15, 2010 attainment deadline. Therefore, EPA has met the requirement pursuant to CAA section 181(b)(2)(A) to determine, based on the area's air quality data as of the attainment date, whether the area attained the standard. EPA also determined that the NY-NJ-CT nonattainment area will not be reclassified for failure to attain by its applicable attainment date under section 181(b)(2)(A). EPA is also determining that the NY-NJ-CT eight-hour ozone nonattainment area currently continues to attain the eight-hour ozone NAAQS, based on complete, quality-assured and certified data for 2008–2010 and data through 2011. This determination, in accordance with 40 CFR 51.918, suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as this area continues to meet the 1997 annual eight-hour ozone NAAQS.

(l) Approval—Revisions to the Connecticut State Implementation Plan (SIP) submitted on December 8, 2006. The SIP revision satisfies the requirement to implement reasonably available control technology (RACT) for sources of volatile organic compounds (VOC) and oxides of nitrogen (NO_x) for purposes of the 1997 8-hour ozone standard. Specifically, the following sections of the Regulations of Connecticut State Agencies are approved for this purpose: For VOC RACT, 22a–174–20, Control of Organic Compound Emis-

sions, 22a–174–30, Dispensing of Gasoline/Stage I and Stage II Vapor Recovery, and 22a–174–32, RACT for Organic Compounds; for NO_x RACT, 22a–174–22, Control of Nitrogen Oxide Emissions, and 22a–174–38, Municipal Waste Combustors.

(m) *Approval*. (1) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on August 18, 2000, December 12, 2002, July 1, 2004, January 13, 2006. The revisions consist of 148 single source emission trading orders necessary for satisfying Reasonable Available Control Technology requirements for nitrogen oxides during specific time periods. All trading orders expired before January 1, 2013, with the exception of Trading Agreement and Order 8242, in paragraph (m)(1)(xlii) of this section, issued to PSEG Power Connecticut, LLC in Bridgeport, Connecticut on February 12, 2003. Trading Agreement and Order 8242 was issued to reflect a change in ownership at the source.

(i) Trading Agreement and Order No. 8116 Modification No. 1 issued to the Connecticut Resources Recovery Authority in Hartford on April 29, 1999.

(ii) Trading Agreement and Order No. 1494A issued to the Connecticut Resources Recovery Authority in Hartford on May 4, 2001.

(iii) Trading Agreement and Order No. 8116A issued to The Connecticut Resources Recovery Authority in Hartford on March 18, 2003.

(iv) Trading Agreement and Order No. 8116B issued to The Connecticut Resources Recovery Authority in Hartford on April 11, 2005.

(v) Order No. 1494 Modification No. 2 issued to The Connecticut Light and Power Company in Branford, Greenwich, Hartford, Montville, Middletown, Milford, Preston, Norwalk, and Torrington on May 6, 1998.

(vi) Order No. 1494 Modification No. 3 Issued to The Connecticut Light and Power Company In Branford, Greenwich, Hartford, Montville, Middletown, Milford, Preston, Norwalk, and Torrington on February 3, 1999.

necticut Jet Power LLC in Branford, Greenwich, Torrington, Middletown, Norwalk, Milford, and Montville.

(lxxxix) Trading Agreement and Order No. 8306 issued to NRG Energy, Inc., Middletown Power LLC, NRG Middletown Operations Inc., Montville Power LLC, NRG Montville Operations Inc., Norwalk Power LLC, and NRG Norwalk Harbor Operations Inc. in Middletown, Montville, and Norwalk.

(xc) Trading Agreement and Order No. 8110A issued to Yale University in New Haven.

(n) Approval—An attainment demonstration for the 1997 8-hour ozone standard to satisfy requirements of section 182(c)(2)(A) of the Clean Air Act, and a Reasonably Available Control Measure (RACM) analysis to satisfy requirements of section 172(c)(1) of the Clean Air Act for the Greater Connecticut ozone nonattainment area, submitted by the Connecticut Department of Energy and Environmental Protection on February 1, 2008.

(o) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on February 1, 2008. These revisions are for the purpose of satisfying the rate of progress requirement of section 182(b)(1) from 2002 through 2008, and the contingency measure requirement of sections 172(c)(9) and of the Clean Air Act, for the Greater Connecticut moderate 8-hour ozone nonattainment area, and the Connecticut portion of the New York-New Jersey-Long Island moderate 8-hour ozone nonattainment area. These revisions establish motor vehicle emission budgets for 2008 of 29.7 tons per day of volatile organic compounds (VOCs) and 60.5 tons per day of nitrogen oxides (NOx) to be used in transportation conformity in the Connecticut portion of the New York-New Jersey-Long Island moderate 8-hour ozone nonattainment area. These revisions also establish motor vehicle emission budgets for 2008 for the Greater Connecticut moderate 8-hour ozone nonattainment area of 28.5 tons per day for VOCs, and 54.3 tons per day for NOx.

(p) *Rescission of clean data determination for the 1997 eight-hour ozone standard.* Effective June 3, 2016, the EPA is

determining that complete quality-assured and certified ozone monitoring data for 2012–2014 show the NY-NJ-CT 1997 eight-hour ozone nonattainment area did not meet 1997 eight-hour ozone standard. Therefore, the EPA is rescinding the clean data determination for the 1997 eight-hour ozone standard only. The prior determination (*see* paragraph k of this section) is in accordance with 40 CFR 51.918. The prior determination suspended the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as this area continues to meet the 1997 annual eight-hour ozone NAAQS. This rescission of the clean data determination will result in a SIP Call for a new ozone attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard, for this area only. If the revised plan is approved by the EPA as demonstrating reasonable further progress and attainment for the more stringent 2008 NAAQS by the Moderate area attainment date, and is approved by the EPA as containing adequate contingency measures for the 2008 NAAQS, then the plan would be deemed to have also satisfied requirements of the SIP Call associated with violations for the 1997 NAAQS.

(q) *Approval*—Revisions to the Connecticut State Implementation Plan (SIP) submitted on July 18, 2014. The SIP revision satisfies the requirement to implement reasonably available control technology (RACT) for sources of volatile organic compounds (VOC) and oxides of nitrogen (NO_x) for purposes of the 2008 ozone standard. Specifically, the following sections of the Regulations of Connecticut State Agencies are approved for this purpose: For VOC RACT, 22a–174–20, Control of Organic Compound Emissions, 22a–174–30, Dispensing of Gasoline/Stage I and Stage II Vapor Recovery, and 22a–174–32, RACT for Organic Compounds; for NO_x RACT, 22a–174–22, Control of nitrogen oxide emissions, 22a–174–22e, Control of

nitrogen oxide emissions from fuel burning equipment at major sources, 22a–174–22f, High daily NO_x emitting units at non-major sources of nitrogen oxides, and 22a–174–38, Municipal Waste Combustors.

(r) *Approval*—Submittal from the Connecticut Department of Energy and Environmental Protection dated March 9, 2017, to address the nonattainment new source review requirements for the 2008 8-hour ozone NAAQS for the Greater Connecticut and the New York-N. New Jersey-Long Island, NY-NJ-CT ozone nonattainment areas, as it meets the requirements for both the State's marginal and moderate classifications.

(s) *Approval*—An attainment demonstration for the 1997 8-hour ozone standard to satisfy requirements of section 182(c)(2)(A) of the Clean Air Act, and a Reasonably Available Control Measure (RACM) analysis to satisfy requirements of section 172(c)(1) of the Clean Air Act for the New York-Northern New Jersey-Long Island (NY-NJ-CT) ozone nonattainment area, submitted by the Connecticut Department of Energy and Environmental Protection. This rulemaking addresses the EPA's obligations to act on Connecticut's February 1, 2008 SIP revision for the 1997 ozone NAAQS, as well as the attainment demonstration and RACM analysis portion of the August 8, 2017 SIP submittal for the 1997 ozone NAAQS for the Connecticut portion of the NY-NJ-CT area.

(t) *Approval*. Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on January 17, 2017, September 5, 2017, and August 8, 2017, to meet, in part, requirements of the 2008 ozone NAAQS. These revisions satisfy the rate of progress requirement of section 182(b) through 2017, the contingency measure requirements of section 172(c)(9), the emission statement requirements of section 182(a)(3)(B), and the reasonably available control measure requirement of section 172(c)(1) for the Connecticut portion of the New York-Northern New Jersey-Long Island, NY-NJ-CT area, and the Greater Connecticut moderate ozone nonattainment areas. The January 17, 2017 revision establishes motor vehicle emissions budgets for 2017 of

15.9 tons per day of VOC and 22.2 tons per day of NO_x to be used in transportation conformity in the Greater Connecticut moderate ozone nonattainment area. The August 8, 2017 revision establishes motor vehicle emissions budgets for 2017 of 17.6 tons per day of VOC and 24.6 tons per day of NO_x to be used in transportation conformity in the Connecticut portion of the New York-Northern New Jersey-Long Island, NY-NJ-CT moderate ozone nonattainment area.

(u) *Determination of attainment for the 2008 ozone standard.* Effective November 7, 2022 EPA is determining that complete, quality-assured and certified ozone monitoring data for 2018–2020 show the Greater Connecticut, CT ozone nonattainment area attained the 2008 ozone NAAQS by its July 20, 2021, attainment deadline. Therefore, EPA has met the requirement pursuant to CAA section 181(b)(2)(A) to determine, based on the area's air quality data as of the attainment date, whether the area attained the standard.

(v) *Approval*—Submittal from the Connecticut Department of Energy and Environmental Protection dated December 21, 2020, to address the nonattainment new source review (NNSR) requirements as a serious nonattainment area for the 2008 8-hour ozone standard for the Greater Connecticut and the New York-N. New Jersey-Long Island, NY-NJ-CT ozone nonattainment areas, and also approves NNSR for Connecticut for the 2015 ozone standard as a state containing a moderate and a marginal nonattainment area and being located within the Ozone Transport Region as it meets the requirements for both the state's marginal and moderate classifications.

(w) *Approval.* Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on June 23, 2022, November 17, 2022, and December 12, 2022, to meet, in part, requirements of the 2008 ozone NAAQS. These revisions satisfy the rate of progress requirement of section 182(b) through 2020 for the Connecticut portion of the New York-Northern New Jersey-Long Island, NY-NJ-CT area. The revisions also establish motor vehicle emissions budgets for 2020 of 17.6 tons per day of

VOC and 23.3 tons per day of NO_x to be used in transportation conformity in the Connecticut portion of the New York-Northern New Jersey-Long Island, NY-NJ-CT moderate ozone nonattainment area. Additionally, we are concurring with the State's determination that its I/M program meets the performance standard and requirements for Enhanced I/M, and determining that Connecticut meets the clean-fuel vehicle program of section 182(c)(4) of the Clean Air Act.

(x) *Approval.* Revisions to the State Implementation Plan (SIP) submitted from the Connecticut Department of Energy and Environmental Protection dated May 22, 2023, to meet, in part, the requirements of the 2015 ozone NAAQS. These revisions:

(1) Certify the adequacy of the SIP to satisfy the nonattainment new source review permitting requirements of the Clean Air Act (CAA) for the reclassification of the Greater Connecticut area to moderate nonattainment for the 2015 ozone NAAQS; and

(2) certify the emission statement program satisfies the requirements of CAA section 182(a)(3)(B) for the initial nonattainment designations and the reclassification to moderate nonattainment for the 2015 ozone NAAQS.

[65 FR 62626, Oct. 19, 2000]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.377, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

§ 52.378 Control strategy: PM₁₀.

(a) *Approval*—On June 23, 2005, the Connecticut Department of Environmental Protection submitted a request to redesignate the City of New Haven PM₁₀ nonattainment area to attainment for PM₁₀. The redesignation request and the initial ten-year maintenance plan (2006–2015) meet the redesignation requirements in sections 107(d)(3)(E) and 175A of the Act as amended in 1990, respectively.

(b) *Approval*—On June 23, 2005, the Connecticut Department of Environmental Protection (CT DEP) submitted a request to establish a Limited Maintenance Plan (LMP) for the City of New Haven PM₁₀ attainment area for the area's initial ten-year maintenance

plan (2006–2015). The State of Connecticut has committed to: maintain a PM₁₀ monitoring network in the New Haven PM₁₀ maintenance area; implement contingency measures in the event of an exceedance of the PM₁₀ National Ambient Air Quality Standards (NAAQS) in the maintenance area; coordinate with EPA in the event the PM₁₀ design value in the maintenance area exceeds 98 µg/m³ for the 24-hour PM₁₀ NAAQS or 40 µg/m³ for the annual PM₁₀ NAAQS; and to verify the validity of the data and, if warranted based on the data review, develop a full maintenance plan for the maintenance area. The LMP satisfies all applicable requirements of section 175A of the Clean Air Act. Approval of the LMP is conditioned on maintaining levels of ambient PM₁₀ below a PM₁₀ design value criteria of 98 µg/m³ for the 24-hour PM₁₀ NAAQS and 40 µg/m³ for the annual PM₁₀ NAAQS. For the Criscuolo Park site, Connecticut still qualifies for the LMP option if, based on five years of site data, the average design values (ADVs) of the continuous PM₁₀ monitor are less than the site-specific critical design value (CDV). If the LMP criteria are no longer satisfied, Connecticut must develop a full maintenance plan to meet Clean Air Act requirements.

[70 FR 59663, Oct. 13, 2005]

§ 52.379 Control strategy: PM_{2.5}.

(a) Approval—Revision to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection (DEP) on April 17, 2007, the revision is for the purpose of establishing early fine particulate (PM_{2.5}) transportation conformity emission budgets for the Connecticut portion of the New York–Northern New Jersey–Long Island, NY–NJ–CT PM_{2.5} nonattainment area. The April 17, 2007 revision establishes PM_{2.5} motor vehicle emission budgets for 2009 of 360 tons per year of direct PM_{2.5} emissions and 18,279 tons per year of NO_x emissions to be used in transportation conformity in the Connecticut portion of the New York–Northern New Jersey–Long Island, NY–NJ–CT PM_{2.5} nonattainment area.

(b) *Determination of Attainment.* EPA has determined, as of December 15,

2010, that the New York–Northern New Jersey–Long Island, NY–NJ–CT fine particle (PM_{2.5}) nonattainment area has attained the 1997 PM_{2.5} National Ambient Air Quality Standard. This determination, in accordance with 40 CFR 51.1004(c), suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as the area continues to attain the 1997 PM_{2.5} NAAQS.

(c) Approval—Submittal from the Connecticut Department of Environmental Protection, dated September 4, 2008, to address the Clean Air Act (CAA) infrastructure requirements for the 1997 PM_{2.5} National Ambient Air Quality Standard (NAAQS). This submittal is approved as meeting the requirements of sections 110(a)(2)(B), (C) (enforcement program only), (E)(i), (E)(iii), (F), (G), (H), (J) (consultation and public notification only), (K), (L), and (M).

(d) Conditional Approval—Submittal from the Connecticut Department of Environmental Protection, dated September 4, 2008, to address the Clean Air Act (CAA) infrastructure requirements for the 1997 PM_{2.5} National Ambient Air Quality Standard (NAAQS). EPA is conditionally approving Connecticut's submittal with respect to CAA sections 110(a)(2)(A), (C) only as it related to the PSD program, (D)(ii), (E)(ii), and (J) only as it relates to the PSD program. This conditional approval is contingent upon Connecticut taking actions to meet requirements of these elements within one year of conditional approval, as committed to in letters from the state to EPA Region 1 dated June 15, 2012, and July 11, 2012.

(e) Approval—Submittal from the Connecticut Department of Environmental Protection, dated September 18, 2009, with supplements submitted on January 7, 2011, and August 19, 2011, to address the Clean Air Act (CAA) infrastructure requirements for the 2006 PM_{2.5} National Ambient Air Quality Standard (NAAQS). This submittal is approved as meeting the requirements of sections 110(a)(2)(B), (C) (enforcement program only), (E)(i), (E)(iii), (F),

(G), (H), (J) (consultation and public notification only), (K), (L), and (M).

(f) Conditional Approval—Submittal from the Connecticut Department of Environmental Protection, dated September 18, 2009, with supplements submitted on January 7, 2011, and August 19, 2011, to address the Clean Air Act (CAA) infrastructure requirements for the 2006 PM_{2.5} National Ambient Air Quality Standard (NAAQS). EPA is conditionally approving Connecticut's submittal with respect to CAA sections 110(a)(2)(A), (C) only as it related to the PSD program, (D)(ii), (E)(ii), and (J) only as it relates to the PSD program. This conditional approval is contingent upon Connecticut taking actions to meet requirements of these elements within one year of conditional approval, as committed to in letters from the state to EPA Region 1 dated June 15, 2012, and July 11, 2012.

(g) *Determination of Attainment.* EPA has determined, as of December 31, 2012, that the New York-N. New Jersey-Long Island, NY-NJ-CT fine particle (PM_{2.5}) nonattainment area has attained the 2006 PM_{2.5} National Ambient Air Quality Standard. This determination suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as the area continues to attain the 2006 PM_{2.5} NAAQS.

(h) Approval—EPA is approving a request to redesignate the Connecticut portion of the New York-N. New Jersey-Long Island, NY-NJ-CT fine particle (PM_{2.5}) area (i.e., New Haven and Fairfield Counties or the Southwestern CT Area) from nonattainment to attainment for the 1997 annual and 2006 24-hour PM_{2.5} standards. Connecticut submitted this request on June 22, 2012. As part of the redesignation request, the State submitted a maintenance plan as required by section 175A of the Clean Air Act. Elements of the section 175A maintenance plan include a contingency plan and an obligation to submit a subsequent maintenance plan revision as required by the Clean Air Act. The PM_{2.5} maintenance plan also establishes 2017 and 2025 Motor Vehicle

Emission Budgets (MVEBs) for the Area. Connecticut is establishing 2017 MVEBs of 575.8 tons per year (tpy) for direct PM_{2.5} and 12,791.8 tpy for NO_x, and 2025 MVEBs of 516 tpy for direct PM_{2.5} and 9,728.1 tpy for NO_x, for the Southwestern CT Area for maintenance of the 1997 annual and 2006 24-hour PM_{2.5} standards. The 2017 and 2025 MVEBs were prepared with the MOVES model. Previously SIP-approved 2009 MVEBs prepared with MOBILE6.2 are being withdrawn. Finally, EPA is also approving a comprehensive 2007 emission inventory for this Area.

(i) Approval—EPA is approving a 2006 24-hour PM_{2.5} standard Limited Maintenance Plan for the Connecticut portion of the New York-N. New Jersey-Long Island, NY-NJ-CT fine particle (PM_{2.5}) maintenance area, covering New Haven and Fairfield Counties, which covers the remaining 10-year portion of the 20-year maintenance period. Connecticut submitted this plan to EPA on May 9, 2023, and supplemented it on February 21, 2024.

[72 FR 50063, Aug. 30, 2007, as amended at 75 FR 69577, Nov. 15, 2010; 77 FR 63232, Oct. 16, 2012; 77 FR 76871, Dec. 31, 2012; 78 FR 58469, Sept. 24, 2013; 89 FR 90232, Nov. 15, 2024]

§ 52.380 Rules and regulations.

(a) All facilities owned, operated or under contract with the Connecticut Transportation Authority shall comply in all respects with Connecticut Regulations for the Abatement of Air Pollution sections 19–508–1 through 19–508–25 inclusive, as approved by the Administrator.

(b) For the purposes of paragraph (a) of this section the word “Administrator” shall be substituted for the word “Commissioner” wherever that word appears in Connecticut Regulations for the Abatement of Air Pollution sections 19–508–1 through 19–508–25 inclusive, as approved by the Administrator.

(c) The June 27 and December 28, 1979, February 1, May 1, September 8 and November 12, 1980, revisions are approved as satisfying Part D requirements under the following conditions:

(1)–(2) [Reserved]

(d) Non-Part D-No Action: EPA is neither approving nor disapproving the following elements of the revisions:

Environmental Protection Agency

§ 52.381

(1)–(2) [Reserved]

(3) The program to review new and modified major stationary sources in attainment areas (prevention of significant deterioration).

(4) Permit fees

(5) Stack height regulations

(6) Interstate pollution requirements

(7) Monitoring requirements

(8) Conflict of interest provisions.

(9) Use of 1 percent sulfur content fuel by the following residual oil burning sources, identified under § 52.370, paragraph (c)(18).

(i) Northeast Utilities, HELCO Power Station in Middletown,

(10) Emergency Fuel Variance provisions of Regulation 19-508-19 (a)(2)(ii) identified under § 52.370 paragraph (c)(18).

(e) *Disapprovals.* (1) Regulation 19-508-19(a)(9) concerning coal use at educational and historical exhibits and demonstrations, identified under § 52.370, (c)(18).

(2) Regulation 19-508-19, subsection (a)(4)(iii)(C) and (a)(4)(iii)(E) concerning fuel merchants, identified under § 52.370, paragraph (c)(18).

NOTE 1 TO PARAGRAPHS (f) THROUGH (g): “state” means the state of Connecticut.

(f) *Connecticut General Statutes Section 1-85. (Formerly Sec. 1-68). Interest in conflict with discharge of duties:* A public official, including an elected state official, or state employee has an interest which is in substantial conflict with the proper discharge of his duties or employment in the public interest and of his responsibilities as prescribed in the laws of this state, if he has reason to believe or expect that he, his spouse, a dependent child, or a business with which he is associated will derive a direct monetary gain or suffer a direct monetary loss, as the case may be, by reason of his official activity. A public official, including an elected state official, or state employee does not have an interest which is in substantial conflict with the proper discharge of his duties in the public interest and of his responsibilities as prescribed by the laws of this state, if any benefit or detriment accrues to him, his spouse, a dependent child, or a business with which he, his spouse or such dependent child is associated as a member of a profession, occupation or group to no greater

extent than any other member of such profession, occupation or group. A public official, including an elected state official or state employee who has a substantial conflict may not take official action on the matter.

(g) *Connecticut General Statutes Section 22a-171. (Formerly Sec. 19-507). Duties of Commissioner of Energy and Environmental Protection:* The Commissioner of Energy and Environmental Protection of the State of Connecticut shall:

(1) Initiate and supervise programs for the purposes of determining the causes, effect and hazards of air pollution;

(2) Initiate and supervise state-wide programs of air pollution control education;

(3) Cooperate with and receive money from the Federal Government and, with the approval of the Governor, from any other public or private source;

(4) Adopt, amend, repeal and enforce regulations as provided in Connecticut General Statutes Section 22a-174 and do any other act necessary to enforce the provisions of Connecticut General Statutes Chapter 446c and Connecticut General Statutes Section 14-164c;

(5) Advise and consult with agencies of the United States, agencies of the state, political subdivisions and industries and any other affected groups in furtherance of the purposes of Connecticut General Statutes Chapter 446c.

(h) [Reserved]

[40 FR 23280, May 29, 1975, as amended at 45 FR 84787, Dec. 23, 1980; 46 FR 34801, July 6, 1981; 46 FR 56615, Nov. 18, 1981; 46 FR 62062, Dec. 22, 1981; 47 FR 763, Jan. 7, 1982; 47 FR 36823, Aug. 24, 1982; 47 FR 41959, Sept. 23, 1982; 47 FR 49646, Nov. 2, 1982; 47 FR 51129, Nov. 12, 1982; 48 FR 5724, Feb. 8, 1983; 50 FR 50907, Dec. 13, 1985; 65 FR 62623, Oct. 19, 2000; 81 FR 35639, June 3, 2016; 83 FR 37439, Aug. 1, 2018]

§ 52.381 Requirements for state implementation plan revisions relating to new motor vehicles.

Connecticut must comply with the requirements of § 51.120.

[60 FR 4737, Jan. 24, 1995]

§ 52.382 Significant deterioration of air quality.

(a) The requirements of sections 160 through 165 of the Clean Air Act are not met, since the plan does not include approvable provisions for the NO₂ increments under the prevention of significant deterioration program.

(b) The increments for nitrogen dioxide promulgated on October 17, 1988 (53 FR 40671), and related requirements in 40 CFR 52.21 except paragraph (a)(1), are hereby incorporated and made part of the applicable implementation plan for the State of Connecticut.

[58 FR 10964, Feb. 23, 1993, as amended at 68 FR 11322, Mar. 10, 2003; 68 FR 74488, Dec. 24, 2003]

§ 52.383 Stack height review.

The State of Connecticut has declared to the satisfaction of EPA that no existing emission limitations have been affected by stack height credits greater than good engineering practice or any other prohibited dispersion techniques as defined on EPA's stack height regulations as revised on July 8, 1985. Such declarations were submitted to EPA on February 21, 1986, and May 27, 1986.

[52 FR 49407, Dec. 31, 1987]

§ 52.384 Emission inventories.

(a) The Governor's designee for the State of Connecticut submitted the 1990 base year emission inventories for the Connecticut portion of the New York-New Jersey-Connecticut severe ozone nonattainment area and the Greater Hartford serious ozone nonattainment area on January 13, 1994 as revisions to the State's SIP. Revisions to the inventories were submitted on February 3, 1994, February 16, 1995, and December 30, 1997. The 1990 base year emission inventory requirement of section 182(a)(1) of the Clean Air Act, as amended in 1990, has been satisfied for these areas.

(b) The inventories are for the ozone precursors which are volatile organic compounds, nitrogen oxides, and carbon monoxide. The inventories covers point, area, non-road mobile, on-road mobile, and biogenic sources.

(c) Taken together, the Connecticut portion of the New York-New Jersey-

Connecticut severe nonattainment area and the Hartford serious nonattainment area encompass the entire geographic area of the State.

(d) The state of Connecticut submitted base year emission inventories representing emissions for calendar year 2002 from the Connecticut portion of the NY-NJ-CT moderate 8-hour ozone nonattainment area and the Greater Connecticut moderate 8-hour ozone nonattainment area on February 1, 2008 as revisions to the State's SIP. The 2002 base year emission inventory requirement of section 182(a)(1) of the Clean Air Act, as amended in 1990, has been satisfied for these areas. The inventories consist of emission estimates of volatile organic compounds and nitrogen oxides, and cover point, area, non-road mobile, on-road mobile and biogenic sources. The inventories were submitted as revisions to the SIP in partial fulfillment of obligations for nonattainment areas under EPA's 1997 8-hour ozone standard.

(e) The State of Connecticut submitted base year emission inventories representing emissions for calendar year 2011 from the Connecticut portion of the NY-NJ-CT moderate 8-hour ozone nonattainment area and the Greater Connecticut moderate 8-hour ozone nonattainment area on March 9, 2016, as revisions to the State's SIP. The 2011 base year emission inventory requirement of section 182(a)(1) of the Clean Air Act, as amended in 1990, has been satisfied for these areas. The inventories consist of emission estimates of volatile organic compounds and nitrogen oxides, and cover point, area, non-road mobile, on-road mobile and biogenic sources. The inventories were submitted as revisions to the SIP in partial fulfillment of obligations for nonattainment areas under EPA's 2008 8-hour ozone standard.

[62 FR 55340, Oct. 24, 1997, as amended at 65 FR 62626, Oct. 19, 2000; 77 FR 50600, Aug. 22, 2012; 83 FR 49298, Oct. 1, 2018]

Environmental Protection Agency

§ 52.385

§ 52.385 EPA-approved Connecticut regulations.

The following table identifies the State regulations which have been submitted to and approved by EPA as revisions to the Connecticut State Implementation Plan. This table is for infor-

mational purposes only and does not have any independent regulatory effect. To determine regulatory requirements for a specific situation, consult the plan identified in § 52.370. To the extent that this table conflicts with § 52.370, § 52.370 governs.

		11/2/1981	11/18/1981	46 FR 56612 ...	(c) 18	Approval State Energy Trade program.
		11/14/1975	11/18/1981	46 FR 56612 ...	52.380 (e)(1)	EPA disapproval revision which allows exemption for home heating with coal, historic demonstrations, and other small sources.
		11/12/1981	12/22/1981	46 FR 62062 ...	(c) 19	Variances for United Technologies Corp., Pratt & Whitney Aircraft Division facilities in New Haven and Middletown.
		7/7/1981	11/12/1982	47 FR 51129 ...	(c) 24	Variance for Sikorsky Aircraft—approved under the State Energy Trade Program.
		5/27/1982	2/8/1983	48 FR 5723	(c) 26	Variance for Dow Chemical—approved under the State Energy Trade Program.
		12/15/1982	5/4/1983	48 FR 20051 ...	(c) 27	Variance for Lydall, Inc.—approved under the State Energy trade (SET) Program.
		11/1/1982	6/28/1983	48 FR 29689 ...	(c) 28	Simkins Industries—approved under the State Energy Trade Program.
		3/28/1983	12/20/1983	48 FR 56218 ...	(c) 30	Variance for Loomis Institute—approved under the State Energy Trade Program.
		2/19/1993	1/18/1994	59 FR 2531	(c) 63	Changes requirements at Hamilton Standard Division of UTC.
22a–174–19	Control of Sulfur Compound Emissions.	4/15/2014	5/25/2016	81 FR 33134 ...	(c)(111)	Revises section 22a–174–19.

TABLE 52.385—EPA-APPROVED REGULATIONS—Continued

Connecticut State citation	Title/subject	Dates		FEDERAL REG- ISTER citation	Section 52.370	Comments/descrip- tion
		Date adopt- ed by State	Date ap- proved by EPA			
22a-174-19a ...	Control of sulfur dioxide emissions from power plants and other large stationary sources of air pollution.	12/28/2000	7/10/2014	79 FR 39322 ...	(c)(103)	Approves the sulfur dioxide emission standards and fuel sulfur limits for units subject to the CT NO _x Budget program. The following sections were not submitted as part of the SIP: Sections (a)(5); (a)(8); (a)(11); (d); (e)(4); (f); (g); (h); and in (i)(2) reference to (e)(4). Section 22a-174-19a(c) was repealed by the State of Connecticut effective April 15, 2014 and removed from the SIP without replacement effective May 25, 2016.
22a-174-19a ...	Control of sulfur dioxide emissions from power plants and other stationary sources of air pollution.	4/15/2014	5/25/2016	81 FR 33134 ...	(c)(111)	Withdraws section 22a-174-19a(c) previously approved in paragraph 52.370(c)(103) and revises sections 22a-174-19a(e) and 22a-174-19a(i).
22a-174-19b ...	Fuel Sulfur Content Limitations for Stationary Sources.	4/15/2014	5/25/2016	81 FR 33134 ...	(c)(111)	Addition of a new regulation with the exception of subsection (e) which was not submitted by the State.
22a-174-20	Control of organic compound emissions.	4/4/1972	5/31/1972	37 FR 23085 ...	(b).	
		8/31/1979	12/23/1980	45 FR 84769 ...	(c) 11	Requirements for certain Group I CTG source categories. Conditionally approved cutback asphalt and solvent metal cleaning categories.
		10/10/1980	1/17/1982	47 FR 762	(c) 20	Requirements for cutback asphalt (Group I—CTG).

TABLE 52.385—EPA-APPROVED REGULATIONS—Continued

Connecticut State citation	Title/subject	Dates		FEDERAL REG- ISTER citation	Section 52.370	Comments/description
		Date adopt- ed by State	Date ap- proved by EPA			
		10/10/1980	2/17/1982	47 FR 6827	(c) 25	Requirements for Group II CTGs exclusive of controlling gasoline tank truck leaks, petroleum liquid storage external floating roof tanks, manufacture of vegetable oil, pneumatic rubber tire categories. Other VOC rules.
		10/10/1980	6/7/1982	47 FR 24452 ...	(c) 23	Alternative emission reduction provisions.
		12/10/1982	2/1/1984	49 FR 3989	(c) 29	Requirements for small open top degreasers (Group I—CTG).
		9/24/1983	2/1/1984	49 FR 3989	(c) 29	Exempts colds cleaners at auto repair facilities.
		9/24/1983	3/21/1984	49 FR 10542 ...	(c) 32	Adds degreasing requirements for conveyORIZED and cold cleaning operations.
		8/31/1979	3/21/1984	49 FR 10542 ...	(c) 32	Requirements for solvent metal cleaning (Group I CTG).
		9/24/1983	3/21/1984	49 FR 10542 ...	(c) 32	Exempts storage vessels from submerged fill. Delays effective date of Stage I vapor recovery by 1 year. Requires RACT for all major sources of VOC not covered under a CTG document.
		9/24/1983	10/19/1984	49 FR 41026 ...	(c) 33	Adds major non-ctg sources covered by 20(ee) to applicability, compliance, alternative emission reduction and seasonal operation after burner provisions.
		12/13/1984	7/18/1985	50 FR 29229 ...	(c) 34	Revision to cutback asphalt regulation. Requires facilities with external floating roofs to install secondary seats. Changes to gasoline tank truck regulation.
		4/23/1986	11/20/1986	51 FR 41963 ...	(c) 36	VOC RACT for Connecticut Charcoal Company.
		4/28/1986	2/19/1987	52 FR 5104	(c) 37	VOC RACT for King Industries.
		8/8/1987	12/17/1987	52 FR 47925 ...	(c) 39	VOC RACT for Belding Corticelli Thread Company.

[62 FR 52022, Oct. 6, 1997; 62 FR 65224, Dec. 11, 1997]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.385, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

§ 52.386 Section 110(a)(2) infrastructure requirements.

(a) The Connecticut Department of Energy and Environmental Protection submitted the following infrastructure SIPs on these dates: 2008 Pb NAAQS—October 13, 2011; 2008 ozone NAAQS—December 28, 2012; 2010 NO₂ NAAQS—January 2, 2013; and 2010 SO₂ NAAQS—May 30, 2013. These infrastructure SIPs are approved, with the exception of certain elements within 110(a)(2)(C)(ii), D(i)(II), and J(iii), which are conditionally approved. Connecticut submitted infrastructure SIPs for the 1997 and 2006 PM_{2.5} NAAQS on September 4, 2008, and September 18, 2009, respectively, and elements 110(a)(2)(A), D(ii), and E(ii), which were previously conditionally approved, are now approved. Also with respect to the 1997 and 2006 PM_{2.5} NAAQS, elements related to PSD, which include 110(a)(2)C(ii), D(i)(II), and J(iii) are newly conditionally approved. Connecticut also submitted an Infrastructure SIP for the 1997 8-hour ozone NAAQS on December 28, 2007, and element 110(a)(2)(D)(ii), which was previously conditionally approved, is now approved.

(b) On May 30, 2013, the State of Connecticut submitted a State Implemen-

tation Plan (SIP) revision addressing the Section 110(a)(2)(D)(i)(I) interstate transport requirements of the Clean Air Act for the 2010 SO₂ National Ambient Air Quality Standards (NAAQS). EPA has found that Connecticut's May 30, 2013 submittal meets the requirements of Section 110(a)(2)(D)(i)(I) for the 2010 SO₂ NAAQS.

(c) The Connecticut Department of Energy and Environmental Protection submitted the following infrastructure SIPs on these dates: 2006 PM_{2.5} NAAQS—August 19, 2011 (CAA section 110(a)(2)(D)(i)(I) transport provisions), and 2012 PM_{2.5} NAAQS—December 14, 2015. These infrastructure SIPs are approved. Also with respect to the 1997 and 2006 PM_{2.5}, 1997 and 2008 ozone, 2008 lead, 2010 nitrogen dioxide, and 2010 sulfur dioxide NAAQS, elements related to PSD, which are in CAA section 110(a)(2)(C), (D)(i)(II), and (J) and were previously conditionally approved, are now approved.

(d) The Connecticut Department of Energy and Environmental Protection submitted the following infrastructure SIP on this date: 2008 ozone NAAQS—June 15, 2015 (CAA section 110(a)(2)(D)(i)(I) transport provisions). This infrastructure SIP is approved.

(e) CT DEEP submitted an infrastructure SIP for the 2015 ozone NAAQS on September 7, 2018. This infrastructure SIP was approved, with the exception of CAA section 110(a)(2)(K) and the PSD-related requirements of CAA sections 110(a)(2)(D)(i)(II), 110(a)(2)(C), and 110(a)(2)(J), which were conditionally approved. On December 15, 2020, CT DEEP submitted SIP revisions to address the conditional approval. EPA fully approves the revised infrastructure SIP for the 2015 ozone NAAQS.

(f) The Connecticut Department of Energy and Environmental Protection submitted the following infrastructure SIP on this date: 2015 ozone NAAQS—December 6, 2018 (CAA § 110(a)(2)(D)(i)(I) transport provisions). This infrastructure SIP is approved.

[81 FR 35640, June 3, 2016, as amended at 82 FR 37015, Aug. 8, 2017; 83 FR 37440, Aug. 1, 2018; 85 FR 8406, Feb. 14, 2020; 85 FR 50955, Aug. 19, 2020; 86 FR 71831, Dec. 20, 2021; 88 FR 60594, Sept. 5, 2023]

§ 52.387 Interstate Transport for the 1997 8-hour ozone and PM_{2.5} NAAQS.

On March 13, 2007, the State of Connecticut submitted a State Implementation Plan (SIP) revision addressing the Section 110(a)(2)(D)(i) interstate transport requirements of the Clean Air Act for the 1997 8-hour ozone and PM_{2.5} National Ambient Air Quality Standards (NAAQS). There are four distinct elements related to the impact of interstate transport of air pollutants. These include prohibiting significant contribution to downwind nonattainment of the NAAQS, interference with maintenance of the NAAQS, interference with plans in another state to prevent significant deterioration of air quality, and interference with efforts of other states to protect visibility. EPA has found that Connecticut's March 13, 2007 submittal adequately addresses these four distinct elements and has approved the submittal as meeting the requirements of Section 110(a)(2)(D)(i) for the 1997 8-hour ozone and PM_{2.5} NAAQS.

[73 FR 25518, May 7, 2008]

Subpart I—Delaware

§ 52.420 Identification of plan.

(a) *Purpose and scope.* This section sets forth the applicable State implementation plan for Delaware under section 110 of the Clean Air Act, 42 U.S.C. 7410, and 40 CFR part 51 to meet national ambient air quality standards.

(b) *Incorporation by reference.* (1) Material listed in paragraphs (c) and (d) of this section with an EPA approval date prior to May 25, 2018, was approved for incorporation by reference by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Entries in paragraphs (c) and (d) of this section with the EPA approval dates after May 25, 2018 for the State of Delaware have been approved by EPA for inclusion in the State implementation plan and for incorporation by reference into the plan as it is contained in this section, and will be considered by the Director of the Federal Register for approval in the next update to the SIP compilation.

(2) EPA Region III certifies that the materials provided by EPA at the addresses in paragraph (b)(3) of this section are an exact duplicate of the officially promulgated State rules/regulations which have been approved as part of the State implementation plan as of the dates referenced in paragraph (b)(1) of this section.

(3) Copies of the materials incorporated by reference into the State implementation plan may be inspected at the Environmental Protection Agency, Region III, 1650 Arch Street, Philadelphia, Pennsylvania 19103. To obtain the material, please call the Regional Office at (215) 814-3376. You may also inspect the material with an EPA approval date prior to May 25, 2018 for the State of Delaware at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, go to: <http://www.archives.gov/federal-register/cfr/ibr-locations.html>.

(c) *EPA approved regulations.*

EPA-APPROVED REGULATIONS AND STATUTES IN THE DELAWARE SIP

State regulation (7 DNREC 1100)	Title/subject	State effective date	EPA approval date	Additional explanation
1101 Definitions and Administrative Principles				
Section 1.0 Section 2.0	General Provisions Definitions	9/11/2008 9/11/2008	8/11/2010, 75 FR 48566. 8/11/2010, 75 FR 48566	Revised format for all definitions which EPA has previously approved as part of the SIP.
Section 2.0	Definitions	9/10/2009	5/31/2019, 84 FR 25183	
Section 2.0	Definitions	12/11/2016	12/12/2019, 84 FR 67873	Updated definition of volatile organic compound. Previous approval 5/31/2019.
Section 3.0 Section 4.0	Administrative Principles Abbreviations	9/11/2008 9/11/2008	8/11/2010, 75 FR 48566. 8/11/2010, 75 FR 48566.	
1102 Permits				
Section 1.0 Section 2.0 Section 3.0	General Provisions Applicability Application/Registration Prepared by Interested Party.	9/11/2008 9/11/2008 9/11/2008	8/11/2010, 75 FR 48566. 8/11/2010, 75 FR 48566. 8/11/2010, 75 FR 48566.	Subsections 12.3.2 and 12.4.2 are amended. Addition of paragraphs 32.0 and 33.0 (formerly gg. and hh. respectively).
Section 4.0	Cancellation of Construction Permits.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 5.0	Action on Applications	9/11/2008	8/11/2010, 75 FR 48566.	
Section 6.0	Denial, Suspension or Revocation of Operating Permits.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 7.0	Transfer of Permit/Registration Prohibited.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 8.0	Availability of Permit/Registration	9/11/2008	8/11/2010, 75 FR 48566.	
Section 9.0	Registration Submittal	9/11/2008	8/11/2010, 75 FR 48566.	
Section 10.0	Source Category Permit Application	9/11/2008	8/11/2010, 75 FR 48566.	
Section 11.0	Permit Application	9/11/2008	8/11/2010, 75 FR 48566.	
Section 12.0	Public Participation	8/11/2022	5/16/2024, 89 FR 42812	
Section 13.0	Department Records	9/11/2008	8/11/2010, 75 FR 48566.	
Appendix A	[List of Permits Exemptions]	1/11/2006 9/11/2008	12/4/2012, 77 FR 71700	
1103 Ambient Air Quality Standards				
Section 1.0 Section 2.0 Section 3.0 Section 4.0 Section 5.0 Section 6.0 Section 8.0 Section 10.0 Section 11.0	General Provisions General Restrictions Suspended Particulates Sulfur Dioxide Carbon Monoxide Ozone Nitrogen Dioxide Lead PM ₁₀ and PM _{2.5} Particulates	08/11/2022 9/11/2008 9/11/2008 08/11/2022 08/11/2022 08/11/2022 08/11/2022 08/11/2022 08/11/2022	12/23/2024, 89 FR 104431 .. 8/11/2010, 75 FR 48566. 8/11/2010, 75 FR 48566. 12/23/2024, 89 FR 104431 .. 12/23/2024, 89 FR 104431 .. 12/23/2024, 89 FR 104431 .. 12/23/2024, 89 FR 104431 .. 12/23/2024, 89 FR 104431 .. 12/23/2024, 89 FR 104431 .. EPA-APPROVED REGULATIONS AND STATUTES IN THE DELAWARE SIP—Continued

State regulation (7 DNREC 1100)	Title/subject	State effective date	EPA approval date	Additional expla- nation
Section 3.0	Restrictions on Hot Mix Asphalt Batching Operations.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 4.0	Restrictions on Secondary Metal Operations.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 5.0	Restrictions on Petroleum Refining Operations.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 6.0	Restrictions on Prill Tower Operation.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 7.0	Control of Potentially Hazardous Particulate Matter.	9/11/2008	8/11/2010, 75 FR 48566.	
1106 Particulate Emissions from Construction and Materials Handling				
Section 1.0	General Provisions	9/11/2008	8/11/2010, 75 FR 48566.	
Section 2.0	Demolition	9/11/2008	8/11/2010, 75 FR 48566.	
Section 3.0	Grading, Land Clearing, Excavation and Use of Non-Paved Roads.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 4.0	Material Movement	9/11/2008	8/11/2010, 75 FR 48566.	
Section 5.0	Sandblasting	9/11/2008	8/11/2010, 75 FR 48566.	
Section 6.0	Material Storage	9/11/2008	8/11/2010, 75 FR 48566.	
1107 Particulate Emissions from Incineration of Noninfectious Waste				
Section 1.0	General Provisions	9/11/2008	8/11/2010, 75 FR 48566.	Provisions were re- vised 10/13/1989 by State, but not submitted to EPA as SIP revisions.
Section 2	Restrictions	12/8/1983	10/3/1984, 49 FR 39061	
1108 Sulfur Dioxide Emissions from Fuel Burning Equipment				
Section 1.0	General Provisions	7/11/2013	7/11/2022, 87 FR 41074.	
Section 2.0	Limit on Sulfur Content of Fuel	7/11/2013	7/11/2022, 87 FR 41074.	
Section 3.0	Emissions Control in Lieu of Sulfur Content Limits of 2.0 of this Regulation.	7/11/2013	7/11/2022, 87 FR 41074.	
Section 4.0	Sampling and Testing Methods and Requirements.	7/11/2013	7/11/2022, 87 FR 41074.	
Section 5.0	Recordkeeping and Reporting	7/11/2013	7/11/2022, 87 FR 41074.	
1109 Emissions of Sulfur Compounds from Industrial Operations				
Section 1.0	General Provisions	9/11/2008	8/11/2010, 75 FR 48566.	Section 2.2 (State ef- fective date: 9/26/ 1980) is Federally enforceable as a Section 111(d) plan and codified at 40 CFR 62.1875.
Section 2.0	Restrictions on Sulfuric Acid Manu- facturing Operations.	9/11/2008	8/11/2010, 75 FR 48566	
Section 3.0	Restriction on Sulfur Recovery Op- erations.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 4.0	Stack Height Requirements	9/11/2008	8/11/2010, 75 FR 48566.	
1110 Control of Sulfur Dioxide Emissions—Kent and Sussex Counties				
Section 1.0	Requirements for Existing Sources of Sulfur Dioxide.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 2.0	Requirements for New Sources of Sulfur Dioxide.	9/11/2008	8/11/2010, 75 FR 48566.	
1111 Carbon Monoxide Emissions from Industrial Process Operations—New Castle County				
Section 1.0	General Provisions	9/11/2008	8/11/2010, 75 FR 48566.	
Section 2.0	Restrictions on Petroleum Refining Operations.	9/11/2008	8/11/2010, 75 FR 48566.	
1112 Control of Nitrogen Oxides Emissions				
Section 1.0	Applicability	9/11/2008	8/11/2010, 75 FR 48566.	

EPA-APPROVED REGULATIONS AND STATUTES IN THE DELAWARE SIP—Continued

State regulation (7 DNREC 1100)	Title/subject	State effective date	EPA approval date	Additional explanation
Section 2.0	Definitions	9/11/2008	8/11/2010, 75 FR 48566.	
Section 3.0	Standards	9/11/2008	8/11/2010, 75 FR 48566.	
Section 4.0	Exemptions	9/11/2008	8/11/2010, 75 FR 48566.	
Section 5.0	Alternative and Equivalent RACT Determination.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 6.0	RACT Proposals	9/11/2008	8/11/2010, 75 FR 48566.	
Section 7.0	Compliance, Certification, Record- keeping, and Reporting Require- ments.	9/11/2008	8/11/2010, 75 FR 48566.	
1113 Open Burning				
Section 1.0	Purpose	4/11/2007	9/20/2007 72 FR 53686.	
Section 2.0	Applicability	4/11/2007	9/20/2007 72 FR 53686.	
Section 3.0	Definitions	9/11/2008	8/11/2010, 75 FR 48566.	
Section 4.0	Prohibitions and Related Provisions	9/11/2008	8/11/2010, 75 FR 48566.	
Section 5.0	Season and Time Restrictions	9/11/2008	8/11/2010, 75 FR 48566.	
Section 6.0	Allowable Open Burning	9/11/2008	8/11/2010, 75 FR 48566.	
Section 7.0	Exemptions	4/11/2007	9/20/2007 72 FR 53686.	
1114 Visible Emissions				
Section 1.0	General Provisions	9/11/2008	8/2/2019, 84 FR 37772	Remove the phrase, “except electric arc furnaces and their associated dust-handling equipment as set forth in 2.2 of this regulation.”
Section 2.0	Requirements	9/11/2008	8/2/2019, 84 FR 37772	Remove the require- ment of 2.2, which reads “2.2 The re- quirements of 2.1 of this regulation shall not apply to electric arc fur- naces, and their associated dust- handling equip- ment, with a ca- pacity of more than 100 tons which are gov- erned by 7 DE Admin. Code 1123.”
Section 3.0	Alternate Opacity Requirements	9/11/2008	8/11/2010, 75 FR 48566.	
Section 4.0	Compliance with Opacity Standards	9/11/2008	8/11/2010, 75 FR 48566.	
1115 Air Pollution Alert and Emergency Plan				
Section 1.0	General Provisions	9/11/2008	8/11/2010, 75 FR 48566.	
Section 2.0	Stages and Criteria	9/11/2008	8/11/2010, 75 FR 48566.	
Section 3.0	Required Actions	9/11/2008	8/11/2010, 75 FR 48566.	
Section 4.0	Standby Plans	9/11/2008	8/11/2010, 75 FR 48566.	
1116 Sources Having an Interstate Air Pollution Potential				
Section 1.0	General Provisions	9/11/2008	8/11/2010, 75 FR 48566.	
Section 2.0	Limitations	9/11/2008	8/11/2010, 75 FR 48566.	
Section 3.0	Requirements	9/11/2008	8/11/2010, 75 FR 48566.	
1117 Source Monitoring, Recordkeeping and Reporting				
Section 1.0	Definitions and Administrative Prin- ciples.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 2.0	Sampling and Monitoring	9/11/2008	8/11/2010, 75 FR 48566.

EPA-APPROVED REGULATIONS AND STATUTES IN THE DELAWARE SIP—Continued

State regulation (7 DNREC 1100)	Title/subject	State effective date	EPA approval date	Additional explanation
Section 3.0	Minimum Emission Monitoring Requirements for Existing Sources.	9/11/2008	8/2/2019, 84 FR 37772	Revise 3.2 so that it reads, "3.2 Fuel Burning Equipment—Fuel burning equipment except as provided in 3.2 through 3.4 of this regulation . . ." And remove 3.5, "Electric arc furnaces—See 7 DE Admin. Code 1123."
Section 4.0	Performance Specifications	9/11/2008	8/11/2010, 75 FR 48566.	
Section 5.0	Minimum Data Requirements	9/11/2008	8/11/2010, 75 FR 48566.	
Section 6.0	Data Reduction	9/11/2008	8/11/2010, 75 FR 48566.	
Section 7.0	Emission Statement	9/11/2008	8/11/2010, 75 FR 48566.	
1124 Control of Volatile Organic Compound Emissions				
Section 1.0	General Provisions	1/11/2017	2/14/2023, 88 FR 9399	Removing sub-section 1.4 from the Delaware SIP. Previous approval August 11, 2010.
Section 2.0	Definitions	4/11/2010	9/25/2012, 77 FR 58953	Amended to add definitions.
Section 3.0	Applicability	9/11/2008	8/11/2010, 75 FR 48566.	
Section 4.0	Compliance Certification, Record-keeping, and Reporting Requirements for Coating Sources.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 5.0	Compliance Certification, Record-keeping, and Reporting Requirements for Non-Coating Sources.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 6.0	General Recordkeeping	9/11/2008	8/11/2010, 75 FR 48566.	
Section 7.0	Circumvention	9/11/2008	8/11/2010, 75 FR 48566.	
Section 8.0	Handling, Storage, and Disposal of Volatile Organic Compounds (VOCs).	3/11/2011	4/13/2012, 77 FR 22224.	
Section 9.0	Compliance, Permits, Enforceability	9/11/2008	8/11/2010, 75 FR 48566.	
Section 10.0	Aerospace Coatings	9/11/2008	8/11/2010, 75 FR 48566.	
Section 11.0	Mobile Equipment Repair and Refinishing.	10/11/2010	3/31/2022, 87 FR 18699.	
Section 12.0	Surface Coating of Plastic Parts	10/11/2011	9/25/2012, 77 FR 58953.	
Section 13.0	Automobile and Light-Duty Truck Coating Operations.	3/11/2011	4/13/2012, 77 FR 22224.	
Section 14.0	Can Coating	9/11/2008	8/11/2010, 75 FR 48566.	
Section 15.0	Coil Coating	9/11/2008	8/11/2010, 75 FR 48566.	
Section 16.0	Paper Coating	3/11/2011	4/13/2012, 77 FR 22224	Amended to add "film and foil coating" to the regulated category.
Section 17.0	Fabric Coating	9/11/2008	8/11/2010, 75 FR 48566.	
Section 18.0	Vinyl Coating	9/11/2008	8/11/2010, 75 FR 48566.	
Section 19.0	Coating of Metal Furniture	10/11/2011	9/25/2012, 77 FR 58953.	
Section 20.0	Coating of Large Appliances	10/11/2011	9/25/2012, 77 FR 58953.	
Section 21.0	Coating of Magnet Wire	9/11/2008	8/11/2010, 75 FR 48566.	
Section 22.0	Coating of Miscellaneous Metal Parts.	10/11/2011	9/25/2012, 77 FR 58953.	
Section 23.0	Coating of Flat Wood Panelling	3/11/2011	4/13/2012, 77 FR 22224.	
Section 24.0	Bulk Gasoline Plants	9/11/2008	8/11/2010, 75 FR 48566.	
Section 25.0	Bulk Gasoline Terminals	9/11/2008	8/11/2010, 75 FR 48566.	

EPA-APPROVED REGULATIONS AND STATUTES IN THE DELAWARE SIP—Continued

State regulation (7 DNREC 1100)	Title/subject	State effective date	EPA approval date	Additional explanation
Section 26.0	Gasoline Dispensing Facility Stage I Vapor Recovery.	4/11/2021	6/10/2022, 87 FR 35423	Includes revisions issued on August 17, 2015 via 19 DE Reg. 199 (state effective date September 11, 2015), revisions issued on June 11, 2020 via 24 DE Reg. 61 (state effective date July 11, 2020), and revisions issued on March 11, 2021 via 24 DE Reg. 944 (state effective date April 11, 2021). Includes mandate to install, maintain, and periodically test Stage I enhanced vapor recovery systems (EVRs) at Gasoline Dispensing Facilities (GDFs) in Delaware; associated compliance schedules; and updates related incorporations by reference.
Section 27.0	Gasoline Tank Trucks	9/11/2008	8/11/2010, 75 FR 48566.	
Section 28.0	Petroleum Refinery Sources	9/11/2008	8/11/2010, 75 FR 48566.	
Section 29.0	Leaks from Petroleum Refinery Equipment.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 30.0	Petroleum Liquid Storage in External Floating Roof Tanks.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 31.0	Petroleum Liquid Storage in Fixed Roof Tanks.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 32.0	Leaks from Natural Gas/Gasoline Processing Equipment.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 33.0	Solvent Metal Cleaning and Drying	8/11/2021	10/4/2022, 87 FR 60102.	
Section 34.0	Cutback and Emulsified Asphalt	9/11/2008	8/11/2010, 75 FR 48566.	
Section 35.0	Manufacture of Synthesized Pharmaceutical Products.	9/11/2008	8/11/2010, 75 FR 48566.	

Environmental Protection Agency

EPA-APPROVED REGULATIONS AND STATUTES IN THE DELAWARE SIP—Continued

State regulation (7 DNREC 1100)	Title/subject	State effective date	EPA approval date	Additional expla- nation
Section 36.0	Vapor Emission Control at Gasoline Dispensing Facilities.	4/11/2021	6/10/2022, 87 FR 35423	Includes revisions issued on August 17, 2015 via 19 DE Reg. 199 (state effective date September 11, 2015), revisions issued on June 11, 2020 via 24 DE Reg. 61 (state effective date July 11, 2020), and revisions issued on March 11, 2021 via 24 DE Reg. 944 (state effective date April 11, 2021). Includes mandate to decommission Stage II vapor recovery systems (VRS) at Gasoline Dispensing Facilities (GDFs) in Delaware; associated compliance schedules; and updates related incorporations by reference.
Section 37.0	Graphic Arts Systems	3/11/2011	4/13/2012 77 FR 22224	Amended to add "flexible packaging printing" to the regulated category.
Section 38.0	Petroleum Solvent Dry Cleaners	9/11/2008	8/11/2010, 75 FR 48566.	
Section 40.0	Leaks from Synthetic Organic Chemical, Polymer, and Resin Manufacturing Equipment.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 41.0	Manufacture of High-Density Polyethylene, Polypropylene and Polystyrene Resins.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 42.0	Air Oxidation Processes in the Synthetic Organic Chemical Manufacturing Industry.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 43.0	Bulk Gasoline Marine Tank Vessel Loading Facilities.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 44.0	Batch Processing Operations	9/11/2008	8/11/2010, 75 FR 48566.	
Section 45.0	Industrial Cleaning Solvents	3/11/2011	4/13/2012, 77 FR 22224.	
Section 46.0	Crude Oil Lightering Operations	9/11/2008	8/11/2010, 75 FR 48566.	
Section 47.0	Offset Lithographic Printing and Letterpress Printing.	4/11/2011	11/25/2011, 76 FR 72626	Amendments to Sections 47.1 through 47.6 to include control requirements for letterpress printing.
Section 48.0	Reactor Processes and Distillation Operations in the Synthetic Organic Chemical Manufacturing Industry.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 49.0	Control of Volatile Organic Compound Emissions from Volatile Organic Liquid Storage Vessels.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 50.0	Other Facilities that Emit Volatile Organic Compounds (VOCs).	9/11/2008	8/11/2010, 75 FR 48566	The SIP effective date for former Sections 50(a)(5) and 50(b)(3) is 5/1/98.

EPA-APPROVED REGULATIONS AND STATUTES IN THE DELAWARE SIP—Continued

State regulation (7 DNREC 1100)	Title/subject	State effective date	EPA approval date	Additional explanation
Appendix A	Test Methods and Compliance Procedures: General Provisions.	9/11/2008	8/11/2010, 75 FR 48566.	
Appendix B	Test Methods and Compliance Procedures: Determining the Volatile Organic Compound (VOC) Content of Coatings and Inks.	9/11/2008	8/11/2010, 75 FR 48566.	
Appendix C	Test Methods and Compliance Procedures: Alternative Compliance Methods for Surface Coating.	9/11/2008	8/11/2010, 75 FR 48566.	
Appendix D	Test Methods and Compliance Procedures: Emission Capture and Destruction or Removal Efficiency and Monitoring Requirements.	9/11/2008	8/11/2010, 75 FR 48566.	
Appendix E	Test Methods and Compliance Procedures: Determining the Destruction or Removal Efficiency of a Control Device.	9/11/2008	8/11/2010, 75 FR 48566.	
Appendix F	Test Methods and Compliance Procedures: Leak Detection Methods for Volatile Organic Compounds (VOCs).	9/11/2008	8/11/2010, 75 FR 48566.	
Appendix G	Performance Specifications for Continuous Emissions Monitoring of Total Hydrocarbons.	9/11/2008	8/11/2010, 75 FR 48566.	
Appendix H	Quality Control Procedures for Continuous Emission Monitoring Systems (CEMS).	9/11/2008	8/11/2010, 75 FR 48566.	
Appendix I	Method to Determine Length of Rolling Period for Liquid/Liquid Material Balance.	9/11/2008	8/11/2010, 75 FR 48566.	
Appendix K	Emission Estimation Methodologies	9/11/2008	8/11/2010, 75 FR 48566.	
Appendix L	Method to Determine Total Organic Carbon for Offset Lithographic Solutions.	9/11/2008	8/11/2010, 75 FR 48566.	
Appendix M	Test Method for Determining the Performance of Alternative Cleaning Fluids.	9/11/2008	8/11/2010, 75 FR 48566.	
1125 Requirements for Preconstruction Review				
Section 1.0	General Provisions	8/11/2012	2/28/2013, 78 FR 13496	Added definitions of “GHG” and “Subject to Regulation” under Section 1.9. Note: In section 1.9, the previous SIP-approved baseline dates for sulfur dioxide, particulate matter, and nitrogen dioxide in the definition of “Baseline Date” remain part of the SIP.
Section 2.0	Emission Offset Provisions (EOP) including sections 1.0 through 3.16.4.	2/11/12	10/2/12, 77 FR 60053	Added Section 2.2.5, 2.4.3.3 and 2.5.7.
	Sections 2.5.5 and 2.5.6	9/11/2013	10/20/2016, 81 FR 72529	Disapproval. See 40 CFR 52.433(a).
Section 3.0	Prevention of Significant Deterioration of Air Quality.	1/11/2020	5/1/2020, 85 FR 25307	Docket #: 2019–0663. Revised 3.10.1 and 3.10.2. Note: Previous Section 3.0 approval October 2, 2012.

EPA-APPROVED REGULATIONS AND STATUTES IN THE DELAWARE SIP—Continued

State regulation (7 DNREC 1100)	Title/subject	State effective date	EPA approval date	Additional explanation
1126 Motor Vehicle Inspection Program—Sussex County				
Section 1.0	Applicability and General Provisions	1/1/2023	11/4/2024, 89 FR 87500	Regulation 1126 applies to Sussex County only, as of November 1, 1999.
Section 2.0	Definitions	1/1/2023	11/4/2024, 89 FR 87500	
Section 4.0	Vehicle Inspection Requirements	1/1/2023	11/4/2024, 89 FR 87500	
Section 5.0	Motor Vehicle Anti-Tampering Requirements.	1/1/2023	11/4/2024, 89 FR 87500	
Section 6.0	On-Road Inspection Standards and Test Procedures.	1/1/2023	11/4/2024, 89 FR 87500	
Section 7.0	Vehicle Emission Inspection Waivers.	1/1/2023	11/4/2024, 89 FR 87500	
Section 8.0	Certified Emission Repair Technicians.	1/1/2023	11/4/2024, 89 FR 87500	
Section 9.0	Enforcement and Registration Denial.	1/1/2023	11/4/2024, 89 FR 87500	
1127 Stack Heights				
Section 1.0	General Provisions	9/11/2008	8/11/2010, 75 FR 48566.	
Section 2.0	Definitions Specific to this Regulation.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 3.0	Requirements for Existing and New Sources.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 4.0	Public Notification	9/11/2008	8/11/2010, 75 FR 48566.	
1131 Motor Vehicle Emissions Inspection Program—Kent And New Castle Counties				
Section 1.0	Purpose	1/1/23	11/4/2024, 89 FR 87500	Regulation 1131 Applies To Kent And New Castle Counties.
Section 2.0	Applicability and General Provisions	1/1/2023	11/4/2024, 89 FR 87500	
Section 3.0	Definitions	1/1/2023	11/4/2024, 89 FR 87500	
Section 4.0	Vehicle Inspection Requirements	1/1/2023	11/4/2024, 89 FR 87500	
Section 5.0	Motor Vehicle Anti-Tampering Requirements.	1/1/2023	11/4/2024, 89 FR 87500	
Section 6.0	On-Road Inspection Standards and Test Procedures.	1/1/2023	11/4/2024, 89 FR 87500	
Section 7.0	Vehicle Emission Inspection Waivers.	1/1/2023	11/4/2024, 89 FR 87500	
Section 8.0	Certified Emission Repair Technician.	1/1/2023	11/4/2024, 89 FR 87500	
Section 9.0	Enforcement and Registration Denial.	1/1/2023	11/4/2024, 89 FR 87500	
1132 Transportation Conformity				
Introductory Paragraph.	[No Title]	9/11/2008	8/11/2010, 75 FR 48566	Replaces the Prologue.
Section 1.0	Purpose	11/11/2007	4/22/2008, 73 FR 21538.	
Section 2.0	Definitions	9/11/2008	8/11/2010, 75 FR 48566.	
Section 3.0	Consultation	9/11/2008	8/11/2010, 75 FR 48566.	
Section 4.0	Written Commitments For Control and Mitigation Measures.	9/11/2008	8/11/2010, 75 FR 48566.	
1135 Conformity of General Federal Actions to the State Implementation Plans				
Section 1.0	Purpose	9/11/2008	8/11/2010, 75 FR 48566.	
Section 2.0	Definitions	9/11/2008	8/11/2010, 75 FR 48566.	
Section 3.0	Applicability	9/11/2008	8/11/2010, 75 FR 48566.	
Section 4.0	Conformity Analysis	9/11/2008	8/11/2010, 75 FR 48566.	
Section 5.0	Reporting Requirements	9/11/2008	8/11/2010, 75 FR 48566.	
Section 6.0	Public Participation and Consultation.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 7.0	Frequency of Conformity Determinations.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 8.0	Criteria for Determining Conformity of General Federal Actions.	9/11/2008	8/11/2010, 75 FR 48566.	

EPA-APPROVED REGULATIONS AND STATUTES IN THE DELAWARE SIP—Continued

State regulation (7 DNREC 1100)	Title/subject	State effective date	EPA approval date	Additional explanation
Section 9.0	Procedures for Conformity Determinations of General Federal Actions.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 10.0	Mitigation of Air Quality Impacts	9/11/2008	8/11/2010, 75 FR 48566.	
Section 11.0	Savings Provision	9/11/2008	8/11/2010, 75 FR 48566.	
Regulation No. 37 NO_x Budget Program				
Section 1	General Provisions	12/11/1999	3/9/2000, 65 FR 12481.	
Section 2	Applicability	12/11/1999	3/9/2000, 65 FR 12481.	
Section 3	Definitions	12/11/99	3/9/00 65 FR 12481.	
Section 4	Allowance Allocation	12/11/1999	3/9/2000, 65 FR 12481.	
Section 5	Permits	12/11/1999	3/9/2000, 65 FR 12481.	
Section 6	Establishment of Compliance Accounts.	12/11/1999	3/9/2000, 65 FR 12481.	
Section 7	Establishment of General Accounts	12/11/1999	3/9/2000, 65 FR 12481.	
Section 8	Opt In Provisions	12/11/1999	3/9/2000, 65 FR 12481.	
Section 9	New Budget Source Provisions	12/11/1999	3/9/2000, 65 FR 12481.	
Section 10	NO _x Allowance Tracking System (NATS).	12/11/1999	3/9/2000, 65 FR 12481.	
Section 11	Allowance Transfer	12/11/1999	3/9/2000, 65 FR 12481.	
Section 12	Allowance Banking	12/11/1999	3/9/2000, 65 FR 12481.	
Section 13	Emission Monitoring	12/11/1999	3/9/2000, 65 FR 12481.	
Section 14	Recordkeeping	12/11/1999	3/9/2000, 65 FR 12481.	
Section 15	Emissions Reporting	12/11/1999	3/9/2000, 65 FR 12481.	
Section 16	End-of Season Reconciliation	12/11/1999	3/9/2000, 65 FR 12481.	
Section 17	Compliance Certification	12/11/1999	3/9/2000, 65 FR 12481.	
Section 18	Failure to Meet Compliance Requirements.	12/11/1999	3/9/2000, 65 FR 12481.	
Section 19	Program Audit	12/11/1999	3/9/2000, 65 FR 12481.	
Section 20	Program Fees	12/11/1999	3/9/2000, 65 FR 12481.	
Appendix "A"	NO _x Budget Program	12/11/1999	3/9/2000, 65 FR 12481.	
1139 Nitrogen Oxides (NO_x) Budget Trading Program				
Section 1.0	Purpose	9/11/2008	8/11/2010, 75 FR 48566.	
Section 2.0	Emission Limitation	9/11/2008	8/11/2010, 75 FR 48566.	
Section 3.0	Applicability	9/11/2008	8/11/2010, 75 FR 48566.	
Section 4.0	Definitions	9/11/2008	8/11/2010, 75 FR 48566.	
Section 5.0	General Provisions	9/11/2008	8/11/2010, 75 FR 48566.	
Section 6.0	NO _x Authorized Account Representative for NO _x Budget Sources.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 7.0	Permits	9/11/2008	8/11/2010, 75 FR 48566.	
Section 8.0	Monitoring and Reporting	9/11/2008	8/11/2010, 75 FR 48566.	
Section 9.0	NATS	9/11/2008	8/11/2010, 75 FR 48566.	
Section 10.0	NO _x Allowance Transfers	9/11/2008	8/11/2010, 75 FR 48566.	
Section 11.0	Compliance Certification	9/11/2008	8/11/2010, 75 FR 48566.	
Section 12.0	End-of-Season Reconciliation	9/11/2008	8/11/2010, 75 FR 48566.	
Section 13.0	Failure to Meet Compliance Requirements.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 14.0	Individual Unit Opt-Ins	9/11/2008	8/11/2010, 75 FR 48566.	
Section 15.0	General Accounts	9/11/2008	8/11/2010, 75 FR 48566.	
Appendix A	Allowance Allocations to NO _x Budget Units under 3.1.1.1 and 3.1.1.2 of 7 DE Admin Code 1139.	9/11/2008	8/11/2010, 75 FR 48566.	
Appendix B	7 DE Admin Code 1137–7 DE Admin Code 1139 Program Transition.	9/11/2008	8/11/2010, 75 FR 48566.	
1140 Delaware Low Emission Vehicle Program				
Section 1.0	Purpose	12/11/2013	10/14/2015, 80 FR 61752.	
Section 2.0	Applicability	12/11/2013	10/14/2015, 80 FR 61752.	
Section 3.0	Definitions	12/11/2013	10/14/2015, 80 FR 61752.	
Section 4.0	Emission Certification Standards	12/11/2013	10/14/2015, 80 FR 61752.	
Section 5.0	New Vehicle Emission Requirements.	12/11/2013	10/14/2015, 80 FR 61752.	
Section 6.0	Manufacturer Fleet Requirements	12/11/2013	10/14/2015, 80 FR 61752.	
Section 7.0	Warranty	12/11/2013	10/14/2015, 80 FR 61752.

EPA-APPROVED REGULATIONS AND STATUTES IN THE DELAWARE SIP—Continued

State regulation (7 DNREC 1100)	Title/subject	State effective date	EPA approval date	Additional explanation
Section 8.0	Reporting and Record-Keeping Requirements.	12/11/2013	10/14/2015, 80 FR 61752.	
Section 9.0	Enforcement	12/11/13	10/14/15, 80 FR 61752.	
Section 10.0	Incorporation by Reference	12/11/2013	10/14/2015, 80 FR 61752.	
Section 11.0	Document Availability	12/11/2013	10/14/2015, 80 FR 61752.	
Section 12.0	Severability	12/11/2013	10/14/2015, 80 FR 61752.	
1141 Limiting Emissions of Volatile Organic Compounds from Consumer and Commercial Products				
Section 1.0	Architectural and Industrial Maintenance Coatings.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 2.0	Consumer Products	4/11/2009	10/20/2010, 75 FR 64673.	
Section 3.0	Portable Fuel Containers	4/11/2010	12/14/2010, 75 FR 77758.	
Section 4.0	Adhesives & Sealants	4/11/2009	12/22/2011, 76 FR 79537	Addition of VOC limits for adhesive and sealant products, including 25 adhesives, 4 adhesive primers, 5 sealants, and 3 sealant primers.
1142 Specific Emission Control Requirements				
Section 1.0	Control of NO _x Emissions from Industrial Boilers.	1/11/2017	2/14/2023, 88 FR 9399	Making small, non-substantive style changes. Previous approval August 11, 2010.
Section 2.0	Control of NO _x Emissions from Industrial Boilers and Process Heaters at Petroleum Refineries.	1/11/2017	2/14/2023, 88 FR 9399	Removing subsection 2.3.1.6 from the Delaware SIP and making small, non-substantive style changes. Previous approval May 15, 2012.
1144 Control of Stationary Generator Emissions				
Section 1.0	General	9/11/2008	8/11/2010, 75 FR 48566.	
Section 2.0	Definitions	9/11/2008	8/11/2010, 75 FR 48566.	
Section 3.0	Emissions	9/11/2008	8/11/2010, 75 FR 48566.	
Section 4.0	Operating Requirements	1/11/2006	4/29/2008, 73 FR 23101.	
Section 5.0	Fuel Requirements	1/11/2006	4/29/2008, 73 FR 23101.	
Section 6.0	Record Keeping and Reporting	1/11/2006	4/29/2008, 73 FR 23101.	
Section 7.0	Emissions Certification, Compliance, and Enforcement.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 8.0	Credit for Concurrent Emissions Reductions.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 9.0	DVFA Member Companies	1/11/2006	4/29/2008 73 FR 23101.	
Regulation 1145 Excessive Idling of Heavy Duty Vehicles				
Section 1.0	Applicability	9/11/2008	8/11/2010, 75 FR 48566.	
Section 2.0	Definitions	9/11/2008	8/11/2010, 75 FR 48566.	
Section 3.0	Severability	9/11/2008	8/11/2010, 75 FR 48566.	
Section 4.0	Operational Requirements for Heavy Duty Motor Vehicles.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 5.0	Exemptions	9/11/2008	8/11/2010, 75 FR 48566.	
Section 6.0	Enforcement and Penalty	9/11/2008	8/11/2010, 75 FR 48566.	
1146 Electric Generating Unit (EGU) Multi-Pollutant Regulation				
Section 1.0	Preamble	9/11/2008	8/11/2010, 75 FR 48566	Except for provisions pertaining to mercury emissions.
Section 2.0	Applicability	12/11/2006	8/28/2008, 73 FR 50723	Except for provisions pertaining to mercury emissions.

EPA-APPROVED REGULATIONS AND STATUTES IN THE DELAWARE SIP—Continued

State regulation (7 DNREC 1100)	Title/subject	State effective date	EPA approval date	Additional explanation

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.420, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

§ 52.421 Classification of regions.

The Delaware plan was evaluated on the basis of the following classifications:

Air quality control region	Pollutant				
	Particulate matter	Sulfur oxides	Nitrogen dioxide	Carbon monoxide	Photochemical oxidants (hydrocarbons)
Metropolitan Philadelphia Interstate	I	I	III	I	I
Southern Delaware Intrastate	III	III	III	III	III

[37 FR 10856, May 31, 1972, as amended at 39 FR 16345, May 8, 1974]

§ 52.422 Approval status.

(a) With the exceptions set forth in this subpart, the Administrator approves Delaware's plan for the attainment and maintenance of the national standards under section 110 of the Clean Air Act. Furthermore, the Administrator finds that the plan satisfies all requirements of part D, title 1, of the Clean Air Act as amended in 1977.

(b) Letter of February 26, 1993, from the Delaware Department of Natural Resources and Environmental Control transmitting a commitment to adopt either the Federal clean fuel fleet program or an alternative substitute program by May 15, 1994.

[45 FR 14558, Mar. 6, 1980, as amended at 58 FR 50848, Sept. 29, 1993; 78 FR 33984, June 6, 2013]

§ 52.423 Base year emissions inventory.

EPA approves as a revision to the Delaware State Implementation Plan the 1990 base year emission inventories for the Delaware ozone nonattainment areas submitted by the Secretary of the Department of Natural Resources and Environmental Control on May 27, 1994. This submittal consists of the 1990 base year point, area, non-road mobile, biogenic and on-road mobile source emission inventories in area for the following pollutants: volatile organic compounds (VOC), carbon monoxide (CO), and oxides of nitrogen (NO_x).

(a) [Reserved]

(b) EPA approves as a revision to the Delaware State Implementation Plan the 2002 base year emissions inventories for the Delaware portion of the Philadelphia 1997 8-hour ozone moderate nonattainment area submitted by the Secretary of the Department of Natural Resources and Environmental

Control on June 13, 2007. This submittal consists of the 2002 base year point, area, non-road mobile, and on-road mobile source inventories in area for the following pollutants: Volatile organic compounds (VOC), carbon monoxide (CO) and nitrogen oxides (NO_x).

(c) EPA approves as a revision to the Delaware State Implementation Plan for the 2002 base year emissions inventory for the Delaware 1997 annual fine particulate matter (PM_{2.5}) nonattainment area submitted by the Delaware Department of Natural Resources and Environmental Control on April 3, 2008. The 2002 base year emissions inventory includes emissions estimates that cover the general source categories of point sources, non-road mobile sources, area sources, on-road mobile sources, and biogenic sources. The pollutants that comprise the inventory are nitrogen oxides (NO_x), volatile organic compounds (VOCs), PM_{2.5}, coarse particles (PM₁₀), ammonia (NH₃), and sulfur dioxide (SO₂).

(d) EPA approves as a revision to the Delaware State Implementation Plan the comprehensive emissions inventory for the Delaware portion of the Philadelphia-Wilmington, PA-NJ-DE 2006 24-hour fine particulate matter (PM_{2.5}) nonattainment area submitted by the Delaware Department of Natural Resources and Environmental Control on December 12, 2012. The 2007 year emissions inventory includes emissions estimates that cover the general source categories of point sources, non-road mobile sources, area sources, on-road mobile sources, and biogenic sources for New Castle County, Delaware. The pollutants that comprise the inventory are nitrogen oxides (NO_x), volatile organic compounds (VOCs), PM_{2.5}, ammonia (NH₃), and sulfur dioxide (SO₂).

(e) EPA approves as a revision to the Delaware State Implementation Plan the 2011 base year emissions inventory for New Castle and Sussex Counties for the 2008 8-hour ozone national ambient air quality standard submitted by the Delaware Department of the Natural Resources and Environmental Control on April 23, 2015. The 2011 base year emissions inventory includes emissions estimates that cover the general source categories of point sources, nonroad mobile sources, area sources, onroad

mobile sources, and biogenic sources. The pollutants that comprise the inventory are nitrogen oxides (NO_x), volatile organic compounds (VOC), and carbon monoxide (CO).

[61 FR 1841, Jan. 24, 1996, as amended at 75 FR 17865, Apr. 8, 2010; 78 FR 14022, Mar. 4, 2013; 79 FR 45353, Aug. 5, 2014; 80 FR 59054, Oct. 1, 2015]

§ 52.424 Conditional approval.

(a)–(d) [Reserved]

[62 FR 27197, May 19, 1997, as amended at 63 FR 1368, Jan. 9, 1998; 63 FR 16435, Apr. 3, 1998; 64 FR 32189, June 16, 1999; 64 FR 52660, Sept. 30, 1999; 64 FR 55141, Oct. 12, 1999; 66 FR 9211, Feb. 7, 2001; 66 FR 32234, June 14, 2001]

§ 52.425 Determinations of attainment.

(a) Based upon EPA's review of the air quality data for the 3-year period 2008 to 2010, EPA determined that Philadelphia-Wilmington-Atlantic City, PA-NJ-MD-DE 8-hour ozone moderate nonattainment area (the Philadelphia Area) attained the 1997 8-hour ozone National Ambient Air Quality Standard (NAAQS) by the applicable attainment date of June 15, 2011. Therefore, EPA has met the requirement pursuant to CAA section 181(b)(2)(A) to determine, based on the area's air quality as of the attainment date, whether the area attained the standard. EPA also determined that the Philadelphia Area nonattainment area will not be reclassified for failure to attain by its applicable attainment date under section 181(b)(2)(A).

(b) Based upon EPA's review of the air quality data for the 3-year period 2007 to 2009, EPA determined that the Philadelphia-Wilmington, PA-NJ-DE fine particle (PM_{2.5}) nonattainment area attained the 1997 annual PM_{2.5} National Ambient Air Quality Standard (NAAQS) by the applicable attainment date of April 5, 2010. Therefore, EPA has met the requirement pursuant to CAA section 179(c) to determine, based on the area's air quality as of the attainment date, whether the area attained the standard. EPA also determined that the Philadelphia-Wilmington, PA-NJ-DE PM_{2.5} nonattainment area is not subject to the consequences of failing to attain pursuant to section 179(d).

(c) The EPA has determined, as of June 3, 2016, that based on 2012 to 2014 ambient air quality data, the Seaford, DE 2008 ozone Marginal nonattainment area has attained the 2008 ozone NAAQS by the applicable attainment date of July 20, 2015. Therefore, the EPA has met the requirement pursuant to CAA section 181(b)(2)(A) to determine, based on the area's air quality data as of the attainment date, whether the area attained the standard. The EPA also determined that the Seaford nonattainment area will not be reclassified for failure to attain by its applicable attainment date under section 181(b)(2)(A).

(d) Based upon EPA's review of the air quality data for the 3-year period 2013 to 2015, Philadelphia-Wilmington-Atlantic City, PA-NJ-MD-DE marginal ozone nonattainment area has attained the 2008 8-hour ozone national ambient air quality standard (NAAQS) by the applicable attainment date of July 20, 2016. Therefore, EPA has met the requirement pursuant to CAA section 181(b)(2)(A) to determine, based on the area's air quality as of the attainment date, whether the area attained the standard. EPA also determined that the Philadelphia-Wilmington-Atlantic City, PA-NJ-MD-DE marginal ozone nonattainment area will not be reclassified for failure to attain by its applicable attainment date pursuant to section 181(b)(2)(A).

[77 FR 17343, Mar. 26, 2012, as amended at 77 FR 28784, May 16, 2012; 81 FR 26709, May 4, 2016; 82 FR 50819, Nov. 2, 2017]

§ 52.426 Control strategy plans for attainment and rate-of-progress: ozone.

(a) EPA fully approves, as a revision to the Delaware State Implementation Plan, the 15 Percent Rate of Progress Plan for the Delaware portion of the Philadelphia-Wilmington-Trenton severe ozone nonattainment, namely Kent and New Castle Counties, submitted by the Secretary of Delaware Department of Natural Resources and Environmental Control on February 17, 1995.

(b)(1) EPA approves revisions to the Delaware State Implementation Plan consisting of the Post 1996 ROP plans for milestone years 1999, 2002, and 2005

for the Delaware portion of the Philadelphia-Wilmington-Trenton severe ozone nonattainment area, namely Kent and New Castle Counties. These revisions were submitted by the Secretary of Delaware Department of Natural Resources and Environmental Control on December 29, 1997, and revised on June 17, 1999, February 3, 2000, and December 20, 2000.

(2) EPA approves Delaware's contingency plans for failure to meet ROP in the Delaware portion of the Philadelphia-Wilmington-Trenton severe ozone nonattainment area, namely Kent and New Castle Counties, for milestone years 1999, 2002 and 2005. These revisions were submitted by the Secretary of Delaware Department of Natural Resources and Environmental Control on December 29, 1997, June 17, 1999, February 3, 2000, and December 20, 2000.

(c) EPA approves the attainment demonstration SIP for the Philadelphia-Wilmington-Trenton area submitted by the Secretary of the Delaware Department of Natural Resources and Environmental Control on May 22, 1998, and amended October 8, 1998, January 24, 2000, December 20, 2000, and October 9, 2001 including its RACM analysis and determination. EPA is approving the enforceable commitments made to the attainment plan for the Philadelphia-Wilmington-Trenton severe ozone nonattainment area submitted by the Secretary of Delaware Department of Natural Resources and Environmental Control on January 24, 2000 and December 20, 2000. The enforceable commitments are to:

(1) Submit measures by October 31, 2001 for additional emission reductions as required in the attainment demonstration test, and to revise the SIP and motor vehicle emissions budgets by October 31, 2001 if the additional measures affect the motor vehicle emissions inventory,

(2) [Reserved]

(3) Perform a mid-course review by December 31, 2003.

(d) EPA is approving the following mobile budgets, explicitly quantified as sub-budgets for each of Kent and New Castle Counties, of the Post 1996 ROP Plans and the 1-Hour Ozone Attainment Demonstration Plan:

TRANSPORTATION CONFORMITY EMISSION BUDGETS FOR THE DELAWARE PORTION OF THE PHILADELPHIA AREA

Type of control strategy SIP	Year	Kent County		New Castle County		Effective date of adequacy determination or SIP approval
		VOC	NO _x	VOC	NO _x	
Post-1996 ROP Plan	1999	7.55	11.17	22.49	29.41	April 29, 1999, (64 FR 31217, published June 10, 1999).
Post-1996 ROP Plan	2002	6.30	9.81	18.44	27.29	June 23, 2000, (65 FR 36440, published June 8, 2000).
Post-1996 ROP Plan	2005	4.84	7.90	14.76	22.92	May 2, 2001, (66 FR 19769, published April 17, 2001).
Attainment Demonstration	2005	5.14	8.42	15.08	21.28	SIP approval on December 5, 2003; Effective on February 3, 2004.

(1)–(2) [Reserved]

(e) EPA approves Delaware's revised 2005 VOC and NO_x motor vehicle emission budgets for the 1-hour ozone attainment plan for the Delaware portion of the Philadelphia-Wilmington-Trenton severe ozone nonattainment area as a SIP revision. The revisions were submitted by the Delaware Department of Natural Resources and Environmental Control on September 2, 2003. Submittal of these revised MOBILE6-based motor vehicle emissions budgets was a requirement of EPA's approval of the attainment demonstration under paragraph (c) of this section.

(f) Based upon EPA's review of the air quality data for the 3-year period 2003 to 2005, EPA has determined that the Philadelphia-Wilmington-Trenton severe 1-hour ozone nonattainment area attained the 1-hour ozone NAAQS by the applicable attainment date of November 15, 2005. EPA also has determined that the Philadelphia-Wilmington-Trenton severe 1-hour ozone nonattainment area is not subject to the imposition of the section 185 penalty fees.

(g) EPA approves revisions to the Delaware State Implementation Plan consisting of the 2008 reasonable further progress (RFP) plan, reasonably available control measures, and contingency measures for the Delaware portion of the Philadelphia 1997 8-hour ozone moderate nonattainment area submitted by the Secretary of the Department of Natural Resources and Environmental Control on June 13, 2007.

(h) EPA approves the following 2008 RFP motor vehicle emissions budgets (MVEBs) for the Delaware portion of the Philadelphia 1997 8-hour ozone moderate nonattainment area sub-

mitted by the Secretary of the Department of Natural Resources and Environmental Control on June 13, 2007:

TRANSPORTATION CONFORMITY EMISSIONS BUDGETS FOR THE DELAWARE PORTION OF THE PHILADELPHIA AREA FOR THE 2008 RATE OF PROGRESS PLAN

County	2008 Emissions (tons per day)		Effective date of adequacy determination or SIP approval
	VOC	NO _x	
Kent	4.14	9.68	January 5, 2009, (73 FR 77682), published December 19, 2008.
New Castle	10.61	21.35	
Sussex	7.09	12.86	
State Total ...	21.84	43.89	

(i) *Determination of attainment.* EPA has determined, as of March 26, 2012, that based on 2008 to 2010 ambient air quality data, Philadelphia-Wilmington-Atlantic City, PA–NJ–MD–DE 8-hour ozone moderate nonattainment area has attained the 1997 8-hour ozone NAAQS. This determination, in accordance with 40 CFR 51.918, suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as this area continues to meet the 1997 annual 8-hour ozone NAAQS.

[64 FR 55141, Oct. 12, 1999, as amended at 66 FR 54614, Oct. 29, 2001; 68 FR 67952, Dec. 5, 2003; 73 FR 43361, July 25, 2008; 75 FR 17865, Apr. 8, 2010; 77 FR 17343, Mar. 26, 2012]

§ 52.427 Control strategy: Particulate matter.

(a) *Determination of attainment.* EPA has determined, as of May 16, 2012, that based on 2007 to 2009 and 2008 to 2010 ambient air quality data, the Philadelphia-Wilmington, PA-NJ-DE nonattainment area has attained the 1997 annual PM_{2.5} NAAQS. This determination, in accordance with 40 CFR 51.1004(c), suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as this area continues to meet the 1997 annual PM_{2.5} NAAQS.

(b) *Determination of Attainment.* EPA has also determined, as of January 7, 2013, that based on 2008 to 2010 and 2009 to 2011 ambient air quality data, the Philadelphia-Wilmington, PA-NJ-DE fine particulate matter (PM_{2.5}) nonattainment area has attained the 2006 24-hour PM_{2.5} national ambient air quality standards (NAAQS). This determination suspends the requirements for the State of DE to submit, for the Philadelphia-Wilmington, PA-NJ-DE PM_{2.5} nonattainment area, an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as this area continues to meet the 2006 24-hour PM_{2.5} NAAQS.

(c) EPA approves the attainment plan for the 1997 annual fine particulate matter (PM_{2.5}) national ambient

air quality standard (NAAQS) for the Philadelphia-Wilmington, Pennsylvania-New Jersey-Delaware nonattainment area submitted by the Secretary of the Delaware Department of Natural Resources and Environmental Control on April 3, 2008, as amended on April 25, 2012. The attainment plan includes the attainment demonstration and motor vehicle emission budgets in tons per year (tpy) used for transportation conformity purposes for New Castle County, Delaware. The attainment plan also includes an analysis of reasonably available control measures and reasonably available control technology, contingency measures and the 2002 base year emissions inventory. The 2002 base year emissions inventory was approved in a separate rulemaking action on March 4, 2013 (78 FR 10420).

DELAWARE'S MOTOR VEHICLE EMISSION BUDGETS FOR THE 1997 ANNUAL PM_{2.5} NAAQS

Type of control strategy SIP	Year	VOC	NO _x
Attainment Plan (Milestone Year)	2009	257	8,448
Attainment Plan (Out Year)	2012	199	6,273

(d) EPA approves the maintenance plan for the Delaware portion of the Philadelphia-Wilmington, PA-NJ-DE PM_{2.5} Nonattainment Area (New Castle County) for the 1997 annual fine particulate matter (PM_{2.5}) national ambient air quality standard (NAAQS) submitted by the Secretary of the Delaware Department of Natural Resources and Environmental Control on December 12, 2012. The maintenance plans include motor vehicle emission budgets in tons per year (tpy) used for transportation conformity purposes for New Castle County, Delaware.

NEW CASTLE COUNTY MOTOR VEHICLE EMISSIONS BUDGETS FOR THE 1997 ANNUAL PM_{2.5} NAAQS [tpy]

Type of control strategy SIP	Year	NO _x	PM _{2.5}	Effective date of SIP approval
Maintenance Plan	2017 Interim Budget	6,273	199	9/4/2014
	2025 Final Budget	6,273	199	

(e) EPA approves the maintenance plan for the Delaware portion of the Philadelphia-Wilmington, PA-NJ-DE PM_{2.5} Nonattainment Area (New Castle County) for the 2006 24-hour fine particulate matter (PM_{2.5}) national ambient

air quality standard (NAAQS) submitted by the Secretary of the Delaware Department of Natural Resources

Environmental Protection Agency

§ 52.440

and Environmental Control on December 12, 2012. The maintenance plans include motor vehicle emission budgets

in tons per year (tpy) used for transportation conformity purposes for New Castle County, Delaware.

NEW CASTLE COUNTY MOTOR VEHICLE EMISSIONS BUDGETS FOR THE 2006 24-HOUR PM_{2.5} NAAQS [tpy]

Type of control strategy SIP	Year	NO _x	PM _{2.5}	Effective date of SIP approval
Maintenance Plan	2017 Interim Budget	6,273	199	9/4/2014
	2025 Final Budget	6,273	199	

[77 FR 28784, May 16, 2012, as amended at 78 FR 885, Jan. 7, 2013; 78 FR 76211, Dec. 17, 2013; 79 FR 45353, Aug. 5, 2014]

§§ 52.428–52.429 [Reserved]

§ 52.430 Photochemical Assessment Monitoring Stations (PAMS) Program.

On March 24, 1994 the Delaware Department of Natural Resources & Environmental Control submitted a plan for the establishment and implementation of a Photochemical Assessment Monitoring Stations (PAMS) Program as a state implementation plan (SIP) revision, as required by section 182(c)(1) of the Clean Air Act. EPA approved the Photochemical Assessment Monitoring Stations (PAMS) Program on September 11, 1995 and made it part of the Delaware SIP. As with all components of the SIP, Delaware must implement the program as submitted and approved by EPA.

[60 FR 47084, Sept. 11, 1995]

§ 52.431 [Reserved]

§ 52.432 Significant deterioration of air quality.

(a) [Reserved]

(b) Regulation for preventing significant deterioration of air quality. The provisions of 52.21(p) are hereby incorporated and made a part of the applicable State plan for the State of Delaware.

(c) All applications submitted as of that date and supporting information required pursuant to § 52.21 from sources located in the State of Delaware shall be submitted to: Delaware Department of Natural Resources and Environmental Control, Air Resources Section, Division of Environmental

Control, 89 Kings Highway, P.O. Box 1401, Dover, Delaware 19901.

[78 FR 33984, June 6, 2013]

§ 52.433 Nonattainment new source review.

(a) *Disapproval.* EPA is disapproving Delaware's October 15, 2013 submittal of revisions to 7 DNREC 1125, sections 2.5.5 and 2.5.6 because it does not meet Clean Air Act (CAA) requirements which establish the criteria under which the owner or operator of a new or modified major stationary source must obtain the required emission offsets for the nonattainment new source review (NSR) preconstruction permitting program and because Delaware exercises authorities that are reserved for EPA under section 107 of the CAA. Delaware's Federally-approved nonattainment NSR preconstruction program in 7 DNREC 1125, sections 1.0 through 3.16.4, effective in Delaware on February 11, 2012, was fully-approved by EPA on October 2, 2012 and continues to apply.

(b) [Reserved]

[81 FR 72537, Oct. 20, 2016]

§ 52.440 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of nitrogen oxides?

(a)(1) The owner and operator of each source located within the State of Delaware and for which requirements are set forth under the Federal CAIR NO_x Annual Trading Program in subparts AA through II of part 97 of this chapter must comply with such applicable requirements. The obligation to comply with these requirements in

part 97 of this chapter will be eliminated by the promulgation of an approval by the Administrator of a revision to the Delaware State Implementation Plan (SIP) as meeting the requirements of CAIR for PM_{2.5} relating to NO_x under § 51.123 of this chapter, except to the extent the Administrator's approval is partial or conditional or unless such approval is under § 51.123(p) of this chapter.

(2) Notwithstanding any provisions of paragraph (a)(1) of this section, if, at the time of such approval of the State's SIP, the Administrator has already allocated CAIR NO_x allowances to sources in the State for any years, the provisions of part 97 of this chapter authorizing the Administrator to complete the allocation of CAIR NO_x allowances for those years shall continue to apply, unless the Administrator approves a SIP provision that provides for the allocation of the remaining CAIR NO_x allowances for those years.

(b)(1) The owner and operator of each NO_x source located within the State of Delaware and for which requirements are set forth under the Federal CAIR NO_x Ozone Season Trading Program in subparts AAAA through IIII of part 97 of this chapter must comply with such applicable requirements. The obligation to comply with these requirements in part 97 of this chapter will be eliminated by the promulgation of an approval by the Administrator of a revision to the Delaware State Implementation Plan (SIP) as meeting the requirements of CAIR for ozone relating to NO_x under § 51.123 of this chapter, except to the extent the Administrator's approval is partial or conditional or unless such approval is under § 51.123(ee) of this chapter.

(2) Notwithstanding any provisions of paragraph (b)(1) of this section, if, at the time of such approval of the State's SIP, the Administrator has already allocated CAIR NO_x Ozone Season allowances to sources in the State for any years, the provisions of part 97 of this chapter authorizing the Administrator to complete the allocation of CAIR NO_x Ozone Season allowances for those years shall continue to apply, unless the Administrator approves a SIP provision that provides for the allocation

of the remaining CAIR NO_x Ozone Season allowances for those years.

(c) Notwithstanding any provisions of paragraphs (a) and (b) of this section and subparts AA through II and AAAA through IIII of part 97 of this chapter to the contrary:

(1) With regard to any control period that begins after December 31, 2014,

(i) The provisions in paragraphs (a) and (b) of this section relating to NO_x annual or ozone season emissions shall not be applicable; and

(ii) The Administrator will not carry out any of the functions set forth for the Administrator in subparts AA through II and AAAA through IIII of part 97 of this chapter; and

(2) The Administrator will not deduct for excess emissions any CAIR NO_x allowances or CAIR NO_x Ozone Season allowances allocated for 2015 or any year thereafter;

(3) By March 3, 2015, the Administrator will remove from the CAIR NO_x Allowance Tracking System accounts all CAIR NO_x allowances allocated for a control period in 2015 and any subsequent year, and, thereafter, no holding or surrender of CAIR NO_x allowances will be required with regard to emissions or excess emissions for such control periods; and

(4) By March 3, 2015, the Administrator will remove from the CAIR NO_x Ozone Season Allowance Tracking System accounts all CAIR NO_x Ozone Season allowances allocated for a control period in 2015 and any subsequent year, and, thereafter, no holding or surrender of CAIR NO_x Ozone Season allowances will be required with regard to emissions or excess emissions for such control periods.

[72 FR 62344, Nov. 2, 2007, as amended at 76 FR 48362, Aug. 8, 2011; 79 FR 71671, Dec. 3, 2014]

§ 52.441 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of sulfur dioxide?

(a) The owner and operator of each SO₂ source located within the State of Delaware and for which requirements are set forth under the Federal CAIR SO₂ Trading Program in subparts AAA through III of part 97 of this chapter

Environmental Protection Agency

§ 52.470

must comply with such applicable requirements. The obligation to comply with these requirements in part 97 of this chapter will be eliminated by the promulgation of an approval by the Administrator of a revision to the Delaware State Implementation Plan as meeting the requirements of CAIR for PM_{2.5} relating to SO₂ under § 51.124 of this chapter, except to the extent the Administrator's approval is partial or conditional or unless such approval is under § 51.124(r) of this chapter.

(b) Notwithstanding any provisions of paragraph (a) of this section and subparts AAA through III of part 97 of this chapter and any State's SIP to the contrary:

(1) With regard to any control period that begins after December 31, 2014,

(i) The provisions of paragraph (a) of this section relating to SO₂ emissions shall not be applicable; and

(ii) The Administrator will not carry out any of the functions set forth for the Administrator in subparts AAA through III of part 97 of this chapter; and

(2) The Administrator will not deduct for excess emissions any CAIR SO₂ allowances allocated for 2015 or any year thereafter.

[72 FR 62345, Nov. 2, 2007, as amended at 76 FR 48362, Aug. 8, 2011; 79 FR 71671, Dec. 3, 2014]

§ 52.460 Small business stationary source technical and environmental compliance assistance program.

(a) On January 11, 1993, the Director of the Delaware Department of Natural Resources and Environmental Control submitted a plan for the establishment and implementation of a Small Business Stationary Source Technical and Environmental Compliance Assistance Program as a State Implementation Plan revision, as required by title V of the Clean Air Act. EPA approved the Small Business Stationary Source Technical and Environmental Compliance Assistance Program on May 17, 1994, and made it a part of the Delaware SIP. As with all components of the SIP, Delaware must implement the program as submitted and approved by EPA.

[59 FR 25572, May 17, 1994]

§ 52.465 Original identification of plan section.

(a) This section identifies the original "Air Implementation Plan for the State of Delaware" and all revisions submitted by Delaware that were federally approved prior to July 1, 1998. The information in this section is available in the 40 CFR, part 52 edition revised as of July 1, 1999, the 40 CFR, part 52, Volume 1 of 2 (§§ 52.01 to 52.1018) editions revised as of July 1, 2000 through July 1, 2011, and the 40 CFR, part 52, Volume 1 of 3 (§§ 52.01 to 52.1018) editions revised as of July 1, 2012.

(b) [Reserved]

[78 FR 33984, June 6, 2013]

Subpart J—District of Columbia

§ 52.470 Identification of plan.

(a) *Purpose and scope.* This section sets forth the applicable State implementation plan for the District of Columbia under section 110 of the Clean Air Act (42 U.S.C. 7401) and 40 CFR part 51 to meet national ambient air quality standards.

(b) *Incorporation by reference.* (1) Material listed in paragraphs (c) and (d) of this section with an EPA approval date prior to May 14, 2018, was approved for incorporation by reference by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Material is incorporated as it exists on the date of approval, and notice of any change in the material will be published in the FEDERAL REGISTER. Entries in paragraphs (c) and (d) of this section with the EPA approval dates after May 14, 2018 for the District of Columbia, will be incorporated by reference in the next update to the SIP compilation.

(2) EPA Region III certifies that the materials provided by EPA at the addresses in paragraph (b)(3) of this section are an exact duplicate of the officially promulgated State rules/regulations which have been approved as part of the State implementation plan as of the dates referenced in paragraph (b)(1) of this section. No additional revisions were made to paragraph (d) of this section between July 1, 2016 and May 14, 2018.

§ 52.470

40 CFR Ch. I (7–1–25 Edition)

(3) Copies of the materials incorporated by reference into the State implementation plan may be inspected at the Environmental Protection Agency, Region III, 1650 Arch Street, Philadelphia, Pennsylvania 19103. To obtain the material, please call the Regional Office at (215) 814–3376. You may also in-

spect the material with an EPA approval date prior to July 1, 2016 for the District of Columbia at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, go to: <http://www.archives.gov/federal-register/cfr/ibr-locations.html>.

Section 500.8	Records and Reports	9/3/1993	6/12/2019, 84 FR 27202	Approved into the SIP on October 27, 1999. Administrative updates.
Section 500.9	Records and Reports—Emissions Statements.	9/30/1993	6/12/2019, 84 FR 27202	Approved into the SIP on May 26, 1995. Administrative updates.
Section 501	Monitoring Devices	3/15/1985	8/28/1995, 60 FR 44431.	
Sections 502.1 through 502.15.	Sampling, Tests, and Measurements.	8/16/2015	5/1/2017, 82 FR 20270 ...	Updates to sampling and testing practices for fuel oils. Exceptions: Paragraphs 502.11, 502.12 and 502.14 are not part of the SIP.
Section 502.17	Sampling Tests, and Measurements.	9/30/1993	10/27/1999, 64 FR 57777.	
Section 502.18	Sampling, Tests and Measurements.	12/8/2000	5/9/2001, 66 FR 23614.	
Section 599	Definitions and Abbreviations	9/30/1993	10/27/1999, 64 FR 57777.	
Chapter 6 Particulates				
Section 600	Fuel-Burning Particulate Emissions.	4/16/2004	12/28/2004, 69 FR 77645	Revision to paragraph 600.1.
Section 601	Rotary Cup Burners	3/15/1985	8/28/1995, 60 FR 44431.	
Section 602	Incinerators	3/15/1985	8/28/1995, 60 FR 44431.	
Section 603	Particulate Process Emissions ..	3/15/1985	8/28/1995, 60 FR 44431.	

EPA-APPROVED REGULATIONS AND STATUTES IN THE DISTRICT OF COLUMBIA SIP—Continued

State citation	Title/subject	State effective date	EPA approval date	Additional explanation

Section 605	Control of Fugitive Dust	3/15/1985	8/28/1995, 60 FR 44431.	
Section 606	Visible Emissions	3/15/1985	8/28/1995, 60 FR 44431.	
Section 699	Definitions and Abbreviations	3/15/1985	8/28/1995, 60 FR 44431.	
Chapter 7 Volatile Organic Compounds				
Section 700	Miscellaneous Volatile Organic Compounds.	12/30/2011	4/29/2013, 78 FR 24992	Title changed.
Section 701.1 through 701.13.	Storage of Petroleum Products	3/15/1985	10/27/1999, 64 FR 57777.	
Section 702	Control of Volatile Organic Compound Leaks from Petroleum Refinery Equipment.	3/15/1985	10/27/1999, 64 FR 57777.	
Section 703.2, 703.3.	Terminal Vapor Recovery—Gasoline or Volatile Organic Compound.	3/15/1985	10/27/1999, 64 FR 57777.	
Section 703.1, 703.4 through 703.7.	Terminal Vapor Recovery—Gasoline or Volatile Organic Compound.	9/30/1993	10/27/1999, 64 FR 57777.	
Section 704	Stage I Vapor Recovery	3/15/1985	10/27/1999, 64 FR 57777.	
Section 705.1 through 705.3.	Stage II Vapor Recovery	04/08/2022	04/08/2024, 89 FR 24389	Includes revisions removing requirements for gasoline vapor recovery systems installed on gasoline dispensers.
Section 705.4 through 705.14.	Stage II Vapor Recovery	04/08/2022	04/08/2024, 89 FR 24389	Includes revisions removing requirements for gasoline vapor recovery systems installed on gasoline dispensers.
Section 705.15 through 705.17.	Stage II Vapor Recovery	04/08/2022	04/08/2024, 89 FR 24389	Includes additions removing requirements for gasoline vapor recovery systems installed on gasoline dispensers.
Section 706	Petroleum Dry Cleaners	3/15/1985	10/27/1999, 64 FR 57777.	
Section 709	Asphalt Operations	3/15/1985	10/27/1999, 64 FR 57777.	
Section 710	Intaglio, Flexographic, and Rotogravure Printing.	12/30/2011	4/29/2013, 78 FR 24992.	
Section 711	Pumps and Compressors	3/15/1985	10/27/1999, 64 FR 57777.	
Section 712	Waste Gas Disposal from Ethylene Producing Plant.	3/15/1985	10/27/1999, 64 FR 57777.	
Section 713	Waste Gas Disposal from Vapor Blow-down Systems.	3/15/1985	10/27/1999, 64 FR 57777.	
Section 714	Control Techniques Guidelines	12/9/2016	9/10/2019, 84 FR 47437	Revised.
Section 715	Major Source and Case-By-Case Reasonably Available Control Technology (RACT).	12/30/2011	4/29/2013, 78 FR 24992	Title Changed.
Section 716	Offset Lithography and Letterpress Printing.	12/30/2011	4/29/2013, 78 FR 24992	Title Changed.
Section 718	Motor Vehicle and Mobile Equipment Non-Assembly Line Coating Operations.	12/9/2016	9/10/2019, 84 FR 47437	Title Changed. Revised.
Section 719	Consumer Products—General Requirements.	12/30/2011	4/29/2013, 78 FR 24992.	
Section 720	Consumer Products—VOC Standards.	12/30/2011	4/29/2013, 78 FR 24992.	
Section 721	Consumer Products—Exemptions from VOC Standards.	12/30/2011	4/29/2013, 78 FR 24992.	
Section 722	Consumer Products—Registered Under FIFRA.	12/30/2011	4/29/2013, 78 FR 24992.	
Section 723	Consumer Products—Products Requiring Dilution.	12/30/2011	4/29/2013, 78 FR 24992.

(d) *EPA-approved State source-specific requirements.*

EPA-APPROVED DISTRICT OF COLUMBIA SOURCE-SPECIFIC REQUIREMENTS

Name of source	Permit number	State effective date	EPA approval date	Additional explanation
General Services Administration Central Heating and Refrigeration Plant and West Heating Plant.	N/A—it is the operating permit issued to GSA by the District of Columbia on October 17, 1997.	10/17/1997	9/30/1999, 64 FR 52654	The following portions of GSA's operating permit are not included in the SIP: The portion of Condition 3 referring to Table 1; Table 1; Condition 4; Table 3; and Condition 17.
Blue Plains Advanced Wastewater Treatment Plant.	No. 6372–C2/O	4/20/2018	2/24/2020, 85 FR 10295	See § 52.479(a) for further explanation.

(e) *EPA-approved non-regulatory and quasi-regulatory material.*

Name of non-regulatory SIP revision	Applicable geographic area	State submittal date	EPA approval date	Additional explanation
1990 Base Year Emissions Inventory.	Washington, DC carbon monoxide maintenance area.	1/13/1994, 10/12/1995	1/30/1996, 61 FR 2931	52.474(a) CO.
1990 Base Year Emissions Inventory.	Metropolitan Washington ozone nonattainment area.	1/13/1994	4/23/1997, 62 FR 19676	52.474(b) VOC, NO _x , CO.
1990 Base Year Emissions Inventory.	Metropolitan Washington ozone nonattainment area.	11/3/1997	7/8/1998, 63 FR 36854	52.474(c) VOC, NO _x .
15% Rate of Progress Plan.	Metropolitan Washington Ozone Nonattainment Area.	4/16/1998	8/5/1999, 64 FR 42600	52.476(a).
Negative Declarations—VOC Source Categories.	Metropolitan Washington ozone nonattainment area.	4/8/1993, 9/4/1997	10/27/1999, 64 FR 57777	52.478(a), 52.478(b).
Negative Declarations—VOC Source Categories.	Metropolitan Washington ozone nonattainment area.	1/26/2010, 3/24/2011	4/29/2013, 78 FR 24992	52.478(c).
Photochemical Assessment Monitoring Stations (PAMS) Program.	Metropolitan Washington ozone nonattainment area.	1/14/1994	9/11/1995, 60 FR 47081	52.480.
Small Business stationary source technical and environmental compliance assistance program.	Statewide	10/22/1993	8/17/1994, 59 FR 42165	52.510.
Establishment of air quality monitoring Network.	Statewide	5/16/1979	8/31/1981, 46 FR 43676	Subpart I, section 52.465(c)(18).
Lead (Pb) SIP	Washington, DC	10/7/1982	8/18/1983, 48 FR 37401	52.515(c)(22).
Plan for public notification of air quality.	Metropolitan Washington ozone nonattainment area.	12/5/1983	6/1/1984, 49 FR 22810	52.515(c)(23).

Name of non-regulatory SIP revision	Applicable geographic area	State submittal date	EPA approval date	Additional explanation
Carbon Monoxide Maintenance Plan.	Washington, DC	10/12/1995, 3/9/2004	1/30/1996, 61 FR 2931 4/4/2002, 70 FR 16958	52.515(c)(36) Revised Carbon Monoxide Maintenance Plan Base Year Emissions Inventory using MOBILE6.
1996–1999 Rate-of-Progress plan SIP.	Washington 1-hour ozone nonattainment area.	11/3/1997, 5/25/1999	5/13/2005, 70 FR 25688	1999 motor vehicle emissions budgets of 128.5 tons per day (tpy) of VOC and 196.4 tpy of NO _x , effective 6/13/05.
1990 Base Year inventory Revisions.	Washington 1-hour ozone nonattainment area.	9/5/2003, 2/25/2004	5/13/2005, 70 FR 25688	Effective date: 6/13/2005.
1999-2005 Rate-of-Progress Plan SIP Revision and the Transportation Control Measures (TCMs) in Appendix J.	Washington 1-hour ozone nonattainment area.	9/5/2003, 2/25/2004	5/13/2005, 70 FR 25688	Only the TCMs in Appendix J of the 2/25/2004 revision, 2002 motor vehicle emissions budgets (MVEBs) of 125.2 tons per day (tpy) for VOC and 290.3 tpy of NO _x , and, 2005 MVEBs of 97.4 tpy for VOC and 234.7 tpy of NO _x , effective 6/13/2005.
VMT Offset SIP Revision	Washington 1-hour ozone nonattainment area.	9/5/2003, 2/25/2004	5/13/2005, 70 FR 25688	Effective date: 6/13/2005.
Contingency Measure Plan.	Washington 1-hour ozone nonattainment area.	9/5/2003, 2/25/2004	5/13/2005, 70 FR 25688	Effective date: 6/13/2005.
1-hour Ozone Modeled Demonstration of Attainment and Attainment Plan.	Washington 1-hour ozone nonattainment area.	9/5/2003, 2/25/2004	5/13/2005, 70 FR 25688	2005 motor vehicle emissions budgets of 97.4 tons per day (tpy) for VOC and 234.7 tpy of NO _x , effective 6/13/2005.
RACT under the 8-Hour ozone NAAQS.	District of Columbia	9/22/2008	6/16/2009, 74 FR 28447	
Section 110(a)(2) Infrastructure Requirements for the 1997 8-Hour Ozone NAAQS.	District of Columbia	12/06/2007, 1/11/2008	4/12/2011, 76 FR 20237	This action addresses the following CAA elements: 110(a)(2)(A), (B), (C), (D)(ii), (E), (F), (G), (H), (J), (K), (L), and (M).
Section 110(a)(2) Infrastructure Requirements for the 1997 PM _{2.5} NAAQS.	District of Columbia	8/25/2008, 9/22/2008	4/12/2011, 76 FR 20237	This action addresses the following CAA elements: 110(a)(2)(A), (B), (C), (D)(ii), (E), (F), (G), (H), (J), (K), (L), and (M).
Section 110(a)(2) Infrastructure Requirements for the 2006 PM _{2.5} NAAQS.	District of Columbia	9/21/2009	4/12/2011, 76 FR 20237	This action addresses the following CAA elements: 110(a)(2)(A), (B), (C), (D)(ii), (E), (F), (G), (H), (J), (K), (L), and (M).
Reasonable Further Progress Plan (RFP), Reasonably Available Control Measures, and Contingency Measures.	Washington DC–MD–VA 1997 8-hour ozone moderate nonattainment area.	6/12/2007	9/20/2011, 76 FR 58116	
2002 Base Year Inventory for VOC, NO _x , and CO.	Washington DC–MD–VA 1997 8-hour ozone moderate nonattainment area.	6/12/2007	9/20/2011, 76 FR 58116	
2008 RFP Transportation Conformity Budgets.	Washington DC–MD–VA 1997 8-hour ozone moderate nonattainment area.	6/12/2007	9/20/2011, 76 FR 58116	
Regional Haze Plan	District of Columbia	10/27/2011	2/2/2012, 77 FR 5191

2002 Base Year Emissions Inventory for the 1997 fine particulate matter (PM _{2.5}) standard.	District of Columbia portion of the Washington DC-MD-VA 1997 PM _{2.5} nonattainment area.	4/2/2008	10/30/2012, 77 FR 65630	§ 52.474(e)
Section 110(a)(2) Infrastructure Requirements for the 2008 Lead NAAQS.	District of Columbia	7/18/2013	10/22/2013, 78 FR 62455	This action addresses the following CAA elements: 110(a)(2)(A), (B), (C), (D), (E), (F), (G), (H), (J), (K), (L), and (M), or portions thereof.
CAA section 128 requirements in relation to State Boards.	District of Columbia	7/18/2013	10/22/2013, 78 FR 62455	
Maintenance plan for the District of Columbia Portion of the Washington, DC-MD-VA Nonattainment Area for the 1997 annual fine particulate matter (PM _{2.5}) National Ambient Air Quality Standard.	District of Columbia	6/3/2013, 7/22/2013	10/6/2014, 79 FR 60081	See § 52.477(b).
Attainment Demonstration Contingency Measure Plan.	Washington, DC-MD-VA 1997 8-Hour Ozone Nonattainment Area.	6/12/2007	4/10/2015, 80 FR 19206	2010 motor vehicle emissions budgets of 144.3 tons per day (tpd) NO _x .
8-hour Ozone Modeled Demonstration of Attainment and Attainment Plan for the 1997 ozone national ambient air quality standards.	Washington, DC-MD-VA 1997 8-Hour Ozone Nonattainment Area.	6/12/2007	4/10/2015, 80 FR 19206	2009 motor vehicle emissions budgets of 66.5 tons per day (tpd) for VOC and 146.1 tpd of NO _x .
Section 110(a)(2) Infrastructure Requirements for the 2010 NO ₂ NAAQS.	District of Columbia	6/9/2014	4/13/2015, 80 FR 19538	This action addresses the following CAA elements: 110(a)(2)(A), (B), (C), (D)(i)(II), (D)(ii), (E), (F), (G), (H), (J), (K), (L), and (M). PSD related portions are addressed by FIP in 40 CFR 52.499.
Section 110(a)(2) Infrastructure Requirements for the 2008 Ozone NAAQS.	District of Columbia	6/13/2014	4/13/2015, 80 FR 19538	This action addresses the following CAA elements: 110(a)(2)(A), (B), (C), (D)(i)(II), (D)(ii), (E), (F), (G), (H), (J), (K), (L), and (M). PSD related portions are addressed by FIP in 40 CFR 52.499.
Section 110(a)(2) Infrastructure Requirements for the 2008 Ozone NAAQS.	District of Columbia	6/13/2014	8/31/2018, 83 FR 44498	This action addresses CAA element 110(a)(2)(D)(i)(I).
Section 110(a)(2) Infrastructure Requirements for the 2010 SO ₂ NAAQS.	District of Columbia	6/13/2014	4/13/2015, 80 FR 19538	This action addresses the following CAA elements: 110(a)(2)(A), (B), (C), (D)(i)(II), (D)(ii), (E), (F), (G), (H), (J), (K), (L), and (M). PSD related portions are addressed by FIP in 40 CFR 52.499.
Section 110(a)(2) Infrastructure Requirements for the 2010 SO ₂ NAAQS.	District-wide	7/18/2014	4/3/2018, 83 FR 14175	This action addresses CAA section 110(a)(2)(D)(i)(I) for the 2010 SO ₂ NAAQS.

§ 52.470

40 CFR Ch. I (7–1–25 Edition)

Name of non-regulatory SIP revision	Applicable geographic area	State submittal date	EPA approval date	Additional explanation
Emergency Air Pollution Plan.	District of Columbia	6/13/2014	4/13/2015, 80 FR 19538	This action addresses the requirements of 40 CFR 51, subpart H for particulate matter, sulfur oxides (SOX), carbon monoxide (CO), and ozone, as well as section 110(a)(2)(G) of the CAA for the 2008 ozone, 2010 SO ₂ , and 2010 NO ₂ NAAQS.
2011 Base Year Emissions Inventory for the 2008 8-hour ozone standard.	District of Columbia portion of the Washington, DC-MD-VA 2008 ozone nonattainment area.	7/17/2014	5/13/2015, 80 FR 27255	§ 52.474(f).
Section 110(a)(2) Infrastructure Requirements for the 2006 PM _{2.5} NAAQS.	District of Columbia	7/16/2015	8/21/2015, 80 FR 50789	This action addresses the following CAA elements, or portions thereof: 110(a)(2)(D)(i)(I).
Interstate Pollution Transport Requirements for the 2010 NO ₂ NAAQS.	District of Columbia	6/6/2014	2/19/2016, 81 FR 8406	This action addresses the infrastructure element of CAA section 110(a)(2)(D)(i)(I), or the good neighbor provision, for the 2010 NO ₂ NAAQS.
Section 110(a)(2) Infrastructure Requirements for the 2012 PM _{2.5} NAAQS.	District of Columbia	12/28/2015	8/16/2016, 81 FR 54504	This action addresses the following CAA elements: 110(a)(2)(A), (B), (C), (D)(i)(I), D(i)(II), (E), (F), (G), (H), (J), (K), (L), and (M). PSD related portions are addressed by FIP in 40 CFR 52.499.
Regional Haze Five-Year Progress Report.	District of Columbia	3/2/2016	8/10/2017, 82 FR 37305	Addresses requirements of 40 CFR 51.308(g) and (h) for Regional Haze Five-Year Progress Report.
Maintenance plan for the District of Columbia portion of the Washington, DC-MD-VA Nonattainment Area for the 2008 8-hour ozone National Ambient Air Quality Standard.	District of Columbia	11/14/2023	10/4/2024, 89 FR 80745	Added § 52.476(k).
Emissions Statements Rule Certification for the 2008 Ozone NAAQS.	District of Columbia portion of the Washington, DC–MD–VA nonattainment area for the 2008 ozone NAAQS (<i>i.e.</i> , the District of Columbia).	5/25/2018	6/12/2019, 84 FR 27202	Certification that the District's SIP-approved regulations at 20 DCMR § 500.9 meet the emissions statements requirements of CAA section 182(a)(3)(B) for the 2008 ozone NAAQS.
2008 8-Hour Ozone Certification for Nonattainment New Source Review (NNSR).	The District of Columbia ..	5/23/2018	7/5/2019, 84 FR 32072	
VOC RACT and Negative Declarations—VOC Source Categories under the 2008 8-Hour ozone NAAQS.	District of Columbia	8/29/2018	10/10/2019, 84 FR 54507

§ 52.471 Classification of regions.

The District of Columbia plan was evaluated on the basis of the following classifications:

Air quality control region	Pollutant				
	Particulate matter	Sulfur oxides	Nitrogen dioxide	Carbon monoxide	Ozone
National Capital Interstate	I	I	III	I	I

[37 FR 10857, May 31, 1972, as amended at 39 FR 16346, May 8, 1974; 46 FR 61263, Dec. 16, 1981]

§ 52.472 Approval status.

(a) With the exceptions set forth in this subpart, the Administrator approves the District of Columbia's plan for the attainment and maintenance of the national standards.

(b) [Reserved]

(c) With the exceptions set forth in this subpart, the Administrator approves the District of Columbia's plan for the attainment and maintenance of the national standards under section 110 of the Clean Air Act. Furthermore, the Administrator finds that the plan

§ 52.473

40 CFR Ch. I (7–1–25 Edition)

satisfies all requirements of Part D, Title 1, of the Clean Air Act as amended in 1977.

(d) Section 710 of title 20 of the District of Columbia Regulations is approved with the following condition: Any alternative controls or exemptions under section 710.8 approved or granted by the District of Columbia are subject to a public notice and public hearing requirements and must be submitted to EPA as SIP revisions. Such alternatives or exemptions are not effective until approved as SIP revisions by EPA.

(e)–(f) [Reserved]

[38 FR 33709, Dec. 6, 1973, as amended at 46 FR 61263, Dec. 16, 1981; 57 FR 34251, Aug. 4, 1992; 60 FR 5136, Jan. 26, 1995; 60 FR 15486, Mar. 24, 1995; 61 FR 2936, Jan. 30, 1996; 78 FR 33984, June 6, 2013]

§ 52.473 [Reserved]

§ 52.474 Base Year Emissions Inventory.

(a) EPA approves as a revision to the District of Columbia Implementation Plan the 1990 base year emission inventory for the Washington Metropolitan Statistical Area, submitted by Director, District of Columbia Consumer and Regulatory Affairs, on January 13, 1994 and October 12, 1995. This submittal consist of the 1990 base year stationary, area and off-road mobile and on-road mobile emission inventories in the Washington Statistical Area for the pollutant, carbon monoxide (CO).

(b) EPA approves as a revision to the District of Columbia State Implementation Plan the 1990 base year emission inventory for the District's portion of the Metropolitan Washington DC ozone nonattainment area submitted by the Director, DCRA, on January 13, 1994. This submittal consists of the 1990 base year point, area, highway mobile, non-road and biogenic source emission inventories in the area for the following pollutants: Volatile organic compounds (VOC), carbon monoxide (CO), and oxides of nitrogen (NO_x).

(c) EPA approves as a revision to the District of Columbia State Implementation Plan an amendment to the 1990 base year emission inventories for the District's portion of the Metropolitan Washington, D.C. ozone nonattainment

area submitted by the Director, Department of Consumer and Regulatory Affairs, on November 3, 1997. This submittal consists of amendments to the 1990 base year point, area, highway mobile, and non-road source emission inventories in the area for the following pollutants: volatile organic compounds (VOC), and oxides of nitrogen (NO_x).

(d) EPA approves as a revision to the District of Columbia State Implementation Plan the 2002 base year emissions inventories for the Washington DC–MD–VA 1997 8-hour ozone moderate nonattainment area submitted by the Acting Director of the District of Columbia Department of the Environment on June 12, 2007. This submittal consists of the 2002 base year point, area, non-road mobile, and on-road mobile source inventories in area for the following pollutants: volatile organic compounds (VOC), carbon monoxide (CO) and nitrogen oxides (NO_x).

(e) EPA approves as a revision to the District of Columbia State Implementation Plan the 2002 base year emissions inventory for the District of Columbia portion of the Washington DC–MD–VA 1997 fine particulate matter (PM_{2.5}) nonattainment area submitted by the District Department of the Environment on April 2, 2008. The 2002 base year emissions inventory includes emissions estimates that cover the general source categories of point sources, non-road mobile sources, area sources, on-road mobile sources, and biogenic sources. The pollutants that comprise the inventory are nitrogen oxides (NO_x), volatile organic compounds (VOCs), PM_{2.5}, coarse particles (PM₁₀), ammonia (NH₃), and sulfur dioxide (SO₂).

(f) EPA approves as a revision to the District of Columbia State Implementation Plan the 2011 base year emissions inventory for the District of Columbia portion of the Washington, DC–MD–VA 2008 8-hour ozone nonattainment area submitted by the District Department of the Environment on July 17, 2014. The 2011 base year emissions inventory includes emissions estimates that cover the general source categories of point sources, non-road mobile sources, area sources, on-road mobile sources, and biogenic sources.

Environmental Protection Agency

§ 52.476

The pollutants that comprise the inventory are carbon monoxide (CO), nitrogen oxides (NO_x) and volatile organic compounds (VOC).

[61 FR 2936, Jan. 30, 1996, as amended at 62 FR 19679, Apr. 23, 1997; 63 FR 36858, July 8, 1998; 76 FR 58118, Sept. 20, 2011; 77 FR 65631, Oct. 30, 2012; 80 FR 27258, May 13, 2015; 80 FR 43628, July 23, 2015]

§ 52.475 Determinations of attainment.

(a) Based upon EPA's review of the air quality data for the 3-year period 2007 to 2009, EPA determined that the Metropolitan Washington, District of Columbia-Maryland-Virginia (DC-MD-VA) fine particle (PM_{2.5}) nonattainment area attained the 1997 annual PM_{2.5} National Ambient Air Quality Standard (NAAQS) by the applicable attainment date of April 5, 2010. Therefore, EPA has met the requirement pursuant to CAA section 179(c) to determine, based on the area's air quality as of the attainment date, whether the area attained the standard. EPA also determined that the Metropolitan Washington, DC-MD-VA nonattainment area is not subject to the consequences of failing to attain pursuant to section 179(d).

(b) Based upon EPA's review of the air quality data for the 3-year period 2007 to 2009, Washington, DC-MD-VA moderate nonattainment area has attained the 1997 8-hour ozone NAAQS by the applicable attainment date of June 15, 2010. Therefore, EPA has met the requirement pursuant to CAA section 181(b)(2)(A) to determine, based on the area's air quality as of the attainment date, whether the area attained the standard. EPA also determined that the Washington, DC-MD-VA moderate nonattainment area will not be reclassified for failure to attain by its applicable attainment date pursuant to section 181(b)(2)(A).

(c) Based upon EPA's review of the air quality data for the 3-year period 2013 to 2015, the Washington, DC-MD-VA marginal ozone nonattainment area has attained the 2008 8-hour ozone national ambient air quality standard (NAAQS) by the applicable attainment date of July 20, 2016. Therefore, EPA has met the requirement pursuant to Clean Air Act section 181(b)(2)(A) to determine, based on the area's air quality

as of the attainment date, whether the area attained the standard. EPA also determined that the Washington, DC-MD-VA marginal nonattainment area will not be reclassified for failure to attain by its applicable attainment date pursuant to section 181(b)(2)(A).

(d) Based upon EPA's review of the ambient air quality data for the 3-year period 2021 to 2023, the Washington, DC-MD-VA moderate nonattainment area for the 2015 8-hour ozone national ambient air quality standards (2015 ozone NAAQS) has attained the 2015 ozone NAAQS by the applicable attainment date of August 3, 2024. Therefore, EPA has met the requirement pursuant to Clean Air Act section 181(b)(2)(A) to determine, based on the area's air quality as of the attainment date, whether the area attained the standard. EPA also determined that the Washington, DC-MD-VA moderate nonattainment area will not be reclassified for failure to attain by its applicable attainment date pursuant to section 181(b)(2)(A).

[77 FR 1413, Jan. 10, 2012, as amended at 77 FR 11741, Feb. 28, 2012; 82 FR 52655, Nov. 14, 2017; 90 FR 14735, Apr. 4, 2025]

§ 52.476 Control strategy: ozone.

(a) EPA approves as a revision to the District of Columbia State Implementation Plan the 15 Percent Rate of Progress Plan for the District of Columbia's portion of the Metropolitan Washington, D.C. ozone nonattainment area, submitted by the Director of the District of Columbia Department of Health on April 16, 1998.

(b)–(c) [Reserved]

(d) Based upon EPA's review of the air quality data for the 3-year period 2003 to 2005, EPA has determined that the Washington severe 1-hour ozone nonattainment area attained the 1-hour ozone NAAQS by the applicable attainment date of November 15, 2005. EPA also has determined that the Washington severe 1-hour ozone nonattainment area is not subject to the imposition of the section 185 penalty fees.

(e) EPA approves revisions to the District of Columbia State Implementation Plan consisting of the 2008 reasonable further progress (RFP) plan, reasonably available control measures, and contingency measures for the

§ 52.476

40 CFR Ch. I (7–1–25 Edition)

Washington DC–MD–VA 1997 8-hour ozone moderate nonattainment area submitted by the Acting Director of the District of Columbia Department of the Environment on June 12, 2007.

(f) EPA approves the following 2008 RFP motor vehicle emissions budgets

(MVEBs) for the Washington, DC–MD–VA 1997 8-hour ozone moderate nonattainment area submitted by the Director of the Virginia Department of Environment Quality on June 12, 2007:

TRANSPORTATION CONFORMITY EMISSIONS BUDGETS FOR THE WASHINGTON, DC-MD-VA AREA

Type of control strategy SIP	Year	VOC (TPD)	NO _x (TPD)	Effective date of adequacy determination or SIP approval
Rate of Progress Plan	2008	70.8	159.8	September 21, 2009 (74 FR 45853), published September 4, 2009.

(g) EPA has determined, as of February 28, 2012, that based on 2007 to 2009 and 2008 to 2010 ambient air quality data, the Washington, DC-MD-VA moderate nonattainment area has attained the 1997 8-hour ozone National Ambient Air Quality Standard (NAAQS). This determination, in accordance with 40 CFR 51.918, suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as this area continues to meet the 1997 8-hour ozone NAAQS.

(h) EPA approves revisions to the District of Columbia State Implementation Plan consisting of the attain-

ment demonstration required under 40 CFR 51.908 demonstrating attainment of the 1997 ozone NAAQS by the applicable attainment date of June 15, 2010 and the failure to attain contingency measures for the Washington, DC-MD-VA 1997 8-hour ozone moderate nonattainment area submitted by the Acting Director of the District of Columbia Department of the Environment on June 12, 2007.

(i) EPA approves the following 2009 attainment demonstration and 2010 motor vehicle emissions budgets (MVEBs) for the Washington, DC-MD-VA 1997 8-hour ozone moderate nonattainment area submitted by the Acting Director of the District of Columbia Department of the Environment on June 12, 2007:

TRANSPORTATION CONFORMITY EMISSIONS BUDGETS FOR THE WASHINGTON, DC-MD-VA AREA

Type of control strategy SIP	Year	VOC (TPD)	NO _x (TPD)	Effective date of adequacy determination or SIP approval
Attainment Demonstration	2009	66.5	146.1	February 22, 2013 (78 FR 9044), published February 7, 2013.
Contingency Measures Plan	2010		144.3	February 22, 2013 (78 FR 9044), published February 7, 2013.

(j) EPA approves the maintenance plan for the District of Columbia portion of the Washington, DC-MD-VA nonattainment area for the 2008 8-hour ozone NAAQS submitted by the Director of the District of Columbia Department of Energy and Environment on March 12, 2018. The maintenance plan includes 2014, 2025, and 2030 motor vehicle emission budgets (MVEBs) for VOC and NO_x to be applied to all future transportation conformity determinations and analyses for the entire Wash-

ington, DC-MD-VA area for the 2008 8-hour ozone NAAQS. The maintenance plan includes two sets of VOC and NO_x MVEBs: The MVEBs without transportation buffers are effective as EPA has determined them adequate for transportation conformity purposes; the MVEBs with transportation buffers will be used only as needed in situations where the conformity analysis

Environmental Protection Agency

§ 52.476

must be based on different data, models, or planning assumptions, including, but not limited to, updates to demographic, land use, or project-related assumptions, than were used to create the set of MVEBs without transportation buffers. The technical analyses

used to demonstrate compliance with the MVEBs and the need, if any, to use transportation buffers will be fully documented in the conformity analysis and follow the Transportation Planning Board's (TPB) interagency consultation procedures.

TABLE 3 TO PARAGRAPH (j)—MOTOR VEHICLE EMISSIONS BUDGETS FOR THE WASHINGTON, DC-MD-VA AREA

Type of control strategy SIP	Year	VOC (TPD)	NO _x (TPD)	Effective date of adequacy determination of SIP approval
Maintenance Plan	2014	61.3	136.8	5/15/2019.
	2025	33.2	40.7	
	2030	24.1	27.4	

TABLE 4 TO PARAGRAPH (j)—MOTOR VEHICLE EMISSIONS BUDGETS WITH TRANSPORTATION BUFFERS FOR THE WASHINGTON, DC-MD-VA AREA

Type of control strategy SIP	Year	VOC (TPD)	NO _x (TPD)	Effective date of adequacy determination of SIP approval
Maintenance Plan	2014	61.3	136.8	Contingent and effective upon inter-agency consultation.
	2025	39.8	48.8	
	2030	28.9	32.9	

(k) EPA approves updates to the 2008 8-Hour Ozone national ambient air quality standard (NAAQS) maintenance plan for the District of Columbia portion of the Washington, DC-MD-VA 2008 8-Hour Ozone NAAQS Maintenance Area. The updates include revised motor vehicle emissions budgets (MVEBs) and updates to the applicable onroad and nonroad mobile emissions for VOC and NO_x for the years 2025 and

2030. EPA also approves the allocation of a portion of the safety margins for VOC and NO_x in the ozone maintenance plan to the 2025 and 2030 MVEBs. The revised MVEBs for VOC and NO_x applies to all future transportation conformity determinations and analyses for the entire Washington, DC-MD-VA Maintenance Area for the 2008 8-Hour Ozone NAAQS.

TABLE 5 TO PARAGRAPH (k)—REVISED ONROAD MOTOR VEHICLE EMISSIONS BUDGETS USING MOVES 3.0.4

Year	VOC onroad emissions (tpd)	NO _x onroad emissions (tpd)
2014 Attainment Year	61.25	136.84
2025 Predicted Emissions without Safety Margin	27.92	46.52
2025 Safety Margin	5.58	9.30
2025 Interim Budget with Safety Margin	33.50	55.82
2030 Predicted Emissions without Safety Margin	21.75	34.26
2030 Safety Margin	4.35	6.85
2030 Final Budget with Safety Margin	26.10	41.11

(l) EPA has determined, as of April 4, 2025, that based on 2021 to 2023 ambient air quality data, the Washington, DC-MD-VA moderate nonattainment area for the 2015 8-hour ozone national ambient air quality standards (2015 ozone NAAQS) has attained the 2015 ozone NAAQS. This determination, in accord-

ance with 40 CFR 51.5138, suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the

§ 52.477

40 CFR Ch. I (7–1–25 Edition)

standard for as long as this area continues to meet the 2015 ozone NAAQS.

[64 FR 42602, Aug. 5, 1999, as amended at 66 FR 631, Jan. 3, 2001; 69 FR 43522, July 21, 2004; 73 FR 43361, July 25, 2008; 76 FR 58118, Sept. 20, 2011; 77 FR 11741, Feb. 28, 2012; 80 FR 19218, Apr. 10, 2015; 84 FR 15115, Apr. 15, 2019; 89 FR 80747, Oct. 4, 2024; 90 FR 14735, Apr. 4, 2025]

§ 52.477 Control strategy: Particular matter.

(a) *Determination of Attainment.* EPA has determined, as of January 12, 2009, that the District of Columbia portion of the Metropolitan Washington, DC–MD–VA nonattainment area for the 1997 PM_{2.5} NAAQS has attained the 1997 PM_{2.5} NAAQS. This determination, in accordance with 40 CFR 52.1004(c), suspends the requirements for this area to submit an attainment demonstration and associated reasonably available control measures, a reasonable further progress plan, contingency measures,

and other planning SIPs related to attainment of the standard for as long as the area continues to attain the 1997 PM_{2.5} NAAQS.

(b) *Maintenance Plan and Transportation Conformity Budgets.* EPA approves the maintenance plan for the District of Columbia portion of the Washington, DC–MD–VA nonattainment area for the 1997 annual PM_{2.5} NAAQS submitted by the District of Columbia for the entire Area on June 3, 2013 and supplemented on July 22, 2013. The MVEBs are based on a tiered approach: Tier 1 MVEBs are effective as EPA has determined them adequate for transportation conformity purposes; Tier 2 mobile budgets will become effective upon the completion of the interagency consultation process and fully documented within the first conformity analysis that uses the Tier 2 MVEBs.

WASHINGTON, DC–MD–VA PM_{2.5} AREA'S TIER 1 MOTOR VEHICLE EMISSIONS BUDGETS FOR THE 1997 ANNUAL PM_{2.5} NAAQS, (TPY)

[79 FR 60084, Oct. 6, 2014]

§ 52.478 Rules and Regulations.

(a) On April 8, 1993, the District of Columbia submitted a letter to EPA declaring that there are no sources located in the District belonging to the following VOC categories:

(1) Automobile and light-duty truck manufacturing;

(2) Coating of cans, coils, paper, fabric and vinyl, metal furniture, large appliances, magnet wire, miscellaneous metal parts and products, and flatwood paneling;

(3) Storage of petroleum liquids in fixed-roof tanks and external floating-roof tanks;

(4) Bulk gasoline plants and terminals;

(5) Petroleum refinery sources;

(6) Petroleum refinery equipment leaks;

(7) Manufacture of synthesized pharmaceutical products, pneumatic rubber tires, vegetable oil, synthetic organic chemicals (fugitive VOCs and air oxidation), and high density polyethylene, polypropylene and polystyrene resins;

(8) Graphic arts systems;

(9) Storage, transportation and marketing of VOCs (fugitive VOCs from oil

and gas production and natural gas and gasoline processing).

(b) On September 4, 1997, the District of Columbia submitted a letter to EPA declaring that there are no sources located in the District which belong to the following VOC categories:

- (1) Coating of plastic parts (business machines and other);
- (2) Aerospace;
- (3) Shipbuilding and repair;
- (4) Automobile refinishing;
- (5) Industrial wastewater;
- (6) Distillation or reactor or batch processes in the synthetic organic chemical manufacturing industry;
- (7) Volatile organic storage;
- (8) Wood furniture coatings;
- (9) Offset lithography;
- (10) Clean-up solvents.

(c) On March 24, 2011, the District of Columbia submitted a letter to EPA declaring that there are no sources located in the District which belong to the following VOC categories:

- (1) Auto and Light-duty Truck Assembly Coatings;
- (2) Fiberglass Boat Manufacturing Materials;
- (3) Paper, Film and Foil Coatings;
- (4) Flatwood Paneling.

[64 FR 57781, Oct. 27, 1999, as amended at 78 FR 24997, Apr. 29, 2013]

§ 52.479 Source-specific requirements.

(a) Approval of source-specific requirements for the Blue Plains Advanced Wastewater Treatment Plant includes EPA incorporating by reference into § 52.470(d) certain redacted portions of Permit No. 6372-C2/O approved by the District of Columbia on April 20, 2018 to Construct and Operate New Biosolids Handling Facilities issued to the District of Columbia Water and Sewer Authority and as approved on March 25, 2020.

(1) Specifically, EPA is incorporating by reference into § 52.470(d) certain portions of Permit No. 6372-C2/O to Construct and Operate New Biosolids Handling Facilities issued to District of Columbia Water and Sewer Authority as redacted by the District of Columbia:

(i) The first paragraph citing the pertinent permitting regulations and listing (redacted) the following significant components: One (1) Auxiliary Boiler

(AB) rated at 62.52 mMBTU per hour (HHV) heat input, firing DG, One (1) Siloxane Destruction Flare (SF) rated at 6.14 MMBTU per hour heat input, firing DG; and Two (2) Emergency Flares rated at 126 mMBTU per hour heat input each, firing DG.

(ii) The NO_x emissions limits listed in the table found in permit condition “j.” for the Auxiliary Boiler (AB), Siloxane Destruction Flare (SF) and Two (2) Emergency Flares. The hourly NO_x emission limits for the Auxiliary Boiler (AB), Siloxane Destruction Flare (SF) and Two (2) Emergency Flares listed in Table 2 (as redacted) found under Condition III.

(iii) Conditions III.b.1.A.; III.b.3. A. and B.; III.b.3. C.i., iii and iv.; III.b.3.D.; III.b.3.E. except that relating to carbon monoxide/CO; III.b.3.F. except “and CO”; III.b.3.G, iv. and v. except the provision “Failure to demonstrate compliance through the testing may result in enforcement action.”; III.b.4.A.; III.b.4.B. iv. and v.; III.b.5. as redacted to strike “in addition to complying with Condition II(f)”;

III.d., III.d.1.A; III.d.2.D; III.d.3.A. only the portion “Within 60 days of initial startup and once every five years thereafter, the Permittee shall conduct a Department-approved compliance source test at multiple loads of EF-1, EF-2, and SF in accordance with 40 CFR 60.8 or a similar protocol acceptable to the Department, to demonstrate compliance with the emissions limitations contained in Condition III(d)(1) of this permit;”

III.d.3.B as redacted to exclude “though additional testing may be required at other times pursuant to Condition II(d)(2)”;

III.d.3.C. (i), (iii) and (iv); III.d.3.D.; III.d.3.H.(iv); III.d.3.H.(v) except “Failure to demonstrate compliance through the test may result in enforcement action.”;

III.d.4.A. except “including records of visual inspections,”; III.d.4.B. (ii) except “and CO”; III.d.4.B. (iv); and, III.d.5.A. as redacted to exclude “in addition to complying with Condition II(f)”.

(2) This permit was issued April 20, 2018.

(b) [Reserved]

[85 FR 10300, Feb. 24, 2020]

§ 52.480 Photochemical Assessment Monitoring Stations (PAMS) Program.

On January 14, 1994 the District of Columbia's Department of Consumer and Regulatory Affairs submitted a plan for the establishment and implementation of a Photochemical Assessment Monitoring Stations (PAMS) Program as a state implementation plan (SIP) revision, as required by section 182(c)(1) of the Clean Air Act. EPA approved the Photochemical Assessment Monitoring Stations (PAMS) Program on September 11, 1995 and made it part of the District of Columbia SIP. As with all components of the SIP, the District of Columbia must implement the program as submitted and approved by EPA.

[60 FR 47084, Sept. 11, 1995]

§§ 52.481–52.483 [Reserved]

§ 52.484 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of nitrogen oxides?

(a)(1) The owner and operator of each source located within the District of Columbia and for which requirements are set forth under the Federal CAIR NO_x Annual Trading Program in subparts AA through II of part 97 of this chapter must comply with such applicable requirements. The obligation to comply with these requirements in part 97 of this chapter will be eliminated by the promulgation of an approval by the Administrator of a revision to the District of Columbia State Implementation Plan (SIP) as meeting the requirements of CAIR for PM_{2.5} relating to NO_x under § 51.123 of this chapter, except to the extent the Administrator's approval is partial or conditional or unless such approval is under § 51.123(p) of this chapter.

(2) Notwithstanding any provisions of paragraph (a)(1) of this section, if, at the time of such approval of the District of Columbia's SIP, the Administrator has already allocated CAIR NO_x allowances to sources in the District of Columbia for any years, the provisions of part 97 of this chapter authorizing the Administrator to complete the allocation of CAIR NO_x allowances for those years shall continue to apply, un-

less the Administrator approves a SIP provision that provides for the allocation of the remaining CAIR NO_x allowances for those years.

(b)(1) The owner and operator of each NO_x source located within the District of Columbia and for which requirements are set forth under the Federal CAIR NO_x Ozone Season Trading Program in subparts AAAA through IIII of part 97 of this chapter must comply with such applicable requirements. The obligation to comply with these requirements in part 97 of this chapter will be eliminated by the promulgation of an approval by the Administrator of a revision to the District of Columbia State Implementation Plan (SIP) as meeting the requirements of CAIR for ozone relating to NO_x under § 51.123 of this chapter, except to the extent the Administrator's approval is partial or conditional or unless such approval is under § 51.123(ee) of this chapter.

(2) Notwithstanding any provisions of paragraph (b)(1) of this section, if, at the time of such approval of the District of Columbia's SIP, the Administrator has already allocated CAIR NO_x Ozone Season allowances to sources in the District of Columbia for any years, the provisions of part 97 of this chapter authorizing the Administrator to complete the allocation of CAIR NO_x Ozone Season allowances for those years shall continue to apply, unless the Administrator approves a SIP provision that provides for the allocation of the remaining CAIR NO_x Ozone Season allowances for those years.

(c) Notwithstanding any provisions of paragraphs (a) and (b) of this section and subparts AA through II and AAAA through IIII of part 97 of this chapter to the contrary:

(1) With regard to any control period that begins after December 31, 2014,

(i) The provisions in paragraphs (a) and (b) of this section relating to NO_x annual or ozone season emissions shall not be applicable; and

(ii) The Administrator will not carry out any of the functions set forth for the Administrator in subparts AA through II and AAAA through IIII of part 97 of this chapter; and

(2) The Administrator will not deduct for excess emissions any CAIR NO_x allowances or CAIR NO_x Ozone Season

Environmental Protection Agency

§ 52.510

allowances allocated for 2015 or any year thereafter;

(3) By March 3, 2015, the Administrator will remove from the CAIR NO_x Allowance Tracking System accounts all CAIR NO_x allowances allocated for a control period in 2015 and any subsequent year, and, thereafter, no holding or surrender of CAIR NO_x allowances will be required with regard to emissions or excess emissions for such control periods; and

(4) By March 3, 2015, the Administrator will remove from the CAIR NO_x Ozone Season Allowance Tracking System accounts all CAIR NO_x Ozone Season allowances allocated for a control period in 2015 and any subsequent year, and, thereafter, no holding or surrender of CAIR NO_x Ozone Season allowances will be required with regard to emissions or excess emissions for such control periods.

[72 FR 62345, Nov. 2, 2007, as amended at 76 FR 48362, Aug. 8, 2011; 79 FR 71671, Dec. 3, 2014]

§ 52.485 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of sulfur dioxide?

(a) The owner and operator of each SO₂ source located within the District of Columbia and for which requirements are set forth under the Federal CAIR SO₂ Trading Program in subparts AAA through III of part 97 of this chapter must comply with such applicable requirements. The obligation to comply with these requirements in part 97 of this chapter will be eliminated by the promulgation of an approval by the Administrator of a revision to the District of Columbia State Implementation Plan as meeting the requirements of CAIR for PM_{2.5} relating to SO₂ under § 51.124 of this chapter, except to the extent the Administrator's approval is partial or conditional or unless such approval is under § 51.124(r) of this chapter.

(b) Notwithstanding any provisions of paragraph (a) of this section and subparts AAA through III of part 97 of this chapter and any State's SIP to the contrary:

(1) With regard to any control period that begins after December 31, 2014,

(i) The provisions of paragraph (a) of this section relating to SO₂ emissions shall not be applicable; and

(ii) The Administrator will not carry out any of the functions set forth for the Administrator in subparts AAA through III of part 97 of this chapter; and

(2) The Administrator will not deduct for excess emissions any CAIR SO₂ allowances allocated for 2015 or any year thereafter.

[72 FR 62345, Nov. 2, 2007, as amended at 76 FR 48362, Aug. 8, 2011; 79 FR 71671, Dec. 3, 2014]

§§ 52.486–52.498 [Reserved]

§ 52.499 Significant deterioration of air quality.

(a) The requirements of sections 160 through 165 of the Clean Air Act are not met, since the plan does not include approvable procedures for preventing the significant deterioration of air quality.

(b) Regulations for preventing significant deterioration of air quality. The provisions of § 52.21 except paragraph (a)(1) are hereby incorporated and made a part of the applicable State plan for the District of Columbia.

[43 FR 26410, June 19, 1978, as amended at 45 FR 52741, Aug. 7, 1980; 68 FR 11322, Mar. 10, 2003; 68 FR 74488, Dec. 24, 2003]

§ 52.510 Small business assistance program.

On October 22, 1993, the Administrator of the District of Columbia Environmental Regulation Administration submitted a plan for the establishment and implementation of a Small Business Technical and Environmental Compliance Assistance Program as a state implementation plan revision (SIP), as required by title V of the Clean Air Act. EPA approved the Small Business Technical and Environmental Compliance Assistance Program on August 17, 1994 and made it part of the District of Columbia SIP. As with all components of the SIP, the District of Columbia must implement the program as submitted and approved by EPA.

(d) *EPA-approved Florida Source-Specific requirements.*

EPA-APPROVED FLORIDA SOURCE-SPECIFIC REQUIREMENTS

Name of source	Permit No.	State effective date	EPA approval date	Explanation
Harry S Truman, animal import center.	NA	11/26/1996	1/19/2000, 65 FR 2882.	
Martin Gas Sales, Inc	0570477–007–AC	1/17/2003	5/1/2003, 68 FR 23209.	
Broward County Aviation Department.		8/15/2003	6/17/2003, 69 FR 33862.	Order Granting Variance from Rule 62–252.400.
Lockheed Martin Aeronautics Company.		4/16/2005	11/28/2006, 71 FR 68745.	Requirement that Lockheed Martin Aeronautics Company comply with EPA's Aerospace CTG at its Pinellas County facility.
Combs Oil Company ...		7/31/2009	9/25/2015, 80 FR 57727.	Order Granting Variance from Rule 62–296.418(2)(b)2.
Mosaic Fertilizer, LLC	Air Permit No. 0570008–080–AC.	1/15/2015	7/3/2017, 82 FR 30749.	Specific Conditions pertaining to EU004; EU005; and EU006.
Rayonier Performance Fibers, LLC.	Air Permit No. 0890004–036–AC.	4/12/2012	7/3/2017, 82 FR 30749.	Specific Conditions pertaining to EU005; EU006; and EU022.
Tampa Electric Company—Big Bend Station.	Air Permit No. 0570039–074–AC.	2/26/2015	7/3/2017, 82 FR 30749.	Section 3, Subsection B, Condition 5.
WestRock, LLC	Air Permit No. 0890003–046–AC.	1/9/2015	7/3/2017, 82 FR 30749.	Specific Conditions pertaining to EU006; EU015; EU007; and EU011.
Tampa Electric Company—Big Bend Station.	Air Permit No. 0570039–120–AC.	12/14/2018	11/12/2019, 84 FR 60927.	Section 2, Condition 4; the "SO ₂ Emissions Cap" provision from Section 3, Condition 4; the "SO ₂ CEMS" provision from Section 3, Condition 4; and the "Methods of Operation" for Units 1 and 2 provision from Section 3, Condition 6.
Mosaic Fertilizer, LLC—Bartow Facility.	Air Permit No. 1050046–050–AC.	7/3/2017	2/20/2020, 85 FR 9666.	Section III, Subsection A, Specific Condition 3 (as administratively corrected by Permit No. 1050046–063–AC with an effective date of January 11, 2019); Condition 4; and Condition 5.

Environmental Protection Agency

§ 52.520

EPA-APPROVED FLORIDA SOURCE-SPECIFIC REQUIREMENTS—Continued

Name of source	Permit No.	State effective date	EPA approval date	Explanation
Mosaic Fertilizer, LLC—New Wales Facility.	Air Permit No. 1050059–106–AC.	10/30/2017	2/20/2020, 85 FR 9666.	Section III, Subsection A, Specific Condition 3 (as administratively corrected by Permit No. 1050059–114–AC with an effective date of January 11, 2019); Condition 4; and Condition 5.
EnviroFocus Technologies, LLC.	Air Construction Permit No. 0570057–27–AC.	12/14/2012	6/4/2021, 86 FR 29949.	Except for conditions not specifically related to lead emissions; Section 3, Subsection B, Specific Conditions 3 and 10; Section 3, Subsection C, Specific Condition 5; and Section 3, Subsection G, Specific Condition 5.
EnviroFocus Technologies, LLC.	Air Construction Permit No. 0570057–37–AC.	11/6/2019	6/14/2021, 86 FR 29949.	Only incorporating the following conditions: Section 3, Subsection B, Specific Conditions 2 and 3a; Section 3, Subsection C, Specific Condition 1; and Section 3, Subsection D, Specific Condition 1.
Nutrien White Springs	0470002–132–AC	1/1/2023	8/4/2023, 88 FR 51702.	Conditions 3 through 6 at EU 066 (SAP E) and EU 067 (SAP F).
Mosaic Fertilizer, LLC—South Pierce Facility.	1050055–037–AC	4/1/2023	8/4/2023, 88 FR 51702.	Conditions 4 through 7 at EU 004 (SAP 10) and EU 005 (SAP 11).
Tampa Electric Company (TECO)—Polk Power Station.	1050233–050–AC	1/1/2023	8/4/2023, 88 FR 51702.	Conditions 1 through 4 at EU 004.
Ascend Pensacola	0330040–076–AC	1/1/2023	8/4/2023, 88 FR 51702.	Conditions 1 through 6 at EU 042.
Trademark Nitrogen	0570025–016–AC	1/1/2023	8/4/2023, 88 FR 51702.	Conditions 1 and 5 through 9 at EU 001.

EPA-APPROVED FLORIDA NON-REGULATORY PROVISIONS

Provision	State effective date	EPA approval date	FEDERAL REGISTER, notice	Explanation
Revision to Maintenance Plan for Southeast Florida Area.	12/20/2002	2/13/2004	69 FR 7132	10 year update.
Revision to Maintenance Plan for the Tampa, Florida Area.	12/20/2002	3/29/2004	69 FR 16172	10 year update.

EPA-APPROVED FLORIDA NON-REGULATORY PROVISIONS—Continued

Provision	State effective date	EPA approval date	FEDERAL REGISTER, notice	Explanation
Revision to Maintenance Plan Update for Jacksonville Area, Florida.	12/20/2002	7/22/2003	68 FR 43315	
110(a)(1) Maintenance Plan for the Southeast Florida Area.	7/2/2009	7/26/2010	75 FR 29671	110(a)(1) maintenance plan for 1997 8-hour ozone NAAQS.
110(a)(1) Maintenance Plan for the Tampa, Florida Area.	7/2/2009	7/26/2010	75 FR 29671	110(a)(1) maintenance plan for 1997 8-hour ozone NAAQS.
110(a)(1) Maintenance Plan for the Jacksonville, Florida Area.	7/2/2009	7/26/2010	75 FR 29671	110(a)(1) maintenance plan for 1997 8-hour ozone NAAQS.
110(a)(1) and (2) Infrastructure Requirements for the 1997 8-Hour Ozone National Ambient Air Quality Standards.	12/13/2007	7/30/2012	77 FR 44485	
Section 128 Requirements	5/24/2012	7/30/2012	77 FR 44485	
Sections 110(a)(2)(E)(ii) and (G) Infrastructure Requirements for the 1997 8-Hour Ozone National Ambient Air Quality Standards.	5/24/2012	7/30/2012	77 FR 44485	
110(a)(2)(D)(i)(I) Infrastructure Requirements for the 2006 24-hour PM _{2.5} NAAQS.	9/23/2009	10/11/2012	77 FR 61724	EPA partially disapproved this SIP submission to the extent that it relied on the Clean Air Interstate Rule to meet the 110(a)(2)(D)(i)(I) requirements for the 2006 24-hour PM _{2.5} NAAQS.
110(a)(1) and (2) Infrastructure Requirements for 1997 Fine Particulate Matter National Ambient Air Quality Standards.	4/18/2008	11/8/2012	77 FR 66927	With the exception of section 110(a)(2)(D)(i).
110(a)(1) and (2) Infrastructure Requirements for 2006 Fine Particulate Matter National Ambient Air Quality Standards.	9/23/2009	11/8/2012	77 FR 66927	With the exception of section 110(a)(2)(D)(i).
Portion of Regional Haze Plan Amendment submitted on September 17, 2012.	9/17/2012	11/29/2012	77 FR 71111	Only the BART determinations approved in 77 FR 71111 are incorporated.
110(a)(1) and (2) Infrastructure Requirements for 1997 Fine Particulate Matter National Ambient Air Quality Standards.	4/18/2008	4/3/2013	78 FR 19998	EPA disapproved the State's prong 3 of section 110(a)(2)(D)(i) as it relates to GHG PSD permitting requirements.
110(a)(1) and (2) Infrastructure Requirements for 2006 Fine Particulate Matter National Ambient Air Quality Standards.	9/23/2009	4/3/2013	78 FR 19998	EPA disapproved the State's prong 3 of section 110(a)(2)(D)(i) as it relates to GHG PSD permitting requirements.
Initial Regional Haze Plan	3/19/2010	8/29/2013	78 FR 53250	
Regional Haze Plan Amendment 1	8/31/2010	8/29/2013	78 FR 53250	
Regional Haze Plan Amendment 2	9/17/2012	8/29/2013	78 FR 53250	Remaining Portion of Regional Haze Plan Amendment not approved on November 29, 2012.
Progress Energy Permit (Air Permit No. 0170004–038–AC).	10/15/2012	8/29/2013	78 FR 53250	
Update to October 15, 2013, Progress Energy Permit (Air Permit No. 0170004–038–AC).	5/2/2013	8/29/2013	78 FR 53250	
110(a)(1) and (2) Infrastructure Requirements for the 2008 8-Hour Ozone National Ambient Air Quality Standards.	10/31/2011	11/1/2013	78 FR 65559	With the exception of section 110(a)(2)(D)(i)(I) concerning interstate transport; section 110(a)(2)(D)(i)(II) concerning visibility requirements; and the portions of sections 110(a)(2)(C), prong 3 of 110(a)(2)(D)(i), and 110(a)(2)(J) related to the regulation of GHG emissions, which are being disapproved.

2008 Lead NAAQS Maintenance Plan for the Hillsborough Area.	1/23/2020	6/4/2021	86 FR 29949	Updates to the attainment emissions inventory and the maintenance demonstration, including the projected future emissions inventories, in the March 26, 2018 maintenance plan.
110(a)(1) and (2) Infrastructure Requirements for the 1997 8-Hour Ozone National Ambient Air Quality Standards.	8/26/2020	7/7/2021	86 FR 35608	Approving SIP submission for sections 110(a)(2)(C) & 110(a)(2)(J) as it relates to GHG PSD permitting requirements.
110(a)(1) and (2) Infrastructure Requirements for the 1997 Annual Fine Particulate Matter National Ambient Air Quality Standards.	8/26/2020	7/7/2021	86 FR 35608	Approving SIP submission for prong 3 of section 110(a)(2)(D)(i) as it relates to GHG PSD permitting requirements.
110(a)(1) and (2) Infrastructure Requirements for the 2006 24-hour Fine Particulate Matter National Ambient Air Quality Standards.	8/26/2020	7/7/2021	86 FR 35608	Approving SIP submission for prong 3 of section 110(a)(2)(D)(i) as it relates to GHG PSD permitting requirements.
110(a)(1) and (2) Infrastructure Requirements for the 2008 8-Hour Ozone National Ambient Air Quality Standards.	8/26/2020	7/7/2021	86 FR 35608	Approving SIP submission for section 110(a)(2)(C), prong 3 of 110(a)(2)(D)(i), and 110(a)(2)(J) as it relates to the regulation of GHG emissions.
110(a)(1) and (2) Infrastructure Requirements for the 2015 8-Hour Ozone NAAQS.	9/18/2018	12/2/2021	86 FR 68413	Addressing Prongs 1 and 2 of section 110(a)(2)(D)(i)(I) only.

[64 FR 32348, June 16, 1999]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.520, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

EFFECTIVE DATE NOTE: At 90 FR 24039, June 5, 2025, § 52.520 was amended, effective July 7, 2025.

§ 52.521 Classification of regions.

The Florida plan was evaluated on the basis of the following classifications:

Environmental Protection Agency

§ 52.525

Air quality control region	Pollutant				
	Particulate matter	Sulfur oxides	Nitrogen dioxide	Carbon monoxide	Photochemical oxidants (hydrocarbons)
Mobile (Alabama)-Pensacola-Panama City (Florida)-Southern Mississippi Interstate	I	I	III	III	I
Jacksonville (Florida)-Brunswick (Georgia) Interstate	I	II	III	III	I
West Central Florida Intrastate	I	I	III	III	III
Central Florida Intrastate	II	III	III	III	III
Southwest Florida Intrastate	III	III	III	III	III
Southeast Florida Intrastate	II	III	III	III	III

[37 FR 10858, May 31, 1972, as amended 39 FR 16346, May 8, 1974]

§ 52.522 Approval status.

(a) With the exceptions set forth in this subpart, the Administrator approves Florida's plan for the attainment and maintenance of the national standards under section 110 of the Clean Air Act. Furthermore, the Administrator finds that the plan satisfies all requirements of part D, title 1, of the Clean Air Act as amended in 1977.

(b) [Reserved]

[45 FR 17143, Mar. 18, 1980, as amended at 78 FR 65561, Nov. 1, 2013; 79 FR 30050, May 27, 2014; 86 FR 35610, July 7, 2021]

§ 52.523 [Reserved]

§ 52.524 Compliance schedule.

(a) The information in this section is available in the 40 CFR, part 52 edition revised as of July 1, 1999, the 40 CFR, part 52, Volume 1 of 2 (§§ 52.01 to 52.1018) editions revised as of July 1, 2000 through July 1, 2011, and the 40 CFR, part 52, Volume 1 of 3 (§§ 52.01 to 52.1018) editions revised as of July 1, 2012.

(b) [Reserved]

[79 FR 30050, May 27, 2014]

§ 52.525 General requirements.

(a) The requirements of § 51.116(c) of this chapter are not met since the legal authority to provide for public availability of emission data is inadequate.

(b) Regulation for public availability of emission data. (1) Any person who cannot obtain emission data from the Agency responsible for making emission data available to the public, as specified in the applicable plan, concerning emissions from any source subject to emission limitations which are

part of the approved plan may request that the appropriate Regional Administrator obtain and make public such data. Within 30 days after receipt of any such written request, the Regional Administrator shall require the owner or operator of any such source to submit information within 30 days on the nature and amounts of emissions from such source and any other information as may be deemed necessary by the Regional Administrator to determine whether such source is in compliance with applicable emission limitations or other control measures that are part of the applicable plan.

(2) Commencing after the initial notification by the Regional Administrator pursuant to paragraph (b)(1) of this section, the owner or operator of the source shall maintain records of the nature and amounts of emissions from such source and any other information as may be deemed necessary by the Regional Administrator to determine whether such source is in compliance with applicable emission limitations or other control measures that are part of the plan. The information recorded shall be summarized and reported to the Regional Administrator, on forms furnished by the Regional Administrator, and shall be submitted within 45 days after the end of the reporting period. Reporting periods are January 1 to June 30 and July 1 to December 31.

(3) Information recorded by the owner or operator and copies of this summarizing report submitted to the Regional Administrator shall be retained by the owner or operator for 2 years after the date on which the pertinent report is submitted.

§ 52.526

(4) Emission data obtained from owners or operators of stationary sources will be correlated with applicable emission limitations and other control measures that are part of the applicable plan and will be available at the appropriate regional office and at other locations in the state designated by the Regional Administrator.

[39 FR 34536, Sept. 26, 1974, as amended at 40 FR 55328, Nov. 28, 1975; 51 FR 40676, Nov. 7, 1986]

§ 52.526 Legal authority.

(a) The requirements of § 51.230(f) of this chapter are not met, since section 403.111 of the Florida Statutes could, in some circumstances, prohibit the disclosure of emission data to the public. Therefore, section 403.111 is disapproved.

[39 FR 34536, Sept. 26, 1974, as amended at 51 FR 40676, Nov. 7, 1986]

§ 52.527 [Reserved]

§ 52.528 Control strategy: Sulfur oxides and particulate matter.

(a) In a letter dated October 10, 1986, the Florida Department of Environmental Regulation certified that no emission limits in the State's plan are based on dispersion techniques not permitted by EPA's stack height rules.

(b) The variance granted to the Turkey Point and Port Everglades plants of Florida Power and Light Company from the particulate emission limits of the plan is disapproved because the relaxed limits would cause violation of the Class I increment for sulfur dioxide in the Everglades National Park. These plants must meet the 0.1#/MMBTU particulate limit of the plan.

[48 FR 33868, July 26, 1983, as amended at 54 FR 25455, June 15, 1989]

§ 52.529 [Reserved]

§ 52.530 Significant deterioration of air quality.

(a) EPA approves the Florida Prevention of Significant Deterioration program, as incorporated into this chapter, for power plants subject to the Florida Power Plant Siting Act.

(b) Pursuant to part C, subpart 1 of the Clean Air Act, EPA is approving a December 19, 2013 SIP revision sub-

40 CFR Ch. I (7-1-25 Edition)

mitted by the State of Florida, through the Florida Department of Environmental Protection (FDEP), Division of Air Resource Management that establishes prevention of significant deterioration (PSD) applicability thresholds for greenhouse gas (GHG) emissions at the same emissions thresholds and in the same timeframes as those specified by EPA in the GHG Tailoring Rule. This approval gives FDEP the authority to regulate GHG-emitting sources and issue GHG PSD permits. FDEP's December 19, 2013 SIP revision also includes a GHG PSD Permit Transition Plan which governs the transition from EPA administering GHG PSD permitting requirements for Florida sources under a Federal Implementation Plan (FIP) to the State administering GHG PSD permitting requirements under its approved SIP. Under this GHG PSD Permit Transition Plan, FDEP will administer and enforce GHG PSD permits issued by EPA to Florida sources under the GHG PSD FIP. FDEP's authority over these existing EPA-issued GHG PSD permits includes the authority for FDEP to conduct general administration of these existing permits, authority to process and issue any and all subsequent permit actions relating to such permits, and authority to enforce such permits.

(c) All applications and other information required pursuant to § 52.21 of this part from sources located in the State of Florida shall be submitted to the State agency, Florida Department of Environmental Protection, Division of Air Resources Management, 2600 Blair Stone Road, MS 5500, Tallahassee, Florida 32399-2400, rather than to EPA's Region 4 office.

(d) The requirements of sections 160 through 165 of the Clean Air Act are not met since the Florida plan, as submitted, does not apply to certain sources. Therefore, the provisions of § 52.21 except paragraph (a)(1) are hereby incorporated by reference and made a part of the Florida plan for:

(1) Sources proposing to locate on Indian reservations in Florida; and

Environmental Protection Agency

§ 52.570

(2) Permits issued by EPA prior to approval of the Florida PSD rule.

[45 FR 52741, Aug. 7, 1980, as amended at 46 FR 17020, Mar. 17, 1981; 48 FR 52716, Nov. 22, 1983; 68 FR 11322, Mar. 10, 2003; 68 FR 74488, Dec. 24, 2003; 72 FR 29276, May 25, 2007; 73 FR 36442, June 27, 2008; 74 FR 55143, Oct. 27, 2009; 79 FR 28612, May 19, 2014]

§ 52.532 [Reserved]

§ 52.533 Source surveillance.

The plan lacks test methods for several source categories. As required by § 52.12(c)(1) of this part, EPA test methods (found at 40 CFR part 60) will be used by EPA to determine compliance with the following emission limiting standards:

(a) Particulate emissions from citrus plants controlled by a scrubber and subject to the process weight table (submitted as 17-2.05(2) and reformatted as 17-2.610(1)1.a).

(b) TRS emissions from recovery furnaces at kraft pulp mills (submitted as 17-2.05(6)D and reformatted as 17-2.600(4)1).

(c) Sulfur dioxide emissions from fossil fuel steam sources (submitted as 17-2.05(6)E and reformatted as 17-2.600 (5) and (6)).

(d) Emissions from portland cement plants (submitted as 17-2.05(6)F and reformatted as 17-2.600(7)).

(e) Particulate and visible emissions from carbonaceous fuel burning equipment (submitted as 17-2.05(6)I and reformatted as 17-2.600(10)).

[47 FR 32116, July 26, 1982]

§ 52.534 Visibility protection.

(a) The requirements of section 169A of the Clean Air Act are not met because the plan does not include approvable procedures meeting the requirements of 40 CFR 51.305 and 51.307 for protection of visibility in mandatory Class I Federal areas.

(b) Regulations for visibility new source review. The provisions of § 52.28 are hereby incorporated and made part of the applicable plan for the State of Florida.

[51 FR 5505, Feb. 13, 1986]

§ 52.536 Original identification of plan section.

(a) This section identified the original “Air Implementation Plan for the State of Florida” and all revisions submitted by Florida that were federally approved prior to July 1, 1998. The information in this section is available in the 40 CFR, part 52 edition revised as of July 1, 1999, the 40 CFR, part 52, Volume 1 of 2 (§§ 52.01 to 52.1018) editions revised as of July 1, 2000 through July 1, 2011, and the 40 CFR, part 52, Volume 1 of 3 (§§ 52.01 to 52.1018) editions revised as of July 1, 2012.

(b)–(c) [Reserved]

[79 FR 30050, May 27, 2014]

§ 52.540 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of nitrogen oxides?

(a) The owner and operator of each source and each unit located in the State of Florida and Indian country within the borders of the State and for which requirements are set forth under the CSAPR NO_x Ozone Season Group 1 Trading Program in subpart BBBBB of part 97 of this chapter must comply with such requirements with regard to emissions occurring in 2015 and 2016.

(b) [Reserved]

[76 FR 48362, Aug. 8, 2011, as amended at 81 FR 74594, Oct. 26, 2016]

Subpart L—Georgia

§ 52.569 [Reserved]

§ 52.570 Identification of plan.

(a) *Purpose and scope.* This section sets forth the applicable State implementation plan for Georgia under section 110 of the Clean Air Act, 42 U.S.C. 7401, and 40 CFR part 51 to meet national ambient air quality standards.

(b) *Incorporation by reference.* (1) Material listed in paragraph (c) of this section with an EPA approval date prior to September 1, 2024, for Georgia was approved for incorporation by reference by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Material is incorporated as it exists on the date of the approval and notification of any

§ 52.570

40 CFR Ch. I (7–1–25 Edition)

change in the material will be published in the FEDERAL REGISTER. Entries in paragraphs (c) and (d) of this section with EPA approval dates after September 1, 2024, for Georgia, will be incorporated by reference in the next update to the SIP compilation.

(2) EPA Region 4 certifies that the rules/regulations provided by EPA in the SIP compilation at the addresses in paragraph (b)(3) of this section are an exact duplicate of the officially promulgated State rules/regulations which have been approved as part of the State Implementation Plan as of the dates

referenced in paragraph (b)(1) of this section.

(3) Copies of the materials incorporated by reference may be inspected at the Region 4 EPA Office at 61 Forsyth Street SW, Atlanta, GA 30303. To obtain the material, please call (404) 562–9022. You may also inspect the material with an EPA approval date prior to September 1, 2024, for Georgia at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA email fedreg.legal@nara.gov or go to <https://www.archives.gov/federal-register/cfr/ibr-locations.html>.

(c) *EPA-approved Georgia regulations.*

(e) *EPA-Approved Georgia non-regulatory provisions.*

EPA-APPROVED GEORGIA NON-REGULATORY PROVISIONS

Name of nonregulatory SIP provision	Applicable geographic or nonattainment area	State submittal date/ effective date	EPA approval date	Explanation
High Occupancy Vehicle (HOV) lane on I–85 from Chamblee-Tucker Road to State Road 316. High Occupancy Toll (HOT) lane on I–85 from Chamblee-Tucker Road to State Road 316.	Atlanta Metropolitan Area ..	11/15/1993 and amended on 6/17/1996 and 2/5/2010	3/18/1999, 4/26/1999 and 11/5/2009.	
Clean Fuel Vehicles Revolving Loan Program.	Atlanta Metropolitan Area ..	6/17/1996	4/26/1999.	
Regional Commute Options Program and HOV Marketing Program.	Atlanta Metropolitan Area ..	6/17/1996	4/26/1999.	
HOV lanes on I–75 and I–85	Atlanta Metropolitan Area ..	6/17/1996	4/26/1999.	
Two Park and Ride Lots: Rockdale County-Sigman at I–20 and Douglas County-Chapel Hill at I–20.	Atlanta Metropolitan Area ..	6/17/1996	4/26/1999.	
MARTA Express Bus routes (15 buses).	Atlanta Metropolitan Area ..	6/17/1996	4/26/1999.	
Signal preemption for MARTA routes #15 and #23.	Atlanta Metropolitan Area ..	6/17/1996	4/26/1999.	
Improve and expand service on MARTA's existing routes in southeast DeKalb County.	Atlanta Metropolitan Area ..	6/17/1996	4/26/1999.	
Acquisition of clean fuel buses for MARTA and Cobb County Transit.	Atlanta Metropolitan Area ..	6/17/1996	4/26/1999.	
ATMS/Incident Management Program on I–75/I–85 inside I–285 and northern ARC of I–285 between I–75 and I–85.	Atlanta Metropolitan Area ..	6/17/1996	4/26/1999.	
Upgrading, coordination and computerizing intersections.	Atlanta Metropolitan Area ..	6/17/1996	4/26/1999.

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.570, see the List of CFR Sections Affected, which appears in the

Finding Aids section of the printed volume and at www.govinfo.gov.

§ 52.571 Classification of regions.

The Georgia plan was evaluated on the basis of the following classifications:

Air quality control region	Pollutant				
	Particulate matter	Sulfur oxides	Nitrogen dioxide	Carbon monoxide	Photochemical oxidants (hydrocarbons)
Augusta (Georgia)-Aiken (South Carolina) Interstate	I	II	III	III	III
Metropolitan Atlanta Intrastate	I	I	III	III	III
Chattanooga Interstate	I	II	III	III	III
Columbus (Georgia)-Phenix City (Alabama) Interstate	I	III	III	III	III
Central Georgia Intrastate	I	I	III	III	III
Jacksonville (Florida)-Brunswick (Georgia) Interstate	I	II	III	III	I
Northeast Georgia Intrastate	II	III	III	III	III
Savannah (Georgia)-Beaufort (South Carolina) Interstate	I	I	III	III	III
Southwest Georgia Intrastate	II	II	III	III	III

[37 FR 10859, May 31, 1972, as amended at 39 FR 16346, May 8, 1974]

§ 52.572 Approval status.

(a) With the exceptions set forth in this subpart, the Administrator approves Georgia's plans for the attainment and maintenance of the national standards under section 110 of the Clean Air Act. Furthermore, the Administrator finds the plans satisfy all requirements of Part D, Title I, of the Clean Air Act as amended in 1977.

(b) *Disapproval.* Submittal from the State of Georgia, through the Georgia's Department of Natural Resources Environmental Protection Division (EPD) on January 13, 2011, that would allow for the automatic rescission of federal permitting-related requirements in certain circumstances. EPA is disapproving a portion of the SIP submittal related to a provision (at 391–3–

1-.02(7)(a)(2)(iv)) that would automatically rescind portions of Georgia's State Implementation Plan in the wake of certain court decisions or other triggering events (the automatic rescission clause).

[76 FR 55577, Sept. 8, 2011, as amended at 81 FR 11445, Mar. 4, 2016]

§ 52.573 Control strategy: General.

The generic rules and procedures for emission trades (bubbles), submitted on October 27, 1982, by the Georgia Department of Natural Resources, are disapproved because they do not meet the requirements of the Clean Air Act.

[49 FR 44464, Nov. 7, 1984]

§§ 52.574–52.575 [Reserved]

§ 52.576 Compliance schedules.

(a) [Reserved]

(b) The extended compliance schedule for the General Motors Lakewood Assembly Plant submitted on July 30, 1982, is disapproved because the State has failed to show that the schedule would not interfere with the attainment of the ozone standard in the Atlanta nonattainment area.

[40 FR 3413, Jan. 22, 1975, as amended at 40 FR 18432, Apr. 28, 1975; 40 FR 42352, Sept. 12, 1975; 51 FR 3778, Jan. 30, 1986; 51 FR 40675, 40676, Nov. 7, 1986; 54 FR 25258, June 14, 1989]

§ 52.577 Determination of attainment.

(a) Based upon EPA's review of the air quality data for the 3-year period 2007–2009, EPA determined that the Chattanooga, Alabama-Georgia-Tennessee PM_{2.5} nonattainment area attained the 1997 annual PM_{2.5} NAAQS by the applicable attainment date of April 5, 2010. Therefore, EPA has met the requirement pursuant to CAA section 179(c) to determine, based on the Area's air quality as of the attainment date, whether the Area attained the standard. EPA also determined that the Chattanooga, Alabama-Georgia-Tennessee PM_{2.5} nonattainment area is not subject to the consequences of failing to attain pursuant to section 179(d).

(b) Based upon EPA's review of the air quality data for the 3-year period 2007–2009, EPA determined that the Macon, Georgia PM_{2.5} nonattainment Area attained the 1997 annual PM_{2.5}

NAAQS by the applicable attainment date of April 5, 2010. Therefore, EPA has met the requirement pursuant to CAA section 179(c) to determine, based on the Area's air quality as of the attainment date, whether the Area attained the standard. EPA also determined that the Macon, Georgia PM_{2.5} nonattainment Area is not subject to the consequences of failing to attain pursuant to section 179(d).

(c) Based upon EPA's review of the air quality data for the 3-year period 2007–2009, EPA determined that the Rome, Georgia PM_{2.5} nonattainment area attained the 1997 annual PM_{2.5} NAAQS by the applicable attainment date of April 5, 2010. Therefore, EPA has met the requirement pursuant to CAA section 179(c) to determine, based on the Area's air quality as of the attainment date, whether the Area attained the standard. EPA also determined that the Rome, Georgia PM_{2.5} nonattainment area is not subject to the consequences of failing to attain pursuant to section 179(d).

(d) Based upon EPA's review of the air quality data for the 3-year period 2008–2010, EPA determined that the Atlanta, Georgia, 1997 8-hour ozone nonattainment Area attained the 1997 8-hour ozone NAAQS by the applicable attainment date of June 15, 2011. Therefore, EPA has met the requirement pursuant to CAA section 181(b)(2) to determine, based on the Area's air quality as of the attainment date, whether the Area attained the standard. EPA also determined that the Atlanta, Georgia, 1997 8-hour ozone nonattainment Area is not subject to the consequences of failing to attain pursuant to section 181(b)(2).

(e) Based upon EPA's review of the air quality data for the 3-year period 2018–2020, EPA determined that the Atlanta, Georgia, 2015 8-hour ozone nonattainment area attained the 2015 8-hour ozone NAAQS by the applicable attainment date of August 3, 2021. Therefore, EPA has met the requirement pursuant to CAA section 181(b)(2) to determine, based on the Area's air quality as of the attainment date, whether the Area attained the standard. EPA also determined that the Atlanta, Georgia, 2015 8-hour ozone nonattainment area is not subject to the

§ 52.578

consequences of failing to attain pursuant to section 181(b)(2).

[76 FR 55575, Sept. 8, 2011, as amended at 76 FR 55577, Sept. 8, 2011; 77 FR 13492, Mar. 7, 2012; 87 FR 60913, Oct. 7, 2022]

§ 52.578 Control Strategy: Sulfur oxides and particulate matter.

In a letter dated March 26, 1987, the Georgia Department of Natural Resources certified that no emission limits in the State's plan are based on dispersion techniques not permitted by EPA's stack height rules. This certification does not apply to Georgia Power plants; Hammond (Coosa), McDonough (Smyrna), Arkwright (Macon), Branch (Milledgeville), Wansley (Roopville), Scherer (Juliette), and Yates (Newnan), Savannah Electric Plants McIntosh (Rincon) and Port Wentworth (Port Wentworth); Inland (Rome); Buckeye Cellulose (Oglethorpe); Georgia Kraft (Macon), Union Camp (Savannah); and Stone Container (Savannah).

(a) *Determination of Attaining Data.* EPA has determined, as of April 5, 2011, the Rome, Georgia, nonattainment area has attaining data for the 1997 annual PM_{2.5} NAAQS. This determination, in accordance with 40 CFR 52.1004(c), suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as this area continues to meet the 1997 annual PM_{2.5} NAAQS.

(b) *Determination of Attaining Data.* EPA has determined, as of May 31, 2011, the Chattanooga, Tennessee, nonattainment area has attaining data for the 1997 annual PM_{2.5} NAAQS. This determination, in accordance with 40 CFR 52.1004(c), suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as this area continues to meet the 1997 annual PM_{2.5} NAAQS.

(c) *Determination of Attaining Data.* EPA has determined, as of June 2, 2011, the Macon, Georgia, nonattainment

40 CFR Ch. I (7–1–25 Edition)

area has attaining data for the 1997 annual PM_{2.5} NAAQS. This determination, in accordance with 40 CFR 52.1004(c), suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as this area continues to meet the 1997 annual PM_{2.5} NAAQS.

(d) *Disapproval.* EPA is disapproving portions of Georgia's Infrastructure SIP for the 2006 24-hour PM_{2.5} NAAQS addressing interstate transport, specifically with respect to section 110(a)(2)(D)(i)(I).

(e) *Determination of Attaining Data.* EPA has determined, as of April 5, 2011, the Atlanta, Georgia, nonattainment area has attaining data for the 1997 annual PM_{2.5} NAAQS. This determination, in accordance with 40 CFR 51.1004(c), suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as this area continues to meet the 1997 annual PM_{2.5} NAAQS.

[54 FR 40002, Sept. 29, 1989, as amended at 76 FR 18651, Apr. 5, 2011; 76 FR 31241, May 31, 2011; 76 FR 31859, June 2, 2011; 76 FR 43167, July 20, 2011; 76 FR 76622, Dec. 8, 2011]

§ 52.579 Economic feasibility considerations.

Section 88–906(h), (i), (k), (o) and (q) of the Georgia Code is disapproved, since consideration of economic feasibility could, in some cases, conflict, with the requirements of the Act that primary standards be attained as expeditiously as practicable, but in no case later than July 1975.

[39 FR 34536, Sept. 26, 1974]

§ 52.580 [Reserved]

§ 52.581 Significant deterioration of air quality.

(a) All applications and other information required pursuant to § 52.21 of this part from sources located in the State of Georgia shall be submitted to the State agency, Georgia Department

of Natural Resources, Environmental Protection Division, Air Protection Branch, 4244 International Parkway, Suite 120, Atlanta, Georgia 30354 rather than to EPA's Region 4 office.

(b) [Reserved]

[77 FR 23398, Apr. 19, 2012]

§ 52.582 Control strategy: Ozone.

(a) Approval—The Administrator approves the incorporation of the photochemical assessment ambient monitoring system submitted by Georgia on November 8, 1993, into the Georgia State Implementation Plan. This submittal satisfies 40 CFR 58.20(f) which requires the State to provide for the establishment and maintenance of photochemical assessment monitoring stations (PAMS).

(b) On August 29, 1997, Harold F. Reheis, Director, Georgia Department of Natural Resources submitted to John Hankinson, Regional Administrator, United States Environmental Protection Agency Region IV, a State Implementation Plan revision including the following transportation control measures.

(1) *HOV Lane*—This project referred to as AR 073B is the addition of HOV lanes on I-85 from Chamblee-Tucker Road to State Route 316.

(2) *Ridershare Program*—This project is referred to as AR-220 and is a lump sum eligible to all colleges and universities with the 10 county ARC region.

(3) *Transportation Management Associations*—Referred to as project AR 221 is to set up a “pot” of funds set aside specially to assist in the development of transportation management associations and start-up ridershare services in the areas that are considered to be highly congested throughout the Region.

(4) *MARTA Transit Incentives Program*—This project is referred to as AR-231.

(5) *Alternative Fuel Refueling Station/Park and Ride Transportation Center*—This project is referred to as DO-AR-211.

(c) EPA is giving final interim approval to the Georgia Inspection and Maintenance (I/M) Program submitted on March 27, 1996, with supplemental information submitted on January 31, 1997, until November 11, 1999.

(d) *Determination of attaining data.* EPA has determined, as of June 23, 2011, the Atlanta, Georgia nonattainment area has attaining data for the 1997 8-hour ozone NAAQS. This determination, in accordance with 40 CFR 51.918, suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as this area continues to meet the 1997 8-hour ozone NAAQS.

(e) *Determination of attaining data.* EPA has determined, as of July 14, 2016, that the Atlanta, Georgia nonattainment area has attaining data for the 2008 8-hour ozone NAAQS. This determination, in accordance with 40 CFR 51.1118, suspends the requirements for this area to submit attainment demonstrations and associated reasonably available control measures, reasonable further progress plans, contingency measures for failure to attain or make reasonable progress, and other planning SIPs related to attainment of the 2008 ozone NAAQS, or for any prior NAAQS for which the determination has been made, until such time as: The area is redesignated to attainment for that NAAQS or a redesignation substitute is approved as appropriate, at which time the requirements no longer apply; or EPA determines that the area has violated that NAAQS, at which time the area is again required to submit such plans.

[59 FR 46178, Sept. 7, 1994, as amended at 63 FR 23390, Apr. 29, 1998; 63 FR 34302, June 24, 1998; 64 FR 4570, Jan. 29, 1999; 76 FR 36875, June 23, 2011; 81 FR 45421, July 14, 2016]

§ 52.583 Additional rules and regulations.

Section 391-3-1-.02(2)(e), Particulate Emissions from Manufacturing Processes, is hereby approved only to the extent that it provides for the establishment, as permit conditions, of emission limits more stringent than those otherwise applicable under the

currently approved Georgia regulations. Any application of this regulation which would result in permit provisions less stringent than those otherwise required by the State's regulations must be formally submitted to EPA for prior approval as a plan revision pursuant to section 110(a) of the Clean Air Act.

[41 FR 35185, Aug. 20, 1976]

§ 52.584 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of nitrogen oxides?

(a)(1) The owner and operator of each source and each unit located in the State of Georgia and for which requirements are set forth under the CSAPR NO_x Annual Trading Program in subpart AAAAA of part 97 of this chapter must comply with such requirements. The obligation to comply with such requirements will be eliminated by the promulgation of an approval by the Administrator of a revision to Georgia's State Implementation Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan under § 52.38(a), except to the extent the Administrator's approval is partial or conditional.

(2) Notwithstanding the provisions of paragraph (a)(1) of this section, if, at the time of the approval of Georgia's SIP revision described in paragraph (a)(1) of this section, the Administrator has already started recording any allocations of CSAPR NO_x Annual allowances under subpart AAAAA of part 97 of this chapter to units in the State for a control period in any year, the provisions of subpart AAAAA of part 97 of this chapter authorizing the Administrator to complete the allocation and recordation of CSAPR NO_x Annual allowances to units in the State for each such control period shall continue to apply, unless provided otherwise by such approval of the State's SIP revision.

(b)(1) The owner and operator of each source and each unit located in the State of Georgia and for which requirements are set forth under the CSAPR NO_x Ozone Season Group 1 Trading Program in subpart BBBBB of part 97 of this chapter must comply with such requirements. The obligation to com-

ply with such requirements will be eliminated by the promulgation of an approval by the Administrator of a revision to Georgia's State Implementation Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan under § 52.38(b), except to the extent the Administrator's approval is partial or conditional.

(2) Notwithstanding the provisions of paragraph (b)(1) of this section, if, at the time of the approval of Georgia's SIP revision described in paragraph (b)(1) of this section, the Administrator has already started recording any allocations of CSAPR NO_x Ozone Season Group 1 allowances under subpart BBBBB of part 97 of this chapter to units in the State for a control period in any year, the provisions of subpart BBBBB of part 97 of this chapter authorizing the Administrator to complete the allocation and recordation of CSAPR NO_x Ozone Season Group 1 allowances to units in the State for each such control period shall continue to apply, unless provided otherwise by such approval of the State's SIP revision.

[76 FR 48363, Aug. 8, 2011, as amended at 81 FR 74586 and 74594, Oct. 26, 2016]

§ 52.585 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of sulfur dioxide?

(a) The owner and operator of each source and each unit located in the State of Georgia and for which requirements are set forth under the CSAPR SO₂ Group 2 Trading Program in subpart DDDDD of part 97 of this chapter must comply with such requirements. The obligation to comply with such requirements will be eliminated by the promulgation of an approval by the Administrator of a revision to Georgia's State Implementation Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan under § 52.39, except to the extent the Administrator's approval is partial or conditional.

(b) Notwithstanding the provisions of paragraph (a) of this section, if, at the time of the approval of Georgia's SIP revision described in paragraph (a) of

Environmental Protection Agency

§ 52.620

this section, the Administrator has already started recording any allocations of CSAPR SO₂ Group 2 allowances under subpart DDDDD of part 97 of this chapter to units in the State for a control period in any year, the provisions of subpart DDDDD of part 97 of this chapter authorizing the Administrator to complete the allocation and recordation of CSAPR SO₂ Group 2 allowances to units in the State for each such control period shall continue to apply, unless provided otherwise by such approval of the State's SIP revision.

[76 FR 48363, Aug. 8, 2011, as amended at 81 FR 74586, Oct. 26, 2016]

§ 52.590 Original identification of plan section.

(a) This section identified the original "Air Implementation Plan for the State of Georgia" and all revisions submitted by Georgia that were federally approved prior to December 1, 1998. The information in this section is available in the 40 CFR, part 52 edition revised as of July 1, 1999, the 40 CFR, part 52, Volume 1 of 2 (§§ 52.01 to 52.1018) editions revised as of July 1, 2000 through July 1, 2011, and the 40 CFR, part 52, Volume 1 of 3 (§§ 52.01 to 52.1018) editions revised as of July 1, 2012.

(b)-(c) [Reserved]

[79 FR 30050, May 27, 2014]

Subpart M—Hawaii

§ 52.620 Identification of plan.

(a) *Purpose and scope.* This section sets forth the applicable State implementation plan for State of Hawaii under section 110 of the Clean Air Act,

42 U.S.C. 7401–7671q and 40 CFR part 51 to meet national ambient air quality standards.

(b) *Incorporation by reference.* (1) Material listed in paragraph (c) and (d) of this section with an EPA approval date prior to May 1, 2012, was approved for incorporation by reference by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Material is incorporated as it exists on the date of the approval, and notice of any change in the material will be published in the FEDERAL REGISTER. Entries in paragraphs (c) and (d) of this section with EPA approval dates after May 1, 2012, will be incorporated by reference in the next update to the SIP compilation.

(2) EPA Region IX certifies that the rules/regulations provided by EPA in the SIP compilation at the addresses in paragraph (b)(3) of this section are an exact duplicate of the officially promulgated State rules/regulations which have been approved as part of the State implementation plan as of May 1, 2012.

(3) Copies of the materials incorporated by reference may be inspected at the Region IX EPA Office at 75 Hawthorne Street, San Francisco, CA 94105; Air and Radiation Docket and Information Center, EPA Headquarters Library, Infoterra Room (Room Number 3334), EPA West Building, 1301 Constitution Ave. NW., Washington, DC; or the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call (202) 741–6030, or go to: <http://www.archives.gov/federal-register/cfr/ibr-locations.html>.

(c) *EPA approved regulations.*

Sections VIII through XI: Section VIII—Prevention of Emergency Episodes.	State-wide	01/28/72	05/31/72, 37 FR 10842	Excluding subsection entitled, "State Plan." See State submittals dated May 8, 1972 and May 22, 1972, approved at 37 FR 15080 (July 27, 1972), and 40 CFR 52.623.
Section IX—Compliance Schedule.	State-wide	01/28/72	05/31/72, 37 FR 10842.	
Section X—Source Surveillance System.	State-wide	01/28/72	05/31/72, 37 FR 10842.	
Section XI—Permit and Registration System.	State-wide	01/28/72	05/31/72, 37 FR 10842.	
Section XII—Air Quality Surveillance Network:				
Section XII—Air Quality Surveillance Network.	State-wide	08/21/80	08/10/81, 46 FR 40512.	
Air Quality Surveillance Network, SIP Amendment—PM ₁₀ .	State-wide	09/14/88	07/09/04, 69 FR 41431.	
Sections XIII and XIV: Section XIII—Intergovernmental Cooperation.	State-wide	01/28/72	05/31/72, 37 FR 10842.	
Section XIV—Resources.	State-wide	01/28/72	05/31/72, 37 FR 10842.	
State of Hawaii Air Pollution Control Implementation Plans for Regional Haze				
Hawaii State Department of Health 5-Year Regional Haze Progress Report for Federal Implementation Plan, excluding Appendix H, I and J.	State-wide	10/20/2017	8/12/2019, 84 FR 39754.	

Environmental Protection Agency

§ 52.620

EPA APPROVED HAWAII NONREGULATORY PROVISIONS AND QUASI-REGULATORY MEASURES—
Continued

Name of SIP provision	Applicable geographic or nonattainment area	State submittal date	EPA approval date	Explanation
State of Hawaii Air Pollution Control Implementation Plans for Nitrogen Dioxide, Ozone, PM_{2.5}, and Lead				
State of Hawaii Air Pollution Control Implementation Plan for Lead.	Statewide	10/29/82	8/18/83, 48 FR 37402	Excluding section II ("Notice of Public Hearing"); Hawaii Statute on Environmental Quality, Chapter 342, Hawaii Revised Statutes, section 342-7 (see 74 FR 11037 (March 16, 2009); and section IV ("Control Regulations"). The statutory provisions in Section III ("Legal Authority") superseded statutory provisions approved at 37 FR 10842 (May 31, 1972) and at 38 FR 30876 (November 8, 1973) and were, with few exceptions, superseded by approval of more recent statutory provisions at 77 FR 47530 (August 9, 2012). Statutory provisions that remain in the current applicable SIP are listed separately in the table in paragraph (e).
State Implementation Plan Revision, Clean Air Act Section 110(a)(2), 1997 Ozone National Ambient Air Quality Standard and 1997 and 2006 PM _{2.5} National Ambient Air Quality Standards.	Statewide	12/14/11	8/9/12, 77 FR 47530	Approval excludes appendix A ("Hawaii Revised Statutes, Chapter 84, Standards of Conduct, Chapter 342B, Air Pollution Control"), appendix B, ("Hawaii Administrative Rules, Title 11, Chapter 60.1, Air Pollution Control"), appendix D ("SIP Public Comment Proceedings"), and appendix E ("Public Proceedings for Hawaii Administrative Rules, Chapter 11-60.1"). Approved statutory provisions included in appendix A are listed separately in the table in paragraph (e). In separate rulemakings, EPA has taken action to approve certain regulations included in appendix B. Approved regulations are listed separately in the table in paragraph (c).

EPA APPROVED HAWAII NONREGULATORY PROVISIONS AND QUASI-REGULATORY MEASURES—
Continued

Name of SIP provision	Applicable geographic or nonattainment area	State submittal date	EPA approval date	Explanation
Hawaii State Implementation Plan Revision for 2008 Lead National Ambient Air Quality Standard, Clean Air Act Section 110(a)(1) & (2), excluding attachment 6, and appendices A, B, C, F.	Statewide	2/13/13	79 FR 19012, 4/7/2014	Approved SIP revision excludes attachment 6 ("Summary of Public Participation Proceedings"), appendix A ("Hawaii Revised Statutes Chapter 342A, Air Pollution Control"), appendix B ("Hawaii Revised Statutes Chapter 84, Standards of Conduct"), appendix C ("Hawaii Administrative Rules Chapter 11–60.1, Air Pollution Control"), and appendix F ("Approval and Public Participation Proceedings from the Most Recent Amendment and Public Comment for HAR 11–60.1–90: September 15, 2001 version"). The statutory provisions in appendices A and B were previously approved and are listed separately in the table under paragraph (e). EPA-approved regulations contained in appendix C are listed separately in the table under paragraph (c). This action addresses the following CAA elements or portions thereof for the 2008 Pb NAAQS: 110(a)(2)(A), (B), (C), (D)(i)(I), (E), (F), (G), (H), (J), (K), (L), and (M).

[70 FR 44854, Aug. 4, 2005; 70 FR 49377, Aug. 23, 2005, as amended at 74 FR 11040, Mar. 16, 2009; 74 FR 27710, June 11, 2009; 74 FR 36119, July 22, 2009; 77 FR 24150, Apr. 23, 2012; 77 FR 25086, Apr. 27, 2012; 77 FR 47533, Aug. 9, 2012; 78 FR 11985, Feb. 21, 2013; 79 FR 17870, Mar. 31, 2014; 79 FR 19013, Apr. 7, 2014; 79 FR 49456, Aug. 21, 2014; 84 FR 39756, Aug. 12, 2019; 84 FR 40269, Aug. 14, 2019; 86 FR 73130, Dec. 27, 2021]

§ 52.621 Classification of regions.

The Hawaii plan was evaluated on the basis of the following classifications:

Air quality control region	Pollutant				
	Particulate matter	Sulfur oxides	Nitrogen dioxide	Carbon monoxide	Photochemical oxidants (hydrocarbons)
State of Hawaii	II	III	III	III	III

[37 FR 10860, May 31, 1972]

§ 52.622 Original identification of plan.

(a) This section identified the original "State of Hawaii Air Pollution Control Implementation Plan" and all revisions submitted by the State of Hawaii that were federally approved prior to June 1, 2005.

(b) The plan was officially submitted on January 28, 1972.

(1) Previously approved on May 31, 1972 in paragraph (b) of this section and now deleted from the SIP without replacement Air Pollution Control Law, Hawaii Revised Statutes, chapter 322, part V, section 322-68 and Public Health Regulations, chapter 43, section 20.

(c) The plan revisions listed below were submitted on the dates specified.

(1) Certification that the plan was adopted submitted on April 4, 1972, by the Department of Health.

(2) Telegram and letters (Non-regulatory) clarifying the plan submitted on May 8, 1972, by the Governor.

(3) Telegram (Non-regulatory) clarifying the particulate matter control strategy submitted on May 22, 1972, by the Governor.

(4) Letter (Non-regulatory) clarifying disapproval of the plan submitted on June 15, 1972, by the Governor.

(i) Previously approved on November 8, 1973 in paragraph (c)(4) of this section and now deleted from the SIP without replacement S.B. No. 1382-72, Act 100, section 7.

(ii) [Reserved]

(5) Revised regulations (in their entirety) for the State of Hawaii submitted on November 21, 1972, by the Governor.

(i) Previously approved on May 14, 1973 in paragraph (c)(5) of this section and now deleted from the SIP without replacement chapter 43, section 20.

(ii) [Reserved]

(6) Regulations establishing a permit system for agricultural burning submitted on May 15, 1973, by the Governor.

(7) Compliance schedule submitted on July 27, 1973, by the Governor.

(8) 18-month extension plan for particulate matter submitted on August 15, 1973, by the Governor.

(9) Date for attainment of the national ambient air quality standards for particulate matter submitted on April 25, 1974, by the Governor.

(10) Previously approved on April 23, 1979 and now deleted without replacement: A variance to the Hawaii Public Health Regulations, chapter 43, section 7(b)(5) submitted on September 12, 1978, by the Governor.

(11) A variance to the Hawaii Public Health Regulations, Chapter 43, Section 7(b)(5) submitted on February 22, 1979 by the Governor.

(12) The following amendments to the plan were submitted on August 21, 1980, by the Governor.

(i) XII. Air Quality Surveillance Network.

(13) A variance to the Hawaii Public Health Regulations, Chapter 43, section 8 (b)(1) submitted on November 25, 1980 by the Governor.

(14) Previously approved on September 30, 1982 and now deleted without replacement: A variance of the Hawaii Public Health Regulations, chapter 43, section 8(b)(1) submitted on April 6, 1982, by the Governor.

(15) Hawaii State Lead SIP Revision submitted on October 29, 1982, by the State.

(i) Previously approved on August 18, 1983 in paragraph (c)(15) of this section and now deleted from the SIP without replacement Hawaii Statute on Environmental Quality, Hawaii Revised Statutes, chapter 342, section 342-7.

(ii) [Reserved]

§ 52.623

(16) The following amendments to the plan were submitted on December 20, 1982 by the State.

(i) Title 11—Department of Health, Chapter 60, Air Pollution Control.

(A) Amended sections 11-60-01 thru 11-60-29, 11-60-35 thru 11-60-38.

(B) Previously approved on August 18, 1983 and now deleted without replacement section 11-60-36.

(17) The following amendment to the plan was submitted on September 14, 1988, by the Governor's designee.

(i) *Incorporation by reference.* (A) Hawaii Department of Health.

(I) Section XII, Air Quality Surveillance Network adopted on August 16, 1988.

[37 FR 10861, May 31, 1972, as amended at 41 FR 8959, Mar. 2, 1976; 44 FR 23828, Apr. 23, 1979; 44 FR 46274, Aug. 7, 1979; 46 FR 40513, Aug. 10, 1981; 47 FR 3111, Jan. 22, 1982; 48 FR 37403, Aug. 18, 1983; 62 FR 34648, June 27, 1997; 69 FR 41432, July 9, 2004. Redesignated and amended at 70 FR 44854, Aug. 4, 2005; 74 FR 11040, Mar. 16, 2009]

§ 52.623 Approval status.

(a) With the exceptions set forth in this subpart, the Administrator approves Hawaii's plan for attainment and maintenance of the national standards. The State included various provisions in its plan to provide for the attainment of the State ambient air quality standards. As described in the Governor's letters of January 28, May 8, and May 22, 1972, these provisions were included for information purposes only and were not to be considered a part of the plan to implement national standards. Accordingly, these additional provisions are not considered a part of the applicable plan.

(b) *1997 8-hour ozone NAAQS:* The SIP submitted on December 14, 2011 is partially disapproved for Clean Air Act (CAA) elements 110(a)(2)(C) and (J), and is disapproved for CAA elements 110(a)(2)(D)(i)(II) and (D)(ii).

(c) *1997 PM_{2.5} NAAQS:* The SIP submitted on December 14, 2011 is partially disapproved for Clean Air Act (CAA) elements 110(a)(2)(C) and (J), and is disapproved for CAA elements 110(a)(2)(D)(i)(II) and (D)(ii).

(d) *2006 PM_{2.5} NAAQS:* The SIP submitted on December 14, 2011 is partially disapproved for Clean Air Act (CAA) elements 110(a)(2)(C) and (J), and is dis-

40 CFR Ch. I (7-1-25 Edition)

approved for CAA elements 110(a)(2)(D)(i)(II) and (D)(ii).

[79 FR 17874, Mar. 31, 2014]

§ 52.624 General requirements.

(a) The requirements of § 51.116(c) of this chapter are not met since the legal authority to provide for public availability of emission data is inadequate.

(b) *Regulation for public availability of emission data.* (1) Any person who cannot obtain emission data from the Agency responsible for making emission data available to the public, as specified in the applicable plan, concerning emissions from any source subject to emission limitations which are part of the approved plan may request that the appropriate Regional Administrator obtain and make public such data. Within 30 days after receipt of any such written request, the Regional Administrator shall require the owner or operator of any such source to submit information within 30 days on the nature and amounts of emissions from such source and any other information as may be deemed necessary by the Regional Administrator to determine whether such source is in compliance with applicable emission limitations or other control measures that are part of the applicable plan.

(2) Commencing after the initial notification by the Regional Administrator pursuant to paragraph (b)(1) of this section, the owner or operator of the source shall maintain records of the nature and amounts of emissions from such source and any other information as may be deemed necessary by the Regional Administrator to determine whether such source is in compliance with applicable emission limitations or other control measures that are part of the plan. The information recorded shall be summarized and reported to the Regional Administrator, on forms furnished by the Regional Administrator, and shall be submitted within 45 days after the end of the reporting period. Reporting periods are January 1 to June 30 and July 1 to December 31.

(3) Information recorded by the owner or operator and copies of this summarizing report submitted to the Regional Administrator shall be retained by the owner or operator for 2

Environmental Protection Agency

§ 52.633

years after the date on which the pertinent report is submitted.

(4) Emission data obtained from owners or operators of stationary sources will be correlated with applicable emission limitations and other control measures that are part of the applicable plan and will be available at the appropriate regional office and at other locations in the state designated by the Regional Administrator.

[39 FR 34536, Sept. 26, 1974, as amended at 40 FR 55329, Nov. 28, 1975; 51 FR 40676, Nov. 7, 1986]

§ 52.625 Legal authority.

(a) The requirements of § 51.230(f) of this chapter are not met, since sections 322-64(5) and 322-66 of the Hawaii Revised Statutes could, in some circumstances, prohibit the disclosure of emission data to the public. Therefore, sections 322-64(5) and 322-66 are disapproved.

[39 FR 34536, Sept. 26, 1974, as amended at 51 FR 40676, Nov. 7, 1986]

§ 52.626 Compliance schedules.

(a) [Reserved]

(b) The compliance schedules for the sources identified below are disapproved as not meeting the requirements of Subpart N of this chapter. The regulations cited are air pollution control regulations of the State.

Source	Location	Regulation sections involved	Date of adoption
Nanakuli Paving & Rock Co., Ltd.	Molokai	8, 13	7/27/73.
Kohala Corp	Halaula	8, 12	Do.

[39 FR 16348, May 8, 1974, as amended at 51 FR 40676, Nov. 7, 1986; 54 FR 25258, June 14, 1989]

§§ 52.627-52.631 [Reserved]

§ 52.632 Significant deterioration of air quality.

(a) The requirements of sections 160 through 165 of the Clean Air Act are not met, since the plan does not include approvable procedures for preventing the significant deterioration of air quality.

(b) Regulations for preventing significant deterioration of air quality.

The provisions of § 52.21 except paragraph (a)(1) are hereby incorporated and made a part of the applicable State plan for the State of Hawaii.

[43 FR 26410, June 19, 1978, as amended at 45 FR 52741, Aug. 7, 1980; 68 FR 11322, Mar. 10, 2003; 68 FR 74488, Dec. 24, 2003]

§ 52.633 Visibility protection.

(a) The requirements of section 169A of the Clean Air Act are not met, because the plan does not include approvable procedures for protection of visibility in mandatory Class I Federal areas.

(b) Regulations for visibility monitoring and new source review. The provisions of §§ 52.27 and 52.28 are hereby incorporated and made part of the applicable plan for the State of Hawaii.

(c) [Reserved]

(d) *Regional Haze Plan Provisions—(1) Applicability—* This paragraph (d) applies to following electric generating units (EGUs) and boilers: Kanoelehua Hill Generating Station, Hill 5 and Hill 6; Puna Power Plant, Boiler 1; Shipman Power Plant, Boiler S-3 and Boiler S-4.

(2) *Definitions.* Terms not defined below shall have the meaning given to them in the Clean Air Act or EPA's regulations implementing the Clean Air Act. For purposes of this paragraph (d):

Owner/operator means any person who owns, leases, operates, controls, or supervises an EGU or boiler identified in paragraph (d)(1) of this section.

SO₂ means sulfur dioxide.

Unit means any of the EGUs or boilers identified in paragraph (d)(1) of this section.

(3) *Emissions cap.* The EGUs identified in paragraph (d)(1) of this section shall not emit or cause to be emitted SO₂ in excess of a total of 3,550 tons per year, calculated as the sum of total SO₂ emissions for all five units over a rolling 12-month period.

(4) *Compliance date.* Compliance with the emissions cap and other requirements of this section is required at all times on and after December 31, 2018.

(5) *Monitoring, recordkeeping and reporting requirements.*

(i) All records, including support information, required by paragraph (d)(5) of this section shall be maintained for

at least five (5) years from the date of the measurement, test or report. These records shall be in a permanent form suitable for inspection and made available to EPA, the Hawaii Department of Health or their representatives upon request.

(ii) The owners and operators of the EGUs identified in paragraph (d)(1) of this section shall maintain records of fuel deliveries identifying the delivery dates and the type and amount of fuel received. The fuel to be fired in the boilers shall be sampled and tested in accordance with the most current American Society for Testing and Materials (ASTM) methods.

(iii) The owners and operators of the EGUs identified in paragraph (d)(1) of this section shall analyze a representative sample of each batch of fuel received for its sulfur content and heat value following ASTM D4057. The samples shall be analyzed for the total sulfur content of the fuel using ASTM D129, or alternatively D1266, D1552, D2622, D4294, or D5453.

(iv) The owners and operators of the EGUs identified in paragraph (d)(1) of this section shall calculate on a monthly basis the SO₂ emissions for each unit for the preceding month based on the sulfur content, heat value and total gallons of fuel burned.

(v) The owners and operators of the EGUs identified in paragraph (d)(1) of this section shall calculate on a monthly basis the total emissions for all units for the preceding twelve (12) months.

(vi) The owners and operators of the EGUs identified in paragraph (d)(1) of this section shall notify the Hawaii Department of Health and EPA Region 9 of any exceedance of the emission cap in paragraph (d)(3) of this section within thirty (30) days of such exceedance.

(vii) By March 1, 2019 and within sixty (60) days following the end of each calendar year thereafter, the owners and operators of the EGUs identified in paragraph (d)(1) of this section shall report to the Hawaii Department of Health and EPA Region 9 the total tons of SO₂ emitted from all units for the preceding calendar year by month and the corresponding rolling 12-month total emissions for all units.

(viii) Any document (including reports) required to be submitted by this rule shall be certified as being true, accurate, and complete by a responsible official and shall be mailed to the following addresses: Clean Air Branch, Environmental Management Division, State of Hawaii Department of Health, P.O. Box 3378, Honolulu, HI 96801-3378 and Director of Enforcement Division, U.S. EPA Region IX, 75 Hawthorne Street, San Francisco, CA 94105.

(e) *Approval.* On October 20, 2017, the Hawaii Department of Health submitted the “Hawaii State Department of Health 5-Year Regional Haze Progress Report for Federal Implementation Plan” (“Progress Report”). The Progress Report meets the requirements of the Regional Haze Rule in 40 CFR 51.308.

[50 FR 28553, July 12, 1985, as amended at 52 FR 45137, Nov. 24, 1987; 77 FR 61506, Oct. 9, 2012; 82 FR 3129, Jan. 10, 2017; 84 FR 39756, Aug. 12, 2019]

§ 52.634 Particulate matter (PM-10) Group III SIP.

(a) On September 14, 1988, the Governor of Hawaii submitted a revision to the State Implementation Plan (SIP) for implementing the required monitoring activities and other tasks necessary to satisfy the requirements of the PM-10 Group III SIP.

(b) The Hawaii Department of Health has committed to meet the ongoing requirements for PM-10 Group III areas.

[55 FR 18110, May 1, 1990]

Subpart N—Idaho

§ 52.670 Identification of plan.

(a) *Purpose and scope.* This section sets forth the applicable State implementation plan for Idaho under section 110 of the Clean Air Act, 42 U.S.C. 7401, and 40 CFR part 51 to meet national ambient air quality standards.

(b) *Incorporation by reference.* (1) Material listed in paragraphs (c) and (d) of this section with an EPA approval date prior to January 6, 2025, was approved for incorporation by reference by the Director of the FEDERAL REGISTER in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Material is incorporated as it exists on the date of the approval

Environmental Protection Agency

§ 52.670

and notification of any change in the material will be published in the FEDERAL REGISTER. Entries in paragraphs (c) and (d) of this section with EPA approval dates after January 6, 2025, will be incorporated by reference in the next update to the SIP compilation.

(2) EPA Region 10 certifies that the rules/regulations provided by the EPA in the SIP compilation at the addresses in paragraph (b)(3) of this section are an exact duplicate of the officially promulgated State rules/regulations which have been approved as part of the State Implementation Plan as of the dates

referenced in paragraph (b)(1) of this section.

(3) Copies of the materials incorporated by reference may be inspected at the Region 10 EPA Office at 1200 Sixth Avenue, Suite 155, Seattle, WA 98101. To obtain the material, please call (206) 553-6357. You may inspect the material with an EPA approval date prior to January 6, 2025, for Idaho at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA email fedreg.legal@nara.gov or go to <https://www.archives.gov/federal-register/cfr/ibr-locations>.

(c) *EPA approved laws and regulations.*

TABLE 4 TO PARAGRAPH (d)—STATE SOURCE-SPECIFIC REQUIREMENTS ¹—Continued

Name of source	Permit No.	State effective date	EPA approval date	Explanation
Monsanto, Soda Springs, ID.	13-0420-0001-00.	7/18/1979 (date issued)	7/28/1982, 47 FR 32530	Soda Springs TSP Nonattainment Area Plan.
Kerr McGee, Soda Springs, ID.	13-0420-0002-00.	7/18/1979 (date issued)	7/28/1982, 47 FR 32530	Soda Springs TSP Nonattainment Area Plan.
J.R. Simplot, Pocatello, Idaho.	Air Pollution Operating Permit No. T1-9507-114-1; Facility Number No. 077-00006.	4/5/2004	7/13/2006, 71 FR 39574	The following conditions: Cover page, facility identification information only, #300 Sulfuric Acid Plant, Permit Conditions 16.1, 16.10, 16.11, #400 Sulfuric Acid Plant, Permit Condition 17.1, 17.7, 17.10, 17.11, Phosphoric acid plant, Permit Condition 12.3, 12.13, Granulation No. 3 Process, Permit Condition 9.2.1, Granulation No. 3 stack, 9.17 (except 9.17.1 through 9.17.6), Reclaim Cooling Towers, Permit Condition 14.2, 14.6.1, Babcock & Wilcox Boiler, Permit Condition 6.4, 6.12, HPBW Boiler, Permit Condition 5.3, 5.13 through 5.18, 5.21.
J.R. Simplot, Pocatello, Idaho.	Compliance Agreement & Voluntary Order Idaho Code 39-116A.	4/16/2004	7/13/2006, 71 FR 39574	The following conditions: No. 300 Sulfuric Acid Plant; Condition 8 and 9. No. 400 Sulfuric Acid Plant; Condition 10, 11, and 12. Granulation No. 1 Plant; Condition 14. Granulation No. 2 Plant; Condition 15. Compliance and Performance Testing; Condition 16.
The Amalgamated Sugar Company LLC—Nampa Factory, Nampa, Idaho.	T2-2009.0105	12/23/2011 (date issued)	4/28/2014, 79 FR 23273	The following conditions: 1.2, including the table of Regulated Emission Point Sources Table, 3.2, 3.3 (first paragraph only), 3.4, 3.5, 3.6, 3.7, 3.8, 3.9, 3.11, 3.13, 3.14, 3.15, 3.16, and 4.1.
P4 Production, L.L.C., Soda Springs, Idaho.	T2-2009.0109	11/17/2009 (date issued)	6/22/2011, 76 FR 36329	The following conditions: 1.2 (including Table 1.1), 2.3, 2.4, 2.5, 2.6, 2.7, and 2.8. (Regional Haze SIP Revision).

¹ EPA does not have the authority to remove these source-specific requirements in the absence of a demonstration that their removal would not interfere with attainment or maintenance of the NAAQS, violate any prevention of significant deterioration increment or result in visibility impairment. Idaho Department of Environmental Quality may request removal by submitting such a demonstration to EPA as a SIP revision.

² Only a small portion of this facility is located on State lands. The vast majority of the facility is located in Indian Country. It is EPA's position that unless EPA has explicitly approved a program as applying in Indian country, State or local regulations or permits are not effective within the boundaries of that Indian country land for purposes of complying with the CAA. See 68 FR 2217, 2220 (January 16, 2003).

(e) *EPA approved nonregulatory provisions and quasi-regulatory measures.*

TABLE 5 TO PARAGRAPH (e)—STATE PROVISIONS APPROVED BUT NOT INCORPORATED BY REFERENCE

Name of SIP provision	Applicable geographic or nonattainment area	State submittal date	EPA approval date	Explanations
Appendix A.2—Idaho Environmental Protection and Health Act, Idaho Code Section 39–101 <i>et seq.</i>	State-wide ...	3/15/2001	1/16/2003, 68 FR 2217	
Four sections of Appendix A.3—Rules and Regulations for Control of Air Pollution in Idaho—that were approved but not incorporated by reference in section (c).	State-wide ...	5/17/1994	1/16/2003, 68 FR 2217	IDAPA 58.01.01.000 (legal authority), 58.01.01.002 (written interpretations), 58.01.01.003 (administrative appeals), and 58.01.01.128 (confidential business information).
Idaho State Board SIP Revision; Idaho Code §§ 59–701 through 705; Ethics in Government Act.	State-wide ...	9/16/2013	10/24/2013, 78 FR 63394	To satisfy the requirements of CAA section 128(a)(2) and CAA section 110(a)(2)(E)(ii) for all criteria pollutants.
Idaho Department of Environmental Quality letter dated October 18, 2013 supplementing the May 9, 2013 SIP Submittal.	State-wide ...	10/24/2013	3/3/2014, 79 FR 11711	
Road Sanding Agreement, Idaho Transportation Department to Idaho Department of Environmental Quality (Voluntary Measure).	Franklin County, Logan UT—ID PM _{2.5} Nonattainment Area.	12/19/2012	3/25/2014, 79 FR 16201	Fine Particulate Matter Control Measures; Franklin County.
Letter of Intent PM 2.5 Reduction, Franklin County Road Department to Department of Environmental Quality (Voluntary Measure).	Franklin County, Logan UT—ID PM _{2.5} Nonattainment Area.	12/19/2012	3/25/2014, 79 FR 16201	Fine Particulate Matter Control Measures; Franklin County.

Interstate Transport Requirements for the 2010 Sulfur Dioxide NAAQS.	State-wide ...	12/24/2015	4/9/2021, 86 FR 18457	This action addresses CAA 110(a)(2)(D)(i)(I).
Regional Haze SIP Revision.	State-wide ...	10/25/2010	6/22/2011, 76 FR 36329	The portion of the Regional Haze SIP revision relating to BART, the calculation of baseline and natural conditions, and the statewide inventory of emissions of pollutants that are reasonably anticipated to cause or contribute to visibility impairment in any mandatory Class I Federal Area.
Regional Haze SIP Revision.	State-wide ...	10/25/2010	11/8/2012, 77 FR 66929	The portion of the Regional Haze SIP relating to the reasonable progress goals, long term strategy, monitoring strategy, consultation with states and Federal Land Managers, periodic SIP revisions, and 5-year progress reports.
Regional Haze SIP Revision.	State-wide ...	6/29/2012	4/28/2014, 79 FR 23273	The portion of the Regional Haze SIP relating to BART for the TESCO, Nampa facility.
Regional Haze 5-Year Progress Report.	State-wide ...	6/28/2016	7/15/2019, 84 FR 33697	

[70 F.R. 3481, Jan. 25, 2005]

§ 52.671

40 CFR Ch. I (7–1–25 Edition)

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.670, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

§ 52.671 Classification of regions.

The Idaho plan was evaluated on the basis of the following classifications:

Air quality control region	Pollutants				
	Particulate matter	Sulfur oxides	Nitrogen dioxide	Carbon monoxide	Ozone
Eastern Idaho Intrastate	I	II	III	III	III.
Eastern Washington Northern Idaho Interstate (Idaho)	I	II	III	III	III.
Idaho Intrastate	I	III	III	III	III.
Metropolitan Boise Intrastate	II	III	III	I	III.

[37 FR 10861, May 31, 1972, as amended at 45 FR 70261, Oct. 23, 1980; 47 FR 32534, July 28, 1982]

§ 52.672 Approval of plans.

(a) *Carbon Monoxide.* (1) EPA approves as a revision to the Idaho State Implementation Plan, the Limited Maintenance Plan for the Northern Ada County Carbon Monoxide Not-Classified Nonattainment Area, submitted by the State on January 17, 2002.

(2) EPA approves as a revision to the Idaho State Implementation Plan, the Northern Ada County Air Quality Maintenance Area Second 10-year Carbon Monoxide Limited Maintenance Plan submitted by the State on February 10, 2011.

(b) *Lead.* [Reserved]

(c) *Nitrogen Dioxide.* [Reserved]

(d) *Ozone.* [Reserved]

(e) *Particulate Matter.* (1) EPA approves as a revision to the Idaho State Implementation Plan, the Northern Ada County PM₁₀ SIP Maintenance Plan, adopted by the State on September 26, 2002.

(2) EPA approves as a revision to the Idaho State Implementation Plan, the Northern Ada County PM₁₀ Second Ten-Year Maintenance Plan adopted by the State on March 11, 2013.

(3) EPA approves as a revision to the Idaho State Implementation Plan, the Pinehurst PM₁₀ Contingency Measures, adopted by the State on July 13, 1995.

(f) *Sulfur Dioxide.* [Reserved]

(g) *Visibility protection.* (1) EPA approves portions of a Regional Haze SIP revision submitted by the Idaho Department of Environmental Quality on October 25, 2010, as meeting the requirements of Clean Air Act section

169A and 40 CFR 51.308(e) regarding Best Available Retrofit Technology. The SIP revision also meets the requirements of 40 CFR 51.308(d)(2) and (4)(v) regarding the calculation of baseline and natural conditions for Craters of the Moon National Monument, Sawtooth Wilderness Area, and Selway-Bitterroot Wilderness Area and the statewide inventory of emissions of pollutants that are reasonably anticipated to cause or contribute to visibility impairment in any mandatory Class I Federal Area. The SIP revision also meets the requirements of Clean Air Act section 110(a)(2)(D)(i)(II) as it applies to visibility for the 1997 8-hour ozone NAAQS and 1997 PM_{2.5} NAAQS.

(2) EPA approves the remaining portions of the Regional Haze SIP revision submitted by the Idaho Department of Environmental Quality on October 25, 2010, as meeting the requirements of the Clean Air Act section 169A and 169B and 40 CFR 51.308.

(3) The EPA is vacating its approval of Idaho's NO_x and SO_x BART determination for the Riley boiler at The Amalgamated Sugar Company, LLC Nampa facility, published June 22, 2011.

(4) The EPA approves a Regional Haze SIP revision submitted by the Idaho Department of Environmental Quality on June 29, 2012, as meeting the requirements of Clean Air Act section 169A and 40 CFR 51.308(e) regarding Best Available Retrofit Technology for The Amalgamated Sugar Company LLC, facility located in Nampa, Idaho. The EPA is approving a revised NO_x BART determination and revised emission limit for NO_x, a revised emission

Environmental Protection Agency

§ 52.675

limit for PM, and a SO₂ BART Alternative for The Amalgamated Sugar Company, LLC, Nampa facility.

[67 FR 65718, Oct. 28, 2002, as amended at 68 FR 61110, Oct. 27, 2003; 76 FR 36339, June 22, 2011; 77 FR 45965, Aug. 2, 2012; 77 FR 66934, Nov. 8, 2012; 79 FR 23278, Apr. 28, 2014; 79 FR 41649, July 17, 2014; 79 FR 59438, Oct. 2, 2014]

§ 52.673 Approval status.

With the exceptions set forth in this subpart, the Administrator approves Idaho's plan for the attainment and maintenance of the national standards.

§ 52.674 [Reserved]

§ 52.675 Control strategy: Sulfur oxides—Eastern Idaho Intrastate Air Quality Control Region.

(a)(1) Regulation R of the Rules and Regulations for the Control of Air Pollution in Idaho, which is part of the sulfur dioxide (SO₂) control strategy, is disapproved since it is inconsistent with the purposes and provisions of subpart G of this chapter. These requirements are not met by Regulation R in that the SO₂ control strategy contained therein is not adequate for the attainment and maintenance of SO₂ national ambient air quality standards (NAAQS).

(2) Rules 1-1801 through 1-1804 (Rules for Control of Sulfur Oxide Emissions from Sulfuric Acid Plants) of the "Rules and Regulations for the Control of Air Pollution in Idaho" are inadequate to ensure attainment and maintenance of Sulfur Dioxide National Ambient Air Quality Standards in the Eastern Idaho Intrastate Air Quality Control Region. Special limits have previously been established for certain existing acid plants in this Air Quality Control Region (§§ 52.670(c)(15) and 52.675(b)). Therefore, Rules 1-1801 through 1-1804 are approved except as they apply to existing acid plants with approved or promulgated emission limits that are more stringent than the limit found in 1-1802.

(b) Regulation for control of sulfur dioxide (SO₂) emissions: Sulfuric Acid Plants. (1) The provisions of this paragraph shall apply to the owner(s) and operator(s) of The J. R. Simplot Company's Minerals and Chemical Division, located in Power County, Idaho, in the

Eastern Idaho Intrastate Air Quality Control Region.

(2) The owner(s) and operator(s) of The J. R. Simplot Company facility shall utilize best engineering techniques in the operation of their plant to prevent fugitive SO losses. Such techniques shall include but are not limited to:

(i) Operating and maintaining all conducts, flues, and stacks in a leakfree condition.

(ii) Operating and maintaining all process equipment and gas collection systems in such a fashion that leakage of SO₂ gases will be prevented to the maximum extent possible.

(3) The owner(s) and operator(s) of The J. R. Simplot Company facility shall limit SO₂ emissions from their sulfuric acid plants per the following:

(i) The combined SO₂ emissions from the designated 100 and 200 sulfuric acid plants shall not exceed 2 kilograms (kg) per metric ton (4 pounds per ton) of 100 percent sulfuric acid produced.

(ii) The SO₂ emissions from the designated 300 sulfuric acid plant and stack shall not exceed 994 kg per hour (2190 pounds per hour).

(4) (i) The owner(s) and operator(s) of The J. R. Simplot Company shall achieve compliance with the requirements specified in paragraphs (b)(2) and (b)(3) of this section in accordance with the following schedule:

(A) Advise EPA as to status of contract(s) and construction schedules for pollution abatement projects within 30 days of the effective date of this regulation.

(B) Attain final compliance by July 31, 1976.

(ii) A performance test of the 300 acid plant shall be necessary to determine whether compliance has been achieved with the requirements of paragraph (b)(3) of this section. Such test must be completed within 15 days of the final compliance date specified in paragraph (b)(4)(i) of this section. Notice must be given to the Administrator at least 10 days prior to such a test to afford him an opportunity to have an observer present.

(iii) Within 60 days after achieving the maximum production rate at which the 100 and 200 acid plant will be operated, but not later than 180 days after

initial start-up of these plants and at such other times as may be required by the Administrator under section 114 of the Clean Air Act, the owner(s) and operator(s) of the facility shall conduct performance test(s) in accordance with the requirements of 40 CFR 60.8.

(iv) If the owner(s) and operator(s) of the J. R. Simplot Company facility are presently in compliance with the requirements of paragraphs (b)(2) and (b)(3) of this section or in compliance with a portion of these requirements, such compliance shall be certified to the Administrator within 15 days following the date of the publication of these requirements as a final regulation in the FEDERAL REGISTER. If the owner(s) or operator(s) of The J. R. Simplot Company achieve compliance prior to July 31, 1976, such compliance shall be certified to the Administrator within 15 days of the date of achieving compliance. The Administrator may request whatever supporting information he considers necessary to determine the validity of the certification.

(5) (i) By no later than September 30, 1976, the owner(s) and operator(s) of The J. R. Simplot Company facility shall install, calibrate, maintain and operate measurement system(s) for:

(A) Continuously monitoring and recording SO₂ concentration rates in each sulfuric acid plant discharge stack per the requirements of 40 CFR 60.13 and 60.84.

(B) Continuously monitoring and recording gas volumetric flow rates in the exhaust stack of the designated 300 sulfuric acid plant.

(ii) By no later than October 30, 1976, and at such other times following that date as the Administrator may specify, the SO₂ concentration measurement system(s) and stack gas volumetric flow rate system(s) installed and used pursuant to this paragraph shall be demonstrated to meet the measurement system performance specifications prescribed in 40 CFR 60.13 and Appendix E to this part, respectively. The Administrator shall be notified at least 10 days prior to the start of this field test period to afford the Administrator the opportunity to have an observer present.

(iii) The sampling point for monitoring the concentration of SO₂ emis-

sions shall be in the duct at the centroid of the cross section of the discharge stack if the cross sectional area is less than 4.65 m² (50 ft²) or at a point no closer to the wall than 0.91 m (3 ft) if the cross sectional area is 4.65 m² (50 ft²) or more. The monitor sample point shall be representative of the average concentration in the duct.

(iv) The measurement system(s) shall be maintained, operated and calibrated in accordance with the methods prescribed by the manufacturers. Records of maintenance and/or calibration shall be kept and submitted to the Administrator upon request. These records shall clearly show instrument readings before and after such calibration and/or maintenance.

(v) The owner(s) and operator(s) of The J. R. Simplot Company facility shall maintain a daily record of three hour average emission rate measurements for each sulfuric acid plant. Three hour average emission rates shall be calculated for each day beginning at midnight. For the 100 and 200 acid plants, the calculations shall be in conformance with 40 CFR 60.84. For the 300 acid plant, average SO₂ emission rates expressed in kg SO₂ per hour shall be calculated. The results of these calculations for each month shall be submitted to the Administrator within 15 days following the end of each month. Such submission shall identify each period of excess emissions that occurred and the nature and cause of any malfunction (if known), the corrective action taken or preventative measures adopted. The records of such measurements including strip charts and other appropriate raw data shall be retained for a minimum of two years following the date of such measurements.

(vi) The continuous monitoring and recordkeeping requirements of paragraph (b)(5) of this section shall become applicable September 30, 1976.

(6)(i) Compliance with the requirements set forth in paragraph (b)(3) of this section shall be determined using the emission rates measured by the continuous measurement system(s) installed, calibrated, maintained and operated in accordance with the requirements of paragraph (b)(5) of this section.

(ii) At the Administrator's discretion, compliance may also be determined using the manual source test methods per 40 CFR 60.85 and Appendix A to part 60 of this title. Emission rates for each stack shall be expressed in units consistent with those in paragraph (b)(3) of this section.

(iii) A violation of the requirements of paragraph (b)(3) of this section shall occur whenever the SO₂ emission rates determined according to paragraph (b)(6)(i) or (b)(6)(ii) of this section exceed the corresponding SO₂ emission rates specified in paragraph (b)(3) of this section.

(7) The owner(s) and operator(s) of The J. R. Simplot Company facility shall by September 30, 1976, install, calibrate, maintain and operate a network for continuously monitoring ground level ambient SO₂ concentrations and wind speed and direction.

(i) The monitoring network shall consist of at least four ambient SO₂ monitoring stations and one meteorological station placed at locations approved by the Administrator.

(ii) The SO₂ monitoring network shall be consistent with automated equivalent methods for measurement of ambient concentrations of SO₂ as defined in part 53 of this chapter.

(iii) The monitoring network installed and used pursuant to this subparagraph shall be maintained, operated and calibrated in accordance with the methods prescribed by the manufacturers. Records of maintenance and/or calibration shall be kept and submitted to the Administrator upon request. These records shall clearly show instrument readings before and after such calibration and/or maintenance.

(iv) The owner(s) and operator(s) of The J. R. Simplot Company facility shall maintain a daily record of all measurements required by this subparagraph. Strip charts and other raw data from the monitoring network shall be retained for a minimum of two years following the date of such measurement.

(v) The owner(s) and operator(s) of The J. R. Simplot Company shall calculate hourly average ambient SO₂ concentrations, wind speed, and wind direction from each monitoring station and submit such values to the Adminis-

trator within 15 days following the end of each month.

(vi) The continuous monitoring and recordkeeping requirements of paragraph (b)(7) of this section shall become applicable September 30, 1976 and shall remain applicable until such time as the Administrator declares that an adequate ambient air data base has been established, which shall be no earlier than at least one calendar year.

(vii) Within 90 days of the Administrator's declaration of an adequate data base, Simplot shall submit to the Administrator a technical analysis of the degree of permanent control required on the 300 acid plant to ensure attainment and maintenance of NAAQS.

(8) Nothing in paragraph (b) of this section shall be construed to relieve the owner(s) and operator(s) of The J. R. Simplot Company to comply with any applicable requirements of part 60 of this title. In the event of conflicting requirements or interpretations between part 60 of this title and this paragraph, the more restrictive interpretation or requirement shall apply.

(9) In the event that measurement systems cannot be installed and operational by the date specified in this section, The J. R. Simplot Company shall propose the earliest possible date by which such requirements can be met. Such proposal shall include adequate justification and supporting documentation.

[41 FR 23202, June 9, 1976, as amended at 47 FR 32534, July 28, 1982; 51 FR 40676, Nov. 7, 1986]

§ 52.676 [Reserved]

§ 52.677 Original identification of plan section.

(a) This section identifies the original "Idaho Air Quality Implementation Plan" and all revisions submitted by Idaho that were federally approved prior to November 12, 2004.

(b) The plan was officially submitted on January 31, 1972.

(c) The plan revisions listed below were submitted on the dates specified.

(1) Miscellaneous additions (compliance schedules and non-regulatory provisions) to the plan submitted on February 23, 1972, by the Idaho Air Pollution Control Commission.

(2) Request for delegation of legal authority submitted on March 2, 1972, by the Governor.

(3) Compliance schedules submitted on April 12, 1972, by the Governor.

(4) Request for an 18-month extension for particulate matter in all AQCR's submitted on May 5, 1972, by the Governor.

(5) Miscellaneous additions (Non-regulatory) to the plan submitted on May 26, 1972, by the Idaho Air Pollution Control Commission.

(6) Appendices D and E of the plan submitted on June 9, 1972, by the Governor.

(7) Revisions to the Rules and Regulations for the Control of Air Pollution in Idaho submitted on February 15, 1973, by the Governor.

(8) Compliance schedules submitted on July 23, 1973, by the Governor.

(9) Amendment to Chapter IX of the plan to provide for review of indirect sources and a new Chapter XIV which sets forth the control strategy for attaining secondary particulate matter standards on October 16, 1973, by the Governor.

(10) Revisions to 1972 Session Laws, Chapter 347; 1973 Session Laws, Chapter 87, 136, 137, 138, 139, and 143; Chapters 18 and 52, Idaho Code; and the accompanying Attorney General's opinion submitted August 15, 1973, by the Governor.

(11) A new section 4 of Regulation A (General Provisions) and revised Regulation T (Air Pollution Sources Permits) of the Rules and Regulations for the Control of Air Pollution in Idaho (Chapter VII of the plan), an addition to Chapter XI of the plan to include administrative procedures for indirect source review, and compliance schedules submitted on July 1, 1974, by the Governor.

(12) Air quality maintenance area designation submitted on June 11, 1974, by the Idaho Department of Environmental and Community Services.

(13) An amendment to Regulation C (Ambient Air Quality Standards) and Regulation S (Control of Sulfur Oxide

Emissions from Combined Lead/Zinc Smelters) of the Rules and Regulations for the Control of Air Pollution in Idaho and revisions to Chapter IV and Appendix F of the Implementation Plan submitted on January 10, 1975, by the Governor.

(14) Revised sections 2 and 6 of Regulation A (General Provisions) of the Rules and Regulations for the Control of Air Pollution in Idaho submitted on January 24, 1975, by the Governor.

(15) Consent Order for Beker Industries submitted on July 28, 1975 by the Governor.

(16) On January 15, 1980 the Governor submitted the transportation portion of the Boise-Ada County carbon monoxide plan.

(17) On July 1, 1980 the Governor submitted a SIP revision containing a variance from the indirect source regulation for an urban renewal project located in downtown Boise, as well as an adjustment to the TCP which had been submitted to EPA in January 1980.

(18) On February 14, 1980 the State of Idaho Department of Health and Welfare submitted a plan revision to meet the requirements of Air Quality Monitoring 40 CFR part 58, subpart C, § 58.20.

(19) Revisions to the "Implementation Plan for the Control of Air Pollution in the State of Idaho" submitted by the Governor of Idaho on January 15, 1980: Chapter I "Introduction;" Chapter II "General Administration;" Chapter III "Emissions Inventory;" Chapter IV "Air Quality Monitoring;" Chapter V "Source Surveillance;" Chapter VI "Emergency Episode Plan;" Chapter VII "Approval Procedures for New and Modified Sources;" Chapter VIII "Non-Attainment Area Plans;" Chapter VIII-a "Silver Valley Non-Attainment Plan;" Chapter VIII-e "Soda Springs Non-Attainment Plan;" Appendix A.2 Legal Authority (Section 39-100, *Idaho Code*); Appendix A.3, Title I, Chapter I, Rules and Regulations for the Control of Air Pollution in Idaho, except indirect source review provisions (1-1002.37, 1-1002.76 and 1-1004), variance provisions (1-1007 and 1-1004) and "Sulfur Dioxide Emission Limitations for Combined Zinc and Lead Smelters" (1-1851 through 1-1868); Appendix B "Emission Inventory, Ada

County Carbon Monoxide Non-Attainment Area;" Appendix G "Permits—Silver Valley" (six permits); and Appendix K "Permits—Soda Springs" (four permits).

(20) Chapter VIII-b "Lewiston Non-Attainment Plan" submitted by the Governor of Idaho on January 15, 1980. On December 4, 1980, the Governor submitted revised pages 31-39, an operating permit for a kraft pulp and paper mill (Appendix H.1), operating permits for two grain loading terminals (Appendices H.3 and H.4), and an operating permit for an asphalt plant (Appendix H.5). On February 5, 1981 the Governor further revised the nonattainment area plan by submitting a permit for a wood products operation (Appendix H.2).

(21) Chapter VIII-d "Pocatello TSP Non-Attainment Plan" submitted by the Governor of Idaho on March 7, 1980. This submittal included operating permits for an elemental phosphorus plant (Appendix J.1), a phosphate fertilizer manufacturing plant (Appendix J.2), and a Portland cement plant (Appendix J.3). On February 5, 1981, the Governor submitted a revised Chapter VIII-d.

(22) On February 3, 1984 the State of Idaho Department of Health and Welfare submitted a revision to add a lead maintenance strategy to the Idaho Implementation Plan.

(23) On May 29, 1984, the State of Idaho Department of Health and Welfare submitted the Boise-Ada County carbon monoxide attainment plan as an official State Implementation Plan revision. The submittal was then supplemented on January 3, 1985.

(24) A revised Chapter VII *Approval Procedures for New and Modified Facilities*; revised sections 1-1002, 1-1012, 1-1013, 1-1014, and 1-1101 of Appendix A. 3 "Title 1, Chapter 1, *Rules and Regulations for the Control of Air Pollution in Idaho Manual*;" and the repeal of sections 1-1003, 1-1102 through 1-1112, and 1-1900 through 1-1906 of Appendix A. 3 "Title 1, Chapter 1, *Rules and Regulations for the Control of Air Pollution in Idaho Manual*;" of the Implementation Plan for the Control of Air Pollution in the State of Idaho, submitted by the Director of the State of Idaho Department of Health and Welfare on April 19, 1985. (Sections 1-1003, 1-1102 through 1-1112, and 1-1900 through 1-1906 of Ap-

pendix A. 3 "Title 1, Chapter 1, *Rules and Regulations for the Control of Air Pollution in Idaho Manual*" were previously approved by EPA at 40 CFR 52.670(c)(19).) An April 3, 1986, commitment letter from the Director of the State of Idaho Department of Health and Welfare regarding stack height provisions.

(i) *Incorporation by reference.* (A) Revised sections 1-1002, 1-1012, 1-1013, 1-1014, and 1-1101 of Appendix A. 3, "Title 1, Chapter 1, *Rules and Regulations for the Control of Air Pollution in Idaho Manual*" of the Implementation Plan for the Control of Air Pollution in the State of Idaho, as adopted by the Idaho Board of Health and Welfare on November 1, 1984. An April 3, 1986, commitment letter from the Director of the State of Idaho Department of Health and Welfare regarding stack height provisions.

(ii) *Other materials.* (A) Revised Chapter VII *Approval Procedures for New and Modified Facilities* of the Implementation Plan for the Control of Air Pollution in the State of Idaho, submitted by the Director of the Idaho Department of Health and Welfare on April 19, 1985. (This revised chapter replaces an earlier version which was approved by EPA and incorporated by reference at 40 CFR 52.670(c)(19).)

(B) Sections 1-1003, 1-1102 through 1-1112, and 1-1900 through 1-1906 of Appendix A. 3 "Title 1, Chapter 1, *Rules and Regulations for the Control of Air Pollution in Idaho*," of the Implementation Plan for the Control of Air Pollution in the State of Idaho, repealed by the Idaho Board of Health and Welfare on November 1, 1984. (These sections, noted as repealed, replace the earlier versions which were approved by EPA and incorporated by reference at 40 CFR 52.670(c)(19).)

(25) On March 27, 1987, the State of Idaho Department of Health and Welfare submitted revised rules regulating the use of stack heights and dispersion techniques (section 16.01.1002.94 and section 16.01.1014) as revisions to the Idaho state implementation plan. Additional revisions included clarifications to section 16.01.1009 (Total Compliance), and section 16.01.1201.03 (Visible Emissions-Exception).

(i) *Incorporation by reference.* (A) March 27, 1987 letter from the State of Idaho Department of Health and Welfare to EPA, Region 10.

(B) Section 16.01.1002.94 (Stack), section 16.01.1014 (Stack Heights and Dispersion Techniques), section 16.01.1009 (Total Compliance) and section 16.01.1201.03 (Visible Emissions-Exception) adopted by the State of Idaho Department of Health and Welfare on February 11, 1987.

(26) On June 15, 1990, the Administrator of the Idaho Department of Health and Welfare submitted amendments to State of Idaho's Rules and Regulations for the Control of Air Pollution in Idaho Manual as revisions to the Idaho state implementation plan as follows: Idaho Administrative Procedures Act, Section 16.01.01002 Definitions, Section 16.01.01012 Procedures and Requirements for Permits to Construct and Operating Permits, and Section 16.01.01101 Air Quality Standards and Area Classification.

(27) On September 4, 1992, the Administrator of the Idaho Department of Health and Welfare submitted a revised and recodified Rules and Regulations for the Control of Air Pollution in Idaho Manual (Idaho Administrative Procedures Act Sections 16.01.01000 through 16.01.01999) as a revision to the Idaho state implementation plan.

(i) *Incorporation by reference.* (A) June 15, 1990, letter from the Administrator of the Idaho Department of Health and Welfare to EPA Region 10 submitting amendments to the Idaho state implementation plan.

(B) September 4, 1992, letter from the Administrator of the Idaho Department of Health and Welfare to EPA Region 10 submitting amendments to the Idaho state implementation plan.

(C) Idaho's Rules and Regulations for the Control of Air Pollution in Idaho Manual (except for sections IDAPA 16.01.01007 Variances, IDAPA 16.01.01853 through 16.01.01856 Combined Zinc and Lead Smelters, IDAPA 16.01.0951 through 16.01.01968 Regulation of Standards of Performance for New Stationary Sources, and IDAPA 16.01.01997 Confidentiality of Records) as adopted by the Board of the Idaho Department of Health and Welfare on July 30, 1992, and effective on August 21, 1992.

(28) On April 14, 1992, the State of Idaho submitted a revision to the SIP for Pinehurst, ID, for the purpose of bringing about the attainment of the national ambient air quality standards for particulate matter with an aerodynamic diameter less than or equal to a nominal 10 micrometers. This submittal includes an additional area in Shoshone County adjacent to the City of Pinehurst which EPA designated nonattainment and moderate for PM-10 on January 20, 1994.

(i) *Incorporation by reference.* (A) April 7, 1992 letter from Idaho Department of Health and Welfare to EPA Region 10 submitting the Pinehurst Particulate Air Quality Improvement Plan as a revision to the Implementation Plan for the Control of Air Pollution in the State of Idaho. The plan has been adopted in accordance with the authorities and requirements of the Federal Clean Air Act and the Idaho Environmental Protection and Health Act (Idaho Code section 39–10/et seq).

(B) SIP revision for Pinehurst Particulate Air Quality Improvement Plan, February 5, 1992 (adopted on April 7, 1992).

(29) On June 29, 1994, the Idaho Department of Health and Welfare submitted a CO State Implementation Plan for Northern Ada County, Idaho.

(i) *Incorporation by reference.* (A) June 29, 1994 letter from Idaho Department of Health and Welfare to EPA Region 10 submitting the CO SIP for Northern Ada County, Idaho.

(B) Minor Revision of the Northern Ada County, Idaho 1984 State Implementation Plan for CO, June 1994 (including Ada County Ordinance 228, City of Boise Ordinance 5273, City of Meridian Ordinance 547, City of Garden City Ordinance 558, and City of Eagle Ordinance 177), as adopted by the Idaho Department of Health and Welfare on June 28, 1994.

(30) On January 7, 1994, the Administrator for the Idaho Department of Health and Welfare, Division of Environmental Quality, submitted the State PROGRAM as a revision to the Idaho SIP.

(i) *Incorporation by reference.* (A) The January 3, 1994 letter from the Administrator of the Idaho Department of

Environmental Protection Agency

§ 52.677

Health and Welfare, Division of Environmental Quality, submitting the PROGRAM to EPA.

(B) The State Implementation Plan Revision to Establish a State Small Business Stationary Source Technical and Environmental Compliance Assistance Program (which includes the text of Idaho Code 39-118E, Small Business Assistance, signed into law Senate bill 1236 by Idaho Governor, Cecil D. Andrus, on March 29, 1993), dated December 29, 1993, and adopted on January 3, 1994.

(31) On November 14, 1991, and on December 30, 1994, the Idaho Department of Health and Welfare (IDHW) submitted revisions to the Idaho State Implementation Plan (SIP) for the Northern Ada County/Boise Particulate (PM₁₀) Air Quality Improvement Plan.

(i) *Incorporation by reference.* (A) November 14, 1991, letter from the IDHW Administrator to the EPA Region 10 Regional Administrator submitting a revision to the Idaho SIP for the Northern Ada County/Boise Particulate Air Quality Improvement Plan; The Northern Ada County Boise Particulate (PM₁₀) Air Quality Improvement Plan adopted on November 14, 1991.

(B) December 30, 1994, letter from the IDHW Administrator to the EPA Region 10 Regional Administrator including a revision to the Idaho SIP for the Northern Ada County/Boise PM₁₀ Air Quality Improvement Plan; Appendix C-1, Supplemental Control Strategy Documentation, Northern Ada County/Boise PM₁₀ Air Quality Improvement Plan, adopted December 30, 1994, with the following attachments: Garden City Ordinances #514 (May 14, 1987), #533 (January 10, 1989) and #624 (September 13, 1994); Meridian Ordinance #667 (August 16, 1994); Eagle Ordinance #245 (April 26, 1994); Ada County Ordinance #254 (November 3, 1992); and Table Ordinance-1 (December 30, 1994).

(32) On December 6, 2000, the Idaho Department of Environmental Quality submitted amendments to State of Idaho's Rules and Regulations for the Control of Air Pollution in Idaho as revisions to the Idaho state implementation plan as follows: sections 58.01.01.563 through 58.01.01.574.

(i) *Incorporation by reference.* (A) Section 58.01.01.563 Transportation Con-

formity, Section 58.01.01.564 Incorporation by Reference, Section 58.01.01.565 Abbreviations, Section 58.01.01.566 Definitions for the Purpose of Sections 563 Through 574 and 582, Section 58.01.01.567 Agencies Affected by Consultation, Section 58.01.01.568 ICC Member Roles in Consultation, Section 58.01.01.569 ICC Member Responsibilities in Consultation, Section 58.01.01.570 General Consultation Process, Section 58.01.01.571 Consultation Procedures, Section 58.01.01.572 Final Conformity Determinations by USDOT, Section 58.01.01.573 Resolving Conflicts, Section 58.01.01.574 Public Consultation Procedures.

(33) On February 9, 2001, the Idaho Department of Environmental Quality submitted amendments to State of Idaho's Rules and Regulations for the Control of Air Pollution in Idaho as revisions to the Idaho state implementation plan as follows:

Section 58.01.01.582

(i) *Incorporation by reference.* (A) Section 58.01.01.582 Interim Conformity Provisions for Northern Ada County Former Nonattainment Area for PM-10.

(34) On February 9, 2001, the Idaho Department of Environmental Quality submitted amendments to State of Idaho's Rules and Regulations for the Control of Air Pollution in Idaho as revisions to the Idaho state implementation plan as follows: Section 58.01.01.204.

(i) *Incorporation by reference.* (A) IDAPA 58.01.01.204 Permit Requirements for New Major Facilities or Major Modifications in Nonattainment Areas and in the Former PM-10 Northern Ada County Nonattainment Area (as Defined in Section 582), state adopted January 26, 2001.

(35) On August 16, 1996, the State of Idaho adopted and submitted a revision to the SIP for Sandpoint, Idaho, for the purpose of bringing about the attainment of the national ambient air quality standards for particulate matter with an aerodynamic diameter less than or equal to a nominal 10 micrometers.

(i) *Incorporation by reference.* (A) Ordinance No. 939, Material Specifications for Street Sanding Material, as adopted

by the City of Sandpoint on February 22, 1994.

(B) Ordinance No. 965, Solid Fuel Heating Appliance Ordinance, as adopted by the City of Sandpoint on February 21, 1995.

(C) The following terms and conditions limiting particulate matter emissions in the following permits:

(1) State of Idaho Air Pollution Operating Permit for Lake Pre-Mix concrete, Permit No. 777-00182, issued May 17, 1996, the following conditions for the cement silo vent: 1.1, 2.1.1, 2.1.2, 3.1.1, and 3.1.2.

(2) State of Idaho Air Pollution Operating Permit for Interstate Concrete & Asphalt, Permit No. 017-00048, issued August 2, 1999, the following conditions: for the asphalt plant, 2.2, 3.1.1, 4.1, 4.1.1, 4.1.2, 4.2.1 (as it applies to the hourly PM₁₀ emission limit in Appendix A), 4.2.2, 4.2.2.1, 4.2.2.2, and 4.2.2.3; for the concrete batch plant, 2.1, 3.1.1, 4.1, 4.1.1, and 4.1.2; Appendix A (as it applies to PM₁₀ emission rates after 7/1/96) and Appendix B (as it applies after 7/1/96).

(3) State of Idaho Department of Environmental Quality Air Quality Tier II Operating Permit for Louisiana-Pacific Corporation, Permit No. 017-00003, issued October 31, 2001, the following conditions: for the Kipper and Sons Hog Fuel Boiler, 2.3 (as it applies to PM₁₀), 2.5, 2.7, 2.13, 2.14, 2.17, 2.19; Cleaver-Brooks Natural Gas-Fired Boilers, 3.2 (as it applies to PM₁₀); Pneumatic Conveyance System, 4.2, 4.4, 4.7; Drying Kilns, 5.2, 5.4, 5.5; Fugitive Emission Sources, 6.5, 6.7, 6.13; and the Appendix (as it applies to PM₁₀).

(ii) *Additional materials.* (A) Sandpoint PM₁₀ Air Quality Improvement Plan, adopted August 16, 1996.

(36) [Reserved]

(37) On May 17, 1994, May 11, 1995, November 21, 1996, February 28, 1997, December 18, 1997, April 9, 1998, May 5, 1999, December 5, 2000, and May 30, 2002, the Idaho Department of Environmental Quality submitted amendments to State of Idaho Rules for Control of Air Pollution in Idaho (IDAPA 58.01.01) as revisions to the Idaho State implementation plan.

(i) *Incorporation by reference.* (A) IDAPA 58.01.01 as in effect on March 30, 2001 except for the following provisions:

section 000; section 002; section 003; section 008; section 009; section 010; subsections 107.03; section 128; sections 140 through 149; section 161; subsection 203.03; section 209; section 210; section 214; subsection 222.03; section 223; sections 300 through 387; subsection 401.01.a. and 401.04; sections 440 and 441; sections 525 through 538; sections 552, 553, 556, 558, and 561; subsection 577.06; sections 585, 586, 587, 590 and 591; section 700; section 710; sections 750 and 751; sections 775 and 776; section 818; section 819; section 820; subsection 824.01; sections 835 through 839; and sections 855 through 862.

(B) IDAPA 58.01.01 sections 209 and 700 as in effect on April 5, 2000.

(C) IDAPA 58.01.01 sections 552, 553, 556, 558, and 561 as in effect on March 15, 2002.

(38) The Idaho Department of Environmental Quality (Idaho DEQ, the State, or Idaho) submitted a PM₁₀ maintenance plan and redesignation request for the Ada County/Boise, Idaho area on September 27, 2002, and provided supplemental information on July 10, 2003 and July 21, 2003.

(i) *Incorporation by reference.* (A) The following terms and conditions limiting particulate matter emissions in the following permits:

(1) State of Idaho Air Pollution Operating Permit for LP Wood Polymers, Inc. Permit No. 001-00115, issued July 12, 2002, the following conditions: 1.1, 1.3, 3.1, and the Appendix.

(2) State of Idaho Air Pollution Operating Permit for Consolidated Concrete Company, Permit No. 001-00046, issued December 03, 2001, the following conditions: 1.1, 1.3, 2.3, 3.1, 3.2, and the Appendix.

(3) State of Idaho Air Pollution Operating Permit for Crookham Company, Permit No. 027-00020, issued January 18, 2002, the following conditions: 1.1, 1.3, 2.1, 2.3, 3.1, 3.1.1, 3.1.2, 3.2, and the Appendix.

(4) State of Idaho Air Pollution Operating Permit for Double D Service Center, Permit No. 001-00168, issued February 4, 2002, the following conditions: 1.1, 1.3, 3.1, 3.2.1, 3.2.2, 3.2.3, and the Appendix.

(5) State of Idaho Air Pollution Operating Permit for Plum Creek Northwest Lumber, Inc., Permit No. 001-

00091, issued July 12, 2002, the following conditions: 1.1, 1.3, 2.1.2, 3.1, and the Appendix.

(6) State of Idaho Air Pollution Operating Permit for C. Wright Construction, Inc., Permit No. T2-000033, issued July 08, 2003, the following conditions: 2 (heading only), 2.5, (2.12, Table 2.2 as it applies to PM₁₀), 2.14, 3 (heading only), 3.3, Table 3.2, 3.4, 3.5, 3.6, 3.7, 3.8, 3.10, 4 (heading only), 4.2, 4.3, 4.4, 4.7, 5, and Table 5.1.

(7) State of Idaho Air Pollution Operating Permit for Nelson Construction Co., Permit No. T2-020029, issued July 21, 2003, the following conditions: 2 (heading only), 2.12, 2.14, 3 (heading only), 3.3, 3.4, 3.6, 3.7, 3.9, 3.10, 3.11, 3.12, 4 (heading only), 4.3, 4.4, 4.5, 4.6, 5, and Table 5.1.

(8) State of Idaho Air Pollution Operating Permit for Mike's Sand and Gravel, Permit No. 001-00184, issued July 12, 2002, the following conditions: 1.1, 1.3, 2.2.1, 3.1, and the Appendix.

(9) State of Idaho Air Pollution Operating Permit for Idaho Concrete Co., Permit No. T2-020031, issued July 8, 2003, the following conditions: 2 (heading only), 2.5, 2.13, 3 (heading only), 3.3, 3.4, 3.6, 3.7, 3.8, 4 (heading only), and Table 4.1.

(10) State of Idaho Air Pollution Operating Permit for Idaho Concrete Co., Permit No. T2-020032, issued July 8, 2003, the following conditions: 2 (heading only), 2.5, 2.13, 3 (heading only), 3.3, 3.4, 3.6, 3.7, 3.8, 4 (heading only), and Table 4.1.

(11) State of Idaho Air Pollution Operating Permit for Idaho Concrete Co., Permit No. T2-020033, issued July 8, 2003, the following conditions: 2 (heading only), 2.5, 2.13, 3 (heading only), 3.3, 3.4, 3.6, 3.7, 3.8, 4 (heading only), and Table 4.1.

(12) State of Idaho Air Pollution Operating Permit for The Amalgamated Sugar Company LLC, Permit No. 027-00010, issued September 30, 2002, the following conditions: 2 (heading only), (2.7, Table 2.2 as it applies to PM₁₀), 2.10, 2.10.1, 2.10.2, 2.11, 2.11.1, 2.11.2, 2.11.3, 2.11.4, 2.11.5, 2.12, 2.12.1, 2.12.2, 2.12.3, 2.13, 2.13.1, 2.13.2, 2.13.3, 2.14, 2.14.1, 2.14.2, 2.16, 3 (heading only), (3.3, Table 3.2 as it applies to PM₁₀), 3.5, 3.7, 3.8, 3.8.1, 3.8.2, 3.8.3, 3.8.4, 3.8.5, 3.8.6, 3.8.7, 3.8.8, 3.9, 4 (heading only), (4.3,

Table 4.1 as it applies to PM₁₀), 4.5, 4.6, 4.7, 5 (heading only), (5.3, Table 5.3 as it applies to PM₁₀), 5.5, 5.9, 5.9.1, 5.9.2, 5.9.3, 5.9.4, 5.9.5, 5.9.6, 5.9.7, 5.9.8, 5.9.9, 5.10, 5.11, 6 (heading only), 6.3, Table 6.1, 6.5, 6.6, 6.7, 6.7.1, 6.7.2, 6.8, 7 (heading only), (7.3, Table 7.1 as it applies to PM₁₀), 7.5, 7.7, 7.7.1, 7.7.2, 7.8, 8 (heading only), 8.3, Table 8.1, 8.5, 8.7, 8.7.1, 8.7.2, 8.8, 9 (heading only), 9.3, Table 9.1, 9.5, 9.7, 9.7.1, 9.7.2, 9.8, 10 (heading only), 10.3, Table 10.1, 10.6, 10.8, 10.8.1, 10.8.2, 10.9, 11 (heading only), 11.3, Table 11.2, 11.6, 11.8, 11.8.1, 11.8.2, 11.9, 12 (heading only), 12.3, Table 12.1, 12.5, 12.7, 12.7.1, 12.7.2, 12.8, 13 (heading only), 13.1 (except as it applies to conditions 13.3, 13.3.1, 13.3.2, 13.5, 13.5.1, 13.5.2, 13.5.3, 13.6, 13.6.1, 13.6.2 and 13.9), Table 13.1 (except conditions 13.3, 13.5 and 13.6), (13.2, Table 13.2 as it applies to PM₁₀), 13.2.1, 13.4, 13.4.1, 13.4.2, 13.4.3, 13.7, 13.7.1, 13.7.2, 13.8, 13.8.1, 13.8.2, 13.8.3, 13.10, and 13.11.

[37 FR 10861, May 31, 1972]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.677, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.gpo.gov.

§§ 52.678–52.680 [Reserved]

§ 52.681 Permits to construct and tier II operating permits.

(a) Except as otherwise provided in paragraph (b) of this section, emission limitations and other provisions contained in Permits to Construct and Tier II Operating Permits issued by the Idaho Department of Environmental Quality in accordance with the Federally-approved State of Idaho Rules for Control of Air Pollution in Idaho, incorporated by reference in section 52.670 (IDAPA 58.01.01.200 through 222, IDAPA 58.01.01.400 through 406), shall be applicable requirements of the Federally-approved Idaho SIP (in addition to any other provisions) for the purposes of section 113 of the Clean Air Act and shall be enforceable by EPA and by any person in the same manner as other requirements of the SIP.

(b) Operating Permits authorizing the use of alternative emission limits (bubbles) under IDAPA 58.01.01.401.01.a, 58.01.01.440, and 58.01.01.441 (including the use of banked emission reduction

§ 52.682

credits in a bubble pursuant to IDAPA 58.01.01.461), and Tier II Operating Permits authorizing compliance schedule extensions under IDAPA 58.01.01.401.04 must be submitted to EPA for approval as revisions to the Idaho SIP before they become applicable requirements of the Idaho SIP.

[68 FR 2225, Jan. 16, 2003]

§ 52.682 [Reserved]

§ 52.683 Significant deterioration of air quality.

(a) The State of Idaho Rules for Control of Air Pollution in Idaho, specifically, IDAPA 58.01.01.005 through 007 (definitions), IDAPA 58.01.01.107.03.a, .b, .c (incorporations by reference), IDAPA 58.01.01.200 through 222 (permit to construct rules); IDAPA 58.01.01.510 through 516 (stack height rules); and IDAPA 58.01.01.575 through 581 (standards, increments and area designations) (except IDAPA 58.01.01.577), are approved as meeting the requirements of title I, part C, subpart 1 of the Clean Air Act for preventing significant deterioration of air quality.

(b) The requirements of sections 160 through 165 of the Clean Air Act are not met for Indian reservations since the plan does not include approvable procedures for preventing significant deterioration of air quality on Indian reservations. Therefore, the provisions of § 52.21 except paragraph (a)(1) are hereby incorporated and made part of the applicable plan for Indian reservations in the State of Idaho.

(c) The requirements of section 165 of the Clean Air Act are not met for sources subject to prevention of significant deterioration requirements prior to August 22, 1986, the effective date of EPA's approval of the rules cited in paragraph (a) of this section. Therefore, the provisions of § 52.21 except paragraph (a)(1) are hereby incorporated and made part of the applicable plan for sources subject to § 52.21 prior to August 22, 1986.

[68 FR 2226, Jan. 16, 2003, as amended at 68 FR 20072, Apr. 24, 2003; 68 FR 74489, Dec. 24, 2003; 77 FR 76419, Dec. 28, 2012; 79 FR 11713, Mar. 3, 2014; 80 FR 18528, Apr. 7, 2015; 81 FR 53294, Aug. 12, 2016]

40 CFR Ch. I (7–1–25 Edition)

§§ 52.684–52.689 [Reserved]

§ 52.690 Visibility protection.

(a) The requirements of section 169A of the Clean Air Act are not met, because the plan does not include approvable procedures for protection of visibility in mandatory Class I Federal areas.

(b)–(c) [Reserved]

[50 FR 28553, July 12, 1985; 51 FR 23759, July 1, 1986, as amended at 52 FR 45137, Nov. 24, 1987; 82 FR 3129, Jan. 10, 2017]

§ 52.691 Extensions.

(a) The Administrator, by authority delegated under section 188(d) of the Clean Air Act, as amended in 1990, hereby extends for one year (until December 31, 1995) the attainment date for the Power-Bannock Counties PM-10 nonattainment area and the Sandpoint PM-10 nonattainment area.

(b) The Administrator, by authority delegated under section 188(d) of the Clean Air Act, as amended in 1990, hereby grants a second one-year extension (until December 31, 1996) to the attainment date for the Power-Bannock Counties PM-10 nonattainment area.

[61 FR 20732, May 8, 1996, as amended at 61 FR 66606, Dec. 18, 1996]

Subpart O—Illinois

§ 52.719 [Reserved]

§ 52.720 Identification of plan.

(a) *Purpose and scope.* This section sets forth the applicable State implementation plan for the State of Illinois under section 110 of the Clean Air Act, 42 U.S.C. 7401–7671q and 40 CFR part 51 to meet national ambient air quality standards.

(b) *Incorporation by reference.* (1) Material listed in paragraphs (c) and (d) of this section with an EPA approval date prior to December 31, 2016, was approved for incorporation by reference by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Entries in paragraphs (c) and (d) of this section with the EPA approval dates after December 31, 2016, have been approved by EPA for inclusion in the State implementation plan and for incorporation by reference into

Environmental Protection Agency

§ 52.720

the plan as it is contained in this section, and will be considered by the Director of the Federal Register for approval in the next update to the SIP compilation.

(2) EPA Region 5 certifies that the materials provided by EPA at the addresses in paragraph (b)(3) of this section are an exact duplicate of the officially promulgated state rules/regulations which have been approved as part of the state implementation plan as of

the dates referenced in paragraph (b)(1).

(3) Copies of the materials incorporated by reference may be inspected at the Environmental Protection Agency, Region 5, Air Programs Branch, 77 West Jackson Boulevard, Chicago, IL 60604, or the National Archives and Records Administration. For information on the availability of this material at NARA, call 202-741-6030, or go to: <http://www.archives.gov/federal-register/cfr/ibr-locations.html>.

(c) *EPA approved regulations.*

201.143	Operating Permits for New Sources	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 103(b)(1).
201.144	Operating Permits for Existing Sources.	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 103(b)(2).
201.146	Exemptions From State Permit Requirements.	3/24/2017	10/10/2018, 83 FR 50854	Except (mmm).
201.147	Former Permits	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 103(j).
201.148	Operation Without Compliance Program and Project Completion Schedule.	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 104(a).
201.149	Operation During Malfunction, Breakdown or Startups.	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 105(a).
201.150	Circumvention	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 109.
201.151	Design of Effluent Exhaust Systems	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 110.
Subpart D: Permit Applications and Review Process				
201.152	Contents of Application for Construction Permit.	6/23/1998	1/3/2000, 65 FR 14.	Approved as Rule 103(a)(6).
201.156	Conditions	4/14/1972	5/31/1972, 37 FR 10862	
201.157	Contents of Application for Operating Permit.	6/23/1998	1/3/2000, 65 FR 14.	Approved as Rule 103(b)(7).
201.158	Incomplete Applications	6/23/1998	1/3/2000, 65 FR 14.	
201.159	Signatures	6/23/1998	1/3/2000, 65 FR 14.	
201.160	Standards for Issuance	6/23/1998	1/3/2000, 65 FR 14.	
201.161	Conditions	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 103(e).
201.162	Duration	12/1/2010	4/7/2014, 79 FR 18997.	
201.163	Joint Construction and Operating Permits.	6/23/1998	1/3/2000, 65 FR 14.	
201.164	Design Criteria	6/23/1998	1/3/2000, 65 FR 14.	
201.165	Hearings	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 103(f).
201.166	Revocation	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 103(g).
201.167	Revisions to Permits	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 103(g).
201.168	Appeals From Conditions	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 103(k).
Subpart F: CAAPP Permits				
201.207	Applicability	6/23/1998	1/3/2000, 65 FR 14.	
Subpart H: Compliance Programs and Project Completion Schedules				
201.241	Contents of Compliance Program	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 104(b)(1).
201.242	Contents of Project Completion Schedule.	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 104(b)(2, 3).
201.243	Standards for Approval	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 104(c).
201.244	Revisions	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 104(d).
201.245	Effects of Approval	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 104(e).
201.246	Records and Reports	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 104(f).
Subpart I: Malfunctions, Breakdowns or Startups				
201.261	Contents of Request for Permission To Operate During a Malfunction, Breakdown or Startup.	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 105(b).
201.262	Standards for Granting Permission To Operate During a Malfunction, Breakdown or Startup.	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 105(c).
201.263	Records and Reports	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 105(d).
201.264	Continued Operation or Startup Prior to Granting of Operating Permit.	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 105(e).

Environmental Protection Agency

§ 52.720

EPA-APPROVED ILLINOIS REGULATIONS AND STATUTES—Continued

201.265	Effect of Granting of Permission To Operate During a Malfunction, Breakdown or Startup.	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 105(f).
Subpart J: Monitoring and Testing				
201.281	Permit Monitoring Equipment Requirements.	2/3/1989	4/6/1993, 58 FR 17780.	
201.282	Testing	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 106(b).
201.283	Records and Reports	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 106(c).
Subpart K: Records and Reports				
201.301	Records	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 107(a).
201.302	Reports	12/23/2013	3/13/2015, 80 FR 13248.	
Subpart L: Continuous Monitoring				
201.401	Continuous Monitoring Requirements	2/3/1989	4/6/1993, 58 FR 17780.	
201.402	Alternative Monitoring	2/3/1989	4/6/1993, 58 FR 17780.	
201.403	Exempt Sources	2/3/1989	4/6/1993, 58 FR 17780.	
201.404	Monitoring System Malfunction	2/3/1989	4/6/1993, 58 FR 17780.	
201.405	Excess Emission Reporting	2/3/1989	4/6/1993, 58 FR 17780.	
201.406	Data Reduction	2/3/1989	4/6/1993, 58 FR 17780.	
201.407	Retention of Information	2/3/1989	4/6/1993, 58 FR 17780.	
201.408	Compliance Schedules	2/3/1989	4/6/1993, 58 FR 17780.	
Subpart M: Permit By Rule (PBR)—General Provisions				
201.500	Purpose	3/24/2017	10/10/2018, 83 FR 50854.	
201.505	Applicability	3/24/2017	10/10/2018, 83 FR 50854.	
201.510	Notice of Intent to Be Covered By a PBR (Notification).	3/24/2017	10/10/2018, 83 FR 50854.	
201.515	Commencing Construction or Modification.	3/24/2017	10/10/2018, 83 FR 50854.	
201.520	Modification or Change in Status of an Emission Unit Covered by a PBR.	3/24/2017	10/10/2018, 83 FR 50854.	
201.525	Standard Conditions for PBR	3/24/2017	10/10/2018, 83 FR 50854.	
201.530	Recordkeeping and Reporting	3/24/2017	10/10/2018, 83 FR 50854.	
201.535	Authority to Operate	3/24/2017	10/10/2018, 83 FR 50854.	
201.540	Enforcement Authority	3/24/2017	10/10/2018, 83 FR 50854.	
Subpart N: Permit By Rule (PBR)—Boilers Less Than Or Equal To 100 MMBtu/hr				
201.600	Applicability	3/24/2017	10/10/2018, 83 FR 50854.	
201.605	Boiler Notice of Intent to Be Covered by a PBR (Notification) 201.610.	3/24/2017	10/10/2018, 83 FR 50854.	
201.615	Opacity Requirements	3/24/2017	10/10/2018, 83 FR 50854.	
201.620	Requirements for Use of Diesel Fuel and Refinery Fuel Gas 201.625.	3/24/2017	10/10/2018, 83 FR 50854.	
201.625	Carbon Monoxide (CO) Requirements.	3/24/2017	10/10/2018, 83 FR 50854.	
201.630	Nitrogen Oxide (NO _x) Requirements	3/24/2017	10/10/2018, 83 FR 50854.	
201.635	PBR Boiler Reporting Requirements	3/24/2017	10/10/2018, 83 FR 50854.	
Part 203: Major Stationary Sources Construction and Modification				
Subpart A: General Provisions				
203.101	Definitions	4/30/1993	9/27/1995, 60 FR 49778.	
203.103	Actual Construction	3/22/1988	12/17/1992, 57 FR 59928.	
203.104	Actual Emissions	3/22/1988	12/17/1992, 57 FR 59928.	
203.107	Allowable Emissions	4/30/1993	9/27/1995, 60 FR 49778.	
203.110	Available Growth Margin	4/30/1993	9/27/1995, 60 FR 49778.	
203.112	Building, Structure and Facility	4/30/1993	9/27/1995, 60 FR 49778.	
203.113	Commence	3/22/1988	12/17/1992, 57 FR 59928.	
203.116	Construction	3/22/1988	12/17/1992, 57 FR 59928.	
203.117	Dispersion Enhancement Techniques	3/22/1988	12/17/1992, 57 FR 59928.	
203.119	Emission Baseline	7/22/1983	12/17/1992, 57 FR 59928.	
203.121	Emission Offset	4/30/1993	9/27/1995, 60 FR 49778.	

EPA-APPROVED ILLINOIS REGULATIONS AND STATUTES—Continued

203.122	Emissions Unit	4/30/1993	9/27/1995, 60 FR 49778.	
203.123	Federally Enforceable	4/30/1993	9/27/1995, 60 FR 49778.	
203.124	Fugitive Emissions	3/22/1988	12/17/1992, 57 FR 59928.	
203.125	Installation	3/22/1988	12/17/1992, 57 FR 59928.	
203.126	Lowest Achievable Emission Rate	4/30/1993	9/27/1995, 60 FR 49778.	
203.127	Nonattainment Area	3/22/1988	12/17/1992, 57 FR 59928.	
203.128	Potential To Emit	4/30/1993	9/27/1995, 60 FR 49778.	
203.131	Reasonable Further Progress	3/22/1988	12/17/1992, 57 FR 59928.	
203.134	Secondary Emissions	3/22/1988	12/17/1992, 57 FR 59928.	
203.136	Stationary Source	3/22/1988	12/17/1992, 57 FR 59928.	
203.150	Public Participation	4/30/1993	9/27/1995, 60 FR 49778.	
Subpart B: Major Stationary Sources in Nonattainment Areas				
203.201	Prohibition	4/30/1993	9/27/1995, 60 FR 49778.	
203.202	Coordination With Permit Requirement and Application Pursuant to 35 Ill. Adm. Code 201.	3/22/1988	12/17/1992, 57 FR 59928.	
203.203	Construction Permit Requirement and Application.	4/30/1993	9/27/1995, 60 FR 49778.	
203.205	Effect of Permits	3/22/1988	12/17/1992, 57 FR 59928.	
203.206	Major Stationary Source	3/10/1998	5/13/2003, 68 FR 25504.	
203.207	Major Modification of a Source	9/4/2020	9/9/2021, 86 FR 50459.	
203.208	Net Emission Determination	4/30/1993	9/27/1995, 60 FR 49778.	
203.209	Significant Emissions Determination	4/30/1993	9/27/1995, 60 FR 49778.	
203.210	Relaxation of a Source-Specific Limitation.	3/22/1988	12/17/1992, 57 FR 59928.	
203.211	Permit Exemption Based on Fugitive Emissions.	3/22/1988	12/17/1992, 57 FR 59928.	
Subpart C: Requirements for Major Stationary Sources in Nonattainment Areas				
203.301	Lowest Achievable Emission Rate	3/10/1998	5/13/2003, 68 FR 25504.	
203.302	Maintenance of Reasonable Further Progress and Emission Offsets.	4/30/1993	9/27/1995, 60 FR 49778.	
203.303	Baseline and Emission Offsets Determination.	4/30/1993	9/27/1995, 60 FR 49778.	
203.305	Compliance by Existing Sources	3/22/1988	12/17/1992, 57 FR 59928.	
203.306	Analysis of Alternatives	4/30/1993	9/27/1995, 60 FR 49778.	
Subpart F: Operation of a Major Stationary Source or Major Modification				
203.601	Lowest Achievable Emission Rate Compliance Requirement.	3/22/1988	12/17/1992, 57 FR 59928.	
203.602	Emission Offset Maintenance Requirement.	3/22/1988	12/17/1992, 57 FR 59928.	
Subpart G: General Maintenance of Emission Offsets				
203.701	General Maintenance of Emission Offsets.	3/22/1988	12/17/1992, 57 FR 59928.	
Subpart H: Offsets for Emission Increases From Rocket Engines and Motor Firing				
203.801	Offsetting by Alternative or Innovative Means.	5/14/1993	9/27/1995, 60 FR 49778.	
Part 204: Prevention of Significant Deterioration				
Subpart A: General Provisions				
204.100	Incorporations by Reference	9/4/2020	9/9/2021, 86 FR 50459.	
204.110	Abbreviations and Acronyms	9/4/2020	9/9/2021, 86 FR 50459.	
204.120	Severability	9/4/2020	9/9/2021, 86 FR 50459.	
Subpart B: Definitions				
204.200	Definitions	9/4/2020	9/9/2021, 86 FR 50459.	
204.210	Actual Emissions	9/4/2020	9/9/2021, 86 FR 50459.	
204.220	Adverse Impact on Visibility	9/4/2020	9/9/2021, 86 FR 50459.	
204.230	Allowable Emissions	9/4/2020	9/9/2021, 86 FR 50459.

Part 212: Visible and Particulate Matter Emissions

Subpart A: General

212.107	Measurement Method for Visible Emissions.	5/22/1996	3/11/1998, 63 FR 11842.	
212.108	Measurement Methods for PM–10 Emissions and Condensable PM–10 Emissions.	5/22/1996	3/11/1998, 63 FR 11842.	
212.109	Measurement Methods for Opacity ...	5/22/1996	3/11/1998, 63 FR 11842.	
212.110	Measurement Methods for Particulate Matter.	5/22/1996	3/11/1998, 63 FR 11842.	
212.111	Abbreviations and Units	10/4/1991	10/21/1993, 58 FR 54291.	
212.113	Incorporations by Reference	5/22/1996	7/14/1999, 64 FR 37847.	

Subpart B: Visible Emissions

212.121	Opacity Standards	7/13/1988	12/29/1992, 57 FR 61834.	
212.122	Visible Emissions Limitations for Certain Emission Units for Which Construction or Modification Commenced on or After April 14, 1972.	7/13/1988	12/29/1992, 57 FR 61834.	
212.123	Visible Emissions Limitations for All Other Emission Units.	7/13/1988	12/29/1992, 57 FR 61834.	
212.124	Exceptions	7/13/1988	12/29/1992, 57 FR 61834.	
212.125	Determination of Violations	7/13/1988	12/29/1992, 57 FR 61834.	
212.126	Adjusted Opacity Standards Procedures.	7/13/1988	12/29/1992, 57 FR 61834.	

Subpart D: Particulate Matter Emissions From Incinerators

212.181	Limitations for Incinerators	6/4/1980	11/27/1981, 46 FR 57893.	

EPA-APPROVED ILLINOIS REGULATIONS AND STATUTES—Continued

Illinois citation	Title/subject	State effective date	EPA approval date	Comments
212.182	Aqueous Waste Incinerators	6/4/1980	11/27/1981, 46 FR 57893.	
212.183	Certain Wood Waste Incinerators	6/4/1980	11/27/1981, 46 FR 57893.	
212.184	Explosive Waste Incinerators	6/4/1980	11/27/1981, 46 FR 57893.	
212.185	Continuous Automatic Stoking Animal Pathological Waste Incinerators.	12/30/1986	9/15/1993, 58 FR 48312.	

Subpart E: Particulate Matter Emissions From Fuel Combustion Emission Units

212.201	Emission Units for Which Construction or Modification Commenced Prior to April 14, 1972, Using Solid Fuel Exclusively Located in the Chicago Area.	7/9/1986	12/29/1992, 57 FR 61834.	
212.202	Emission Units for Which Construction or Modification Commenced Prior to April 14, 1972, Using Solid Fuel Exclusively Located Outside the Chicago Area.	7/9/1986	12/29/1992, 57 FR 61834.	
212.203	Controlled Emission Units for Which Construction or Modification Commenced Prior to April 14, 1972, Using Solid Fuel Exclusively.	7/9/1986	12/29/1992, 57 FR 61834.	
212.204	Emission Units for Which Construction or Modification Commenced on or After April 14, 1972, Using Solid Fuel Exclusively.	7/9/1986	12/29/1992, 57 FR 61834.	
212.205	Coal-Fired Industrial Boilers for Which Construction or Modification Commenced Prior to April 14, 1972, Equipped With Flue Gas Desulfurization Systems.	10/19/1981	2/22/1984, 49 FR 6490.	
212.206	Emission Units Using Liquid Fuel Exclusively.	4/14/1972	5/31/1972, 37 FR 10842.	
212.207	Emission Units Using More Than One Type of Fuel.	4/14/1972	5/31/1972, 37 FR 10842.	
212.208	Aggregation of Emission Units for Which Construction or Modification Commenced Prior to April 14, 1972.	4/14/1972	5/31/1972, 37 FR 10842.	
212.210	Emissions Limitations for Certain Fuel Combustion Emission Units Located in the Vicinity of Granite City.	5/22/1996	7/14/1999, 64 FR 37847.	

Subpart K: Fugitive Particulate Matter

212.301	Fugitive Particulate Matter	10/26/1979	2/21/1980, 45 FR 11472.	
212.302	Geographical Areas of Application	5/22/1996	7/14/1999, 64 FR 37847.	
212.304	Storage Piles	10/26/1979	4/26/1982, 47 FR 17814.	
212.305	Conveyor Loading Operations	10/26/1979	4/26/1982, 47 FR 17814.	
212.306	Traffic Areas	10/26/1979	2/21/1980, 45 FR 11472.	
212.307	Materials Collected by Pollution Control Equipment.	10/26/1979	2/21/1980, 45 FR 11472.	
212.308	Spraying or Choke-Feeding Required	10/26/1979	2/21/1980, 45 FR 11472.	
212.309	Operating Program	5/22/1996	7/14/1999, 64 FR 37847.	
212.310	Minimum Operating Program	10/26/1979	2/21/1980, 45 FR 11472.	
212.312	Amendment to Operating Program ...	10/26/1979	2/21/1980, 45 FR 11472.	
212.313	Emission Standard for Particulate Collection Equipment.	10/26/1979	2/21/1980, 45 FR 11472.	
212.314	Exception for Excess Wind Speed	10/26/1979	2/21/1980, 45 FR 11472.	
212.315	Covering for Vehicles	10/26/1979	2/21/1980, 45 FR 11472.	
212.316	Emissions Limitations for Emission Units in Certain Areas.	5/22/1996	7/14/1999, 64 FR 37847.	

Subpart L: Particulate Matter Emissions From Process Emission Units

212.321	Process Emission Units for Which Construction or Modification Commenced on or After April 14, 1972.	9/28/1979	2/21/1980, 45 FR 11472.	

Environmental Protection Agency

§ 52.720

EPA-APPROVED ILLINOIS REGULATIONS AND STATUTES—Continued

Illinois citation	Title/subject	State effective date	EPA approval date	Comments
212.322	Process Emission Units for Which Construction or Modification Commenced Prior to April 14, 1972.	9/28/1979	2/21/1980, 45 FR 11472.	
212.323	Stock Piles	9/28/1979	2/21/1980, 45 FR 11472.	
212.324	Process Emission Units in Certain Areas.	5/22/1996	3/11/1998, 63 FR 11842.	
Subpart N: Food Manufacturing				
212.361	Corn Wet Milling Processes	9/28/1979	2/21/1980, 45 FR 11472.	
212.362	Emission Units in Certain Areas	5/22/1996	3/11/1998, 63 FR 11842.	
Subpart O: Petroleum Refining, Petrochemical and Chemical Manufacturing				
212.381	Catalyst Regenerators of Fluidized Catalytic Converters.	9/28/1979	2/21/1980, 45 FR 11472.	
Subpart Q: Stone, Clay, Glass and Concrete Manufacturing				
212.421	Portland Cement Processes for Which Construction or Modification Commenced on or After April 14, 1972.	4/14/1972	5/31/1972, 37 FR 10842.	
212.422	Portland Cement Manufacturing Processes.	9/28/1979	2/21/1980, 45 FR 11472.	
212.423	Emission Limits for the Portland Cement Manufacturing Plant Located in LaSalle County, South of the Illinois River.	10/4/1991	10/21/1993, 58 FR 54291.	
212.424	Fugitive Particulate Matter Control for the Portland Cement Manufacturing Plant and Associated Quarry Operations Located in LaSalle County, South of the Illinois River.	5/15/1992	1/12/1993, 58 FR 3844.	
212.425	Emission Units in Certain Areas	5/22/1996	3/11/1998, 63 FR 11842.	
Subpart R: Primary and Fabricated Metal Products and Machinery Manufacture				
212.441	Steel Manufacturing Processes	9/28/1979	2/21/1980, 45 FR 11472.	
212.442	Beehive Coke Ovens	9/28/1979	2/21/1980, 45 FR 11472.	
212.443	Coke Plants	5/15/1992	1/12/1993, 58 FR 3844.	
212.444	Sinter Processes	9/28/1979	9/3/1981, 46 FR 44172.	
212.445	Blast Furnace Cast Houses	5/15/1992	1/12/1993, 58 FR 3844.	
212.446	Basic Oxygen Furnaces	5/22/1996	3/11/1998, 63 FR 11842.	
212.447	Hot Metal Desulfurization Not Located in the BOF.	9/28/1979	9/3/1981, 46 FR 44172.	
212.448	Electric Arc Furnaces	9/28/1979	9/3/1981, 46 FR 44172.	
212.449	Argon-Oxygen Decarburization Vessels.	9/28/1979	9/3/1981, 46 FR 44172.	
212.450	Liquid Steel Charging	9/28/1979	9/3/1981, 46 FR 44172.	
212.451	Hot Scarfing Machines	9/28/1979	9/3/1981, 46 FR 44172.	
212.455	Highlines on Steel Mills	10/26/1979	2/21/1980, 45 FR 11472.	
212.456	Certain Small Foundries	9/28/1979	2/21/1980, 45 FR 11472.	
212.457	Certain Small Iron-Melting Air Furnaces.	9/28/1979	7/12/1982, 47 FR 30057.	
212.458	Emission Units in Certain Areas	5/22/1996	3/11/1998, 63 FR 11842.	
Subpart S: Agriculture				
212.461	Grain-Handling and Drying in General.	9/28/1979	2/21/1980, 45 FR 11472.	
212.462	Grain-Handling Operations	9/28/1979	2/21/1980, 45 FR 11472.	
212.463	Grain Drying Operations	9/28/1979	2/21/1980, 45 FR 11472.	
212.464	Sources in Certain Areas	5/22/1996	3/11/1998, 63 FR 11842.	
Subpart T: Construction and Wood Products				
212.681	Grinding, Woodworking, Sand-blasting and Shotblasting.	4/14/1972	5/31/1972, 37 FR 10842.	

EPA-APPROVED ILLINOIS REGULATIONS AND STATUTES—Continued

Illinois citation	Title/subject	State effective date	EPA approval date	Comments
Subpart U: Additional Control Measures				
212.700	Applicability	7/11/1994	7/13/1995, 60 FR 36060.	Approved as Rules 202(e), 203(c), 203(d)(3)(A) & (B), 203(d)(5)(L) & (M), 203(d)(8)(J), 203(f)(3) Preamble, 203(f)(3)(F) Preamble, and 203(i).
212.701	Contingency Measure Plans, Submittal and Compliance Date.	7/11/1994	7/13/1995, 60 FR 36060.	
212.702	Determination of Contributing Sources.	7/11/1994	7/13/1995, 60 FR 36060.	
212.703	Contingency Measure Plan Elements	7/11/1994	7/13/1995, 60 FR 36060.	
212.704	Implementation	7/11/1994	7/13/1995, 60 FR 36060.	
212.705	Alternative Implementation	7/11/1994	7/13/1995, 60 FR 36060.	
212.Appendix C:	Past Compliance Dates	4/14/1972	5/31/1972, 37 FR 10842	
Part 214: Sulfur Limitations				
Subpart A: General Provisions				
214.101	Measurement Methods	12/7/2015	2/1/2018, 83 FR 4591.	
214.102	Abbreviations and Units	12/7/2015	2/1/2018, 83 FR 4591.	
214.103	Definitions	12/7/2015	2/1/2018, 83 FR 4591.	
214.104	Incorporations by Reference	12/7/2015	2/1/2018, 83 FR 4591.	
Subpart B: New Fuel Combustion Emission Sources				
214.121	Large Sources	12/7/2015	2/1/2018, 83 FR 4591.	
214.122	Small Sources	12/7/2015	2/1/2018, 83 FR 4591.	
Subpart C: Existing Solid Fuel Combustion Emission Sources				
214.141	Sources Located in Metropolitan Areas.	3/28/1983	9/3/1992, 57 FR 40333 ...	thru (a).
214.141	Sources Located in Metropolitan Areas.	5/20/1986	9/2/1992, 57 FR 40126 ...	(b), (c), and (d).
214.142	Small Sources Located Outside Metropolitan Areas.	4/14/1972	5/31/1972, 37 FR 10842	Approved as Rule 204(c)(1)(B).
214.143	Large Sources Located Outside Metropolitan Areas.	2/3/1979	2/21/1980, 45 FR 11472.	
Subpart D: Existing Liquid or Mixed Fuel Combustion Emission Sources				
214.161	Liquid Fuel Burned Exclusively	12/7/2015	2/1/2018, 83 FR 4591.	
214.162	Combination of Fuels	12/7/2015	2/1/2018, 83 FR 4591.	
Subpart E: Aggregation of Sources Outside Metropolitan Areas				
214.181	Dispersion Enhancement Techniques	2/3/1979	2/21/1980, 45 FR 11472.	Approved as Rule 204(e) (intro).
214.182	Prohibition	2/3/1979	2/21/1980, 45 FR 11472	
214.183	General Formula	2/3/1979	2/21/1980, 45 FR 11472	Approved as Rule 204(e)(1).
214.184	Special Formula	2/3/1979	2/21/1980, 45 FR 11472	Approved as Rule 204(e)(2).
214.185	Alternative Emission Rate	2/3/1979	2/21/1980, 45 FR 11472	Approved as Rule 204(e)(3).
214.186	New Operating Permits	2/3/1979	2/21/1980, 45 FR 11472	Approved as Rule 204(e)(4).
Subpart F: Alternative Standards for Sources Inside Metropolitan Areas				
214.201	Alternative Standards for Sources in Metropolitan Areas.	12/7/2015	2/1/2018, 83 FR 4591.	
214.202	Dispersion Enhancement Techniques	3/28/1983	9/3/1992, 57 FR 40333.	
Subpart K: Process Emission Sources				
214.300	Scope	12/7/2015	2/1/2018, 83 FR 4591.	

Environmental Protection Agency

§ 52.720

EPA-APPROVED ILLINOIS REGULATIONS AND STATUTES—Continued

Illinois citation	Title/subject	State effective date	EPA approval date	Comments
214.301	General Limitation	2/3/1979	2/21/1980, 45 FR 11472	Approved as Rule 204(f)(1)(A). Approved as Rule 204(f)(1)(C). Approved as Rule 204(f)(2)(B).
214.302	Exception for Air Pollution Control Equipment.	4/14/1972	5/31/1972, 37 FR 10842	
214.303	Use of Sulfuric Acid	2/3/1979	2/21/1980, 45 FR 11472	
214.305	Fuel Sulfur Content Limitations	12/7/2015	2/1/2018, 83 FR 4591.	
Subpart O: Petroleum Refining, Petrochemical and Chemical Manufacturing				
214.381	Sulfuric Acid Manufacturing	2/3/1979	2/21/1980, 45 FR 11472	Only (a) and (b). Ap- proved as Rule 204(f)(1)(B) and (f)(2)(A).
214.382	Petroleum and Petrochemical Proc- esses.	12/5/1988	1/28/1994, 59 FR 4001.	
214.383	Chemical Manufacturing	2/3/1979	2/21/1980, 45 FR 11472	Approved as Rule 204(f)(1)(E).
Subpart Q: Primary and Secondary Metal Manufacturing				
214.421	Combination of Fuels at Steel Mills in Metropolitan Areas.	12/7/2015	2/1/2018, 83 FR 4591.	
Subpart X: Utilities				
214.560	Scope	5/20/1986	9/2/1992, 57 FR 40126.	
214.561	E. D. Edwards Electric Generating Station.	7/11/2003	11/10/2008, 73 FR 66555.	
Subpart AA: Requirements for Certain SO ₂ Sources				
214.600	Definitions	12/7/2015	2/1/2018, 83 FR 4591.	Approved as Rule 204(e)(1).
214.601	Applicability	12/7/2015	2/1/2018, 83 FR 4591.	
214.602	Compliance Deadline	12/7/2015	2/1/2018, 83 FR 4591.	
214.603	Emission Limitations	12/7/2015	2/1/2018, 83 FR 4591.	
214.604	Monitoring and Testing	12/7/2015	2/1/2018, 83 FR 4591.	
214.605	Recordkeeping and Reporting	12/7/2015	2/1/2018, 83 FR 4591.	
214.Appendix C:	Compliance Dates	4/14/1972	5/31/1972, 37 FR 10842	
Part 215: Organic Material Emission Standards and Limitations				
Subpart A: General Provisions				
215.101	Clean-Up and Disposal Operations ..	7/28/1979	2/21/1980, 45 FR 11472.	
215.102	Testing Methods	5/14/1991	8/18/1992, 57 FR 37100.	
215.104	Definitions	1/28/2013	10/6/2014, 79 FR 60070.	
215.105	Incorporation by Reference	1/28/2013	10/6/2014, 79 FR 60070.	
215.108	Measurement of Vapor Pressures	5/14/1991	8/18/1992, 57 FR 37100.	
215.109	Monitoring for Negligibly-Reactive Compounds.	6/19/1998	1/15/1999, 64 FR 2581.	
Subpart B: Organic Emissions From Storage and Loading Operations				
215.121	Storage Containers	7/28/1979	2/21/1980, 45 FR 11472.	
215.122	Loading Operations	7/28/1979	2/21/1980, 45 FR 11472.	
215.123	Petroleum Liquid Storage Tanks	7/28/1979	2/21/1980, 45 FR 11472.

Subpart E: Solvent Cleaning				
215.181	Solvent Cleaning in General	7/28/1979	2/21/1980, 45 FR 11472.	
215.182	Cold Cleaning	7/28/1979	2/21/1980, 45 FR 11472.	
215.183	Open Top Vapor Degreasing	7/28/1979	2/21/1980, 45 FR 11472.	
215.184	Conveyorized Degreasing	7/28/1979	2/21/1980, 45 FR 11472.	
Subpart F: Coating Operations				
215.202	Compliance Schedules	7/28/1979	2/21/1980, 45 FR 11472.	
215.204	Emission Limitations for Manufacturing Plants.	6/19/1998	1/15/1999, 64 FR 2581.	
215.205	Alternative Emission Limitations	6/19/1998	1/15/1999, 64 FR 2581.	
215.206	Exemptions From Emission Limitations.	6/19/1998	1/15/1999, 64 FR 2581.	
215.207	Compliance by Aggregation of Emission Units.	6/19/1998	1/15/1999, 64 FR 2581.	
215.208	Testing Methods for Volatile Organic Material Content.	7/28/1979	2/21/1980, 45 FR 11472.	
215.209	Exemption From General Rule on Use of Organic Material.	7/28/1979	2/21/1980, 45 FR 11472.	
215.211	Compliance Dates and Geographical Areas.	6/19/1998	1/15/1999, 64 FR 2581.	
215.212	Compliance Plan	6/19/1998	1/15/1999, 64 FR 2581.	
215.213	Special Requirements for Compliance Plan.	7/28/1979	2/21/1980, 45 FR 11472.	
215.215	DMI Emissions Limitations	7/28/1979	2/21/1980, 45 FR 11472.	
Subpart H: Special Limitations for Sources in Major Urbanized Areas Which Are Nonattainment for Ozone				
215.240	Applicability	6/29/1987	6/29/1990, 55 FR 26814.	
215.241	External Floating Roofs	6/29/1987	6/29/1990, 55 FR 26814.	
215.249	Compliance Dates	6/29/1987	6/29/1990, 55 FR 26814.	
Subpart K: Use of Organic Material				
215.301	Use of Organic Material	7/28/1979	2/21/1980, 45 FR 11472.	
215.302	Alternative Standard	7/28/1979	2/21/1980, 45 FR 11472.	
215.303	Fuel Combustion Emission Sources	7/28/1979	2/21/1980, 45 FR 11472.	
215.304	Operations With Compliance Program.	7/28/1979	2/21/1980, 45 FR 11472.	
Subpart P: Printing and Publishing				
215.408	Heatset Web Offset Lithographic Printing.	9/30/1987	6/29/1990, 55 FR 26814.	
Subpart Q: Leaks From Synthetic Organic Chemical and Polymer Manufacturing Equipment				
215.420	Applicability	12/14/1987	6/29/1990, 55 FR 26814.	
215.421	General Requirements	12/14/1987	6/29/1990, 55 FR 26814.	
215.422	Inspection Program Plan for Leaks ...	8/28/1985	6/29/1990, 55 FR 26814.	
215.423	Inspection Program for Leaks	8/28/1985	6/29/1990, 55 FR 26814.	
215.424	Repairing Leaks	8/28/1985	6/29/1990, 55 FR 26814.	
215.425	Recordkeeping for Leaks	8/28/1985	6/29/1990, 55 FR 26814.	
215.426	Reporting for Leaks	8/28/1985	6/29/1990, 55 FR 26814.	
215.427	Alternative Program for Leaks	8/28/1985	6/29/1990, 55 FR 26814.	
215.428	Compliance Dates	12/14/1987	6/29/1990, 55 FR 26814.	
215.429	Compliance Plan	12/14/1987	6/29/1990, 55 FR 26814.	
215.430	General Requirements	12/14/1987	6/29/1990, 55 FR 26814.	
215.431	Inspection Program Plan for Leaks ...	12/14/1987	6/29/1990, 55 FR 26814.	
215.433	Repairing Leaks	12/14/1987	6/29/1990, 55 FR 26814.	
215.434	Recordkeeping for Leaks	12/14/1987	6/29/1990, 55 FR 26814.	
215.435	Report for Leaks	12/14/1987	6/29/1990, 55 FR 26814.	
215.437	Open-Ended Valves	12/14/1987	6/29/1990, 55 FR 26814.	
215.438	Compliance Plan	12/14/1987	6/29/1990, 55 FR 26814.	
Subpart R: Petroleum Refining and Related Industries; Asphalt Materials				
215.441	Petroleum Refinery Waste Gas Disposal.	7/28/1979	2/21/1980, 45 FR 11472.

Part 218: Organic Material Emission Standards and Limitations for the Chicago Area

Subpart A: General Provisions

218.100	Introduction	9/27/1993	9/9/1994, 59 FR 46562.	
218.101	Savings Clause	10/25/1994	4/3/1995, 60 FR 16801.	
218.102	Abbreviations and Conversion Factors.	9/27/1993	9/9/1994, 59 FR 46562.	
218.103	Applicability	9/27/1993	9/9/1994, 59 FR 46562.	
218.104	Definitions	9/27/1993	9/9/1994, 59 FR 46562.	
218.105	Test Methods and Procedures	7/27/2011	3/23/2012, 77 FR 16940.	
218.106	Compliance Dates	9/14/2010	3/23/2012, 77 FR 16940.	
218.107	Operation of Afterburners	9/27/1993	9/9/1994, 59 FR 46562.	
218.108	Exemptions, Variations, and Alternative Means of Control or Compliance Determinations.	1/24/1994	10/21/1996, 61 FR 54556.	
218.109	Vapor Pressure of Volatile Organic Liquids.	9/27/1993	9/9/1994, 59 FR 46562.	
218.110	Vapor Pressure of Organic Material or Solvent.	9/27/1993	9/9/1994, 59 FR 46562.	
218.111	Vapor Pressure of Volatile Organic Material.	9/27/1993	9/9/1994, 59 FR 46562.	
218.112	Incorporations by Reference	12/23/2013	3/13/2015, 80 FR 13248.	
218.114	Compliance With Permit Conditions	1/24/1994	10/21/1996, 61 FR 54556.	

Subpart B: Organic Emissions From Storage and Loading Operations

218.119	Applicability for VOL	11/15/1994	8/8/1996, 61 FR 41338.	
218.120	Control Requirements for Storage Containers of VOL.	11/15/1994	8/8/1996, 61 FR 41338.	
218.121	Storage Containers	9/27/1993	9/9/1994, 59 FR 46562.	
218.122	Loading Operations	9/27/1993	9/9/1994, 59 FR 46562.	
218.123	Petroleum Liquid Storage Tanks	9/27/1993	9/9/1994, 59 FR 46562.	
218.124	External Floating Roofs	9/27/1993	9/9/1994, 59 FR 46562.

Subpart II: Fiberglass Boat Manufacturing Materials				
218.890	Applicability	9/14/2010	3/23/2012, 77 FR 16940.	
218.891	Emission Limitations and Control Requirements.	7/27/11	3/23/12, 77 FR 16940.	
218.892	Testing Requirements	7/27/2011	3/23/2012, 77 FR 16940.	
218.894	Recordkeeping and Reporting Requirements.	7/27/2011	3/23/2012, 77 FR 16940.	
Subpart JJ: Miscellaneous Industrial Adhesives				
218.900	Applicability	9/14/2010	3/23/2012, 77 FR 16940.	
218.901	Emission Limitations and Control Requirements.	7/27/2011	3/23/2012, 77 FR 16940.	
218.902	Testing Requirements	7/27/2011	3/23/2012, 77 FR 16940.	
218.903	Monitoring Requirements	7/27/2011	3/23/2012, 77 FR 16940.	
218.904	Recordkeeping and Reporting Requirements.	7/27/2011	3/23/2012, 77 FR 16940.	
Subpart PP: Miscellaneous Fabricated Product Manufacturing Processes				
218.920	Applicability	1/24/1994	10/21/1996, 61 FR 54556.	
218.926	Control Requirements	1/24/1994	10/21/1996, 61 FR 54556.	
218.927	Compliance Schedule	9/27/1993	10/21/1996, 61 FR 54556.	
218.928	Testing	9/27/1993	10/21/1996, 61 FR 54556.	
218.929	Cementable and Dress or Performance Shoe Leather.	4/8/2003	5/24/2004, 69 FR 29446.	
Subpart QQ: Miscellaneous Formulation Manufacturing Processes				
218.940	Applicability	7/16/1998	6/18/1999, 64 FR 32810.	
218.946	Control Requirements	1/24/1994	10/21/1996, 61 FR 54556.	
218.947	Compliance Schedule	9/27/1993	9/9/1994, 59 FR 46562.	
218.948	Testing	9/27/1993	9/9/1994, 59 FR 46562.	
Subpart RR: Miscellaneous Organic Chemical Manufacturing Processes				
218.960	Applicability	1/24/1994	10/21/1996, 61 FR 54556.	
218.966	Control Requirements	5/9/1995	3/12/1997, 62 FR 11327.	
218.967	Compliance Schedule	9/27/1993	10/21/1996, 61 FR 54556.	
218.968	Testing	9/27/1993	10/21/1996, 61 FR 54556.	
Subpart TT: Other Emission Units				
218.980	Applicability	5/9/1995	3/12/1997, 62 FR 11327.	
218.986	Control Requirements	1/24/1994	10/21/1996, 61 FR 54556.	
218.987	Compliance Schedule	9/27/1993	10/21/1996, 61 FR 54556.	
218.988	Testing	9/27/1993	10/21/1996, 61 FR 54556.	
Subpart UU: Recordkeeping and Reporting				
218.990	Exempt Emission Units	9/27/1993	10/21/1996, 61 FR 54556.	
218.991	Subject Emission Units	1/24/1994	10/21/1996, 61 FR 54556.	
218.Appendix A:	List of Chemicals Defining Synthetic Organic Chemical and Polymer Manufacturing.	9/27/1993	9/9/1994, 59 FR 46562.	
218.Appendix B:	VOM Measurement Techniques for Capture Efficiency.	9/27/1993	9/9/1994, 59 FR 46562.	
218.Appendix C:	Reference Test Methods for Air Oxidation Processes.	9/27/1993	9/9/1994, 59 FR 46562.	
218.Appendix D:	Coefficients for the Total Resource Effectiveness Index (TRE) Equation.	9/27/1993	9/9/1994, 59 FR 46562.	
218.Appendix E:	List of Affected Marine Terminals	10/25/1994	4/3/1995, 60 FR 16801.	
218.Appendix G:	TRE Index Measurements for SOCM Reactors and Distillation Units.	5/9/1995	3/23/1998, 63 FR 13784.	
218.Appendix H:	Baseline VOM Content Limitations for Subpart F, Section 218.212 Cross-Line Averaging.	5/9/1995	2/13/1996, 61 FR 5511.

Part 219: Organic Material Emission Standards and Limitations for the Metro East Area				
Subpart A: General Provisions				
219.100	Introduction	9/27/1993	9/9/1994, 59 FR 46562.	
219.101	Savings Clause	10/25/1994	4/3/1995, 60 FR 16801.	
219.102	Abbreviations and Conversion Factors.	9/27/1993	9/9/1994, 59 FR 46562.	
219.103	Applicability	8/16/1991	9/9/1994, 59 FR 46562.	
219.104	Definitions	9/27/1993	9/9/1994, 59 FR 46562.	
219.105	Test Methods and Procedures	3/4/2021	4/11/2023, 88 FR 21490.	
219.106	Compliance Dates	3/4/2021	4/11/2023, 88 FR 21490.	
219.107	Operation of Afterburners	9/27/1993	9/9/1994, 59 FR 46562.	
219.108	Exemptions, Variations, and Alternative Means of Control or Compliance Determinations.	8/16/1991	9/9/1994, 59 FR 46562.	
219.109	Vapor Pressure of Volatile Organic Liquids.	9/27/1993	9/9/1994, 59 FR 46562.	
219.110	Vapor Pressure of Organic Material or Solvent.	3/4/2021	4/11/2023, 88 FR 21490.	
219.111	Vapor Pressure of Volatile Organic Material.	9/27/1993	9/9/1994, 59 FR 46562.	
219.112	Incorporation by Reference	3/4/2021	4/11/2023, 88 FR 21490.	
Subpart B: Organic Emissions From Storage and Loading Operations				
219.119	Applicability for VOL	11/15/1994	8/8/1996, 61 FR 41338.	
219.120	Control Requirements for Storage Containers of VOL.	11/15/1994	8/8/1996, 61 FR 41338.	
219.121	Storage Containers of VPL	9/27/1993	9/9/1994, 59 FR 46562.	
219.122	Loading Operations	9/27/1993	9/9/1994, 59 FR 46562.	
219.123	Petroleum Liquid Storage Tanks	9/27/1993	9/9/1994, 59 FR 46562.	
219.124	External Floating Roofs	9/27/1993	9/9/1994, 59 FR 46562.	
219.125	Compliance Dates	11/15/1994	8/8/1996, 61 FR 41338.	
219.127	Testing VOL Operations	11/15/1994	8/8/1996, 61 FR 41338.	
219.128	Monitoring VOL Operations	1/28/2013	10/6/2014, 79 FR 60070.	
219.129	Recordkeeping and Reporting for VOL Operations.	11/15/1994	8/8/1996, 61 FR 41338.	
Subpart C: Organic Emissions From Miscellaneous Equipment				
219.141	Separation Operations	9/27/1993	9/9/1994, 59 FR 46562.	
219.142	Pumps and Compressors	8/16/1991	9/9/1994, 59 FR 46562.	
219.143	Vapor Blowdown	9/27/1993	9/9/1994, 59 FR 46562.	
219.144	Safety Relief Valves	9/27/1993	9/9/1994, 59 FR 46562.	
Subpart E: Solvent Cleaning				
219.181	Solvent Cleaning Degreasing Operations.	6/25/2010	3/23/2012, 77 FR 16940.	
219.182	Cold Cleaning	6/9/1997	11/26/1997, 62 FR 62951.	
219.183	Open Top Vapor Degreasing	9/27/1993	9/9/1994, 59 FR 46562.	
219.184	Conveyorized Degreasing	9/27/1993	9/9/1994, 59 FR 46562.	
219.186	Test Methods	9/27/1993	9/9/1994, 59 FR 46562.	
219.187	Other Industrial Cleaning Operations	3/4/2021	4/11/2023, 88 FR 21490.	
Subpart F: Coating Operations				
219.204	Emission Limitations	3/4/2021	4/11/2023, 88 FR 21490.	
219.205	Daily-Weighted Average Limitations	3/4/2021	4/11/2023, 88 FR 21490.	
219.206	Solids Basis Calculation	9/27/1993	9/9/1994, 59 FR 46562.	
219.207	Alternative Emission Limitations	3/4/2021	4/11/2023, 88 FR 21490.	
219.208	Exemptions from Emission Limitations.	3/4/2021	4/11/2023, 88 FR 21490.	
219.209	Exemption From General Rule on Use of Organic Material.	9/27/1993	9/9/1994, 59 FR 46562.	
219.210	Compliance Schedule	9/14/2010	3/23/2012, 77 FR 16940.	
219.211	Recordkeeping and Reporting	3/4/2021	4/11/2023, 88 FR 21490.	
219.212	Cross-Line Averaging To Establish Compliance for Coating Lines.	9/14/2010	3/23/2012, 77 FR 16940.

Subpart R: Petroleum Refining and Related Industries; Asphalt Materials				
219.441	Petroleum Refinery Waste Gas Disposal.	9/27/1993	9/9/1994, 59 FR 46562.	
219.442	Vacuum Producing Systems	8/16/1991	9/9/1994, 59 FR 46562.	
219.443	Wastewater (Oil/Water) Separator	9/27/1993	9/9/1994, 59 FR 46562.	
219.444	Process Unit Turnarounds	8/16/1991	9/9/1994, 59 FR 46562.	
219.445	Leaks: General Requirements	9/27/1993	9/9/1994, 59 FR 46562.	
219.446	Monitoring Program Plan for Leaks ..	9/27/1993	9/9/1994, 59 FR 46562.	
219.447	Monitoring Program for Leaks	9/27/1993	9/9/1994, 59 FR 46562.	
219.448	Recordkeeping for Leaks	8/16/1991	9/9/1994, 59 FR 46562.	
219.449	Reporting for Leaks	9/27/1993	9/9/1994, 59 FR 46562.	
219.450	Alternative Program for Leaks	9/27/1993	9/9/1994, 59 FR 46562.	
219.451	Sealing Device Requirements	8/16/1991	9/9/1994, 59 FR 46562.	
219.452	Compliance Schedule for Leaks	9/27/1993	9/9/1994, 59 FR 46562.	
Subpart S: Rubber and Miscellaneous Plastic Products				
219.461	Manufacture of Pneumatic Rubber Tires.	9/27/1993	9/9/1994, 59 FR 46562.	
219.462	Green Tire Spraying Operations	9/27/1993	9/9/1994, 59 FR 46562.	
219.463	Alternative Emission Reduction Systems.	9/27/1993	9/9/1994, 59 FR 46562.	
219.464	Emission Testing	9/27/1993	9/9/1994, 59 FR 46562.	
Subpart T: Pharmaceutical Manufacturing				
219.480	Applicability	5/9/1995	3/12/1997, 62 FR 11327.	
219.481	Control of Reactors, Distillation Units, Crystallizers, Centrifuges and Vacuum Dryers.	9/27/1993	9/9/1994, 59 FR 46562.	
219.482	Control of Air Dryers, Production Equipment Exhaust Systems and Filters.	9/27/1993	9/9/1994, 59 FR 46562.	
219.483	Material Storage and Transfer	9/27/1993	9/9/1994, 59 FR 46562.	
219.484	In-Process Tanks	8/16/1991	9/9/1994, 59 FR 46562.	
219.485	Leaks	9/27/1993	9/9/1994, 59 FR 46562.	
219.486	Other Emission Units	9/27/1993	9/9/1994, 59 FR 46562.	
219.487	Testing	9/27/1993	9/9/1994, 59 FR 46562.	
219.488	Monitoring for Air Pollution Control Equipment.	8/16/1991	9/9/1994, 59 FR 46562.	
219.489	Recordkeeping for Air Pollution Control Equipment.	9/27/1993	9/9/1994, 59 FR 46562.	
Subpart V: Batch Operations and Air Oxidation Processes				
219.500	Applicability for Batch Operations	5/22/1995	4/2/1996, 61 FR 14484.	
219.501	Control Requirements for Batch Operations.	5/22/1995	4/2/1996, 61 FR 14484.	
219.502	Determination of Uncontrolled Total Annual Mass Emissions and Actual Weighted Average Flow Rate Values for Batch Operations.	5/22/1995	4/2/1996, 61 FR 14484.	
219.503	Performance and Testing Requirements for Batch Operations.	5/22/1995	4/2/1996, 61 FR 14484.	
219.504	Monitoring Requirements for Batch Operations.	5/22/1995	4/2/1996, 61 FR 14484.	
219.505	Reporting and Recordkeeping for Batch Operations.	5/22/1995	4/2/1996, 61 FR 14484.	
219.506	Compliance Date	5/22/1995	4/2/1996, 61 FR 14484.	
219.520	Emission Limitations for Air Oxidation Processes.	11/15/1994	9/27/1995, 60 FR 49770.	
219.522	Savings Clause	11/15/1994	9/27/1995, 60 FR 49770.	
219.523	Compliance	11/15/1994	9/27/1995, 60 FR 49770.	
219.524	Determination of Applicability	11/15/1994	9/27/1995, 60 FR 49770.	
219.526	Testing and Monitoring	8/16/1991	9/9/1994, 59 FR 46562.

Illinois citation	Title/subject	State effective date	EPA approval date	Comments
Subpart W: Agriculture				
219.541	Pesticide Exception	9/27/1993	9/9/1994, 59 FR 46562.	
Subpart X: Construction				
219.561	Architectural Coatings	8/16/1991	9/9/1994, 59 FR 46562.	
219.562	Paving Operations	9/27/1993	9/9/1994, 59 FR 46562.	
219.563	Cutback Asphalt	8/16/1991	9/9/1994, 59 FR 46562.	
Subpart Y: Gasoline Distribution				
219.581	Bulk Gasoline Plants	9/27/1993	9/9/1994, 59 FR 46562.	
219.582	Bulk Gasoline Terminals	9/27/1993	9/9/1994, 59 FR 46562.	
219.583	Gasoline Dispensing Operations— Storage Tank Filling Operations.	12/23/2013	3/13/2015, 80 FR 13248.	
219.584	Gasoline Delivery Vessels	9/27/1993	9/9/1994, 59 FR 46562.	
Subpart Z: Dry Cleaners				
219.607	Standards for Petroleum Solvent Dry Cleaners.	8/16/1991	9/9/1994, 59 FR 46562.	
219.608	Operating Practices for Petroleum Solvent Dry Cleaners.	9/27/1993	9/9/1994, 59 FR 46562.	
219.609	Program for Inspection and Repair of Leaks.	9/27/1993	9/9/1994, 59 FR 46562.	
219.610	Testing and Monitoring	9/27/1993	9/9/1994, 59 FR 46562.	
219.611	Exemption for Petroleum Solvent Dry Cleaners.	9/27/1993	9/9/1994, 59 FR 46562.	
Subpart AA: Paint and Ink Manufacturing				
219.620	Applicability	9/27/1993	9/9/1994, 59 FR 46562.	
219.621	Exemption for Waterbase Material and Heatset-Offset Ink.	9/27/1993	9/9/1994, 59 FR 46562.	
219.623	Permit Conditions	9/27/1993	9/9/1994, 59 FR 46562.	
219.624	Open-Top Mills, Tanks, Vats or Ves- sels.	9/27/1993	9/9/1994, 59 FR 46562.	
219.625	Grinding Mills	8/16/1991	9/9/1994, 59 FR 46562.	
219.626	Storage Tanks	8/16/1991	9/9/1994, 59 FR 46562.	
219.628	Leaks	9/27/1993	9/9/1994, 59 FR 46562.	
219.630	Clean Up	8/16/1991	9/9/1994, 59 FR 46562.	
219.636	Compliance Schedule	9/27/1993	9/9/1994, 59 FR 46562.	
219.637	Recordkeeping and Reporting	9/27/1993	9/9/1994, 59 FR 46562.	
Subpart BB: Polystyrene Plants				
219.640	Applicability	9/27/1993	9/9/1994, 59 FR 46562.	
219.642	Emissions Limitation at Polystyrene Plants.	9/27/1993	9/9/1994, 59 FR 46562.	
219.644	Emissions Testing	9/27/1993	9/9/1994, 59 FR 46562.	
Subpart GG: Marine Terminals				
219.760	Applicability	10/25/1994	4/3/1995, 60 FR 16801.	
219.762	Control Requirements	10/25/1994	4/3/1995, 60 FR 16801.	
219.764	Compliance Certification	10/25/1994	4/3/1995, 60 FR 16801.	
219.766	Leaks	10/25/1994	4/3/1995, 60 FR 16801.	
219.768	Testing and Monitoring	10/25/1994	4/3/1995, 60 FR 16801.	
219.770	Recordkeeping and Reporting	10/25/1994	4/3/1995, 60 FR 16801.	
Subpart HH: Motor Vehicle Refinishing				
219.780	Emission Limitations	5/9/1995	7/25/1996, 61 FR 38577.	
219.782	Alternative Control Requirements	5/9/1995	7/25/1996, 61 FR 38577.	
219.784	Equipment Specifications	1/28/2013	10/6/2014, 79 FR 60070.	
219.786	Surface Preparation Materials	5/9/1995	7/25/1996, 61 FR 38577.	
219.787	Work Practices	5/9/1995	7/25/1996, 61 FR 38577.	
219.788	Testing	5/9/1995	7/25/1996, 61 FR 38577.	
219.789	Monitoring and Recordkeeping for Control Devices.	5/9/1995	7/25/1996, 61 FR 38577.	

EPA-APPROVED ILLINOIS REGULATIONS AND STATUTES—Continued

225.233	Multi-Pollutant Standard (MPS)	8/23/2019	6/25/2021, 86 FR 33527	Except (c), (d), and (i).
225.291	Combined Pollutant Standard: Purpose.	12/7/2015	2/28/2018, 83 FR 8612.	
225.292	Applicability of the Combined Pollutant Standard.	12/7/2015	2/28/2018, 83 FR 8612.	
225.293	Combined Pollutant Standard: Notice of Intent.	12/7/2015	2/28/2018, 83 FR 8612.	
225.295	Combined Pollutant Standard: Emission Standards for NO _x and SO ₂ .	12/7/2015	2/28/2018, 83 FR 8612 ...	Except (a)(4).
225.296	Combined Pollutant Standard: Control Technology Requirements for NO _x , SO ₂ , and PM Emissions.	12/7/2015	2/28/2018, 83 FR 8612 ...	Except (d).
Subpart C: Clean Air Act Interstate Rule (CAIR) SO₂ Trading Program				
225.300	Purpose	8/31/2007	10/16/2007, 72 FR 58528.	
225.305	Applicability	8/31/2007	10/16/2007, 72 FR 58528.	
225.310	Compliance Requirements	8/31/2007	10/16/2007, 72 FR 58528.	
225.315	Appeal Procedures	8/31/2007	10/16/2007, 72 FR 58528.	
225.320	Permit Requirements	8/31/2007	10/16/2007, 72 FR 58528.	
225.325	Trading Program	8/31/2007	10/16/2007, 72 FR 58528.	
Subpart D: CAIR NO_x Annual Trading Program				
225.400	Purpose	8/31/2007	10/16/2007, 72 FR 58528.	
225.405	Applicability	8/31/2007	10/16/2007, 72 FR 58528.	
225.410	Compliance Requirements	8/31/2007	10/16/2007, 72 FR 58528.	
225.415	Appeal Procedures	8/31/2007	10/16/2007, 72 FR 58528.	
225.420	Permit Requirements	8/31/2007	10/16/2007, 72 FR 58528.	
225.425	Annual Trading Budget	8/31/2007	10/16/2007, 72 FR 58528.	
225.430	Timing for Annual Allocations	8/31/2007	10/16/2007, 72 FR 58528.	
225.435	Methodology for Calculating Annual Allocations.	8/31/2007	10/16/2007, 72 FR 58528.	
225.440	Annual Allocations	8/31/2007	10/16/2007, 72 FR 58528.	
225.445	New Unit Set-Aside (NUSA)	8/31/2007	10/16/2007, 72 FR 58528.	
225.450	Monitoring, Recordkeeping and Reporting Requirements for Gross Electrical Output and Useful Thermal Energy.	8/31/2007	10/16/2007, 72 FR 58528.	
225.455	Clean Air Set-Aside (CASA)	8/31/2007	10/16/2007, 72 FR 58528.	
225.460	Energy Efficiency and Conservation, Renewable Energy, and Clean Technology Projects.	8/31/2007	10/16/2007, 72 FR 58528.	
225.465	Clean Air Set-Aside (CASA) Allowances.	8/31/2007	10/16/2007, 72 FR 58528.	
225.470	Clean Air Set-Aside (CASA) Applications.	8/31/2007	10/16/2007, 72 FR 58528.	
225.475	Agency Action on Clean Air Set-Aside (CASA) Applications.	8/31/2007	10/16/2007, 72 FR 58528.	
225.480	Compliance Supplement Pool	8/31/2007	10/16/2007, 72 FR 58528.	
Subpart E: CAIR NO_x Ozone Season Trading Program				
225.500	Purpose	8/31/2007	10/16/2007, 72 FR 58528.	
225.505	Applicability	8/31/2007	10/16/2007, 72 FR 58528.	
225.510	Compliance Requirements	8/31/2007	10/16/2007, 72 FR 58528.	
225.515	Appeal Procedures	8/31/2007	10/16/2007, 72 FR 58528.

Chapter II: Environmental Protection Agency					
Part 252: Public Participation in the Air Pollution Control Permit Program					
Subpart A: Introduction					
252.101	Purpose	6/10/2020	9/9/2021, 86 FR 50459.		
252.102	Abbreviations and Acronyms	6/10/2020	9/9/2021, 86 FR 50459.		
252.103	Definitions	6/10/2020	9/9/2021, 86 FR 50459.		
252.104	Applicability	6/10/2020	9/9/2021, 86 FR 50459.		
252.105	Application for a PSD Permit	6/10/2020	9/9/2021, 86 FR 50459.		
252.106	Consolidation	6/10/2020	9/9/2021, 86 FR 50459.		
Subpart B: Procedures for Public Review					
252.201	Notice and Opportunity to Comment	6/10/2020	9/9/2021, 86 FR 50459.		
252.202	Draft Permit	6/10/2020	9/9/2021, 86 FR 50459.		
252.203	Project Summary, Statement of Basis, or Fact Sheet.	6/10/2020	9/9/2021, 86 FR 50459.		
252.204	Availability of Documents	6/10/2020	9/9/2021, 86 FR 50459.		
252.205	Opportunity for Public Hearing	6/10/2020	9/9/2021, 86 FR 50459.		
252.206	Procedures for Public Hearings	6/10/2020	9/9/2021, 86 FR 50459.		
252.207	Obligation to Raise Issues and Provide Information During the Public Comment Period for PSD Permits.	6/10/2020	9/9/2021, 86 FR 50459.		
252.208	Reopening of the Public Comment Period for PSD Permits.	6/10/2020	9/9/2021, 86 FR 50459.		
252.209	Issuance of a Final PSD Permit Decision.	6/10/2020	9/9/2021, 86 FR 50459.		
252.210	Response to Comments for a Final PSD Permit Decision.	6/10/2020	9/9/2021, 86 FR 50459.		
252.211	Administrative Record for a Final PSD Permit Decision.	6/10/2020	9/9/2021, 86 FR 50459.		
Part 254: Annual Emissions Report					
Subpart A: General Provisions					
254.101	Purpose	7/17/2001	5/15/2002, 67 FR 34614.		
254.102	Applicability	4/20/2012	7/3/2013, 67 FR 40013.		
254.103	Definitions	7/17/2001	5/15/2002, 67 FR 34614.		
254.120	Applicable Pollutants for Annual Emissions Reporting.	7/17/2001	5/15/2002, 67 FR 34614.		
254.132	Failure To File a Complete Report ...	7/17/2001	5/15/2002, 67 FR 34614.		
254.133	Voluntary Submittal of Data	5/14/1993	5/15/2002, 67 FR 34614.		
254.134	Retention of Records	7/17/2001	5/15/2002, 67 FR 34614.		
254.135	Reporting of Errors	7/17/2001	5/15/2002, 67 FR 34614.		
254.136	Confidentiality and Trade Secret Protection.	7/17/2001	5/15/2002, 67 FR 34614.		
254.137	Reporting Schedule	7/17/2001	5/15/2002, 67 FR 34614.		
254.138	Issuance of Source Inventory Report	7/17/2001	5/15/2002, 67 FR 34614.

[82 FR 30638, June 30, 2017]

EDITORIAL NOTES: 1. For FEDERAL REGISTER citations affecting § 52.720, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

2. At 83 FR 50855, Oct. 10, 2018, § 52.720(c) was amended in part by revising entries for 201.103, 201.104, and 211.4720; however, the revisions could not be completed because those entries did not exist.

3. At 86 FR 54627, Oct. 4, 2021, § 52.720(c) was amended in part by adding entries for 243.120, 243.122, 243.123, 243.124, and 243.126 under the heading “Subpart B: Standards and Measurement Methods.” Those entries already existed, resulting in duplicate entries. At 89 FR 2885, Jan. 17, 2024, the duplicate entry for 243.122 in § 52.720(c) was removed, effective Feb. 16, 2024.

§ 52.721 Classification of regions.

The Illinois plan was evaluated on the basis of the following classifications:

Air quality control region	Pollutant				
	Particulate matter	Sulfur oxides	Nitrogen dioxide	Carbon monoxide	Ozone
Burlington-Keokuk Interstate	I	I	III	III	III
East Central Illinois Intrastate	III	II	III	III	III
Metropolitan Chicago Interstate (Indiana-Illinois)	I	I	I	I	I
Metropolitan Dubuque Interstate	I	III	III	III	III
Metropolitan Quad Cities Interstate	I	III	III	III	III
Metropolitan St. Louis Interstate (Missouri-Illinois)	I	I	III	I	I
North Central Illinois Intrastate	II	IA	III	III	III
Paducah (Kentucky)-Cairo (Illinois) Interstate	I	II	III	III	III
Rockford (Illinois)-Janesville-Beloit (Wisconsin) Interstate	II	III	III	III	III
Southeast Illinois Intrastate	III	II	III	III	III
West Central Illinois Intrastate	I	IA	III	III	III

[37 FR 10862, May 31, 1972, as amended at 39 FR 16346, May 8, 1974; 45 FR 11493, Feb. 21, 1980]

proved Illinois’ plan for the attainment and maintenance of the National Ambient Air Quality Standards under section 110 of the Clean Air Act. Furthermore, the Administrator finds the plan

§ 52.722 Approval status.

(a) With the exceptions set forth in this subpart, the Administrator ap-

satisfies all requirements of part D, title I of the Clean Air Act as amended in 1977, except as noted below. In addition, continued satisfaction of the requirements of part D for the ozone portion of the SIP depends on the adoption and submittal of RACT requirements by July 1, 1980, for the sources covered by CTGs between January 1978 and January 1979 and adoption and submittal by each subsequent January of additional RACT requirements for sources covered by CTGs issued by the previous January.

(b) The Administrator finds that the transportation control plans for the East St. Louis and Chicago areas submitted on December 3, 1982, satisfy the related requirements of part D, title I of the Clean Air Act, as amended in 1977.

(c) The Administrator finds that the carbon monoxide control strategy submitted on May 4, 1983, satisfies all requirements of part D, title I of the Clean Air Act, as amended in 1977, except for section 172(b)(6).

[55 FR 40661, Oct. 4, 1990]

§ 52.723 [Reserved]

§ 52.724 Control strategy: Sulfur dioxide.

(a) Part D—Conditional Approval—The Illinois plan is approved provided that the following condition is satisfied:

(1) The plan includes a reanalysis of the Pekin, Illinois area, a submittal of

the analysis results to USEPA, the proposal of any additional regulations to the Illinois Pollution Control Board necessary to insure attainment and maintenance of the sulfur dioxide standard, and the promulgation of any necessary regulations. The State must complete the reanalysis, submit the results to USEPA and submit any necessary, additional regulations to the Illinois Pollution Control Board by September 30, 1980. Any necessary regulation must be finally promulgated by the State and submitted to USEPA by September 30, 1981.

(2) Extension of Condition—USEPA approves the date of July 1, 1984 for submitting the draft sulfur dioxide rule revisions and supporting documentation as required in (a)(1) for Peoria, Hollis and Groveland Townships in Illinois. The State must complete final rule adoption as expeditiously as possible but no later than December 31, 1985.

(b) Part D—Disapproval—USEPA disapproves Rules 204(c)(1)(B), Rule 204(c)(1)(C), Rule 204(e)(1) and Rule 204(e)(2) for those sources for which these rules represent a relaxation of the federally enforceable State Implementation Plan. Rule 204(c)(1)(B), Rule 204(c)(1)(C), Rule 204(e)(1) and Rule 204(e)(2) are approved as not representing relaxations of the State Implementation Plan for the following sources:

SOURCES OF 10 MILLION BTU PER HOUR OR MORE NOT INCREASING ALLOWABLE SULFUR DIOXIDE EMISSIONS AS A RESULT OF RECORD RULES 204(c) AND 204(e) BECAUSE NEW ALLOWABLE EMISSIONS RATE IS SAME AS OR LESS THAN OLD ALLOWABLE RATE POUNDS PER HOUR (POUNDS PER MILLION BTU)

County	Name	Emissions formerly allowable ¹	Emissions now allowable without new permit application ²
Boone	Chrysler	1,760 (4.4)	1,760 (4.4)
Champaign	Chanute Air Base	1,317 (3.0)	1,317 (3.0)
Crawford	CIPS	8,242 (5.1)	8,242 (5.1)
Douglas	USI Chemicals	8,022 (5.3)	8,022 (5.3)
Fulton	Freeman Coal	22.2 (1.2)	22.2 (1.2)
La Salle	Del Monte	296 (3.9)	296 (3.9)
Massac	EEl Joppa	36,865 (3.6)	36,865 (3.6)
Montgomery	CIPS	55,555 (5.8)	55,555 (5.8)
Morgan	do	24,000 (6.0)	20,800 (5.2)
Putnam	Illinois Power	17,051 (5.8)	17,051 (5.8)
Randolph	do ³	81,339 (4.6)	81,339 (4.6)
Rock Island	International Harvester	1,643 (4.35)	1,643 (4.35)

Environmental Protection Agency

§ 52.725

SOURCES OF 10 MILLION BTU PER HOUR OR MORE NOT INCREASING ALLOWABLE SULFUR DIOXIDE EMISSIONS AS A RESULT OF RECORD RULES 204(c) AND 204(e) BECAUSE NEW ALLOWABLE EMISSIONS RATE IS SAME AS OR LESS THAN OLD ALLOWABLE RATE POUNDS PER HOUR (POUNDS PER MILLION BTU)—Continued

County	Name	Emissions formerly allowable ¹	Emissions now allowable without new permit application ²
Williamson	Marion Correctional	396 (5.7)	396 (5.7)

¹ 6.0 lbs/MMBTU of existing coal fired capacity or total 204(e)(2) emissions less actual oil fired and NSPS emissions, whichever is lower.

² Maximum allowable emissions for existing coal fired capacity according to revised rules 204(c) and 204(e) consolidated, usually equally equalling total emissions as given by 204(e)(2) less actual oil fired NSPS emissions. (In the one case wherein the new allowable limit is less than that given by 204(e)(2) the allowable emissions were determined by 204(e)(1) with which the source is required to comply.)

³ Source is in compliance per 204(e)(3).

CIPS = Central Illinois Public Service.

EEl = Electric Energy Incorporated.

This disapproval does not in and of itself result in the growth restrictions of section 110(a)(2)(1).

(c) Disapproval—USEPA disapproves Rule 204(e)(4) as not being adequate to protect the NAAQS. This disapproval does not in and of itself result in the growth restrictions of section 110(a)(2)(I).

(d) Disapproval—USEPA disapproves Rule 204(f)(1)(D) as completely deregulating SO₂ emissions from existing processes without providing an assessment of the ambient air quality impact or a showing that increasing the allowable emissions from these sources will not cause or contribute to violations of the NAAQS or PSD increments. This disapproval does not in and of itself result in the growth restrictions of section 110(a)(2)(I).

(e) Disapproval—USEPA disapproves Rule 204(h) for those sources for which USEPA has disapproved rules 204(c) and 204(e). This disapproval does not in and of itself result in the growth restrictions of section 110(a)(2)(I).

(f) Approval—USEPA approves rule 204(e)(3) for those sources able to show that the proposed emission rate will not cause or contribute to a violation of the NAAQS. The State must submit these emission limitations, along with the technical support to USEPA for approval.

(g) Part D—Approval—The State plan for Alton Township, Madison County, which consists of a federally Enforceable State Operating Permit controlling sulfur dioxide emissions from the boilers and reheat furnaces at Laclede

Steel, which was submitted on November 18, 1993, is approved.

(h) Approval—On November 10, 1994, the Illinois Environmental Protection Agency submitted a sulfur dioxide redesignation request and maintenance plan for Peoria and Hollis Townships in Peoria County and Groveland Township in Tazewell County to redesignate the townships to attainment for sulfur dioxide. The redesignation request and maintenance plan meet the redesignation requirements in section 107(d)(3)(d) of the Clean Air Act (Act) as amended in 1990.

[45 FR 62806, 62809, Sept. 22, 1980, as amended at 50 FR 5250, Feb. 7, 1985; 59 FR 18753, Apr. 20, 1994; 60 FR 17001, Apr. 4, 1995]

§ 52.725 Control strategy: Particulates.

(a) [Reserved]

(b) Part D—Disapproval. (1) U.S. EPA disapproves the provisions of Rule 203(f) which allow the use of an equivalent method without review and approval of that method. Any source subject to Rule 203(f) which chooses to use an equivalent method must have that equivalent method submitted to U.S. EPA and approved as a SIP revision.

(2) U.S. EPA disapproves the following portions of Rule 203(d)(5) which regulate the control of particulate matter from specific sources within the iron and steel industry: Rule 205(d)(5)(B)(ii), Rule 205(d)(5)(B)(iii), Rule 205(d)(5)(D), and Rule 205(d)(5)(K).

(3) USEPA disapproves a proposed SIP revision submitted by the State on May 12, 1982, in the form of a May 18,

1981 Consent Decree (Civil Action 81–3009) to which USEPA, Illinois Environmental Protection Agency and National Steel Corporation are parties and a draft Alternative Control Strategy Permit. This submission was modified by the State, September 30, 1982, with the submission of a separate document embodying the elements of the Alternative Control Strategy. This separate document was intended to become an enforceable part of the SIP.

(c) Approval—On September 28, 1988, the State of Illinois submitted a committal SIP for particulate matter with an aerodynamic diameter equal to or less than 10 micrometers (PM₁₀) for the Illinois Group II areas of concern in DuPage, Will, Rock Island, Macon, Randolph, and St. Clair Counties. The committal SIP contains all the requirements identified in the July 1, 1987, promulgation of the SIP requirements for PM₁₀ at 52 FR 24681.

(d) Approval—On June 2, 1995, and January 9, 1996, the State of Illinois submitted a maintenance plan for the particulate matter nonattainment portion of LaSalle County, and requested that it be redesignated to attainment of the National Ambient Air Quality Standard for particulate matter. The redesignation request and maintenance plan satisfy all applicable requirements of the Clean Air Act.

(e) Approval—On March 19, 1996, and October 15, 1996, Illinois submitted requests to redesignate the Granite City Particulate Matter (PM) nonattainment area to attainment status for the PM National Ambient Air Quality Standards (NAAQS), as well as a maintenance plan for the Granite City area to ensure continued attainment of the NAAQS. The redesignation request and maintenance plan satisfy all applicable requirements of the Clean Air Act.

(f) On November 14, 1995, May 9, 1996, and June 14, 1996, the State of Illinois submitted State Implementation Plan (SIP) revision requests to meet commitments related to the conditional approval of Illinois' May 15, 1992, SIP submittal for the Lake Calumet (SE Chicago), McCook, and Granite City, Illinois, Particulate Matter (PM) nonattainment areas. The EPA is approving the SIP revision request as it applies to the McCook PM nonattainment

area. For the McCook PM nonattainment area, all of the deficiencies of the May 15, 1992, submittal have been corrected.

(g) Approval—On May 5, 1992, November 14, 1995, May 9, 1996, June 14, 1996, February 3, 1997, October 16, 1997, October 21, 1997, February 1, 1999, and May 19, 1999, Illinois submitted SIP revision requests to meet the Part D particulate matter (PM) nonattainment plan requirements for the Lake Calumet, Granite City and McCook moderate PM nonattainment areas. The submittals include federally enforceable construction permit, application number 93040047, issued on January 11, 1999, to Acme Steel Company. The part D plans for these areas are approved.

(h) Approval—On August 2, 2005, the State of Illinois submitted a request to redesignate the Lyons Township (McCook), Cook County particulate matter nonattainment area to attainment of the NAAQS for particulate matter with an aerodynamic diameter less than or equal to a nominal 10 micrometers (PM-10). In its submittal, the State also requested that EPA approve the maintenance plan for the area into the Illinois PM SIP. The redesignation request and maintenance plan meet the redesignation requirements of the Clean Air Act.

(i) Approval—On August 2, 2005, and as supplemented on September 8, 2005, the State of Illinois submitted a request to redesignate the Lake Calumet (Southeast Chicago), Cook County particulate matter nonattainment area to attainment of the NAAQS for particulate matter with an aerodynamic diameter less than or equal to a nominal 10 micrometers (PM-10). In its submittal, the State also requested that EPA approve the maintenance plan for the area into the Illinois PM SIP. The redesignation request and maintenance plan meet the redesignation requirements of the Clean Air Act.

(j) *Determination of Attainment.* EPA has determined, as of November 27, 2009, that the Chicago-Gary-Lake County, IL-IN PM_{2.5} nonattainment area has attained the 1997 PM_{2.5} NAAQS. This determination, in accordance with 40 CFR 51.1004(c), suspends

the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, reasonable further progress, contingency measures, and other plan elements related to attainment of the standard for as long as this area continues to meet the 1997 PM_{2.5} NAAQS.

(k) Determination of attainment. EPA has determined, as of May 23, 2011, that the St. Louis (MO-IL) metropolitan 1997 PM_{2.5} nonattainment area has attained the 1997 PM_{2.5} NAAQS. This determination, in accordance with 40 CFR 51.1004(c), suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, reasonable further progress, contingency measures, and other plan elements related to attainment of the standards for as long as the area continues to meet the 1997 PM_{2.5} NAAQS. In addition, based upon review of the air quality data for the 3-year period 2007 to 2009, EPA has determined that the St. Louis (MO-IL) PM_{2.5} nonattainment area has attained the 1997 PM_{2.5} NAAQS by the applicable attainment date of April 5, 2010.

(l) Approval—The 1997 annual PM_{2.5} maintenance plan for the Illinois portion of the Chicago-Gary-Lake County, IL-IN nonattainment area (including Cook, DuPage, Kane, Lake, McHenry and Will Counties, Aux Sable and Goose Lake Townships in Grundy County, and Oswego Township in Kendall County) has been approved as submitted on October 15, 2010, and supplemented on September 16, 2011, and May 6, 2013. The maintenance plan establishes 2008 and 2025 motor vehicle emissions budgets for this area of 127,951 tons per year for NO_x and 5,100 tons per year for primary PM_{2.5} in 2008 and 44,224 tons per year for NO_x and 2,377 tons per year for primary PM_{2.5} in 2025.

(m) Illinois' 2002 NO_x, primary PM_{2.5}, SO₂, ammonia, and VOC emission inventories, as submitted on October 15, 2010, and supplemented on May 6, 2013, satisfy the emission inventory require-

ments of section 172(c)(3) of the Clean Air Act for the Chicago area.

[45 FR 11493, Feb. 21, 1980, as amended at 46 FR 44185, Sept. 3, 1981; 47 FR 26620, June 21, 1982; 48 FR 45246, Oct. 4, 1983; 49 FR 1905, Jan. 16, 1984; 55 FR 20266, May 16, 1990; 61 FR 41345, Aug. 8, 1996; 63 FR 11846, Mar. 11, 1998; 63 FR 47434, Sept. 8, 1998; 64 FR 37851, July 14, 1999; 70 FR 55545, 55549, Sept. 22, 2005; 74 FR 62249, Nov. 27, 2009; 76 FR 29656, May 23, 2011; 77 FR 38184, June 27, 2012; 78 FR 60706, Oct. 2, 2013]

§ 52.726 Control strategy: Ozone.

(a) Part D—Conditional Approval—The Illinois plan is approved provided that the following conditions are satisfied:

(1) [Reserved]

(2) The State conducts a study to demonstrate that the 75 percent overall control efficiency requirement in Rule 205(n) represents RACT, submits the results of the study to USEPA, and submits any necessary regulations representing RACT to the Illinois Pollution Control Board. The State must comply with these conditions by February 28, 1981. Any necessary regulations must be finally promulgated by the State and submitted to USEPA by February 28, 1982.

(3) Extension of Condition—USEPA approves the date of July 31, 1984 for the State of Illinois to satisfy the condition of approval to the ozone State Implementation Plan listed in paragraph (a)(2) of this section.

(b) Disapproval—USEPA disapproves the compliance schedule in Rule 205(j) as it applies to loading rack controls for all emission sources subject to Rule 205(b)(1), as approved by USEPA on May 31, 1972 which were required to be in compliance by December 31, 1973. This disapproval does not in and of itself result in the growth restrictions of section 110(a)(2)(I).

(c) *Negative Declarations—Stationary Source Categories.* The State of Illinois has certified to the satisfaction of USEPA that no sources are located in the nonattainment areas of the State which are covered by the following Control Technique Guidelines:

(1) High density polyethylene and polypropylene manufacturers.

(2) Vegetable oil processing sources with volatile organic compound emissions equal to or greater than 100 tons per year.

(d) Part D Disapproval—The Administrator finds that Illinois' ozone plan for Cook, Lake, DuPage and Kane Counties, which was required to be submitted by July 1, 1982, does not satisfy all the requirements of Part D, Title I of the Clean Air Act and, thus, is disapproved. No major new stationary source, of major modification of a stationary source, or volatile organic compounds may be constructed in Cook, Lake, DuPage or Kane Counties, unless the construction permit application is complete on or before November 16, 1988. This disapproval does not affect USEPA's approval (or conditional approval) of individual parts of Illinois' ozone plan, and they remain approved.

(e) Disapproval—The Administrator finds that the following State rules have not been demonstrated to be consistent with the reasonably available control technology requirements of section 172 of the Clean Air Act, as amended in 1977, and thus, are disapproved: subpart F, section 215.204(c); subpart F, section 215.206(b); subpart F, section 215.204(j)(4); subpart I; subpart AA; subpart PP; subpart QQ; subpart RR; subpart A, section 215.102; subpart T; subpart H, section 215.245; subpart F, section 215.207; and subpart A, section 215.107, all of title 35; Environmental Protection; subtitle B: Air Pollution; Chapter 1: Pollution Control Board of the Illinois Administrative Code (June 1989).

(f) On September 30, 1992, the State submitted rules regulating volatile organic compound emissions from gasoline dispensing facilities' motor vehicle fuel operations (Stage II vapor recovery rules) in the Chicago ozone nonattainment area. The Illinois Environmental Protection Agency Bureau of Air must as part of the program conduct inspections of facilities subject to this rule to ensure compliance with the applicable rules. These inspections will be conducted on an annual basis or an alternative schedule as approved in the USEPA Fiscal Year Inspection Program Plan.

(g) Approval—The Administrator approves the incorporation of the photochemical assessment ambient monitoring system submitted by Illinois on November 4, 1993, into the Illinois State Implementation Plan. This sub-

mittal satisfies 40 CFR 58.20(f) which requires the State to provide for the establishment and maintenance of photochemical assessment monitoring stations (PAMS) by November 12, 1993.

(h) Approval—On November 12, 1993, the Illinois Environmental Protection Agency submitted an ozone redesignation request and maintenance plan for Jersey County ozone nonattainment area and requested that Jersey County be redesignated to attainment for ozone. The redesignation request and maintenance plan meet the redesignation requirements in section 107(d)(3)(d) of the Act. The redesignation meets the Federal requirements of section 182(a)(1) of the Clean Air Act as a revision to the Illinois ozone State Implementation Plan for Jersey County.

(i) The base year (1990) ozone emission inventory requirement of section 182(a)(1) of the Clean Air Act, as amended in 1990, has been satisfied for the following Illinois ozone nonattainment areas: the Chicago nonattainment area—Cook, DuPage, Kane, Lake, Will and McHenry Counties, Aux Sable and Gooselake Townships in Grundy County, and Oswego Township in Kendall County; the Metro-East St. Louis nonattainment area—Madison, Monroe, and St. Clair Counties; and Jersey County.

(j) Approval—On July 14, 1994, Illinois submitted two of three elements required by section 182(d)(1)(A) of the Clean Air Amendments of 1990 to be incorporated as part of the vehicle miles traveled (VMT) State Implementation Plan intended to offset any growth in emissions from a growth in vehicle miles traveled. These elements are the offsetting of growth in emissions attributable to growth in VMT which was due November 15, 1992, and, transportation control measures (TCMs) required as part of Illinois' 15 percent reasonable further progress (RFP) plan which was due November 15, 1993. Illinois satisfied the first requirement by projecting emissions from mobile sources and demonstrating that no increase in emissions would take place. Illinois satisfied the second requirement by submitting the TCMs listed in Table 1 which are now approved into the Illinois SIP.

(k) Approval—EPA is approving the section 182(f) oxides of nitrogen (NO_x) reasonably available control technology (RACT), new source review (NSR), vehicle inspection/maintenance (I/M), and general conformity exemp-

tions for the Illinois portion of the Chicago-Gary-Lake County severe ozone nonattainment area as requested by the States of Illinois, Indiana, Michigan, and Wisconsin in a July 13, 1994 submittal. This approval does not

cover the exemption of NO_x transportation conformity requirements of section 176(c) for this area. Approval of these exemptions is contingent on the results of the final ozone attainment demonstration expected to be submitted in mid-1997. The approval will be modified if the final attainment demonstration demonstrates that NO_x emission controls are needed in the nonattainment area to attain the ozone standard in the Lake Michigan Ozone Study modeling domain.

(l) Approval—The United States Environmental Protection Agency is approving under section 182(b)(1) of the Clean Air Act the exemption of the Chicago severe, ozone nonattainment area from the build/no-build and less than-1990 interim transportation conformity oxides of nitrogen requirements as requested by the State of Illinois in a June 20, 1995 submittal. In light of the modeling completed thus far and considering the importance of the OTAG process and attainment plan modeling efforts, USEPA grants this NO_x waiver on a contingent basis. As the OTAG modeling results and control recommendations are completed in 1996, this information will be incorporated into attainment plans being developed by the LADCO States. When these attainment plans are submitted to USEPA in mid-1997, these new modeling analyses will be reviewed to determine if the NO_x waiver should be continued, altered, or removed. USEPA's rulemaking action to reconsider the initial NO_x waiver may occur simultaneously with rulemaking action on the attainment plans. The USEPA also reserves the right to require NO_x emission controls for transportation sources under section 110(a)(2)(D) of the Act if future ozone modeling demonstrates that such controls are needed to achieve the ozone standard in downwind areas. The Chicago severe ozone nonattainment area includes the Counties of Cook, DuPage, Grundy (Aux Sable and Gooselake Townships), Kane, Kendall (Oswego Township), Lake, McHenry, and Will.

(m) [Reserved]

(n) Negative declaration—Shipbuilding and ship repair industry. On October 11, 1996, the State of Illinois certified to the satisfaction of the

United States Environmental Protection Agency that no major sources categorized as part of the shipbuilding and ship repair industry are located in the Chicago, Illinois ozone nonattainment area which is comprised of Cook, DuPage, Kane, Lake, McHenry, Will Counties and Aux Sable and Goose Lake Townships in Grundy County and Oswego Township in Kendall County or the Metro-East, Illinois ozone nonattainment area which is comprised of Madison, Monroe, and St. Clair Counties.

(o) Negative declaration—Aerospace manufacturing and rework industry. On October 11, 1996, the State of Illinois certified to the satisfaction of the United States Environmental Protection Agency that no major sources categorized as part of the Aerospace Manufacturing and Rework Industry are located in the Chicago, Illinois ozone nonattainment area which is comprised of Cook, DuPage, Kane, Lake, McHenry, Will Counties and Aux Sable and Goose Lake Townships in Grundy County and Oswego Township in Kendall County or the Metro-East, Illinois ozone nonattainment area which is comprised of Madison, Monroe, and St. Clair Counties.

(p) Approval—On November 15, 1993, Illinois submitted 15 percent rate-of-progress and 3 percent contingency plans for the Chicago ozone nonattainment area as a requested revision to the Illinois State Implementation Plan. These plans satisfy sections 182(b)(1), 172(c)(9), and 182(c)(9) of the Clean Air Act, as amended in 1990.

(q) Approval—On November 15, 1993, Illinois submitted 15 percent rate-of-progress and 3 percent contingency plans for the Metro-East St. Louis ozone nonattainment area as a requested revision to the Illinois State Implementation Plan. These plans satisfy sections 182(b)(1) and 172(c)(9) of the Clean Air Act, as amended in 1990.

(r) Approval—On November 15, 1993, Illinois submitted the following transportation control measures as part of the 15 percent rate-of-progress and 3 percent contingency plans for the Metro-East ozone nonattainment area: Work trip reductions; transit improvements; and traffic flow improvements.

(s) On October 10, 1997, Illinois submitted a site-specific revision to the State Implementation Plan, in the form of a letter from Bharat Mathur, Chief, Bureau of Air, Illinois Environmental Protection Agency. This October 10, 1997, letter requests a change in regulatory status for Riverside Laboratories, Inc.'s Kane County facility, to reflect that the Federal site-specific rule for Riverside (40 CFR 52.741(e)(10)) has been superseded by the State of Illinois regulations, including the emission limits in 35 Illinois Administrative Code 218.204(c) and the associated control requirements, test methods and recordkeeping requirements in Part 218 and the associated definitions in part 211. These State regulations shall become the federally approved regulations applicable to Riverside on August 31, 1998. The site-specific rule, applicable to Riverside, promulgated by the Environmental Protection Agency on August 21, 1995 (40 CFR 52.741(e)(10)), remains in effect and is enforceable after August 31, 1998 for the period before August 31, 1998.

(t) The Illinois volatile organic compound (VOC) rules that apply to the Stepan Company Millsdale Plant for volatile organic liquid storage (35 Ill. Admin. Code Part 218, Subpart B), batch processing (35 Ill. Admin. Code Parts 218 and 219, Subpart V) and continuous reactor and distillation processes (35 Ill. Admin. Code Part 218, Subpart Q) were approved by the United States Environmental Protection Agency (USEPA) on August 8, 1996, April 2, 1996, and June 17, 1997, respectively. Because these rules have been approved into the State Implementation Plan and represent reasonably available control technology for VOC, USEPA revokes the June 29, 1990 Federal Implementation Plan as it applies to Stepan and replaces it with Illinois' volatile organic liquid storage, batch process, and continuous reactor and distillation process rules.

(u) Negative declaration—Industrial wastewater category. On October 2, 1998, the State of Illinois certified to the satisfaction of the United States Environmental Protection Agency that no major sources categorized as part of the Industrial wastewater category are located in the Metro-East ozone non-

attainment area (Metro-East). The Metro-East area is comprised of Madison, Monroe and St. Clair Counties which are located in southwest Illinois, adjacent to St. Louis, Missouri.

(v) Negative declaration—Industrial cleaning solvents category. On October 2, 1998, the State of Illinois certified to the satisfaction of the United States Environmental Protection Agency that no major sources categorized as part of the Industrial cleaning solvents category are located in the Metro-East ozone nonattainment area (Metro-East). The Metro-East area is comprised of Madison, Monroe and St. Clair Counties which are located in southwest Illinois, adjacent to St. Louis, Missouri.

(w) *Approval*—On December 18, 1997, December 17, 1999, January 14, 2000, and January 21, 2000, Illinois submitted a post-1996 Rate Of Progress Plan for the Chicago ozone nonattainment area as a requested revision to the Illinois State Implementation Plan. This plan reduces ozone precursor emissions by 9 percent from 1990 baseline emissions by November 15, 1999. This plan also supports a mobile source emissions budget of 279.3 tons/day of volatile organic compounds for transportation conformity purposes.

(x) *Approval*—On December 18, 1997, Illinois submitted a contingency measure plan as part of the Chicago Area post-1996 Rate of Progress Plan. This plan reduces volatile organic compound emissions in the Chicago ozone nonattainment area by 3 percent from 1990 baseline emissions by November 15, 1999.

(y) *Approval*—On December 18, 1997, Illinois submitted Transportation Control Measures (TCMs) as part of the post-1996 Rate Of Progress Plan for the Chicago ozone nonattainment area. The TCMs being approved are listed in the following documents published by the Chicago Area Transportation Study: "Transportation Control Measures Contribution to the Post-1996 Rate-Of-Progress State Implementation Plan," March 22, 1996; "Transportation Control Measures Contribution to the 9 percent Control Strategy State Implementation Plan," June 11, 1998; and "1999 Transportation Control Measures Contribution to the 9 percent

Rate of Progress Control Strategy State Implementation Plan," December 9, 1999.

(z) Negative declaration—Industrial cleaning solvents category. On December 23, 1999, the State of Illinois certified to the satisfaction of the United States Environmental Protection Agency that no major sources categorized as part of the industrial cleaning solvents category are located in the Chicago ozone nonattainment area. The Chicago ozone nonattainment area includes Cook County, DuPage County, Aux Sable and Goose Lake Townships in Grundy County, Kane County, Oswego Township in Kendall County, Lake County, McHenry County and Will County.

(aa) Negative declaration—Industrial wastewater category. On December 23, 1999, the State of Illinois certified to the satisfaction of the United States Environmental Protection Agency that no major sources categorized as part of the Industrial Wastewater Category are located in the Chicago ozone nonattainment area. The Chicago ozone nonattainment area includes Cook County, DuPage County, Aux Sable and Goose Lake Townships in Grundy County, Kane County, Oswego Township in Kendall County, Lake County, McHenry County and Will County.

(bb) Approval—Revisions to the SIP submitted by Illinois on November 15, 1999; February 10, 2000; April 13, 2001; and April 30, 2001. The revisions are for the purpose of satisfying the attainment demonstration requirements of section 182(c)(2)(A) of the Act for the Metro-East St. Louis area. The revision establishes an attainment date of November 15, 2004, for the St. Louis moderate ozone nonattainment area. This revision establishes MVEBs for 2004 of 26.62 TPD of VOC and 35.52 TPD of NO_x to be used in transportation conformity in the Metro-East St. Louis area until revised budgets pursuant to MOBILE6 are submitted and found adequate. In the revision, Illinois commits to revise its VOC and NO_x transportation conformity budgets within two years of the release of MOBILE6. No conformity determinations will be made during the second year following the release of MOBILE6 unless and until the MVEBs have been recal-

culated using MOBILE6 and found adequate by EPA. EPA is granting a waiver for the Metro East St. Louis area to the state of Illinois from the NO_x RACT requirements of the Act and disapproving the request for a waiver from the NO_x NSR and NO_x general conformity requirements. EPA is finding that the Contingency Measures identified by Illinois are adequate to meet the requirements of the Act. EPA finds that the Illinois SIP meets the requirements pertaining to RACM under the Act for the Metro-East St. Louis area.

(cc) Approval—Illinois has adopted and USEPA has approved sufficient NO_x emission regulations to assure that it will achieve the level of NO_x emissions budgeted for the State by USEPA. USEPA has made two minor budget revisions requested by Illinois, adding a boiler owned by LTV Steel and deleting a boiler owned by the University of Illinois from the inventory of large NO_x sources.

(dd) Chicago Ozone Attainment Demonstration Approval—On December 26, 2000, Illinois submitted a one-hour ozone attainment demonstration plan as a requested revision to the Illinois State Implementation Plan. This plan includes: A modeled demonstration of attainment and associated attainment year conformity emission budgets; a plan to reduce ozone precursor emissions by 3 percent per year from 2000 to 2007 (a post-1999 rate-of-progress plan), and associated conformity emission budgets; a contingency measures plan for both the ozone attainment demonstration and the post-1999 rate-of-progress plan; a commitment to conduct a Mid-Course Review of the ozone attainment demonstration by the end of 2004; a demonstration that Illinois has implemented all reasonably available control measures; and a commitment to revise motor vehicle emission budgets within two years after the U.S. Environmental Protection Agency officially releases the MOBILE6 emission factor model.

(ee) Approval of the Maintenance Plan for the Illinois Portion of the St. Louis Area—On December 30, 2002 Illinois submitted Maintenance Plan for the Illinois portion of the St. Louis Nonattainment Area. The plan includes

2014 On-Road Motor Vehicle Emission Budget of 10.13 tons per ozone season weekday of VOCs and 18.72 tons per ozone season weekday NO_x to be used in transportation conformity.

(ff) *Approval*—On April 11, 2003, Illinois submitted a revision to the ozone attainment plan for the Chicago severe 1-hour ozone nonattainment area. This plan revised the 2005 and 2007 Motor Vehicle Emissions Budgets (MVEB) recalculated using the emissions factor model MOBILE6. The approved motor vehicle emissions budgets are 151.11 tons per day VOC for 2005 and 127.42 tons per day VOC and 280.4 tons per day NO_x for 2007.

(gg) *Approval*—On January 30, 2007, the Illinois Environmental Protection Agency (IEPA) requested that EPA find that the Illinois portion of the Chicago-Gary-Lake County, Illinois-Indiana (IL-IN) nonattainment area, attained the revoked 1-hour ozone National Ambient Air Quality Standard (NAAQS). After review of this submission, EPA approves this finding.

(hh) *Disapproval*. EPA is disapproving 35 Illinois Administrative Code part 217, subpart X, Voluntary NO_x Emissions Reduction Program, as a revision to the Illinois SIP.

(ii) *Approval*. EPA is approving a July 29, 2010, request from the State of Illinois for a waiver from the Clean Air Act requirement for Oxides of Nitrogen (NO_x) Reasonably Available Control Technology (RACT) in the Illinois portions of the Chicago-Gary-Lake County, Illinois-Indiana (Cook, DuPage, Kane, Lake, McHenry, and Will Counties, and portions of Grundy (Aux Sable and Goose Lake Townships) and Kendall (Oswego Township) Counties in Illinois) and St. Louis, Missouri-Illinois (Jersey, Madison, Monroe, and St. Clair Counties in Illinois) 1997 8-hour ozone nonattainment areas.

(jj) *Determination of attainment*. On June 5, 2009, the state of Indiana requested that EPA find that the Indiana portion of the Chicago-Gary-Lake County, Illinois-Indiana (IL-IN) ozone nonattainment area has attained the 1997 8-hour ozone National Ambient Air Quality Standard (NAAQS). After review of Indiana's submission and 2006–2008 ozone air quality data for this ozone nonattainment area, EPA finds

that the entire Chicago-Gary-Lake County, IL-IN area has attained the 1997 8-hour ozone NAAQS. Therefore, EPA has determined, as of March 12, 2010, that Cook, DuPage, Kane, Lake, McHenry, and Will Counties, and portions of Grundy County (Aux Sable and Goose Lake Townships) and Kendall County (Oswego Township) in Illinois have attained the 1997 8-hour ozone standard.

(kk) *Determination of attainment*. EPA has determined, as of June 9, 2011, that the St. Louis (MO-IL) metropolitan 1997 8-hour ozone nonattainment area has attained the 1997 8-hour ozone NAAQS. This determination, in accordance with 40 CFR 51.918, suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, reasonable further progress, contingency measures, and other plan elements related to attainment of the standards for as long as the area continues to meet the 1997 Ozone NAAQS. In addition, based upon EPA's review of the air quality data for the 3-year period 2007 to 2009, the St. Louis (MO-IL) ozone nonattainment area has attained the 1997 8-hour ozone NAAQS by the applicable attainment date of June 15, 2010.

(ll) *Approval*—On May 26, 2010, and September 16, 2011, Illinois submitted a request to redesignate the Illinois portion of the St. Louis, MO-IL area to attainment of the 1997 8-hour ozone standard. The St. Louis area includes Jersey, Madison, Monroe, and St. Clair Counties in Illinois and St. Louis City and Franklin, Jefferson, St. Charles and St. Louis Counties in Missouri. As part of the redesignation request, the State submitted a plan for maintaining the 1997 8-hour ozone standard through 2025 in the area as required by section 175A of the Clean Air Act. Part of the section 175A maintenance plan includes a contingency plan. The ozone maintenance plan establishes 2008 motor vehicle emissions budgets for the Illinois portion of the St. Louis area of 17.27 tpd for volatile organic compounds (VOC) and 52.57 tpd for nitrogen oxides (NO_x). In addition the maintenance plan establishes 2025 motor vehicle

Environmental Protection Agency

§ 52.730

emissions budgets for the Illinois portion of the St. Louis area of 5.68 tpd for VOC and 15.22 tpd for NO_x.

(mm) *Emissions inventories for the 1997 8-hour ozone standard*—

(1) *Approval*—Illinois' 2002 emissions inventory satisfies the emissions inventory requirements of section 182(a)(1) of the Clean Air Act for the Illinois portion of the St. Louis, MO-IL area under the 1997 8-hour ozone standard.

(2) *Approval*—Illinois' 2002 volatile organic compounds and nitrogen oxides emission inventories satisfy the emissions inventory requirements of section 182(a)(1) of the Clean Air Act for the Illinois portion of the Chicago-Gary-Lake County, Illinois-Indiana area under the 1997 8-hour ozone standard.

(nn) *Approval*—On July 23, 2009, and September 16, 2011, Illinois submitted a request to redesignate the Illinois portion of the Chicago-Gary-Lake County, Illinois-Indiana area to attainment of the 1997 8-hour ozone standard. The Illinois portion of the Chicago-Gary-Lake County, Illinois-Indiana area includes Cook, DuPage, Kane, Lake, McHenry, and Will Counties and portions of Grundy (Aux Sable and Goose Lake Townships) and Kendall (Oswego Township) Counties. As part of the redesignation request, the State submitted a plan for maintaining the 1997 8-hour ozone standard through 2025 in the area as required by section 175A of the Clean Air Act. Part of the section 175A maintenance plan includes a contingency plan. The ozone maintenance plan establishes 2008 motor vehicle emissions budgets for the Illinois portion of the Chicago-Gary-Lake County, Illinois-Indiana area of 117.23 tons per day (tpd) for volatile organic compounds (VOC) and 373.52 tpd for nitrogen oxides (NO_x). In addition, the maintenance plan establishes 2025 motor vehicle emissions budgets for the Illinois portion of the Chicago-Gary-Lake County, Illinois-Indiana area of 48.13 tpd for VOC and 125.27 tpd for NO_x.

(oo) *Approval*—On March 28, 2014, the State of Illinois submitted a revision to its State Implementation Plan for the Illinois portion of the Chicago-Gary-Lake County, Illinois-Indiana

area (the Greater Chicago Area). The submittal established new Motor Vehicle Emissions Budgets (MVEB) for Volatile Organic Compounds (VOC) and Oxides of Nitrogen (NO_x) for the year 2025. The MVEBs for the Illinois portion of the Greater Chicago Area are: 60.13 tons/day of VOC emissions and 150.27 tons/day of NO_x emissions for the year 2025.

(pp) On September 3, 2014, Illinois submitted 2011 volatile organic compounds and oxides of nitrogen emission inventories for the Illinois portions of the Chicago-Naperville, Illinois-Indiana-Wisconsin and St. Louis, Missouri-Illinois nonattainment areas for the 2008 ozone national ambient air quality standard as a revision of the Illinois state implementation plan. The emission inventories are approved as a revision of the state's implementation plan.

(qq) *Determination of attainment*. As required by section 181(b)(2)(A) of the Clean Air Act, EPA has determined that the St. Louis, MO-IL marginal 2008 ozone nonattainment area has attained the NAAQS by the applicable attainment date of July 20, 2016.

[45 FR 55197, Aug. 19, 1980]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.726, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

§ 52.727 [Reserved]

§ 52.728 **Control strategy: Nitrogen dioxide.** [Reserved]

§ 52.729 [Reserved]

§ 52.730 **Compliance schedules.**

(a) The requirements of § 51.262(a) of this chapter are not met since compliance schedules with adequate increments of progress have not been submitted for every source for which they are required.

(b) Federal compliance schedules. (1) Except as provided in paragraph (b)(3) of this section, the owner or operator of any stationary source subject to the following emission limiting regulations in the Illinois implementation plan shall comply with the applicable compliance schedule in paragraph (b)(2) of

this section: Illinois Air Pollution Control Regulations Rule 203(d)(4), 203(d)(6)(B)(ii)(bb), 203(g)(1)(B), 203(g)(2), 203(g)(3), 203(g)(4), 204(c)(1)(A), 204(c)(2), 204(d), and 204(e).

(2) *Compliance schedules.* (i) The owner or operator of any stationary source subject to Illinois Air Pollution Control Regulation Rule 203(d)(4) shall take the following actions with respect to the source no later than the date specified.

(a) September 30, 1973—Advertise for bids for purchase and construction or installation of equipment, or for materials requisite for process modification sufficient to control particulate emissions from the source.

(b) November 15, 1973—Award contracts for emission control systems or process modification, or issue orders for the purchase of component parts to accomplish emission control or process modification.

(c) May 31, 1974—Initiate onsite construction or installation of emission control system or process modification.

(d) March 31, 1975—Complete onsite construction or installation of emission system or process modification.

(e) May 31, 1975—Complete shake-down operation and performance test on source, submit performance test results to the Administrator; achieve full compliance with State agency regulation.

(ii) The owner or operator of any stationary source subject to Illinois Air Pollution Control Regulation Rule 203(d)(6)(B)(ii)(bb) shall take the following actions with respect to the source no later than the date specified.

(a) September 30, 1973—Advertise for bids for purchase and construction or for modification of equipment sufficient to control particulate emissions from the source.

(b) November 15, 1973—Award contracts for emissions control systems or process modification, or issue orders for the purchase of component parts to accomplish emission control or process modification.

(c) March 31, 1974—Initiate onsite construction or installation of emission control system.

(d) October 31, 1974—Complete onsite construction or installation of emission control system.

(e) December 31, 1974—Achieve final compliance with Illinois Air Pollution Control Regulations Rule 203(d)(6)(B)(ii)(bb).

(iii) (a) The owner or operator of any boiler or furnace of more than 250 million BTU per hour heat input subject to Illinois Air Pollution Control Regulation Rule 204(c)(1)(A), 204(c)(2), 204(d), and 204(e) shall notify the Administrator, no later than October 1, 1973, of his intent to utilize either low-sulfur fuel or stack gas desulfurization to the requirements of said regulation.

(b) Any owner or operator of a stationary source subject to paragraph (b)(2)(iii)(a) of this section who elects to utilize low sulfur fuel shall take the following actions with respect to the source no later than the date specified.

(1) November 1, 1973—Submit to the Administrator a projection of the amount of fuel, by types, that will be substantially adequate to enable compliance with Illinois Air Pollution Control Regulations Rule 204(c)(1)(A), 204(c)(2), 204(d), and 204(e) on May 31, 1975, and for at least one year thereafter.

(2) December 31, 1973—Sign contracts with fuel suppliers for fuel requirements as projected above.

(3) January 31, 1974—Submit a statement as to whether boiler modifications will be required. If modifications will be required, submit plans for such modifications.

(4) March 15, 1974—Let contracts for necessary boiler modifications, if applicable.

(5) June 15, 1974—Initiate onsite modifications, if applicable.

(6) March 31, 1975—Complete onsite modifications, if applicable.

(7) May 31, 1975—Final compliance with the emission limitation of Rules 204(c)(1)(A), 204(c)(2), 204(d), and 204(e).

(c) Any owner or operator of a fuel combustion source subject to paragraph (b)(2)(iii)(a) of this section who elects to utilize stack gas desulfurization shall take the following actions with respect to the source no later than the date specified.

(1) November 1, 1973—Let necessary contracts for construction.

(2) March 31, 1974—Initiate onsite construction.

Environmental Protection Agency

§ 52.730

(3) March 31, 1975—Complete onsite construction.

(4) May 31, 1975—Complete shake-down operations and performance test on source, submit performance test results to the Administrator; achieve full compliance with Rule 204(c)(1)(A), 204(c)(2), 204(d), and 204(e).

(iv) (a) The owner or operator of any stationary source subject to Illinois Air Pollution Control Regulations Rule 203(g)(1)(B), 203(g)(2), 203(g)(3), and 203(g)(4) shall notify the Administrator, no later than October 1, 1973, of his intent to utilize either low ash fuel or a stack gas cleaning system to meet the requirements of said regulation.

(b) Any owner or operator of a stationary source subject to paragraph (b)(2)(iv)(a) of this section who elects to utilize low ash fuel shall take the following actions with respect to the source no later than the date specified.

(1) November 1, 1973—Submit to the Administrator a projection of the amount of fuel, by types, that will be substantially adequate to enable compliance with Illinois Air Pollution Control Regulations Rule 203(g)(1)(B), 203(g)(2), 203(g)(3), and 203(g)(4) on May 31, 1975, and for at least one year thereafter.

(2) December 31, 1973—Sign contracts with fuel suppliers for fuel requirements as projected above.

(3) January 31, 1974—Submit a statement as to whether boiler modifications will be required. If modifications will be required, submit plans for such modifications.

(4) March 15, 1974—Let contracts for necessary boiler modifications, if applicable.

(5) June 15, 1974—Initiate onsite modifications, if applicable.

(6) March 31, 1975—Complete onsite modifications, if applicable.

(7) May 31, 1975—Final compliance with the emission limitation of Rule 203(g)(1)(B), 203(g)(2), 203(g)(3), and 203(g)(4).

(c) Any owner or operator of a stationary source subject to paragraph (b)(2)(iv)(a) of this section who elects to utilize a stack gas cleaning system shall take the following actions with respect to the source no later than the date specified.

(1) January 15, 1974—Let necessary contracts for construction.

(2) April 1, 1974—Initiate onsite construction.

(3) April 1, 1975—Complete onsite construction.

(4) May 31, 1975—Complete shake-down operations and performance tests on source, submit performance test results to the Administrator; achieve full compliance with Rule 203(g)(1)(B), 203(g)(2), 203(g)(3), and 203(g)(4).

(v) Ten days prior to the conduct of any performance test required by this paragraph, the owner or operator of the affected source shall give notice of such test to the Administrator to afford him the opportunity to have an observer present.

(vi) Any owner or operator subject to a compliance schedule above shall certify to the Administrator, within five days after the deadline for each increment of progress in that schedule, whether or not the increment has been met.

(3)(i) None of the above paragraphs shall apply to a source which is presently in compliance with applicable regulations and which has certified such compliance to the Administrator by October 1, 1973. The Administrator may request whatever supporting information he considers necessary for proper certification.

(ii) Any compliance schedule adopted by the State and approved by the Administrator shall satisfy the requirements of this paragraph for the affected source.

(iii) Any owner or operator subject to a compliance schedule in this paragraph may submit to the Administrator no later than October 1, 1973, a proposed alternative compliance schedule. No such compliance schedule may provide for final compliance after the final compliance date in the applicable compliance schedule of this paragraph. If promulgated by the Administrator, such schedule shall satisfy the requirements of this paragraph for the affected source.

(4) Nothing in this paragraph shall preclude the Administrator from promulgating a separate schedule for any source to which the application of the compliance schedules in paragraph (b)(2) of this section fail to satisfy the

§ 52.730

40 CFR Ch. I (7–1–25 Edition)

requirements of §§ 51.261 and 51.262(a) of this chapter.

(c) [Reserved]

(d) The compliance schedules for the sources identified below are dis-

approved as not meeting the requirements of subpart N of this chapter. All regulations cited are air pollution control regulations of the State, unless otherwise noted.

Source	Location	Regulation involved	Date schedule adopted
CHRISTIAN COUNTY			
Allied Mills, Inc	Taylorville	204(c)	Feb. 28, 1973.

VERMILION COUNTY			
Lauhoff Grain Co	Danville	204(c)	Mar. 31, 1973.

[38 FR 16145, June 20, 1973, as amended at 38 FR 22742, Aug. 23, 1973; 38 FR 24342, Sept. 7, 1973; 39 FR 28155, Aug. 5, 1974; 51 FR 40675, 40676, 40677, Nov. 7, 1986; 54 FR 25258, June 14, 1989]

§ 52.731 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of nitrogen oxides?

(a)(1) The owner and operator of each source and each unit located in the State of Illinois and for which requirements are set forth under the CSAPR NO_x Annual Trading Program in subpart AAAAA of part 97 of this chapter must comply with such requirements. The obligation to comply with such requirements will be eliminated by the promulgation of an approval by the Administrator of a revision to Illinois' State Implementation Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan under § 52.38(a), except to the extent the Administrator's approval is partial or conditional.

(2) Notwithstanding the provisions of paragraph (a)(1) of this section, if, at the time of the approval of Illinois' SIP revision described in paragraph (a)(1) of this section, the Administrator has already started recording any allocations of CSAPR NO_x Annual allowances under subpart AAAAA of part 97 of this chapter to units in the State for a control period in any year, the provisions of subpart AAAAA of part 97 of this chapter authorizing the Administrator to complete the allocation and recordation of CSAPR NO_x Annual allowances to units in the State for each such control period shall continue to apply, unless provided otherwise by such approval of the State's SIP revision.

(b)(1) The owner and operator of each source and each unit located in the State of Illinois and for which requirements are set forth under the CSAPR NO_x Ozone Season Group 1 Trading Program in subpart BBBBB of part 97 of this chapter must comply with such requirements with regard to emissions occurring in 2015 and 2016.

(2) The owner and operator of each source and each unit located in the State of Illinois and for which requirements are set forth under the CSAPR NO_x Ozone Season Group 2 Trading Program in subpart EEEEE of part 97 of this chapter must comply with such requirements with regard to emissions occurring in 2017 through 2020.

(3) The owner and operator of each source and each unit located in the

State of Illinois and for which requirements are set forth under the CSAPR NO_x Ozone Season Group 3 Trading Program in subpart GGGGG of part 97 of this chapter must comply with such requirements with regard to emissions occurring in 2021 and each subsequent year. The obligation to comply with such requirements will be eliminated by the promulgation of an approval by the Administrator of a revision to Illinois' State Implementation Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan (FIP) under § 52.38(b)(1) and (b)(2)(iii), except to the extent the Administrator's approval is partial or conditional.

(4) Notwithstanding the provisions of paragraph (b)(3) of this section, if, at the time of the approval of Illinois' SIP revision described in paragraph (b)(3) of this section, the Administrator has already started recording any allocations of CSAPR NO_x Ozone Season Group 3 allowances under subpart GGGGG of part 97 of this chapter to units in the State for a control period in any year, the provisions of subpart GGGGG of part 97 of this chapter authorizing the Administrator to complete the allocation and recordation of CSAPR NO_x Ozone Season Group 3 allowances to units in the State for each such control period shall continue to apply, unless provided otherwise by such approval of the State's SIP revision.

(5) Notwithstanding the provisions of paragraph (b)(2) of this section, after 2020 the provisions of § 97.826(c) of this chapter (concerning the transfer of CSAPR NO_x Ozone Season Group 2 allowances between certain accounts under common control), the provisions of § 97.826(d) of this chapter (concerning the conversion of amounts of unused CSAPR NO_x Ozone Season Group 2 allowances allocated for control periods before 2021 to different amounts of CSAPR NO_x Ozone Season Group 3 allowances), and the provisions of § 97.811(d) of this chapter (concerning the recall of CSAPR NO_x Ozone Season Group 2 allowances equivalent in quantity and usability to all such allowances allocated to units in the State for control periods after 2020) shall continue to apply.

§ 52.732

(6) Notwithstanding any other provision of this part, the effectiveness of paragraph (b)(3) of this section is stayed with regard to emissions occurring in 2024 and thereafter, provided that while such stay remains in effect, the provisions of paragraph (b)(2) of this section shall apply with regard to such emissions.

(c)(1) The owner and operator of each source located in the State of Illinois and for which requirements are set forth in § 52.40 and § 52.41, § 52.42, § 52.43, § 52.44, § 52.45, or § 52.46 must comply with such requirements with regard to emissions occurring in 2026 and each subsequent year.

(2) Notwithstanding any other provision of this part, the effectiveness of paragraph (c)(1) of this section is stayed.

[77 FR 75384, Dec. 20, 2012, as amended at 81 FR 74586 and 74594, Oct. 26, 2016; 83 FR 65924, Dec. 21, 2018; 86 FR 23174, Apr. 30, 2021; 88 FR 36890, June 5, 2023; 89 FR 87969, Nov. 6, 2024]

§ 52.732 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of sulfur dioxide?

(a) The owner and operator of each source and each unit located in the State of Illinois and for which requirements are set forth under the CSAPR SO₂ Group 1 Trading Program in subpart CCCCC of part 97 of this chapter must comply with such requirements. The obligation to comply with such requirements will be eliminated by the promulgation of an approval by the Administrator of a revision to Illinois' State Implementation Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan under § 52.39, except to the extent the Administrator's approval is partial or conditional.

(b) Notwithstanding the provisions of paragraph (a) of this section, if, at the time of the approval of Illinois' SIP revision described in paragraph (a) of this section, the Administrator has already started recording any allocations of CSAPR SO₂ Group 1 allowances under subpart CCCCC of part 97 of this chapter to units in the State for a control period in any year, the provisions of subpart CCCCC of part 97 of this chapter authorizing the Administrator to

40 CFR Ch. I (7–1–25 Edition)

complete the allocation and recordation of CSAPR SO₂ Group 1 allowances to units in the State for each such control period shall continue to apply, unless provided otherwise by such approval of the State's SIP revision.

[76 FR 48364, Aug. 8, 2011. Redesignated at 77 FR 10334, Feb. 21, 2012, as amended at 81 FR 74586, Oct. 26, 2016]

§§ 52.733–52.735 [Reserved]

§ 52.736 Review of new sources and modifications.

(a) [Reserved]

(b) The rules submitted by the State on March 24, 1988, to satisfy the requirements of the Clean Air Act are approved. These rules are part 203: Major Stationary Sources Construction and Modification as effective March 22, 1991. The moratorium on construction and modification of new sources in nonattainment areas as provided in section 110(a)(2)(I) of the Clean Air Act is revoked.

[57 FR 59935, Dec. 17, 1992]

§ 52.737 Operating permits.

Emission limitation and other provisions contained in operating permits issued by the State in accordance with the provisions of the federally approved permit program shall be the applicable requirements of the federally approved Illinois SIP for the purpose of section 113 of the Clean Air Act and shall be enforceable by USEPA and by any person in the same manner as other requirements of the SIP. USEPA reserves the right to deem an operating permit not federally enforceable. Such a determination will be made according to appropriate procedures, and be based upon the permit, permit approval procedures or permit requirements which do not conform with the operating permit program requirements or the requirements of USEPA's underlying regulations.

[57 FR 59936, Dec. 17, 1992]

§ 52.738 Significant deterioration of air quality.

(a) The requirements of sections 160 through 165 of the Clean Air Act are met, except for sources seeking permits to locate in Indian reservations

Environmental Protection Agency

§ 52.741

within the State of Illinois, and any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction.

(b) The provisions of § 52.21 except paragraph (a)(1) are hereby incorporated and made a part of the applicable State plan for the State of Illinois for sources seeking permits to locate in Indian reservations or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction.

(c) All applications and other information required pursuant to § 52.21 from sources located in the State of Illinois shall be submitted to the state agency, Illinois Environmental Protection Agency, 1021 North Grand Avenue East, Springfield, Illinois 62794.

[45 FR 52741, Aug. 7, 1980, as amended at 46 FR 9584, Jan. 29, 1981; 68 FR 11323, Mar. 10, 2003; 68 FR 74489, Dec. 24, 2003; 75 FR 55275, Sept. 10, 2010; 86 FR 50470, Sept. 9, 2021]

§ 52.739 Permit fees.

(a) The requirements of section 110(a)(2)(K) of the Clean Air Act as amended in 1977 are not met since the state has not submitted to EPA, as a part of its State Implementation Plan, provisions for a permit fee system.

[46 FR 23237, Apr. 24, 1981]

§ 52.740 Interstate pollution.

(a) The requirements of section 126(a)(2) of the Clean Air Act as amended in 1977 are not met since the state has not submitted to EPA, as a part of its State Implementation Plan, the procedures on which the state is relying to notify nearby states of any proposed major stationary source which may significantly contribute to levels of air pollution in excess of the National Ambient Air Quality Standards in that state.

[46 FR 23237, Apr. 24, 1981]

§ 52.741 Control strategy: Ozone control measures for Cook, DuPage, Kane, Lake, McHenry and Will Counties.

(a) *General Provisions—(1) Abbreviations and conversion factors.* (i) The following abbreviations are used in § 52.741:

ASTM American Society for Testing and Materials
bbl barrels (42 gallons)
°C degrees Celsius or centigrade
cm centimeters
cu in. cubic inches
°F degrees Fahrenheit
FIP Federal implementation plan
ft feet
ft² square feet
g grams
gpm gallons per minute
g/mole grams per mole
gal gallons
hr hours
in inches
K degrees Kelvin
kcal kilocalories
kg kilograms
kg/hr kilograms per hour
kPa kilopascals; one thousand newtons per square meter
l liters
l/sec liters per second
lbs pounds
lbs/hr pounds per hour
lbs/gal pounds per gallon
LEL lower explosive limit
m meters
m² square meters
m³ cubic meters
mg milligrams
Mg Megagrams, metric tons or tonnes
ml milliliters
min minutes
MJ megajoules
mm Hg millimeters of mercury
ppm parts per million
ppmv parts per million by volume
psi pounds per square inch
psia pounds per square inch absolute
psig pounds per square inch gauge
scf standard cubic feet
scm standard cubic meters
sec seconds
SIP State implementation plan
sq cm square centimeters
sq in square inches
USEPA United States Environmental Protection Agency
VOC volatile organic compounds
VOL volatile organic liquids
VOM volatile organic materials

(ii) The following conversion factors are used in § 52.741.

English	Metric
1 gal	3.785 l.
1,000 gal	3,785 l or 3.785 m ³ .
1 psia	6.897 kPa (51.71 mm Hg).
2.205 lbs	1 kg.
1 bbl	159.0 l.
1 cu in	16.39 ml.
1 lb/gal	119,800 mg/l.
1 ton	0.907 Mg.

§ 52.741

40 CFR Ch. I (7–1–25 Edition)

(2) *Applicability.* (i) Any source that received a stay, as indicated in § 218.103(a)(2), remains subject to the stay if still in effect, or (if the stay is no longer in effect) the federally-promulgated or federally-approved rule applicable to such source.

(ii)(A) Effective November 20, 1996 Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources, Part 211: Definitions and General Provisions, and Part 218: Organic Material Emission Standards and Limitations for the Chicago Area replace the requirements of 40 CFR 52.741 Control strategy: Ozone control measures for Cook, DuPage, Kane, Lake, McHenry and Will County as the federally enforceable control measures in these counties for the major non-Control Technique Guideline (CTG) sources in the Chicago area, previously subject to paragraph u, v, w, or x because of the applicability criteria in these paragraphs.

(B) In accordance with § 218.101(b), for the major non-CTG sources subject to paragraphs u, v, w, or x because of the applicability criteria of those paragraphs, the requirements of paragraphs u, v, w, and x, and the recordkeeping requirements in paragraph y and any related parts of § 52.741 necessary to implement these paragraphs (including, but not limited to, those paragraphs containing test methods and definitions), shall remain in effect and are enforceable after November 20, 1996 for the period from July 30, 1990 until November 20, 1996.

(iii)(A) Except as provided in paragraphs (a)(2) (i) and (ii) of this section, effective October 11, 1994, Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources, Part 211: Definitions and General Provisions, and Part 218: Organic Material Emission Standards and Limitations for the Chicago Area replace the requirements of this § 52.741 Control strategy: Ozone control measures for Cook, DuPage, Kane, Lake, McHenry and Will County as the federally en-

forceable control measures in these counties.

(B) In accordance with § 218.101(b), the requirements of § 52.741 shall remain in effect and are enforceable after October 11, 1994, for the period from July 30, 1990, to October 11, 1994.

(3) *Definitions.* The following terms are defined for the purpose of § 52.741.

NOTE: The Federal definitions supersede the State definitions for these terms, which were previously approved by USEPA as part of the SIP. The federally approved definitions for all other terms remain in effect and applicable to these Federal rules.

Accelacota means a pharmaceutical coating operation which consists of a horizontally rotating perforated drum in which tablets are placed, a coating is applied by spraying, and the coating is dried by the flow of air across the drum through the perforations.

Accumulator means the reservoir of a condensing unit receiving the condensate from a surface condenser.

Actual emissions means the actual quantity of VOM emissions from an emission source during a particular time period.

Adhesive means any substance or mixture of substances intended to serve as a joining compound.

Administrator means the Administrator of the USEPA or that person's designee.

Afterburner means a control device in which materials in gaseous effluent are combusted.

Air contaminant means any solid, liquid, or gaseous matter, any odor, or any form of energy, that is capable of being released into the atmosphere from an emission source.

Air dried coatings means any coatings that dry by use of air or forced air at temperatures up to 363.15 K (194 °F).

Air pollution means the presence in the atmosphere of one or more air contaminants in sufficient quantities and of such characteristics and duration as to be injurious to human, plant, or animal life, to health, or to property, or to unreasonably interfere with the enjoyment of life or property.

Air pollution control equipment means any equipment or facility of a type intended to eliminate, prevent, reduce or control the emission of specified air contaminants to the atmosphere.

Air suspension coater/dryer means a pharmaceutical coating operation which consists of vertical chambers in which tablets or particles are placed, and a coating is applied and then dried while the tablets or particles are kept in a fluidized state by the passage of air upward through the chambers.

Air-assisted airless spray means a spray coating method which combines compressed air with hydraulic pressure to atomize the coating material into finer droplets than is achieved with pure airless spray. Lower hydraulic pressure is used than with airless spray.

Airless spray means a spray coating method in which the coating is atomized by forcing it through a small opening at high pressure. The coating liquid is not mixed with air before exiting from the nozzle.

Allowable emissions means the quantity of VOM emissions during a particular time period from a stationary source calculated using the maximum rated capacity of the source (unless restricted by federally enforceable limitations on operating rate, hours of operation, or both) and the most stringent of:

(A) The applicable standards in 40 CFR parts 60 and 61;

(B) The applicable implementation plan; or

(C) A federally enforceable permit.

Ambient air quality standards means those standards designed to protect the public health and welfare codified in 40 CFR part 50 and promulgated from time to time by the USEPA pursuant to authority contained in Section 108 of the Clean Air Act, 42 U.S.C. 7401 *et seq.*, as amended from time to time.

Applicator means a device used in a coating line to apply coating.

As applied means the exact formulation of a coating during application on or impregnation into a substrate.

Asphalt means the dark-brown to black cementitious material (solid, semisolid, or liquid in consistency) of which the main constituents are bitumens which occur naturally or as a residue of petroleum refining.

Automobile means a motor vehicle capable of carrying no more than 12 passengers.

Automobile or light-duty truck assembly plant means a facility where parts are assembled or finished for eventual inclusion into a finished automobile or light-duty truck ready for sale to vehicle dealers, but not including customizers, body shops, and other repainters.

Automobile or light-duty truck refinishing means the repainting of used automobiles and light-duty trucks.

Baked coatings means any coating which is cured or dried in an oven where the oven air temperature exceeds 90 °C (194 °F).

Binders means organic materials and resins which do not contain VOM's.

Bituminous coatings means black or brownish coating materials which are soluble in carbon disulfide, which consist mainly of hydrocarbons, and which are obtained from natural deposits or as residues from the distillation of crude oils or of low grades of coal.

Brush or wipe coating means a manual method of applying a coating using a brush, cloth, or similar object.

Bulk gasoline plant means a gasoline storage and distribution facility with an average throughput of 76,000 l (20,000 gal) or less on a 30-day rolling average that distributes gasoline to gasoline dispensing facilities.

Can means any metal container, with or without a top, cover, spout or handles, into which solid or liquid materials are packaged.

Can coating means any coating applied on a single walled container that is manufactured from metal sheets thinner than 29 gauge (0.0141 in.).

Can coating facility means a facility that includes one or more can coating line(s).

Can coating line means a coating line in which any protective, decorative, or functional coating is applied onto the surface of cans or can components.

Capture means the containment or recovery of emissions from a process for direction into a duct which may be exhausted through a stack or sent to a control device. The overall abatement of emissions from a process with an add-on control device is a function both of the capture efficiency and of the control device.

Capture device means a hood, enclosed room floor sweep or other means of collecting solvent or other pollutants into a duct. The pollutant can then be directed to a pollution control device such as an afterburner or carbon adsorber. Sometimes the term is used loosely to include the control device.

Capture efficiency means the fraction of all VOM generated by a process that are directed to an abatement or recovery device.

Capture system means all equipment (including, but not limited to, hoods, ducts, fans, ovens, dryers, etc.) used to contain, collect and transport an air pollutant to a control device.

Clean Air Act means the Clean Air Act of 1963, as amended, including the Clean Air Act Amendments of 1977, (42 U.S.C. 7401 *et seq.*).

Clear coating means coatings that lack color and opacity or are transparent using the undercoat as a reflectant base or undertone color.

Clear topcoat means the final coating which contains binders, but not opaque pigments, and is specifically formulated to form a transparent or translucent solid protective film.

Closed vent system means a system that is not open to the atmosphere and is composed of piping, connections, and, if necessary, flow inducing devices that transport gas or vapor from an emission source to a control device.

Coating means a material applied onto or impregnated into a substrate for protective, decorative, or functional purposes. Such materials include, but are not limited to, paints, varnishes, sealers, adhesives, thinners, diluents, and inks.

Coating applicator means equipment used to apply a coating.

Coating line means an operation consisting of a series of one or more coating applicators and any associated flash-off areas, drying areas, and ovens wherein a surface coating is applied, dried, or cured. (It is not necessary for an operation to have an oven, or flash-off area, or drying area to be included in this definition.)

Coating plant means any plant that contains one or more coating line(s).

Coil means any flat metal sheet or strip that is rolled or wound in concentric rings.

Coil coating means any coating applied on any flat metal sheet or strip that comes in rolls or coils.

Coil coating facility means a facility that includes one or more coil coating line(s).

Coil coating line means a coating line in which any protective, decorative or functional coating is applied onto the surface of flat metal sheets, strips, rolls, or coils for industrial or commercial use.

Cold cleaning means the process of cleaning and removing soils from surfaces by spraying, brushing, flushing, or immersion while maintaining the organic solvent below its boiling point. Wipe cleaning is not included in this definition.

Component means, with respect to synthetic organic chemical and polymer manufacturing equipment, and petroleum refining and related industries, any piece of equipment which has the potential to leak VOM including, but not limited to, pump seals, compressor seals, seal oil degassing vents, pipeline valves, pressure relief devices, process drains, and open ended pipes. This definition excludes valves which are not externally regulated, flanges, and equipment in heavy liquid service. For purposes of paragraph (i) of this section, this definition also excludes bleed ports of gear pumps in polymer service.

Concrete curing compounds means any coating applied to freshly poured concrete to retard the evaporation of water.

Condensate means volatile organic liquid separated from its associated gases, which condenses due to changes in the temperature or pressure and remains liquid at standard conditions.

Continuous process means, with respect to polystyrene resin, a method of manufacture in which the styrene raw material is delivered on a continuous basis to the reactor in which the styrene is polymerized to polystyrene.

Control device means equipment (such as an afterburner or adsorber) used to remove or prevent the emission of air pollutants from a contaminated exhaust stream.

Environmental Protection Agency

§ 52.741

Control device efficiency means the ratio of pollution prevented by a control device and the pollution introduced to the control device, expressed as a percentage.

Conveyorized degreasing means the continuous process of cleaning and removing soils from surfaces utilizing either cold or vaporized solvents.

Crude oil means a naturally occurring mixture which consists of hydrocarbons and sulfur, nitrogen, or oxygen derivatives of hydrocarbons and which is a liquid at standard conditions.

Crude oil gathering means the transportation of crude oil or condensate after custody transfer between a production facility and a reception point.

Custody transfer means the transfer of produced petroleum and/or condensate after processing and/or treating in the producing operations, from storage tanks or automatic transfer facilities to pipelines or any other forms of transportation.

Daily-weighted average VOM content means the average VOM content of two or more coatings as applied on a coating line during any day, taking into account the fraction of total coating volume that each coating represents, as calculated with the following equation:

$$VOM_w = \frac{\sum_{i=1}^n V_i C_i}{V_T}$$

Where:

VOM_w = The average VOM content of two or more coatings as applied each day on a coating line in units of kg VOM/l (lbs VOM/gal) of coating (minus water and any compounds which are specifically exempted from the definition of VOM),

n = The number of different coatings as applied each day on a coating line,

V_i = The volume of each coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each day on a coating line in units of l (gal).

C_i = The VOM content of each coating as applied each day on a coating line in units of kg VOM/l (lbs VOM/gal) of coating (minus water and any compounds which are specifically exempted from the definition of VOM), and

V_T = The total volume of all coatings (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each day on a coating line in units of l (gal).

Day means the consecutive 24 hours beginning at 12 a.m. (midnight) local time.

Degreaser means any equipment or system used in solvent cleaning.

Delivery vessel means any tank truck or trailer equipped with a storage tank that is used for the transport of gasoline to a stationary storage tank at a gasoline dispensing facility, bulk gasoline plant, or bulk gasoline terminal.

Dip coating means a method of applying coatings in which the part is submerged in a tank filled with the coating.

Drum means any cylindrical metal shipping container of 13- to 110-gallon capacity.

Electrostatic bell or disc spray means an electrostatic spray coating method in which a rapidly-spinning bell- or disc-shaped applicator is used to create a fine mist and apply the coating with high transfer efficiency.

Electrostatic spray means a spray coating method in which opposite electrical charges are applied to the substrate and the coating. The coating is attracted to the object due to the electrostatic potential between them.

Emission source and source mean any facility from which VOM is emitted or capable of being emitted into the atmosphere.

Enamel means a coating that cures by chemical cross-linking of its base resin. Enamels can be distinguished from lacquers because enamels are not readily resolvable in their original solvent.

Enclose means to cover any VOL surface that is exposed to the atmosphere.

End sealing compound coat means a compound applied to can ends which functions as a gasket when the end is assembled onto the can.

Excessive release means a discharge of more than 295 g (0.65 lbs) of mercaptans and/or hydrogen sulfide into the atmosphere in any 5-minute period.

Exterior base coat means a coating applied to the exterior of a can body, or flat sheet to provide protection to the

metal or to provide background for any lithographic or printing operation.

Exterior end coat means a coating applied to the exterior end of a can to provide protection to the metal.

External-floating roof means a cover over an open top storage tank consisting of a double deck or pontoon single deck which rests upon and is supported by the volatile organic liquid being contained and is equipped with a closure seal or seals to close the space between the roof edge and tank shell.

Extreme environmental conditions means exposure to any or all of the following: ambient weather conditions; temperatures consistently above 95 °C (203 °F); detergents; abrasive and scouring agents; solvents; or corrosive atmospheres.

Extreme performance coating means any coating which during intended use is exposed to extreme environmental conditions.

Fabric coating means any coating applied on textile fabric. Fabric coating includes the application of coatings by impregnation.

Fabric coating facility means a facility that includes one or more fabric coating lines.

Fabric coating line means a coating line in which any protective, decorative, or functional coating or reinforcing material is applied on or impregnated into a textile fabric.

Federally enforceable means all limitations and conditions which are enforceable by the Administrator including those requirements developed pursuant to 40 CFR parts 60 and 61; requirements within any applicable implementation plan; and any permit requirements established pursuant to 40 CFR 52.21 or under regulations approved pursuant to 40 CFR part 51 subpart I and 40 CFR 51.166.

Final repair coat means the repainting of any topcoat which is damaged during vehicle assembly.

Firebox means the chamber or compartment of a boiler or furnace in which materials are burned, but not the combustion chamber or afterburner of an incinerator.

Fixed-roof tank means a cylindrical shell with a permanently affixed roof.

Flexographic printing means the application of words, designs, and pictures

to a substrate by means of a roll printing technique in which the pattern to be applied is raised above the printing roll and the image carrier is made of elastomeric materials.

Flexographic printing line means a printing line in which each roll printer uses a roll with raised areas for applying an image such as words, designs, or pictures to a substrate. The image carrier on the roll is made of rubber or other elastomer.

Floating roof means a roof on a stationary tank, reservoir, or other container which moves vertically upon change in volume of the stored material.

Fountain solution means the solution which is applied to the image plate to maintain hydrophilic properties of the non-image areas.

Fuel combustion emission source means any furnace, boiler, or similar equipment used for the primary purpose of producing heat or power by indirect heat transfer.

Fuel gas system means a system for collection of refinery fuel gas including, but not limited to, piping for collecting tail gas from various process units, mixing drums and controls, and distribution piping.

Gas/gas method means either of two methods for determining capture which rely only on gas phase measurements. The first method requires construction of a temporary total enclosure (TTE) to ensure that all would-be fugitive emissions are measured. The second method uses the building or room which houses the facility as an enclosure. The second method requires that all other VOM sources within the room be shut down while the test is performed, but all fans and blowers within the room must be operated according to normal procedures.

Gas service means that the component contains process fluid that is in the gaseous state at operating conditions.

Gasoline means any petroleum distillate or petroleum distillate/alcohol blend having a Reid vapor pressure of 27.6 kPa or greater which is used as a fuel for internal combustion engines.

Gasoline dispensing facility means any site where gasoline is transferred from a stationary storage tank to a motor vehicle gasoline tank used to provide

fuel to the engine of that motor vehicle.

Gross vehicle weight means the manufacturer's gross weight rating for the individual vehicle.

Gross vehicle weight rating means the value specified by the manufacturer as the maximum design loaded weight of a single vehicle.

Heated airless spray means an airless spray coating method in which the coating is heated just prior to application.

Heatset means a class of web-offset lithography which requires a heated dryer to solidify the printing inks.

Heatset-web-offset lithographic printing line means a lithographic printing line in which a blanket cylinder is used to transfer ink from a plate cylinder to a substrate continuously fed from a roll or an extension process and an oven is used to solidify the printing inks.

Heavy liquid means liquid with a true vapor pressure of less than 0.3 kPa (0.04 psi) at 294.3 K (70 °F) established in a standard reference text or as determined by ASTM method D2879-86 (incorporated by reference as specified in 40 CFR 52.742); or which has 0.1 Reid Vapor Pressure as determined by ASTM method D323-82 (incorporated by reference as specified in 40 CFR 52.742); or which when distilled requires a temperature of 421.95 K (300 °F) or greater to recover 10 percent of the liquid as determined by ASTM method D86-82 (incorporated by reference as specified in 40 CFR 52.742).

Heavy off-highway vehicle products means, for the purpose of paragraph (e) of this section, heavy construction, mining, farming, or material handling equipment; heavy industrial engines; diesel-electric locomotives and associated power generation equipment; and the components of such equipment or engines.

Heavy off-highway vehicle products coating facility means a facility that includes one or more heavy off-highway vehicle products coating line(s).

Heavy off-highway vehicle products coating line means a coating line in which any protective, decorative, or functional coating is applied onto the surface of heavy off-highway vehicle products.

High temperature aluminum coating means a coating that is certified to withstand a temperature of 537.8 °C (1000 °F) for 24 hours.

Hood means a partial enclosure or canopy for capturing and exhausting, by means of a draft, the organic vapors or other fumes rising from a coating process or other source.

Hood capture efficiency means the emissions from a process which are captured by the hood and directed into a control device, expressed as a percentage of all emissions.

Hot well means the reservoir of a condensing unit receiving the condensate from a barometric condenser.

Hour means a block period of 60 minutes (e.g., 1 a.m. to 2 a.m.).

In vacuum service means, for the purpose of paragraph (i) of this section, equipment which is operating at an internal pressure that is at least 5 kPa (0.73 psia) below ambient pressure.

In-process tank means a container used for mixing, blending, heating, reacting, holding, crystallizing, evaporating or cleaning operations in the manufacture of pharmaceuticals.

Incinerator means a combustion apparatus in which refuse is burned.

Indirect heat transfer means transfer of heat in such a way that the source of heat does not come into direct contact with process materials.

Ink means a coating used in printing, impressing, or transferring an image onto a substrate.

Interior body spray coat means a coating applied by spray to the interior of a can body.

Internal-floating roof means a cover or roof in a fixed-roof tank which rests upon and is supported by the volatile organic liquid being contained and is equipped with a closure seal or seals to close the space between the roof edge and tank shell.

Lacquers means any clear wood finishes formulated with nitrocellulose or synthetic resins to dry by evaporation without chemical reaction, including clear lacquer sanding sealers.

Large appliance means any residential and commercial washers, dryers, ranges, refrigerators, freezers, water heaters, dish washers, trash compactors, air conditioners, and other similar products.

Large appliance coating means any coating applied to the component metal parts (including, but not limited to, doors, cases, lids, panels, and interior support parts) of residential and commercial washers, dryers, ranges, refrigerators, freezers, water heaters, dish washers, trash compactors, air conditioners, and other similar products.

Large appliance coating facility means a facility that includes one or more large appliance coating line(s).

Large appliance coating line means a coating line in which any protective, decorative, or functional coating is applied onto the surface of large appliances.

Light liquid means VOM in the liquid state which is not defined as heavy liquid.

Light-duty truck means any motor vehicle rated at 3,850 kg gross vehicle weight or less, designed mainly to transport property.

Liquid/gas method means either of two methods for determining capture which require both gas phase and liquid phase measurements and analysis. The first method requires construction of a TTE. The second method uses the building or room which houses the facility as an enclosure. The second method requires that all other VOM sources within the room be shut down while the test is performed, but all fans and blowers within the room must be operated according to normal procedures.

Liquid service means that the equipment or component contains process fluid that is in a liquid state at operating conditions.

Lithographic printing line means a printing line, except that the substrate is not necessarily fed from an unwinding roll, in which each roll printer uses a roll where both the image and non-image areas are essentially in the same plane (planographic).

Magnet wire means aluminum or copper wire formed into an electromagnetic coil.

Magnet wire coating means any coating or electrically insulating varnish or enamel applied to magnet wire.

Magnet wire coating facility means a facility that includes one or more magnet wire coating line(s).

Magnet wire coating line means a coating line in which any protective, decorative, or functional coating is applied onto the surface of a magnet wire.

Malfunction means any sudden and unavoidable failure of air pollution control equipment, process equipment, or a process to operate in a normal or usual manner. Failures that are caused entirely or in part by poor maintenance, careless operation, or any other preventable upset condition or preventable equipment breakdown shall not be considered malfunctions.

Manufacturing process means a method whereby a process emission source or series of process emission sources is used to convert raw materials, feed stocks, subassemblies, or other components into a product, either for sale or for use as a component in a subsequent manufacturing process.

Maximum theoretical emissions means the quantity of volatile organic material emissions that theoretically could be emitted by a stationary source before add-on controls based on the design capacity or maximum production capacity of the source and 8760 hours per year. The design capacity or maximum production capacity includes use of coating(s) or ink(s) with the highest volatile organic material content actually used in practice by the source.

Metal furniture means a furniture piece including, but not limited to, tables, chairs, waste baskets, beds, desks, lockers, benches, shelving, file cabinets, lamps, and room dividers.

Metal furniture coating means any non-adhesive coating applied to any furniture piece made of metal or any metal part which is or will be assembled with other metal, wood, fabric, plastic or glass parts to form a furniture piece including, but not limited to, tables, chairs, waste baskets, beds, desks, lockers, benches, shelving, file cabinets, lamps, and room dividers. This definition shall not apply to any coating line coating miscellaneous metal parts or products.

Metal furniture coating facility means a facility that includes one or more metal furniture coating line(s).

Metal furniture coating line means a coating line in which any protective,

decorative, or functional coating is applied onto the surface of metal furniture.

Metallic shoe-type seal means a primary or secondary seal constructed of metal sheets (shoes) which are joined together to form a ring, springs, or levers which attach the shoes to the floating roof and hold the shoes against the tank wall, and a coated fabric which is suspended from the shoes to the floating roof.

Miscellaneous fabricated product manufacturing process means:

(A) A manufacturing process involving one or more of the following applications, including any drying and curing of formulations, and capable of emitting VOM:

(1) Adhesives to fabricate or assemble components or products.

(2) Asphalt solutions to paper or fiberboard.

(3) Asphalt to paper or felt.

(4) Coatings or dye to leather.

(5) Coatings to plastic.

(6) Coatings to rubber or glass.

(7) Disinfectant material to manufactured items.

(8) Plastic foam scrap or "fluff" from the manufacture of foam containers and packaging material to form resin pallets.

(9) Resin solutions to fiber substances.

(10) Viscose solutions for food casings.

(B) The storage and handling of formulations associated with the process described above, and the use and handling of organic liquids and other substances for clean-up operations associated with the process described in this definition.

Miscellaneous formulation manufacturing process means:

(A) A manufacturing process which compounds one or more of the following and is capable of emitting VOM:

(1) Adhesives.

(2) Asphalt solutions.

(3) Caulks, sealants, or waterproofing agents.

(4) Coatings, other than paint and ink.

(5) Concrete curing compounds.

(6) Dyes.

(7) Friction materials and compounds.

(8) Resin solutions.

(9) Rubber solutions.

(10) Viscose solutions.

(B) The storage and handling of formulations associated with the process described above, and the use and handling of organic liquids and other substances for clean-up operations associated with the process described in this definition.

Miscellaneous metal parts or products means any metal part or metal product, even if attached to or combined with a nonmetal part or product, except cans, coils, metal furniture, large appliances, magnet wire, automobiles, ships, and airplane bodies.

Miscellaneous metal parts and products coating means any coating applied to any metal part or metal product, even if attached to or combined with a nonmetal part or product, except cans, coils, metal furniture, large appliances, and magnet wire. Prime coat, prime surfacer coat, topcoat, and final repair coat for automobiles and light-duty trucks are not miscellaneous metal parts and products coatings. However, underbody anti-chip (e.g., underbody plastisol) automobile, and light-duty truck coatings are miscellaneous metal parts and products coatings. Also, automobile or light-duty truck refinishing coatings, coatings applied to the exterior of marine vessels, coatings applied to the exterior of airplanes, and the customized topcoating of automobiles and trucks if production is less than 35 vehicles per day are not miscellaneous metal parts and products coatings.

Miscellaneous metal parts or products coating facility means a facility that includes one or more miscellaneous metal parts or products coating lines.

Miscellaneous metal parts or products coating line means a coating line in which any protective, decorative, or functional coating is applied onto the surface of miscellaneous metal parts or products.

Miscellaneous organic chemical manufacturing process means:

(A) A manufacturing process which produces by chemical reaction, one or more of the following organic compounds or mixtures of organic compounds and which is capable of emitting VOM:

(1) Chemicals listed in appendix A of this section.

(2) Chlorinated and sulfonated compounds.

(3) Cosmetic, detergent, soap, or surfactant intermediaries or specialties and products.

(4) Disinfectants.

(5) Food additives.

(6) Oil and petroleum product additives.

(7) Plasticizers.

(8) Resins or polymers.

(9) Rubber additives.

(10) Sweeteners.

(11) Varnishes.

(B) The storage and handling of formulations associated with the process described above and the use and handling of organic liquids and other substances for clean-up operations associated with the process described in this definition.

Monitor means to measure and record.

Multiple package coating means a coating made from more than one different ingredient which must be mixed prior to using and has a limited pot life due to the chemical reaction which occurs upon mixing.

Offset means, with respect to printing and publishing operations, use of a blanket cylinder to transfer ink from the plate cylinder to the surface to be printed.

Opaque stains means all stains that are not semi-transparent stains.

Open top vapor depressing means the batch process of cleaning and removing soils from surfaces by condensing hot solvent vapor on the colder metal parts.

Open-ended valve means any valve, except pressure relief devices, having one side of the valve in contact with process fluid and one side open to the atmosphere, either directly or through open piping.

Organic compound means any compound of carbon, excluding carbon monoxide, carbon dioxide, carbonic acid, metallic carbides or carbonates, and ammonium carbonate.

Organic material means any chemical compound of carbon including diluents and thinners which are liquids at standard conditions and which are used as dissolvers, viscosity reducers, or

cleaning agents, but excluding methane, carbon monoxide, carbon dioxide, carbonic acid, metallic carbonic acid, metallic carbide, metallic carbonates, and ammonium carbonate.

Organic vapor means the gaseous phase of an organic material or a mixture of organic materials present in the atmosphere.

Oven means a chamber within which heat is used for one or more of the following purposes: Dry, bake, cure, or polymerize a coating or ink.

Overall control means the product of the capture efficiency and the control device efficiency.

Overvarnish means a transparent coating applied directly over ink or coating.

Owner or operator means any person who owns, operates, leases, controls, or supervises an emission source or air pollution control equipment.

Packaging rotogravure printing means rotogravure printing upon paper, paper board, metal foil, plastic film, and other substrates, which are, in subsequent operations, formed into packaging products or labels for articles to be sold.

Packaging rotogravure printing line means a rotogravure printing line in which surface coatings are applied to paper, paperboard, foil, film, or other substrates which are to be used to produce containers, packaging products, or labels for articles.

Pail means any cylindrical metal shipping container of 1- to 12-gallon capacity and constructed of 29-gauge and heavier metal.

Paint manufacturing plant means a plant that mixes, blends, or compounds enamels, lacquers, sealers, shellacs, stains, varnishes, or pigmented surface coatings.

Paper coating means any coating applied on paper, plastic film, or metallic foil to make certain products, including (but not limited to) adhesive tapes and labels, book covers, post cards, office copier paper, drafting paper, or pressure sensitive tapes. Paper coating includes the application of coatings by impregnation and/or saturation.

Paper coating facility means a facility that includes one or more paper coating lines.

Paper coating line means a coating line in which any protective, decorative, or functional coating is applied on, saturated into, or impregnated into paper, plastic film, or metallic foil to make certain products, including (but not limited to) adhesive tapes and labels, book covers, post cards, office copier paper, drafting paper, and pressure sensitive tapes.

Parts per million (volume) means a volume/volume ratio which expresses the volumetric concentration of gaseous air contaminant in a million unit volume of gas.

Person means any individual, corporation, partnership, association, State, municipality, political subdivision of a State; any agency, department, or instrumentality of the United States; and any officer, agent, or employee thereof.

Petroleum means the crude oil removed from the earth and the oils derived from tar sands, shale, and coal.

Petroleum refinery means any facility engaged in producing gasoline, kerosene, distillate fuel oils, residual fuel oils, lubricants, or other products through distillation of petroleum, or through redistillation, cracking, or reforming of unfinished petroleum derivatives.

Pharmaceutical means any compound or mixture, other than food, used in the prevention, diagnosis, alleviation, treatment, or cure of disease in man and animal.

Pharmaceutical coating operation means a device in which a coating is applied to a pharmaceutical, including air drying or curing of the coating.

Pigmented coatings means opaque coatings containing binders and colored pigments which are formulated to conceal the wood surface either as an undercoat or topcoat.

Plant means all of the pollutant-emitting activities which belong to the same industrial grouping, are located on one or more contiguous or adjacent properties, and are under the control of the same person (or persons under common control), except the activities of any marine vessel. Pollutant-emitting activities shall be considered as part of the same industrial grouping if they belong to the same "Major Group" (i.e., which have the same two-digit code) as

described in the "Standard Industrial Classification Manual, 1987" (incorporated by reference as specified in 40 CFR 52.742).

Plasticizers means a substance added to a polymer composition to soften and add flexibility to the product.

Prime coat means the first of two or more coatings applied to a surface.

Prime surfacer coat means a coating used to touch up areas on the surface of automobile or light-duty truck bodies not adequately covered by the prime coat before application of the top coat. The prime surfacer coat is applied between the prime coat and topcoat. An anti-chip coating applied to main body parts (e.g., rocker panels, bottom of doors and fenders, and leading edge of roof) is a prime surfacer coat.

Primers means any coatings formulated and applied to substrates to provide a firm bond between the substrate and subsequent coats.

Printing means the application of words, designs, and pictures to a substrate using ink.

Printing line means an operation consisting of a series of one or more roll printers and any associated roll coaters, drying areas, and ovens wherein one or more coatings are applied, dried, and/or cured.

Process means any stationary emission source other than a fuel combustion emission source or an incinerator.

Production equipment exhaust system means a system for collecting and directing into the atmosphere emissions of volatile organic material from reactors, centrifuges, and other process emission sources.

Publication rotogravure printing line means a rotogravure printing line in which coatings are applied to paper which is subsequently formed into books, magazines, catalogues, brochures, directories, newspaper supplements, or other types of printed material.

Reactor means a vat, vessel, or other device in which chemical reactions take place.

Refiner means any person who owns, leases operates, controls, or supervises a refinery.

Refinery unit, process unit or unit means a set of components which are a

part of a basic process operation such as distillation, hydrotreating, cracking, or reforming of hydrocarbons.

Refrigerated condenser means a surface condenser in which the coolant supplied to the condenser has been cooled by a mechanical device, other than by a cooling tower or evaporative spray cooling, such as refrigeration unit or steam chiller unit.

Repair coatings means coatings used to correct imperfections or damage to furniture surface.

Repaired means, for the purpose of paragraph (i) of this section, that equipment component has been adjusted, or otherwise altered, to eliminate a leak.

Roll coater means an apparatus in which a uniform layer of coating is applied by means of one or more rolls across the entire width of a moving substrate.

Roll printer means an apparatus used in the application of words, designs, or pictures to a substrate, usually by means of one or more rolls each with only partial coverage.

Roll printing means the application of words, designs, and pictures to a substrate usually by means of a series of hard rubber or metal rolls each with only partial coverage.

Roller coating means a method of applying a coating to a sheet or strip in which the coating is transferred by a roller or series of rollers.

Rotogravure printing means the application of words, designs, and pictures to a substrate by means of a roll printing technique in which the pattern to be applied is recessed relative to the non-image area.

Rotogravure printing line means a printing line in which each roll printer uses a roll with recessed areas for applying an image to a substrate.

Safety relief valve means a valve which is normally closed and which is designed to open in order to relieve excessive pressures within a vessel or pipe.

Sanding sealers means any coatings formulated for and applied to bare wood for sanding and to seal the wood for subsequent application of varnish. To be considered a sanding sealer a coating must be clearly labelled as such.

Sealer means a coating containing binders which seals wood prior to the application of the subsequent coatings.

Semi-transparent stains means stains containing dyes or semi-transparent pigments which are formulated to enhance wood grain and change the color of the surface but not to conceal the surface, including, but not limited to, sap stain, toner, non-grain raising stains, pad stain, or spatter stain.

Set of safety relief valves means one or more safety relief valves designed to open in order to relieve excessive pressures in the same vessel or pipe.

Sheet basecoat means a coating applied to metal when the metal is in sheet form to serve as either the exterior or interior of a can for either two-piece or three-piece cans.

Side-seam spray coat means a coating applied to the seam of a three-piece can.

Single coat means one coating application applied to a metal surface.

Solvent means a liquid substance that is used to dissolve or dilute another substance.

Solvent cleaning means the process of cleaning soils from surfaces by cold cleaning, open top vapor degreasing, or conveyORIZED degreasing.

Specified air contaminant means any air contaminant as to which this Section contains emission standards or other specific limitations.

Splash loading means a method of loading a tank, railroad tank car, tank truck, or trailer by use of other than a submerged loading pipe.

Standard conditions means a temperature of 70 °F and a pressure of 14.7 psia.

Standard cubic foot (scf) means the volume of one cubic foot of gas at standard conditions.

Standard Industrial Classification Manual means the Standard Industrial Classification Manual (1987), Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (incorporated by reference as specified in 40 CFR 52.742).

Start-up means the setting in operation of an emission source for any purpose.

Stationary emission source and *Stationary source* mean an emission source which is not self-propelled.

Environmental Protection Agency

§ 52.741

Storage tank or storage vessel means any stationary tank, reservoir or container used for the storage of VOL's.

Submerged loading pipe means any discharge pipe or nozzle which meets either of the following conditions:

(A) Where the tank is filled from the top, the end of the discharge pipe or nozzle must be totally submerged when the liquid level is 15 cm (6 in.) above the bottom of the tank.

(B) Where the tank is filled from the side, the discharge pipe or nozzle must be totally submerged when the liquid level is 46 cm (18 in.) above the bottom of the tank.

Substrate means the surface onto which a coating is applied or into which a coating is impregnated.

Surface condenser means a device which removes a substance from a gas stream by reducing the temperature of the stream, without direct contact between the coolant and the stream.

Tablet coating operation means a pharmaceutical coating operation in which tablets are coated.

Thirty-day rolling average means any value arithmetically averaged over any consecutive thirty-days.

Three-piece can means a can which is made from a rectangular sheet and two circular ends.

Topcoat means a coating applied in a multiple coat operation other than prime coat, final repair coat, or prime surfacer coat.

Topcoat operation means all topcoat spray booths, flash-off areas, and bake ovens at a facility which are used to apply, dry, or cure the final coatings (except final off-line repair) on components of automobile or light-duty truck bodies.

Transfer efficiency means the ratio of the amount of coating solids deposited onto a part or product to the total amount of coating solids used.

True vapor pressure means the equilibrium partial pressure exerted by a volatile organic liquid as determined in accordance with methods described in American Petroleum Institute Bulletin 2517, "Evaporation Loss From Floating Roof Tanks," second edition, February 1980 (incorporated by reference as specified in 40 CFR 52.742).

Two-piece can means a can which is drawn from a shallow cup and requires only one end to be attached.

Undercoaters means any coatings formulated for and applied to substrates to provide a smooth surface for subsequent coats.

Unregulated safety relief valve means a safety relief valve which cannot be actuated by a means other than high pressure in the pipe or vessel which it protects.

Vacuum producing system means any reciprocating, rotary, or centrifugal blower or compressor or any jet ejector or device that creates suction from a pressure below atmospheric and discharges against a greater pressure.

Valves not externally regulated means valves that have no external controls, such as in-line check valves.

Vapor balance system means any combination of pipes or hoses which creates a closed system between the vapor spaces of an unloading tank and a receiving tank such that vapors displaced from the receiving tank are transferred to the tank being unloaded.

Vapor collection system means all piping, seals, hoses, connections, pressure-vacuum vents, and other possible sources between the gasoline delivery vessel and the vapor processing unit and/or the storage tanks and vapor holder.

Vapor control system means any system that limits or prevents release to the atmosphere of organic material in the vapors displaced from a tank during the transfer of gasoline.

Vapor recovery system means a vapor gathering system capable of collecting all VOM vapors and gases discharged from the storage tank and a vapor disposal system capable of processing such VOM vapors and gases so as to prevent their emission to the atmosphere.

Vehicle means a device by which any person or property may be propelled, moved, or drawn upon a highway, excepting a device moved exclusively by human power or used exclusively upon stationary rails or tracks.

Vinyl coating means any topcoat or printing ink applied to vinyl coated fabric or vinyl sheets. Vinyl coating does not include plastisols.

Vinyl coating facility means a facility that includes one or more vinyl coating line(s).

Vinyl coating line means a coating line in which any protective, decorative or functional coating is applied onto vinyl coated fabric or vinyl sheets.

Volatile organic liquid means any substance which is liquid at storage conditions and which contains volatile organic compounds.

Volatile organic material (VOM) or volatile organic compounds (VOC) is as defined in § 51.100(s) of this chapter.

Wash coat means a coating containing binders which seals wood surfaces, prevents undesired staining, and controls penetration.

Web means a substrate which is printed in continuous roll-fed presses.

Wood furniture means room furnishings including cabinets (kitchen, bath, and vanity), tables, chairs, beds, sofas, shutters, art objects, wood paneling, wood flooring, and any other coated furnishings made of wood, wood composition, or fabricated wood materials.

Wood furniture coating facility means a facility that includes one or more wood furniture coating line(s).

Wood furniture coating line means a coating line in which any protective, decorative, or functional coating is applied onto wood furniture.

Woodworking means the shaping, sawing, grinding, smoothing, polishing, and making into products of any form or shape of wood.

(4) *Testing methods and procedures*—(i) Coatings, inks and fountain solutions. The following test methods and procedures shall be used to determine compliance of as applied coatings, inks, and fountain solutions with the limitations set forth in § 52.741.

(A) *Sampling*. Samples collected for analyses shall be one-liter taken into a one-liter container at a location and time such that the sample will be representative of the coating as applied (i.e., the sample shall include any dilution solvent or other VOM added during the manufacturing process). The container must be tightly sealed immediately after the sample is taken. Any solvent or other VOM added after the sample is taken must be measured and

accounted for in the calculations in paragraph (a)(4)(i)(C) of this section. For multiple package coatings, separate samples of each component shall be obtained. A mixed sample shall not be obtained as it will cure in the container. Sampling procedures shall follow the guidelines presented in:

(1) ASTM D3925–81 (Reapproved 1985) Standard Practice for Sampling Liquid Paints and Related Pigment Coating. This practice is incorporated by reference as specified in 40 CFR 52.742.

(2) ASTM E300–86 Standard Practice for Sampling Industrial Chemicals. This practice is incorporated by reference as specified in 40 CFR 52.742.

(B) *Analyses*. The applicable analytical methods specified below shall be used to determine the composition of coatings, inks, or fountain solutions as applied.

(1) Method 24 of 40 CFR part 60, appendix A, shall be used to determine the VOM content and density of coatings. If it is demonstrated to the satisfaction of the Administrator that plant coating formulation data are equivalent to Method 24 results, formulation data may be used. In the event of any inconsistency between a Method 24 test and a facility's formulation data, the Method 24 test will govern.

(2) Method 24A of 40 CFR part 60, appendix A, shall be used to determine the VOM content and density of rotogravure printing inks and related coatings. If it is demonstrated to the satisfaction of the Administrator that the plant coating formulation data are equivalent to Method 24A results, formulation data may be used. In the event of any inconsistency between a Method 24A test and a facility's formulation data, the Method 24A test will govern.

(3) The following ASTM methods are the analytical procedures for determining VOM:

(i) ASTM D1475–85: Standard Test Method for Density of Paint, Varnish, Lacquer and Related Products. This test method is incorporated by reference as specified in 40 CFR 52.742.

(ii) ASTM D2369–87: Standard Test Method for Volatile Content of Coatings. This test method is incorporated by reference as specified in 40 CFR 52.742.

(iii) ASTM D3792-86: Standard Test Method for Water Content of Water-reducible Paints by Direct Injection into a Gas Chromatograph. This test method is incorporated by reference as specified in 40 CFR 52.742.

(iv) ASTM D4017-81 (Reapproved 1987): Standard Test Method for Water in Paints and Paint Materials by the Karl Fischer Method. This test method is incorporated by reference as specified in 40 CFR 52.742.

(v) ASTM D4457-85: Standard Test Method for Determination of Dichloromethane and 1,1,1-Trichloroethane in Paints and Coatings by Direct Injection into a Gas Chromatograph. (The procedure delineated above can be used to develop protocols for any compounds specifically exempted from the definition of VOM.) This test method is incorporated by reference as specified in 40 CFR 52.742.

(vi) ASTM D2697-86: Standard Test Method for Volume Non-Volatile Matter in Clear or Pigmented Coatings. This test method is incorporated by reference as specified in 40 CFR 52.742.

(vii) ASTM D3980-87: Standard Practice for Interlaboratory Testing of Paint and Related Materials. This practice is incorporated by reference as specified in 40 CFR 52.742.

(viii) ASTM E180-85: Standard Practice for Determining the Precision of ASTM Methods for Analysis of and Testing of Industrial Chemicals. This practice is incorporated by reference as specified in 40 CFR 52.742.

(ix) ASTM D2372-85: Standard Method of Separation of Vehicle from Solvent-reducible Paints. This method is incorporated by reference as specified in 40 CFR 52.742.

(4) Use of an adaptation to any of the analytical methods specified in paragraphs (a)(4)(i)(B)(I), (2) and (3) may be approved by the Administrator on a case-by-case basis. An owner or operator must submit sufficient documentation for the Administrator to find that the analytical methods specified in paragraphs (a)(4)(i)(B)(I), (2) and (3) will yield inaccurate results and that the proposed adaptation is appropriate.

(C) *Calculations.* Calculations for determining the VOM content, water content and the content of any compounds

which are specifically exempted from the definition of VOM of coatings, inks and fountain solutions as applied shall follow the guidance provided in the following documents.

(1) "A Guide for Surface Coating Calculation" EPA-340/1-86-016 (which is available from the National Technical Information Services, 5285 Port Royal Road, Springfield, VA 22161)

(2) "Procedures for Certifying Quantity of Volatile Organic Compounds Emitted by Paint, Ink and Other Coatings" (revised June 1986) EPA-450/3-84-019 (which is available from the National Technical Information Services, 5285 Port Royal Road, Springfield, VA 22161)

(3) "A Guide for Graphic Arts Calculations" August 1988 EPA-340/1-88-003 (which is available from the National Technical Information Services, 5285 Port Royal Road, Springfield, VA 22161)

(ii) *Automobile or light-duty truck test protocol.* The protocol for testing, including determining the transfer efficiency, of coating applicators at topcoat coating operations at an automobile assembly facility shall follow the procedure in: "Protocol for Determining the Daily Volatile Organic Compound Emission Rate of Automobile and Light-Duty Truck Topcoat Operations" December 1988 EPA-450/3-88-018 (which is available for purchase from the National Technical Information Services, 5285 Port Royal Road, Springfield, VA 22161)

(iii) *Capture system efficiency test protocols—(A) Applicability.* The requirements of paragraphs (a)(4)(iii)(B) of this section shall apply to all VOM emitting processes employing capture equipment (*e.g.*, hoods, ducts), except those cases noted below.

(I) If a source installs a permanent total enclosure (PTE) that meets USEPA specifications, and which directs all VOM to a control device, then the source is exempted from the requirements described in paragraph (B). The USEPA specifications to determine whether a structure is considered a PTE are given in Procedure T of appendix B of this section. In this instance, the capture efficiency is assumed to be 100 percent and the source

is still required to measure control efficiency using appropriate test methods as specified in (a)(4)(iv) of this section.

(2) If a source uses a control device designed to collect and recover VOM (*e.g.*, carbon adsorber), an explicit measurement of capture efficiency is not necessary provided that the conditions given below are met. The overall control of the system can be determined by directly comparing the input liquid VOM to the recovered liquid VOM. The general procedure for use in this situation is given in 40 CFR 60.433, with the following additional restrictions:

(i) The source must be able to equate solvent usage with solvent recovery on a 24-hour (daily) basis, rather than a 30-day weighted average, within 72 hours following the 24-hour period. In addition, one of the following two criteria must be met:

(ii) The solvent recovery system (*i.e.*, capture and control system) must be dedicated to a single process line (*e.g.*, one process line venting to a carbon adsorber system), or

(iii) If the solvent recovery system controls multiple process lines, then the source must be able to demonstrate that the overall control (*i.e.*, the total recovered solvent VOM divided by the sum of liquid VOM input to all process lines venting to the control system) meets or exceeds the most stringent standard applicable for any process line venting to the control system.

(B) *Specific requirements.* The capture efficiency of a process line shall be measured using one of the four protocols given below. Any error margin associated with a test protocol may not be incorporated into the results of a capture efficiency test. If these techniques are not suitable for a particular process, then the source must present an alternative capture efficiency protocol and obtain approval for it by the Administrator as a SIP or FIP revisions.

(1) *Gas/gas method using temporary total enclosure (TTE).* The USEPA specifications to determine whether a temporary enclosure is considered a TTE are given in Procedure T of appendix B of this section. The capture effi-

ciency equation to be used for this protocol is:

$$CE = Gw / (GW + Fw)$$

Where:

CE = capture efficiency, decimal fraction.

Gw = mass of VOM captured and delivered to control device using a TTE.

Fw = mass of fugitive VOM that escapes from a TTE.

Procedure G.2 contained in appendix B of this section is used to obtain Gw. Procedure F.1 in appendix B of this section is used to obtain Fw.

(2) *Liquid/gas method using TTE.* The USEPA specifications to determine whether a temporary enclosure is considered a TTE are given in Procedure T of appendix B of this section. The capture efficiency equation to be used for this protocol is:

$$CE = (L - F) / L$$

Where:

CE = capture efficiency, decimal fraction.

L = mass of liquid VOM input to process.

Fw = mass of fugitive VOM that escapes from a TTE.

Procedure L contained in appendix B of this section is used to obtain L. Procedure F.1 in appendix B of this section is used to obtain Fw.

(3) *Gas/gas method using the building or room (building or room enclosure) in which the affected source is located as the enclosure and in which "F" and "G" are measured while operating only the affected facility.* All fans and blowers in the building or room must be operated as they would under normal production. The capture efficiency equation to be used for this protocol is:

$$CE = G / (G + F_B)$$

Where:

CE = capture efficiency, decimal fraction.

G = mass of VOM captured and delivered to control device.

F_B = mass of fugitive VOM that escapes from building enclosure.

Procedure G.2 contained in appendix B of this section is used to obtain G. Procedure F.2 in appendix B of this section is used to obtain F_B.

(4) *Liquid/gas method using the building or room (building or room enclosure) in which the affected source is located as the enclosure and in which*

Environmental Protection Agency

§ 52.741

“F” and “L” are measured while operating only the affected facility. All fans and blowers in the building or room must be operated as they would under normal production. The capture efficiency equation to be used for this protocol is:

$$CE = (L - F_B) / L$$

Where:

CE = capture efficiency, decimal fraction.

L = mass of liquid VOM input to process.

F_B = mass of fugitive VOM that escapes from building enclosure.

Procedure L contained in appendix B of this section is used to obtain L. Procedure F.2 in appendix B of this section is used to obtain F_B.

(C) *Recordkeeping and reporting.* (1) All affected facilities must maintain a copy of the capture efficiency protocol submitted to USEPA on file. All results of the appropriate test methods and capture efficiency protocols must be reported to USEPA within sixty (60) days of the test date. A copy of the results must be kept on file with the source for a period of three (3) years.

(2) If any changes are made to capture or control equipment, then the source is required to notify USEPA of these changes and a new test may be required by USEPA.

(3) The source must notify the Administrator 30 days prior to performing any capture efficiency or control test. At that time, the source must notify the Administrator which capture efficiency protocol and control device test methods will be used.

(4) Sources utilizing a PTE must demonstrate that this enclosure meets the requirement given in Procedure T (in appendix B of this section) for a PTE during any testing of their control device.

(5) Sources utilizing a TTE must demonstrate that their TTE meets the requirements given in Procedure T (in appendix B of this section) for a TTE during testing of their control device. The source must also provide documentation that the quality assurance criteria for a TTE have been achieved.

(iv) *Control device efficiency testing and monitoring.* (A) The control device efficiency shall be determined by simultaneously measuring the inlet and outlet gas phase VOM concentrations

and gas volumetric flow rates in accordance with the gas phase test methods specified in paragraph (a)(4)(vi) of this section.

(B) Any owner or operator that uses an afterburner or carbon adsorber to comply with any paragraph of § 52.741 shall use USEPA approved continuous monitoring equipment which is installed, calibrated, maintained, and operated according to vendor specifications at all times the afterburner or carbon adsorber is in use. The continuous monitoring equipment must monitor the following parameters:

(1) Combustion chamber temperature of each afterburner.

(2) Temperature rise across each catalytic afterburner bed or VOM concentration of exhaust.

(3) The VOM concentration of each carbon adsorption bed exhaust.

(v) *Overall efficiency.* (A) The overall efficiency of the emission control system shall be determined as the product of the capture system efficiency and the control device efficiency or by the liquid/liquid test protocol as specified in 40 CFR 60.433 (and revised by paragraph (a)(4)(iii)(A)(2) of this section for each solvent recovery system. In those cases in which the overall efficiency is being determined for an entire line, the capture efficiency used to calculate the product of the capture and control efficiency is the total capture efficiency over the entire line.

(B) For coating lines which are both chosen by the owner or operator to comply with paragraphs (e)(2)(ii), (e)(2)(iii), (e)(2)(iv), (e)(2)(v), or (e)(2)(vi) of this section by the alternative in paragraph (e)(2)(i)(B) of this section and meet the criteria allowing them to comply with paragraph (e)(2) of this section instead of paragraph (e)(1) of this section, the overall efficiency of the capture system and control device, as determined by the test methods and procedures specified in paragraphs (a)(4) (iii), (iv) and (v)(A) of this section, shall be no less than the equivalent overall efficiency which shall be calculated by the following equation:

$$E = ([VOM_a - VOM_i] / VOM_a) \times 100$$

Where:

E = Equivalent overall efficiency of the capture system and control device as a percentage.

VOM_a = Actual VOM content of a coating, or the daily-weighted average VOM content of two or more coatings (if more than one coating is used), as applied to the subject coating line as determined by the applicable test methods and procedures specified in paragraph (a)(4)(i) of this section in units of kg VOM/l (lb VOM/gal) of coating solids as applied.

VOM_i = The VOM emission limit specified in paragraph (e)(2) (i) or (ii) of this section in units of kg VOM/l (lb VOM/gal) of coating solids as applied.

(vi) *Volatile organic material gas phase source test methods.* The methods in 40 CFR part 60, appendix A, delineated below shall be used to determine control device efficiencies.

(A) 40 CFR part 60, appendix A, Method 18, 25 or 25A, as appropriate to the conditions at the site, shall be used to determine VOM concentration. Method selection shall be based on consideration of the diversity of organic species present and their total concentration and on consideration of the potential presence of interfering gases. Except as indicated in paragraphs (a)(4)(vi)(A)(1) and (2) of this section, the test shall consist of three separate runs, each lasting a minimum of 60 min, unless the Administrator determines that process variables dictate shorter sampling times.

(1) When the method is to be used to determine the efficiency of a carbon adsorption system with a common exhaust stack for all the individual adsorber vessels, the test shall consist of three separate runs, each coinciding with one or more complete sequences through the adsorption cycles of all the individual adsorber vessels.

(2) When the method is to be used to determine the efficiency of a carbon adsorption system with individual exhaust stacks for each adsorber vessel, each adsorber vessel shall be tested individually. The test for each adsorber vessel shall consist of three separate runs. Each run shall coincide with one or more complete adsorption cycles.

(B) 40 CFR part 60, appendix A, Method 1 or 1A shall be used for sample and velocity traverses.

(C) 40 CFR part 60, appendix A, Method 2, 2A, 2C or 2D shall be used for velocity and volumetric flow rates.

(D) 40 CFR part 60, appendix A, Method 3 shall be used for gas analysis.

(E) 40 CFR part 60, appendix A, Method 4 shall be used for stack gas moisture.

(F) 40 CFR part 60, appendix A, Methods 2, 2A, 2C, 2D, 3 and 4 shall be performed, as applicable, at least twice during each test run.

(G) Use of an adaptation to any of the test methods specified in paragraphs (a)(4)(vi) (A), (B), (C), (D), (E), and (F) of this section may be approved by the Administrator on a case-by-case basis. An owner or operator must submit sufficient documentation for the Administrator to find that the test methods specified in paragraphs (a)(4)(vi) (A), (B), (C), (D), (E), and (F) of this section will yield inaccurate results and that the proposed adaptation is appropriate.

(vii) *Leak detection methods for volatile organic material.* Owners or operators required by the various subparts of this regulation to carry out a leak detection monitoring program shall comply with the following requirements:

(A) *Leak detection monitoring.* (1) Monitoring shall comply with 40 CFR part 60, appendix A, Method 21.

(2) The detection instrument shall meet the performance criteria of Method 21.

(3) The instrument shall be calibrated before use on each day of its use by the methods specified in Method 21.

(4) Calibration gases shall be:

(i) Zero air (less than 10 ppm of hydrocarbon in air); and

(ii) A mixture of methane or n-hexane and air at a concentration of approximately, but no less than, 10,000 ppm methane or n-hexane.

(5) The instrument probe shall be traversed around all potential leak interfaces as close to the interface as possible as described in Method 21.

(B) When equipment is tested for compliance with no detectable emissions as required, the test shall comply with the following requirements:

(1) The requirements of paragraphs (a)(4) (vii)(A)(1) through (vii)(A)(5) of this section shall apply.

(2) The background level shall be determined as set forth in Method 21.

(C) Leak detection tests shall be performed consistent with:

Environmental Protection Agency

§ 52.741

(1) "APTI Course SI 417 controlling Volatile Organic Compound Emissions from Leaking Process Equipment" EPA-450/2-82-015 (which is available for purchase from the National Technical Information Services, 5285 Port Royal Road, Springfield, VA 22161)

(2) "Portable Instrument User's Manual for Monitoring VOC Sources" EPA-340/1-86-015 (which is available for purchase from the National Technical Information Services, 5285 Port Royal Road, Springfield, VA 22161)

(3) "Protocols for Generating Unit-Specific Emission Estimates for Equipment Leaks of VOC and VHAP" EPA-450/3-88-010 (which is available for purchase from the National Technical Information Services, 5285 Port Royal Road, Springfield, VA 22161)

(4) "Petroleum Refinery Enforcement Manual" EPA-340/1-80-008 (which is available for purchase from the National Technical Information Services, 5285 Port Royal Road, Springfield, VA 22161)

(viii) *Bulk gasoline delivery system test protocol.* (A) The method for determining the emissions of gasoline from a vapor recovery system are delineated in 40 CFR part 60, subpart XX, §60.503.

(B) Other tests shall be performed consistent with:

(1) "Inspection Manual for Control of Volatile Organic Emissions from Gasoline Marketing Operations: Appendix D" EPA-340/1-80-012 (which is available for purchase from the National Technical Information Services, 5285 Port Royal Road, Springfield, VA 22161)

(2) "Control of Hydrocarbons from Tank Truck Gasoline Loading Terminals: Appendix A" EPA-450/2-77-026 (which is available for purchase from the National Technical Information Services, 5285 Port Royal Road, Springfield, VA 22161)

(5) *Compliance dates.* Compliance with the requirements of all rules is required by July 1, 1991, unless otherwise indicated by compliance dates contained in specific rules. This paragraph shall not operate to provide additional time for compliance under section 113(d) of the Act, 42 U.S.C. 7413(d), for sources subject to compliance upon promulgation.

(6) *Afterburners.* The operation of any natural gas fired afterburner and cap-

ture system used to comply with §52.741 is not required during the period of November 1 of any year to April 1 of the following year provided that the operation of such devices is not required for purposes of occupational safety or health, or for the control of toxic substances, odor nuisances, or other regulated pollutants.

(7) *Exemptions, variances, and alternative means of control or compliance determinations.* Notwithstanding the provisions of any other paragraphs of this section, any exemptions, variances or alternatives to the control requirements, emission limitations, or test methods in the Illinois SIP or FIP can only be allowed if approved by the Administrator as a SIP or FIP revision.

(8) *Vapor pressure of volatile organic liquids.* (i) If the VOL consists of only a single compound, the vapor pressure shall be determined by ASTM Method D2879-86 (incorporated by reference as specified in 40 CFR 52.742) or the vapor pressure may be obtained from a published source such as: Boublik, T., V. Fried and E. Hala, "The Vapor Pressure of Pure Substances," Elsevier Scientific Publishing Co., New York (1973); Perry's Chemical Engineer's Handbook, McGraw-Hill Book Company (1984); CRC Handbook of Chemistry and Physics, Chemical Rubber Publishing Company (1986-87); and Lange's Handbook of Chemistry, John A. Dean, editor, McGraw-Hill Book Company (1985).

(ii) If the VOL is a mixture, the vapor pressure shall be determined by ASTM Method D2879-86 (incorporated by reference as specified in 40 CFR 52.742) or by the following equation:

$$P_{\text{vol}} = \sum_{i=1}^n P_i X_i$$

Where:

P_{vol} = Total vapor pressure of the mixture,

n = Number of components in the mixture,

i = Subscript denoting an individual component,

P_i = Vapor pressure of a component determined in accordance with paragraph (a) of this section

X_i = Mole fraction of the component in the total mixture.

(9) *Vapor pressure of organic material or solvent.* (i) If the organic material or

§ 52.741

40 CFR Ch. I (7-1-25 Edition)

solvent consists of only a single compound, the vapor pressure shall be determined by ASTM Method D2879-86 (incorporated by reference as specified in 40 CFR 52.742) or the vapor pressure may be obtained from a published source such as: Boublik, T., V. Fried and E. Hala, "The Vapor Pressure of Pure Substances," Elsevier Scientific Publishing Co., New York (1973); Perry's Chemical Engineer's Handbook, McGraw-Hill Book Company (1984); CRC Handbook of Chemistry and Physics, Chemical Rubber Publishing Company (1986-87); and Lange's Handbook of Chemistry, John A. Dean, editor, McGraw-Hill Book Company (1985).

(ii) If the organic material or solvent is in a mixture made up of both organic material compounds and compounds which are not organic material, the vapor pressure shall be determined by the following equation:

$$P_{om} = \frac{\sum_{i=1}^n P_i X_i}{\sum_{i=1}^n X_i}$$

Where:

P_{om} = Total vapor pressure of the portion of the mixture which is composed of organic material,

n = Number of organic material components in the mixture,

i = Subscript denoting an individual component,

P_i = Vapor pressure of an organic material component determined in accordance with paragraph (a) of this section,

X_i = Mole fraction of the organic material component of the total mixture.

(iii) If the organic material or solvent is in a mixture made up of only organic material compounds, the vapor pressure shall be determined by ASTM Method D2879-86 (incorporated by reference as specified in 40 CFR 52.742) or by the above equation.

(10) *Vapor pressure of volatile organic material.* (i) If the VOM consists of only a single compound, the vapor pressure shall be determined by ASTM Method D2879-86 (incorporated by reference as specified in 40 CFR 52.742) or the vapor pressure may be obtained from a published source such as: Boublik, T., V. Fried and E. Hala, "The Vapor Pres-

sure of Pure Substances," Elsevier Scientific Publishing Co., New York (1973); Perry's Chemical Engineer's Handbook, McGraw-Hill Book Company (1984); CRC Handbook of Chemistry and Physics, Chemical Rubber Publishing Company (1986-87); and Lange's Handbook of Chemistry, John A. Dean, editor, McGraw-Hill Book Company (1985).

(ii) If the VOM is in a mixture made up of both VOM compounds and compounds which are not VOM, the vapor pressure shall be determined by the following equation:

$$P_{vom} = \frac{\sum_{i=1}^n P_i X_i}{\sum_{i=1}^n X_i}$$

Where:

P_{vom} = Total vapor pressure of the portion of the mixture which is composed of VOM,

n = Number of VOM components in the mixture,

i = Subscript denoting an individual component,

P_i = Vapor pressure of a VOM component determined in accordance with paragraph (a) of this section,

X_i = Mole fraction of the VOM component of the total mixture.

(iii) If the VOM is in a mixture made up of only VOM compounds, the vapor pressure shall be determined by ASTM Method D2879-86 (incorporated by reference as specified in 40 CFR 52.742) or by the above equation.

(b)-(c) [Reserved]

(d) *Solvent cleaning*—(1) *Solvent cleaning in general.* The requirements of subpart E (sections 215.182-215.184) of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742) shall apply to all cold cleaning, open top vapor degreasing, and conveyorized degreasing operations.

NOTE: For Federal purposes, paragraph (d)(1) supersedes subpart E (section 215.181) of 35 Ill. Adm. Code 215.)

(2) *Compliance schedule.* Every owner or operator of an emission source which was previously exempt from the requirements of subpart E (sections 215.182-215.184) of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742) because it satisfied

Environmental Protection Agency

§ 52.741

the criteria in either (d)(a)(i) or (d)(2)(ii) of this section, shall comply with the requirements of subpart E (sections 215.182–215.184) of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742) on and after July 1, 1991. A source which did not satisfy the criteria in either (d)(a)(i) or (d)(2)(ii) of this section, shall comply with the requirements of subpart E (sections 215.182–215.184) of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742) upon promulgation.

(i) If emissions of VOM exceed neither 6.8 kg (15 lbs) in any one day, nor 1.4 kg (3 lbs) in any one hour, or

(ii) If the source is used exclusively for chemical or physical analysis or for determination of product quality and commercial acceptance, provided that the operation of the source is not an integral part of the production process, the emissions of VOM from the source do not exceed 363 kg (800 lbs) in any calendar month, and the exemption had been approved in writing by the Illinois Environmental Protection Agency.

(3) *Test methods.* The following test methods shall be used to demonstrate compliance with subpart E (sections 215.182–215.184) of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742):

(i) Vapor pressures shall be determined by using the procedure specified in paragraph (a)(9) of this section.

(ii) Exhaust ventilation rates shall be determined by using the procedures specified in paragraph (a)(4)(vi)(C) of this section.

(iii) The performance of control devices shall be determined by using the procedures specified in paragraph (a)(4)(vi) of this section.

(e) *Coating operations*—(1) *Emission limitations for manufacturing plants.* (i) Except as provided in paragraph (e)(3) of this section, no owner or operator of a coating line shall apply at any time any coating in which the VOM content exceeds the following emission limitations for the specified coating. The following emission limitations are expressed in units of VOM per volume of coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied at each coating applicator, except where noted. Compounds which are specifically exempted from the definition of VOM should be treated as water for the purpose of calculating the “less water” part of the coating composition. Compliance with this paragraph must be demonstrated through the applicable coating analysis test methods and procedures specified in paragraph (a)(4)(i) of this section and the record-keeping and reporting requirements specified in paragraph (e)(6)(ii) of this section. As an alternative to compliance with this paragraph, the owner or operator of a coating line may meet the requirements of paragraph (e)(1)(ii) or paragraph (e)(2) of this section. The equation presented in paragraph (e)(1)(iii) of this section shall be used to calculate emission limitations for determining compliance by add-on controls, credits for transfer efficiency, emissions trades and cross-line averaging.

	kg/l	lb/gal
(A) Automobile or Light-Duty Truck Coating		
(1) Prime coat	0.14	(1.2)
(2) Prime surfacer coat	0.34	(2.8)
NOTE: The prime surfacer coat limitation is based upon a transfer efficiency of 30 percent. Transfer efficiency credits can only be allowed if approved by the Administrator as a SIP or FIP revision.		
(3) Topcoat	1.81	(15.1)

	kg/l	lb/gal
NOTE: The topcoat limitation is in units of kg (lbs) of VOM per l (gal) of coating solids deposited. Compliance with the limitation shall be based on the daily-weighted average VOM content from the entire topcoat operation (all topcoat spray booths, flash-off areas and bake ovens). Compliance shall be demonstrated in accordance with the topcoat protocol for automobiles and light-duty trucks referenced in paragraph (a)(4)(ii) of this section. Paragraph (e)(1)(ii) of this section does not apply to the topcoat limitation.) At least 180 days prior to the initial compliance date, the owner or operator of a coating line subject to the topcoat limitation shall submit to the Administrator a detailed proposal specifying the method of demonstrating compliance with the protocol. The proposal shall include, at a minimum, a comprehensive plan (including a rationale) for determining the transfer efficiency at each booth through the use of in-plant, or pilot testing; the selection of coatings to be tested (for the purpose of determining transfer efficiency) including the rationale for coating groupings; and the method for determining the analytic VOM content of as applied coatings and the formulation solvent content of as applied coatings. Upon approval of the protocol by the Administrator, the source may proceed with the compliance demonstration.		
(4) Final repair coat	0.58	(4.8)
(B) Can Coating		
(1) Sheet basecoat and overvarnish	0.34	(2.8)
(2) Exterior basecoat and overvarnish	0.34	(2.8)
(3) Interior body spray coat	0.51	(4.2)
(4) Exterior end coat	0.51	(4.2)
(5) Side seam spray coat	0.66	(5.5)
(6) End sealing compound coat	0.44	(3.7)
(C) Paper Coating	0.35	(2.9)
NOTE: The paper coating limitation shall not apply to any owner or operator of any paper coating line on which printing is performed if the paper coating line complies with the emissions limitations in paragraph (h)(1) of this section: Printing and Publishing.		
(D) Coil Coating	0.31	(2.6)
(E) Fabric Coating	0.35	(2.9)
(F) Vinyl Coating	0.45	(3.8)
(G) Metal Furniture Coating	0.36	(3.0)
(H) Large Appliance Coating	0.34	(2.8)
NOTE: The limitation shall not apply to the use of quick-drying lacquers for repair of scratches and nicks that occur during assembly, provided that the volume of coating does not exceed 0.95 l (1 quart) in any one rolling eight-hour period.		
(I) Magnet Wire Coating	0.20	(1.7)
(J) Miscellaneous Metal Parts and Products Coating		
(1) Clear coating	0.52	(4.3)
(2) Air-dried coating	0.42	(3.5)
(3) Extreme performance coating	0.42	(3.5)
(4) Steel pail and drum interior coating	0.52	(4.3)
(5) All other coatings	0.36	(3.0)
	kg/l	lb/gal
(K) Heavy Off-Highway Vehicle Products Coating		
(1) Extreme performance prime coat	0.42	(3.5)
(2) Extreme performance top-coat (air dried)	0.42	(3.5)
(3) Final repair coat (air dried)	0.42	(3.5)
(4) All other coatings are subject to the emission limitations for miscellaneous metal parts and products coatings in paragraph (e)(1)(i)(J) of this section.		
(L) Wood Furniture Coating		
(1) Clear topcoat	0.67	(5.6)
(2) Opaque stain	0.56	(4.7)
(3) Pigmented coat	0.60	(5.0)
(4) Repair coat	0.67	(5.6)
(5) Sealer	0.67	(5.6)
(6) Semi-transparent stain	0.79	(6.6)
(7) Wash coat	0.73	(6.1)
NOTE: An owner or operator of a wood furniture coating operation subject to this paragraph shall apply all coatings, with the exception of no more than 37.8 l (10 gal) of coating per day used for touch-up and repair operations, using one or more of the following application systems: airless spray application system, air-assisted airless spray application system, electrostatic spray application system, electrostatic bell or disc spray application system, heated airless spray application system, roller coating, brush or wipe coating application system, or dip coating application system.		
(M) Existing Diesel-Electric Locomotive Coating Lines in Cook County		
(1) Extreme performance prime coat	0.42	(3.5)
(2) Extreme performance top-coat (air dried)	0.42	(3.5)
(3) Final repair coat (air dried)	0.42	(3.5)
(4) High-temperature aluminum coating	0.72	(6.0)
(5) All other coatings	0.36	(3.0)

(ii) *Daily-weighted average limitations.* No owner or operator of a coating line subject to the limitations of paragraph (e)(1)(i) of this section and complying by means of paragraph (e)(1)(ii) of this section shall operate the subject coating line unless the owner or operator has demonstrated compliance with paragraph (e)(1) (ii)(A), (ii)(B), (ii)(C), (ii)(D), (ii)(E) or (ii)(F) of this section (depending upon the source category) through the applicable coating analysis test methods and procedures specified in paragraph (a)(4)(i) of this section and the recordkeeping and reporting requirements specified in paragraph (e)(6)(iii) of this section.

(A) No owner or operator of a coating line subject to only one of the limitations from among paragraph (e)(1) (i)(A)(1), (i)(A)(2), (i)(A)(4), (i)(C), (i)(D), (i)(E), (i)(F), (i)(G), (i)(H), or (i)(I) of this section shall apply coating on any such coating line, during any day, whose daily-weighted average VOM content exceeds the emission limitation to which the coatings are subject.

(B) No owner or operator of a miscellaneous metal parts and products coating line subject to the limitations of paragraph (e)(1)(i)(J) of this section shall apply coatings to miscellaneous metal parts or products on the subject coating line unless the requirements in paragraph (e)(1)(ii)(B) (1) or (2) of this section are met.

(1) For each coating line which applies multiple coatings, all of which are subject to the same numerical emission limitation within paragraph (e)(1)(i)(J) of this section, during the same day (*e.g.*, all coatings used on the line are subject to 0.42 kg/l [3.5 lbs/gal]), the daily-weighted average VOM content shall not exceed the coating VOM content limit corresponding to the category of coating used, or

(2) For each coating line which applies coatings from more than one of the four coating categories in paragraph (e)(1)(i)(J) of this section, during the same day, the owner or operator shall submit to and receive approval from the Administrator for a site-specific FIP revision. To receive approval, the requirements of USEPA's Emissions Trading Policy Statement (and related policy) must be satisfied.

(C) No owner or operator of a can coating facility subject to the limitations of paragraph (e)(1)(i)(B) of this section shall operate the subject coating facility using a coating with a VOM content in excess of the limitations specified in paragraph (e)(1)(i)(B) of this section unless all of the following requirements are met:

(1) An alternative daily emission limitation shall be determined according to paragraph (e)(1)(ii)(C)(2) of this section. Actual daily emissions shall never exceed the alternative daily emission limitation and shall be calculated by use of the following equation.

$$E_d = \sum_{i=1}^n V_i C_i$$

Where:

E_d = Actual VOM emissions for the day in units of kg/day (lbs/day),

i = Subscript denoting a specific coating applied,

n = Total number of coatings applied in the can coating operation,

V_i = Volume of each coating applied for the day in units of l/day (gal/day) of coating (minus water and any compounds which are specifically exempted from the definition of VOM), and

C_i = The VOM content of each coating as applied in units of kg VOM/l (lbs VOM/gal) of coating (minus water and any compounds which are specifically exempted from the definition of VOM).

(2) The alternative daily emission limitation (A_d) shall be determined on a daily basis as follows:

$$A_d = \sum_{i=1}^n \frac{V_i L_i (D_i - C_i)}{(D_i - L_i)}$$

Where:

A_d = The VOM emissions allowed for the day in units of kg/day (lbs/day),

i = Subscript denoting a specific coating applied,

n = Total number of surface coatings applied in the can coating operation,

C_i = The VOM content of each surface coating as applied in units of kg VOM/l (lbs VOM/gal) of coating (minus water and any compounds which are specifically exempted from the definition of VOM),

D_i = The density of VOM in each coating applied. For the purposes of calculating A_d , the density is 0.882 kg VOM/l VOM (7.36 lbs VOM/gal VOM),

§ 52.741

40 CFR Ch. I (7-1-25 Edition)

V_i = Volume of each surface coating applied for the day in units of l (gal) of coating (minus water and any compounds which are specifically exempted from the definition of VOM).

L_i = The VOM emission limitation for each surface coating applied as specified in paragraph (e)(1)(i)(B) of this section in units of kg VOM/l (lbs VOM/gal) of coating (minus water and any compounds which are specifically exempted from the definition of VOM).

(D) No owner or operator of a heavy off-highway vehicle products coating line subject to the limitations of paragraph (e)(1)(i)(K) of this section shall apply coatings to heavy off-highway vehicle products on the subject coating line unless the requirements of paragraph (e)(1)(ii)(D) (1) or (2) of this section are met.

(1) For each coating line which applies multiple coatings, all of which are subject to the same numerical emission limitation within paragraph (e)(1)(i)(K) of this section, during the same day (e.g., all coatings used on the line are subject to 0.42 kg/l [3.5 lbs/gal]), the daily-weighted average VOM content shall not exceed the coating VOM content limit corresponding to the category of coating used, or

(2) For each coating line which applies coatings subject to more than one numerical emission limitation in paragraph (e)(1)(i)(K) of this section, during the same day, the owner or operator shall submit to and receive approval from the Administrator for a site-specific FIP revision. To receive approval, the requirements of USEPA's Emissions Trading Policy Statement (and related policy) must be satisfied.

(E) No owner or operator of a wood furniture coating line subject to the limitations of paragraph (e)(1)(i)(L) of this section shall apply coatings to wood furniture on the subject coating line unless the requirements of paragraph (e)(1)(ii)(E) (1) or (2) of this section, in addition to the requirements specified in the note to paragraph (e)(1)(i)(L) of this section, are met.

(1) For each coating line which applies multiple coatings, all of which are subject to the same numerical emission limitation within paragraph (e)(1)(i)(L) of this section, during the same day (e.g., all coatings used on the line are subject to 0.67 kg/l [5.6 lbs/

gal]), the daily-weighted average VOM content shall not exceed the coating VOM content limit corresponding to the category of coating used, or

(2) For each coating line which applies coatings subject to more than one numerical emission limitation in paragraph (e)(1)(i)(L) of this section, during the same day, the owner or operator shall submit to and receive approval from the Administrator for a site-specific FIP revision. To receive approval, the requirements of USEPA's Emissions Trading Policy Statement (and related policy) must be satisfied.

(F) No owner or operator of an existing diesel-electric locomotive coating line in Cook County, subject to the limitations of paragraph (e)(1)(i)(M) of this section shall apply coatings to diesel-electric locomotives on the subject coating line unless the requirements of paragraph (e)(1)(ii)(F) (1) or (2) of this section are met.

(1) For each coating line which applies multiple coatings, all of which are subject to the same numerical emission limitation within paragraph (e)(1)(i)(M) of this section, during the same day (e.g., all coatings used on the line are subject to 0.42 kg/l [3.5 lbs/gal]), the daily-weighted average VOM content shall not exceed the coating VOM content limit corresponding to the category of coating used, or

(2) For each coating line which applies coatings subject to more than one numerical emission limitation in paragraph (e)(1)(i)(M) of this section, during the same day, the owner or operator shall submit to and receive approval from the Administrator for a site-specific FIP revision. To receive approval, the requirements of USEPA's Emissions Trading Policy Statement (and related policy) must be satisfied.

(iii) Limitations in terms of kg (lbs) of VOM emissions per l (gal) of solids as applied at each coating applicator shall be determined by the following equation:

$$S = \frac{C}{1 - \left(\frac{C}{D}\right)}$$

Where:

Environmental Protection Agency

§ 52.741

S = The limitation on VOM emissions in terms of kg VOM/l (lbs VOM/gal) of solids,

C = The limitation on VOM emissions in terms of kg/l (lbs/gal) of coating (minus water and any compounds which are specifically excluded from the definition of VOM) specified in paragraph (e)(1)(i) of this section,

D = The density of VOM in the coating. For the purposes of calculating S, the density is 0.882 kg VOM/l VOM (7.36 lbs VOM/gal VOM).

(2) *Alternative emission limitations.* Any owner or operator of a coating line subject to paragraph (e)(1) of this section may comply with this paragraph, rather than with paragraph (e)(1) of this section, if a capture system and control device are operated at all times and the owner or operator demonstrates compliance with paragraphs (e)(2) (ii), (iii), (iv), (v), (vi) or (vii) of this section (depending upon the source category) through the applicable coating analysis and capture system and control device efficiency test methods and procedures specified in paragraph (a)(4) of this section and the record-keeping and reporting requirements specified in paragraph (e)(6)(iv) of this section; and the control device is equipped with the applicable monitoring equipment specified in paragraph (a)(4)(iv) of this section and the monitoring equipment is installed, calibrated, operated and maintained according to vendor specifications at all times the control device is in use. The use of a capture system and control device, which does not demonstrate compliance with paragraph (e)(2) (ii), (iii), (iv), (v), (vi), or (vii), may only be used as an alternative to compliance with paragraph (e)(1) of this section if approved as a FIP revision.

(i) *Alternative add-on control methodologies.* (A) The coating line is equipped with a capture system and control device that provides 81 percent reduction in the overall emissions of VOM from the coating line and the control device has a 90 percent efficiency, or

(B) The system used to control VOM from the coating line is demonstrated to have an overall efficiency sufficient to limit VOM emissions to no more than what is allowed under paragraph

(e)(1) of this section. Use of any control system other than an afterburner, carbon absorption, condensation, or absorption scrubber system can only be allowed if approved by the Administrator as a SIP or FIP revision. Transfer efficiency credits can only be allowed if approved by the Administrator as a SIP or FIP revision. Baseline transfer efficiencies and transfer efficiency test methods must be approved by the Administrator.

Such overall efficiency is to be determined as follows:

(1) Obtain the emission limitation from the appropriate paragraph in (e)(1) of this section,

(2) Calculate "S" according to the equation in paragraph (e)(1)(iii) of this section,

(3) Calculate the overall efficiency required according to paragraph (a)(4)(v) of this section. For the purposes of calculating this value, according to the equation in (a)(4)(v)(B) of this section VOM_1 is equal to the value of "S" as determined above in (i)(B)(2).

(ii) No owner or operator of a coating line subject to only one of the emission limitations from among paragraph (e)(1)(i)(A)(1), (e)(1)(i)(A)(2), (e)(1)(i)(A)(4), (e)(1)(i)(C), (e)(1)(i)(D), (e)(1)(i)(E), (e)(1)(i)(F), (e)(1)(i)(G), (e)(1)(i)(H), or (e)(1)(i)(I) of this section and equipped with a capture system and control device shall operate the subject coating line unless the requirements in paragraph (e)(2)(i) (A) or (B) of this section are met. No owner or operator of a coating line subject to paragraph (e)(1)(i)(A)(3) of this section and equipped with a capture system and control device shall operate the coating line unless the owner or operator demonstrates compliance with the topcoat limitation in accordance with the topcoat protocol for automobile or light-duty trucks referenced in paragraph (a)(4)(ii) of this section.

(iii) No owner or operator of a miscellaneous metal parts and products coating line which applies one or more coatings during the same day, all of which are subject to the same numerical emission limitation within paragraph (e)(1)(i)(J) of this section (e.g., all coatings used on the line are subject to 0.42 kg/l [3.5 lbs/gal]), and which is equipped with a capture system and

control device shall operate the subject coating line unless the requirements in paragraph (e)(2)(i) (A) or (B) of this section are met.

(iv) No owner or operator of a heavy off-highway vehicle products coating line which applies one or more coatings during the same day, all of which are subject to the same numerical emission limitation within paragraph (e)(1)(i)(K) of this section (e.g., all coatings used on the line are subject to 0.42 kg/l [3.5 lbs/gal]), and which is equipped with a capture system and control device shall operate the subject coating line unless the requirements in paragraph (e)(2)(i) (A) or (B) of this section are met.

(v) No owner or operator of an existing diesel-electric locomotive coating line in Cook County which applies one or more coatings during the same day, all of which are subject to the same numerical emission limitation within paragraph (e)(1)(i)(M) of this section (e.g., all coatings used on the line are subject to 0.42 kg/l [3.5 lbs/gals]), and which is equipped with a capture system and control device shall operate the subject coating line unless the requirements in paragraph (e)(2)(i) (A) or (B) of this section are met.

(vi) No owner or operator of a wood furniture coating line which applies one or more coatings during the same day, all of which are subject to the same numerical emission limitation within paragraph (e)(1)(i)(L) (e.g., all coatings used on the line are subject to 0.67 kg/l [5.6 lbs/gal]), and which is equipped with a capture system and control device shall operate the subject coating line unless the requirements in paragraph (e)(2)(i) (A) or (B) of this section are met. If compliance is achieved by meeting the requirements in paragraph (e)(2)(i)(B) of this section, then the provisions in the note to paragraph (e)(1)(i)(L) of this section must also be met.

(vii) No owner or operator of a can coating facility and equipped with a capture system and control device shall operate the subject coating facility unless the requirements in paragraph (e)(2)(vii) (A) or (B) of this section are met.

(A) An alternative daily emission limitation shall be determined accord-

ing to paragraph (e)(1)(ii)(C)(2) of this section. Actual daily emissions shall never exceed the alternative daily emission limitation and shall be calculated by use of the following equation:

$$E_d = \sum_{i=1}^n V_i C_i (1 - F_i)$$

Where:

E_d = Actual VOM emissions for the day in units of kg/day (lbs/day),

i = Subscript denoting the specific coating applied,

n = Total number of surface coatings as applied in the can coating operation,

V_i = Volume of each coating as applied for the day in units of l/day (gal/day) of coating (minus water and any compounds which are specifically exempted from the definition of VOM),

C_i = The VOM content of each coating as applied in units of kg VOM/l (lbs VOM/gal) of coating (minus water and any compounds which are specifically exempted from the definition of VOM), and

F_i = Fraction, by weight, of VOM emissions from the surface coating, reduced or prevented from being emitted to the ambient air. This is the overall efficiency of the capture system and control device.

(B) The coating line is equipped with a capture system and control device that provide 75 percent reduction in the overall emissions of VOM from the coating line and the control device has a 90 percent efficiency.

(3) *Exemptions from emission limitations*—(i) *Exemptions for all source categories except wood furniture coating.* The limitations of paragraph (e) of this section shall not apply to coating lines within a facility, that otherwise would be subject to the same subparagraph of paragraph (e)(1)(i) of this section (because they belong to the same source category, e.g. can coating), provided that combined actual emissions of VOM from all lines at the facility subject to that subparagraph never exceed 6.8 kg/day (15 lbs/day) before the application of capture systems and control devices. (For example, can coating lines within a plant would not be subject to the limitations of subparagraph (e)(1)(i)(B) of this section if the combined actual emissions of VOM from the can coating lines never exceed 6.8

kg/day (15 lbs/day) before the application of capture systems and control devices.) Volatile organic material emissions from heavy off-highway vehicle products coating lines must be combined with VOM emissions from miscellaneous metal parts and products coating lines to determine applicability. Any owner or operator of a coating facility shall comply with the applicable coating analysis test methods and procedures specified in paragraph (a)(4)(i) of this section and the record-keeping and reporting requirements specified in paragraph (e)(6)(i) of this section if total VOM emissions from the subject coating lines are always less than or equal to 6.8 kg/day (15 lbs/day) before the application of capture systems and control devices and, therefore, are not subject to the limitations of paragraph (e)(1) of this section. Once a category of coating lines at a facility is subject to the limitations in paragraph (e)(1) of this section, the coating lines are always subject to the limitations in paragraph (e)(1) of this section.

(ii) *Applicability for wood furniture coating.* (A) The limitations of paragraph (e) of this section shall apply to a plant's wood furniture coating lines if the plant contains process emission sources, not regulated by paragraphs (d), (e) (excluding paragraph (e)(1)(i)(L)), (h) (excluding paragraph (h)(5)), (i), (j), or (q)(1), or subparts B, Q (excluding sections 215.432 and 215.436), R (excluding sections 215.447, 215.450, and 215.452), S, V, X, Y (sections 215.582–215.584), or Z of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742), which as a group both:

(1) Have maximum theoretical emissions of 91 Mg (100 tons) or more per calendar year of VOM if no air pollution control equipment were used, and

(2) Are not limited to less than 91 Mg (100 tons) of VOM per calendar year if no air pollution control equipment were used, through production or capacity limitations contained in a federally enforceable construction permit or SIP or FIP version.

(B) If a plant ceases to fulfill the criteria of paragraph (e)(3)(ii)(A) of this section, the limitations of paragraph (e)(1)(i)(L) of this section shall continue to apply to any wood furniture

coating line which was ever subject to the limitations of paragraph (e)(1)(i)(L) of this section.

(C) For the purposes of paragraph (e)(3)(ii) of this section, an emission source shall be considered regulated by a subpart (of the Illinois rules), section, or paragraph if it is subject to the limitations of that subpart (of the Illinois rules), section, or paragraph. An emission source is not considered regulated by a subpart (of the Illinois rules), section, or paragraph if its emissions are below the applicability cutoff level or if the source is covered by an exemption.

(D) Any owner or operator of a wood furniture coating line to which the limitations of paragraph (e) of this section are not applicable due to the criteria in paragraph (e)(3)(ii) of this section shall, upon request by the Administrator, submit records to the Administrator within 30 calendar days from the date of the request that document that the coating line is exempt from the limitations of paragraph (e) of this section.

(4) *Exemption from general rule on use of organic material.* No owner or operator of a coating line subject to the limitations of paragraph (e)(1) of this section is required to meet the limitations of subpart K (section 215.301 or 215.302) of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742), after the date by which the coating line is required to meet paragraph (e)(1) of this section.

(5) *Compliance schedule.* Except as specified in paragraph (e)(7) of this section, every owner or operator of a coating line (of a type included within paragraph (e)(1)(i) of this section) shall comply with the requirements of paragraph (e)(1), (e)(2) or (e)(3) of this section and paragraph (e)(6) of this section in accordance with the appropriate compliance schedule as specified in paragraph (e)(5)(i), (ii), (iii) or (iv) of this section.

(i) No owner or operator of a coating line which is exempt from the limitations of paragraph (e)(1) of this section because of the criteria in paragraph (e)(3)(i) of this section shall operate said coating line on or after July 1, 1991, unless the owner or operator has

complied with, and continues to comply with, paragraph (e)(6)(i) of this section. Wood furniture coating lines are not subject to paragraph (e)(6)(i) of this section.

(ii) No owner or operator of a coating line complying by means of paragraph (e)(1)(i) of this section shall operate said coating line on or after July 1, 1991, unless the owner or operator has complied with, and continues to comply with, paragraphs (e)(1)(i) and (e)(6)(ii) of this section.

(iii) No owner or operator of a coating line complying by means of paragraph (e)(1)(ii) of this section shall operate said coating line on or after July 1, 1991, unless the owner or operator has complied with, and continues to comply with, paragraphs (e)(1)(ii) and (e)(6)(iii) of this section.

(iv) No owner or operator of a coating line complying by means of paragraph (e)(2) of this section shall operate said coating line on or after July 1, 1991, unless the owner or operator has complied with, and continues to comply with, paragraphs (e)(2) and (e)(6)(iv) of this section.

(6) *Recordkeeping and reporting.* The VOM content of each coating and the efficiency of each capture system and control device shall be determined by the applicable test methods and procedures specified in paragraph (a)(4) of this section to establish the records required under paragraph (e)(6) of this section.

(i) Any owner or operator of a coating line which is exempted from the limitations of paragraph (e)(1) of this section because of paragraph (e)(3)(i) of this section shall comply with the following:

(A) By July 1, 1991, the owner or operator of a facility referenced in paragraph (e)(6)(i) of this section shall certify to the Administrator that the facility is exempt under the provisions of paragraph (e)(3)(i) of this section. Such certification shall include:

(1) A declaration that the facility is exempt from the limitations of paragraph (e)(1) of this section because of paragraph (e)(3)(i) of this section; and

(2) Calculations which demonstrate that the combined VOM emissions from all coating lines at the facility never exceed 6.8 kg (15 lbs) per day before the

application of capture systems and control devices. The following equation shall be used to calculate total VOM emissions:

$$T_e = \sum_{j=1}^m \sum_{i=1}^n (A_i B_i)_j$$

Where:

T_e = Total VOM emissions from coating lines at a facility each day before the application of capture systems and control devices in units of kg/day (lbs/day),

m = Number of coating lines at the facility,
 j = Subscript denoting an individual coating line,

n = Number of different coatings as applied each day on each coating line at the facility,

i = Subscript denoting an individual coating,

A_i = Weight of VOM per volume of each coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each day on each coating line at the facility in units of kg VOM/l (lbs VOM/gal), and

B_i = Volume of each coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each day on each coating line at the facility in units of l/day (gal/day). The instrument or method by which the owner or operator accurately measured or calculated the volume of each coating as applied on each coating line each day shall be described in the certification to the Administrator.

(B) On and after July 1, 1991, the owner or operator of a facility referenced in paragraph (e)(6)(i) of this section shall collect and record all of the following information each day for each coating line and maintain the information at the facility for a period of three years:

(1) The name and identification number of each coating as applied on each coating line.

(2) The weight of VOM per volume and the volume of each coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each day on each coating line.

(C) On and after July 1, 1991, the owner or operator of a facility exempted from the limitations of paragraph (e)(1) of this section because of paragraph (e)(3)(i) of this section shall notify the Administrator of any record showing that total VOM emissions

from the coating facility exceed 6.8 kg (15 lbs) in any day before the application of capture systems and control devices shall be reported by sending a copy of such record to the Administrator within 30 days after the exceedance occurs.

(ii) Any owner or operator of a coating line subject to the limitations of paragraph (e)(1) of this section and complying by means of paragraph (e)(1)(i) of this section shall comply with the following:

(A) By July 1, 1991, or upon initial start-up of a new coating line, or upon changing the method of compliance from an existing subject coating line from paragraph (e)(1)(ii) or paragraph (e)(2) to paragraph (e)(1)(i) of this section; the owner or operator of a subject coating line shall certify to the Administrator that the coating line will be in compliance with paragraph (e)(1)(i) of this section on and after July 1, 1991, or on and after the initial start-up date. Such certification shall include:

(1) The name and identification number of each coating as applied on each coating line.

(2) The weight of VOM per volume of each coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each day on each coating line.

(3) For coating lines subject to paragraph (e)(1)(i)(A)(3) of this section, certification shall include:

(i) The name and identification number of each coating line which will comply by means of paragraph (e)(1)(i)(A)(3) of this section,

(ii) The name and identification number of each coating as applied on each coating line,

(iii) The weight of VOM per volume of each coating as applied on each coating line,

(iv) The instrument or method by which the owner or operator will accurately measure or calculate the volume of each coating as applied each day on each coating line,

(v) The method by which the owner or operator will create and maintain records each day as required in paragraph (e)(6)(ii)(B) of this section for coating lines subject to paragraph (e)(1)(i)(A)(3) of this section,

(vi) An example format in which the records required in paragraph (e)(6)(ii)(B) of this section for coating lines subject to paragraph (e)(1)(i)(A)(3) of this section.

(B) On and after July 1, 1991, or on and after the initial start-up date, the owner or operator of a coating line subject to the limitations of paragraph (e)(1) of this section and complying by means of paragraph (e)(1)(i) of this section shall collect and record all of the following information each day for each coating line and maintain the information at the facility for a period of three years:

(1) The name and identification number of each coating as applied on each coating line.

(2) The weight of VOM per volume of each coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each day on each coating line.

(3) For coating lines subject to paragraph (e)(1)(i)(A)(3) of this section, the owner or operator shall maintain all records necessary to calculate the daily-weighted average VOM content from the coating line in accordance with the proposal submitted, and approved by the Administrator, pursuant to paragraph (e)(1)(A)(3) of this section.

(C) On and after July 1, 1991, the owner or operator of a subject coating line shall notify the Administrator in the following instances:

(1) Any record showing violation of paragraph (e)(1)(i) of this section shall be reported by sending a copy of such record to the Administrator within 30 days following the occurrence of the violation, except that any record showing a violation of paragraph (e)(1)(i)(A)(3) of this section shall be reported by sending a copy of such record to the Administrator within 15 days from the end of the month in which the violation occurred.

(2) At least 30 calendar days before changing the method of compliance with paragraph (e)(1) of this section from paragraph (e)(1)(i) to paragraph (e)(1)(ii) or paragraph (e)(2) of this section, the owner or operator shall comply with all requirements of paragraph (e)(6) (iii)(A) or (iv)(A) of this section, respectively. Upon changing the method of compliance with paragraph (e)(1)

of this section from paragraph (e)(1)(i) to paragraph (e)(1)(ii) or paragraph (e)(2) of this section, the owner or operator shall comply with all requirements of paragraph (e)(6) (iii) or (iv) of this section, respectively.

(3) For coating lines subject to paragraph (e)(1)(i)(A)(3) of this section, the owner or operator shall notify the Administrator of any change to the topcoating operation at least 30 days before the change is effected. The Administrator shall determine whether or not recertification testing is required. If the Administrator determines that recertification testing is required, then the owner or operator shall submit a proposal to the Administrator to test within 30 days and retest within 30 days of the Administrator's approval of the proposal.

(iii) Any owner or operator of a coating line subject to the limitations of paragraph (e)(1) of this section and complying by means of paragraph (e)(1)(ii) of this section shall comply with the following:

(A) By July 1, 1991, or upon initial start-up of a new coating line, or upon changing the method of compliance for an existing subject coating line from paragraph (e)(1)(i) or paragraph (e)(2) to paragraph (e)(1)(ii) of this section; the owner or operator of the subject coating line shall certify to the Administrator that the coating line will be in compliance with paragraph (e)(1)(ii) of this section on and after July 1, 1991, or on and after the initial start-up date. Such certification shall include:

(1) The name and identification number of each coating line which will comply by means of paragraph (e)(1)(ii) of this section.

(2) The name and identification number of each coating as applied on each coating line.

(3) The weight of VOM per volume and the volume of each coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each day on each coating line.

(4) The instrument or method by which the owner or operator will accurately measure or calculate the volume of each coating as applied each day on each coating line.

(5) The method by which the owner or operator will create and maintain records each day as required in paragraph (e)(6)(iii)(B) of this section.

(6) An example of the format in which the records required in paragraph (e)(6)(iii)(B) of this section will be kept.

(B) On and after July 1, 1991, or on and after the initial start-up date, the owner or operator of a coating line subject to the limitations of paragraph (e)(1) of this section and complying by means of paragraph (e)(1)(ii) of this section, shall collect and record all of the following information each day for each coating line and maintain the information at the facility for a period of three years:

(1) The name and identification number of each coating as applied on each coating line.

(2) The weight of VOM per volume and the volume of each coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each day on each coating line.

(3) The daily-weighted average VOM content of all coatings as applied on each coating line as defined in paragraph (a)(3) of this section.

(C) On and after July 1, 1991, the owner or operator of a subject coating line shall notify the Administrator in the following instances:

(1) Any record showing violation of paragraph (e)(1)(ii) of this section shall be reported by sending a copy of such record to the Administrator within 30 days following the occurrence of the violation.

(2) At least 30 calendar days before changing the method of compliance with paragraph (e) from paragraph (e)(1)(ii) to paragraph (e)(1)(i) or paragraph (e)(2) of this section, the owner or operator shall comply with all requirements of paragraph (e)(6)(ii)(A) or (iv)(A), respectively. Upon changing the method of compliance with paragraph (e) from paragraph (e)(1)(ii) to paragraph (e)(1)(i) or paragraph (e)(2) of this section, the owner or operator shall comply with all requirements of paragraph (e)(6)(ii) or (iv), respectively.

(iv) Any operator or owner of a coating line subject to the limitations of paragraph (e)(2) of this section and

complying by means of paragraph (e)(2)(ii), (iii), (iv), (v), (vi) or (vii) of this section shall comply with the following:

(A) By July 1, 1991, or upon initial start-up of a new coating line, or upon changing the method of compliance for an existing coating line from paragraph (e)(1) (i) or (ii) to paragraph (e)(2) of this section; the owner or operator of the subject coating line shall perform all tests and submit to the Administrator the results of all tests and calculations necessary to demonstrate that the subject coating line will be in compliance with paragraph (e)(2) of this section on and after July 1, 1991, or on and after the initial start-up date.

(B) On and after July 1, 1991, or on and after the initial start-up date, the owner or operator of a coating line subject to the limitations of paragraph (e)(2) of this section and complying by means of paragraph (e)(2) (ii), (iii), (iv), (v), (vi) or (vii) of this section shall collect and record all of the following information each day for each coating line and maintain the information at the facility for a period of three years:

(1) The weight of VOM per volume of coating solids as applied each day on each coating line, if complying pursuant to paragraph (e)(2)(i)(B) of this section.

(2) Control device monitoring data.

(3) A log operating time for the capture system, control device, monitoring equipment and the associated coating line.

(4) A maintenance log for the capture system, control device and monitoring equipment detailing all routine and non-routine maintenance performed including dates and duration of any outages.

(C) On and after July 1, 1991, the owner or operator of a subject coating line shall notify the Administrator in the following instances:

(1) Any record showing violation of paragraph (e)(2) of this section shall be reported by sending a copy of such record to the Administrator within 30 days following the occurrence of the violation.

(2) At least 30 calendar days before changing the method of compliance with paragraph (e) from paragraph (e)(2) to paragraph (e)(1)(i) or para-

graph (e)(1)(ii) of this section, the owner or operator shall comply with all requirements of paragraph (e)(6)(ii)(A) or (iii)(A) of this section, respectively. Upon changing the method of compliance with paragraph (e) from paragraph (e)(2) to paragraph (e)(1)(i) or paragraph (e)(1)(ii) of this section, the owner or operator shall comply with all requirements of paragraph (e)(6)(ii) or (iii) of this section, respectively.

(7) *Compliance schedule for diesel electric locomotive coatings.* Notwithstanding any other provision of this subpart, the compliance date for the emission limitations and standards for "topcoat" and "final repair coat" operations only as applied to General Motors Corporation at their diesel electric locomotive coating lines in Cook County, Illinois, codified at 40 CFR 52.741(e)(1)(i)(M) (2) and (3) is specified in this paragraph (e)(7). Compliance with the requirements of paragraph (e)(1), (e)(2) or (e)(3) of this section and paragraph (e)(6) of this section must be in accordance with the appropriate compliance schedule as specified in paragraph (e)(7)(i),(ii),(iii), or (iv) of this section.

(i) No owner or operator of a coating line which is exempt from the limitations of paragraph (e)(1) of this section because of the criteria in paragraph (e)(3)(i) of this section shall operate said coating line on or after March 25, 1995, unless the owner or operator has complied with, and continues to comply with, paragraph (e)(6)(i) of this section.

(ii) No owner or operator of a coating line complying by means of paragraph (e)(1)(i) of this section shall operate said coating line on or after March 25, 1995, unless the owner or operator has complied with, and continues to comply with, paragraph (e)(1)(i) and (e)(6)(ii) of this section.

(iii) No owner or operator of a coating line complying by means of paragraph (e)(1)(ii) of this section shall operate said coating line on or after March 25, 1995, unless the owner or operator has complied with, and continues to comply with, paragraphs (e)(1)(ii) and (e)(6)(iii) of this section.

(iv) No owner or operator of a coating line complying by means of paragraph

(e)(2) of this section shall operate said coating line on or after March 25, 1995, unless the owner or operator has complied with, and continues to comply with, paragraphs (e)(2) and (e)(6)(iv) of this section.

(8) The control requirements in this paragraph apply to the wood coating line, which coats wooden globe stand components, at Replogle Globes, Inc. (Replogle) Broadview facility in Cook County, Illinois, instead of the control requirements in paragraphs (e)(1) and (e)(2) of this section. Compliance with this paragraph must be demonstrated through the applicable coating analysis test methods and procedures specified in paragraph (a)(4)(i) of this section.

(i) After October 6, 1991, no coatings shall at any time be applied which exceed the following emission limitations for the specified coating.

(A) 6.59 pounds (lbs) Volatile Organic Material (VOM) per gallon of stain (minus water and any compounds which are specifically exempted from the definition of VOM) as applied to coat wooden globe stand components. Such stain consists of #9250 Walnut NGR Stain (RGI # W06000100), #9974 Cherry NGR Stain (RGI # W06003500) and #9943 Ash NGR Stain (RGI # W06003600). The Administrator must be notified at least ten (10) days prior to the use of any replacement stains.

(B) 5.53 lbs VOM per gallon of Sanding Sealer (minus water and any compounds which are specifically exempted from the definition of VOM) as applied to coat wooden globe stand components. Such sealer consists of #15304 High Build Sanding Sealer (RGI # W06003700). The Administrator must be notified at least ten (10) days prior to the use of any replacement sanding sealer.

(C) 5.20 lbs VOM per gallon of lacquer (minus water and any compounds which are specifically exempted from the definition of VOM) as applied to coat wooden globe stand components. Such lacquer consists of #15352 High Build Lacquer (RGI # W06003300). The Administrator shall be notified at least ten (10) days prior to the use of any replacement lacquer.

(ii) After October 6, 1991, the volume of coatings used shall not exceed the following:

(A) 5,000 gallons per year total for all coatings specified in paragraph (e)(8)(i)(A) of this section. The yearly volume of coatings used are to be calculated as follows:

(1) Compute the volume of specified coating used each month by the 15th of the following month.

(2) By the 15th of each month, add the monthly coating use for the 12 previous months (to obtain the yearly volume of coatings used).

(B) 4,000 gallons per year total for all coatings specified in paragraph (e)(8)(i)(B) of this section. The yearly volume of the coatings used are to be calculated as specified in paragraphs (e)(8)(ii)(A)(1) and (e)(8)(ii)(A)(2) of this section.

(C) 5,000 gallons per year total for all coatings specified in paragraph (e)(8)(i)(C) of this section. The yearly volume of coatings used are to be calculated as specified in paragraphs (e)(8)(ii)(A)(1) and (e)(8)(ii)(A)(2) of this section.

(iii) Beginning on October 6, 1991, the owner and operator of the Replogle Globes, Inc. plant in Broadview, Illinois shall keep the following records for each month. All records shall be retained at Replogle Globes, Inc. for three (3) years and shall be made available to the Administrator on request.

(A) the name and identification number of each coating as applied on any wood coating line.

(B) The weight of VOM per volume (determined in accordance with the procedures in paragraph (a)(4)(i) of this section) and the volume of each coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each month on any wood coating line.

(9) [Reserved]

(10) Until December 31, 1996, the control and recordkeeping requirements in this paragraph apply to the three solvent-based polyester paper coating lines (Lines C, D and E) at Riverside Laboratories' Kane County, Illinois facility, instead of the control requirements in paragraphs (e)(1) and (e)(2) of this section and the recordkeeping requirements in paragraph (e)(6) of this section. Compliance with this paragraph must be demonstrated through the applicable coating analysis test

Environmental Protection Agency

§ 52.741

methods and procedures specified in paragraph (a)(4)(i) of this section. The requirements in paragraphs (e)(1), (e)(2), and (e)(6) of this section shall apply to Riverside on and after December 31, 1996.

(i) After December 21, 1995, no coatings shall at any time be applied on Lines C, D or E which exceed 3.5 pounds (lbs.) volatile organic material (VOM) per gallon of coating (minus water and any compounds which are specifically exempted from the definition of VOM), except as provided in paragraph (e)(10)(ii) of this section.

(ii) After December 21, 1995, the following specifically identified coatings may exceed 3.5 lbs. VOM per gallon of coating (minus water and any compounds which are specifically exempted from the definition of VOM) only if they are applied on Line E and they do not exceed the limits indicated below (minus water and any compounds which are specifically exempted from the definition of VOM):

EXP-5027—4.34 lbs./gallon
PD 75 CLR—4.19 lbs./gallon
PD 75 BRN—4.18 lbs./gallon
SQZ-54—3.88 lbs./gallon
SPX-34GL—3.51 lbs./gallon

(iii) That portion of Riverside's polyester production which is manufactured with the use of any VOC, from Lines C, D, and E, may not exceed the following levels: 35 million square feet per year during and after 1992, 29 million square feet per year during and after 1994, and 25 million square feet during 1996. Compliance with this requirement shall be determined by adding the polyester production from any 12 consecutive months during and after the years indicated, through 1996. That is, the polyester production for any 12 consecutive months starting with January 1992 cannot exceed 35 million square feet; the polyester production from any 12 consecutive months starting with January 1994 cannot exceed 29 million square feet; and the polyester production for the twelve months from January through December 1996 cannot exceed 25 million square feet. Only those square feet of polyester whose production involves the use of VOC need to be restricted by the production levels in this paragraph (e)(10)(iii) of this section.

(iv) By December 21, 1995, Riverside shall certify to the Administrator that its polyester coating operations will be in compliance with paragraphs (e)(10)(i), (e)(10)(ii), and (e)(10)(iii) of this section. Such certification shall include the following:

(A) The name and identification number of each coating as applied on coating lines C, D and E.

(B) The weight of VOM per volume of each coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied on each coating line.

(v) The Administrator must be notified at least 10 days prior to the use of any polyester coating not previously identified pursuant to paragraph (e)(10)(iv) of this section. This notification must include the information specified in paragraphs (e)(10)(iv)(A) and (e)(10)(iv)(B) of this section.

(vi) On and after December 21, 1995, Riverside shall collect and record all of the following information each day for each coating and maintain the information at the facility for a period of 3 years:

(A) The name and identification number of each coating as applied.

(B) The weight of VOM per volume of each coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each day.

(C) Any record showing a VOM content in excess of the emission limits in paragraph (e)(10)(i) or (e)(10)(ii) of this section shall be reported by sending a copy of such record to the Administrator within 30 days following its collection.

(D) Any VOM besides acetone used in any coating must be identified.

(vii) Starting with the first full month after December 21, 1995, Riverside shall collect and record the figures on polyester production (in square feet), for each month and maintain the information at the facility for a period of at least 3 years.

(viii) Regardless of any other provision of paragraph (e)(10) of this section, after August 21, 1995 no coating which contains any VOM other than acetone shall at any time be applied on Line C, D, or E which exceeds 2.9 lbs. VOM per gallon of coating (minus water and any

§ 52.741

40 CFR Ch. I (7–1–25 Edition)

compounds which are specifically exempted from the definition of VOM).

(f)–(g) [Reserved]

(h) *Printing and publishing*—(1) *Flexographic and rotogravure printing.* (i) No owner or operator of a subject flexographic, packaging rotogravure or publication rotogravure printing line shall apply at any time any coating or ink unless the VOM content does not exceed the limitation specified in either paragraph (h)(1)(i)(A) or (B) of this section. Compliance with this paragraph must be demonstrated through the applicable coating or ink analysis test methods and procedures specified in paragraph (a)(4)(i) of this section and the recordkeeping and reporting requirements specified in paragraph (h)(4)(ii) of this section. As an alternative to compliance with paragraph (h)(1)(i) of this section, a subject printing line may meet the requirements of paragraph (h)(1)(ii) or (iii) of this section.

(A) Forty percent VOM by volume of the coating and ink (minus water and any compounds which are specifically exempted from the definition of VOM), or

(B) Twenty-five percent VOM by volume of the volatile content in the coating and ink.

(ii) No owner or operator of a subject flexographic, packaging rotogravure or publication rotogravure printing line shall apply coatings or inks on the subject printing line unless the weighted average, by volume, VOM content of all coatings and inks as applied each day on the subject printing line does not exceed the limitation specified in either paragraph (h)(1)(i)(A) (as determined by paragraph (h)(1)(ii)(A) or (h)(1)(i)(B) (as determined by paragraph (h)(1)(ii)(B) of this section. Compliance with this paragraph must be demonstrated through the applicable coating or ink analysis test methods and procedures specified in paragraph (a)(4)(i) of this section and the recordkeeping and reporting requirements specified in paragraph (h)(4)(iii) of this section.

(A) The following equation shall be used to determine if the weighted average VOM content of all coatings and inks as applied each day on the subject printing line exceeds the limitation

specified in paragraph (h)(1)(i)(A) of this section.

$$\text{VOM}_{(i)(A)} = \frac{\sum_{i=1}^n C_i L_i (V_{si} + V_{\text{VOM}i})}{\sum_{i=1}^n L_i (V_{si} + V_{\text{VOM}i})}$$

Where:

$\text{VOM}_{(i)(A)}$ = The weighted average VOM content in units of percent VOM by volume of all coatings and inks (minus water and any compounds which are specifically exempted from the definition of VOM) used each day,

i = Subscript denoting a specific coating or ink as applied,

n = The number of different coatings and/or inks as applied each day on a printing line,

C_i = The VOM content in units of percent VOM by volume of each coating or ink as applied (minus water and any compounds which are specifically exempted from the definition of VOM),

L_i = The liquid volume of each coating or ink as applied in units of l (gal),

V_{si} = The volume fraction of solids in each coating or ink as applied, and

$V_{\text{VOM}i}$ = The volume fraction of VOM in each coating or ink as applied.

(B) The following equation shall be used to determine if the weighted average VOM content of all coatings and inks as applied each day on the subject printing line exceeds the limitation specified in paragraph (h)(1)(i)(B) of this section.

$$\text{VOM}_{(i)(B)} = \frac{\sum_{i=1}^n C_i L_i V_{\text{VOM}i}}{\sum_{i=1}^n L_i V_{\text{VOM}i}}$$

Where:

$\text{VOM}_{(i)(B)}$ = The weighted average VOM content in units of percent VOM by volume of the volatile content of all coatings and inks used each day,

i = Subscript denoting a specific coating or ink as applied,

n = The number of different coatings and/or inks as applied each day on each printing line,

C_i = The VOM content in units of percent VOM by volume of the volatile matter in each coating or ink as applied,

L_i = The liquid volume of each coating or ink as applied in units of l (gal), and

V_{VMi} = The volume fraction of volatile matter in each coating or ink as applied.

(iii) No owner or operator of a subject flexographic, packaging rotogravure or publication rotogravure printing line equipped with a capture system and control device shall operate the subject printing line unless the owner or operator meets the requirements in paragraph (h)(1)(iii) (A), (B) or (C) and paragraphs (h)(1)(iii) (D), (E) and (F) of this section.

(A) A carbon adsorption system is used which reduces the captured VOM emissions by at least 90 percent by weight, or

(B) An incineration system is used which reduces the captured VOM emissions by at least 90 percent by weight, or

(C) An alternative VOM emission reduction system is demonstrated to have at least a 90 percent control device efficiency and the alternative emission reduction system is approved by the Administrator as a SIP or FIP revisions, and

(D) The printing line is equipped with a capture system and control device that provides an overall reduction in VOM emissions of at least:

(1) 75 percent where a publication rotogravure printing line is employed, or

(2) 65 percent where a packaging rotogravure printing line is employed, or

(3) 60 percent where a flexographic printing line is employed, and

(E) The control device is equipped with the applicable monitoring equipment specified in paragraph (a)(4)(iv)(B) of this section and the monitoring equipment is installed, calibrated, operated and maintained according to vendor specifications at all times the control device is in use, and

(F) The capture system and control device are operated at all times when the subject printing line is in operation. The owner or operator shall demonstrate compliance with this paragraph by using the applicable capture system and control device test methods and procedures specified in paragraphs (a)(4) (iii) through (vi) of this section and by complying with the recordkeeping and reporting requirements specified in paragraph (h)(4)(iv) of this section.

(2) *Applicability.* (i) The limitations of paragraph (h)(1) of this section apply to all flexographic and rotogravure printing lines at a subject facility. All facilities with flexographic and/or rotogravure printing lines are subject facilities unless:

(A) Total maximum theoretical emissions of VOM from all flexographic and rotogravure printing line(s) at the facility never exceed 90.7 Mg (100 tons) per calendar year before the application of capture systems and control devices, or

(B) A federally enforceable construction permit or SIP or FIP revision for all flexographic and rotogravure printing line(s) at a facility requires the owner or operator to limit production or capacity of these printing line(s) to reduce total VOM emissions from all flexographic and rotogravure printing line(s) to 90.7 Mg (100 tons) or less per calendar year before the application of capture systems and control devices.

(ii) Upon achieving compliance with paragraph (h) of this section, the emission source is not required to meet subpart K (sections 215.301 or 215.302) of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742). Emission sources exempt from paragraph (h) of this section are subject to subpart K (sections 215.301 or 215.302). Rotogravure or flexographic equipment used for both roll printing and paper coating are subject to paragraph (h) of this section.

(iii) Once subject to the limitations of paragraph (h)(1) of this section, a flexographic or rotogravure printing line is always subject to the limitations of paragraph (h)(1) of this section.

(iv) Any owner or operator of any flexographic or rotogravure printing line that is exempt from the limitations of paragraph (h)(1) of this section because of the criteria in paragraph (h)(2) of this section is subject to the recordkeeping and reporting requirements specified in paragraph (h)(4)(i) of this section.

(3) *Compliance schedule.* Every owner or operator of a flexographic and/or rotogravure printing line shall comply with the applicable requirements of paragraph (h)(1) of this section and

paragraph (h)(4) of this section in accordance with the applicable compliance schedule specified in paragraph (h)(3) (i), (ii), (iii) or (iv) of this section.

(i) No owner or operator of a flexographic or rotogravure printing line which is exempt from the limitations of paragraph (h)(1) of this section because the criteria in paragraph (h)(2) of this section shall operate said printing line on or after July 1, 1991, unless the owner or operator has complied with, and continues to comply with, paragraph (h)(4)(i) of this section.

(ii) No owner or operator of a flexographic or rotogravure printing line complying by means of paragraph (h)(1)(i) of this section shall operate said printing line on or after July 1, 1991, unless the owner or operator has complied with, and continues to comply with, paragraphs (h)(1)(i) and (h)(4)(ii) of this section.

(iii) No owner or operator of a flexographic or rotogravure printing line complying by means of paragraph (h)(1)(ii) of this section shall operate said printing line on or after July 1, 1991, unless the owner or operator has complied with, and continues to comply with, paragraphs (h)(1)(ii) and (h)(4)(iii) of this section.

(iv) No owner or operator of a flexographic or rotogravure printing line complying by means of paragraph (h)(1)(iii) of this section shall operate said printing line on or after July 1, 1991, unless the owner or operator has complied with, and continues to comply with, paragraphs (h)(1)(iii) and (h)(4)(iv) of this section.

(4) *Recordkeeping and reporting.* The VOM content of each coating and ink and the efficiency of each capture system and control device shall be determined by the applicable test methods and procedures specified in paragraph (a)(4) of this section to establish the records required under paragraph (h)(4) of this section.

(i) Any owner or operator of a printing line which is exempted from the limitations of paragraph (h)(1) of this section because of the criteria in paragraph (h)(2) of this section shall comply with the following:

(A) By July 1, 1991, the owner or operator of a facility to which paragraph (h)(4)(i) of this section is applicable

shall certify to the Administrator that the facility is exempt under the provisions of paragraph (h)(2) of this section. Such certification shall include:

(1) A declaration that the facility is exempt from the limitations of the criteria in paragraph (h)(1) of this section because of paragraph (h)(2) of this section, and

(2) Calculations which demonstrate that total maximum theoretical emissions of VOM from all flexographic and rotogravure printing lines at the facility never exceed 90.7 Mg (100 tons) per calendar year before the application of capture systems and control devices. Total maximum theoretical emissions of VOM for a flexographic or rotogravure printing facility is the sum of maximum theoretical emissions of VOM from each flexographic and rotogravure printing line at the facility. The following equation shall be used to calculate total maximum theoretical emissions of VOM per calendar year before the application of capture systems and control devices for each flexographic and rotogravure printing line at the facility:

$$E_p = A \times B$$

Where:

E_p = Total maximum theoretical emissions of VOM from one flexographic or rotogravure printing line in units of kg/year (lbs/year),

A = Weight of VOM per volume of solids of the coating or ink with the highest VOM content as applied each year on the printing line in units of kg VOM/l (lbs VOM/gal) of coating or ink solids, and

B = Total volume of solids for all coatings and inks that can potentially be applied each year on the printing line in units of l/year (gal/year). The instrument and/or method by which the owner or operator accurately measured or calculated the volume of each coating and ink as applied and the amount that can potentially be applied each year on the printing line shall be described in the certification to the Administrator.

(B) On and after July 1, 1991, the owner or operator of a facility referenced in paragraph (h)(4)(i) of this section shall collect and record all of the following information each year for each printing line and maintain the information at the facility for a period of three years:

Environmental Protection Agency

§ 52.741

(1) The name and identification number of each coating and ink as applied on each printing line.

(2) The VOM content and the volume of each coating and ink as applied each year on each printing line.

(C) On and after July 1, 1991, the owner or operator of a facility exempted from the limitations of paragraph (h)(1) of this section because of the criteria in paragraph (h)(2) of this section shall notify the Administrator of any record showing that total maximum theoretical emissions of VOM from all printing lines exceed 90.7 Mg (100 tons) in any calendar year before the application of capture systems and control devices, shall be reported by sending a copy of such record to the Administrator within 30 days after the exceedance occurs.

(ii) Any owner or operator of a printing line subject to the limitations of paragraph (h)(1) of this section and complying by means of paragraph (h)(1)(i) of this section shall comply with the following:

(A) By July 1, 1991, or upon initial start-up of a new printing line, or upon changing the method of compliance from an existing subject printing line from paragraph (h)(1) (ii) or (iii) of this section to paragraph (h)(1)(i) of this section, the owner or operator of a subject printing line shall certify to the Administrator that the printing line will be in compliance with paragraph (h)(1)(i) of this section on and after July 1, 1991, or on and after the initial start-up date. Such certification shall include:

(1) The name and identification number of each coating and ink as applied on each printing line.

(2) The VOM content of each coating and ink as applied each day on each printing line.

(B) On and after July 1, 1991, or on and after the initial start-up date, the owner or operator of a printing line subject to the limitations of paragraph (h)(1) of this section and complying by means of paragraph (h)(1)(i) of this section shall collect and record all of the following information each day for each coating line and maintain the information at the facility for a period of three years:

(1) The name and identification number of each coating and ink as applied on each printing line.

(2) The VOM content of each coating and ink as applied each day on each printing line.

(C) On and after July 1, 1991, the owner or operator of a subject printing line shall notify the Administrator in the following instances:

(1) Any record showing violation of paragraph (h)(1)(i) of this section shall be reported by sending a copy of such record to the Administrator within 30 days following the occurrence of the violation.

(2) At least 30 calendar days before changing the method of compliance with paragraph (h)(1) of this section from paragraph (h)(1)(i) of this section to paragraph (h)(1) (ii) or (iii) of this section, the owner or operator shall comply with all requirements of paragraph (h)(4) (iii)(A) or (iv)(A) of this section respectively. Upon changing the method of compliance with paragraph (h)(1) from paragraph (h)(1)(i) to paragraph (h)(1) (ii) or (iii) of this section, the owner or operator shall comply with all requirements of paragraph (h)(4) (iii) or (iv) of this section, respectively.

(iii) Any owner or operator of a printing line subject to the limitations of paragraph (h)(1) of this section and complying by means of paragraph (h)(1)(ii) of this section shall comply with the following:

(A) By July 1, 1991, or upon initial start-up of a new printing line, or upon changing the method of compliance for an existing subject printing line from paragraph (h)(1) (i) or (iii) of this section to paragraph (h)(1)(ii) of this section, the owner or operator of the subject printing line shall certify to the Administrator that the printing line will be in compliance with paragraph (h)(1)(ii) of this section on and after July 1, 1991, or on and after the initial start-up date. Such certification shall include:

(1) The name and identification number of each printing line which will comply by means of paragraph (h)(1)(ii) of this section.

(2) The name and identification number of each coating and ink available for use on each printing line.

(3) The VOM content of each coating and ink as applied each day on each printing line.

(4) The instrument or method by which the owner or operator will accurately measure or calculate the volume of each coating and ink as applied each day on each printing line.

(5) The method by which the owner or operator will create and maintain records each day as required in paragraph (h)(4)(iii)(B) of this section.

(6) An example of the format in which the records required in paragraph (h)(4)(iii)(B) of this section will be kept.

(B) On and after July 1, 1991, or on and after the initial start-up date, the owner or operator of a printing line subject to the limitations of paragraph (h)(1) of this section and complying by means of paragraph (h)(1)(ii) of this section shall collecting line and maintain the information at the facility for a period of three years:

(1) The name and identification number of each coating and ink as applied on each printing line.

(2) The VOM content and the volume of each coating and ink as applied each day on each printing line.

(3) The daily-weighted average VOM content of all coatings and inks as applied on each printing line.

(C) On and after July 1, 1991, the owner or operator of a subject printing line shall notify the Administrator in the following instances:

(1) Any record showing violation of paragraph (h)(1)(ii) of this section shall be reported by sending a copy of such record to the Administrator within 30 days following the occurrence of the violation.

(2) At least 30 calendar days before changing the method of compliance with paragraph (h)(1) of this section from paragraph (h)(1)(ii) to paragraph (h)(1)(i) or (iii) of this section, the owner or operator shall comply with all requirements of paragraph (h)(4)(ii)(A) or (iv)(A), respectively. Upon changing the method of compliance with paragraph (h)(1) from paragraph (h)(1)(ii) to paragraph (h)(1)(i) or (iii), the owner or operator shall comply with all requirements of paragraph (h)(4)(ii) or (iv) of this section, respectively.

(iv) Any owner or operator of a printing line subject to the limitations of paragraph (h)(1) of this section and complying by means of paragraph (h)(1)(iii) of this section shall comply with the following:

(A) By July 1, 1991, or upon initial start-up of a new printing line, or upon changing the method of compliance for an existing printing line from paragraph (h)(1)(i) or (ii) of this section to paragraph (h)(1)(iii) of this section, the owner or operator of the subject printing line shall perform all tests and submit to the Administrator the results of all tests and calculations necessary to demonstrate that the subject printing line will be in compliance with paragraph (h)(1)(iii) of this section on and after July 1, 1991, or on and after the initial start-up date.

(B) On and after July 1, 1991, or on and after the initial start-up date, the owner or operator of a printing line subject to the limitations of paragraph (h)(1) of this section and complying by means of paragraph (h)(1)(iii) of this section shall collect and record all of the following information each day for each printing line and maintain the information at the facility for a period of three years:

(1) Control device monitoring data.

(2) A log of operating time for the capture system, control device, monitoring equipment and the associated printing line.

(3) A maintenance log for the capture system, control device and monitoring equipment detailing all routine and non-routine maintenance performed including dates and duration of any outages.

(C) On and after July 1, 1991, the owner or operator of a subject printing line shall notify the Administration in the following instances:

(1) Any record showing violation of paragraph (h)(1)(iii) of this section shall be reported by sending a copy of such record to the Administrator within 30 days following the occurrence of the violation.

(2) At least 30 calendar days before changing the method of compliance with paragraph (h)(1) from paragraph (h)(1)(iii) to paragraph (h)(1)(i) or (ii), the owner or operator shall comply with all requirements of paragraph

(h)(4) (ii)(A) or (iii)(A) of this section, respectively. Upon changing the method of compliance with paragraph (h)(1) from paragraph (h)(1)(iii) to paragraph (h)(1) (i) or (ii) of this section, the owner or operator shall comply with all requirements of paragraph (h)(4) (ii) or (iii) of this section, respectively.

(5) *Heatset-web-offset lithographic printing—(i) Applicability.* (A) The limitations of paragraph (h)(5)(ii) of this section apply to all heatset-web-offset lithographic printing lines at a subject facility. All facilities with heatset-web-offset lithographic printing lines are subject facilities unless:

(1) Total maximum theoretical emissions of VOM from all heatset-web-offset lithographic printing lines at the facility never exceed 90.7 Mg (100 tons) per calendar year in the absence of air pollution control equipment, or

(2) A federally enforceable construction permit or SIP or FIP revision for all heatset-web-offset lithographic printing line(s) at a facility requires the owner or operator to limit production or capacity of these printing line(s) to reduce total VOM emissions from all heatset-web-offset lithographic printing line(s) to 90.7 Mg (100 tons) per calendar year or less in the absence of air pollution control equipment, and

(B) Any owner or operator of any heatset-web-offset lithographic printing line that is exempt from the limitations in paragraph (h)(5)(ii) of this section because of the criteria in paragraph (h)(5)(i)(A) of this section shall be subject to the recordkeeping and reporting requirements in paragraph (h)(5)(iii)(A) of this section.

(ii) *Specific provisions.* No owner or operator of a subject heatset-web-offset printing line may cause or allow the operation of the subject heatset-web-offset printing line unless the owner or operator meets the requirements in paragraph (h)(5)(ii) (A) or (B) of this section and the requirements in paragraphs (h)(5)(ii) (C) and (D) of this section.

(A) An afterburner system is installed and operated that reduces 90 percent of the VOM emissions from the dryer exhaust, or

(B) The fountain solution contains no more than 8 percent, by weight, of

VOM and a condensation recovery system is installed and operated that removes at least 75 percent of the non-isopropyl alcohol organic materials from the dryer exhaust, and

(C) The control device is equipped with the applicable monitoring equipment specified in paragraph (a)(4)(iv)(B) of this section and the monitoring equipment is installed, calibrated, operated and maintained according to vendor specifications at all times the control device is in use, and

(D) The control device is operated at all times when the subject printing line is in operation. The owner or operator shall demonstrate compliance with paragraph (h)(5) of this section by using the applicable test methods and procedures specified in paragraphs (a)(4) (i), (iv), and (vi) of this section and by complying with the recordkeeping and reporting requirements specified in paragraph (h)(5)(iii) of this section.

(iii) *Recordkeeping and reporting.* The VOM content of each fountain solution and ink and the efficiency of each control device shall be determined by the applicable test methods and procedures specified in paragraph (a)(4) of this section to establish the records required under paragraph (h)(5)(iii) of this section.

(A) Any owner or operator of a printing line which is exempted from the limitations of paragraph (h)(5)(ii) of this section because of the criteria in paragraph (h)(5)(i) of this section shall comply with the following:

(1) By July 1, 1991, the owner or operator of a facility to which paragraph (h)(5)(iii)(A) of this section is applicable shall certify to the Administrator that the facility is exempt under the provisions of paragraph (h)(5)(i) of this section. Such certification shall include:

(i) A declaration that the facility is exempt from the limitations of paragraph (h)(5)(ii) of this section because of the criteria in paragraph (h)(5)(i) of this section, and

(ii) Calculations which demonstrate that total maximum theoretical emissions of VOM from all heatset-web-offset lithographic printing lines at the facility never exceed 90.7 Mg (100 tons)

per calendar year before the application of air pollution control equipment. Total maximum theoretical emissions of VOM for a heatset-web-offset lithographic printing facility is the sum of maximum theoretical emissions of VOM from each heatset-web-offset lithographic printing line at the facility. The following equation shall be used to calculate total maximum theoretical emissions of VOM per calendar year in the absence of air pollution control equipment for each heatset-web-offset lithographic printing line at the facility.

$$E_p = (A \times B) + \frac{(C \times D)}{100}$$

Where:

E_p = Total maximum theoretical emissions of VOM from one heatset-web-offset printing line in units of kg/year (lbs/year),

A = Weight of VOM per volume of solids of ink with the highest VOM content as applied each year on the printing line in units of kg VOM/l (lbs VOM/gal) of solids, and

B = Total volume of solids for all inks that can potentially be applied each year on the printing line in units of l/year (gal/year). The instrument or method by which the owner or operator accurately measured or calculated the volume of each ink as applied and the amount that can potentially be applied each year on the printing line shall be described in the certification to the Administrator.

C = The weight percent VOM of the fountain solution with the highest VOM content.

D = The total volume of fountain solution that can potentially be used each year on the printing line in units of l/year (gal/year). The instrument and/or method by which the owner or operator accurately measured or calculated the volume of each fountain solution used and the amount that can potentially be used each year on the printing line shall be described in the certification to the Administrator.

(2) On and after July 1, 1991, the owner or operator of a facility to which paragraph (h)(5)(iii)(A) of this section is applicable shall collect and record all of the following information each year for each printing line and maintain the information at the facility for a period of three years:

(i) The name and identification of each fountain solution and ink as applied on each printing line.

(ii) The VOM content and the volume of each fountain solution and ink as applied each year on each printing line.

(3) On and after July 1, 1991, the owner or operator of a facility exempted from the limitations of paragraph (h)(5)(ii) of this section because of the criteria in paragraph (h)(5)(i) of this section shall notify the Administrator of any record showing that total maximum theoretical emissions of VOM from all printing lines exceed 90.7 Mg (100 tons) in any calendar year in the absence of air pollution control equipment shall be reported by sending a copy of such record to the Administrator within 30 days after the exceedance occurs.

(B) Any owner or operator of a printing line subject to the limitations of paragraph (h)(5)(ii) of this section and complying by means of paragraph (h)(5)(ii)(A) of this section shall comply with the following:

(1) By July 1, 1991, or upon initial start-up of a new printing line, or upon changing the method of compliance for an existing printing line from paragraph (h)(5)(ii)(B) to (ii)(A) of this section, the owner or operator of the subject printing line shall perform all tests and submit to the Administrator the results of all tests and calculations necessary to demonstrate that the subject printing line will be in compliance with paragraph (h)(5)(ii)(A) of this section on and after July 1, 1991, or on and after the initial start-up date.

(2) On and after July 1, 1991, or on and after the initial start-up date, the owner or operator of a printing line subject to the limitations of paragraph (h)(5)(ii) of this section and complying by means of paragraph (h)(5)(ii)(A) of this section shall collect and record the following information each day for each printing line and maintain the information at the facility for a period of three years:

(i) Control device monitoring data.

(ii) A log of operating time for the control device, monitoring equipment and the associated printing line.

(iii) A maintenance log for the control device and monitoring equipment detailing all routine and nonroutine

Environmental Protection Agency

§ 52.741

maintenance performed including dates and duration of any outages.

(3) On and after July 1, 1991, the owner or operator of a subject printing line shall notify the Administrator in the following instances:

(i) Any record showing violation of paragraph (h)(5)(ii)(A) of this section shall be reported by sending a copy of such record to the Administrator within 30 days following the occurrence of the violation.

(ii) At least 30 calendar days before changing the method of compliance with paragraph (h)(5)(ii) of this section from paragraph (h)(5)(ii)(A) to (ii)(B), the owner or operator shall comply with all requirements of paragraph (h)(5)(iii)(C)(I) of this section. Upon changing the method of compliance with paragraph (h)(5)(ii) from paragraph (h)(5)(ii)(A) to (ii)(B) of this section the owner or operator shall comply with all requirements of paragraph (h)(5)(iii)(C) of this section.

(C) Any owner or operator of a printing line subject to the limitations of paragraph (h)(5)(ii) of this section and complying by means of paragraph (h)(5)(ii)(B) of this section shall comply with the following:

(I) By July 1, 1991, or upon initial start-up of a new printing line, or upon changing the method of compliance for an existing printing line from paragraph (h)(5)(ii)(A) to (ii)(B) of this section, the owner or operator of the subject printing line shall perform all tests and submit to the Administrator the results of all tests and calculations necessary to demonstrate that the subject printing line will be in compliance with paragraph (h)(5)(ii)(B) of this section on and after July 1, 1991, or on and after the initial start-up date.

(2) On and after July 1, 1991, or on and after the initial start-up date, the owner or operator of a printing line subject to the limitations of paragraph (h)(5)(ii) of this section and complying by means of paragraph (h)(5)(ii)(B) of this section shall collect and record the following information each day for each printing line and maintain the information at the facility for a period of three years:

(i) The VOM content of the fountain solution used each day on each printing line.

(ii) A log of operating time for the control device and the associated printing line.

(iii) A maintenance log for the control device detailing all routine and non-routine maintenance performed including dates and duration of any outages.

(3) On and after July 1, 1991, the owner or operator of a subject printing line shall notify the Administrator in the following instances:

(i) Any record showing violation of paragraph (h)(5)(ii)(B) of this section shall be reported by sending a copy of such record to the Administrator within 30 days following the occurrence of the violation.

(ii) At least 30 calendar days before changing the method of compliance with paragraph (h)(5)(ii) of this section from paragraph (h)(5)(ii)(B) to (h)(5)(ii)(A) of this section, the owner or operator shall comply with all requirements of paragraph (h)(5)(iii)(B)(I) of this section. Upon changing the method of compliance with paragraph (h)(5)(ii) of this section from paragraph (h)(5)(ii)(B) to (h)(5)(ii)(A) of this section, the owner or operator shall comply with all requirements of paragraph (h)(5)(iii)(B) of this section.

(iv) *Compliance schedule.* Every owner or operator of a heatset-web-offset lithographic printing line shall comply with the applicable requirements of paragraphs (h)(5)(ii) and (iii) of this section in accordance with the applicable compliance schedule specified in paragraph (h)(5)(iv) (A), (B) or (C) of this section.

(A) No owner or operator of a heatset-web-offset lithographic printing line which is exempt from the limitations of paragraph (h)(5)(ii) of this section because of the criteria in paragraph (h)(5)(i) of this section shall operate said printing line on or after July 1, 1991, unless the owner or operator has complied with, and continues to comply with, paragraphs (h)(5)(iii)(A) and (h)(5)(ii)(A) of this section.

(B) No owner or operator of a heatset-web-offset lithographic printing line complying by means of paragraph (h)(5)(ii)(A) of this section shall operate said printing line on or after July 1, 1991, unless the owner or operator has complied with, and continues

to comply with, paragraphs (h)(5)(iii)(B) and (h)(5)(ii)(B) of this section.

(C) No owner or operator of a heatset-web-offset lithographic printing line complying by means of paragraph (h)(5)(ii)(B) of this section shall operate said printing line on or after July 1, 1991, unless the owner or operator has complied with, and continues to comply with, paragraph (h)(5)(iii)(C) of this section.

(6) The control and recordkeeping and reporting requirements, as well as the test methods in this paragraph, apply to the rotogravure and flexographic presses at General Packaging Products, Inc.'s (GPP) plant in Chicago, Illinois, instead of the requirements in 40 CFR 52.741(h)(1) through 40 CFR 52.741(h)(5).

(i) After July 1, 1992, no inks or other volatile organic material (VOM) containing materials shall at any time be applied or used which have a higher percent VOM by weight than the following:

(A) 8 percent VOM by weight for waterbased inks as applied on GPP's presses.

(B) 82 percent VOM by weight for solvent based inks as applied on GPP's presses.

(C) 100 percent VOM by weight for all other VOM containing materials (besides inks) as used on GPP's presses.

(ii) After July 1, 1992, the weight of ink and other VOM containing materials used shall not exceed the following:

(A) 200,000 pounds per year total for all waterbased inks, as applied (including dilution material). The yearly weight of waterbased inks used is to be calculated according to the procedure in paragraph (h)(6)(iii) of this section.

(B) 100,008 pounds per year total for all solvent based inks, as applied (including dilution material). The yearly weight of solvent based inks used is to be calculated according to the procedure in paragraph (h)(6)(iii) of this section.

(C) 100,000 pounds per year total (based upon the formulation of the material as it is used on the presses) for all other VOM containing materials (besides inks). The yearly weight of other VOM containing materials is to

be calculated according to the procedure in paragraph (h)(6)(iii) of this section.

(iii) The yearly weight of ink/material used is to be calculated as follows:

(A) Compute the weight of ink/material used each month by the 15th of the following month.

(B) By the 15th of each month, add the monthly ink/material usage for the 12 previous months (to obtain the yearly weight of ink/material used).

(iv) Beginning on July 1, 1992, the owner and operator of GPP's plant in Chicago, Illinois, shall keep the following records for each month. All records shall be retained at GPP for 3 years and shall be made available to the Administrator on request:

(A) The name and identification number of each waterbased ink, each solvent based ink, and each other VOM containing material as applied or used on any press.

(B) The pounds of waterbased ink as applied on all presses for each month and the percent VOM by weight for each waterbased ink as applied on any press for each month.

(C) The pounds of solvent based ink as applied on all presses for each month and the percent VOM by weight for each solvent based ink as applied on any press for each month.

(D) The pounds of other (non-ink) VOM containing material used on all presses for each month and the percent VOM by weight for each (non-ink) VOM containing material as used on any press for each month.

(v) Any record showing a violation of paragraph (h)(6)(i) or (h)(6)(ii) of this section shall be reported by sending a copy of such record to the Administrator within 30 days of the violation.

(vi) To determine compliance with paragraphs (h)(6)(i) and (h)(6)(ii) of this section and to establish the records required under paragraph (h)(6)(iv) of this section the percent VOM by weight of each ink and other VOM containing material shall be determined by the applicable test methods and procedures specified in paragraph (a)(4) of this section.

(i) *Leaks from synthetic organic chemical and polymer manufacturing equipment—(1) Inspection program for leaks.* The owner or operator of a synthetic

Environmental Protection Agency

§ 52.741

organic chemical or polymer manufacturing plant subject to paragraph (i) and subpart Q (sections 215.430, 215.431, 215.433, 215.434, 215.435, and 215.437) of Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742) shall, for the purposes of detecting leaks, conduct a component inspection program using the test methods specified in Method 21, 40 CFR part 60, appendix A, consistent with the following provisions:

(i) Test annually those components operated near extreme temperature or pressure such that they would be unsafe to routinely monitor and those components which would require the elevation of monitoring personnel higher than two meters above permanent worker access structures or surfaces.

(ii) Test quarterly all other pressure relief valves in gas service, pumps in light liquid service, valves in light liquid service and in gas service, and compressors.

(iii) If less than or equal to 2 percent of the valves in light liquid service and in gas service tested pursuant to paragraph (i)(1)(ii) of this section are found not to leak for five consecutive quarters, no leak tests shall be required for three consecutive quarters. Thereafter, leak tests shall resume for the next quarter. If that test shows less than or equal to 2 percent of the valves in light liquid service and in gas service are leaking, then no tests are required for the next three quarters. If more than 2 percent are leaking, then tests are required for the next five quarters.

(iv) Observe visually all pump seals weekly.

(v) Test immediately any pump seal from which liquids are observed dripping.

(vi) Test any relief valve within 24 hours after it has vented to the atmosphere.

(vii) Routine instrument monitoring of valves which are not externally regulated, flanges, and equipment in heavy liquid service, is not required. However, any valve which is not externally regulated, flange or piece of equipment in heavy liquid service that is found to be leaking on the basis of sight, smell or sound shall be repaired

as soon as practicable but no later than 30 days after the leak is found.

(viii) Test immediately after repair any component that was found leaking.

(ix) Within one hour of its detection, a weatherproof, readily visible tag, in bright colors such as red or yellow, bearing an identification number and the date on which the leak was detected must be affixed on the leaking component and remain in place until the leaking component is repaired.

(x) The following components are exempt from the monitoring requirements in paragraph (i)(1) of this section:

(A) Any component that is in vacuum service, and

(B) Any pressure relief valve that is connected to an operating flare header or vapor recovery device.

(2) *Alternative program for leaks.* The Administrator shall approve an alternative program of monitoring, record-keeping, or reporting to that prescribed in paragraph (i) and subpart Q (sections 215.430, 215.431, 215.433, 215.434, 215.435, and 215.437) of Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742), upon a demonstration by the owner or operator of such plant that the alternative program will provide plant personnel and USEPA personnel with an equivalent ability to identify and repair leaking components. Any alternative program can only be allowed if approved by the Administrator as a SIP or FIP revision.

(j) *Petroleum refining and related industries: asphalt materials—(1) Monitoring program for leaks.* (i) The owner or operator of a petroleum refinery subject to subpart R (section 215.445) of Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742) shall, for the purpose of detecting leaks, conduct a component monitoring program consistent with the following provisions:

(A) Test once between March 1 and June 1 of each year, by methods referenced in paragraph (a)(4)(vii) of this section, all pump seals, pipeline valves in liquid service and process drains.

(B) Test once each quarter of each calendar year, by methods referenced in paragraph (a)(4)(vii) of this section, all pressure relief valves in gaseous

service, pipeline valves in gaseous service and compressor seals.

(C) Inaccessible valves may be tested once each calendar year instead of once each quarter of each calendar year.

(D) Observe visually all pump seals weekly.

(E) Test immediately any pump seal from which liquids are observed dripping.

(F) Test any relief valve within 24 hours after it has vented to the atmosphere, and

(G) Test immediately after repair any component that was found leaking.

(ii) Storage tank valves and pressure relief devices connected to an operating flare header or vapor recovery device are exempt from the monitoring requirements in paragraph (j)(1)(i) of this section.

(iii) The Administrator may require more frequent monitoring than would otherwise be required by paragraph (j)(1)(i) of this section for components which are demonstrated to have a history of leaking.

(2) *Alternative program for leaks.* The Administrator may approve an alternative program of monitoring, record-keeping or reporting to that prescribed in paragraph (j)(1) of this section and subpart R (sections 215.446, 215.448, and 215.449) of Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742), upon a demonstration by the owner or operator of a petroleum refinery that the alternative program will provide refinery and USEPA personnel with an equivalent ability to identify and repair leaking components. Any alternative program can only be allowed if approved by the Administrator as a SIP or FIP revision.

(3) *Compliance schedule for leaks.* The owner or operator of a petroleum refinery shall adhere to the increments of progress contained in the following schedule:

(i) Submit to the Administrator a monitoring program consistent with subpart R (section 215.446) of Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742) prior to September 1, 1990.

(ii) Submit to the Administrator the first monitoring report pursuant to subpart R (section 215.449) of Ill. Adm. Code 215 (incorporated by reference as

specified in 40 CFR 52.742) prior to October 1, 1990.

(k)–(1) [Reserved]

(m) *Pharmaceutical manufacturing*—(1) *Applicability.* (i) The rules of paragraph (m) of this section, except for paragraphs (m)(4) through (m)(6) of this section, apply to all emission sources of VOM, including but not limited to reactors, distillation units, dryers, storage tanks for VOL, equipment for the transfer of VOL, filters, crystallizers, washers, laboratory hoods, pharmaceutical coating operations, mixing operations and centrifuges used in manufacturing, including packaging, of pharmaceuticals, and emitting more than 6.8 kg/day (15 lbs/day) and more than 2,268 kg/year (2.5 tons/year) of VOM. If an emission source emits less than 2,268 kg/year (2.5 tons/year) of VOM, the requirements of this paragraph still apply to the emission source if VOM emissions from the emission source exceed 45.4 kg/day (100 lbs/day).

(ii) Notwithstanding paragraph (m)(1)(i) of this section, the air suspension coater/dryer, fluid bed dryers, tunnel dryers, and Accelacotas located in Libertyville Township, Lake County, Illinois shall be exempt from the rules of paragraph (m) of this section, except for paragraphs (m)(4) through (m)(6) of this section, if emissions of VOM not vented to air pollution control equipment do not exceed the following levels:

(A) For the air suspension coater/dryer: 2,268 kg/year (2.5 tons/year);

(B) For each fluid bed dryer: 4,535 kg/year (5.0 tons/year);

(C) For each tunnel dryer: 6,803 kg/year (7.5 tons/year); and

(D) For each Accelacota: 6,803 kg/year (7.5 tons/year).

(iii) Paragraphs (m)(4) through (m)(6) of this section apply to a plant having one or more emission sources that:

(A) Are used to manufacture pharmaceuticals, and

(B) Emit more than 6.8 kg/day (15 lbs/day) of VOM and more than 2,268 kg/year (2.5 tons/year) of VOM, or, if less than 2,268 kg/year (2.5 tons/year), these paragraphs still apply if emissions from one or more sources exceed 45.4 kg/day (100 lbs/day).

(iv) No owner or operator shall violate any condition in a permit when

the condition results in exclusion of an emission source from paragraph (m) of this section.

(v) Any pharmaceutical manufacturing source that becomes subject to the provisions of paragraph (m) of this section at any time shall remain subject to the provisions of paragraph (m) of this section at all times.

(vi) Emissions subject to paragraph (m) of this section shall be controlled at all times consistent with the requirements set forth in paragraph (m) of this section.

(vii) Control devices required pursuant to paragraph (m) of this section shall be operated at all times when the source it is controlling is operated.

(viii) Determinations of daily and annual emissions for purposes of paragraph (m)(1) of this section shall be made using both data on the hourly emission rate (or the emissions per unit of throughput) and appropriate daily and annual data from records of emission source operation (or material throughput or material consumption data). In the absence of representative test data pursuant to paragraph (m)(8) of this section for the hourly emission rate (or the emissions per unit of throughput), such items shall be calculated using engineering calculations, including the methods described in appendix B of "Control of Volatile Organic Emissions from Manufacturing of Synthesized Pharmaceutical Products" (EPA-450/2-78-029). (This subparagraph shall not affect the Administrator's authority to require emission tests to be performed pursuant to paragraph (m)(8) of this section.)

(2) *Control of reactors, distillation units, crystallizers, centrifuges and vacuum dryers.* (i) The owner or operator shall equip all reactors, distillation units, crystallizers, centrifuges and vacuum dryers that are used to manufacture pharmaceuticals with surface condensers or other air pollution control equipment listed in paragraph (m)(2)(i)(B) of this section.

(A) If a surface condenser is used, it shall be operated such that the condenser outlet gas temperature does not exceed:

(1) 248.2 K (−13 °F) when condensing VOM of vapor pressure greater than 40.0 kPa (5.8 psi) at 294.3 K (70 °F), or

(2) 258.2 K (5 °F) when condensing VOM of vapor pressure greater than 20.0 kPa (2.9 psi) at 294.3 K (70 °F), or

(3) 273.2 K (32 °F) when condensing VOM of vapor pressure greater than 10.0 kPa (1.5 psi) at 294.3 K (70 °F), or

(4) 283.2 K (50 °F) when condensing VOM of vapor pressure greater than 7.0 kPa (1.0 psi) at 294.3 K (70 °F), or

(5) 298.2 K (77 °F) when condensing VOM of vapor pressure greater than 3.45 kPa (0.5 psi) at 294.3 K (70 °F).

(B) If a scrubber, carbon adsorption, thermal afterburner, catalytic afterburner, or other air pollution control equipment other than a surface condenser is used, such equipment shall provide a reduction in the emissions of VOM of 90 percent or more.

(ii) The owner or operator shall enclose all centrifuges used to manufacture pharmaceuticals and that have an exposed VOL surface, where the VOM in the VOL has a vapor pressure of 3.45 kPa (0.5 psi) or more at 294.3 K (70 °F), except as production, sampling, maintenance, or inspection procedures require operator access.

(3) *Control of air dryers, production equipment exhaust systems and filters.* (i) The owner or operator of an air dryer or production equipment exhaust system used to manufacture pharmaceuticals shall control the emissions of VOM from such emission sources by air pollution control equipment which reduces by 90 percent or more the VOM that would otherwise be emitted into the atmosphere.

(ii) The owner or operator shall enclose all rotary vacuum filters and other filters used to manufacture pharmaceuticals and that have an exposed VOL surface, where the VOM in the VOL has a vapor pressure of 3.45 kPa (0.5 psi) or more at 294 K (70 °F), except as production, sampling, maintenance, or inspection procedures require operator access.

(4) *Material storage and transfer.* The owner or operator of a pharmaceutical manufacturing plant shall:

(i) Provide a vapor balance system that is at least 90 percent effective in reducing VOM emissions from truck or railcar deliveries to storage tanks with capacities equal to or greater than 7.57 m³ (2,000 gal) that store VOL with

vapor pressures greater than 28.0 kPa (4.1 psi) at 294.3 K (70 °F), and

(ii) Install, operate, and maintain pressure/vacuum conservation vents set at 0.2 kPa (0.03 psi) or greater on all storage tanks that store VOL with vapor pressures greater than 10 kPa (1.5 psi) at 294.3 K (70 °F).

(5) *In-process tanks.* The owner or operator shall install covers on all in-process tanks used to manufacture pharmaceuticals and containing a VOL at any time. These covers must remain closed, except as production, sampling, maintenance or inspection procedures require operator access.

(6) *Leaks.* The owner or operator of a pharmaceutical manufacturing plant shall repair any component from which a leak of VOL can be observed. The repair shall be completed as soon as practicable but no later than 15 days after the leak is found. If the leaking component cannot be repaired until the process unit is shut down, the leaking component must then be repaired before the unit is restarted.

(7) *Other emission sources.* The owner or operator of a washer, laboratory hood, tablet coating operation, mixing operation or any other process emission source not subject to paragraphs (m)(2) through (m)(6) of this section, and used to manufacture pharmaceuticals shall control the emissions of VOM from such emission sources by:

(i) Air pollution control equipment which reduces by 81 percent or more the VOM that would otherwise be emitted to the atmosphere, or

(ii) A surface condenser which captures all the VOM which would otherwise be emitted to the atmosphere and which meets the requirements of paragraph (m)(2)(i) of this section.

(8) *Testing.* (i) Upon request by the Administrator, the owner or operator of any VOM emission source subject to paragraph (m) or exempt from paragraph (m) of this section by virtue of the provisions of paragraph (m)(1) of this section shall, at his own expense, demonstrate compliance to the Administrator by the methods or procedures listed in paragraph (a)(vi)(A) of this section.

(ii) A person planning to conduct a VOM emissions test to demonstrate compliance with paragraph (m) of this

section shall notify the Administrator of that intent not less than 30 calendar days before the planned initiation of the test.

(9) *Monitoring and recordkeeping for air pollution control equipment—(i) Monitoring.* (A) At a minimum, continuous monitors for the following parameters shall be installed on air pollution control equipment used to control sources subject to paragraph (m) of this section:

(1) Destruction device combustion temperature.

(2) Temperature rise across a catalytic afterburner bed.

(3) VOM concentration on a carbon absorption unit to determine breakthrough.

(4) Outlet gas temperature of a refrigerated condenser.

(5) Temperature of a non-refrigerated condenser coolant supply system.

(B) Each monitor shall be equipped with a recording device.

(C) Each monitor shall be calibrated quarterly.

(D) Each monitor shall operate at all times while the associated control equipment is operating.

(ii) *Recordkeeping.* (A) The owner or operator of a pharmaceutical manufacturing facility shall maintain the following records:

(1) Parameters listed in paragraph (m)(9)(i)(A) of this section shall be recorded.

(2) For sources subject to paragraph (m)(2) of this section, the vapor pressure of VOM being controlled shall be recorded for every process.

(B) For any leak subject to paragraph (m)(6) of this section which cannot be readily repaired within one hour after detection, the following records shall be kept:

(1) The name of the leaking equipment,

(2) The date and time the leak is detected,

(3) The action taken to repair the leak, and

(4) The data and time the leak is repaired.

(C) The following records shall be kept for emission sources subject to paragraph (m)(5) of this section which contain VOL:

(1) For maintenance and inspection:

Environmental Protection Agency

§ 52.741

(i) The date and time each cover is opened,

(ii) The length of time the cover remains open, and

(iii) The reason why the cover is opened.

(2) For production and sampling, detailed written procedures or manufacturing directions specifying the circumstances under which covers may be opened and the procedures for opening covers.

(D) For each emission source used in the manufacture of pharmaceuticals for which the owner or operator of a pharmaceutical manufacturing plant claims emission standards are not applicable, because the emissions are below the applicability cutoffs in paragraph (m)(1)(i) of this section or paragraph (m)(1)(ii) of this section the owner or operator shall:

(1) Maintain a demonstration including detailed engineering calculations of the maximum daily and annual emissions for each such emission source showing that the emissions are below the applicability cutoffs in paragraph (m)(1)(i) or paragraph (m)(1)(ii) of this section, as appropriate, for the current and prior calendar years;

(2) Maintain appropriate operating records for each such emission source to identify whether the applicability cutoffs in paragraph (m)(1)(i) or paragraph (m)(1)(ii) of this section, as appropriate, are ever exceeded; and

(3) Provide written notification to the Administrator within 30 days of a determination that such an emission source has exceeded the applicability cutoffs in paragraph (m)(1)(i) or paragraph (m)(1)(ii) of this section, as appropriate.

(E) Records required under paragraph (m)(9)(ii)(A) of this section shall be maintained by the owner or operator for a minimum of two years after the date on which they are made.

(F) Copies of the records shall be made available to the Administrator upon verbal or written request.

(n)–(p) [Reserved]

(q) *Gasoline distribution*—(1) *Bulk gasoline plants.* (i) Subject to paragraph (q)(1)(v) of this section, no person may cause or allow the transfer of gasoline from a delivery vessel into a stationary

storage tank located at a bulk gasoline unless:

(A) The delivery vessel and the stationary storage tank are each equipped with a vapor collection system that meets the requirements of paragraph (q)(1)(iv)(D) of this section,

(B) Each vapor collection system is operating,

(C) The delivery vessel displays the appropriate sticker pursuant to the requirements of sections 215.584 (b) or (d) of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742),

(D) The pressure relief valve(s) on the stationary storage tank and the delivery vessel are set to release at no less than 0.7 psi or the highest pressure allowed by state or local fire codes or the guidelines of the National Fire Prevention Association, and

(E) The stationary storage tank is equipped with a submerged loading pipe.

(ii) Subject to paragraph (q)(1)(vi) of this section, no person may cause or allow the transfer of gasoline from a stationary storage tank located at a bulk gasoline plant into a delivery vessel unless:

(A) The requirements set forth in paragraphs (q) (1)(i)(A) through (1)(i)(D) of this section are met, and

(B) Equipment is available at the bulk gasoline plant to provide for the submerged filling of the delivery vessel or the delivery vessel is equipped for bottom loading.

(iii) Subject to paragraph (q)(1)(v) of this section, each owner of a stationary storage tank located at a bulk gasoline plant shall:

(A) Equip each stationary storage tank with a vapor control system that meets the requirements of paragraph (q) (1)(i) or (1)(ii) of this section, whichever is applicable,

(B) Provide instructions to the operator of the bulk gasoline plant describing necessary maintenance operations and procedures for prompt notification of the owner in case of any malfunction of a vapor control system, or

(C) Repair, replace or modify any worn out or malfunctioning component or element of design.

(iv) Subject to paragraph (q)(1)(v) of this section, each operator of a bulk gasoline plant shall:

(A) Maintain and operate each vapor control system in accordance with the owner's instructions,

(B) Promptly notify the owner of any scheduled maintenance or malfunction requiring replacement or repair of a major component of a vapor control system,

(C) Maintain gauges, meters or other specified testing devices in proper working order, and

(D) Operate the bulk plant vapor collection system and gasoline loading equipment in a manner that prevents:

(1) Gauge pressure from exceeding 45.7 cm (18 in.) of water and vacuum from exceeding 15.2 cm (6 in.) of water, as measured as close as possible to the vapor hose connection,

(2) A reading equal to or greater than 100 percent of the lower explosive limit (LEL measured as propane) when tested in accordance with the procedure described in "Control of Volatile Organic Compound Leaks from Gasoline Tank Trucks and Vapor Collection Systems", Appendix B, EPA 450/2-78-051 (which is available for purchase from the National Technical Information Services, 5285 Port Royal Road, Springfield, VA 22161), and

(3) Avoidable leaks of liquid during loading or unloading operations.

(E) Provide a pressure tap or equivalent on the bulk plant vapor collection system in order to allow the determination of compliance with paragraph (q)(1)(iv)(D)(1) of this section, and

(F) Within 15 business days after discovery of any leak by the owner, operator, or the Administrator, repair and retest a vapor collection system which exceeds the limits of paragraph (q)(1)(iv)(D)(1) or (2) of this section.

(v) The requirements of paragraphs (q)(1)(i), (1)(iii) and (1)(iv) of this section, shall not apply to:

(A) Any stationary storage tank with a capacity of less than 2,177 l (575 gal), or

(B) Any bulk gasoline plant whose daily gasoline throughput is less than 15,140 l (4,000 gal/day) on a thirty-day rolling average.

(vi) The requirements of paragraph (q)(1)(ii) of this section shall only apply to bulk gasoline plants:

(A) Whose daily gasoline throughput is greater than or equal to 15,140 l (4,000 gal/day) on a thirty-day rolling average, and

(B) That either distribute gasoline to gasoline dispensing facilities subject to the requirements of section 215.583(a)(2) of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742) or that are in Cook, DuPage, Kane, Lake, McHenry or Will County.

(vii) Any bulk gasoline plant which is ever subject to paragraph (q)(1)(i), (ii), (iii) or (iv) of this section shall always be subject to these paragraphs.

(2) [Reserved]

(r) [Reserved]

(s) *Paint and ink manufacturing*—(1) *Applicability.* (i) Paragraph (s) shall apply to all paint and ink manufacturing plants which:

(A) Include process emission sources not subject to subparts (B), (Q) (excluding sections 215.432 and 215.436), (R) (excluding sections 215.447, 215.450, and 215.452), (S), (V), (X), (Y) (sections 215.582, 215.583, and 215.584), or (Z) of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742), or to paragraphs (d), (e) (excluding paragraph (e)(1)(i)(L)), (h) (excluding paragraph (h)(5)), (i), (j), or (q)(1) of this section; and which as a group both:

(1) Have maximum theoretical emissions of 91 Mg (100 tons) or more per calendar year of VOM if no air pollution control equipment were used, and

(2) Are not limited to less than 91 Mg (100 tons) of VOM emissions per calendar year in the absence of air pollution control equipment, through production or capacity limitations contained in a federally enforceable construction permit or a SIP or FIP revision, or

(B) Produce more than 7,570,820 l (2,000,000 gal) per calendar year of paint or ink formulations, which contain less than 10 percent (by weight) water, and ink formulations not containing as the primary solvents water, Magie oil or glycol.

(ii) For the purposes of paragraph (s) of this section, uncontrolled VOM emissions are the emissions of VOM

which would result if no air pollution control equipment were used.

(2) *Exemption for waterbase material and heatset-offset ink.* The requirements of paragraphs (s)(4) and (s)(5) of this section and paragraph (s)(7)(i) of this section shall not apply to equipment while it is being used to produce either:

(i) Paint or ink formulations which contain 10 percent or more (by weight) water, or

(ii) Inks containing Magie oil and glycol as the primary solvent.

(3) *Permit conditions.* No person shall violate any condition in a federally enforceable permit when the condition results in exclusion of the plant or an emission source from paragraph (s).

(4) *Open-top mills, tanks, vats or vessels.* No person shall operate an open-top mill, tank, vat or vessel with a volume of more than 45 l (12 gal) for the production of paint or ink unless:

(i) The mill, tank, vat or vessel is equipped with a cover which completely covers the mill, tank, vat or vessel opening except for an opening no larger than necessary to allow for safe clearance for a mixer shaft. Such cover shall extend at least 1.27 cm (0.5 in.) beyond the outer rim of the opening or be attached to the rim.

(ii) The cover remains closed except when production, sampling, maintenance or inspection procedures require access.

(iii) The cover is maintained in good condition such that, when in place, it maintains contact with the rim of the opening for at least 90 percent of the circumference of the rim.

(5) *Grinding mills.* (i) No person shall operate a grinding mill for the production of paint or ink which is not maintained in accordance with the manufacturer's specifications.

(ii) No person shall operate a grinding mill fabricated or modified after the effective date of paragraph (s) which is not equipped with fully enclosed screens.

(iii) The manufacturer's specifications shall be kept on file at the plant by the owner or operator of the grinding mill and be made available to any person upon verbal or written request during business hours.

(6) *Storage tanks.* (i) The owner or operator shall equip tanks storing VOL

with a vapor pressure greater than 10 kPa (1.5 psi) at 20 °C (68 °F) with pressure/vacuum conservation vents set as a minimum at + /-0.2 kPa (0.029 psi). These controls shall be operated at all times. An alternative air pollution control system may be used if it results in a greater emission reduction than these controls. Any alternative control system can only be allowed if approved by the Administrator as a SIP or FIP revision.

(ii) Stationary VOL storage containers with a capacity greater than 946 l (250 gal) shall be equipped with a submerged-fill pipe or bottom fill. These controls shall be operated at all times. An alternative control system can only be allowed if approved by the Administrator as a SIP or FIP revision.

(7) *Leaks.* The owner or operator of a paint or ink manufacturing plant shall, for the purpose of detecting leaks, conduct an equipment monitoring program as set forth below:

(i) Each pump shall be checked by visual inspection each calendar week for indications of leaks, that is, liquids dripping from the pump seal. If there are indications of liquids dripping from the pump seal, the pump shall be repaired as soon as practicable, but no later than 15 calendar days after the leak is detected.

(ii) Any pump, valve, pressure relief valve, sampling connection, open-ended valve and flange or connector containing a fluid which is at least 10 percent VOM by weight which appears to be leaking on the basis of sight, smell or sound shall be repaired as soon as practicable, but no later than 15 calendar days after the leak is detected.

(iii) A weather proof, readily visible tag, in bright colors such as red or yellow, bearing an identification number and the date on which the leak was detected shall be attached to leaking equipment. The tag may be removed upon repair, that is, when the equipment is adjusted or otherwise altered to allow operation without leaking.

(iv) When a leak is detected, the owner or operator shall record the date of detection and repair and the record shall be retained at the plant for at least two years from the date of each detection or each repair attempt. The

record shall be made available to any person upon verbal or written request during business hours.

(8) *Clean up.* (i) No person shall clean paint or ink manufacturing equipment with organic solvent unless the equipment being cleaned is completely covered or enclosed except for an opening no larger than necessary to allow safe clearance for proper operation of the cleaning equipment, considering the method and materials being used.

(ii) No person shall store organic wash solvent in other than closed containers, unless closed containers are demonstrated to be a safety hazard, or dispose of organic wash solvent in a manner such that more than 20 percent by weight is allowed to evaporate into the atmosphere.

(9) *Compliance schedule.* Every owner or operator of an emission source subject to the control requirements of paragraph (s) of this section shall comply with the requirements of paragraph (s) of this section on and after July 1, 1991.

(10) *Recordkeeping and reporting.* (i) Upon request by the Administrator, the owner or operator of an emission source which claims to be exempt from the requirements of paragraph (s) of this section shall submit records to the Administrator within 30 calendar days from the date of the request which document that the emission source is in fact exempt from paragraph (s) of this section. These records shall include (but are not limited to) the percent water (by weight) in the paint or ink being produced and the quantity of Magie oil, glycol and other solvents in the ink being produced.

(ii) Every owner or operator of an emission source which is subject to the requirements of paragraph (s) of this section shall maintain all records necessary to demonstrate compliance with those requirements at the facility for three years.

(t) [Reserved]

(u) *Miscellaneous fabricated product manufacturing processes—(1) Applicability.* (i) The requirements of paragraph (u) of this section shall apply to a plant's miscellaneous fabricated product manufacturing process emission sources which are not included within any of the source categories

specified in subparts (B), (Q) (excluding sections 215.432 and 215.436), (R) (excluding sections 215.447, 215.450, and 215.452), (S), (V), (X), (Y) (sections 215.582, 215.583, and 215.584), or (Z) of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742), or specified in paragraph (d), (e), (h), (i), (j), or (q)(1) of this section; if the plant is subject to paragraph (u) of this section. A plant is subject to paragraph (u) of this section if it contains process emission sources, not regulated by subparts (B), (Q) (excluding sections 215.432 and 215.436), (R) (excluding sections 215.447, 215.450, and 215.452), (S), (V), (X), (Y) (sections 215.582, 215.583, 215.584), or (Z) of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742), or by paragraph (d), (e) (excluding paragraph (e)(1)(i)(L)), (h) (excluding paragraph (h)(5)), (i), (j), or (q)(1) of this section; which as a group both:

(A) Have maximum theoretical emissions of 91 Mg (100 tons) or more per calendar year of VOM if no air pollution control equipment were used, and

(B) Are not limited to less than 91 Mg (100 tons) of VOM emissions per calendar year in the absence of air pollution control equipment, through production or capacity limitations contained in a federally enforceable construction permit or a SIP or FIP revision.

(ii) If a plant ceases to fulfill the criteria of paragraph (u)(1)(i) of this section, the requirements of paragraph (u) of this section shall continue to apply to a miscellaneous fabricated products manufacturing process emission source which was ever subject to the control requirements of paragraph (u)(3) of this section.

(iii) No limits under paragraph (u) of this section shall apply to emission sources with emissions of VOM to the atmosphere less than or equal to 0.91 Mg (1.0 ton) per calendar year if the total emissions from such sources not complying with paragraph (u)(3) of this section does not exceed 4.5 Mg (5.0 tons) per calendar year.

(iv) For the purposes of paragraph (u) of this section, an emission source shall be considered regulated by a subpart (of the Illinois rules) or paragraph

Environmental Protection Agency

§ 52.741

if it is subject to the limits of that subpart (of the Illinois rules) or paragraph. An emission source is not considered regulated by a subpart (of the Illinois rules) or paragraph if its emissions are below the applicability cutoff level or if the source is covered by an exemption.

(v) For the purposes of paragraph (u) of this section, uncontrolled VOM emissions are the emissions of VOM which would result if no air pollution control equipment were used.

(2) *Permit conditions.* No person shall violate any condition in a permit when the condition results in exclusion of the plant or an emission source from paragraph (u) of this section.

(3) *Control requirements.* Every owner or operator of an emission source subject to paragraph (u) of this section shall comply with the requirements of paragraph (u)(3) (i), (ii) or (iii) of this section:

(i) Emission capture and control techniques which achieve an overall reduction in uncontrolled VOM emissions of at least 81 percent, or

(ii) For coating lines, the daily-weighted average VOM content shall not exceed 0.42 kg VOM/l (3.5 lbs VOM/gal) of coating as applied (minus water and any compounds which are specifically exempted from the definition of VOM) during any day. Owners and Code 215 (incorporated by reference as specified in 40 CFR 52.742), or

(iii) An alternative control plan which has been approved by the Administrator as a SIP or FIP revision.

(4) *Compliance schedule.* Every owner or operator of an emission source subject to the control requirements of paragraph (u) of this section shall comply with the requirements of paragraph (u) of this section on and after July 1, 1991.

(5) *Testing.* Any owner or operator of a VOM emission source which is subject to paragraph (u) of this section shall demonstrate compliance with paragraph (u)(3) of this section by using the applicable test methods and procedures specified in paragraph (a)(4) of this section.

(6) The control requirements in this paragraph apply to the adhesive globe coating operations at Replogle's Broadview facility in Cook County, Il-

linois, instead of the control requirements in paragraph (u)(3) of this section.

(i) After October 6, 1991, no coatings shall at any time be applied which exceed the following emission limitations for the specified coating.

(A) 7.0 lbs VOM per gallon of adhesive coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied to coat globes. Such coating consists of #7879446 Methylene Chloride (RGI #01004100). The Administrator shall be notified at least ten (10) days prior to the use of any replacement adhesive for coating globes.

(B) [Reserved]

(ii) After October 6, 1991, the volume of coatings used shall not exceed the following:

(A) 572 gallons per year total for all coatings specified in paragraph (u)(6)(i)(A) of this section. The yearly volume of coatings used are to be calculated as follows:

(1) Compute the volume of specified coating used each month by the 15th of the following month.

(2) By the 15th of each month, add the monthly coating use for the 12 previous months (to obtain the yearly volume of coatings used).

(B) [Reserved]

(iii) Beginning on October 6, 1991, the owner and operator of the Replogle Globes, Inc. plant in Broadview, Illinois shall keep the following records for each month. All records shall be retained at Replogle Globes, Inc. for three (3) years and shall be made available to the Administrator on request:

(A) The name and identification number of each coating as applied on any adhesive globe coating line.

(B) The weight of VOM per volume and the volume of each coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each month on any adhesive globe coating line.

(7) The control requirements in this paragraph apply to the glass candle container coating line(s) and silk screening machines at the Candle Corporation of America (CCA), Chicago, Illinois facility, instead of the control requirements in paragraph (u)(3) of this section.

(i) After June 1, 1992, no coatings or inks shall at any time be applied, at any coating or ink applicator, which exceed the following emission limitations for the specified coating or ink.

(A) 6.04 pounds (lbs) volatile organic material (VOM) per gallon of clear lacquer/varnish (minus water and any compounds which are specifically exempted from the definition of VOM) as applied to coat glass candle containers. Such clear lacquer/varnish (multi-color) is identified as LP3500. The Administrator must be notified at least 10 days prior to the use of any replacement clear lacquers/varnishes.

(B) 5.23 lbs VOM per gallon of translucent coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied to coat glass candle containers. Such translucent coating (multi-color) is identified as LP3603. The Administrator must be notified at least 10 days prior to the use of any replacement translucent coatings.

(C) 5.84 lbs VOM per gallon of white lacquer (minus water and any compounds which are specifically exempted from the definition of VOM) as applied to coat glass candle containers. Such white lacquer is identified as LP3507. The Administrator must be notified at least 10 days prior to the use of any replacement white lacquers.

(D) 3.40 lbs VOM per gallon of fast dry enamel silk screen printing ink (minus water and any compounds which are specifically exempted from the definition of VOM) as applied to print onto glass candle containers.

(ii) After June 1, 1992, the volume of coating and ink used shall not exceed the following:

(A) 2,164 gallons per month total for all coatings specified in paragraph (u)(7)(i)(A) of this section.

(B) 369 gallons per month total for all coatings specified in paragraph (u)(7)(i)(B) of this section.

(C) 49 gallons per month total for all coatings specified in paragraph (u)(7)(i)(C) of this section.

(D) 50 gallons per month total for all inks specified in paragraph (u)(7)(i)(D) of this Section.

(iii) Beginning on June 1, 1992, the owner and operator of CCA's plant in Chicago, Illinois, shall keep the fol-

lowing records for each month. All records shall be retained at CCA for 3 years and shall be made available to the Administrator on request.

(A) The name and identification number of each coating and ink as applied on any glass candle container coating line or silk screening machine.

(B) The weight of VOM per volume and the volume of each coating and ink (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each month on any glass candle container coating line or silk screening machine.

(iv) After June 1, 1992, no more than 100 gallons per month of cleaning solvent is allowed to be used on the glass candle container coating line(s) at CCA. The only cleaning solvents allowed for use are acetone (identified as LP3525) and methyl ethyl ketone (identified as LP3520). Beginning on June 1, 1992, CCA shall keep monthly records of the type and volume of all cleaning solvents used. All such records shall be retained at CCA for 3 years and shall be made available to the Administrator on request.

(v) After June 1, 1992, no more than 50 gallons per month of cleaning solvent is allowed to be used on the glass candle container silk screening machines at CCA. The only cleaning solvent allowed for use is petroleum naphtha (identified as light aromatic naphtha with 7.28 lbs VOM per gallon, minus water and any compounds which are specifically exempted from the definition of VOM). Beginning on June 1, 1992, CCA shall keep monthly records of the type and volume and the weight of VOM per volume (minus water and any compounds which are specifically exempted from the definition of VOM) of all cleaning solvents used on the glass candle container silk screening machines. All such records shall be retained at CCA for 3 years and shall be made available to the Administrator on request.

(8) The control, recordkeeping and reporting requirements in this paragraph apply to the cellulose food casing manufacturing operations at the Viskase Corporation plant in Bedford Park, Illinois (Cook County) instead of the requirements in paragraph (v) of this section, the other parts of paragraph (u) of

this section, and the recordkeeping requirements in paragraph (y) of this section. Unless otherwise stated, the following requirements must be met by Viskase on and after November 21, 1995.

(i) VOM emissions shall never exceed 3.30 tons per day.

(ii) VOM emissions shall not exceed 2.22 tons per day, on a monthly average, during June, July, and August.

(iii) VOM emissions shall not exceed 2.44 tons per day during June, July, and August.

(iv) Compliance with the emission limits in paragraphs (u)(8) (i) through (iii) of this section, and the records in paragraph (u)(8)(v) of this section, shall be determined using an emission factor of "0.72 pounds of VOM emissions per pound of carbon disulfide consumed."

(v) Viskase must keep the following daily records:

(A) The pounds of carbon disulfide per charge for its Fibrous process. If charges with different levels of carbon disulfide per charge are used the same day, a separate record must be kept for each level of carbon disulfide per charge.

(B) The pounds of carbon disulfide per charge for its NOJAX process. If charges with different levels of carbon disulfide per charge are used the same day, a separate record must be kept for each level of carbon disulfide per charge.

(C) The number of charges per day, for each level of carbon disulfide per charge, used in Viskase's Fibrous process.

(D) The number of charges per day, for each level of carbon disulfide per charge, used in Viskase's NOJAX process.

(E) The total quantity of carbon disulfide used per day in Viskase's Fibrous process, the total quantity of carbon disulfide used per day in Viskase's NOJAX process, and the daily VOM emissions resulting from use of the carbon disulfide.

(F) The monthly use of carbon disulfide, and the monthly VOM emissions resulting from use of the carbon disulfide, during June, July, and August.

(vi) Any violation of the emission limits in paragraphs (u)(8) (i) through (iii) of this section must be reported to

USEPA within 30 days of its occurrence.

(vii) In order to determine daily and monthly VOM emissions, the test methods in paragraph (a)(4) of this section may be used in addition to, and take precedence over, the emission factor cited in paragraph (u)(8)(iv) of this section. Method 15 is to be used instead of Methods 18, 25, and 25A when the test methods in paragraph (a)(4) of this section are used to determine VOM emissions from Viskase's cellulose food casing facility.

(v) *Miscellaneous formulation manufacturing processes*—(1) *Applicability*. (i) The requirements of paragraph (v) of this section shall apply to a plant's miscellaneous formulation manufacturing process emission sources, which are not included within any of the source categories specified in subpart (B), (Q) (excluding sections 215.432 and 215.436), (R) (excluding sections 215.447, 215.450, and 215.452), (S), (V), (X), (Y) (sections 215.582, 215.583, and 215.584), or (Z) of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742), or specified in paragraph (d), (e), (h), (i), (j), or (q)(1) of this section; if the plant is subject to paragraph (v) of this section. A plant is subject to paragraph (v) of this section if it contains process emission sources, not regulated by subpart (B), (Q) (excluding sections 215.432 and 215.436), (R) (excluding sections 215.447, 215.450, and 215.452), (S), (V), (X), (Y) (sections 215.582, 215.583, and 215.584), or (Z) of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742), or by paragraph (d), (e) (excluding paragraph (e)(1)(i)(L)), (h) (excluding paragraph (h)(5)), (i), (j), or (q)(1) of this section; which as a group both:

(A) Have maximum theoretical emissions of 91 Mg (100 tons) or more per calendar year of VOM if no air pollution control equipment were used, and

(B) Are not limited to less than 91 Mg (100 tons) of VOM emissions per calendar year in the absence of air pollution control equipment, through production or capacity limitations contained in a federally enforceable construction permit or a SIP or FIP revision.

(ii) If a plant ceases to fulfill the criteria of paragraph (v)(1)(i) of this section, the requirements of paragraph (v) of this section shall continue to apply to a miscellaneous formulation manufacturing process emission source which was ever subject to the control requirements of paragraph (v)(3) of this section.

(iii) No limits under paragraph (v) of this section shall apply to emission sources with emissions of VOM to the atmosphere less than or equal to 2.3 Mg (2.5 tons) per calendar year if the total emissions from such sources not complying with paragraph (v)(3) of this section does not exceed 4.5 Mg (5.0 tons) per calendar year.

(iv) For the purposes of paragraph (v) of this section, an emission source shall be considered regulated by a subpart (of the Illinois rules) or paragraph if it is subject to the limits of that subpart (of the Illinois rules) or paragraph. An emission source is not considered regulated by a subpart (of the Illinois rules) or paragraph if its emissions are below the applicability cutoff level or if the source is covered by an exemption.

(v) For the purposes of paragraph (v) of this section uncontrolled VOM emissions are the emissions of VOM which would result if no air pollution control equipment were used.

(2) *Permit conditions.* No person shall violate any condition in a permit when the condition results in exclusion of the plant or an emission source from paragraph (v) of this section.

(3) *Control requirements.* Every owner or operator of an emission source subject to paragraph (v) of this section shall comply with the requirements of paragraph (v)(3) (i) or (ii) of this section.

(i) Emission capture and control techniques which achieve an overall reduction in uncontrolled VOM emissions of at least 81 percent, or

(ii) An alternative control plan which has been approved by the Administrator as a SIP or FIP revision.

(4) *Compliance schedule.* Every owner or operator of an emission source subject to the control requirements of paragraph (v) of this section shall comply with the requirements of paragraph

(v) of this section on and after July 1, 1991.

(5) *Testing.* Any owner or operator of a VOM emission source which is subject to paragraph (v) of this section shall demonstrate compliance with paragraph (v)(3) of this section by using the applicable test methods and procedures specified in paragraph (a)(4) of this section.

(6) The control requirements in this paragraph apply to the 7 blenders and 3 moguls of the adhesive coating solution formulation (compounding) operations at the Minnesota Mining and Manufacturing Corporation's (3M) Bedford Park facility in Cook County, Illinois, instead of the control requirements in paragraph (v)(3) of this section.

(i) After September 1, 1991, the following operating restrictions shall apply to 3M's Bedford Park, Illinois, compounding operations.

(A) The combined operating hours for all blenders shall not exceed 8,400 hours per quarter (rolled on a monthly basis). The combined quarterly operating hours of all blenders are to be calculated as follows:

(1) By the 15th of each month, compute the combined monthly operating hours of all blenders during the previous month.

(2) By the 15th of each month, add the monthly operating hours of all blenders for the 3 previous months (to obtain the combined quarterly operating hours of all blenders).

(B) The combined operating hours for all moguls shall not exceed 4,200 hours per quarter (rolled on a monthly basis). The quarterly operating hours of all moguls are to be calculated as follows:

(1) By the 15th of each month, compute the combined monthly operating hours of all moguls during the previous month.

(2) By the 15th of each month, add the monthly operating hours of all moguls for the 3 previous months (to obtain the combined quarterly operating hours of all moguls).

(ii) Beginning on September 1, 1991, the owner and operator of the 3M Bedford Park Plant in Bedford Park, Illinois, shall keep the following records. These records shall be compiled on a monthly basis, be retained at the 3M

facility for a period of 3 years, and be made available to the Administrator upon request.

(A) Separate monthly records for each of the 7 blenders identifying each batch and the length of each batch as well as the total monthly hours of operation for all blenders.

(B) Separate monthly records for each of the 3 moguls identifying each batch and the length of each batch as well as the total monthly hours of operation for all moguls.

(w) *Miscellaneous organic chemical manufacturing processes*—(1) *Applicability*. (i) The requirements of paragraph (w) of this section shall apply to a plant's miscellaneous organic chemical manufacturing process emission sources which are not included within any of the source categories specified in subparts (B), (Q) (excluding sections 215.432 and 215.436), (R) (excluding sections 215.447, 215.450, and 215.452), (S), (V), (X), (Y) (sections 215.582, 215.583, and 215.584), or (Z) of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742), or specified in paragraph (d), (e), (h), (i), (j), or (q)(1) of this section; if the plant is subject to paragraph (w) of this section. A plant is subject to paragraph (w) of this section if it contains process emission sources, not regulated by subparts (B), (Q) (excluding sections 215.432 and 215.436), (R) (excluding sections 215.447, 215.450, and 215.452), (S), (V), (X), (Y) (sections 215.582, 215.583, and 215.584), or (Z) of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742), or by paragraph (d), (e) (excluding paragraph (e)(1)(i)(L)), (h) (excluding paragraph (h)(5)), (i), (j), or (q)(1) of this section; which as a group both:

(A) Have maximum theoretical emissions of 91 Mg (100 tons) or more per calendar year of VOM if no air pollution control equipment were used, and

(B) Are not limited to less than 91 Mg (100 tons) of VOM emissions per calendar year in the absence of air pollution control equipment, through production or capacity limitations contained in a federally enforceable construction permit or a SIP or FIP revision.

(ii) If a plant ceases to fulfill the criteria of paragraph (w)(1)(i) of this sec-

tion, the requirements of paragraph (w) of this section shall continue to apply to a miscellaneous organic chemical manufacturing process emission source which was ever subject to the control requirements of paragraph (w)(3) of this section.

(iii) No limits under paragraph (w) of this section shall apply to emission sources with emissions of VOM to the atmosphere less than or equal to 0.91 Mg (1.0 ton) per calendar year if the total emissions from such sources not complying with paragraph (w)(3) of this section does not exceed 4.5 Mg (5.0 tons) per calendar year.

(iv) For the purposes of paragraph (w) of this section, an emission source shall be considered regulated by a subpart (of the Illinois rules) or paragraph if it is subject to the limits of that subpart (of the Illinois rules) or paragraph. An emission source is not considered regulated by a subpart (of the Illinois rules) or paragraph if its emissions are below the applicability cutoff level or if the source is covered by an exemption.

(v) For the purposes of paragraph (w) of this section, uncontrolled VOM emissions are the emissions of VOM which would result if no air pollution control equipment were used.

(2) *Permit conditions*. No person shall violate any condition in a permit when the condition results in exclusions of the plant or an emission source from paragraph (w) of this section.

(3) *Control requirements*. Every owner or operator of an emission source subject to paragraph (w) of this section shall comply with the requirements of paragraph (w)(3)(i) or (ii) of this section.

(i) Emission capture and control techniques which achieve an overall reduction in uncontrolled VOM emissions of at least 81 percent, or

(ii) An alternative control plan which has been approved by the Administrator as a SIP or FIP revision.

(4) *Compliance schedule*. Every owner or operator of an emission source subject to the control requirements of paragraph (w) of this section shall comply with the requirements of paragraph (w) of this section on and after July 1, 1991.

(5) *Testing.* Any owner or operator of a VOM emission source which is subject to paragraph (w) shall demonstrate compliance with paragraph (w)(3) of this section by using the applicable test methods and procedures specified in paragraph (a)(4) of this section.

(x) *Other emission sources*—(1) *Applicability.* (i) The requirements of paragraph (x) of this section shall apply to a plant's VOM emission sources, which are not included within any of the source categories specified in subpart (B), (Q) (excluding sections 215.432 and 215.436), (R) (excluding sections 215.447, 215.450, and 215.452), (S), (V), (X), (Y) (sections 215.582, 215.583, and 215.584), or (Z) of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742), or specified in paragraph (d), (e), (h), (i), (j), (q)(1), (s), (u), (v) or (w) of this section; if the plant is subject to paragraph (x) of this section if it contains process emission sources, not regulated by subpart (B), (Q) (excluding sections 215.432 and 215.436), (R) (excluding sections 215.447, 215.450, and 215.452), (S), (V), (X), (Y) (sections 215.582, 215.583, and 215.584), or (Z) of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742), or by paragraph (d), (e) of this section (excluding paragraph (e)(1)(i)(L)), (h) (excluding paragraph (h)(5)), (i), (j), or (q)(1) of this section; which as a group both:

(A) Have maximum theoretical emissions of 91 Mg (100 tons) or more per calendar year of VOM if no air pollution control equipment were used, and

(B) Are not limited to less than 91 Mg (100 tons) of VOM emissions per calendar year in the absence of air pollution control equipment, through production or capacity limitations contained in a federally enforceable construction permit or a SIP of FIP revision.

(ii) If a plant ceases to fulfill the criteria of paragraph (x)(1)(i) of this section, the requirements of paragraph (x) of this section shall continue to apply to an emission source which was ever subject to the control requirements of paragraph (x)(3) of this section.

(iii) No limits under paragraph (x) of this section shall apply to emission sources with emissions of VOM to the

atmosphere less than or equal to 2.3 Mg (2.5 tons) per calendar year if the total emissions from such sources not complying with paragraph (x)(3) of this section does not exceed 4.5 Mg (5.0 tons) per calendar year.

(iv) For the purposes of paragraph (x) of this section, an emission source shall be considered regulated by a subpart (of the Illinois rules) or paragraph if it is subject to the limits of that subpart (of the Illinois rules) or paragraph. An emission source is not considered regulated by a subpart (of the Illinois rules) or paragraph of its emissions are below the applicability cutoff level or if the source is covered by an exemption.

(v) The control requirements in paragraphs (u), (v), (w), and (x) of this section shall not apply to sewage treatment plants, vegetable oil processing plants, coke ovens (including by-product recovery plants), fuel combustion sources, bakeries, barge loading facilities, jet engine test cells, pharmaceutical manufacturing, production of polystyrene foam insulation board (including storage and extrusion of scrap where blowing agent is added to the polystyrene resin at the plant), production of polystyrene foam packaging (not including storage and extrusion of scrap where blowing agent is added to the polystyrene resin at the plant), and iron and steel production.

(2) *Permit conditions.* No person shall violate any condition in a permit when the condition results in exclusion of the plant or an emission source from paragraph (x) of this section.

(3) *Control requirements.* Every owner or operator of an emission source subject to paragraph (x) of this section shall comply with the requirements of paragraph (x)(3) (i), (ii) or (iii) of this section.

(i) Emission capture and control equipment which achieve an overall reduction in uncontrolled VOM emissions of at least 81 percent, or

(ii) For coating lines, the daily-weighted average VOM content shall not exceed 0.42 kg VOM/l (3.5 lbs VOM/gal) of coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied during any day. Owners and operators complying with this paragraph

Environmental Protection Agency

§ 52.741

are not required to comply with section 215.301 of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742), or

(iii) An alternative control plan which has been approved by the Administrator as a SIP or FIP revision.

(4) *Compliance schedule.* Every owner or operator of an emissions source which is subject to paragraph (x) of this section shall comply with the requirements of paragraph (x) of this section on and after July 1, 1991.

(5) *Testing.* Any owner or operator of a VOM emission source which is subject to paragraph (x) of this section shall demonstrate compliance with paragraph (x)(3) of this section by using the applicable test methods and procedures specified in paragraph (a)(4) of this section.

(6) The control requirements in this paragraph apply to the varnish operations at the General Motors Corporation, Electro-Motive Division Plant (GMC Electro-Motive), LaGrange, Illinois, instead of the control requirements in paragraph (x)(3) of this section.

(i) After July 1, 1991, no coatings shall at any time be applied which exceed the following emission limitations for the specified coating.

(A) 8.0 lbs VOM per gallon of coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied at each coating applicator to coat Nomex rings. Such coating consists of Monsanto Skybond 705 Polyamide Resin (EMD P/N 9088817) and diluents. The Administrator must be notified at least 10 days prior to the use of any replacement coating(s) and/or diluents for coating Nomex rings.

(B) 6.8 lbs VOM per gallon of coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied at each coating applicator for any coatings not specified in paragraph (x)(6)(i)(A) of this section.

(ii) After July 1, 1991, the volume of coatings used shall not exceed the following:

(A) 600 gallons per year total for all coatings specified in paragraph (x)(6)(i)(A) of this section. The yearly

volume of coatings used are to be calculated as follows:

(1) Compute the volume of specified coating used each month by the 15th of the following month.

(2) By the 15th of each month, add the monthly coating use for the 12 previous months (to obtain the yearly volume of coatings used).

(B) 28,500 gallons per year total for all coatings other than those specified in paragraph (x)(6)(i)(A) of this section. The yearly volume of coatings used are to be calculated as specified in paragraphs (x)(6)(ii)(A)(1) and (x)(6)(ii)(A)(2) of this section.

(iii) Beginning on July 1, 1991, the owner and operator of the General Motors Corporation Electro-Motive Division Plant in LaGrange, Illinois shall keep the following records for each month. All records shall be retained at General Motors for 3 years and shall be made available to the Administrator on request.

(A) The name and identification number of each coating as applied on any coating line within the varnish operation.

(B) The weight of VOM per volume and the volume of each coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each month on any coating line within the varnish operation.

(7) The control, recordkeeping, and monitoring requirements in this paragraph apply to the aluminum rolling mills at the Reynolds Metals Company's McCook Sheet & Plate Plant in McCook, Illinois (Cook County) instead of the control requirements and test methods in the other parts of paragraph (x), and the recordkeeping requirements in paragraph (y) of this section. All of the following requirements must be met by Reynolds on and after July 7, 1995.

(i) Only organic lubricants with initial and final boiling points between 460 degrees F and 635 degrees F, as determined by a distillation range test using ASTM method D86-90, are allowed to be used at Reynolds' aluminum sheet cold rolling mills numbers 1 and 7. All incoming shipments of organic lubricant for the number 1 and

7 mills must be sampled and each sample must undergo a distillation range test to determine the initial and final boiling points using ASTM method D86-90. A grab rolling lubricant sample shall be taken from each operating mill on a monthly basis and each sample must undergo a distillation range test, to determine the initial and final boiling points, using ASTM method D86-90.

(ii) An oil/water emulsion, with no more than 15 percent by weight of petroleum-based oil and additives, shall be the only lubricant used at Reynolds' aluminum sheet and plate hot rolling mills, 120 inch, 96 inch, 80 inch, and 145 inch mills. A grab rolling lubricant sample shall be taken from each operating mill on a monthly basis and each sample shall be tested for the percent by weight of petroleum-based oil and additives by ASTM Method D95-83.

(iii) The temperature of the inlet supply of rolling lubricant for aluminum sheet cold rolling mills numbers 1 and 7 shall not exceed 150 °F, as measured at or after (but prior to the lubricant nozzles) the inlet sump. The temperature of the inlet supply of rolling lubricant for the aluminum sheet and plate hot rolling mills, 120 inch, 96 inch, 80 inch, and 145 inch mills shall not exceed 200 °F, as measured at or after (but prior to the lubricant nozzles) the inlet sump. Coolant temperatures shall be monitored at all the rolling mills by use of thermocouple probes and chart recorders or electronic data recorders.

(iv) All distillation test results for cold mill lubricants, all percent oil test results for hot mill lubricants, all coolant temperature recording charts and/or temperature data obtained from electronic data recorders, and all oil/water emulsion formulation records, shall be kept on file, and be available for inspection by USEPA, for three years.

(8) The control and recordkeeping requirements in this paragraph apply to the silk screen presses and associated ovens, cleaning operations and laminators at Parisian's Novelty Company (Parisian), Chicago, Illinois, facility, instead of the control requirements in paragraphs (x)(8)(u)(3) and (x)(3) of this section and the record-

keeping requirements in paragraph (x)(8)(y) of this section.

(i) After March 1, 1993, no coatings or inks shall at any time be applied, at any coating or ink applicator, which exceed the following emission limitations for the specified coating or ink.

(A) 6.65 pounds (lbs) volatile organic material (VOM) per gallon of ink (minus water and any compounds which are specifically exempted from the definition of VOM) as applied on Parisian's silk screen presses.

(B) 6.4 lbs VOM per gallon of adhesive coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied on Parisian's laminators. Such adhesive is identified as MIX #963.

(ii) After March 1, 1993, the volume of coating and ink used shall not exceed the following:

(A) 2,556 gallons per year total for all inks. The yearly volume of inks used is to be calculated as follows:

(1) Compute the volume of ink used each month by the 15th of the following month.

(2) By the 15th of each month, add the monthly ink usage for the 12 previous months (to obtain the yearly volume of ink used).

(B) 780 gallons per year total for all coatings specified in paragraph (x)(8)(i)(B) of this section. The yearly volume of coatings used are to be calculated as specified in paragraphs (x)(8)(ii)(A)(1) and (x)(8)(ii)(A)(2) of this section.

(iii) Beginning on March 1, 1993, the owner and operator of Parisian's plant in Chicago, Illinois, shall keep the following records for each month. All records shall be retained at Parisian for 3 years and shall be made available to the Administrator on request.

(A) The name and identification number of each coating as applied on any laminator.

(B) The weight of VOM per volume and the volume of each coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each month on any laminator.

(C) The weight of VOM per volume and the volume of each type of ink (minus water and any compounds which are specifically exempted from

Environmental Protection Agency

§ 52.741

the definition of VOM) as applied each month on any screen press.

(iv) After March 1, 1993, no more than 84 gallons per year of denatured alcohol may be used for cleaning labels at Parisian. The yearly volume of denatured alcohol used is to be calculated as specified in paragraphs (x)(8)(ii)(A)(1) and (x)(8)(ii)(A)(2) of this section. Beginning on March 1, 1993, Parisian shall keep monthly records of the type, volume, and VOM content of all solvents used for label cleaning. These records shall be retained at Parisian for 3 years and shall be made available to the Administrator on request.

(v) After March 1, 1993, no more than 7,932 gallons per year of screen wash #956 may be used on Parisian's screen cleaner. The yearly volume of screen wash #956 used is to be calculated as specified in paragraphs (x)(8)(ii)(A)(1) and (x)(8)(ii)(A)(2) of this section. Beginning on March 1, 1993, Parisian shall keep monthly records of the type, volume, and VOM content of all cleaning

compounds used on Parisian's screen cleaner. These records shall be retained at Parisian for 3 years and shall be made available to the Administrator on request.

(vi) After March 1, 1993, only those cleaners specifically identified in paragraphs (x)(8)(iv) and (x)(8)(v) of this section may be used at Parisian.

(9) The control requirements in this paragraph apply to the process sources listed in paragraph (x)(9)(i)(A) of this section at the Nalco Chemical Company facility in Bedford Park, Illinois, instead of the control requirements in paragraph (x)(3) of this section.

(i) *Production and Operation Restrictions.*

(A) On and after October 1, 1992, the maximum volatile organic compound (VOC) emissions per batch, the 12-month rolling average number of batches per year, and the peak limit of batches per month shall not exceed the following limits:

Source	Maximum VOC emissions, lb/batch	12-mo. rolling average limit batch/yr	Peak batch limit, batch/month
(1) System 1 charge	0.16	280	33
System 1 purge	1.35

^a Assumed value.^b Based on monitoring data.

(B) The following equation shall be used to calculate maximum VOC emissions per batch for the process sources listed in paragraphs (x)(9)(i)(A)(I) (charge only and (2) through (28) and (53) of this section:

$$ER(\text{lb / batch}) = \frac{Q_O(\text{gal / batch}) \times M_V(\text{lb / mole}) \times P(\text{mmHg})}{\text{constant}_1([\text{gal}][\text{mmHg}] / \text{mole})}$$

M_V = Molecular weight of the volatile component;

P = Partial pressure of the volatile component for mixtures of liquid made up with more than one chemical; or vapor pressure for pure liquids made up of only one organic chemical; and

$\text{Constant}_1 = (7.45 \text{ gal/ft}^3) \times (385 \text{ ft}^3/\text{mole}) \times (760 \text{ mmHg})$.

Where:

ER = VOC emission rate;

Q_O = Quantity of organic per batch or charge rate;

(C) The following equation shall be used to calculate the VOC emissions per batch from the process sources listed in paragraph (x)(9)(i)(A)(I) of this section (purge only) and (29) through (32) of this section:

$$ER(\text{lb / batch}) = \frac{PR(\text{ft}^3 / \text{batch}) \times M_V(\text{lb / mole}) \times P(\text{mmHg})}{\text{constant}_2([\text{ft}^3][\text{mmHg}] / \text{mole})}$$

Where:

PR = Nitrogen purge rate; and

$\text{Constant}_2 = (385 \text{ ft}^3/\text{mole}) \times (760 \text{ mmHg})$.

(D) The following equation shall be used to calculate the VOC emissions per batch from the drum station listed

at paragraph (x)(9)(i)(A)(33) of this section:

$$ER(\text{lb/batch}) = (0.40 \times [ER_{28-T-217-218}]) + (0.60 \times [ER_{28-T-214-216}])$$

(E) The following equation shall be used to calculate the VOC emissions

Environmental Protection Agency

§ 52.741

per batch from the V-4SAC listed at paragraph (x)(9)(i)(A)(34) of this section:

$$ER(\text{lb / batch}) = \frac{FR_{1\text{mmHg}}(\text{lb / batch}) \times M_v(\text{lb / mole}) \times P_{v2}(\text{mmHg})}{M_a(\text{lb / mole}) \times (760 - P_{v2})(\text{mmHg})}$$

Where:

$FR_{1\text{mmHg}}$ = Maximum air flow rate to maintain 1 mmHg;

M_a = Molecular weight of air; and

P_{v2} = Vapor pressure of organic at 65 °F and 760 mmHg.

(F) The following equation shall be used to calculate the VOC emissions per batch from 20-CT-155 listed at paragraph (x)(9)(i)(A)(35) of this section:

$$ER(\text{lb / batch}) = [ER_{\text{tot}}(\text{lb / hr}) - ER_{V-4SAC}(\text{lb / hr})] \times \text{hr / batch}$$

Where:

ER_{tot} = Total system emission rate calculated using the following equation:

$$ER_{\text{tot}}(\text{lb / hr}) = \frac{FR_{1\text{mmHg}}(\text{lb / hr}) \times M_v(\text{lb / mole}) \times P_{v1}(\text{mmHg})}{M_a(\text{lb / mole}) \times (350 - P_{v1})(\text{mmHg})}$$

Where:

P_{v1} = Vapor pressure of organic at 200 °F and 350 mmHg.

(G) The following equation shall be used to calculate the VOC emissions per hour from 12-SE-100 listed at paragraph (x)(9)(i)(A)(36) of this section:

$$ER(\text{lb/hr}) = \text{Evap}(\text{gm/cm}^2 \text{ sec}) \times \text{area}(\text{cm}^2) \times 3600 \text{ sec/hr}$$

Where:

Evap = Evaporation rate from a surface 8.93 cm × 8.9 cm (lb/[cm²] [sec]) calculated using the following equation:

$$\text{Evap} = 10^{-7} M_v 0.71 \times [0.034 (P_e - P_d)^{1.25} + 156 (P_e - P_d)]$$

Where:

P_e = Partial pressure of the component from the spilled liquid;

P_d = Partial pressure of the component in the incident air stream, assumed to be 0 mmhg; and

Area = Surface area of the liquid.

(H) The following equation shall be used to calculate the VOC emissions per batch from the drum exhaust hood A listed at paragraph (x)(9)(i)(A)(37) of this section:

$$ER(\text{lb / batch}) = \frac{FR(\text{ft}^3 / \text{batch}) \times M_v(\text{lb / mole}) \times P(\text{mmHg})}{\text{constant}_2 \left([\text{ft}^3][\text{mmHg}] / \text{mole} \right)}$$

Where:

FR = Air flow rate.

(I) The following equation shall be used to calculate the VOC emissions per

batch from 24-T-230 listed at paragraph (x)(9)(i)(A)(38) of this section:

$$\text{ER}(\text{lb} / \text{batch}) = \frac{(V_H - V_A) \times M_V \times \text{PP}_{135^\circ\text{F}} \times 0.5}{\text{constant}_3}$$

Where:

V_H = Head space volume at heated temperature 135 °F;

V_A = Head space volume at ambient temperature 68 °F;

$\text{PP}_{135^\circ\text{F}}$ = Partial pressure of volatile component at 135 °F.

$\text{Constant}_3 = (434 \text{ ft}^3/\text{mole})(7.45 \text{ gal}/\text{ft}^3) \times (760 \text{ mmHg})$

(J) The following equations shall be used to calculate the VOC emissions per batch from the process sources listed in paragraph (x)(9)(i) (39) through (47) of this section:

$$\text{ER}_A(\text{lb} / \text{yr}) = \frac{V_R(\text{gal}) \times M_V(\text{lb} / \text{mole}) \times P(\text{mmHg}) \times \text{org}}{t(\text{yr}) \times \text{constant}_1 ([\text{gal}] [\text{mmHg}] / \text{mole})}$$

$$\text{ER}_B(\text{lb} / \text{yr}) = C_B \times V_T(\text{gal}) \times d_B(\text{lb} / \text{gal}) \times (\text{charges} / \text{yr}) \times \text{org}$$

$$\text{ER}_C(\text{lb} / \text{yr}) = C_C \times \text{Evap}(\text{gal} / \text{min}) \times d_C(\text{lb} / \text{gal}) \times (\text{min} / \text{yr}) \times \text{org}$$

Where:

V_R = Refill volume;

t = Time between refills;

org = Fraction of organic component in product;

C_B = Concentration of chemical B fed 3 times/week;

V_T = Tower volume;

d_B = Density of chemical B;

C_C = Concentration of chemical C fed continuously;

Evap = Evaporation rate; and

d_C = Density of chemical C.

(K) The number of batches for each process source shall be calculated as follows:

(1) Compute the monthly number of batches for each process source by the 15th day of the following month.

(2) By the 15th day of each month, add the monthly number of batches for each process source for the 12 previous months to obtain the total number of batches per year.

(ii) *Recordingkeeping.* (A) On and after October 1, 1992, the owner and operator of the Nalco Chemical Company facility in Bedford Park, Illinois, shall keep the following records for all process

sources listed in paragraphs (x)(9)(i)(A) (1) through (53) of this section. These records shall be maintained for the units specified in paragraphs (x)(9)(i) (A) through (K) of this section, be compiled on a monthly basis, be retained at the facility for a period of 3 years, and be made available to the Administrator upon request.

(B) [Reserved]

(1) Calculations of the pounds per batch or pounds per hour (as appropriate) for each batch for each process source. This includes the information necessary for each calculation.

(2) The monthly number of batches for each process source.

(3) The total number of batches per year for the 12 previous months for each process source.

(10) The control requirements in this paragraph apply to the storage tanks listed in paragraph (x)(10)(i)(A) of this section at the Nalco Chemical Company facility in Bedford Park, Illinois, instead of the control requirements in paragraph (x)(3) of this section.

(i) *Production and Operation Restrictions.* (A) On and after October 1, 1992,

Environmental Protection Agency

\$ 52.741

the product of the molecular weight of vapor in each storage tank (M_v), the true vapor pressure at bulk liquid conditions for each tank (P), and the paint factor (F_p); the storage tank maximum

yearly throughput for each tank; and the maximum monthly throughput for each tank shall not exceed the following limits:

Tank No.	$M_v \times P \times F_p$, (lb) (mmhg)/ lb-mole	Yearly throughput, gal/yr	Monthly throughput, gal/month
